AE5002	Architectural Engineering Capstone II	3
	Technical Electives Six credit hours required.	6
	Additional General Education course. Select one course from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Architectural Engineering

BSAE

Architectural Engineering Class of 2025

Duration: 5 Years
Minimum Credits: 126 Credits

Fall Semester 2020

Course	Title/Desc	Credit
AE1100	Introduction to Architectural Engineering	1
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4

Spring Semester 2021

Course	Title/Desc	Credit
AE1011	Architectural Skills I	4
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS	1
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Fall Semester 2021

Course	Title/Desc	Credit
AE1012	Architectural Skills II	3
AE2062	Building Construction Science	3
CVE2031	Statics (C- min)	2
CVE2032	Basic Strength of Materials (C- min)	2
MATH2074	Dynamical Systems	3
PHYS2002	College Physics II (Calculus-based)	4
PHYS2002L	College Physics Lab II (Calculus-based)	1

Spring Semester 2022

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer Semester 2022

Course	Title/Desc	Credit
CVE2003C	Construction Materials and Lab	3
CVE2005	Fluid Mechanics (C- min)	3
CVE3001	Structural Analysis (C- min)	3
ENGL2089	Intermediate Composition	3
MATH2076	Linear Algebra	3
STAT2037	Probability and Statistics I	3

Fall Semester 2022

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring Semester 2023

Course	Title/Desc	Credit
AE3041	Principles of HVAC (C- min)	3
AE3043	Building Physics (C- min)	2
AE3044	Principles of Lighting and Electricity (C- min)	2
ARCH3004	Architectural Studio 1 (C- min)	4
CVE3004	Structural Loads and Systems	3
SAID1021	Modernism and Form: History of Architecture 1750 to Present	3

Summer Semester 2023

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall Semester 2023

Students continuing into the March program must meet their advisor for a plan of study.

Course	Title/Desc	Credit
AE4041C	HVAC Systems 1 (C- min)	2
AE4042C	Hydronic and Plumbing Systems (C- min)	2

Spring Semester 2024

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2024

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
AE4044	Lighting Systems 1 (C- min)	2
AE4045	Power and Electrical Systems 1 (C- min)	2
ARCH4005	Architectural Studio 2 (C- min)	4
PD2050	Mid-Curricular Co-op Community for Engineering	1
	Technical Elective Three credit hours required.	3

Fall Semester 2024

Course	Title/Desc	Credit
AE5001	Architectural Engineering Capstone I (C- min)	3
BoK: SCE	Society, Culture, & Ethics (SCE) Elective	3
	Technical Electives Six credit hours required.	6

Spring Semester 2025

Course	Title/Desc	Credit
AE5002	Architectural Engineering Capstone II	3
	Additional General Education course. Select one course from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3
	Technical Electives Six credit hours required.	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Aerospace Engineering

Duration: 5 Years Total Credits: 133 Award: BSAEROE

Overview

The University of Cincinnati's B.S. in Aerospace Engineering Degree is the country's second oldest program of its kind. Aerospace engineering takes a deep exploration of advanced science and technology in the design and development of flight vehicles; degree study includes the analysis and design of aircraft, spacecraft, missiles, rockets, and satellites.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Gain hands-on training in the fields of fluid mechanics, propulsion, structures, controls, and electronics
- Take courses that cover the analysis and design of aircraft, spacecraft, missiles, rockets and satellites
- Customize your experience with more than 600 organizations, including Aerocats, Hyperloop UC, American institute of Aeronautics and Astronautics, SEDS Battle of Rockets Design Competition, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as NASA, General Electric, Gulfstream Aerospace, TECT Aerospace, and the U.S Air Force Research Laboratory

Career

Careers in Aerospace Engineering are challenging and stimulating. Possible career paths include:

- Aircraft, spacecraft, and missile design and testing
- Defense technology design
- Space exploration
- Aerospace product and part manufacturing
- Commercial airline diagnostics
- General engineering outside of the aerospace industry

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Aerospace Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Aerospace and Similarly Named Engineering Programs Program Criteria.

Biomedical Engineering

Duration: **5 Years** Total Credits: **128** Award: **BSBME**

Overview

The B.S. in Biomedical Engineering degree program at the University of Cincinnati focuses on practical, applied learning techniques. Biomedical engineering is an exciting, rapidly growing field that allows graduates to relate their knowledge and skills to the prevention of injury and improvements in the diagnosis and treatment of medical disorders.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Choose from two distinct tracks: Medical Device Innovation and entrepreneurship or Research Translational Innovation and Entrepreneurship
- Take courses that cover the forces, motions, shape changes, and biomechanics of biological tissues and organ systems, designing surgical instruments, artificial organs, prosthetics, and care delivery systems
- Customize your experience with more than 600 organizations, including Biomedical Engineering Society, EnableUC, CadUCea, May We Help, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as AtriCure, Inc., Boston Scientific, Cincinnati Children's Hospitals, Ethicon Endo-Surgery, Mitek Sports Medicine, Enable Injections, and Kinetic Vision

Career

Biomedical Engineers may work in manufacturing, higher education, medicine, or research facilities. Possible career paths include:

- Medical device design
- Technical sales
- Medical device manufacturing
- Medical equipment testing and maintenance
- Biomedical research and product development
- Technical advising

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)

- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Bioengineering and Biomedical and Similarly Named Engineering Programs Program Criteria.

Summer Semester 2029

Course	Title/Desc	Credit
BME4035C	Experimental Characterization of Biomaterials	1
BME4040	Fluid Mechanics and Transport in Biomedical Engineering	3
BME4051	Biomaterials in Medical Devices	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course See Requirement below.	3
	Technical Elective	3

BME Second Focus course for Research Methods

Course	Title/Desc	Credit
BME4010	Research Design II	3

BME Second Focus course for Medical Device Innovation

Course	Title/Desc	Credit
BME4050	Medical Device Design II	3

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2029

Course	Title/Desc	Credit
BME5003C	BME Senior Capstone I	3
BME	BME Elective	6
	General Education course See requirement to the right.	3
	Technical/Professional Electives	3

Spring Semester 2030

Course	Title/Desc	Credit
BME5004C	BME Senior Capstone II	3
BME	BME Elective	3
	Technical/Professional Elective	3
	General Education Course See requirement to the right.	3

General Education Requirements

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics: Select one course with a SCE BoK designation	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Requirement

Course	Title/Desc	Credit
BoK: FA,HP,HU,SS	Select one course from two different BoK areas for a total of two courses: Fine Arts (FA), Historical Perspectives (HP), Humanities & Literature (HU), Social Sciences (SS).	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Engineering

BSBME

Biomedical Engineering (BS) Curriculum Class of 2029 Section I

Duration: 5 Years

★Minimum Credits: 128 Credits

Fall Semester 2024

Course	Title/Desc	Credit
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Spring Semester 2025

Course	Title/Desc	Credit
BME1050	Computer-Aided Design	2
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1062	Calculus II (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4

Fall Semester 2025

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring Semester 2026

Course	Title/Desc	Credit
BME2021	Statics and Introduction to Strength of Materials (C- min)	3
BME3060	Introduction to Biostatistics	3
MATH2074	Dynamical Systems (C- min)	3
PHYS2002	College Physics II (Calculus-based)	4
BIOL	Biology Elective BIOL1081 or higher	3

Summer Semester 2026

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall Semester 2026

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I	4
BME2030	Quantitative Physiology	3
BME2040	Solid Mechanics	3
BME2081C	Electric Circuits	3

BME First Focus course

Course	Title/Desc	Credit
BME2060	Biomedical Design and Research Methods	3

Spring Semester 2027

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer Semester 2027

Course	Title/Desc	Credit
BME3020C	Sensing and Measurements	4
ENGL4092	Technical and Scientific Writing	3
	Technical/Professional Elective	3
	General Education See requirement below	3

BME Second Focus course for Research Methods Focus

Course	Title/Desc	Credit
BME3010	Research Design I	3

BME Second Focus course for Medical Device Innovation Focus

Course	Title/Desc	Credit
BME3050	Medical Device Design I	3

Fall Semester 2027

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Spring Semester 2028

Course	Title/Desc	Credit
BME4051	Biomaterials in Medical Devices	3
BME	BME4030 or BME4040 Biological System Control and Dynamics with Adaptive Methods or Fluid Mechanics and Transport in Biomedical Engineering	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course See Requirement below.	6

BME Third Focus course for Research Methods Focus

Course	Title/Desc	Credit
BME4010	Research Design II	3

BME Third Focus course for Medical Device Innovation Focus

Course	Title/Desc	Credit
BME4050	Medical Device Design II	3

Summer Semester 2028

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2028

Course	Title/Desc	Credit
BME5001	BME Senior Capstone I	6
BME	BME Elective	3
	Technical/Professional Elective	3
	General Education course See requirement to the right.	3

Spring Semester 2029

Course	Title/Desc	Credit
BME5002	BME Senior Capstone II	6
BME	BME Elective	3
	Technical/Professional Elective	6

General Education Requirements

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics: Select one course with a SCE BoK designation	3

Additional General Education course.

Course	Title/Desc	Credit
	Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Distribution Requirement

Course	Title/Desc	Credit

Course	Title/Desc	Credit
BoK: FA,HP,HU,SS	Select one course from two different BoK areas for a total of two courses: Fine Arts (FA), Historical Perspectives (HP), Humanities & Literature (HU), Social Sciences (SS).	6

Fall Semester 2025

Course	Title/Desc	Credit
BME	BME4030 or BME4040 Select either Biological System Control and Dynamics with Adaptive Methods or Fluid Mechanics and Transport in Biomedical Engineering	3
BME4051	Biomaterials in Medical Devices	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course See Requirement below.	6

BME Third Focus course for Research Methods

Course	Title/Desc	Credit
BME4010	Research Design II	3

BME Third Focus course for Medical Device Innovation

Course	Title/Desc	Credit
BME4050	Medical Device Design II	3

Spring Semester 2026

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2026

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2026

Course	Title/Desc	Credit
BME5001	BME Senior Capstone I	6
BME	BME Elective	3
	Technical/Professional Elective	3
	General Education course See requirement to the right.	3

Spring Semester 2027

Course	Title/Desc	Credit
BME5002	BME Senior Capstone II	6
BME	BME Elective	3
	Technical/Professional Elective	6

General Education Requirements

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics: Select one course with a SCE BoK designation	3

Additional General Education course.

Course	Title/Desc	Credit
	Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Distribution Requirement

Course	Title/Desc	Credit

Course	Title/Desc	Credit
BoK: FA,HP,HU,SS	Select one course from two different BoK areas for a total of two courses: Fine Arts (FA), Historical Perspectives (HP), Humanities & Literature (HU), Social Sciences (SS).	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Engineering

BSBME

Biomedical Engineering (BS) Curriculum Class of 2026 Section I

Duration: 5 Years
★Minimum Credits: 128 Credits

Fall Semester 2021

Course	Title/Desc	Credit
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Spring Semester 2022

Course	Title/Desc	Credit
BME1050	Computer-Aided Design	2
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1062	Calculus II (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4

Fall Semester 2022

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring Semester 2023

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I	4
BME2020	Statics and Dynamics	3
ENGL4092	Technical and Scientific Writing	3
MATH2074	Dynamical Systems	3
PHYS2002	College Physics II (Calculus-based)	4

Summer Semester 2023

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall Semester 2023

Course	Title/Desc	Credit
BME2040	Solid Mechanics	3
BME2081C	Electric Circuits	3
BME3060	Introduction to Biostatistics	3

BME First Focus course

Course	Title/Desc	Credit
BME2060	Biomedical Design and Research Methods	3

BME Option
Select one course

Course	Title/Desc	Credit
BME2000	Introduction to Biomedical Engineering in the Clinical Environment	3
BME2030	Quantitative Physiology	3

Spring Semester 2024

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer Semester 2024

Course	Title/Desc	Credit
BME3020C	Sensing and Measurements	4
BIOL	Biology Elective BIOL1081 or higher	3
	Technical/Professional Elective	3
	General Education See requirement below	3

BME Second course for Research Methods Focus

Course	Title/Desc	Credit
BME3010	Research Design I	3

BME Second course for Medical Device Innovation Focus

Course	Title/Desc	Credit
BME3050	Medical Device Design I	3

Fall Semester 2024

Course	Title/Desc	Credit

Spring Semester 2025

Course	Title/Desc	Credit

Summer Semester 2025

Course	Title/Desc	Credit

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Course	Title/Desc	Credit
BME4051	Biomaterials in Medical Devices	3
BME	BME4030 or BME4040 Biological System Control and Dynamics with Adaptive Methods or Fluid Mechanics and Transport in Biomedical Engineering	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course See Requirement below.	6

BME Third course for Research Methods Focus

Course	Title/Desc	Credit
BME4010	Research Design II	3

BME Third course for Medical Device Innovation Focus

Course	Title/Desc	Credit
BME4050	Medical Device Design II	3

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2025

Course	Title/Desc	Credit
BME5001	BME Senior Capstone I	6
BME	BME Elective	3
	Technical Elective	3
	General Education course See requirement to the right.	3

Spring Semester 2026

Course	Title/Desc	Credit
BME5002	BME Senior Capstone II	6
BME	BME Elective	3
	Technical/Professional Electives	6

General Education Requirement

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Civil Engineering

Duration: **5 Years** Total Credits: **130** Award: **BSCE**

Overview

As a Civil Engineering B.S. student at the University of Cincinnati, you will master the fundamental skills to design, construct, rehabilitate, and improve the nation's infrastructure. From conception to construction, projects conducted by Civil Engineers include bridges, highways, railways, tunnels, airports, dams, water treatment systems and buildings.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Take courses that cover the analysis and design of elements and systems in the areas of structural, geotechnical, transportation, construction, and water resources.
- Customize your experience with more than 600 organizations, including American Society of Civil Engineers, the American Concrete Institute, the Construction Competition Club, Engineers Without Borders, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as Ohio Department of Transportation, Kokosing Construction, Bayer Becker, Messer Construction, Walsh Construction and the Kleingers Group

Career

Civil Engineers may work in construction, higher education, or government agencies. Possible career paths include:

- Structural design
- Construction project management
- Environmental maintenance

Civil Engineering (BS) Curriculum Class of 2026
Civil Engineering (BS) Curriculum Class of 2025

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Civil and Similarly Named Engineering Programs Program Criteria.

Civil Engineering

BSCE

Civil Engineering (BS) Curriculum Class of 2030

Duration: 5 Years

★Minimum Credits: 130 Credits

Fall Semester 2025

Course	Title/Desc	Credit
CVE1100	Introduction to Civil Engineering	1
ENED1001C	Engineering Design Thinking I (C- min)	1
ENED1021	Engineering Applications I (C- min)	2
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2026

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
CM1001	Construction Drawings I	3
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2026/Spring Semester 2027

Coursework Semeter

Course	Title/Desc	Credit
CVE2001C	Civil Engineering Measurements	3
CVE2033	Statics for CVE and AE (C- min)	3
MATH2074	Dynamical Systems	3

Science Option

Complete lecture & lab in either Chemistry or Physics.

Course	Title/Desc	Credit
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
PHYS2002	College Physics II (Calculus-based)	4
PHYS2002L	College Physics Lab II (Calculus-based)	1

COOP Semester

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer Semester 2027/Fall Semester 2027

Coursework Semester

Course	Title/Desc	Credit
CM2001	Construction Documents, Law & Project Delivery Systems	3
CVE2003C	Construction Materials and Lab	3
CVE2004	Transportation Infrastructure Engineering	3
CVE2034	Basic Strength of Materials for CVE and AE (C- min)	3
	Coursework option: General Education course if coursework taken in the Summer or GEOL3074 if coursework taken in the Fall.	3
	General Education course	3

COOP Semester

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring Semester 2028/Summer Semester 2028

Coursework Semester

Course	Title/Desc	Credit
CVE3001	Structural Analysis (C- min)	3
CVE2005	Fluid Mechanics	3
ENGL4092	Technical and Scientific Writing	3
MATH2076	Linear Algebra	3
	Technical Elective	3
	Coursework option: General Education course if coursework taken in Summer or GEOL3074 if coursework taken in Spring.	3

COOP Semester

Course	Title/Desc	Credit

Fall Semester 2028/Spring Semester 2029

Coursework Semester

Course	Title/Desc	Credit
CVE3002	Soil Mechanics	3
CVE3002L	Soil Mechanics Laboratory	1
CVE	CVE Elective	3
ENVE4093	Hydraulic Systems	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course	3

Course Option

Select one of the following courses

Course	Title/Desc	Credit

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Course	Title/Desc	Credit
CM3034	Construction Estimating and Costing	3
CVE5145	Heavy Highway Estimating	3

COOP Semester

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2029/Fall Semester 2029

Summer 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall 2029

Course	Title/Desc	Credit
CVE3003	Reliability	3
CVE5001	Integrated Design I	1
	CVE Construction Engineering Area of Proficiency	3
	CVE Geotechnical Engineering Area of Proficiency	3
	CVE Structural Engineering Area of Proficiency	3
	CVE Transportation Engineering Area of Proficiency	3

Spring Semester 2030

Course	Title/Desc	Credit
CVE5002	Integrated Design II	2
CVE5003	Professional Issues in Civil Engineering	1
CVE	CVE Electives	9
	General Education course	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Complete one course with a SCE Breadth of Knowledge designation	3

American Civic Literacy - Select one course

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Requirement

Complete 2 courses. Each must be from a different area.

Course	Title/Desc	Credit
BoK: FA,HP,HU,SS	Fine Arts, Historical Perspectives, Humanities & Literature, Social Sciences.	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Civil Engineering

Chemical Engineering

Duration: **5 Years** Total Credits: **124** Award: **BSCHE**

Overview

As a student in the Chemical Engineering B.S. program at the University of Cincinnati, you will gain the knowledge and skills to produce, design, transport and transform energy and materials to improve today's society. Chemical engineers use their expertise in chemical reactions and separations to solve environmental problems and produce new materials on a large scale.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Gain hands-on training to design and optimize large-scale processes to produce petrochemicals, plastics, fibers, fuel cells, pharmaceuticals, and microelectronics
- Take courses that cover the materials, transport phenomena, process dynamics and controls, and systems analysis
- Customize your experience with more than 600 organizations, including American Institute of Chemical Engineering, American Society of Quality Engineers, ChemE Car, ChemCats, and more
- Build an impressive resume at companies such as BASF Corporation, The Dow Chemical Company, Johnson & Johnson Medical Center, Patheon Pharmaceuticals, and Procter & Gamble

Career

Careers in Chemical Engineering are transformative and often lead to ground-breaking developments. Possible career paths include:

- Chemical manufacturing
- Energy engineer
- Technical sales and support
- Environmental management
- Product and materials development
- Chemical processing

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)

- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition students page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Engineering Programs Program Criteria.

Construction Management

Duration: **5 Years** Total Credits: **122** Award: **BSCM**

Overview

The University of Cincinnati's B.S. in Construction Management Degree takes a deep exploration of the design-build-construct continuum. As a student in the Construction Management program, you will master the fundamental technical and management principles to lead development's schedule, cost, quality, safety, and scope to improve today's society.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Gain hands-on training in the fields of construction methods, project scheduling, budgeting, and project controls
- Take courses that cover all aspects of the design-build-construct continuum and includes focuses in management, engineering, and business
- Customize your experience with more than 600 organizations, including Construction Student Association, competitions such as Associated Builders and Contractors National Student Competition, Design-Build Institute of America's National Student Competition, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as Messer Construction Company, Danis Building Construction Company, Helix Electric, Walsh Construction, and Turner Construction

Career

Careers in Construction Management offer the ability to gain responsibility quickly, becoming job-site superintendents, project managers and officers of companies. Plus, job opportunities are available worldwide. Graduates typically are employed by:

- General contractors
- Specialty contractors
- Construction management firms
- Building owners
- Corporate builders
- Developers
- Engineering firms
- Manufacturers
- Utility companies
- Government agencies
- Educational and health institutions.

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and statistics or trigonometry. Pre-calculus is highly recommended. (4 units)
- Science, including Chemistry or Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Construction Management program is accredited by the Applied and Natural Science Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Construction Management and Similarly Named Programs Program Criteria.

Construction Management

BSCM

Construction Management Class of 2030

Duration: 5 Years

★Minimum Credits: 121 - 122 Credits

Fall 2025

Course	Title/Desc	Credit
CM1001	Construction Drawings I	3
CM1100	CM First Year Seminar	1
CM2003	Construction Safety	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2

CAlculus - Select one course.

Course	Title/Desc	Credit
MATH1061	Calculus I	4
MATH1044	Applied Calculus I	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Spring 2026

Course	Title/Desc	Credit
CM1002	Construction Drawings II	3
COMM1071	Introduction to Effective Speaking	3
ENGL1001	English Composition (C- min)	3
PHYS1051	General Physics I (Algebra-based)	4
PHYS1051L	General Physics Lab I (Algebra-based)	1
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall 2026/Spring 2027

Coursework Semester

Course	Title/Desc	Credit
CM2001	Construction Documents, Law & Project Delivery Systems	3
CM2004	Construction Equipment	2
CM2031	Statics for CM	2
CM2032	BSOM for CM	2
CVE2001C	Civil Engineering Measurements	3
PSYC1001	Introduction to Psychology	3

COOP Semester

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2027/Fall 2027

Coursework Semester

Course	Title/Desc	Credit

Computer Engineering

Duration: **5 Years** Total Credits: **127** Award: **BSCOMPE**

Overview

The B.S. in Computer Engineering degree program at the University of Cincinnati integrates pertinent science and mathematics courses with electrical engineering and computer courses in order to develop an engineer capable of designing and analyzing all aspects of modern computer systems. Students learn to think outside the box to develop creative solutions to problems including the design and analysis of computer hardware and software.

Career

Computer Engineers may work in manufacturing, higher education, or research facilities. Possible career paths include:

- Technology and computer design
- Hardware/software engineering
- Computer testing
- Computer manufacturing

Minoring

Electrical and computer engineering undergraduates have the option of selecting one of several minors offered by the department, such as Biomedical Electronics & Computing, Computer Science, Communications & Signal Processing, Electric Energy & Smartgrid, Embedded Systems, Nanoscience & Nanotechnology, Robotics & Automation, and Very Large Scale Integrated Circuits.

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs Program Criteria.

Computer Engineering

BSCOMPE

Computer Engineering Class of 2030 Section I

Duration: 5 Years

★Minimum Credits: 127 Credits

Fall Semester 2025

Course	Title/Desc	Credit
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2026

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
EECE1080C	Programming for ECE (C- min)	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2026

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring Semester 2027

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2064	Signals & Systems 1 with Differential Equations (C- min)	2
MATH2063	Multivariable Calculus	4
PHYS2076	Semiconductor Physics for Engineers	4

Summer Semester 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall Semester 2027

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE2080C	Engineering Data Structures (C- min)	2
EECE3064	Signals and Systems 2 (C- min)	4
MATH2076	Linear Algebra	3

Spring Semester 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer Semester 2028

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3071	Electronics II	3
EECE3071L	Electronics Laboratory II	1
EECE3093C	Software Engineering (C- min)	4
PD2050	Mid-Curricular Co-op Community for Engineering	1

Fall Semester 2028

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Spring Semester 2029

Course	Title/Desc	Credit
EECE4029	Operating Systems & Systems Programming (C- min)	3
EECE4038C	Embedded System Design	3

Summer Semester 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
EECE4040	Advanced Data Structures and Algorithms (C- min)	3
ENGL4092	Technical and Scientific Writing	3
	General Education Course	3

Select one course.
Students pursuing a Mathematics minor should select STAT2037.

Course	Title/Desc	Credit
STAT2037	Probability and Statistics I (C- min)	3
ENED3066	Engineering Statistics (C- min)	3

Fall Semester 2029

Course	Title/Desc	Credit
EECE5031	Computer Engineering Senior Design I (C- min)	3
	EECE Electives	6
	Professional Elective	3
	General Education Course	3

Spring Semester 2030

Course	Title/Desc	Credit
EECE5032	Computer Engineering Senior Design II (C- min)	3
	EECE Elective	3
	Professional Elective	3
	General Education Course	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics. Select one course with an SCE BoK designation	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Rquirement

Course	Title/Desc	Credit
BoK: FA,HP,SS	Select one course from one of the following BoK areas: Fine Arts (FA), Historical Perspectives (HP), Social Sciences (SS).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Engineering

BSCOMPE

Computer Engineering Class of 2025 Section II

Duration: 5 Years

★Minimum Credits: 127 Credits

Fall Semester 2020

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4

Spring Semester 2021

Course	Title/Desc	Credit
EECE1080C	Programming for ECE (C- min)	4
ENED1120	Foundations of Engineering Design Thinking II (C- min)	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Fall Semester 2021

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2065	Differential Equations and Laplace Transforms (C- min)	2
MATH2063	Multivariable Calculus	4
PHYS2076	Semiconductor Physics for Engineers	4

Spring Semester 2022

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer Semester 2022

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE2080C	Engineering Data Structures (C- min)	2
EECE3065	Signals and Systems (C- min)	4
MATH2076	Linear Algebra	3

Fall Semester 2022

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring Semester 2023

Course	Title/Desc	Credit
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3071	Electronics II	3
EECE3071L	Electronics Laboratory II	1
EECE3093C	Software Engineering (C- min)	4
PD2050	Mid-Curricular Co-op Community for Engineering	1

Select one course.

Students pursuing Mathematics minor should select STAT2037.

Course	Title/Desc	Credit
ENED3061	Probability and Statistics I (C- min)	3
STAT2037	Probability and Statistics I (C- min)	3

Summer Semester 2023

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall Semester 2023

Course	Title/Desc	Credit
	General Education Course	3
CS2071	Discrete Computational Structures (C- min)	3
EECE4029	Operating Systems & Systems Programming (C- min)	3
EECE4038C	Embedded System Design	3
EECE4040	Advanced Data Structures and Algorithms (C- min)	3
ENGL4092	Technical and Scientific Writing	3

Spring Semester 2024

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2024

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2024

Course	Title/Desc	Credit
EECE5031	Computer Engineering Senior Design I (C- min)	3
	EECE Electives	6
	General Education Course	3
	Professional Elective	3

Spring Semester 2025

Course	Title/Desc	Credit
EECE5032	Computer Engineering Senior Design II (C- min)	3
	EECE Elective	3
	General Education Course	3
	Professional Elective	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics. Select one course with an SCE BoK designation	3

Additional General Education course

Course	Title/Desc	Credit
	Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Distribution Rquirements

Course	Title/Desc	Credit
	Select one course from one of the following BoK areas. Fine Arts (FA), Historical Perspectives (HP), and Social Sciences (SS).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Engineering

BSCOMPE

Computer Engineering Class of 2030 Section II

Duration: 5 Years

★Minimum Credits: 127 Credits

Fall Semester 2025

Course	Title/Desc	Credit
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2026

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
EECE1080C	Programming for ECE (C- min)	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2026

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2064	Signals & Systems 1 with Differential Equations (C- min)	2
MATH2063	Multivariable Calculus	4
PHYS2076	Semiconductor Physics for Engineers	4

Spring Semester 2027

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer Semester 2027

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE2080C	Engineering Data Structures (C- min)	2
EECE3064	Signals and Systems 2 (C- min)	4
MATH2076	Linear Algebra	3

Fall Semester 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring Semester 2028

Course	Title/Desc	Credit
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3071	Electronics II	3
EECE3071L	Electronics Laboratory II	1
EECE3093C	Software Engineering (C- min)	4
PD2050	Mid-Curricular Co-op Community for Engineering	1

Select lone course.
Students pursuing a Mathematics minor should select STAT2037.

Course	Title/Desc	Credit
STAT2037	Probability and Statistics I (C- min)	3
ENED3066	Engineering Statistics (C- min)	3

Summer Semester 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall Semester 2028

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
EECE4029	Operating Systems & Systems Programming (C- min)	3
EECE4038C	Embedded System Design	3
EECE4040	Advanced Data Structures and Algorithms (C- min)	3
ENGL4092	Technical and Scientific Writing	3
	General Education Course	3

Spring Semester 2029

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2029

Course	Title/Desc	Credit
EECE5031	Computer Engineering Senior Design I (C- min)	3
	EECE Electives	6
	Professional Elective	3
	General Education Course	3

Spring Semester 2030

Course	Title/Desc	Credit
EECE5032	Computer Engineering Senior Design II (C- min)	3
	EECE Elective	3
	Professional Elective	3
	General Education Course	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics. Select one course with an SCE BoK designation	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Rquirement

Course	Title/Desc	Credit
BoK: FA,HP,SS	Select one course from one of the following BoK areas: Fine Arts (FA), Historical Perspectives (HP), Social Sciences (SS).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Engineering

BSCOMPE

Computer Engineering Class of 2029 Section I

Duration: 5 Years

BSCOMPE

Computer Engineering Class of 2027 Section I

Duration: 5 Years
Minimum Credits: 127 Credits

Fall Semester 2022

Course	Title/Desc	Credit
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENGL1001	English Composition	3
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2023

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
EECE1080C	Programming for ECE (C- min)	4
ENED1120	Foundations of Engineering Design Thinking II (C- min)	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2023

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring Semester 2024

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2065	Differential Equations and Laplace Transforms (C- min)	2
MATH2063	Multivariable Calculus	4
PHYS2076	Semiconductor Physics for Engineers	4

Summer Semester 2024

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall Semester 2024

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE2080C	Engineering Data Structures (C- min)	2
EECE3065	Signals and Systems (C- min)	4
MATH2076	Linear Algebra	3

Spring Semester 2025

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer Semester 2025

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3071	Electronics II	3
EECE3071L	Electronics Laboratory II	1
EECE3093C	Software Engineering (C- min)	4
PD2050	Mid-Curricular Co-op Community for Engineering	1

Fall Semester 2025

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Spring Semester 2026

Course	Title/Desc	Credit
	General Education Course	3
EECE4029	Operating Systems & Systems Programming (C- min)	3
EECE4038C	Embedded System Design	3

Summer Semester 2026

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
EECE4040	Advanced Data Structures and Algorithms (C- min)	3
ENGL4092	Technical and Scientific Writing	3

Select one course.
Students pursuing a Mathematics minor should select STAT2037.

Course	Title/Desc	Credit
ENED3066	Engineering Statistics (C- min)	3
STAT2037	Probability and Statistics I (C- min)	3

Fall Semester 2026

Course	Title/Desc	Credit
EECE5031	Computer Engineering Senior Design I (C- min)	3
	EECE Electives	6
	Professional Elective	3
	General Education Course	3

Spring Semester 2027

Course	Title/Desc	Credit
EECE5032	Computer Engineering Senior Design II (C- min)	3
	EECE Elective	3
	Professional Elective	3
	General Education Course	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics. Select one course with an SCE BoK designation	3

Additional General Education course

Course	Title/Desc	Credit
	Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Distribution Rquirements

Course	Title/Desc	Credit
	Select one course from one of the following BoK areas. Fine Arts (FA), Historical Perspectives (HP), and Social Sciences (SS).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Engineering

BSCOMPE

Computer Engineering Class of 2027 Section II

Duration: 5 Years
Minimum Credits: 127 Credits

Fall Semester 2022

Course	Title/Desc	Credit
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2023

Course	Title/Desc	Credit
EECE1080C	Programming for ECE (C- min)	4
ENED1120	Foundations of Engineering Design Thinking II (C- min)	3
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2023

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2065	Differential Equations and Laplace Transforms (C- min)	2
MATH2063	Multivariable Calculus	4
PHYS2076	Semiconductor Physics for Engineers	4

Spring Semester 2024

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer Semester 2024

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE2080C	Engineering Data Structures (C- min)	2
EECE3065	Signals and Systems (C- min)	4
MATH2076	Linear Algebra	3

Fall Semester 2024

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring Semester 2025

Course	Title/Desc	Credit
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3071	Electronics II	3
EECE3071L	Electronics Laboratory II	1
EECE3093C	Software Engineering (C- min)	4
PD2050	Mid-Curricular Co-op Community for Engineering	1

Select one course.
Students pursuing a Mathematics minor should select STAT2037.

Course	Title/Desc	Credit
ENED3061	Probability and Statistics I (C- min)	3
STAT2037	Probability and Statistics I (C- min)	3

Summer Semester 2025

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall Semester 2025

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
EECE4029	Operating Systems & Systems Programming (C- min)	3
EECE4038C	Embedded System Design	3
EECE4040	Advanced Data Structures and Algorithms (C- min)	3
ENGL4092	Technical and Scientific Writing	3
	General Education Course	3

Spring Semester 2026

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2026

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2026

Course	Title/Desc	Credit
EECE5031	Computer Engineering Senior Design I (C- min)	3
	EECE Electives	6
	Professional Elective	3
	General Education Course	3

Spring Semester 2027

Course	Title/Desc	Credit
EECE5032	Computer Engineering Senior Design II (C- min)	3
	EECE Elective	3
	Professional Elective	3
	General Education Course	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Society, Culture, & Ethics. Select one course with an SCE BoK designation	3

Additional General Education course

Course	Title/Desc	Credit
	Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Distribution Rquirement

Course	Title/Desc	Credit
BoK: FA,HP,SS	Select one course from one of the following BoK areas: Fine Arts (FA), Historical Perspectives (HP), Social Sciences (SS).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

Duration: **5 Years** Total Credits: **124 - 126** Award: **BSCS**

Overview

As a student in the Computer Science B.S. program at the University of Cincinnati, you will gain the skills to design, analyze, and develop technology to improve and modernize life for all.

Some important areas of computer science are: the design of more powerful or more easily used computer languages; the design of more powerful compilers, which translate programs written in computer languages into machine-executable code; the design of operating systems; and the design of networks and methodologies for computing over multiple distributed machines.

At UC College of Engineering and Applied Science (CEAS), its all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- You will gain education and hands-on training on computational information systems, software development, data science, artificial intelligence, and cybersecurity.
- Customize your experience with many student organizations and events including ACM student chapter and programming hackathons.
- Build an impressive resume and professional network through our nationally recognized co-op program.

Career

Careers in Computer Science are challenging and stimulating. Possible career paths include:

- Applications programming
- Web programming
- Network management
- Systems programming and analysis
- Software development and maintenance

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)

- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Computer Science program is accredited by the Computing Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Computer Science and Similarly Named Computing Programs Program Criteria

Computer Science

BSCS

Computer Science Class of 2030 Section I

Duration: 5 Years

★Minimum Credits: 124 - 126 Credits

Fall 2025

Course	Title/Desc	Credit
CS1100	Introduction to Computer Science	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4

Select one of the Science Lecture/Lab pairs below.

Course	Title/Desc	Credit
	Science Option 1: Physics Select College Physics I (PHYS2001) with Lab	5
	Science Option 2: Chemistry Select General Chemistry I (CHEM1040) with Lab	5
	Science Option 3: Biology Select Biology I (BIOL1081) with Lab	4

Spring 2026

Course	Title/Desc	Credit
CS1021C	Computer Science 1 (C- min)	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Select one of the Lecture/Lab pairs below.

Course	Title/Desc	Credit
	If you wish to take a course in a discipline other than the one you chose in the Fall Semeater Select one of the two remaining options on the Fall Semester list	4 - 5
	If you wish to continue in the discipline you started in the Fall Semester Select College Physics II (PHYS2002) Lab, General Chemistry II (CHEM1041) with lab), or Biology II (BIOL1082) with Lab.)	0

Fall 2026

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring 2027

Course	Title/Desc	Credit
CS2011	Introduction to Computer Systems (C- min)	3
CS2023	Python Programming (C- min)	3
CS2028C	Data Structures (C- min)	4
IT2030C	Information Security and Assurance	3
MATH2076	Linear Algebra (C- min)	3

Summer 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall 2027

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
CS3003	Programming Languages	3
ENGL2089	Intermediate Composition	3
STAT2037	Probability and Statistics I (C- min)	3

Spring 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer 2028

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
CS4071	Design and Analysis of Algorithms (C- min)	3
CS4092	Database Design and Development (C- min)	3
CS3093C	Software Engineering (C- min)	4
	General Education course	3

Course	Title/Desc	Credit
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course	3

Course	Title/Desc	Credit

Fall 2028

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Spring 2029

Course	Title/Desc	Credit
CS4033	Artificial Intelligence: Principles and Applications	3
CS4029	Operating Systems & Systems Programming (C- min)	3
CS4065	Computer Networks and Networked Computing	3
ENGL4092	Technical and Scientific Writing	3
	General Education course	3

Summer 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall 2029

Course	Title/Desc	Credit
CS5001	Computer Science Senior Design I (C- min)	3
CS5170	The Theory of Formal Languages and Automata	3
CS	CS Electives	6
	General Elective	3

Spring 2030

Senior Design II

Course	Title/Desc	Credit
CS5002	Computer Science Senior Design II (C- min)	3
CS	CS Electives	9
	General Elective	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Select 1 course with a SCE Breadth of Knowledge designation	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Requirement

Course	Title/Desc	Credit
BoK: FA,HP,SS	Select 1 course from Fine Arts (FA), Historical Perspectives (HP), or Social Sciences (SS)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

BSCS

Computer Science Class of 2026 Section II

Duration: 5 Years

★Minimum Credits: 126 - 127 Credits

Fall 2021

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
CS1100	Introduction to Computer Science	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4

Spring 2022

Course	Title/Desc	Credit
CS1021C	Computer Science 1 (C- min)	4
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1
	Science elective with lab: Select BIOL1081, 1081L, or CHEM1041, 1041L, or PHYS2001, 2001L (C- min)	4 - 5

Fall 2022

Course	Title/Desc	Credit
CS2011	Introduction to Computer Systems (C- min)	3
CS2023	Python Programming (C- min)	3
CS2028C	Data Structures (C- min)	4
IT2030C	Information Security and Assurance	3
MATH2076	Linear Algebra (C- min)	3

Spring 2023

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2023

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
CS3003	Programming Languages	3
ENGL2089	Intermediate Composition	3
STAT2037	Probability and Statistics I (C- min)	3
	General Education course	3

Fall 2023

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring 2024

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
CS4071	Design and Analysis of Algorithms (C- min)	3
CS4092	Database Design and Development (C- min)	3
EECE3093C	Software Engineering (C- min)	4
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course	3

Summer 2024

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer 2022

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall 2022

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
CS3003	Programming Languages	3
ENGL2089	Intermediate Composition	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
STAT2037	Probability and Statistics I (C- min)	3
	General Education course	3

Spring 2023

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer 2023

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
CS4071	Design and Analysis of Algorithms (C- min)	3
CS4092	Database Design and Development (C- min)	3
EECE3093C	Software Engineering (C- min)	4
	General Education course	3

Fall 2023

COOP Semester

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Spring 2024

Coursework Semester

Course	Title/Desc	Credit
	General Education course	3

Summer 2024

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
CS4033	Artificial Intelligence: Principles and Applications	3
CS4065	Computer Networks and Networked Computing	3
EECE4029	Operating Systems & Systems Programming (C- min)	3
ENGL4092	Technical and Scientific Writing	3

Fall 2024

Course	Title/Desc	Credit
CS5001	Computer Science Senior Design I (C- min)	3
CS5170	The Theory of Formal Languages and Automata	3
	CS Electives	6
	General Elective	3

Spring 2025

Course	Title/Desc	Credit
CS5002	Computer Science Senior Design II (C- min)	3
	CS Electives	9
	General Elective	3

General Education

Contemporary Topics

Course	Title/Desc	Credit
BoK: SCE	Select 1 course with a SCE Breadth of Knowledge designation	3

Additional General Education course

Course	Title/Desc	Credit
	Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Distribution Requirements

Course	Title/Desc	Credit
	Select 1 course from Fine Arts (FA), Historical Perspectives (HP), or Social Sciences (SS)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

BSCS

Computer Science Class of 2025 Section II

Duration: 5 Years

★Minimum Credits: 125 - 126 Credits

Fall 2020

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
CS1100	Introduction to Computer Science	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4

Spring 2021

Course	Title/Desc	Credit
CS1021C	Computer Science 1 (C- min)	4
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1
	Science elective with lab: Select BIOL1081, 1081L, or CHEM1041, 1041L, or PHYS2001, 2001L (C- min)	4 - 5

Fall 2021

Course	Title/Desc	Credit
CS2011	Introduction to Computer Systems (C- min)	3
CS2021	Python Programming (C- min)	2
CS2028C	Data Structures (C- min)	4
IT2030C	Information Security and Assurance	3
MATH2076	Linear Algebra (C- min)	3

Spring 2022

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2022

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
CS3003	Programming Languages	3

Computer Science

BSCS

Computer Science Class of 2030 Section II

Duration: 5 Years

★Minimum Credits: 124 - 126 Credits

Fall 2025

Course	Title/Desc	Credit
CS1100	Introduction to Computer Science	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4

Select one of the Lecture/Lab pairs below.

Course	Title/Desc	Credit
	Science Option 1; Physics Select College Physics I (PHYS2001) with Lab	5
	Science Option 2: Chemistry Select General Chemistry I (CHEM1040) with Lab	5
	Science Option 3: Biology Select Biology I (BIOL1081) with lab	4

Spring 2026

Course	Title/Desc	Credit
CS1021C	Computer Science 1 (C- min)	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Select one of the Leacture/Lab pairs below

Course	Title/Desc	Credit
	If you wish to take a course in a discipline other than the one you chose in the Fall Semester Select one of the two remaining options on the Fall Semester list.	4 - 5
	If you wish to continue in the discipline you started in the Fall Semester Select College Physics II (PHYS2002) with Lab, General Chemistry II (CHEM1041) with lab, or Biology II (BIOL1081) with lab	4 - 5

Fall 2026

Course	Title/Desc	Credit
CS2011	Introduction to Computer Systems (C- min)	3
CS2023	Python Programming (C- min)	3
CS2028C	Data Structures (C- min)	4
IT2030C	Information Security and Assurance	3
MATH2076	Linear Algebra (C- min)	3

Spring 2027

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2027

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
CS3003	Programming Languages	3
ENGL2089	Intermediate Composition	3
STAT2037	Probability and Statistics I (C- min)	3
	General Education course	3

Fall 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring 2028

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
CS4071	Design and Analysis of Algorithms (C- min)	3
CS4092	Database Design and Development (C- min)	3
CS3093C	Software Engineering (C- min)	4

Summer 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Course	Title/Desc	Credit
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course	3

Fall 2028

Course	Title/Desc	Credit
CS4065	Computer Networks and Networked Computing	3
CS4029	Operating Systems & Systems Programming (C- min)	3
CS4033	Artificial Intelligence: Principles and Applications	3
ENGL4092	Technical and Scientific Writing	3
	General Education course	3

Spring 2029

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall 2029

Course	Title/Desc	Credit
CS5001	Computer Science Senior Design I (C- min)	3
CS5170	The Theory of Formal Languages and Automata	3
CS	CS Electives	6
	General Elective	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

BSCS

Computer Science Class of 2027 Section I

Duration: 5 Years

★Minimum Credits: 126 - 127 Credits

Fall 2022

Course	Title/Desc	Credit
CS1100	Introduction to Computer Science	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4
	Science elective with lab: Select BIOL1081, 1081L, or PHYS2001, 2001L	4 - 5

Spring 2023

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
CS1021C	Computer Science 1 (C- min)	4
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall 2023

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring 2024

Course	Title/Desc	Credit
CS2011	Introduction to Computer Systems (C- min)	3
CS2023	Python Programming (C- min)	3
CS2028C	Data Structures (C- min)	4
IT2030C	Information Security and Assurance	3
MATH2076	Linear Algebra (C- min)	3

Summer 2024

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall 2024

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
CS3003	Programming Languages	3
ENGL2089	Intermediate Composition	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
STAT2037	Probability and Statistics I (C- min)	3
	General Education course	3

Spring 2025

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer 2025

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
CS4071	Design and Analysis of Algorithms (C- min)	3
CS4092	Database Design and Development (C- min)	3
EECE3093C	Software Engineering (C- min)	4
	General Education course	3

Fall 2025

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Spring 2026

Coursework Semester

Course	Title/Desc	Credit
CS4033	Artificial Intelligence: Principles and Applications	3
CS4065	Computer Networks and Networked Computing	3

Summer 2026

Summer 2026

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
EECE4029	Operating Systems & Systems Programming (C- min)	3
ENGL4092	Technical and Scientific Writing	3
	General Education course	3

Fall 2026

Course	Title/Desc	Credit
CS5001	Computer Science Senior Design I (C- min)	3
CS5170	The Theory of Formal Languages and Automata	3
	CS Electives	6
	General Elective	3

Spring 2027

Course	Title/Desc	Credit
CS5002	Computer Science Senior Design II (C- min)	3
	CS Electives	9
	General Elective	3

Cybersecurity Engineering

Duration: **5 Years** Total Credits: **126 - 130** Award: **BSCYBR**

Overview

The B.S in Cybersecurity Engineering degree program at the University of Cincinnati integrates pertinent science and mathematics courses with electrical engineering, computer engineering, computer science, political science, and ethics courses in order to develop an engineer capable of designing, and analyzing systems that operate with confidentiality, integrity and availability.

- Coursework will promote your critical thinking skills in cyber security to be able to understand, measure and identify the security vulnerabilities and privacy risks of computer and communication systems.
- You will learn how to respond to unknown cyber security threats, test vulnerabilities in software and web application, reverse engineer malware, and how to build secure, robust and reliable computer and communication systems.
- During the last two years of your degree, you will sharpen your skills into emerging areas of advanced cyber security by choosing your area of focus:
  - Cyber-attack and defense
  - Network and data security
  - Hardware and cyber-physical system security.
- During your studies, you will build an impressive resume and professional network through our nationally-recognized co-op program at companies such as Northrop Grumman, Booz Allen, Edaptive, Inc., and many others, as well as government laboratories such as Wright-Patterson Air Force Base and the National Security Agency (NSA).

Career

Cybersecurity Engineers are in demand in organizations throughout society. Non-profits, hospitals, companies, nations and international treaty groups are all seeking knowledgeable professionals to keep their organization's operations and data safe from attackers. By graduating from UC with a BS in Cybersecurity, you can look forward to careers like:

- Threat intelligence analysts
- Penetration tester
- Incident response manager
- Security architect
- Security operatons analyst
- Application security engineer

and many more.

Minoring

Cybersecurity engineering undergraduates have the option of selecting one of several minors, such as:

- Biomedical Electronics & Computing
- Computer Science
- Communications & Signal Processing
- Electric Energy & Smartgrid
- Embedded Systems
- Nanoscience & Nanotechnology
- Robotics & Automation
- Very Large Scale Integrated Circuits.

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

There are also opportunities to participate in NSF-funded undergraduate research.

Special Programs

Enhance your Cyber Engineering degree by adding an undergraduate certificate in Cyber Operations! This certificate program will further prepare you to enter the cybersecurity profession by giving you a deeper understanding of cybersecurity and additional skills in major cybersecurity areas such as cyberdefense, information security, network security, security vulnerability assessment, and cybersecurity policy and strategy.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.

First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Cybersecurity Engineering program will be assessed for accreditation by the Engineering Accreditation Commission of ABET.

Cybersecurity Engineering

BSCYBR

Cybersecurity Engineering Class of 2030 Section I

Duration: 5 Years

★Minimum Credits: 126 - 130 Credits

Fall Semester 2025

Course	Title/Desc	Credit
EECE1105	Introduction to EECS for Cybersecurity Engineering Majors	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2026

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
EECE1080C	Programming for ECE (C- min)	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2026

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring Semester 2027

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2064	Signals & Systems 1 with Differential Equations	2
EECE2080C	Engineering Data Structures (C- min)	2
MATH2076	Linear Algebra (C- min)	3

Summer Semester 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall Semester 2027

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE3064	Signals and Systems 2 (C- min)	4
IT2030C	Information Security and Assurance	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Spring Semester 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer Semester 2028

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3071	Electronics II	3
EECE3093C	Software Engineering	4
PD2050	Mid-Curricular Co-op Community for Engineering	1
STAT2037	Probability and Statistics I	3

Fall Semester 2028

Spring Semester 2029

Summer Semester 2029

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Course	Title/Desc	Credit
CS5155	Cyber Defense Overview	3
EECE3072	Mathematics for Cybersecurity	3
EECE4029	Operating Systems & Systems Programming	3
EECE4038C	Embedded System Design	3
EECE4040	Advanced Data Structures and Algorithms	3
ENGL4092	Technical and Scientific Writing	3

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall Semester 2029

Course	Title/Desc	Credit
EECE5051	Cybersecurity Engineering Senior Design I (C- min)	3
POL2035	Cybersecurity: National and International Strategy and Policy	3
	Cybersecurity Electives	9

Spring Semester 2030

Course	Title/Desc	Credit
EECE5052	Cybersecurity Engineering Senior Design II (C- min)	3
	Cybersecurity Electives	6

Cyber Policy Elective

Select one course

Course	Title/Desc	Credit
POL2036	Cyber Security and Social Responsibility	3
POL2037	Conflict in Cyberspace	3
POL2038	Law and Politics in the Cyberspace	3

Cybersecurity Electives: a minimum of 15 credit hours required.

Select five courses.

Course	Title/Desc	Credit
CS5138	Malware Analysis	3
CS5153	Network Security	3
CS5156	Security Vulnerability Assessment	3
CS5158	Data Security and Privacy	3
EECE5123C	Security & Trust for Cyberphysical Systems	4
EECE5130	Trust in Digital Hardware	3
EECE5134C	Hardware Design with FPGAs: Secure and Trustworthy Systems	4
EECE5154	Cryptography: Theory and Engineering	3
	POL5035C or IT5035C: Select one course Cyberattack Red Team Collaborative Seminar	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Cybersecurity Engineering

BSCYBR

Cybersecurity Engineering Class of 2027 Section II

Duration: 5 Years

★Minimum Credits: 126 - 130 Credits

Fall Semester 2022

Course	Title/Desc	Credit
EECE1105	Introduction to EECS for Cybersecurity Engineering Majors	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2023

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
EECE1080C	Programming for ECE (C- min)	4
ENED1120	Foundations of Engineering Design Thinking II (C- min)	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2023

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2065	Differential Equations and Laplace Transforms (C- min)	2
EECE2080C	Engineering Data Structures (C- min)	2
MATH2076	Linear Algebra (C- min)	3

Spring Semester 2024

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer Semester 2024

Course	Title/Desc	Credit
CS2071	Discrete Computational Structures (C- min)	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE3065	Signals and Systems (C- min)	4
IT2030C	Information Security and Assurance	3
	General Education See requirement below.	3

Fall Semester 2024

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring Semester 2025

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3093C	Software Engineering	4
EECE3071	Electronics II	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
STAT2037	Probability and Statistics I	3

Summer Semester 2025

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall Semester 2025

Course	Title/Desc	Credit
CS5155	Cyber Defense Overview	3
EECE3072	Mathematics for Cybersecurity	3
EECE4029	Operating Systems & Systems Programming	3

Spring Semester 2026

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2026

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
EECE4038C	Embedded System Design	3
EECE4040	Advanced Data Structures and Algorithms	3
ENGL4092	Technical and Scientific Writing	3

Fall Semester 2026

Course	Title/Desc	Credit
EECE5051	Cybersecurity Engineering Senior Design I (C- min)	3
POL2035	Cybersecurity: National and International Strategy and Policy	3
	Cybersecurity Electives	9

Spring Semester 2027

Course	Title/Desc	Credit
EECE5052	Cybersecurity Engineering Senior Design II (C- min)	3
	Cybersecurity Electives	6

Cyber Policy Elective

Select one course

Course	Title/Desc	Credit
POL2036	Cyber Security and Social Responsibility	3
POL2037	Conflict in Cyberspace	3
POL2038	Law and Politics in the Cyberspace	3

Cybersecurity Electives: a minimum of 15 credit hours required.

Course	Title/Desc	Credit
CS5138	Malware Analysis	3
CS5153	Network Security	3
CS5156	Security Vulnerability Assessment	3
CS5158	Data Security and Privacy	3
EECE5123C	Security & Trust for Cyberphysical Systems	4
EECE5130	Trust in Digital Hardware	3
EECE5134C	Hardware Design with FPGAs: Secure and Trustworthy Systems	4
EECE5154	Cryptography: Theory and Engineering	3
	POL5035C or IT5035C: Cyberattack Red Team Collaborative Seminar	3

General Education

Additional General Education course.

Course	Title/Desc	Credit
	Select one Course Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Cybersecurity Engineering

Electrical Engineering

Duration: **5 Years** Total Credits: **125** Award: **BSEE**

Overview

As a student in the Electrical Engineering B.S. program at the University of Cincinnati, you'll be at the forefront of advances in biomedicine, renewable energy, intelligent systems, and nanotechnologies. Using this knowledge, you'll shape the design and manufacturing processes of technology that improves the quality of our lives.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Take courses that cover intelligent systems, information processing, nanoscience and nanotechnology, embedded systems, biomedical electronics and computing, robotics, electrical energy and SmartGrid
- Customize your experience with more than 600 organizations, including Institute of Electrical and Electronics Engineering, Association of Computing Machinery, CubeCats, Robotics Club, BattleBots Club, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as FirstEnergy, Kohrs Lonnemann Heil Engineers (KLH), L-3 Cincinnati Electronics, General Cable Corporation, Northrop Grumman, and General Electric

Career

Problem solvers and individuals that enjoy thinking outside of the box excel in an Electrical Engineering career. Possible career paths include:

- Product design and development
- Computer and integrated circuit design
- Electric power generation and distribution
- Electronics manufacturing

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of test scores, class rank and GPA, and co-curricular activities.

First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)

- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs Program Criteria.

Electrical Engineering

BSEE

Electrical Engineering Class of 2030 Section I

Duration: 5 Years
★Minimum Credits: 125 Credits

Fall Semester 2025

Course	Title/Desc	Credit
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Spring Semester 2026

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
EECE1080C	Programming for ECE (C- min)	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall Semester 2026

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Spring Semester 2027

Course	Title/Desc	Credit
EECE2051C	Network Analysis (C- min)	4
EECE2060C	Digital Design (C- min)	4
EECE2064	Signals & Systems 1 with Differential Equations (C- min)	2
MATH2063	Multivariable Calculus (C- min)	4
PHYS2076	Semiconductor Physics for Engineers (C- min)	4

Summer Semester 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Fall Semester 2027

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
EECE2070	Electronics I (C- min)	3
EECE2070L	Electronics Laboratory I (C- min)	1
EECE2077	Semiconductor Devices (C- min)	3
EECE3064	Signals and Systems 2 (C- min)	4
MATH2076	Linear Algebra	3

Spring Semester 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Summer Semester 2028

Course	Title/Desc	Credit
EECE3071	Electronics II	3
EECE3071L	Electronics Laboratory II	1
EECE3080	Engineering Electromagnetics	4
ENGL4092	Technical and Scientific Writing	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education Course	3

Fall Semester 2028

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Spring Semester 2029

Course	Title/Desc	Credit
EECE4038C	Embedded System Design	3
EECE4090	Control Systems (C- min)	3
EECE	EECE Elective	3
	General Education Course	3

Summer Semester 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit

Select one course.
Students pursuing a Mathematics minor should select STAT2037.

Course	Title/Desc	Credit
ENED3066	Engineering Statistics (C- min)	3
STAT2037	Probability and Statistics I (C- min)	3

Fall Semester 2029

Course	Title/Desc	Credit
EECE5001	Electrical Engineering Senior Design I (C- min)	3
EECE	EECE Electives	6
	Professional Elective	3
	General Education Course	3

Spring Semester 2030

Course	Title/Desc	Credit
EECE5002	Electrical Engineering Senior Design II (C- min)	3
EECE	EECE Electives	6
	Professional Elective	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Select one course from Society, Culture, & Ethics (SCE)	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Requirement

Course	Title/Desc	Credit
BoK: FA,HP,SS	Select one course from Fine Arts (FA), Historical Perspectives (HP), or Social Sciences (SS).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electrical Engineering Technology

Duration: **5 Years** Total Credits: **124 - 125** Award: **BSEET**

Overview

As a student in the Electrical Engineering Technology B.S. program at the University of Cincinnati, you will gain the knowledge to apply the principles of electrical engineering to electrical components and computers to improve and modernize life for all. Electrical Engineering is a robust field with opportunities in all areas where electrical technology and computers exist: the design and installation of all types of electrical instrumentation as well as computers and their networks.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Gain hands-on training in the fields of analog and digital circuits, electric power systems, and industrial control
- Take courses that cover the communications, instrumentation, analog and digital controls, microprocessors and controllers, and digital signal processing
- Customize your experience with more than 600 organizations, including Institute of Electrical and Electronics Engineering, the Association of Computing Machinery, CubeCats, and Robotics Club, BattleBots Club, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as ASIC Corporation, Mitsubishi Electric Automotive America, Cincinnati Test Systems, Kohrs Lonnemann Heil Engineers, and General Electric

Career

Careers in Electrical Engineering Technology are in high demand. Graduates are well prepared for entry-level professional industrial positions. Possible career paths include:

- Production engineer
- Process engineer
- Electrical design engineer
- Electronics support engineer
- Controls technician

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and statistics or trigonometry. Pre-calculus is highly recommended. (4 units)
- Science, including Chemistry or Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Electrical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Electrical/Electronic(s) Engineering Technology and Similarly Named Programs Program Criteria

Electrical Engineering Technology

BSEET

Electrical Engineering Technology Class of 2030

Duration: 5 Years

★Minimum Credits: 124 - 127 Credits

Fall 2025

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1001C	Engineering Design Thinking I (C- min)	1
ENED1021	Engineering Applications I (C- min)	2
ENGL1001	English Composition	3
MATH1026	Pre-Calculus (C- min)	5

Spring 2026

Course	Title/Desc	Credit
EECE1080C	Programming for ECE (C- min)	4
ELTN1042C	Circuit Analysis I	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1061	Calculus I (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall 2026

Course	Title/Desc	Credit
ELTN1041C	Digital Systems	4
ELTN1043C	Circuit Analysis II (C- min)	4
MET3051	Mathematic Applications in Engineering Technology	3
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based)	1

Spring 2027

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2027

Course	Title/Desc	Credit
ECON1002	Introduction to Macroeconomics	3
EECE3064	Signals and Systems 2	4
ELTN2003C	Electronics	4
PHYS1052	General Physics II (Algebra-based)	4
PHYS1052L	General Physics Lab II (Algebra-based)	1

Fall 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring 2028

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
ELTN4015C	Flexible Automation	4
MET1071	Statics	3
PD2050	Mid-Curricular Co-op Community for Engineering	1

Statistics

Select one course.

Course	Title/Desc	Credit
STAT1031	Introduction to Statistics	3
STAT1034	Elementary Statistics I	3

American Civic Literacy - Select one course

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Summer 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Course	Title/Desc	Credit

Fall 2028

Course	Title/Desc	Credit
ELTN3042C	Microprocessor and Embedded Systems	3
ELTN4069C	Electric Power and Power Electronics Systems	4
ELTN4056C	Computer Networks	4
ELTN4072C	Feedback Control	4

Spring 2029

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall 2029

Course	Title/Desc	Credit
ELTN4011	Senior Design I	3
ELTN4085C	Digital Signal Processing	4
ENGL4092	Technical and Scientific Writing	3
	EET Elective	3 - 4
BoK: SCE	General Education SCE Any course with a Society, Culture, and Ethics Breadth of knowledge designation.	3

Spring 2030

Course	Title/Desc	Credit
ELTN4012	Senior Design II	3
	EET Elective	3 - 4
	EET Elective	3 - 4
BoK: FA,HP,HU,SS	General Education Course	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electrical Engineering Technology

BSEET

Electrical Engineering Technology Class of 2029

Duration: 5 Years

★Minimum Credits: 124 - 127 Credits

Fall 2024

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1001C	Engineering Design Thinking I (C- min)	1
ENED1021	Engineering Applications I (C- min)	2
ENGL1001	English Composition	3
MATH1026	Pre-Calculus (C- min)	5

Spring 2025

Course	Title/Desc	Credit
EECE1080C	Programming for ECE (C- min)	4
ELTN1042C	Circuit Analysis I	4
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1061	Calculus I (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall 2025

Course	Title/Desc	Credit
ELTN1041C	Digital Systems	4
ELTN1043C	Circuit Analysis II (C- min)	4
MET3051	Mathematic Applications in Engineering Technology	3
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based)	1

Spring 2026

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2026

Course	Title/Desc	Credit
ECON1002	Introduction to Macroeconomics	3
EECE3064	Signals and Systems 2	4
ELTN2003C	Electronics	4
PHYS1052	General Physics II (Algebra-based)	4
PHYS1052L	General Physics Lab II (Algebra-based)	1

Fall 2026

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring 2027

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
ELTN4015C	Flexible Automation	4
MET1071	Statics	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
BoK: SCE	General Education SCE Any course with a Society, Culture, and Ethics Breadth of knowledge designation.	3

Statistics

Select one course.

Course	Title/Desc	Credit
STAT1031	Introduction to Statistics	3
STAT1034	Elementary Statistics I	3

Summer 2027

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall 2027

Course	Title/Desc	Credit

Spring 2028

Course	Title/Desc	Credit

Summer 2028

Course	Title/Desc	Credit

Course	Title/Desc	Credit
ELTN3042C	Microprocessor and Embedded Systems	3
ELTN4069C	Electric Power and Power Electronics Systems	4
ELTN4056C	Computer Networks	4
ELTN4072C	Feedback Control	4

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall 2028

Course	Title/Desc	Credit
ELTN4011	Senior Design I	3
ELTN4085C	Digital Signal Processing	4
ENGL4092	Technical and Scientific Writing	3
	EET Elective	3 - 4
	Additional General Education elective - Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Spring 2029

Course	Title/Desc	Credit
ELTN4012	Senior Design II	3
	EET Elective	3 - 4
	EET Elective	3 - 4
BoK: FA,HP,HU,SS	General Education Course	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electrical Engineering Technology

BSEET

Electrical Engineering Technology Class of 2028

Duration: 5 Years

★Minimum Credits: 124 - 125 Credits

Fall 2023

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
EECE1100	Introduction to EECS for EE, CompE, and EET Majors	1
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition	3
MATH1026	Pre-Calculus (C- min)	5

Spring 2024

Course	Title/Desc	Credit
EECE1080C	Programming for ECE (C- min)	4
ELTN1042C	Circuit Analysis I	4
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1061	Calculus I (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1

Fall 2024

Course	Title/Desc	Credit
ELTN1041C	Digital Systems	4
ELTN1043C	Circuit Analysis II	4
MATH1062	Calculus II (C- min)	4

Environmental Engineering

Duration: **5 Years** Total Credits: **126** Award: **BSEVE**

Overview

As a student in the Environmental Engineering B.S. program at the University of Cincinnati, you will develop both the technical and non-technical skills to explore sustainable solutions for controlling pollution and sustaining resources to improve today's society. Students are introduced to cutting edge sustainability research and the tools of green engineering design.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Take courses that cover analysis and design of water and wastewater treatment systems, water resources, air pollution-control technologies, solid waste and hazardous substance management and regulations, and sustainability
- Customize your experience with more than 600 organizations, including Society of Environmental Engineers, UC for Water, Fossil Free UC, Engineers Without Borders, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as The Dow Chemical Company, DuPont, Duke Energy, Kroger, the Army Corps of Engineers, and the Environmental Protection Agency

Career

Careers in Environmental Engineering are challenging and push the needle forward. Possible career paths include:

- Operator of pollution control facilities
- Government regulatory agency official
- Manager of programs
- Involved in professional society work
- Researcher
- Designer
- Planner
- Professor

Employers can be private consulting engineering firms, universities, private research firms, testing laboratories, government agencies, or all types of major corporations and private businesses.

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)

- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Environmental Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Environmental Engineering and Similarly Named Engineering Programs Program Criteria.

Environmental Engineering

BSEVE

Environmental Engineering Class of 2030

Duration: 5 Years

★Minimum Credits: 126 Credits

Fall 2025

Course	Title/Desc	Credit
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition	3
ENVE1001	Environmental Engineering First Year Seminar	1
MATH1061	Calculus I (C- min)	4

Spring 2026

Course	Title/Desc	Credit
CHEM1041	General Chemistry II (C- min)	4
CHEM1041L	General Chemistry Laboratory II (C- min)	1
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1
PHYS2001	College Physics I (Calculus-based)	4

Fall 2026

Course	Title/Desc	Credit
CHE2064	Material and Energy Balances (C- min)	4
ENVE2012C	Engineering Biology	3
ENVE2015C	Environmental Engineering Drawing and Design	2
MATH2074	Dynamical Systems	3
	General Education course	3

Spring 2027

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2027

Course	Title/Desc	Credit

Distribution Requirement

Course	Title/Desc	Credit
BoK: FA,HP,HU	Select one course from Humanities & Literature (HU), Historical Perspectives (HP), or Fine Arts (FA).	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Engineering

BSEVE

Environmental Engineering Class of 2029

Duration: 5 Years

★Minimum Credits: 126 Credits

Fall 2024

Course	Title/Desc	Credit
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
ENGL1001	English Composition	3
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENVE1001	Environmental Engineering First Year Seminar	1
MATH1061	Calculus I (C- min)	4

Spring 2025

Course	Title/Desc	Credit
CHEM1041	General Chemistry II (C- min)	4
CHEM1041L	General Chemistry Laboratory II (C- min)	1
ENED1120	Foundations of Engineering Design Thinking II	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1
PHYS2001	College Physics I (Calculus-based)	4

Fall 2025

Course	Title/Desc	Credit
CHE2064	Material and Energy Balances (C- min)	4
ENVE2012C	Engineering Biology	3
ENVE2015C	Environmental Engineering Drawing and Design	2
MATH2074	Dynamical Systems	3
	General Education course	3

Spring 2026

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2026

Course	Title/Desc	Credit
CHE3025	Fluid Mechanics	3
ENED3066	Engineering Statistics	3
ENGL4092	Technical and Scientific Writing	3
ENVE4010L	Environmental Measurements	2
ENVE4020	Water and Wastewater Treatment	4

Fall 2026

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring 2027

Course	Title/Desc	Credit
CHEM2040	Organic Chemistry I	4
CHEM2040L	Organic Chemistry Laboratory I	1
ENVE3040	Civil and Environmental Systems Analysis	4
ENVE4011	Air Pollution	3
GEOG5171C	Introduction to Geographic Information Sciences	3
BoK: SS	General Education Social Science	3

Summer 2027

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall 2027

Course	Title/Desc	Credit
ENVE4062	Kinetics and Reaction Engineering	3
ENVE4093	Hydraulic Systems	3
ENVE4093L	Fluid Mechanics and Hydraulic Systems Laboratory	2
ENVE5114	Solid and Hazardous Waste Management	3

Spring 2028

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer 2028

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
GEOL3005C	Fundamentals of Groundwater	3
PD2050	Mid-Curricular Co-op Community for Engineering	1

Fall 2028

Course	Title/Desc	Credit
ENVE5001	Capstone Design	2
ENVE5003	Capstone Seminar I	1
	ENVE Electives	6
	Sustainability Elective	3
	General Education course	3

Spring 2029

Course	Title/Desc	Credit
ENVE5002	Capstone Design II	2
ENVE5004	Capstone Seminar II	1
	ENVE Electives	6
	Technical Elective	3
	General Education course	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Select one course from Society, Culture, and Ethics (SCE).	3

Additional General Education course

Course	Title/Desc	Credit
	Select one course. Choose from Fine Arts (FA), Historical Perspectives (HP), Humanities (HU), Social Sciences (SS), or Society, Culture, and Ethics (SCE).	3

Fire Science

Duration: **4 Years** Total Credits: **120** Award: **BSFSET**

Overview

The open-learning B.S. in Fire and Safety Engineering Technology degree program at the University of Cincinnati focuses on practical, applied learning techniques. The open-learning method allows you to schedule academic and professional development efforts around duty assignments. While adding a high degree of flexibility and convenience to your professional development, the program maintains the level of quality and effectiveness consistent with a traditional approach. Fire service personnel who have earned an associate degree in fire science technology or related discipline earn credit toward a bachelor's degree while upgrading professional skills.

Fire service credit courses are taken in a distance-learning format. Written assignments and projects provide a continual indication of progress and form the basis of an ongoing relationship between professor and student. Courses outside the fire service requirements and fire service electives required for the bachelor's degree may be taken either by attending a local institution or by continuing the open learning method through various distance-learning programs. All courses must be pre-approved by appropriate department heads.

The Open Learning Fire Service program is available through seven participating regional institutions in cooperation with the U.S. Fire Administration, National Fire Academy, Degrees at a Distance Program (DDP). The region served by UC includes Florida, Georgia, Indiana, Louisiana, Michigan, Minnesota, North Dakota, Ohio, South Dakota and Wisconsin.

Career

Many fire service personnel prepare for promotion or advancement in existing careers by pursuing the open learning bachelor of science degree. Graduates may also begin new careers in the fields of:

- Fire insurance
- Fire protection engineering
- Industrial safety.

Major Map Versions:
Fire Science BS

UC Advantages And Special Opportunities

Students may receive college credit by developing a portfolio assessment for prior learning experiences, state training and military training.

Residency workshop programs are offered giving students an opportunity to complete an entire course in five days. Many students have found that this is an excellent way to accelerate the completion of their degree while having an opportunity to network with other fire professionals throughout the country.

Admission Requirements

Students seeking admission to the FSET bachelor's degree program must:

Have an associate's degree in fire science (or the equivalent), or be a graduate of an accredited high school with the following units:

- English (4 units)
- Mathematics, including algebra, geometry and optional pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Students who have earned 30 semester credits or higher (Associate's Degree preferred) will be considered for the bachelor's degree program. Students with fewer credits will be considered for the associate's degree program. Students with a lot of experience may submit documentation for bachelor's degree consideration.

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Lorain County Community College
- Central Ohio Technical College

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by December 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

This program is accredited by the National Fire Academy (NFA/FEMA).

Fire Science

BSFSET

Fire Science BS

Duration: 4 Years
★Minimum Credits: 120 Credits

Course	Title/Desc	Credit
	Transfer Credit 60 credit hours may be transferred from a regionally accredited Associates Degree or Bachelors Degree and applied toward the 120 hours required for the Fire Science Bachelors Degree	60

Institutional Requirements
Select 9 credit hours from the courses listed below.

Course	Title/Desc	Credit
FST3071	Data Analysis And Statistics For Fire And EMS	3
IT1001C	Computer Applications	3
IT2060C	Database Management I	3
	FST1077 Problem Solving for Emergency Responders If this course was taken as part of the Associate Degree, It cannot be used in the Bachelor Degree.	3
	Other courses Courses in Mathematics, Statistics, Physics, Information Systems, and Microcomputer Applications may also be accepted here. Consult with your advisor.	3 - 9

Fire Science Core Courses
27 credit hours required

Course	Title/Desc	Credit
FST2009	Fire Tactics	3
FST2079	Firefighter Safety, Risk Management & Mental Health	1 - 3
FST3080	Fire and Emergency Services Adminstration	3
FST3085	Political and Legal Foundations for Fire Protection	3
FST3089	EMS Political, Legal & Management	6
FST3092	Budget, Finance, and Effective Communication	3
FST4081	Personnel Management for the Fire and Emergency Services	3
FST4099	Introduction To Effective Fire Service Research	3
FST5044	Leadership and Ethics in Fire and EMS	6
	Fire Science Electives If FST2009, 2079, 3080, 3085, or 3092 were used in the Associate's Degree, the cannot be applied to the Bachelor's Degree. Consult with your advisor to select Fire science electives	0 - 12

Course	Title/Desc	Credit
FST	Fire Science and other electives 24 credit hours required. Consult with your advisor	24

UC General Education Requirements
If these courses where not met with transfer courses or courses in the baccalaureate degree, additional courses may be required

Course	Title/Desc	Credit
ENGL1001	English Composition	3
ENGL2089	Intermediate Composition	3
BoK: QR	Quantitative Reasoning (QR) - One course (3 units) required	3
BoK: FA,HP,HU,NS,SS	Distribution Requirements - Two courses from two of the five Breadth of Knowledge areas: Fine Arts (FA), Historical Perspectives (HP), Humanities & Literature (HU), Natural Sciences (NS), Social Sciences (SS).	6
BoK: SCE,TI	Contemporary Topics - Select a course from one of the two Contemporary Topics areas: Society, Culture, and Ethics (SCE), Technology & Innovation (TI).	3
BoK: FA,HP,HU,SCE,SS	Additional General Education Course: select one additional course from either HP, SS, FA, HU, or SCE	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Industrial and Systems Engineering

Duration: 5 Years Total Credits: 124 Award: BSISE

Overview

Industrial and systems engineers are known as the “people engineers,” solving problems that directly impact organizations in every industry sector while often rising to the top of leadership. The University of Cincinnati’s B.S. in Industrial and Systems Engineering Degree will teach you to innovate and improve systems, solve complex problems, and incorporate human interaction within a system. The focus areas include data analytics, healthcare systems, and Industry 4.0/5.0.

At UC College of Engineering and Applied Science (CEAS), it’s all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Customize your experience with more than 600 organizations, including Institute of Industrial and Systems Engineers (IISE), Institute for Operations Research and the Management Sciences (INFORMS), Society for Health Systems (SHS), and more.
- Take courses that cover aspects of systems engineering including human interaction, digital manufacturing, data analytics, quality control, and conclude with capstone design.
- Build an impressive resume and professional network through our nationally recognized co-op program at companies such as Kroger, Procter & Gamble, Fifth Third Bank, Toyota Motor Company, Deloitte Consulting, Cincinnati Bell, and General Electric.

Data analytics

The current revolution of data science impacts science and industry alike. The industrial and systems engineering program emphasizes data analytics. You will be prepared to apply physical and mathematical principles in engineering and computer science to impact systems design, analysis, improvement, forecasting, and evaluation of integrated systems of people, material, information, and technology.

Healthcare and service systems

Service systems are the configuration of people, technology, and organization structure that deliver needs to a customer effectively and efficiently. Modern service systems such as healthcare systems are complex, expensive, and challenging. For example, healthcare can be improved with industrial and systems engineering principles such as improving care delivery, access to care, population health, disease diagnosis and treatment, and reducing cost. You will be equipped with the key skills of data modeling, quantitative modeling, optimization, simulation, and system thinking for in-demand jobs in healthcare and other service industries.

Industry 5.0: Digital transformation

Throughout history, industrial revolutions mark periods of improvement in manufacturing processes. Industry 4.0 includes the emergence of digital tools and technologies such as Industrial Internet of Things (IIOT), digital design and manufacturing, predictive simulations, machine learning, big data analytics, and cybersecurity to fully integrate smart factory operations and cyber-physical systems. The most recent revolution, Industry 5.0, elevates these technologies by immersing humans in the process and human intelligence to work seamlessly and cooperatively with smart machines, automation, and sensors. In this program, you will learn key skills to succeed in our current industrial landscape. From data science and data analytics to systems simulation and digital design, you’ll learn skills to apply in smart, immersive digital environments.

Career

Industrial and systems engineering careers are rewarding and challenging that propel us into new areas of exploration. Possible career paths include:

- Data analytics
- Healthcare services
- Industry 4.0/5.0
- Technical sales and management
- Supply chain and logistics systems
- Manufacturing
- Consulting

Students like you graduate and often work for:

- Technology companies: Facebook, Apple, and SpaceX
- Hospitals and healthcare systems: Keiser, VA, and Medtronic
- Next-generation manufacturing: Intel, Northrup Grumman
- Research facilities: NASA and National Labs.

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of test scores, class rank and GPA, and co-curricular activities.

First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Industrial and Systems Engineering program will apply for initial accreditation review with the Engineering Accreditation Commission of ABET.

Industrial and Systems Engineering

BSISE

Industrial and Systems Engineering Class of 2030

Duration: 5 Years

★Minimum Credits: 124 Credits

Fall Semester 2025

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENED1001C	Engineering Design Thinking I (C- min)	1
ENED1021	Engineering Applications I (C- min)	2
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4

Spring Semester 2026

Course	Title/Desc	Credit
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
MECH1072C	Engineering Design Graphics	4
PD1011	Introduction to COOP for CEAS (C- min)	1
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Fall Semester 2026/Spring Semester 2027

Coursework Semester

Course	Title/Desc	Credit
CS2023	Python Programming (C- min)	3
ENED3066	Engineering Statistics (C- min)	3
PHYS2002	College Physics II (Calculus-based)	4
PHYS2002L	College Physics Lab II (Calculus-based)	1
MECH2025	Statics for Mechanical Engineering (C- min)	3

COOP Semester

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2027/Fall 2027

Coursework Semester

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
ISE2010	Data Analytics I	3
ISE3020	Ergonomics in Systems Design	3

Mechanical Engineering

Duration: **5 Years** Total Credits: **126** Award: **BSME**

Overview

As a student in the Mechanical Engineering B.S. program at the University of Cincinnati, you will gain knowledge to design, manufacture, and operate machines and mechanical systems that work in a safe and efficient fashion to advance today's society. Students learn to use the principles of force, energy and motion to design, manufacture and operate machines and mechanical systems that work in a safe, efficient, economical and predictable fashion.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Take courses that cover fluid, thermal, structural, and motion design and analysis, kinematics and kinetics of machines, system dynamics and vibrations, thermodynamics, fluid mechanics, and heat transfer
- Customize your experience with more than 600 organizations, including American Society of Mechanical Engineers, Bearcat Motorsports, Robotics Club, BattleBots Club, Bearcat Baja, and more
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as Toyota Motor Company, Gulfstream Aerospace, Marathon Petroleum, Beckett Gas, Inc., and General Electric.

Career

Mechanical Engineers work in manufacturing, higher education, automotives, or research facilities. Possible career paths include:

- Manufacturing
- Machinery design
- Automotive design
- Technical sales

Mechanical Engineers work with product and machine design; manufacturing and production engineering; design and installation of thermal-fluids and/or mechanical systems; and design, analysis and development of energy-producing engines or devices.

The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Mechanical and Similarly Named Engineering Programs Program Criteria.

Mechanical Engineering

BSME

Mechanical Engineering Class of 2030

Duration: 5 Years

★Minimum Credits: 126 Credits

Fall 2025

Note: PHYS2001/PHYS2001L and CHEM1040/CHEM1040L can swap terms if students have previous calculus experience.

Course	Title/Desc	Credit
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4

Spring 2026

Note: PHYS2001/PHYS2001L and CHEM1040/CHEM1040L can swap terms if students have previous calculus experience.

Course	Title/Desc	Credit
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MATH1062	Calculus II (C- min)	4
MECH1072C	Engineering Design Graphics	4
PD1011	Introduction to COOP for CEAS (C- min)	1
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Fall 2026/Spring 2027

Coursework Semester

Course	Title/Desc	Credit
MATH2063	Multivariable Calculus	4
MECH2025	Statics for Mechanical Engineering (C- min)	3
MECH2032	Material Science	3
PHYS2002	College Physics II (Calculus-based)	4
PHYS2002L	College Physics Lab II (Calculus-based)	1

COOP Semester

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2027/Fall 2027

Coursework Semester

Course	Title/Desc	Credit
MATH2073	Ordinary Differential Equations	3
MECH2010	Thermodynamics	4
MECH2026	Dynamics for Mechanical Engineering	3
MECH2030	Solid Mechanics	3
MECH3070C	Circuits and Sensing Lab	3

COOP Semester

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring 2028/Summer 2028

Coursework Semester

Course	Title/Desc	Credit
MECH3011	Fluid Mechanics	3
MECH3022	Machine Design	4
MECH3042	Numerical Techniques in Mechanical Engineering	3
MECH3080	System Dynamics and Vibrations	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	General Education course	3

COOP Semester

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall 2028/Spring 2029

Coursework Semester

Course	Title/Desc	Credit
ENED3066	Engineering Statistics	3
MECH2060	Manufacturing Processes	3
MECH4012	Heat Transfer	4
MECH4071C	Mechatronics and Instrumentation Lab	3
MECH4081	Signals, Systems and Controls	3

COOP Semester

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer 2029/Fall 2029

Note: MECH5072C, General Education, guided and MECH elective courses may be taken in either the Fall or Spring Semester.

Summer 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall 2029

Course	Title/Desc	Credit
ENGL4092	Technical and Scientific Writing	3
MECH5072C	Experimental Methods in Mechanical Engineering	3
	MECH Elective	3
	General Education course	3

Senior Design I

Select one course

Course	Title/Desc	Credit
MECH5051	Senior Design I	3
MECH5055C	Automotive Design I	4
MECH5197	HVAC Design I	3

Spring 2030

Note: MECH5072C, General Education, guided and MECH elective courses may be taken in either the Fall or Spring Semester.

Course	Title/Desc	Credit
	MECH Elective	3
	General Education courses	6
	Guided Elective	3

Senior Design II

Select one course

Course	Title/Desc	Credit
MECH5052	Senior Design II	3
MECH5056C	Automotive Design II	4
MECH5198	HVAC Design II	3

General Education

Contemporary Topics

Course	Title/Desc	Credit
BoK: SCE	Select one course from or Society, Culture, & Ethics (SCE).	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Requirements

Course	Title/Desc	Credit
	Select 2 courses. They must be from 2 different areas- Fine Arts (FA), Humanities & Literature (HU), Historical Perspectives (HP), and Social Sciences (SS).	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Mechanical Engineering Technology

Duration: **5 Years** Total Credits: **124** Award: **BSMET**

Overview

As a student in the Mechanical Engineering Technology B.S. program at the University of Cincinnati, you will gain the knowledge to apply the principles of mechanical engineering to mechanical components, systems, automation, testing and field service to improve today's society.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Gain hands-on training in the fields hardware- and computer- oriented aspects of mechanical design, manufacturing, and energy systems
- Take courses that cover application and implementation of mechanical design, and incorporates modern computer techniques into mechanical design, automation, testing, and field service
- Customize your experience with more than 600 organizations, including American Society of Mechanical Engineers, Bearcat Motorsports, Robotics Club, Engineers Without Border, and more - Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as Mitsubishi Electric Automotive America, General Tool Company, Makino, Inc., Meyer Tool, Inc., and General Electric.

Career

Mechanical Engineering Technologists may work in design, testing, higher education, or research facilities. Possible career paths include:

- Mechanical design analysis
- Machinery and software testing
- Field installation
- Power plant operations
- Production planning

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and statistics or trigonometry. Pre-calculus is highly recommended. (4 units)
- Science, including Chemistry or Physics (3 units)
- Social sciences (3 units)
- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Mechanical Engineering Technology and Similarly Named Programs Program Criteria.

Mechanical Engineering Technology

BSMET

Mechanical Engineering Technology Class of 2030

Duration: 5 Years

★Minimum Credits: 124 Credits

Fall 2025

Course	Title/Desc	Credit
ENED1001C	Engineering Design Thinking I (C- min)	1
ENED1021	Engineering Applications I (C- min)	2
ENGL1001	English Composition	3
CHEM1040	General Chemistry I (C- min)	4
MATH1061	Calculus I (C- min)	4

Spring 2026

Course	Title/Desc	Credit
ENED1002C	Engineering Design Thinking II	1
ENED1022	Engineering Applications II	2
MET1072C	Engineering Design Graphics	4
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based)	1
PD1011	Introduction to COOP for CEAS (C- min)	1
STAT1031	Introduction to Statistics (C- min)	3

Fall 2026/Spring 2027

Coursework Semester

Course	Title/Desc	Credit
ELTN1042	Circuit Analysis I	3
MET1071	Statics	3
MET2032	Material Science	3
PHYS1052	General Physics II (Algebra-based) (C- min)	4
PHYS1052L	General Physics Lab II (Algebra-based)	1
	General Education course	3

COOP Semester

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer 2027/Fall 2027

Coursework Semester

Course	Title/Desc	Credit
MET2060	Thermodynamics	3
MET2073	Strength of Materials	3
MET2073L	Strength of Materials Laboratory	1
MET3051	Mathematic Applications in Engineering Technology	3
MET3075	Kinematics and Dynamics	4
	General Education course	3

COOP Semester

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring 2028/Summer 2028

Coursework Semester

Course	Title/Desc	Credit
MET2030	Manufacturing Processes	3
MET2030L	Machining and CAM Application Laboratory	1
MET3050	Logic Control	3
MET3074	Applied Machine Design for MET	4
MET4076	Applied Computational Methods	3
MET4076L	Applied Computational Methods Laboratory	1

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall 2028/Spring 2029

Coursework Semester

Course	Title/Desc	Credit
ENGL4092	Technical and Scientific Writing	3
MET2031L	Welding and Casting Laboratory	1
MET3061	Fluid Mechanics	3
MET3061L	Thermo/Fluid Mechanics Laboratory	1
MET4052	Motion Control	2
MET4052L	Motion Control Laboratory	1
MET5078	Product Development	2
MET5078L	Product Development Laboratory	1
PD2050	Mid-Curricular Co-op Community for Engineering	1

COOP Semester

Course	Title/Desc	Credit

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer 2029/Fall 2029

Summer 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Fall 2029

Course	Title/Desc	Credit
MET5053	Manufacturing Automation	2
MET5053L	Manufacturing Automation Laboratory	1
MET5062	Heat Transfer	3
MET5090	Senior Design I	2
MET5091	Senior Design II	1
	Technical Elective	3
	General Education course	3

Spring 2030

Course	Title/Desc	Credit
MET5063	Thermal Environmental Systems	2
MET5063L	Thermal Environmental Systems and Heat Transfer Laboratory	1
MET5092	Senior Design III	3
	Technical Electives	6
	General Education course	3

General Education

Contemporary Topics Requirement

Course	Title/Desc	Credit
BoK: SCE	Select one course from Society, Culture, and Ethics (SCE).	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

Distribution Requirement

Course	Title/Desc	Credit
BoK: FA,HP,HU,SS	Select two courses from Fine Arts (FA), Historical perspectives (HP), Humanities (HU), or Social Sciences (SS) The course must be from two different areas.	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Mechanical Engineering Technology

BSMET

Mechanical Engineering Technology Class of 2029

Duration: 5 Years

★Minimum Credits: 124 Credits

Fall 2024

Course	Title/Desc	Credit
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENGL1001	English Composition	3
CHEM1040	General Chemistry I (C- min)	4
MATH1061	Calculus I (C- min)	4

Spring 2025

Course	Title/Desc	Credit
ENED1120	Foundations of Engineering Design Thinking II	3
MET1072C	Engineering Design Graphics	4
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based)	1
PD1011	Introduction to COOP for CEAS (C- min)	1
STAT1031	Introduction to Statistics (C- min)	3

Fall 2025/Spring 2026

Coursework Semester

Course	Title/Desc	Credit
	General Education course	3
ELTN1042	Circuit Analysis I	3
MET1071	Statics	3
MET2032	Material Science	3
PHYS1052	General Physics II (Algebra-based) (C- min)	4
PHYS1052L	General Physics Lab II (Algebra-based)	1

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Additive Manufacturing

Duration: 1 Year Award: MENG

Overview

Additive manufacturing is a growing field that crosses disciplinary boundaries and a focused program provides benefits to students. Additive manufacturing (AM) offers an entirely different and new product life-cycle comprised of conceptualization, design and manufacturing. Recent advances in AM machines, materials and simulation technology provide unprecedented design flexibility that enables innovations and inventions leading to new products and processes with reduced time, cost and risk. The program provides necessary education and skills to contribute to this field.

The Master of Engineering (MEng) program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need.

Admission Requirements

Undergraduate degree in engineering, engineering technology or computer science from an ABET accredited program with a cumulative GPA of 3.0 or better. Individuals who do not meet those requirements may be considered by submitting additional materials that demonstrate their ability to be successful in a graduate program.

International Student Requirements

Undergraduate degree in engineering, computer science or a closely related field with a cumulative GPA of 70% or better. GRE scores. Demonstrated proficiency in English language.

Graduation Requirements

Completion of a minimum of 30 credits; minimum GPA of 3.0; completion of MEng capstone.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Aerospace Engineering

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

Modern aerospace systems become increasingly intricate as technology advances. Successful, safe, and sustainable aerospace engineering requires coordination of many interrelated processes and systems. By encompassing the areas of aeronautics and astronautics, the aerospace engineering program at UC prepares students to analyze, design and implement aerospace systems for the next generation of explorers.

The Master of Engineering (MEng) program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need.

While students have up to two years to complete the degree, all requirements can be completed in one year.

Architectural Engineering

MENG

20MAS-AE-MENG-2024

Duration: 1.5 Years

★Minimum Credits: 30 Credits

MEng Core Courses

MEng students complete two core courses; one in the project/task management category and one in the interpersonal skills category.

Core Courses-Project/Task Management

Select one course from list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
AEEM6067	Entrepreneurship and Technology Law (C min)	3
AEEM6099	Systems Engineering Analysis (C min)	3
CVE6044	Construction Law (C min)	3
ENGR6012	Innovation and Design Thinking (C min)	3
ENGR6014	Engineering Project Management (C min)	3
ENGR6025	Lean Six Sigma (C min)	3
ENTR7082	Special Topics in Entrepreneurship (C min)	1 - 3
MECH6050	Occupational Safety Engineering (C min)	3
MECH6074	Quality Control (C min)	3

Core Courses-Interpersonal Skills

Students select one course from list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6003	Organizational Behavior for Technical Professionals (C min)	3
ENGR6010	Effectiveness in Technical Organizations (C min)	3
ENGR6016	Applied Leadership of Project Teams (C min)	3
ENGR6050	Fundamentals of Leadership (C min)	3
ENGR6012	Innovation and Design Thinking (C min)	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3

Building Structures Option

Students who choose this option will take 12 credits of required courses from the list provided.

Building Structures Choice of Required Courses

Students take 12 credits out of any combination of the following courses.

Course	Title/Desc	Credit
AEC6012	Building Information Modeling for Existing Facilities (C min)	2
AEC6021	Integrated Building Envelope Analysis (C min)	2
CVE6058	Design of Wood Structures (C min)	2
CVE6059	Design of Masonry Structures (C min)	2
CVE6081	Foundation Engineering (C min)	3
CVE6085	Advanced Structural Analysis (C min)	3
CVE6088	Finite Element Modeling of Civil and Arch Engineering Structures (C min)	2
CVE7081	Theory and Design of Concrete Structures I (C min)	3
CVE7085	Metal Structures Theory and Design I (C min)	3

MEng Capstone

Students complete a capstone project and enroll in a capstone course or take a final comprehensive examination (no capstone course enrollment if this option is selected).

MEng Capstone

If completing a project for capstone, students enroll in 1 capstone course.

Course	Title/Desc	Credit
CVE7090	Master of Engineering Capstone Project	3

Building System and Energy Option

Students who choose this option will take 12 credits of required courses from the list provided.

Building Systems and Energy Option Choice of Required Courses

Students take 12 credits out of any combination of the following courses.

Course	Title/Desc	Credit
AE6010	Advanced Building Mechanical Systems (C min)	3
AE6020	Advanced lighting and daylighting (C min)	3
AE6030	Building Energy Modeling (C min)	3
AE6047	Building Energy Audits and Data Analytics (C min)	3
AE6050	Indoor Air Quality (C min)	3
MECH6094	Fundamentals and Applications of Solar Energy (C min)	3

Elective Courses

Electives

In consultation with an advisor, students complete electives as needed to earn the minimum of 30 credit hours for this degree. With permission of their advisor, the graduate program director, and the college, students may take elective graduate courses outside of Civil Engineering or outside of the College of Engineering & Applied Science.

Course	Title/Desc	Credit
CVE6037	Construction Financing & Strategy Planning (C min)	3
CVE6042	Sustainable Construction and LEED (C min)	3
CVE7010	RISK AND RELIABILITY (C min)	3
CVE7089	Earthquake Engineering (C min)	3
EECE8115C	Humans, Machines, Robots and their Interactions (C min)	3
ENGR6012	Innovation and Design Thinking (C min)	3
ENVE6048	Quantitative Sustainability (C min)	3
MECH6013	Introduction to Smart Structures (C min)	3
MECH6034	Distributed Sensing and Control (C min)	3
MECH6066	Acoustics (C min)	3
PLAN6033	Greening Cities and Neighborhoods: tools, practices, and planning (C min)	3

Course	Title/Desc	Credit
AE6XXX+ CVE6XXX+	Electives in CVE or AE Any graduate elective in AE or CVE in consultation with advisor (C min)	2 - 4
Free Electives	Graduate courses 6000+ level or independent studies	0 - 6

Building Construction Option

Students who choose this option will take 13 credits of required courses from the following.

Building Construction Required Courses

Students take all courses.

Course	Title/Desc	Credit
AEC6011	Virtual Design and Construction (C min)	2
AEC6012	Building Information Modeling for Existing Facilities (C min)	2
CVE6004	Temporary Structures (C min)	3
CVE6036	Value Engineering and Constructability (C min)	3
CVE6042	Sustainable Construction and LEED (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Artificial Intelligence

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

Artificial Intelligence is an emerging field involving multiple engineering disciplines. Graduates of the program will be prepared to contribute to AI through applications in many “traditional” disciplines as well as emerging fields that are only possible with the analytics to manage data and the sophistication to make appropriate decisions based on that data.

The Master of Engineering (MEng) program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual’s ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student’s interest, the degree could add significant depth to an individual’s understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today’s competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Engineering

Duration: **2 Years** Total Credits: **30** Award: **MENG**

Overview

The graduate degree in biomedical engineering combines faculty, resources and expertise from its prestigious Colleges of Engineering and Medicine. One of the few such interdisciplinary advanced degree programs in the country, the BME graduate program offers four different areas of specialization - Medical Device Design, Medical Imaging and Regenerative Medicine. The degree provides students with the knowledge and tools to develop revolutionary healthcare devices, procedures, and treatment strategies for the 21st century. The field of biomedical engineering is expected to lead engineering employment growth in the next decade.

The Master of Engineering (MEng) program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need. While students have up to two years to complete the degree, all requirements can be completed in one year.

Biomedical Engineering MENG-2019

Duration: 2 Years
★Minimum Credits: 30 Credits

MEng Core Courses - Project / Task Management

Select one course from the list of courses; others may be appropriate with permission

Course	Title/Desc	Credit
MECH6074	Quality Control	3
OM7011	Operations and Supply Chain Management	2
AEEM6067	Entrepreneurship and Technology Law	3
ENGR6014	Engineering Project Management	3
ENGR6012	Innovation and Design Thinking	3
ENGR6030	Engineering Economic Analysis	3
ENGR7025	Concurrent Product & Process Design Integrating Control and Quality	3
AEEM6099	Systems Engineering Analysis	3
ENGR6025	Lean Six Sigma	3
CVE6079	Engineering Data Management and Analysis	3
MECH6050	Occupational Safety Engineering	3
ENTR7082	Special Topics in Entrepreneurship	3

Biomedical Engineering Courses

Students are required to take at least 12 credit hours of BME graduate courses.

Course	Title/Desc	Credit
BME6XXX+	Biomedical Engineering Track Courses (C min)	12 - 21

Capstone

Students are required to complete a capstone project of 3-6 credit hours.

Course	Title/Desc	Credit
BME8060	Master of Engineering Capstone Project (C min)	1 - 6

Elective Courses

With approval from BME MEng advisor, students can complete up to 6 credit hours of graduate coursework from any discipline.

Course	Title/Desc	Credit
AEEM6XXX+ BE6XXX+ BME6XXX+ BMIN6XXX+ CB6XXX+ CE6XXX+ CHE6XXX+ CS6XXX+ EGFD6XXX+ ENGR6XXX+ ENVE6XXX+ GNTD6XXX+ MATH6XXX+ MCP6XXX+ MECH6XXX+ MTEN6XXX+	CEAS Courses Students may take graduate courses from any engineering discipline (C min)	3 - 6

MEng Core Courses - Professional Skills

Select one course from the list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6002	Management of Professionals	3
ENGR6010	Effectiveness in Technical Organizations	3
ENGR6050	Fundamentals of Leadership	3
MGMT7014	Leadership and Organizations	2
OLHR6050	Teams (C min)	3
OLHR8029	Individual Behavior in the Workplace (C min)	2 - 3
ENGR6012	Innovation and Design Thinking	3
ENGR6003	Organizational Behavior for Technical Professionals	3
ENGR6016	Applied Leadership of Project Teams	3
OLHR8090	Strategic Leadership for HR	3

Course	Title/Desc	Credit

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemical Engineering

Duration: **2 Years** Total Credits: **30** Award: **MENG**

Overview

The Master of Engineering (MEng) in Chemical Engineering program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need. While students have up to two years to complete the degree, all requirements can be completed in one year.

Curriculum Guide Versions:
20MAS-CHE-MENG

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA minimum 3.0 or equivalent
- Statement of Purpose
- Two letters of recommendation
- International students - English Proficiency Test: TOEFL (minimum 92) or IELTS (minimum 6.5)

Application Deadlines

Application deadlines and additional application information can be found at the CEAS Office of Graduate Studies.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Chemical Engineering

MENG

20MAS-CHE-MENG

Duration: 2 Years
Minimum Credits: 30 Credits

MEng Core Courses

Students complete 2 or more MEng core courses--one in the project/task management category and one in the interpersonal skills category.

Core Courses - Project / Task Management

Students select at least one course from the list of courses; other courses may be permissible with approval of adviser.

Course	Title/Desc	Credit
AEEM6067	Entrepreneurship and Technology Law	3
AEEM6099	Systems Engineering Analysis	3
CVE6079	Engineering Data Management and Analysis	3
ENGR6014	Engineering Project Management	3
CVE6044	Construction Law	3
ENGR6012	Innovation and Design Thinking	3
ENGR6013	Six Sigma Principles and Applications	3
ENGR6025	Lean Six Sigma	3
ENGR6030	Engineering Economic Analysis	3
ENGR7025	Concurrent Product & Process Design Integrating Control and Quality	3
ENTR7082	Special Topics in Entrepreneurship	3
MECH6074	Quality Control	3
MECH6050	Occupational Safety Engineering	3
OM7011	Operations and Supply Chain Management	2

Core Courses - Interpersonal Skills

Students select at least one course from the list of courses; other courses may be permissible with approval of adviser.

Course	Title/Desc	Credit
ENGR6002	Management of Professionals	3
ENGR6003	Organizational Behavior for Technical Professionals	3
ENGR6010	Effectiveness in Technical Organizations	3
ENGR6012	Innovation and Design Thinking	3
ENGR6016	Applied Leadership of Project Teams	3

Chemical Engineering Courses

Track Courses

Students complete all four required track courses.

Course	Title/Desc	Credit
CHE6040	Advanced Chemical Engineering Thermodynamics	3
CHE6043	Advanced Transport Phenomena I	3
CHE6044	Advanced Transport Phenomena II	3
CHE7077	Chemical Reaction Engineering	3

CHE Elective Courses

Students take 9 credits of electives. Any graduate level CHE course qualifies.

Course	Title/Desc	Credit
CHE6XXX+	CHE electives (C min)	9

MEng Capstone

Students complete one capstone experience and enroll in one capstone course.

Course	Title/Desc	Credit
CHE8060	Master of Engineering Capstone Project	3

Course	Title/Desc	Credit
ENGR6050	Fundamentals of Leadership	3
OLHR6050	Teams (C min)	3
MGMT7014	Leadership and Organizations	2
OLHR8029	Individual Behavior in the Workplace (C min)	2 - 3
OLHR8090	Strategic Leadership for HR	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Civil Engineering

Duration: **2 Years** Total Credits: **30** Award: **MENG**

Overview

The Master of Engineering (MEng) Civil Engineering program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need. While students have up to two years to complete the degree, all requirements can be completed in one year.

Civil Engineering

MENG

20MAS_CE_MENG_2024

Duration: 2 Years

★Minimum Credits: 30 Credits

MEng Core Courses

MEng students complete two core courses; one in the project/task management category and one in the interpersonal skills category.

Core Courses-Project/Task Management

Select one course from list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
AEEM6067	Entrepreneurship and Technology Law (C min)	3
AEEM6099	Systems Engineering Analysis (C min)	3
CVE6044	Construction Law (C min)	3
CVE6079	Engineering Data Management and Analysis (C min)	3
EECE6032	Software Testing and Quality Assurance (C min)	3
ENGR6012	Innovation and Design Thinking (C min)	3
ENGR6014	Engineering Project Management (C min)	3
ENGR6025	Lean Six Sigma (C min)	3
ENGR6031	Engineered Supply Chain Cost Modeling for Sustainability and Innovation (C min)	3
ENTR7082	Special Topics in Entrepreneurship (C min)	1 - 3
MECH6050	Occupational Safety Engineering (C min)	3
MECH6074	Quality Control (C min)	3

Core Courses-Interpersonal Skills

Students select one course from list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6012	Innovation and Design Thinking (C min)	3
ENGR6010	Effectiveness in Technical Organizations (C min)	3
ENGR6016	Applied Leadership of Project Teams (C min)	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3
ENGR6050	Fundamentals of Leadership (C min)	3

Construction Engineering and Management Track

Students who choose the Construction Engineering and Management track will take 5 required courses and select elective courses in consultation with an advisor.

Construction Engineering and Management Required Courses

Students take the following required courses.

Course	Title/Desc	Credit
CVE6037	Construction Financing & Strategy Planning (C min)	3
CVE6042	Sustainable Construction and LEED (C min)	3
CVE6045	Heavy Highway Estimating (C min)	3

Construction Engineering and Management Elective Courses

Students select at least 12 credits in consultation with track advisor.

Course	Title/Desc	Credit
AEC6011	Virtual Design and Construction (C min)	2
AEC6012	Building Information Modeling for Existing Facilities (C min)	2
CS6101	Introduction to Applied Artificial Intelligence and Machine Learning Tools (C min)	3
CVE6004	Temporary Structures (C min)	3
CVE6005	Construction Contract Changes and Claims Management (C min)	2
CVE6036	Value Engineering and Constructability (C min)	3
CVE6044	Construction Law (C min)	3
ENGR6014	Engineering Project Management (C min)	3
ENGR6050	Fundamentals of Leadership (C min)	3
STAT6031	Applied Regression Analysis (C min)	3

MEng Capstone

Students complete a capstone project and enroll in a capstone course or take a final comprehensive examination (no capstone course enrollment if this option is selected).

MEng Capstone

If completing a project for capstone, students enroll in 1 capstone course.

Course	Title/Desc	Credit
CVE7090	Master of Engineering Capstone Project	3

CVE 7005 Graduate Seminar

Students need to take the zero credit hour, CVE 7005 Graduate Seminar.

Course	Title/Desc	Credit
CVE7005	CVE Graduate Seminar	0

Transportation Engineering Track

Students who choose the Transportation Engineering track will take the required courses and at least one elective.

Transportation Engineering Required Courses

Students take the following required courses.

Course	Title/Desc	Credit
CVE6012	Travel Demand Forecasting and Environmental Analysis (C min)	3
CVE6024	Transportation Safety (C min)	3
CVE6022C	Traffic Control and Signal System Design (C min)	3
CVE6028	Geometric Design of Transportation Facilities (C min)	3
CVE6030	GIS in Transportation (C min)	3
CVE6086	Cyber-Physical Transportation Infrastructures (C min)	3

Transportation Engineering Elective Courses

Students choose at least one course from the following list of electives.

Course	Title/Desc	Credit
CS6033	Artificial Intelligence (C min)	3
CS6037	Machine Learning (C min)	3
CS6052	Intelligent Data Analysis (C min)	3
CVE6010C	Intelligent Transportation Data Analytics and Application (C min)	3
CS8021	Pattern Recognition (C min)	3
CVE6025	Traffic Operations (C min)	3
CVE7074	Traffic Flow Theory and Network Modeling (C min)	3
CVE7076	Intelligent Transportation Systems (C min)	3
EECE6042	Digital Image Processing (C min)	3
MATH6005	Introduction to Complex Analysis (C min)	3
PLAN6011	Essential Economics for Planners (C min)	3
PLAN6012	Policies and Strategies of Regional Economic Development Planning (C min)	3
PLAN6058	Transportation Planning (C min)	3

Elective Courses

Electives

Students complete electives as needed to earn the minimum of 30 credit hours for this degree. With permission of their advisor, the graduate program director, and the college, students may take elective graduate courses outside of Civil Engineering or outside of the College of Engineering & Applied Science.

Course	Title/Desc	Credit
Free Electives	Graduate courses 6000+ level or independent studies	0 - 6

Course	Title/Desc	Credit
STAT6031	Applied Regression Analysis (C min)	3

Geotechnical Engineering Track

Students who choose the Geotechnical Engineering track complete 4 required courses and choose at least 2 electives.

Geotechnical Engineering Required Courses

Students in the Geotechnical track take the required courses below.

Course	Title/Desc	Credit
CVE6060	Slope Stability & Earth Retaining Structures (C min)	3
CVE6063	Principles of Pavement Engineering (C min)	3
CVE6081	Foundation Engineering (C min)	3
CVE7061	Advanced Soil Mechanics (C min)	3

Geotechnical Engineering Elective Courses

Students choose at least two of the following elective courses.

Course	Title/Desc	Credit
CS6101	Introduction to Applied Artificial Intelligence and Machine Learning Tools (C min)	3
CS6037	Machine Learning (C min)	3
CVE6067	Advanced Pavement Engineering (C min)	3

Course	Title/Desc	Credit
CVE6082	Reinforced Concrete Design of Shallow Foundations (C min)	3
CVE7010	RISK AND RELIABILITY (C min)	3
CVE7011	Structural Mechanics (C min)	3
CVE7081	Theory and Design of Concrete Structures I (C min)	3
GEOL6004	Glacial Geology (C min)	3
STAT6031	Applied Regression Analysis (C min)	3

Structural Engineering Track

Students in the Structural Engineering track take 5 required classes.

Structural Engineering Required Courses

Students take all 5 required courses.

Course	Title/Desc	Credit
CVE7011	Structural Mechanics (C min)	3
CVE7012	Finite Element Analysis (C min)	3
CVE7081	Theory and Design of Concrete Structures I (C min)	3
CVE7085	Metal Structures Theory and Design I (C min)	3
CVE7088	Structural Dynamics (C min)	3

Structural Engineering Electives

Students take at least 2 elective courses.

Course	Title/Desc	Credit
CVE6021	Bridge Engineering (C min)	3
CVE6058	Design of Wood Structures (C min)	2
CVE6059	Design of Masonry Structures (C min)	2
CVE6081	Foundation Engineering (C min)	3
CVE6082	Reinforced Concrete Design of Shallow Foundations (C min)	3
CVE6088	Finite Element Modeling of Civil and Arch Engineering Structures (C min)	2
CVE7010	RISK AND RELIABILITY (C min)	3
CVE7082	Design of Concrete Structures II (C min)	3
CVE7086	Metal Structures Theory and Design II (C min)	3
CVE7089	Earthquake Engineering (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Engineering

ENGR6012	Innovation and Design Thinking (C min)	3

Cyber Security Track

Students who choose the Cyber Security track need to complete at least 18 credit hours of approved required and elective courses.

Cyber Security Required Courses

Students take all 4 required courses.

Course	Title/Desc	Credit
CS6021	Mathematical Logic (C min)	3
CS6055	Cyber Defense Overview (C min)	3
CS6056	Security Vulnerability Assessment (C min)	3
EECE6032	Software Testing and Quality Assurance (C min)	3

Cyber Security Elective Courses

Students choose 2 courses from the approved list of electives.

Course	Title/Desc	Credit
CS6038	Malware Analysis (C min)	3
CS6043	Computer Networking (C min)	3
CS6058	Data Security and Privacy (C min)	3
CS6097	Introduction to Wireless and Mobile Networking (C min)	3
CS7092	Sensor-based Embedded Systems Design (C min)	3
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6023C	Security & Trust for Cyberphysical Systems (C min)	4
EECE6029	Distributed Operating Systems and Algorithms (C min)	3
EECE6038C	Advanced Microsystem Design (C min)	4
EECE6083	Compiler Theory and Practice (C min)	3
EECE7017C	Trustworthy Embedded Systems (C min)	4
EECE7095	Introduction to Computer Architecture (C min)	3

MEng Capstone

Students must complete a capstone experience and enroll in a capstone course.

MEng Capstone Course

Students can count up to 6 credits of capstone towards the degree and can enroll in a capstone course in more than one semester.

Course	Title/Desc	Credit
EECE9060	Master of Engineering Capstone Project (C min)	1 - 4
ENGR7001	Master of Engineering Seminar	1 - 3

Course	Title/Desc	Credit
ENGR6003	Organizational Behavior for Technical Professionals (C min)	3
ENGR6016	Applied Leadership of Project Teams (C min)	3
ENGR6050	Fundamentals of Leadership (C min)	3
OLHR6050	Teams (C min)	3
MGMT7014	Leadership and Organizations (C min)	2
OLHR8029	Individual Behavior in the Workplace (C min)	3
OLHR8090	Strategic Leadership for HR (C min)	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3

VLSI Design Track

Students who choose the VLSI Design track must take at least 18 credits from the list of approved required and elective courses.

VLSI Design Required Courses

Take all 3 required courses.

Course	Title/Desc	Credit
EECE6080C	Introduction to VLSI Design (C min)	4
EECE6082C	VLSI Design for Test and Power (C min)	4
EECE6086C	VLSI Design Automation (C min)	4

VLSI track electives

VLSI Design Elective Courses

Students take at least 6 credits from the approved list of electives.

Course	Title/Desc	Credit
CS6051	Database Theory (C min)	3
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6029	Distributed Operating Systems and Algorithms (C min)	3

Course	Title/Desc	Credit
EECE6030	Trust in Digital Hardware (C min)	3
EECE6036	Intelligent Systems (C min)	3
EECE6038C	Advanced Microsystem Design (C min)	4
EECE6083	Compiler Theory and Practice (C min)	3
EECE8085C	Topics in VLSI CAD/Test (C min)	4
EECE7095	Introduction to Computer Architecture (C min)	3
EECE6034C	Hardware Design with FPGAs: Secure and Trustworthy Systems (C min)	4

Embedded Systems Track

Students who choose the Embedded Systems track need to complete at least 18 credit hours from approved required and elective courses.

Embedded Systems Required Courses

Students choose all 4 required courses.

Course	Title/Desc	Credit
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6029	Distributed Operating Systems and Algorithms (C min)	3
EECE6038C	Advanced Microsystem Design (C min)	4
EECE7095	Introduction to Computer Architecture (C min)	3

Embedded Systems Elective Courses

Students choose 2 elective courses from the approved list.

Course	Title/Desc	Credit
CS6027	Requirements Engineering (C min)	3
CS6097	Introduction to Wireless and Mobile Networking (C min)	3
EECE6007	Biomedical Microsystems (C min)	3
EECE6015C	Instrumentation & Industrial Control (C min)	4
EECE6023C	Security & Trust for Cyberphysical Systems (C min)	4
EECE6032	Software Testing and Quality Assurance (C min)	3
EECE6080C	Introduction to VLSI Design (C min)	4
EECE7017C	Trustworthy Embedded Systems (C min)	4
EECE7019	Bio-inspired Robotics (C min)	3
EECE7075	Principles of Modern Networking (C min)	3
EECE8115C	Humans, Machines, Robots and their Interactions (C min)	3
MECH6031	Introduction to Robotics (C min)	3
EECE6028C	Intelligent Machine Design (C min)	4
EECE6034C	Hardware Design with FPGAs: Secure and Trustworthy Systems (C min)	4

General Computer Engineering

Students who choose the General Computer Engineering track

need to complete at least 18 credit hours from an approved list of required and elective courses.

General Computer Engineering Required Courses

Students choose 4 of 6 required courses.

Course	Title/Desc	Credit
CS6051	Database Theory (C min)	3
EECE6029	Distributed Operating Systems and Algorithms (C min)	3
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6080C	Introduction to VLSI Design (C min)	4
EECE7095	Introduction to Computer Architecture (C min)	3
EECE6038C	Advanced Microsystem Design (C min)	4

General Computer Engineering Electives Courses

Students choose 2 from the list of approved courses.

Course	Title/Desc	Credit
CS6058	Data Security and Privacy (C min)	3
CS6043	Computer Networking (C min)	3
CS7081	Advanced Algorithms I (C min)	3
EECE6023C	Security & Trust for Cyberphysical Systems (C min)	4
EECE6036	Intelligent Systems (C min)	3
EECE6083	Compiler Theory and Practice (C min)	3

Course	Title/Desc	Credit
EECE7075	Principles of Modern Networking (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

The Master of Engineering (MEng) in Computer Science program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need. While students have up to two years to complete the degree, all requirements can be completed in one year.

MENG

20MAS-MEngCS-2024

Duration: 1 Year

★Minimum Credits: 30 Credits

MEng Core Courses

Students are required to take at least one course from the approved list of Interpersonal Skills courses and at least one course from the approved list of Project / Task Management Courses

CS Required Courses

Students take at least two required courses (6 or more credits).

MEng Capstone

Students are required to complete a capstone (1-6 credits).

Core Courses - Project / Task Management

Select one course from the list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
AEEM6067	Entrepreneurship and Technology Law	3
AEEM6099	Systems Engineering Analysis	3
CVE6044	Construction Law (C min)	3
EECE6032	Software Testing and Quality Assurance	3
ENGR6014	Engineering Project Management	3
ENGR6025	Lean Six Sigma (C min)	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3
ENGR6031	Engineered Supply Chain Cost Modeling for Sustainability and Innovation (C min)	3
ENGR6032	Industry 4.0 Domains of Knowledge (C min)	3
ENTR7082	Special Topics in Entrepreneurship (C min)	1 - 3
MECH6050	Occupational Safety Engineering (C min)	3
MECH6074	Quality Control	3

Core courses - Interpersonal Skills

Select one course from the list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6002	Management of Professionals	3
ENGR6003	Organizational Behavior for Technical Professionals (C min)	3
ENGR6010	Effectiveness in Technical Organizations	3
ENGR6012	Innovation and Design Thinking	3
ENGR6016	Applied Leadership of Project Teams (C min)	3
ENGR6050	Fundamentals of Leadership	3

CS required courses

Students take at least two required courses (6 or more credits).

Course	Title/Desc	Credit
CS6043	Computer Networking (C min)	3
EECE6029	Distributed Operating Systems and Algorithms (C min)	3
CS6037	Machine Learning (C min)	3
CS6051	Database Theory (C min)	3
CS7081	Advanced Algorithms I (C min)	3

CS elective courses

For students with no concentration, choose 12 credits (4 classes) of electives from the list below. Students who choose a concentration, Data Science or Cyber Security, are only required to complete 6 credits (2 classes) of electives below.

Course	Title/Desc	Credit
CS6021	Mathematical Logic (C min)	3
CS6025	Data Encoding (C min)	3
CS6027	Requirements Engineering (C min)	3
CS6028	Large Scale Software Engineering (C min)	3
CS6033	Artificial Intelligence (C min)	3
CS6035	Learning Probabilistic Models (C min)	3
CS6037	Machine Learning (C min)	3
CS6038	Malware Analysis (C min)	3
CS6043	Computer Networking (C min)	3
CS6051	Database Theory (C min)	3
CS6052	Intelligent Data Analysis (C min)	3
CS6054	Information Retrieval (C min)	3
CS6055	Cyber Defense Overview (C min)	3
CS6056	Security Vulnerability Assessment (C min)	3

MEng Capstone

Students are required to complete a capstone experience. Students generally take 3 credits of capstone and 3 credits of seminar

Course	Title/Desc	Credit
CS8060	Master of Engineering Capstone Project	1 - 6
ENGR7001	Master of Engineering Seminar	1 - 3

Course	Title/Desc	Credit

Course	Title/Desc	Credit
CS6058	Data Security and Privacy (C min)	3
CS6060	Computer Graphics I (C min)	3
CS6065	Introduction to Cloud Computing (C min)	3
CS6068	Parallel Computing (C min)	3
CS6072	Network Science (C min)	3
CS6073	Deep Learning (C min)	3
CS6074	Software Architecture (C min)	3
CS6097	Introduction to Wireless and Mobile Networking (C min)	3
CS7051	Advanced Topics in Mining Spatial and Temporal Data (C min)	3
CS7053	Intro to Medical Informatics (C min)	3
CS7054	Data Science for Biomedical Research (C min)	3
CS7063	Advanced Methods in Machine Learning (C min)	3
CS7070	Big Data Analytics (C min)	3
CS7071	Advanced Database Management (C min)	3
CS7081	Advanced Algorithms I (C min)	3
CS7082	Advanced Algorithms II (C min)	3
CS7092	Sensor-based Embedded Systems Design (C min)	3
EECE6029	Distributed Operating Systems and Algorithms (C min)	3
CS6024	Engineering Interactive Visual Interfaces for Data Science (C min)	3
CS6034	Natural Language Processing (C min)	3
CS6053	Network Security (C min)	3
CS6067	User Interface I (C min)	3
CS6070	The Theory of Formal Languages and Automata (C min)	3
CS7024	Advanced Data Visualization for Data Science (C min)	3
CS7029	Advanced Network Design (C min)	3
CS7097C	Introduction to Functional Genomics (C min)	3
CS7099	Introduction to Bioinformatics (C min)	3 - 5

Concentration: Cyber Security or Data Science

Students may choose as a concentration either Cyber Security or Data Science and take at least 2 courses (6 credits) from their chosen concentration. Choosing a concentration is optional. Students who do not choose a concentration will have additional elective requirements.

Concentration: Cyber Security

If students choose Cyber Security as a concentration, select two of the courses listed below.

Course	Title/Desc	Credit
CS6021	Mathematical Logic (C min)	3
CS6055	Cyber Defense Overview (C min)	3
CS6056	Security Vulnerability Assessment (C min)	3
CS6058	Data Security and Privacy (C min)	3

Concentration: Data Science

If students choose Data Science as a concentration, select two of the courses listed below.

Course	Title/Desc	Credit
CS6025	Data Encoding (C min)	3
CS6035	Learning Probabilistic Models (C min)	3
CS6052	Intelligent Data Analysis (C min)	3
CS6054	Information Retrieval (C min)	3
CS6073	Deep Learning (C min)	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electrical Engineering

Duration: 2 Years Total Credits: 30 Award: MENG

Overview

The Master of Engineering (MEng) program in Electrical Engineering provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need. While students have up to two years to complete the degree, all requirements can be completed in one year.

Electrical Engineering

MENG

Electrical Engineering MEng-2020

Duration: 2 Years

★Minimum Credits: 30 Credits

MEng Core Courses

All MEng students take 2 core courses--one from the project/task management category and one from the interpersonal skills category.

VLSI Design Track

Students who select the VLSI Design track will take 18 credits from the approved required and elective courses.

MEng Capstone

Students can take up to 6 credits of MEng Capstone and are required to complete a capstone experience

Core Courses-Project/Task Management

Select one course from list; other courses may be allowed with permission.

Course	Title/Desc	Credit
AEEM6067	Entrepreneurship and Technology Law (C min)	3
AEEM6099	Systems Engineering Analysis (C min)	3
CVE6044	Construction Law (C min)	3
CVE6079	Engineering Data Management and Analysis (C min)	3
EECE6032	Software Testing and Quality Assurance (C min)	3
ENGR6014	Engineering Project Management (C min)	3
ENGR6025	Lean Six Sigma (C min)	3
ENGR6030	Engineering Economic Analysis (C min)	3
ENGR7025	Concurrent Product & Process Design Integrating Control and Quality (C min)	3
ENTR7082	Special Topics in Entrepreneurship (C min)	1 - 3
MECH6050	Occupational Safety Engineering (C min)	3
MECH6074	Quality Control (C min)	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3

Core Courses-Interpersonal Skills

Select one course from the list; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6002	Management of Professionals (C min)	3
ENGR6003	Organizational Behavior for Technical Professionals (C min)	3
ENGR6010	Effectiveness in Technical Organizations (C min)	3
ENGR6012	Innovation and Design Thinking (C min)	3

VLSI Design Required Courses

Students take all 3 required courses.

Course	Title/Desc	Credit
EECE6080C	Introduction to VLSI Design (C min)	4
EECE6082C	VLSI Design for Test and Power (C min)	4
EECE6086C	VLSI Design Automation (C min)	4

VLSI Design Elective Courses

Students take at least 6 credits of electives (2-3 courses).

Course	Title/Desc	Credit
EECE6007	Biomedical Microsystems (C min)	3
EECE6008	Fundamentals of MEMS (C min)	3
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6018	Microfabrication of Semiconductor Devices (C min)	3
EECE6019	Probability and Random Processes (C min)	3
EECE6024	Introduction to Digital Signal Processing (C min)	3
EECE6026	Introduction to Communication Systems (C min)	3
EECE6030	Trust in Digital Hardware (C min)	3
EECE6034C	Hardware Design with FPGAs: Secure and Trustworthy Systems (C min)	4
EECE6036	Intelligent Systems (C min)	3
EECE6088	Nanoelectronic Devices for VLSI Technologies (C min)	3
EECE7033	Linear Systems Theory (C min)	3
EECE8085C	Topics in VLSI CAD/Test (C min)	4

MEng Capstone Course

Students enroll in up to 6 credits of capstone plus seminar. Students can enroll in course in more than one semester.

Course	Title/Desc	Credit
EECE9060	Master of Engineering Capstone Project	1 - 4
ENGR7001	Master of Engineering Seminar (C min)	1 - 3

Course	Title/Desc	Credit
ENGR6016	Applied Leadership of Project Teams (C min)	3
ENGR6050	Fundamentals of Leadership (C min)	3
MGMT7014	Leadership and Organizations (C min)	2
OLHR6050	Teams (C min)	3
OLHR8029	Individual Behavior in the Workplace (C min)	3
OLHR8090	Strategic Leadership for HR (C min)	3

Robotics & Automation Track

Students who choose the Robotics & Automation Track must complete 18 credits from the approved list of required and elective courses.

Robotics & Automation Required Courses

Students choose 4 of 6 required courses.

Course	Title/Desc	Credit
AEEM6098	Unmanned Aircraft Systems (C min)	3
EECE6015C	Instrumentation & Industrial Control (C min)	4
EECE7019	Bio-inspired Robotics (C min)	3
MECH6031	Introduction to Robotics (C min)	3
MECH6032	Robot Control and Design (C min)	3
MECH7015C	Humans, Machines, Robots and their Interactions (C min)	3

Robotics & Automation Elective Courses

Students choose at least 2 electives.

Course	Title/Desc	Credit
AEEM6003	Analytical Dynamics (C min)	3
AEEM6015	Modern Control (C min)	3
AEEM6096	Fuzzy Control Systems (C min)	3
AEEM6098	Unmanned Aircraft Systems (C min)	3
AEEM6099	Systems Engineering Analysis (C min)	3
AEEM7063	Graduate Special Topics (C min)	3
EECE6011	RF and Microwave Wireless Communications (C min)	3
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6019	Probability and Random Processes (C min)	3
EECE6025	Power Electronics (C min)	3

Embedded Systems Track

Students who choose the Embedded Systems track complete 18 credits from the approved required and elective courses.

Embedded Systems Required Courses

Students take at least 4 of 5 required courses.

Course	Title/Desc	Credit
CS7092	Sensor-based Embedded Systems Design (C min)	3
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6029	Distributed Operating Systems and Algorithms (C min)	3
EECE6038C	Advanced Microsystem Design (C min)	4
EECE7095	Introduction to Computer Architecture (C min)	3

Embedded Systems Elective Courses

Students take at least 2 elective courses.

Course	Title/Desc	Credit
CS6027	Requirements Engineering (C min)	3
CS6097	Introduction to Wireless and Mobile Networking (C min)	3
EECE6007	Biomedical Microsystems (C min)	3
EECE6015C	Instrumentation & Industrial Control (C min)	4
EECE6023C	Security & Trust for Cyberphysical Systems (C min)	4
EECE6028C	Intelligent Machine Design (C min)	4
EECE6032	Software Testing and Quality Assurance (C min)	3
EECE6034C	Hardware Design with FPGAs: Secure and Trustworthy Systems (C min)	4

Semiconductor and Sensors Track

Students who select the Semiconductor and Sensors track will complete 4 courses from the approved list.

Semiconductor and Sensors Required Courses

Students in this track take 4 required courses from approved list.

Course	Title/Desc	Credit
EECE6007	Biomedical Microsystems (C min)	3
EECE6008	Fundamentals of MEMS (C min)	3
EECE6018	Microfabrication of Semiconductor Devices (C min)	3
EECE6041C	Microfabrication Lab for Semiconductor Devices andMEMS (C min)	3
EECE6088	Nanoelectronic Devices for VLSI Technologies (C min)	3
EECE6050	Compound and Organic Semiconductor Physics (C min)	3

Semiconductor and Sensors Elective Courses

Students in this track choose at least two electives from the following list.

Course	Title/Desc	Credit
EECE6011	RF and Microwave Wireless Communications (C min)	3
EECE6045	Introduction to Quantum Computing (C min)	3
EECE6048C	Optics for Engineers (C min)	3
EECE6078C	Biomicrofluidic Systems (C min)	4
EECE7011	Electromagnetic Systems (C min)	3
EECE7023	Thermoelectric Energy Conversion: Devices and Charge Transport (C min)	3

Course	Title/Desc	Credit
EECE6036	Intelligent Systems (C min)	3
EECE6038C	Advanced Microsystem Design (C min)	4
EECE6042	Digital Image Processing (C min)	3
EECE7017C	Trustworthy Embedded Systems (C min)	4
EECE7047	Dynamic Optimization (C min)	3
MECH6035	Intelligent Systems Theory (C min)	3
MECH6036	Robot Vision (C min)	3

Course	Title/Desc	Credit
EECE6080C	Introduction to VLSI Design (C min)	4
EECE7075	Principles of Modern Networking (C min)	3
EECE7017C	Trustworthy Embedded Systems (C min)	4
EECE7019	Bio-inspired Robotics (C min)	3
MECH6031	Introduction to Robotics (C min)	3
MECH7015C	Humans, Machines, Robots and their Interactions (C min)	3

Course	Title/Desc	Credit
EECE7026	BioChips and Lab-on-Chips (C min)	3
EECE7031	Advanced MEMS Technologies (C min)	3
EECE7032	BioSensors and Bioelectronics (C min)	3
EECE7036	Neuromorphic Computers for AI (C min)	3
EECE8022	Introduction to Quaternions (C min)	3
EECE8025	Electrical Engineering of the Human Body (C min)	3

Systems Engineering

Students who choose the Systems Engineering track must complete 18 credits from the list of approved required and elective courses.

Systems Engineering Required Courses

Students in the Systems Engineering track will take 4 of 7 required courses.

Course	Title/Desc	Credit
AEEM6099	Systems Engineering Analysis (C min)	3
EECE6019	Probability and Random Processes (C min)	3
EECE6024	Introduction to Digital Signal Processing (C min)	3
EECE6036	Intelligent Systems (C min)	3
EECE6042	Digital Image Processing (C min)	3
EECE7033	Linear Systems Theory (C min)	3
EECE6016C	Electric Machines and Drives (C min)	4

Systems Engineering Electives

Students in the Systems Engineering track take at least 2 approved electives.

Course	Title/Desc	Credit
AEEM6003	Analytical Dynamics (C min)	3
AEEM6015	Modern Control (C min)	3
AEEM6098	Unmanned Aircraft Systems (C min)	3
EECE6011	RF and Microwave Wireless Communications (C min)	3
EECE6015C	Instrumentation & Industrial Control (C min)	4
EECE6017C	Advanced Embedded Systems (C min)	4
EECE6025	Power Electronics (C min)	3
EECE6026	Introduction to Communication Systems (C min)	3
EECE6027	Digital Communication Systems (C min)	3
EECE6033	GPS System & Receiver Principles (C min)	3
EECE7065	Complex Systems and Networks (C min)	3
EECE7075	Principles of Modern Networking (C min)	3
EECE7033	Linear Systems Theory (C min)	3
EECE6028C	Intelligent Machine Design (C min)	4
EECE6009C	Advanced RF and Microwave Electronics (C min)	4
EECE7047	Dynamic Optimization (C min)	3
EECE6035	Information Theory (C min)	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Engineering

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

The Master of Engineering (MEng) program in Environmental Engineering provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need. While students have up to two years to complete the degree, all requirements can be completed in one year.

Industrial and Systems Engineering

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

The Master of Engineering (MEng) track in Industrial and Systems Engineering (ISE) provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. .

The UC ISE program aligns well with the new landscape in industries that saw explosive growth in data science, and integrates data science for the core mission of efficiency improvement and system optimization applicable for almost all industries. Three areas of concentration are offered, namely, data science, health and service systems, and Industry 4.0/5.0. The program will provide graduate level education that enables graduates to contribute to the field of industrial and systems engineering within a variety of industries and business organizations.

Career

Graduates work in roles including industrial engineer, system engineer, performance improvement engineer, data scientist, business analyst, consultant, process engineer, project manager, and operations research scientist. According to the BLS, jobs in these areas are expected to grow over the next 10 years with opportunities across the US. Employment is available in services, manufacturing, government agencies, and a variety of other sectors.

Curriculum

The program will include required courses and several areas of concentration that allow perspective students to focus on issues of particular interest to their academic and career goals. The proposed areas of concentration are:
1. Data science
2. Health and service systems
3. Industry 4.0/5.0

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
ISE

Advising

Students are encouraged to meet with the graduate program director to discuss curricular and career options.

UC Advantages And Special Opportunities

Rather than a set "one size fits all" curriculum, students have a choice of several areas of emphasis.

The international track allows students to spend one semester abroad at a partner university and one semester at UC to earn the degree.

For those students seeking to complete the capstone requirement through an internship, the CEAS graduate office has a dedicated individual to help prepare students (particularly international students) for the US job market. This individual also helps to identify appropriate internship opportunities.

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA minimum 3.0 or equivalent
- Statement of Purpose
- Curriculum Vitae
- Two letters of recommendation (three are preferred)
- International students - English Proficiency Test: TOEFL (minimum 96 IBT) or IELTS (minimum 7)

International Student Requirements

English language proficiency

Graduation Requirements

Completion of 30 credits of approved coursework

Capstone experience completed as either a project, paper or internship.

Application Deadlines

Application deadlines and additional application information can be found at the CEAS Office of Graduate Studies. Generally, Fall Semester admission applications received by December 31 of the preceding year are automatically considered for additional support and assistantships.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

ENGR6030	Engineering Economic Analysis	3
ENGR6032	Industry 4.0 Domains of Knowledge (C min)	3
ENTR7082	Special Topics in Entrepreneurship	1 - 6
MECH6050	Occupational Safety Engineering	3
MECH6074	Quality Control	3

MEng Core Courses-Interpersonal Skills

Students select one course from the list of approved interpersonal skills courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6002	Management of Professionals	3
ENGR6012	Innovation and Design Thinking	3
ENGR6010	Effectiveness in Technical Organizations	3
ENGR6016	Applied Leadership of Project Teams	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3
ENGR6050	Fundamentals of Leadership	3
OLHR6050	Teams	3
OLHR8029	Individual Behavior in the Workplace	3

Areas of Emphasis and Electives

Students select one area of emphasis and complete at least 2 courses from that option. Students complete a minimum of 12 credits from the courses listed under the three areas of emphasis

Data Science Area of Emphasis

Select at least 2 courses from the following (6 credit hours)

Course	Title/Desc	Credit
CS6033	Artificial Intelligence	3
CS6037	Machine Learning	3
CS6065	Introduction to Cloud Computing	3
CS6073	Deep Learning	3
ENVE6068C	Bioprocess Engineering and Renewable Energy	3
CS6054	Information Retrieval	3

Healthcare Systems Area of Emphasis

Select at least 2 courses from the following (5-6 credit hours)

Course	Title/Desc	Credit
BMIN7053	Intro to Medical Informatics	3
CS7099	Introduction to Bioinformatics	3 - 5
HCA7001	Health Systems Management 1: Organization & Delivery	3
HCA7033	Global Health Systems	3
MECH6050	Occupational Safety Engineering	3
MECH7075	Principles of Ergonomics	2

Industry 5.0 Area of Emphasis

Select at least 2 courses from the following (6-7 credit hours)

Course	Title/Desc	Credit
CS6101	Introduction to Applied Artificial Intelligence and Machine Learning Tools	3
EECE6051	Introduction to Sensors	3
ENGR6032	Industry 4.0 Domains of Knowledge	3
MECH6024	Computational Methods In Additive Manufacturing I	3
MECH6031	Introduction to Robotics	3
MECH6035	Intelligent Systems Theory	3

MEng Capstone

Students complete a capstone experience and enroll in an appropriate capstone course.

Capstone

Select 3-6 credit hours

Course	Title/Desc	Credit
MECH9011	Master of Engineering Capstone Project	3 - 6

Course	Title/Desc	Credit

Course	Title/Desc	Credit
MECH7011	Math Methods for Decision Making in Engineering Systems	3

Required courses

Students are required to take these two courses

Required courses

Students complete all courses

Course	Title/Desc	Credit
MECH6078	Introduction to Industrial Artificial Intelligence (C min)	3
ISE6XXX+	Graduate ISE Courses (C min)	6 - 9

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Materials Science & Engineering

Duration: 1.5 Years Total Credits: 30 Award: MENG

Overview

The Materials Science and Engineering department offers Doctor of Philosophy (PhD), Master of Science (M.S.), and Master of Engineering (MEng) degrees in Materials Science and Engineering (MSE). The program comprises primarily the sub-fields of metals, polymers, and ceramics, together with composites, electronic, photonic, bio and functional materials. The research focus areas of the MSE program are diverse including additive manufacturing; high temperature and lightweight alloys; shape memory alloys; functional thin films, magnetic materials, polymer structures and interfacial properties, scattering theory and experiments; conducting polymers and composites; biomaterials; nano materials and nano photonics, carbon nanotubes and graphene, smart materials; soft matter; energy materials, and nano biomedicine.

The research on metallurgical and ceramic science and engineering deals with a wide range of fundamental materials issues relating to phase transformations, microstructure evolution and mechanical properties, including fatigue, creep, fracture, and wear and how they are impacted by processing. Some examples of research areas include gas-phase alloying and sintering kinetics of 3D printed metallic materials; in-situ monitoring of sensitization and environmental cracking mechanisms of aluminum alloys; advanced mechanical surface treatment effects on mechanical properties, corrosion and stress corrosion cracking of lightweight, high temperature and nuclear alloys; design of alloys for extreme environments; and thermodynamic and computational modeling. Processing of metals and ceramics is another important emphasis of materials research such as powder metallurgy, ceramic sintering, thin film deposition, solidification and additive manufacturing processes like laser powder bed fusion.

Polymer materials research is principally in the areas of synthesis, processing, structure and property characterization. Advanced functional polymeric materials with structural hierarchy are investigated and developed for fundamental studies and application in extreme conditions: high pressure, temperature, corrosion, and dynamic stresses. The hierarchically-organized materials typically display elemental entities of different structural dimensions, characteristic length scales, and unique properties, and consist of nanoparticle interfaces with metals/ceramics, soft matter, and biological cells. Novel processing of nanomaterials is also used to create new composite materials with improved properties.

Career

Curriculum

The Master of Engineering (MEng) degree in the Materials Science and Engineering program is a one-year coursework program. The MEng degree provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. Students generally prepare a paper and may be coauthors on publications.

Curriculum Guide Versions:
Materials Science Engineering-MENG 2019

UC Advantages And Special Opportunities

The MSE program, in combination with the Advanced Materials Characterization Center and other Centers and laboratories has excellent facilities for materials processing, testing and characterization. Through their research projects and these facilities, students will have opportunities to learn the use of modern instrumental techniques including advanced processing, mechanical testing systems, scanning and transmission electron microscopy, compositional analysis, small-angle and wide-angle X-ray diffraction, Raman scattering, infrared and X-ray photoelectron infrared spectroscopy.

Accreditation

Mechanical Engineering

Online

Duration: 2 Years Total Credits: 30 Award: MENG

Overview

The Master of Engineering (MEng) in Mechanical Engineering program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater inter-disciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need.

Robotics and Intelligent Autonomous Systems

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

Robotics and Autonomy/Automation is an emerging field involving multiple engineering disciplines. Advanced intelligent hardware devices and software currently make it possible to design elegant and sophisticated autonomous robotic devices whose capabilities far surpass older purely electro-mechanical automation systems. These systems will often be connected to the internet or allow some type of remote monitoring, and thus they will be vulnerable to various types of cyber-attacks. These systems must be made reliable, safe, and secure.

In order to advance the state of the art for such systems, this program provides students specialized training in a number of disciplines, including computer science, electrical engineering, mechanical engineering, systems engineering, and project management. Students are exposed to the broad set of topics they need to envision new systems, while allowing them to develop the multidisciplinary set of skills they need to build these reliable, safe, secure, and trusted systems of the future.

The Master of Engineering (MEng) program provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. The difference between the traditional Master of Science degree and the MEng degree is not on the rigor of the coursework or a lack of competencies, but rather on the focus of the curriculum.

The program provides advanced training to students interested in expanding their knowledge and expertise. Depending on a student's interest, the degree could add significant depth to an individual's understanding of the practice of engineering or the program could be constructed to focus on greater interdisciplinary breadth if that is the educational objective of the student. In today's competitive technology environment, industries need to have highly skilled practicing engineers who are flexible in their professional capabilities. The MEng program is a practice oriented, focused degree and caters to this need.

OLHR6050	Teams	3
OLHR8029	Individual Behavior in the Workplace	3
OLHR8090	Strategic Leadership for HR	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3

Course	Title/Desc	Credit
MECH7015C	Humans, Machines, Robots and their Interactions	3
EECE6021	Haptics and Collaborative Robotics	3
EECE6028C	Intelligent Machine Design	4
EECE6046	Principles and Practice of Evolutionary Computing	3
MECH6078	Introduction to Industrial Artificial Intelligence	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Software Engineering

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

The Master of Engineering in Software Engineering will provide graduate students with a deeper understanding of software engineering and a familiarity with major software engineering areas such as requirements engineering, software testing, large-scale software development, and embedded and cyber-physical systems engineering.

Career

Software engineering has a wide variety of applications in many rapidly growing scientific and engineering fields encompassing engineering, mathematics, sciences, social sciences, and bioinformatics.

Software Engineering

MENG

20MAS-SWRE-MENG Effective Fall 2022

Duration: 1 Year

★Minimum Credits: 30 Credits

MEng Core Courses

Students are required to take at least one course from the approved list of Interpersonal Skills courses and at least one course from the approved list of Project / Task Management courses.

Core Courses-Project/Task Management

Students in Software Engineering must take EECE 6032 Software Testing and Quality Assurance as their project/task management course.

Course	Title/Desc	Credit
EECE6032	Software Testing and Quality Assurance (C min)	3

Core courses - Interpersonal Skills

Select one course from the list of courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6002	Management of Professionals (C min)	3
ENGR6003	Organizational Behavior for Technical Professionals (C min)	3
ENGR6010	Effectiveness in Technical Organizations (C min)	3
ENGR6012	Innovation and Design Thinking (C min)	3
ENGR6016	Applied Leadership of Project Teams (C min)	3
ENGR6050	Fundamentals of Leadership (C min)	3
OLHR6050	Teams (C min)	3
OLHR8029	Individual Behavior in the Workplace (C min)	3
OLHR8090	Strategic Leadership for HR (C min)	3

Required Software Courses

Students must complete the following 3 courses.

Required Software Courses

Course	Title/Desc	Credit
CS6027	Requirements Engineering (C min)	3
CS6028	Large Scale Software Engineering (C min)	3
CS6030	Advanced Software Engineering (C min)	3

Software Elective Courses

Choose 3 of the elective courses below.

Software Elective Courses

Course	Title/Desc	Credit
CS6051	Database Theory (C min)	3
CS6065	Introduction to Cloud Computing (C min)	3
CS7081	Advanced Algorithms I (C min)	3
EECE6036	Intelligent Systems (C min)	3
CS6026	Formal Methods (C min)	3
CS6052	Intelligent Data Analysis (C min)	3
CS6054	Information Retrieval (C min)	3
CS6068	Parallel Computing (C min)	3
CS6073	Deep Learning (C min)	3
CS6074	Software Architecture (C min)	3

MEng Capstone

Complete at least one MEng Capstone course and/or MEng Seminar; 6 total credits can count toward degree.

MEng Capstone

Course	Title/Desc	Credit
EECE9060	Master of Engineering Capstone Project	1 - 3

Course	Title/Desc	Credit
ENGR7001	Master of Engineering Seminar (C min)	1 - 3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Sustainable Energy

Duration: 1 Year Total Credits: 30 Award: MENG

Overview

The Master of Engineering (MEng) track in Sustainable Energy provides a graduate degree that focuses on the practice of engineering in order to better serve working professionals. Rather than culminate in a research experience and a thesis, the Master of Engineering curriculum provides skills and expertise that enhance the individual's ability to contribute to the technical workforce. .

Energy issues impact all people and energy is directly correlated to the economic well-being of nations. The sources of energy we use and how and where we use them likewise impact our environment and people's health. Energy issues require an interdisciplinary approach and the expertise of a diverse set of individuals to address the interconnectedness of energy, environment and society. The program will provide graduate level education that enables graduates to contribute to the field of sustainable energy within a variety of industries and business organizations.

Career

Graduates work in roles including energy analyst, project manager, sustainability manager, and energy engineer. According to the BLS, jobs in these areas are expected to grow over the next 10 years with opportunities across the US. Employment is available in scientific and technical services, manufacturing, and a variety of other sectors.

Curriculum

The program will include required courses and several tracks that allow perspective students to focus on issues of particular interest to their academic and career goals. The proposed tracks are:
1. Energy sources – focus on sustainable sources of energy and the availability of energy supply
2. Energy infrastructure – focus on distribution, transmission, storage and end use of energy
3. The built environment – focus on how energy is used and managed in buildings
4. International energy issues – focus on the global nature of energy and identifying approaches that impact multiple countries

Curriculum Guide Versions:
Sustainable Energy

Advising

Students are encouraged to meet with the graduate program director to discuss curricular and career options

UC Advantages And Special Opportunities

Rather than a set "one size fits all" curriculum, students have a choice of several areas of emphasis.

The international track allows students to spend one semester abroad at a partner university and one semester at UC to earn the degree.

UC has its own power generation station and professionals from that facility contribute to the pragmatic knowledge around implementation of energy solustions.

For those students seeking to complete the capstone requirement through an internship, the CEAS graduate office has a dedicated individual to help prepare students (particularly international students) for the US job market. This individual also helps to identify appropriate internship opportunities.

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA minimum 3.0 or equivalent
- Statement of Purpose
- At least one letter of recommendation (three are preferred)
- International students - English Proficiency Test: TOEFL (minimum 96 IBT) or IELTS (minimum 7)

International Student Requirements

English language proficiency

Graduation Requirements

Completion of 30 credits of approved corusework

Capstone experience completed as either a project, paper or internship.

Application Deadlines

Application deadlines and additional application information can be found at the CEAS Office of Graduate Studies. Generally, Fall Semester admission applications received by December 31 of the preceding year are automatically considered for additional support and assistanships.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Sustainable Energy

MENG

Sustainable Energy

Duration: 1 Year

★Minimum Credits: 30 Credits

MEng Core Courses

Students select two MEng core courses--one in project/task management and one in interpersonal skills.

MEng Core Courses-Project Task Management

Students select one project/task management course from approved list; other courses may be allowed with permission.

Course	Title/Desc	Credit
AEEM6067	Entrepreneurship and Technology Law	3
AEEM6099	Systems Engineering Analysis	3
CVE6079	Engineering Data Management and Analysis	3
ENGR6031	Engineered Supply Chain Cost Modeling for Sustainability and Innovation (C min)	3
ENGR6014	Engineering Project Management	3
ENGR6025	Lean Six Sigma	3
ENGR6030	Engineering Economic Analysis	3
ENGR6032	Industry 4.0 Domains of Knowledge (C min)	3
ENTR7082	Special Topics in Entrepreneurship	1 - 6
MECH6050	Occupational Safety Engineering	3
MECH6074	Quality Control	3

MEng Core Courses-Interpersonal Skills

Students select one course from the list of approved interpersonal skills courses; other courses may be allowed with permission.

Course	Title/Desc	Credit
ENGR6002	Management of Professionals	3
ENGR6012	Innovation and Design Thinking	3
ENGR6010	Effectiveness in Technical Organizations	3
ENGR6016	Applied Leadership of Project Teams	3
ENGR6045	Interdisciplinary Innovation for Engineers (C min)	3
ENGR6050	Fundamentals of Leadership	3
MGMT7014	Leadership and Organizations	2
OLHR6050	Teams	3

Sustainable Energy Options

Students select one option as area of professional interest and complete courses from that option

Energy Sources Option

Select at least 2 courses from the following (6-7 credit hours)

Course	Title/Desc	Credit
CHE6057	Fuel Cells (I)	3
CHE6068C	Bioprocess Engineering and Renewable Energy	3
EECE6037C	Solar PV System Fundamentals	4
EECE6067C	Renewable Energy	3
MECH6094	Fundamentals and Applications of Solar Energy	3

Energy Infrastructure Option

Select at least 2 courses from the following (6-7 credit hours)

Course	Title/Desc	Credit
CHE6056	Electrochemical Engineering and Electrocatalysis	3
EECE6016C	Electric Machines and Drives	4
EECE6025	Power Electronics	3
MECH6095	Thermal Energy Storage	3
MECH7023	Thermoelectric Energy Conversion: Devices and Charge Transport	3
MTEN6012C	Nanostructured Materials Engineering	3

Built Environment option

Select at least 2 courses from the following (5-6 credit hours)

Course	Title/Desc	Credit
AE6010	Advanced Building Mechanical Systems	3
AE6020	Advanced lighting and daylighting	3
AE6030	Building Energy Modeling	3
AE6047	Building Energy Audits and Data Analytics	3
AEC6021	Integrated Building Envelope Analysis	2
CVE6042	Sustainable Construction and LEED	3

MEng Capstone

Students complete a capstone experience and enroll in an appropriate capstone course.

Capstone

Select 3-6 credit hours in one of these three courses:

Course	Title/Desc	Credit
AEEM8060	Master of Engineering Capstone Project	1 - 6
CHE8060	Master of Engineering Capstone Project	1 - 6
CVE7094	MEng Capstone Project	1 - 6
EECE9060	Master of Engineering Capstone Project	3 - 4
MECH9011	Master of Engineering Capstone Project	3 - 6

Course	Title/Desc	Credit
OLHR8029	Individual Behavior in the Workplace	3

International option

Students complete 1 semester abroad and 1 semester at UC

Course	Title/Desc	Credit
Other Experience	Students spend one academic semester at an approved international partner university earning 15 academic credits	15

Elective courses

Students select elective courses from the courses listed under any of the sustainable energy options or from the list below

elective courses

complete sufficient courses to earn a minimum of 30 credits for the program

Course	Title/Desc	Credit
AEEM7027	Nondestructive Testing	3
ENVE6044	Environmentally Conscious Engineering	3
ENVE6046	Microbiological Principles of Engineered Systems	4
ENVE6048	Quantitative Sustainability	3
MECH6003	Introduction to Nuclear Engineering and Health Physics	3
MECH6097	HVAC Design I	3
MECH6098	HVAC Design II	3

Sustainable Energy required courses

Students are required to take these two courses

Required courses

Students complete both courses

Course	Title/Desc	Credit
ENGR6015	Energy, Environment and Society (C min)	3
MECH6090	Renewable Energy Systems (C min)	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Aerospace Engineering & Engineering Mechanics

Duration: 2 Years Total Credits: 30 Award: MS

Overview

The School of Aerospace Systems at the University of Cincinnati (UC) offers a Master of Science in Aerospace Engineering and in Engineering Mechanics. Graduate students pursue research in the areas of Dynamics and Control, Fluid Mechanics, Propulsion Systems, and Solids and Structures. These are the four key areas that present challenges and opportunities to shape the future of aerospace engineering and to bring societal benefit at large.

Often referred to as the Birthplace of Aviation, the Southwest Ohio area has long played an important role in aerospace history and technology. The UC School of Aerospace Systems, which features the second-oldest Aerospace Engineering program in the country, has been at the forefront of aerospace technology since the early days of air and space travel. The School of Aerospace Systems graduate programs have played pivotal roles in building this success by bringing together outstanding faculty, and the most talented students from around the world.

Now, more than ever, the School strives to deliver scientific discovery and technological innovation that will drive the future of aerospace engineering and more broadly will impact the related fields of energy, security, and health. This vision is supported by the substantial investments that the School has been able to attract based on its long-standing record of excellence. The School of Aerospace Systems is the first program at any university in Ohio to host two Ohio Eminent Scholars, one in the area of Experimental Fluid Mechanics and the other in the area of Finite Element Structural Analysis. Recently, a $27 million contribution in endowment funds from the Ohio Department of Development has allowed the School to start the Center for Intelligent Propulsion and Life Management Systems, providing another example of the financial resources available to the School today.

The School of Aerospace Systems provides one of the best university-based research environments in the world with state-of-the-art laboratories and a diverse faculty base that has recently been expanded to bring top expertise in critical new research areas from leading institutions worldwide.

Aerospace Engineering & Engineering Mechanics

MS

Aerospace Engineering and Engineering Mechanics-GE-ACE program

Duration: 2 Years

★Minimum Credits: 30 Credits

UC CEAS Coursework

Students in GE-ACE program enroll in 18 credits of coursework within CEAS.

AEEM coursework

Students must complete at least 9 credits from AEEM graduate courses.

Course	Title/Desc	Credit
AEEM6XXX+	AEEM Coursework (C min)	9 - 10

Other CEAS Coursework

The remaining 9 credits can be from the following disciplines: AEEM, MECH, CS, EECE

Course	Title/Desc	Credit
AEEM6XXX+ CS6XXX+ EECE6XXX+ MECH6XXX+	Other CEAS Coursework (C min)	9 - 10

Transfer Credits from Workplace

GE-ACE students can transfer up to 10 credits from courses taken at their workplace.

Course	Title/Desc	Credit
EGFD	Transfer credits	10

Final MS Project

Students complete a final MS project and register for two credits of AEEM 9071.

Course	Title/Desc	Credit
AEEM9071	Final M.S. Project	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Aerospace Engineering & Engineering Mechanics

MS

20MAS-AEEM-MS

Duration: 2 Years
Minimum Credits: 32 Credits

Aerospace Engineering - Major Options

Students select one major area and complete the requirements for that area: 1) Dynamics and Controls, 2) Fluid Dynamics and Propulsion Systems, or 3) Solid and Structural Mechanics

Aerospace Engineering and Engineering Mechanics Requirements

Coursework requirements of all students in both Aerospace Engineering and Engineering Mechanics gradaute programs

Math

Graduate course in mathematics. Students in Aerospace Engineering take 1 graduate level math class; students in Engineering Mechanics program take 2 courses

Course	Title/Desc	Credit
6XXX+	Math Graduate coursework in mathematics. Some engineering courses are suitable to meet the math requirement; see Graduate Program Director.	3 - 6

Seminar

Graduate seminar - 2 credits of seminar are required. Students take 1 credit of seminar each of the first two semesters registered as a full-time student.

Course	Title/Desc	Credit
AEEM9072	Graduate Seminar	1

Thesis Research

Students complete a minimum of 12 credits of thesis research

Course	Title/Desc	Credit
AEEM9070	Graduate Research	1 - 15

Engineering Mechanics

Students complete a minimum of 15 credits of graduate course work. One course must be from the Dynamics and Controls area, one course must be from the Fluid Dynamics and Propulsion area and one course must be from the Solids and Structural Mechanics area. The remaining courses can come from any of the aerospace major areas or from appropriate engineering courses.

Engineering Mechanics Technical Courses

Course	Title/Desc	Credit
AEEM CS ECES EECE EGFD MECH METL MTSC	Engineering Mechanics Technical Courses	15 - 18

Dynamics and Control

Students complete 9 credits.

Dynamics and Control

Complete all

Course	Title/Desc	Credit
AEEM6003	Analytical Dynamics (C min)	3
AEEM6015	Modern Control (C min)	3

Complete at least one non-research graduate course from the following. Other courses may be approved by the Graduate Program Director. Additional courses in this area may count toward technical electives.

Course	Title/Desc	Credit
AEEM6022	Optimal Control	3
AEEM6036	Spacecraft Dynamics	3
AEEM6093	Advanced Flight Mechanics	3
AEEM6095	Astrodynamics	3

Fluid Dynamics and Propulsion Systems

Students complete 9 credits.

Fluid Dynamics and Propulsion Systems

Complete all

Course	Title/Desc	Credit
AEEM6011	Combustion (C min)	3
AEEM6041	Compressible Flow and Thermodynamics (C min)	3

Students complete at least one non-research graduate course from the following. Other courses may be taken with the approval of the Graduate Program Director. Additional courses in this area may count toward technical electives.

Course	Title/Desc	Credit
EGFD7041	Viscous Flow and Heat Transfer	3
AEEM6012	Gas Turbine Combustion	3
AEEM7050	Turbomachinery Flows	3
AEEM8030	Advanced Propulsion	3

Solids and Structural Mechanics

Students complete 9 credits.

Solids and Structural Mechanics

Complete all

Course	Title/Desc	Credit
AEEM6001	Advanced Strength of Materials (C min)	3
AEEM7052	Finite Element Method (C min)	3

Students complete at least one non-research graduate course from the following. Other courses may be taken with the approval of the Graduate Program Director. Additional courses in this area may count toward technical electives.

Course	Title/Desc	Credit
AEEM7001	Elasticity I	3
AEEM7074	Advanced Finite Element Method	3
AEEM7027	Nondestructive Testing	3

Technical Electives

Technical Electives

Students complete course credit hour requirements by completing additional courses from the major areas or from other graduate courses.

Course	Title/Desc	Credit
AEEM6XXX CS6XXX EECE6XXX EGFD6XXX MECH6XXX	Technical Electives Graduate courses that support the students program of study and major area	6

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Engineering

Duration: **2 Years** Total Credits: **30** Award: **MS**

Overview

The graduate degree in biomedical engineering combines faculty, resources and expertise from its prestigious Colleges of Engineering and Medicine. One of the few such interdisciplinary advanced degree programs in the country, the BME graduate program offers four different areas of specialization - Medical Device Design, Medical Imaging and Regenerative Medicine. The degree provides students with the knowledge and tools to develop revolutionary healthcare devices, procedures, and treatment strategies for the 21st century. The field of biomedical engineering is expected to lead engineering employment growth in the next decade.

The field of biomedical engineering is expected to lead engineering employment growth in the next decade. The rate of increase of 26% is projected to be the largest of all engineering professions. A degree in biomedical engineering can lead to a career in academia, industry, or government.

Biomedical Engineering

MS

20MAS-BME-MS

Duration: 2 Years

Minimum Credits: 30 Credits

General BME course requirements (Not focus area)

Students take 2 courses from Core BME courses.

Students also select three or more credits from General Medical Science Courses, three or more credits from Mathematics Courses, and three or more credits from Approved Technical Electives

Core BME Courses

Courses required of all BME MS Students. 6 credits required from the courses listed below

Course	Title/Desc	Credit
BME7001	BME Survey (C min)	3
BME7002C	Bioinstrumentation (C min)	3
BME7005	Biomedical Research Design (C min)	3

General Medical Sciences courses

Take 3 or more credits from courses in the list below

Course	Title/Desc	Credit
BE7067	Scientific Integrity & Research Ethics	1 - 2
CB8080	Cancer Biology and Therapeutics	4
GNTD7001	Principles of Molecular and Cellular Biology	1 - 4
GNTD7002	Biochemistry and Cellular Metabolism	3
GNTD7003	Ethics in Research	1
MCP7000	Human Physiology	4
MG7002	Biochemistry and Cellular Metabolism	3
MG7021	Fundamentals of Molecular Genetics	3
MG7024	Mechanisms of Signal Transduction	2
MG7027	Principles of Biochemistry I	3
MG7028	Principles of Biochemistry II	3
MP9050	Diagnostic Radiological Imaging Physics	3
NS7078	Fundamentals of Neuroscience I	4
NS7079C	Fundamentals of Neuroscience II	5
NURS8022	Advanced Physiology and Pathophysiology	3 - 4

Mathematics courses

Take 3 or more credits from the courses listed

Course	Title/Desc	Credit

Focus Areas

Complete 6 credits from courses in focus area and 15 credits from General BME course requirements

Medical Device Innovation and Entrepreneurship Focus Area courses

Complete 6 or more credits from the courses listed

Course	Title/Desc	Credit
BME6012	Biomedical Signal and Image Processing (C min)	3
BME6030	Functional Tissue Engineering (C min)	3
BME7020C	Advanced Medical Device Design - I (C min)	3
BME7021	Tissue Biomechanics (C min)	3
EECE6007	Biomedical Microsystems (C min)	3
EECE6008	Fundamentals of MEMS (C min)	3
EECE6078C	Biomicrofluidic Systems (C min)	4
EECE7032	BioSensors and Bioelectronics (C min)	3
EECE8025	Electrical Engineering of the Human Body (C min)	3
EECE8115C	Humans, Machines, Robots and their Interactions (C min)	3
ENTR7005	Entrepreneurship: New Venture Creation (C min)	3
MGMT7014	Leadership and Organizations (C min)	2
MGMT7035	Management of Innovation (C min)	2

Medical Imaging focus area courses

Complete 6 or more credits from the courses listed

Course	Title/Desc	Credit
BME6010	Biomedical Ultrasound (C min)	3
BME6011	Magnetic Resonance Imaging and Spectroscopy (C min)	3
BME6012	Biomedical Signal and Image Processing (C min)	3
BME7012	Advanced Topics in MRI (C min)	3
BME8010	Independent Study in Medical Imaging (C min)	1 - 6

Thesis

Thesis Research

Complete a minimum of 9 thesis credits

Course	Title/Desc	Credit
BME7099	Master's Thesis Research	1 - 15

Course	Title/Desc	Credit
AEEM7052	Finite Element Method	3
BE7022	Introduction to Biostatistics	3
BME7061	Biostatistics in Research	3
BME8064	Advanced Statistical Methods in Biomedical research	3
CS6037	Machine Learning	3
CS7051	Advanced Topics in Mining Spatial and Temporal Data	3
CS7053	Intro to Medical Informatics	3
CS7099	Introduction to Bioinformatics	3 - 5
EGFD6037C	Computational Fluid Dynamics	3
MATH6006	Numerical Analysis	3
MATH6007	Partial Differential Equations and Fourier Analysis	3
MATH6008	Applied Probability and Stochastic Processes	3
MATH6015	Mathematical Programming	3
MATH6051	Applied Ordinary Differential Equations	3
MATH8010	Advanced Numerical Analysis	3
MATH8012	Applied Mathematics Methods	3
PHYS7001	Mathematical Physics	4

Technical Electives

Take 3 or more credits from the courses listed

Chemical Engineering

Duration: **2 Years** Total Credits: **30** Award: **MS**

Overview

The Chemical Engineering program offers an average of 35 graduate courses a year in the four research areas of Biomolecular Engineering, Nanotechnology, Energy and Environment, and Separations. The courses include, but are not limited to Air Pollution Engineering, Biotransformations and Biocatalysis, Bioengineering, Chemical Engineering Design and Green Engineering, Computational Chemistry and Molecular Modeling, Fuel Cells, Membrane Processes, Molecular Engineering and Functional Nanomaterials, Polymer Systems, Process Dynamics, Control and Optimization, Reaction Engineering and Catalysis for Energy and Fuels, Separation Processes, Tissue Engineering, and Transport Phenomena.

Chemical Engineering

MS

Chemical Engineering MS-2019

Duration: 2 Years
★Minimum Credits: 30 Credits

Required courses

Required Coursework
Complete the following required Chemical Eng graduate courses

Course	Title/Desc	Credit
CHE6040	Advanced Chemical Engineering Thermodynamics (C min)	3
CHE6043	Advanced Transport Phenomena I (C min)	3
CHE6044	Advanced Transport Phenomena II (C min)	3
CHE7077	Chemical Reaction Engineering (C min)	3

Electives and Seminar
Students take a minimum of 6 credit hours CHE electives and Graduate Seminar. Students take seminar each semester of full-time residence

Course	Title/Desc	Credit
CHE8070	Graduate Seminar	1
CHE6XXX+	Electives Any graduate level chemical engineering course and other technical electives (as approved by adviser) (C min)	3 - 12

Thesis requirement

MS Thesis
Students take a minimum of 6 MS thesis credit hours

Course	Title/Desc	Credit
CHE8071	Thesis (C min)	6 - 12

Students complete Research, Special Projects, Readings
Students complete 6-12 credits of research related topics that are not thesis hours. Non-CHE electives may also be used with permission.

Course	Title/Desc	Credit
CHE8000	MS research in chemical engineering	1 - 12
CHE9072	Special Projects in Chemical Engineering	1 - 6
CHE9073	Readings	1 - 12

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemical Engineering

MS

Master of Science Chemical Engineering

Duration: 2 Years
★Minimum Credits: 30 Credits

Required Coursework
Required Chemical Eng graduate courses

Course	Title/Desc	Credit
CHE6040	Advanced Chemical Engineering Thermodynamics (C min)	3
CHE7077	Chemical Reaction Engineering (C min)	3
CHE6043	Advanced Transport Phenomena I (C min)	3
CHE6044	Advanced Transport Phenomena II (C min)	3

Electives and Seminar
Credit hour requirment

Course	Title/Desc	Credit
CHE6XXX+	Electives and Seminar Any graduate level chemical engineering course and other technical electives (as approved by adviser); also CHE 8070 Graduate Seminar each full-time semester	6 - 12

MS Thesis
Required MS Thesis

Course	Title/Desc	Credit
	MS Thesis Required Thesis hours	6 - 12

Research, Special Projects, Readings
Research related topics that are not thesis hours

Course	Title/Desc	Credit
CHE8XXX+	Research, Special Topics, Readings 6 credits of CHE 8000, 9072, 9073 in any combination	6 - 12

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Civil Engineering

Duration: **2 Years** Total Credits: **30** Award: **MS**

Overview

The Master of Science in Civil Engineering program focuses on: (a) Infrastructure Design and Materials, and (b) Infrastructure System and Management. The courses and research encompass structural engineering, geotechnical engineering, transportation engineering, and construction engineering. Additional details are available from the Department's website.

The Department of Civil and Architectural Engineering and Construction Management offers specialized graduate programs in all areas of civil engineering. These programs stress research and independent study in addition to course work, and lead to the Master of Engineering (MEng), the Master of Science (MS), or Doctor of Philosophy (PhD) degrees in civil engineering.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
20MAS-CE-MS-2024

Admission Requirements

- GRE - Required of allinternational students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA minimum 3.0 or equivalent
- Statement of Purpose
- Two letters of recommendation
- International students - English Proficiency Test: TOEFL (minimum 92) or IELTS (minimun 6.5)

Application Deadlines

Application deadlines and additional application information can be found at the CEAS Office of Graduate Studies.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Civil Engineering

MS

20MAS-CE-MS-2024

Duration: 2 Years

Minimum Credits: 30 Credits

Building Systems track

Required courses

Choose 3 or more courses from the list

Course	Title/Desc	Credit
AE6010	Advanced Building Mechanical Systems (C min)	3
AE6030	Building Energy Modeling (C min)	3
AE6047	Building Energy Audits and Data Analytics (C min)	3
CVE6042	Sustainable Construction and LEED (C min)	3

Elective courses

Select 11 or more credit hours

Course	Title/Desc	Credit
AE6020	Advanced lighting and daylighting (C min)	3
AE6050	Indoor Air Quality (C min)	3
CVE7010	RISK AND RELIABILITY (C min)	3
MECH6013	Introduction to Smart Structures (C min)	3
MECH6034	Distributed Sensing and Control (C min)	3
MECH6066	Acoustics (C min)	3
MECH6094	Fundamentals and Applications of Solar Energy (C min)	3
MECH6097	HVAC Design I (C min)	3
MECH6098	HVAC Design II (C min)	3

Construction Engineering and Management track

Required courses

Take these 3 courses

Course	Title/Desc	Credit
CVE6036	Value Engineering and Constructability (C min)	3
CVE6037	Construction Financing & Strategy Planning (C min)	3
CVE6042	Sustainable Construction and LEED (C min)	3

Elective Courses

Select 11 or more credit hours

Course	Title/Desc	Credit
AE6047	Building Energy Audits and Data Analytics (C min)	3
AEC6011	Virtual Design and Construction (C min)	2
AEC6012	Building Information Modeling for Existing Facilities (C min)	2
BANA7020	Optimization (C min)	3
CS6101	Introduction to Applied Artificial Intelligence and Machine Learning Tools (C min)	3
CVE6004	Temporary Structures (C min)	3
CVE6005	Construction Contract Changes and Claims Management (C min)	2
CVE6044	Construction Law (C min)	3
CVE6045	Heavy Highway Estimating (C min)	3
ENGR6014	Engineering Project Management (C min)	3
ENGR6050	Fundamentals of Leadership (C min)	3
STAT6031	Applied Regression Analysis (C min)	3

Seminar and Thesis Requirements

All Civil Engineering students complete the seminar and thesis requirements.

Seminar

Take both courses

Course	Title/Desc	Credit
CVE7005	CVE Graduate Seminar	0
CVE7006	CVE Graduate Seminar	0

Thesis / Research

Students must complete a minimum of 10 credit hours.

Course	Title/Desc	Credit
CVE7092	MS/PHD Research	1 - 15

Geotechnical Engineering track

Required courses

Take both courses listed below.

Course	Title/Desc	Credit
CVE6081	Foundation Engineering (C min)	3

Structural Engineering track

Required courses

Take these four courses

Course	Title/Desc	Credit
CVE7011	Structural Mechanics (C min)	3

Transportation Engineering track

Required courses

Take the four courses listed below.

Course	Title/Desc	Credit

Course	Title/Desc	Credit
CVE7061	Advanced Soil Mechanics (C min)	3

Additional required course

Take one of two courses for final required course.

Course	Title/Desc	Credit
CVE6060	Slope Stability & Earth Retaining Structures (C min)	3
CVE6063	Principles of Pavement Engineering (C min)	3

Elective courses

Select at least 11 credits in consultation with advisor

Course	Title/Desc	Credit
CS6037	Machine Learning (C min)	3
CS6101	Introduction to Applied Artificial Intelligence and Machine Learning Tools (C min)	3
CVE6067	Advanced Pavement Engineering (C min)	3
CVE6082	Reinforced Concrete Design of Shallow Foundations (C min)	3
CVE7010	RISK AND RELIABILITY (C min)	3
CVE7011	Structural Mechanics (C min)	3
CVE7012	Finite Element Analysis (C min)	3
CVE7081	Theory and Design of Concrete Structures I (C min)	3
CVE7085	Metal Structures Theory and Design I (C min)	3
GEOL6004	Glacial Geology (C min)	3
GEOL6008C	Clay Mineralogy (C min)	3
GEOL6016C	Surface Processes and Site Characterization (C min)	3
GEOL6024	Groundwater Modeling (C min)	3
GEOL7001C	Geomorphology and Surface Hazards (C min)	3
STAT6031	Applied Regression Analysis (C min)	3

Course	Title/Desc	Credit
CVE7081	Theory and Design of Concrete Structures I (C min)	3
CVE7085	Metal Structures Theory and Design I (C min)	3
CVE7088	Structural Dynamics (C min)	3

Elective courses

Select 8 or more credit hours

Course	Title/Desc	Credit
CVE6021	Bridge Engineering	3
CVE6058	Design of Wood Structures	2
CVE6059	Design of Masonry Structures (C min)	2
CVE6081	Foundation Engineering	3
CVE6082	Reinforced Concrete Design of Shallow Foundations	3
CVE6088	Finite Element Modeling of Civil and Arch Engineering Structures	2
CVE7010	RISK AND RELIABILITY	3
CVE7012	Finite Element Analysis	3
CVE7013	Advanced Topics in Finite Element Analysis	3
CVE7082	Design of Concrete Structures II	3
CVE7086	Metal Structures Theory and Design II	3
CVE7089	Earthquake Engineering	3

Course	Title/Desc	Credit
CVE6012	Travel Demand Forecasting and Environmental Analysis (C min)	3
CVE6022C	Traffic Control and Signal System Design (C min)	3
CVE6030	GIS in Transportation (C min)	3
CVE6086	Cyber-Physical Transportation Infrastructures (C min)	3

Additional required course for transportation track

Select 1 course from the following:

Course	Title/Desc	Credit
CVE6024	Transportation Safety (C min)	3
CVE6028	Geometric Design of Transportation Facilities (C min)	3

Elective courses

Select 5 or more credit hours

Course	Title/Desc	Credit
CS6033	Artificial Intelligence (C min)	3
CS6037	Machine Learning (C min)	3
CS6052	Intelligent Data Analysis (C min)	3
CS8021	Pattern Recognition (C min)	3
CVE6010C	Intelligent Transportation Data Analytics and Application (C min)	3
CVE6025	Traffic Operations (C min)	3
CVE7074	Traffic Flow Theory and Network Modeling (C min)	3
CVE7076	Intelligent Transportation Systems (C min)	3
EECE6042	Digital Image Processing (C min)	3
MATH6005	Introduction to Complex Analysis	3
PLAN6011	Essential Economics for Planners	3
PLAN6012	Policies and Strategies of Regional Economic Development Planning	3
PLAN6058	Transportation Planning (C min)	3
STAT6031	Applied Regression Analysis	3

Course	Title/Desc	Credit

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Engineering

Duration: 2 Years Total Credits: 33 Award: MS

Overview

The Computer Engineering Master of Science graduate research environment provides excellent opportunities to work on exciting and challenging projects. Funding comes from national and state research agencies such as NSF, NIH, NASA, Army Research Office, Wright Patterson Air Force Base, Office of Naval Research, and Ohio Department of Transportation. We have an excellent research and teaching facilities with 32 faculty members including research laboratories with state-of-the-art equipment in the areas of hardware and software systems, artificial intelligence, neural networks, image processing, electronic design automation, MEMS, microsensors, millimeter waves and photonics, nanoelectronics, and optoelectronics.

The Department of Electrical Engineering and Computing Systems offers two graduate degree programs leading to the Master of Science in Computer Engineering and Electrical Engineering. It offers the Doctor of Philosophy in Electrical Engineering and Computer Science and Engineering.

Computer Engineering

MS

Computer Engineering MS

Duration: 2 Years

★Minimum Credits: 33 Credits

VLSI Focus Area

Coursework required for VLSI - complete 18 or more credits

Required Courses

Students complete all 3 required courses

Course	Title/Desc	Credit
EECE6080C	Introduction to VLSI Design (C min)	4
EECE6082C	VLSI Design for Test and Power (C min)	4
EECE6086C	VLSI Design Automation (C min)	4

VLSI Elective Courses

Choose 2 or more of the following courses

Course	Title/Desc	Credit
CS6051	Database Theory	3
EECE6029	Distributed Operating Systems and Algorithms	3
EECE6030	Trust in Digital Hardware	3
EECE6083	Compiler Theory and Practice	3
EECE7095	Introduction to Computer Architecture	3

Other degree requirements

Students are required to complete 2 credits of seminar and 1 credit of practical experience. Students are also required to have 2 courses at the 7000-level

Seminar and Practical Experience

Students must complete two credits of seminar (EECE 7001 & 7002) and one credit of practical experience (EECE 7004). These credits do not count towards the 30 credit hour minimum.

Course	Title/Desc	Credit
EECE7001	EECE Seminar	1
EECE7002	EECE Seminar	1
EECE7004	Practical Experience	1

Advanced graduate courses

Course	Title/Desc	Credit
CS7XXX+ EECE7XXX+	Advanced graduate coursework Students must complete at least 2 courses at the 7000 level or above. These courses can come from the focus area or from electives.	6 - 12

Thesis

Students are required to complete research work and defend a thesis

Thesis research credits

Students must complete at least 9 thesis research credits.

Course	Title/Desc	Credit
EECE9089	Thesis or Dissertation Research	1 - 18

Defend Thesis

Students must complete and successfully defend a thesis.

Computer Engineering Focus Area

Coursework required Computer Engineering focus area - complete 9 or more credits

Required courses

Select 3 or more of the 6 listed courses

Course	Title/Desc	Credit
CS6051	Database Theory (C min)	3
EECE6029	Distributed Operating Systems and Algorithms (C min)	3
EECE6030	Trust in Digital Hardware (C min)	3
EECE6080C	Introduction to VLSI Design (C min)	4
EECE6083	Compiler Theory and Practice (C min)	3
EECE7095	Introduction to Computer Architecture (C min)	3

Technical electives

Students must complete a minimum of 21 credits of coursework for the MS degree. In addition to the focus area coursework, students take additional courses from graduate courses in the department to fulfill the credit hour requirement.

Technical electives

Course	Title/Desc	Credit
CS6XXX+ EECE6XXX+	Elective courses Courses may come from focus areas or other graduate courses in the department.	3 - 9

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

Duration: 2 Years Total Credits: 33 Award: MS

Overview

In the Master of Science in Computer Science program, there are five possible research groups including:

- Data and Knowledge Management
- Experimental Computer Systems
- Intelligent Systems
- Internet Computing and Information Science
- Quantum Computing

The Data and Knowledge Management Group studies the storage, retrieval, and mining of data in databases. The Experimental Computer Systems Group studies computer systems perspective, including operation systems, compilers, computer architecture, networking, and wireless communications. The Intelligent Systems Group focuses on designing and analyzing an intelligent algorithm or system using any of the theoretical formalisms. The Internet Computing and Information Science Group examines technologies for computing and communication across Internet or any other networked system, and the Quantum Computing Group studies the growing field of Quantum Computing.

Computer Science

MS

Computer Science MS-2019

Duration: 2 Years

★Minimum Credits: 33 Credits

Seminar & Practical Experience

Students complete two credits of seminar

Course	Title/Desc	Credit
CS7001	CS Seminar I	1
CS7002	CS Seminar II	1

Students complete one credit of practical experience

Course	Title/Desc	Credit
EECE7004	Practical Experience	1

Cyber Operations Track

Cyber Operations Required Courses

Students in the Cyber Operations track take all 4 required courses.

Course	Title/Desc	Credit
CS6021	Mathematical Logic (C min)	3
CS6055	Cyber Defense Overview (C min)	3
CS6056	Security Vulnerability Assessment (C min)	3
CS7038	Malware Analysis: Introduction to Reverse Engineering (C min)	3

MS Thesis Research

Students complete at least nine credit hours of thesis research.

Course	Title/Desc	Credit
CS8089	Thesis Research	1 - 15

Students will complete 30 credit hours of track courses, research, and electives plus 3 credit hours of seminar and Practical Experience.

General Computer Science Track

Students in General Computer Science Track choose one course from each discipline area: Algorithms & Theory, Systems, and Artificial Intelligence.

Algorithms & Theory

General Computer Science students choose one course in Algorithms & Theory discipline area.

Course	Title/Desc	Credit
CS6070	The Theory of Formal Languages and Automata (C min)	3
CS7081	Advanced Algorithms I (C min)	3

Systems

General Computer Science students choose one course in Systems discipline area.

Course	Title/Desc	Credit
CS6043	Computer Networking (C min)	3
CS6097	Introduction to Wireless and Mobile Networking (C min)	3
EECE6029	Distributed Operating Systems and Algorithms (C min)	3

Artificial Intelligence

General Computer Science students choose one course in Artificial Intelligence discipline area.

Course	Title/Desc	Credit
CS6033	Artificial Intelligence (C min)	3
CS6037	Machine Learning (C min)	3
CS6052	Intelligent Data Analysis (C min)	3

Data Science Track

Data Science Required Courses

Students in the Data Science track take all 4 required courses.

Course	Title/Desc	Credit
CS6052	Intelligent Data Analysis (C min)	3
CS6054	Information Retrieval (C min)	3
CS6065	Introduction to Cloud Computing (C min)	3
CS7070	Big Data Analytics (C min)	3

Biomedical Informatics Track

Students in the Biomedical Informatics track will take 2 required courses and choose 1 of 3 track electives.

Biomedical Informatics Required Courses

Course	Title/Desc	Credit

Course	Title/Desc	Credit
CS7097C	Introduction to Functional Genomics (C min)	3
CS7099	Introduction to Bioinformatics (C min)	3 - 5

Biomedical Informatics Elective Courses

Students in the Biomedical Informatics track will choose from one of three courses.

Course	Title/Desc	Credit
CS6033	Artificial Intelligence (C min)	3
CS6052	Intelligent Data Analysis (C min)	3
CS7081	Advanced Algorithms I (C min)	3

CEAS Electives

Courses at 7000+ Level

All MS students must complete six or more credits at the 7000 level or above, excluding research and seminar credits. These can be fulfilled within a student's required track courses or as electives.

Course	Title/Desc	Credit
7XXX+	CS courses at 7000+ level (C min)	6
CS6XXX+ EECE6XXX+	CS/EECE Electives	0 - 12

CEAS Electives

After fulfilling track requirements, students can satisfy remaining program credits with CS and EECE graduate electives.

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Seminar and Practical Experience

Seminar and Practical Experience

Students must complete two credits of seminar (EECE 7001 & 7002) and one credit of practical experience (EECE 7004).

Course	Title/Desc	Credit
EECE7001	EECE Seminar	1
EECE7002	EECE Seminar	1
EECE7004	Practical Experience	1

Thesis requirements

Thesis research credits

Students must complete at least 9 credits of thesis research hours.

Course	Title/Desc	Credit
EECE9089	Thesis or Dissertation Research	1 - 18

Defend Thesis

Students must successfully complete and defend a thesis.

Other degree requirements

Students must complete a minimum of 21 course credits for the masters degree. In addition to the focus area courses, students fulfill the remaining course credits with technical electives.

Technical electives

Complete sufficient technical electives to complete coursework credit requirement

Course	Title/Desc	Credit
CS6XXX+ EECE6XXX+	Technical electives In addition to focus area courses, complete sufficient elective courses in order to complete a minimum of 21 course credits	0 - 12

Advanced graduate courses

As part of the graduate coursework, students must complete two or more courses at the 7000 level or above

Course	Title/Desc	Credit
CS7XXX+ EECE7XXX+	Advanced graduate courses	6 - 12

Sensors & Microsystems focus area

Required Courses

Complete 3 or more of the courses listed

Course	Title/Desc	Credit
EECE6007	Biomedical Microsystems (C min)	3
EECE6008	Fundamentals of MEMS (C min)	3
EECE6018	Microfabrication of Semiconductor Devices (C min)	3
EECE6088	Nanoelectronic Devices for VLSI Technologies (C min)	3
EECE6041C	Microfabrication Lab for Semiconductor Devices andMEMS (C min)	3
EECE6050	Compound and Organic Semiconductor Physics (C min)	3
EECE6051	Introduction to Sensors (C min)	3

Systems focus area

Required courses

Complete 3 or more of the courses listed - 9 or more credits

Course	Title/Desc	Credit
EECE6019	Probability and Random Processes (C min)	3
EECE6024	Introduction to Digital Signal Processing (C min)	3
EECE6036	Intelligent Systems (C min)	3
EECE7033	Linear Systems Theory (C min)	3
EECE6016C	Electric Machines and Drives (C min)	4
EECE6026	Introduction to Communication Systems (C min)	3
EECE6042	Digital Image Processing (C min)	3

VLSI focus area

Required courses

Complete all 3 required courses - 12 credits

Course	Title/Desc	Credit
EECE6080C	Introduction to VLSI Design (C min)	4
EECE6082C	VLSI Design for Test and Power (C min)	4
EECE6086C	VLSI Design Automation (C min)	4

VLSI elective courses

Complete two or more of the following courses - six or more credits

Course	Title/Desc	Credit
EECE6007	Biomedical Microsystems	3
EECE6008	Fundamentals of MEMS	3
EECE6018	Microfabrication of Semiconductor Devices	3
EECE6019	Probability and Random Processes	3
EECE6024	Introduction to Digital Signal Processing	3

Course	Title/Desc	Credit
EECE6030	Trust in Digital Hardware	3
EECE6036	Intelligent Systems	3
EECE6048C	Optics for Engineers	3
EECE6088	Nanoelectronic Devices for VLSI Technologies	3
EECE7033	Linear Systems Theory	3
EECE6026	Introduction to Communication Systems (C min)	3
EECE6041C	Microfabrication Lab for Semiconductor Devices andMEMS (C min)	3
EECE6042	Digital Image Processing (C min)	3
EECE6050	Compound and Organic Semiconductor Physics (C min)	3
EECE6051	Introduction to Sensors (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Engineering Education

Duration: **2 Years** Total Credits: **33** Award: **MS**

Overview

The University of Cincinnati's master's degree in Engineering Education prepares students to analyze, interpret, and implement findings from the literature in engineering education into practice, while in parallel advancing their expertise within a technical field in support of their career aspirations. In addition, each student will specialize in one of three focus areas: higher education in engineering, engineering education in PreK-12 levels (formal and informal environments, for- or non-profit), or engineering industry and workforce development. A master's degree in engineering education can lead to a career in academia, informal educational environments, industry, or government.

Engineering education research, as a discipline, utilizes theories, methods of inquiry, and ways of knowing associated with a variety of related disciplines - including anthropology, diversity, equity, and inclusion studies, economics, education, neuroscience, philosophy, political science, psychology, and sociology, along with education research in science, technology, and mathematics – interpreted through the lens of engineering. Students will be introduced to theories related to the teaching and learning of engineering and the applications of pedagogy and assessment. Additionally, they will develop knowledge of research methods inherent to the field with an emphasis on interpreting and assessing the quality of findings and translating those results to practice.

Career

The M.S. ENED program will prepare graduates for careers: at universities (as staff in academic or research support program, centers for teaching excellence, institutional research offices, diversity programs, or outreach programs); at community colleges; in PreK-12 schools; in for-profit and non-profit organizations (e.g., testing organizations, foundations, governmental agencies); and as corporate trainers and other workforce development positions.

Curriculum

Curriculum Guide Versions:
20MAS-ENED-MS-2024

UC Advantages And Special Opportunities

The M.S. ENED program at UC is differentiated from other similar programs in four ways:

1. The program was intentionally designed as a stand-alone program rather than as an exit strategy from a doctoral program.
2. The program requires students to advance their level of expertise within educational theory, engineering education research methodology, and a technical field in support of their career aspirations.
3. The program allows students to choose one of three focus areas depending on their background and goals: higher education in engineering, engineering education in PreK-12 levels (formal and informal environments, for- or non-profit), or engineering industry and workforce development (to the best of our knowledge, workforce development is not an explicit emphasis in any of the existing M.S. or Ph.D. programs at other institutions).
4. The program leverages the strong foundation of experiential learning within the College of Engineering and Applied Science (CEAS) by requiring students to complete a reflective experiential activity within their chosen focus area.

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA of at least 3.0 in a Bachelor's or Graduate degree program in engineering, mathematics, or the physical sciences from a college or university regarded as standard by a regional or general accrediting agency
- Research Statement - (1-3 pages) should describe your research interests (see below), with specific reference to the research area(s), engineering education research methodology, and focus area. You may choose to build on or tie in prior research experience. This statement is used by the faculty as an example of your writing, to help gauge your potential to effectively engage in research at this degree level, and to help determine if the Engineering Education program is a good fit.
- Statement of Purpose - (1-2 pages) should include brief narratives about: a) your academic, professional, and previous research experiences (if not discussed in your research statement); b) your immediate and long-range aspirations; c) how the Engineering Education program will help you to meet your goals; and d) any additional information you feel strengthens your application (e.g., your perspective on the relationship between educational research and teaching/learning). This statement is used by the faculty as an example of your writing and to help determine if the Engineering Education program is a good fit.

- Curriculum Vita (resume) - should include your name(s), a phone number, e-mail address, and colleges attended with degrees and dates. Also include, if applicable, employment history, honors and awards, publications and presentations, and relevant professional experiences (e.g., research, teaching/tutoring, service). Your CV does not need to be structured with these sections and is not limited to these items.
- Two letters of recommendation.
- International students - English Proficiency Test: TOEFL (minimum 92) or IELTS (minimum 6.5)

Description of Engineering Education Research Areas:

- Engineering Epistemologies: research on what constitutes engineering now and into the future
- Engineering Learning Mechanisms: research on developing engineering learners' knowledge and expertise
- Engineering Learning Systems: research on the instructional culture and knowledge required of engineering educators
- Engineering Diversity and Inclusiveness: research on how diverse human talents contribute to the social and global relevance of our profession
- Engineering Education Assessment and Research Methodologies: research on, and the development of, the quantitative, qualitative, and/or data scientific aspects of engineering education (i.e., how theories are studied, designed for, and assessed), including assessments, instruments, and protocols

Description of Engineering Education Graduate Program Focus Areas:

- Higher Education in Engineering: Research will focus on higher education contexts (e.g., undergraduate students, graduate students, faculty).
- Engineering Education in PreK-12: Research will focus on PreK-12 contexts (e.g., students, parents, teachers, administration; formal and informal environments, for- or non-profit). (Note: This focus area does not lead to teacher licensure.)
- Engineering Industry and Workforce Development: Research will focus on industry and workforce development contexts (e.g., practicing engineers; management; translating among technical content, management, leadership, and andragogy).

Engineering Education

MS

20MAS-ENED-MS-2024

Duration: 2 Years

★Minimum Credits: 33 Credits

Required for all MS ENED students

The following courses are required for all MS ENED students.

Required MS ENED Courses

Course	Title/Desc	Credit
ENED7001	Introduction to Engineering Education and Research	3
ENED7005	Engineering Education Research Design	2
ENED7006	Ethical Considerations in Conducting Human Subjects Research in Engineering	1
ENED7010	Quantitative Research Methods I in Engineering Education (C min)	3
ENED7099	Engineering Education Seminar	0
EDST8051	Qualitative Research Methods I (C min)	3

Focus Area & Engineering Technical Electives

Students need to complete 12 credits combined from either focus area electives or engineering technical electives. Below are possible options for the electives.

Possible elective courses
12 credits required

Course	Title/Desc	Credit
CI7002	Curriculum and Instruction: Theories and Trends (C min)	3
CI8051	Program Development in Higher Education (C min)	3
CI9003	Theory, Ethics, Application of Research in Teaching (C min)	3
CI9005	Policy Issues in Teaching and Learning (C min)	3
EDLD8016	Educational Policy Analysis (C min)	3
EDLD8036	Curriculum Development and Data Analysis (C min)	3
EDLD8061	Finance in Higher Education (C min)	3
EDLD8063	Organization and Administration in Higher Education (C min)	3
EDLD8065	Governance & Policymaking in Higher Education (C min)	3
EDLD8085	Economics of Education (C min)	3
ENED7002	Educational Theory (C min)	3
ENED7003	Applications of Pedagogy and Assessment (C min)	3
MGMT8084	Cultural Intelligence in Human Resources (C min)	2
MGMT8087	Talent Acquisition and Staffing (C min)	2
OLHR8029	Individual Behavior in the Workplace (C min)	3
OLHR8076	Employee Development and Training (C min)	2 - 3
OLHR8084	The Diverse Workforce (C min)	2 - 3

Research hours

ENED 7080 or 7089

Thesis students must complete a total of 9 research hours, ENED 7080 and/or 7089.

Course	Title/Desc	Credit
ENED7080	Master of Science Research	1 - 15
ENED7089	Master of Science Thesis Research	1 - 15

Course	Title/Desc	Credit
AE6XXX+	Engineering Technical	0 - 12
AEEM6XXX+	Electives	
BME6XXX+		
CHE6XXX+		
CS6XXX+		
CVE6XXX+		
EECE6XXX+		
EGFD6XXX+		
ENVE6XXX+		
MECH6XXX+		
MTEN6XXX+		

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Engineering

Duration: **2 Years** Total Credits: **34** Award: **MS**

Overview

The Environment Engineering Master of Science graduate program is ranked second nationally in the 1996 Gourman Report.The Department of Biomedical, Chemical, and Environmental Engineering offers the degrees of Master of Science and Doctor of Philosophy in Environmental Engineering and Environmental Science. The environmental engineering and science programs offer specializations in air pollution control/air quality, water quality processes, hazardous waste engineering and management, environmental hydrology and environmental engineering management. Some programs are available on a part- time basis. The programs, their faculty, course work and research facilities and activities are described in detail in an information package from the department.

Environmental Engineering

MS

Environmental Engineering MS-2019

Duration: 2 Years

★Minimum Credits: 34 Credits

Seminar Course Requirements

Students take 3 credits of seminar. They enroll in ENVE 7005 once and ENVE 6076 two times (fall and spring).

Course	Title/Desc	Credit
ENVE7005	Safety, Facilities, & Resources Seminar for Environmental Engineering & Science	1
ENVE6076	Advanced Seminar in Environmental Engineering and Science	1
ENVE6076	Advanced Seminar in Environmental Engineering and Science	1

Math Requirement

Complete the following math requirement

Course	Title/Desc	Credit
ENVE6094	Probability and Estimation Methods for Engineering Systems (C min)	3

Research Hours

Students register for at least 10 credit hours under advisor's section of ENVE8099.

Course	Title/Desc	Credit
ENVE8099	MS/PHD RESEARCH	10 - 15

Air Quality Focus Area

Students in the Air Quality focus area fulfill the following requirements.

Air Quality Requirement

Students take both of the following courses.

Course	Title/Desc	Credit
ENVE6064	Air Resources Management (C min)	3
ENVE6022C	Atmospheric Chemistry and Monitoring (C min)	3

Hydrosystems Requirement

Students choose one of the following courses.

Course	Title/Desc	Credit
CVE6090	Engineering Hydrology (C min)	3
ENVE6026	Environmental/Hydrologic Systems Analysis (C min)	3

Water Quality Requirement

Students choose at least one of the following courses.

Course	Title/Desc	Credit
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3
ENVE6000	Applied Biology for Engineers (C min)	3

Lab Requirement

Students take the following course.

Hydrosystems Focus Area

Students in the Hydrosystems focus area fulfill the following requirements.

Hydrosystems Requirement

Students take both of the following courses.

Course	Title/Desc	Credit
CVE6090	Engineering Hydrology (C min)	3
ENVE6026	Environmental/Hydrologic Systems Analysis (C min)	3

Air Quality Requirement

Students take the following course.

Course	Title/Desc	Credit
ENVE6064	Air Resources Management (C min)	3

Water Quality Requirement

Students choose at least one of the following courses.

Course	Title/Desc	Credit
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3
ENVE6000	Applied Biology for Engineers (C min)	3

Lab Requirement

Students choose one of the following versions of Introduction to GIS.

Course	Title/Desc	Credit

Water Quality Focus Area

Students who choose the Water Quality focus area fulfill the following requirements.

Water Quality Requirement

Students take both of the following courses.

Course	Title/Desc	Credit
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3

Air Quality Requirement

Students take the following course.

Course	Title/Desc	Credit
ENVE6064	Air Resources Management (C min)	3

Hydrosystems Requirement

Students choose one of the following courses.

Course	Title/Desc	Credit
CVE6090	Engineering Hydrology (C min)	3
ENVE6026	Environmental/Hydrologic Systems Analysis (C min)	3

Lab Requirement

Students take the following course.

Course	Title/Desc	Credit
ENVE6058C	Environmental Instrumentation (C min)	3

Course	Title/Desc	Credit
ENVE6058C	Environmental Instrumentation (C min)	3

Focus Area Electives

Students choose at least one of the following with advisor approval.

Course	Title/Desc	Credit
ENVE6071C	Aerosol Science, Engineering, and Control (C min)	4
ENVE6075	Air Quality Modeling and Data Analysis (C min)	3
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3
ENVE6000	Applied Biology for Engineers (C min)	3
GEOG6071C	Introduction to Geographic Information Sciences (C min)	3
PLAN6071	Introduction to Geographic Information Systems (C min)	3
6XXX+	Any appropriate 6000+ level course approved by advisor (C min)	3 - 4

Course	Title/Desc	Credit
GEOG6071C	Introduction to Geographic Information Sciences (C min)	3
PLAN6071	Introduction to Geographic Information Systems (C min)	3

Focus Area Electives

Students choose at least one of the following courses with advisor approval.

Course	Title/Desc	Credit
ENVE6050	Civil and Environmental Infrastructure Systems Planning Under Uncertainty (C min)	3
STAT6041	Time Series (C min)	3
STAT6043	Applied Bayesian Analysis (C min)	3
6XXX+	Any appropriate 6000+ level course with advisor approval (C min)	3 - 4

Focus Area Electives

Students choose at least one of the following courses with advisor approval.

Course	Title/Desc	Credit
ENVE6054	Physical Chemical Processes for Water Quality Control (C min)	3
ENVE6055	Biological Processes for Water Quality Control (C min)	3
6XXX+	Any appropriate 6000+ level course with advisor approval (C min)	3 - 4

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Materials Science

Duration: 2 Years Total Credits: 32 Award: MS

Overview

In the Metallurgical Engineering Master of Science program the research will be concerned with more engineering aspects of metallic materials, such as high temperature mechanical properties which include creep, fatigue, and fracture properties of alloys, powder metallurgy, tribology, and solidification processing. Through their research projects, students will have opportunities to learn the use of modern instrumental techniques including mechanical testing systems (MTS), electron microscopy, small-angle and wide-angle X-ray diffraction and Raman, infrared and X-ray photoelectron infrared spectroscopy.

The department offers programs of graduate study both in Materials Science and in Metallurgical Engineering. Graduate students may choose one of these programs depending on their desired emphasis, their undergraduate training and the research topic chosen. In the Materials Science program students may pursue studies in Polymeric Materials, Metallic Materials, Ceramic Materials, or other materials such as Composites or Biomaterials. The main emphasis is on the investigation of the structure at the molecular and atomic level and relating it to macroscopic properties of these materials such as strength, phase transitions or adhesion.

Mechanical Engineering

Duration: 2 Years Total Credits: 30 Award: MS

Overview

The Mechanical Engineering graduate program in the Department of Mechanical and Materials Engineering (MME) offers a Master of Science degree. The MS degree requires the completion of a thesis.

Graduate level courses in core Mechanical Engineering areas as well as in emerging areas are offered. Academically, the program is grouped into research foci consisting of: (1) Structural Dynamics and Acoustics; (2) PHM, Intelligent Systems and Reliability Engineering; (3) Advanced Manufacturing; (4) Engineering Simulation and Applied Mechanics; (5) Nano-Technology and Bio-Medical Engineering; (6) Thermal-Fluid and Enhanced Heat Transfer; (7) Advanced Materials Research.

The Department has state-of-the-art research laboratories in Vibrations and Acoustics, Computational Mechanics, Nanotechnology, Manufacturing, Computational Fluid Dynamics, Thermal Processing and Thermal Fluids, Bio-Fluids, Heat Mass Transfer, Fuel-Cells and Microscale Flow and Heat Transfer. Currently, five major research centers are housed in the Department of Mechanical and Materials Engineering, which provide many opportunities for students and faculty to engage in scholarly research and knowledge creation. These are:

1. NSF Industry-University Cooperative Research Center for Intelligent Maintenance Systems
2. UC Simulation Center - a UC/P&G Collaboratory
3. Siemens Simulation Technology Center
4. NSF Engineering Research Center for Revolutionizing Metallic Biomaterials
5. Additive Manufacturing Center
6. Laser Shock Peening (LSP) Center

In addition, faculties receive research funding from national agencies (NSF, DOE, NASA, DOD, EPA) as well as numerous industries. Research assistantships and teaching assistantships are available on a competitive basis.

MS Project

Students in the GE ACE program complete a project and register for 2 credits of MECH 9012 (MECH 9015 with prior approval only).

MECH 9012 or 9015

Students complete two credit hours.

Course	Title/Desc	Credit
MECH9012	Final MS Project	2
MECH9015	Research/Thesis	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Aerospace Engineering & Engineering Mechanics

Duration: **5 Years** Award: **PHD**

Overview

Graduate students in the Aerospace Engineering and Engineering Mechanics doctoral program pursue research in the areas of Dynamics and Control, Fluid Mechanics, Propulsion Systems, and Solids and Structures. These are the four key areas that present challenges and opportunities to shape the future of aerospace engineering and to bring societal benefit at large.

Often referred to as the Birthplace of Aviation, the Southwest Ohio area has long played an important role in aerospace history and technology. The UC School of Aerospace Systems, which features the second-oldest Aerospace Engineering program in the country, has been at the forefront of aerospace technology since the early days of air and space travel.

The School of Aerospace Systems graduate programs have played pivotal roles in building this success by bringing together outstanding faculty, and the most talented students from around the world. The School has a record of long-standing excellence. Now, more than ever, the School strives to deliver scientific discovery and technological innovation that will drive the future of aerospace engineering and more broadly will impact the related fields of energy, security, and health.

The School of Aerospace Systems provides one of the best university-based research environments in the world with state-of-the-art laboratories and a diverse faculty base that has recently been expanded to bring top expertise in critical new research areas from leading institutions worldwide.

Aerospace Engineering & Engineering Mechanics-PHD

UC Advantages And Special Opportunities

The School of Aerospace Systems is the first program at any university in Ohio to host two Ohio Eminent Scholars, one in the area of Experimental Fluid Mechanics and the other in the area of Finite Element Structural Analysis. Recently, a $27 million contribution in endowment funds from the Ohio Department of Development has allowed the School to start the Center for Intelligent Propulsion and Life Management Systems.

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+

Aerospace Engineering & Engineering Mechanics

PHD

Aerospace Engineering & Engineering Mechanics-PHD

Duration: 5 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 66 Credits

Seminar

Seminar
All students required to complete 2 credits of seminar

Course	Title/Desc	Credit
AEEM9072	Graduate Seminar	1

Electives

Mathematics and Technical Electives
Students will select 9-12 credits in consultation with an advisor.

Course	Title/Desc	Credit
Free Electives	Students are required to take course(s) in mathematics and technical electives. Students with a masters need 3 or more credits of mathematics. Students without a master's need 6 or more credits of mathematics. All students need 6 or more credits of technical electives. The specific courses will be approved by the student's advisor.	9 - 12

PhD Qualifying Exam

All students must pass a qualifying exam

The qualifying exam consists of a written examination and an oral examination
For the first part of the qualifying exam students are required to submit a research paper. When the paper is deemed acceptable, students must pass an oral exam.

Aerospace Research Tracks

Students are required to select a track and follow the curriculum associated with that track. Students with an MS select 9 or more credits from their research track. Students without an MS select 18 or more credits from the research track.

Fluid Dynamics and Propulsion Systems Focus
Students in the Fluid Dynamics and Propulsion Systems focus will select from the following courses in consultation with an advisor:

Course	Title/Desc	Credit
AEEM6011	Combustion (C min)	3
AEEM6012	Gas Turbine Combustion (C min)	3
AEEM6041	Compressible Flow and Thermodynamics (C min)	3
AEEM7050	Turbomachinery Flows (C min)	3
AEEM8030	Advanced Propulsion (C min)	3
EGFD7041	Viscous Flow and Heat Transfer (C min)	3

Dynamics and Controls Focus
Students in the Dynamics and Control Focus will select from the following courses in consultation with an advisor:

Course	Title/Desc	Credit
AEEM6003	Analytical Dynamics (C min)	3
AEEM6015	Modern Control (C min)	3
AEEM6022	Optimal Control (C min)	3
AEEM6036	Spacecraft Dynamics (C min)	3
AEEM6093	Advanced Flight Mechanics (C min)	3
AEEM6095	Astrodynamics (C min)	3

Research

Students with an MS are required to have 46 or more credits of research. Students without an MS are required to have 58 or more credits of research.

Research requirement for students with an MS
Students with a masters take at least 38 credits of AEEM 9070; the remaining credits can come from AEEM 9074 or 9070

Course	Title/Desc	Credit
AEEM9070	Graduate Research	1 - 15
AEEM9074	Reading Course	1 - 15

Research requirement for students without an MS
Students with a masters take at least 48 credits of AEEM 9070; the remaining credits can come from AEEM 9074 or 9070

Course	Title/Desc	Credit
AEEM9070	Graduate Research	1 - 15
AEEM9074	Reading Course	1 - 15

Solids and Structural Mechanics Focus

Students in the Solids and Structural Mechanics focus will select from the following courses in consultation with an advisor:

Course	Title/Desc	Credit
AEEM6001	Advanced Strength of Materials (C min)	3
AEEM7001	Elasticity I (C min)	3
AEEM7027	Nondestructive Testing (C min)	3
AEEM7052	Finite Element Method (C min)	3
AEEM7074	Advanced Finite Element Method (C min)	3
Free Electives	In consultation with advisor, student selects another course appropriate for the track.	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Engineering

Duration: **5 Years** Award: **PHD**

Overview

The University of Cincinnati's graduate degree in biomedical engineering combines faculty, resources and expertise from its prestigious Colleges of Engineering and Medicine. One of the few such interdisciplinary advanced degree programs in the country, the BME graduate program offers three different areas of specialization: Bioinformatics, Medical Imaging, and Tissue Engineering/Biomechanics. The field of biomedical engineering is expected to lead engineering employment growth in the next decade. The rate of increase of 26% is projected to be the largest of all engineering professions. A degree in biomedical engineering can lead to a career in academia, industry, or government.

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA minimum 3.0 or equivalent
- Statement of Purpose
- Two letters of recommendation
- International students - English Proficiency Test: TOEFL (minimum 92) or IELTS (minimum 6.5)

Application Deadlines

Application deadlines and additional application information can be found at the CEAS Office of Graduate Studies.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Biomedical Engineering

PHD

BME PhD

Duration: 5 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 60 Credits

General BME course requirements (Not focus area)

All students complete courses from Core BME courses, General Medical Science courses, Mathematics courses, and Approved Technical Electives. Students without a master's degree complete a total of 36 credits of General BME courses. Students who have a master's degree complete 15 credits of General BME courses.

Core BME Courses

Students without a master's degree complete 9 credits. Students with a master's degree complete 3 credits.

Course	Title/Desc	Credit
BME7001	BME Survey (C min)	3
BME7002C	Bioinstrumentation (C min)	3
BME7005	Biomedical Research Design (C min)	3

General Medical Sciences courses

Students without a master's degree complete 6 credits. Students with a master's degree complete 3 credits.

Course	Title/Desc	Credit
BE7067	Scientific Integrity & Research Ethics	1 - 2
CB8080	Cancer Biology and Therapeutics	4
GNTD7001	Principles of Molecular and Cellular Biology	1 - 4
GNTD7002	Biochemistry and Cellular Metabolism	3
GNTD7003	Ethics in Research	1
MCP7000	Human Physiology	4
MG7002	Biochemistry and Cellular Metabolism	3
MG7021	Fundamentals of Molecular Genetics	3
MG7024	Mechanisms of Signal Transduction	2
MG7027	Principles of Biochemistry I	3
MG7028	Principles of Biochemistry II	3
MP9050	Diagnostic Radiological Imaging Physics	3
NS7078	Fundamentals of Neuroscience I	4
NS7079C	Fundamentals of Neuroscience II	5
NURS8022	Advanced Physiology and Pathophysiology	3 - 4

Focus Areas

Students select a focus area.

Medical Device Innovation and Entrepreneurship Focus Area courses

Students without a master's degree complete 9 credits. Students with a master's degree complete 3 credits.

Course	Title/Desc	Credit
BME6012	Biomedical Signal and Image Processing (C min)	3
BME6030	Functional Tissue Engineering (C min)	3
BME7020C	Advanced Medical Device Design - I (C min)	3
BME7021	Tissue Biomechanics (C min)	3
EECE6007	Biomedical Microsystems (C min)	3
EECE6008	Fundamentals of MEMS (C min)	3
EECE6078C	Biomicrofluidic Systems (C min)	4
EECE7032	BioSensors and Bioelectronics (C min)	3
EECE8025	Electrical Engineering of the Human Body (C min)	3
EECE8115C	Humans, Machines, Robots and their Interactions (C min)	3
ENTR7005	Entrepreneurship: New Venture Creation (C min)	3
MGMT7014	Leadership and Organizations (C min)	2
MGMT7035	Management of Innovation (C min)	2

Medical Imaging focus area courses

Students without a master's degree complete 9 credits. Students with a master's degree complete 3 credits.

Course	Title/Desc	Credit
BME6010	Biomedical Ultrasound (C min)	3
BME6011	Magnetic Resonance Imaging and Spectroscopy (C min)	3
BME6012	Biomedical Signal and Image Processing (C min)	3
BME7012	Advanced Topics in MRI (C min)	3

Dissertation Research

Thesis Research

Students who enter the PhD program with a master's must complete at least 45 thesis research hours. Students who enter the PhD program without a master's must complete at least 54 thesis research hours.

Course	Title/Desc	Credit
BME8099	Doctoral Dissertation Research	1 - 15

Qualifying Exam

Course	Title/Desc	Credit
	Written Portion of Exam Students submit a written research proposal to the qualifying committee and must receive majority approval from the committee in order to pass.	0
	Oral Portion of Exam Once the student has passed the written portion of the qualifying examination, the student must take the oral portion of the qualifying examination prior to the end of the same academic semester. The committee convenes following the student's presentation and decides whether to pass or fail the student. Students who fail the exam can retake it once.	0

Dissertation Defense

Course	Title/Desc	Credit

Course	Title/Desc	Credit

Mathematics courses

Students without a master's degree complete 6 credits. Students with a master's degree complete 3 credits.

Course	Title/Desc	Credit
AEEM7052	Finite Element Method	3
BE7022	Introduction to Biostatistics	3
BME7061	Biostatistics in Research	3
BME8064	Advanced Statistical Methods in Biomedical research	3
CS6037	Machine Learning	3
CS7051	Advanced Topics in Mining Spatial and Temporal Data	3
CS7053	Intro to Medical Informatics	3
CS7099	Introduction to Bioinformatics	3 - 5
EGFD6037C	Computational Fluid Dynamics	3
MATH6006	Numerical Analysis	3
MATH6007	Partial Differential Equations and Fourier Analysis	3
MATH6008	Applied Probability and Stochastic Processes	3
MATH6015	Mathematical Programming	3
MATH6051	Applied Ordinary Differential Equations	3
MATH8010	Advanced Numerical Analysis	3
MATH8012	Applied Mathematics Methods	3
PHYS7001	Mathematical Physics	4

Technical Electives

Students without a master's degree complete 6 credits. Students with a master's degree complete 3 credits.

Course	Title/Desc	Credit
AEEM6067	Entrepreneurship and Technology Law	3
AEEM7027	Nondestructive Testing	3
BIOL6093C	Human Physiology & Biomechanics	4
BME6010	Biomedical Ultrasound	3
BME6011	Magnetic Resonance Imaging and Spectroscopy	3
BME6024	Joint Biomechanics and Measurement Methods	3
BME7061	Biostatistics in Research	3
EECE6007	Biomedical Microsystems	3
EECE6078C	Biomicrofluidic Systems	4
BME8010	Independent Study in Medical Imaging (C min)	1 - 6
EECE6042	Digital Image Processing (C min)	3
MP9050	Diagnostic Radiological Imaging Physics (C min)	3
MP9051	Diagnostic Radiological Imaging Physics II (C min)	3

Tissue Engineering and Regenerative Medicine focus area courses

Students without a master's degree complete 9 credits. Students with a master's degree complete 3 credits.

Course	Title/Desc	Credit
BME6024	Joint Biomechanics and Measurement Methods (C min)	3
BME6030	Functional Tissue Engineering (C min)	3
BME7021	Tissue Biomechanics (C min)	3
BME8020	Independent Study in Biomechanics (C min)	1 - 6
BME8030	Independent Study in Tissue Engineering (C min)	1 - 6
GNTD7001	Principles of Molecular and Cellular Biology (C min)	1 - 4
OSE7044C	Biomechanical and Physiological Aspects of Muscular Activity (C min)	2

Course	Title/Desc	Credit
	Dissertation Proposal and Candadicy After passing the qualifying examination, the student forms a advisory committee of four members, which includes the research adviser and one faculty member outside of the technical focus area of the adviser. The student's dissertation proposal must be accepted before the student can be admitted into candidacy.	0
	Final Defense of Dissertation After completing the dissertation, the candidate must successfully defend the dissertation in an oral presentation to the advisory committee.	0

Course	Title/Desc	Credit
EECE7032	BioSensors and Bioelectronics	3
EGFD7041	Viscous Flow and Heat Transfer	3
ENTR7005	Entrepreneurship: New Venture Creation	3
MECH6045	Experimental Techniques in Fluid Mechanics	3
MECH6060	Applied Fast Fourier Transforms	3
MECH6066	Acoustics	3
MGMT7035	Management of Innovation	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemical Engineering

Duration: **5 Years** Award: **PHD**

Overview

The Chemical Engineering program offers an average of 35 graduate courses a year in the four research areas of Biomolecular Engineering, Nanotechnology, Energy and Environment, and Separations. The courses include, but are not limited to Air Pollution Engineering, Biotransformations and Biocatalysis, Bioengineering, Chemical Engineering Design and Green Engineering, Computational Chemistry and Molecular Modeling, Fuel Cells, Membrane Processes, Molecular Engineering and Functional Nanomaterials, Polymer Systems, Process Dynamics, Control and Optimization, Reaction Engineering and Catalysis for Energy and Fuels, Separation Processes, Tissue Engineering, and Transport Phenomena.

Chemical Engineering

PHD

Chemical Engineering Ph.D.

Duration: 5 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 66 Credits

Post Baccalaureate Requirements

Students admitted directly into the PhD program without a master's degree must complete a minimum total of 90 credit hours. Of these credits, 30 are from PhD dissertation, 12 are from named chemical engineering credits and 3 are from graduate math; the remainder can be taken from electives, seminar and special projects.

Required Chemical Engineering Coursework

Students take the following required Chemical Engineering graduate courses.

Course	Title/Desc	Credit
CHE6040	Advanced Chemical Engineering Thermodynamics (C min)	3
CHE6043	Advanced Transport Phenomena I (C min)	3
CHE6044	Advanced Transport Phenomena II (C min)	3
CHE7077	Chemical Reaction Engineering (C min)	3

Math Requirement

Students take at least 3 credits of graduate level math/statistics or equivalent courses.

Course	Title/Desc	Credit
MATH6XXX+ STAT6XXX+	Math requirement	3

Research, Special Projects, Readings, non-CHE electives

Students take any combination of PhD Research, Special Projects, Readings, and non-CHE electives. Non-CHE electives outside the CEAS require approval by the College.

Course	Title/Desc	Credit
CHE9000	PhD Research in Chemical Engineering	1 - 15
CHE9072	Special Projects in Chemical Engineering (C min)	1 - 6
CHE9073	Readings (C min)	1 - 15

Seminar

Students take Seminar each semester of full-time registration.

Course	Title/Desc	Credit
CHE8070	Graduate Seminar	1

Post Master's Requirements

Students who have completed a master's degree must complete a minimum 66 credit hours. Of these credits, 30 are from PhD Dissertation and 36 credit hours of coursework, seminar, and research.

Electives

Students take any graduate level Chemical Engineering course and other technical electives (as approved by advisor).

Course	Title/Desc	Credit
CHE6XXX+	Electives (C min)	9 - 15

Math Requirement

Students take graduate level math/statistics or equivalent courses.

Course	Title/Desc	Credit
MATH6XXX+ STAT6XXX+	Math requirement (C min)	3

Research, Special Projects, Readings, non-CHE electives

Students take any combination of PhD Research, Special Projects, Reading, and non-CHE electives. Non-CHE electives outside the CEAS require approval by the College.

Course	Title/Desc	Credit
CHE9000	PhD Research in Chemical Engineering	1 - 15
CHE9072	Special Projects in Chemical Engineering (C min)	1 - 6
CHE9073	Readings (C min)	1 - 15

Seminar

Students take Seminar each semester of full-time registration.

Course	Title/Desc	Credit
CHE8070	Graduate Seminar	1

PhD Dissertation

All PhD students complete a minimum of 30 credits of PhD dissertation

PhD Dissertation

All PhD students take (in total) a minimum of 30 credit hours of PhD Dissertation. The credit hour range per semester is 1-15.

Course	Title/Desc	Credit
CHE9071	Dissertation	1 - 15

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Civil Engineering

Duration: **5 Years** Award: **PHD**

Overview

The Department of Civil and Architectural Engineering and Construction Management offers specialized graduate programs in all areas of civil engineering. These programs stress research and independent study in addition to course work, and lead to the Master of Engineering (MEng), the Master of Science (MS), or Doctor of Philosophy (PhD) degrees in civil engineering. The graduate program focuses on: Infrastructure Design and Materials, and Infrastructure System and Management. The courses and research encompass structural engineering, geotechnical engineering, transportation engineering, and construction engineering. Additional details are available from the School website.

Civil Engineering

PHD

20DOC-CE-PHD

Duration: 5 Years
★Post Baccalaureate Minimum Credits: 90 - 170 Credits
★Post Master's Minimum Credits: 60 - 140 Credits

Coursework

Doctoral Research

For students with a masters, a minimum of 48 credits or CVE 7092 are required. For students without a masters a minimum of 58 credits of CVE 7092 are required.

Course	Title/Desc	Credit
CVE7092	MS/PHD Research	1 - 15

Civil PhD Credit Hour Requirements post masters

Students with a masters must complete at least 60 credit hours including a minimum of 12 credit hours of formal coursework beyond the MS degree.

Course	Title/Desc	Credit
6XXX+	Coursework Determined in Consultation with Advisor At least 12 credits hours of the PhD student's coursework must be chosen in consultation with the advisor. (C min)	12 - 21

Civil PhD Credit Hour Requirements with no masters

Students with no masters must complete at least 90 credit hours including a minimum of 32 credit hours of formal graduate coursework.

Course	Title/Desc	Credit
6XXX+	Graduate coursework At least 32 credits hours of the PhD student's coursework must be chosen in consultation with the advisor. (C min)	32 - 48

Independent Study and Special Projects

Independent study and special projects (CVE 7093) are limited to six credits unless approved in advanced by the student's academic advisor and the Graduate Program Director.

Other Requirements

Teaching Requirements for Civil PhD Students

Doctoral students are expected to complete 3 credits of MLTI 8041 and demonstrate effectiveness in teaching. The credits for MLTI 8041 DO NOT count toward the minimum required credits.

Course	Title/Desc	Credit
MLTI8041	Teaching Effectiveness	3
	Teach one undergraduate course After completing MLTI8041, each student is required to teach one lower level undergraduate course under the mentorship of a faculty advisor.	0

PhD Qualifying Examination

Within fifteen months of beginning the PhD program, students must take and pass the PhD qualifying examination, which consists of a written fundamental exam, a take home exam, and an oral exam. Students who fail the exam will have one opportunity to re-take it.

Dissertation

Students are required to complete and successfully defend a dissertation

Course	Title/Desc	Credit
	Dissertation Committee Under the direction of the Graduate Program Director a dissertation committee will be formed in conformance with the Graduate Student Handbook	0
	Individualized Curriculum Plan The Dissertation Committee will approve an individual curriculum plan in accordance with the Graduate Student Handbook	0
	Dissertation Proposal A dissertation proposal must be prepared at least 12 months before the final dissertation defense. The proposal will be presented to and approved by the Dissertation Committee.	0
	Dissertation Defense The student must successfully defend the dissertation to the Dissertation Committee	0

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science and Engineering

Duration: **5 Years** Award: **PHD**

Overview

The Computer Science and Engineering doctoral program has excellent research and teaching facilities including research laboratories with state-of-the-art equipment in the areas of computer science, software systems, artificial intelligence, neural networks, and more. Every graduate laboratory has a mix of computers running the latest versions of Solaris, Linux, or Windows.

There are five possible research groups.

- The Data and Knowledge Management group studies the storage, retrieval, and mining of data in databases.
- The Experimental Computer Systems group studies computer systems perspective, including operation systems, compilers, computer architecture, networking, and wireless communications.
- The Intelligent Systems group focuses on designing and analyzing an intelligent algorithm or system using any of the theoretical formalisms.
- The Internet Computing and Information Science group examines technologies for computing and communication across Internet or any other networked system, and the Quantum Computing group studies the growing field of Quantum Computing.

Computer Science and Engineering

PHD

Computer Science and Engineering PhD

Duration: 5 Years
Post Baccalaureate Minimum Credits: 93 Credits
Post Master's Minimum Credits: 63 Credits

Total Credit Hours Required
Students who are pursuing a PhD directly from a bachelor's must complete at least 93 credit hours with 30 credits of coursework in the discipline. Students who have a master's must complete at least 63 credit hours with at least 18 credits of coursework in the discipline. Courses should be aligned to students' chosen track.

Cyber Operations Track

Cyber Operations Track Courses
Students in Cyber Operations track take all of the following courses.

Course	Title/Desc	Credit
CS6055	Cyber Defense Overview (C min)	3
CS6021	Mathematical Logic (C min)	3
CS6056	Security Vulnerability Assessment (C min)	3
CS7038	Malware Analysis: Introduction to Reverse Engineering (C min)	3
CS6038	Malware Analysis (C min)	3

Advanced Graduate Coursework

Coursework for Students with a master's
Students who enter PhD program post-master's must take 9 credits at the 7000+ level. These can include track courses, but not research or seminar hours.

Course	Title/Desc	Credit
7XXX+	Course credits at 7000+ level Students complete a minimum of 9 course credits at the 7000+ level.	9

Coursework for Students without master's
Students who enter PhD program without a master's must take 15 credits at the 7000+ level. These can include track courses, but not research or seminar hours.

Course	Title/Desc	Credit
7XXX+	Course credits at 7000+ level Students must complete a minimum of 15 course credits at the 7000+ level.	15

General Computer Science Track

Students who chose the General Computer Science track must take at least one course from each discipline area.

Algorithms & Theory
Students in General CS track chose one or more courses.

Course	Title/Desc	Credit
CS6070	The Theory of Formal Languages and Automata (C min)	3
CS7081	Advanced Algorithms I (C min)	3

Systems
Students in General CS track chose one or more courses.

Course	Title/Desc	Credit
CS6043	Computer Networking (C min)	3
CS6097	Introduction to Wireless and Mobile Networking (C min)	3

Data Science Track

Data Science Track Courses
Students in Data Science Track take all 4 courses.

Course	Title/Desc	Credit
CS6054	Information Retrieval (C min)	3
CS7070	Big Data Analytics (C min)	3
CS6065	Introduction to Cloud Computing (C min)	3
CS6052	Intelligent Data Analysis (C min)	3

Seminar and Practical Experience
Students must take two credits of seminar CS 7001/7002 or EECE 7001/7002) and one credit of practical experience (EECE 7004).

Course	Title/Desc	Credit
CS7001	CS Seminar I	1
CS7002	CS Seminar II	1
EECE7001	EECE Seminar	1
EECE7002	EECE Seminar	1
EECE7004	Practical Experience	1

Course	Title/Desc	Credit
EECE6029	Distributed Operating Systems and Algorithms (C min)	3

Artificial Intelligence

Students in General CS track chose one or more courses.

Course	Title/Desc	Credit
CS6033	Artificial Intelligence (C min)	3
CS6037	Machine Learning (C min)	3
CS6052	Intelligent Data Analysis (C min)	3

Biomedical Informatics Track

Students in Biomedical Informatics track take 2 required courses and 1 of 3 track electives.

Required Biomedical Informatics Courses

Course	Title/Desc	Credit
CS7097C	Introduction to Functional Genomics (C min)	3
CS7099	Introduction to Bioinformatics (C min)	3 - 5

Biomedical Informatics Electives

Students in Biomedical Informatics track choose one or more electives.

Course	Title/Desc	Credit
CS6033	Artificial Intelligence (C min)	3
CS6052	Intelligent Data Analysis (C min)	3
CS7081	Advanced Algorithms I (C min)	3

VLSI Track

Students in VLSI track take 3 required courses and at least 2 track elective courses.

VLSI Track Required Courses

Students in VLSI track take 3 required courses.

Course	Title/Desc	Credit
EECE6080C	Introduction to VLSI Design (C min)	4
EECE6082C	VLSI Design for Test and Power (C min)	4
EECE6086C	VLSI Design Automation (C min)	4

VLSI Track Elective Courses

Students in VLSI track take two or more courses.

Course	Title/Desc	Credit
EECE6030	Trust in Digital Hardware (C min)	3
EECE7095	Introduction to Computer Architecture (C min)	3
EECE6083	Compiler Theory and Practice (C min)	3
CS6051	Database Theory (C min)	3
EECE6029	Distributed Operating Systems and Algorithms (C min)	3

Research Hours

Students without a master's must complete a minimum of 60 dissertation research credits and students with a master's must complete a minimum of 30 dissertation research credits (CS 8089 or EECE 9089).

Course	Title/Desc	Credit
CS8089	Thesis Research	1 - 15
	Doctoral Dissertation Proposal No more than 6 credits of EECE 9080/CS 8080, Doctoral Dissertation Proposal, may be counted towards fulfilling the minimum required credits (93 for post bachelor's and 63 for post Master's). The credits can be applied to research, but not classroom coursework credits.	0 - 6
EECE9089	Thesis or Dissertation Research	1 - 18

Dissertation Defense

Students must successfully complete and defend a dissertation.

Course	Title/Desc	Credit

Course	Title/Desc	Credit
	Write and defend dissertation proposal PhD students must successfully write and defend a dissertation proposal in order to be admitted into PhD candidacy. The written proposal must follow a format consistent with guidelines for federal funding agencies. The oral defense occurs after the completion of required coursework and the final defense occurs within four years of admittance into candidacy.	0

General Computer Engineering Track

General Computer Engineering Track Courses

Students in General Computer Engineering track choose 3 or more required courses.

Course	Title/Desc	Credit
EECE6030	Trust in Digital Hardware (C min)	3
EECE6080C	Introduction to VLSI Design (C min)	4
EECE7095	Introduction to Computer Architecture (C min)	3
EECE6083	Compiler Theory and Practice (C min)	3
CS6051	Database Theory (C min)	3
EECE6029	Distributed Operating Systems and Algorithms (C min)	3

Elective Courses

Students complete credit hour requirements by completing graduate level courses approved by their advisor

Elective courses

Course	Title/Desc	Credit
Free Electives	Take graduate courses approved by advisor to meet credit hour requirements	0 - 21

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electrical Engineering

Duration: **5 Years** Award: **PHD**

Overview

The Department of Electrical Engineering and Computing Systems offers the Doctor of Philosophy in Electrical Engineering and Computer Science and Engineering.

The graduate research environment provides excellent opportunities to work on exciting and challenging projects. Funding comes from national and state research agencies such as NSF, NIH, NASA, Army Research Office, Wright Patterson Air Force Base, Office of Naval Research, and Ohio Department of Transportation. We have an excellent research and teaching facilities with 32 faculty members including research laboratories with state-of-the-art equipment in the areas of hardware and software systems, artificial intelligence, neural networks, image processing, electronic design automation, MEMS, microsensors, millimeter waves and photonics, nanoelectronics, and optoelectronics.

Electrical Engineering

PHD

Electrical Engineering PhD - 2020

Duration: 5 Years
Post Baccalaureate Minimum Credits: 93 Credits
Post Master's Minimum Credits: 63 Credits

Seminar/practical experience

Seminar / practical experience
Students complete the following

Course	Title/Desc	Credit
EECE7001	EECE Seminar	1
EECE7002	EECE Seminar	1
EECE7004	Practical Experience	1

Post Master's Requirements

Students who have completed a master's degree must complete a minimum of 18 credits of coursework, a minimum of 30 credits of research, 2 credits of seminar and 1 credit of practical experience. The minimum total credits for coursework plus research must equal 60.

Coursework requirement with a Master's degree
Including the focus area, complete a minimum of 18 credits of graduate coursework. Nine of those credits should be in courses at the 7000+ level or above.

Course	Title/Desc	Credit
CS6XXX+ EECE6XXX+ MECH6XXX+ METL6XXX+ MTEN6XXX+ PHYS6XXX+	Coursework Including the focus area, complete a minimum of 18 credits of graduate coursework from the disciplines listed. (C min)	9 - 48
CS EECE	7000+ level courses Take at least nine of the 18+ credits in courses at 7000+ level or above. (C min)	9 - 12

Research requirements with a Master's degree
Students are required to complete a minimum of 30 credits of research / thesis. Up to 6 credits can be from EECE 9080.

Course	Title/Desc	Credit
EECE9080	Doctoral Dissertation Proposal	1 - 6
EECE9089	Thesis or Dissertation Research	1 - 18

Dissertation and defense

PhD students must successfully complete and defend a dissertation. The oral defense of the dissertation takes place after the student has completed required coursework. A successful oral defense of the dissertation is required in order for a student to be admitted into PhD candidacy. The written proposal must follow guidelines for federal funding agencies. The final defense should occur within 4 years of the student becoming a PhD candidate.

Focus Areas

(9-21 credit hours)

Sensors & Microsystems focus area

Complete 3 of the courses listed

Course	Title/Desc	Credit
EECE6007	Biomedical Microsystems (C min)	3
EECE6008	Fundamentals of MEMS (C min)	3
EECE6018	Microfabrication of Semiconductor Devices (C min)	3
EECE6088	Nanoelectronic Devices for VLSI Technologies (C min)	3
EECE6041C	Microfabrication Lab for Semiconductor Devices andMEMS (C min)	3
EECE6050	Compound and Organic Semiconductor Physics (C min)	3
EECE6051	Introduction to Sensors (C min)	3

Systems focus area

Complete 3 of the courses listed

Course	Title/Desc	Credit
EECE6019	Probability and Random Processes (C min)	3
EECE6024	Introduction to Digital Signal Processing (C min)	3
EECE6036	Intelligent Systems (C min)	3
EECE6026	Introduction to Communication Systems (C min)	3
EECE7033	Linear Systems Theory (C min)	3
EECE6016C	Electric Machines and Drives (C min)	4
EECE6036	Intelligent Systems (C min)	3
EECE6042	Digital Image Processing (C min)	3

VLSI focus area

Students complete the following required courses

Course	Title/Desc	Credit
EECE6080C	Introduction to VLSI Design (C min)	4
EECE6082C	VLSI Design for Test and Power (C min)	4
EECE6086C	VLSI Design Automation (C min)	4

VLSI electives

VLSI students choose 2 of the following elective courses.

Course	Title/Desc	Credit
EECE6007	Biomedical Microsystems (C min)	3
EECE6008	Fundamentals of MEMS (C min)	3
EECE6016C	Electric Machines and Drives (C min)	4
EECE6018	Microfabrication of Semiconductor Devices (C min)	3
EECE6019	Probability and Random Processes (C min)	3
EECE6024	Introduction to Digital Signal Processing (C min)	3
EECE6030	Trust in Digital Hardware (C min)	3
EECE6036	Intelligent Systems (C min)	3
EECE6048C	Optics for Engineers (C min)	3
EECE6088	Nanoelectronic Devices for VLSI Technologies (C min)	3
EECE6026	Introduction to Communication Systems (C min)	3

Post BS Requirements

Students who are admitted directly into the PhD program without a master's degree must complete a minimum of 30 credits of coursework, a minimum of 49 credits of research, 2 credits of seminar and 1 credit of practical experience. For the 30 credits of coursework: complete the courses from a focus area. of the 30 credits 9 must be at 7000+ level. The minimum total credits for coursework plus research / thesis must equal 90.

Coursework requirement without a Master's degree

Students complete at least 30 credit hours from approved disciplines. At least 15 of those credit hours must be at the 7000+ level.

Course	Title/Desc	Credit
CS6XXX+ EECE6XXX+ MECH6XXX+ METL6XXX+ MTEN6XXX+ PHYS6XXX+	Technical electives Students complete the remaining credits by selecting graduate credits from the disciplines shown. At least 9 credit hours must be 7000+ level. (C min)	15 - 60
CS7XXX+ EECE7XXX+ MECH7XXX+ MTEN7XXX+ PHYS7XXX+	7000+ level courses Of the 30 credit hours in technical electives, at least 9 credits need to be at 7000+ level. (C min)	15 - 18

Research requirements without a Master's Degree

Students are required to complete a minimum of 49 credits of research / thesis. Up to 6 credits can be from EECE 9080.

Course	Title/Desc	Credit
EECE9080	Doctoral Dissertation Proposal	1 - 6
EECE9089	Thesis or Dissertation Research	1 - 18

Course	Title/Desc	Credit
EECE6041C	Microfabrication Lab for Semiconductor Devices andMEMS (C min)	3
EECE6042	Digital Image Processing (C min)	3
EECE6050	Compound and Organic Semiconductor Physics (C min)	3
EECE6051	Introduction to Sensors (C min)	3
EECE7033	Linear Systems Theory (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Engineering Education

Duration: **3 Years** Award: **PHD**

Overview

The University of Cincinnati's graduate degree in Engineering Education will prepare students to design and execute a research agenda that advances the knowledge base in engineering education, while in parallel advancing their expertise within a technical engineering discipline of their choice. In addition, each student will specialize in one of three focus area options: higher education in engineering, engineering education in PreK-12 levels (formal and informal environments, for- or non-profit), or engineering industry and workforce development. A degree in engineering education can lead to a career in academia, industry, or government.

Engineering education research, as a discipline, builds on the theories, methods of inquiry, and ways of knowing that have been and continue to be developed in related disciplines - including anthropology, diversity equity and inclusion studies, economics, education, neuroscience, philosophy, political science, psychology, and sociology, along with education research in science, technology, and mathematics - through the lens of engineering. Students will be introduced to theories related to the teaching and learning of engineering, the applications of pedagogy and assessment, as well as develop advanced knowledge on research methods, including quantitative, qualitative and mixed methods of inquiry.

Career

The Ph.D. ENED program will prepare graduates for careers: at universities (traditional technical disciplines and/or departments of engineering education); at community colleges; in PreK-12 schools; in for-profit and non-profit organizations (e.g., testing organizations, foundations, governmental agencies); in programmatic roles (e.g., assessment and accreditation coordinators, curriculum designers, policy makers, program officers); as corporate trainers and other workforce development positions; and as directors of teaching/learning centers, diversity programs, or outreach programs.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
20DOC-ENED-PHD-2024

UC Advantages And Special Opportunities

The Ph.D. ENED program at UC is differentiated from other similar programs in four ways:

1. The program has a strong emphasis on developing in-depth educational research skills (based on research methodology coursework requirements).
2. The program requires students to advance their level of expertise within their technical engineering discipline.
3. Thee program allows students to choose one of three focus areas depending on their background and goals: higher education in engineering, engineering education in PreK-12 levels (formal and informal environments, for- or non-profit), or engineering industry and workforce development (to the best of our knowledge, workforce development is not an explicit emphasis in any of the existing M.S. or Ph.D. programs at other institutions).
4. The program leverages the strong foundation of experiential learning within the College of Engineering and Applied Science (CEAS) by requiring students to complete a reflective experiential activity.

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA of at least 3.0 in a Bachelor's or Graduate degree program in engineering, mathematics, or the physical sciences from a college or university regarded as standard by a regional or general accrediting agency
- Research Statement - (1-3 pages) should describe your research interests (see below), with specific reference to the research area(s), engineering education research methodology, and focus area. You may choose to build on or tie in prior research experience. This statement is used by the faculty as an example of your writing, to help gauge your potential to effectively engage in research at this degree level, and to help determine if the Engineering Education program is a good fit.
- Statement of Purpose - (1-2 pages) should include brief narratives about: a) your academic, professional, and previous research experiences (if not discussed in your research statement); b) your immediate and long-range aspirations; c) how the Engineering Education program will help you to meet your goals; and d) any additional information you feel strengthens your application (e.g., your perspective on the relationship between educational research and teaching/learning). This statement is used by the faculty as an example of your writing and to help determine if the Engineering Education program is a good fit.

- **Curriculum Vita (resume) -** should include your name(s), a phone number, e-mail address, and colleges attended with degrees and dates. Also include, if applicable, employment history, honors and awards, publications and presentations, and relevant professional experiences (e.g., research, teaching/tutoring, service). Your CV does not need to be structured with these sections and is not limited to these items.
- Two letters of recommendation.
- International students - English Proficiency Test: TOEFL (minimum 92) or IELTS (minimum 6.5)

Description of Engineering Education Research Areas:

- **Engineering Epistemologies**: research on what constitutes engineering now and into the future
- **Engineering Learning Mechanisms**: research on developing engineering learners' knowledge and expertise
- **Engineering Learning Systems**: research on the instructional culture and knowledge required of engineering educators
- **Engineering Diversity and Inclusiveness**: research on how diverse human talents contribute to the social and global relevance of our profession
- **Engineering Education Assessment and Research Methodologies**: research on, and the development of, the quantitative, qualitative, and/or data scientific aspects of engineering education (i.e., how theories are studied, designed for, and assessed), including assessments, instruments, and protocols

Description of Engineering Education Research Methodologies:

- **Quantitative Research** emphasizes objective measurements and the statistical, mathematical, or numerical analysis of data.
- **Qualitative Research** seeks to produce in-depth descriptions and interpretations of human behaviors and experiences based primarily on the words of selected individuals (e.g., through interviews) and/or through the interpretation of actions (e.g., observations) or artifacts (e.g., analysis of documents).
- **Mixed Methods Research** is characterized by (among other features) drawing on the strengths of both quantitative and qualitative methods for generating possible solutions or holistic understandings of the problem that may not have been possible using either method by itself.

Description of Engineering Education Graduate Program Focus Areas:

- **Higher Education in Engineering**: Research will focus on higher education contexts (e.g., undergraduate students, graduate students, faculty).
- **Engineering Education in PreK-12**: Research will focus on PreK-12 contexts (e.g., students, parents, teachers, administration; formal and informal environments, for- or non-profit). (Note: This focus area does not lead to teacher licensure.)
- **Engineering Industry and Workforce Development**: Research will focus on industry and workforce development contexts (e.g., practicing engineers; management; translating among technical content, management, leadership, and andragogy).

Application Deadlines

Application deadlines and additional application information can be found at the CEAS Office of Graduate Studies.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Engineering Education

PHD

20DOC-ENED-PHD-2024

Duration: 3 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 60 Credits

Required courses (except for students with MS Engineering Education)

Unless students have an MS in Engineering Education, they must complete the following courses.

Required courses (except for students with MS Engineering Education)

Course	Title/Desc	Credit
ENED7001	Introduction to Engineering Education and Research	3
ENED7005	Engineering Education Research Design	2
ENED7006	Ethical Considerations in Conducting Human Subjects Research in Engineering	1

Focus Area and/or Technical Electives

Students with a previously earned MS ENED need 9 credits; students with a previously earned MS in engineering or STEM (non-ENED) need 6 credits. Students with only a BS need 18-24 credits.

Focus Area and/or Technical Electives Courses

Course	Title/Desc	Credit
CI8002	Attitude Formation and Change in the Classroom (C min)	3
CI9003	Theory, Ethics, Application of Research in Teaching (C min)	3
CI9005	Policy Issues in Teaching and Learning (C min)	3
EDLD8016	Educational Policy Analysis (C min)	3
EDLD8036	Curriculum Development and Data Analysis (C min)	3
EDLD8061	Finance in Higher Education (C min)	3
EDLD8062	Educational Equity and Diversity in Higher Education (C min)	3
EDLD8063	Organization and Administration in Higher Education (C min)	3
EDLD8065	Governance & Policymaking in Higher Education (C min)	3
MGMT8084	Cultural Intelligence in Human Resources (C min)	2
MGMT8087	Talent Acquisition and Staffing (C min)	2
OLHR8029	Individual Behavior in the Workplace (C min)	3
OLHR8076	Employee Development and Training (C min)	2 - 3
OLHR8084	The Diverse Workforce (C min)	2 - 3

ENED 7099 Engineering Education Seminar: Required for all

ENED 7099 Engineering Education Seminar

Course	Title/Desc	Credit
ENED7099	Engineering Education Seminar	0 - 1

Course	Title/Desc	Credit
AE6XXX+ AEEM6XXX+ BME6XXX+ CHE6XXX+ CS6XXX+ CVE6XXX+ EECE6XXX+ EGFD6XXX+ ENVE6XXX+ MECH6XXX+ MTEN6XXX+	Technical Electives	0 - 12

Advanced Educational Research Methods

Students with a previously earned MS ENED take 9 credits in this category. Students without a MS in ENED take 12 credits. (This includes students with no previously earned master's or a master's in an engineering or STEM degree.

Advanced Educational Research Methods Course Options

Students focusing on quantitative methods should complete EDST 7011 or PSYC 7015, not both. Mixed methods students must enroll in EDST 7011 and EDST 8051 in order to be eligible to take EDST 8081, followed by EDST 8082.

Course	Title/Desc	Credit
EDST7011	Statistical Data Analysis II (C min)	3
EDST7043	Practitioner Action Research (C min)	3
EDST7045	Community-Based Participatory Research (C min)	3
EDST8041	Multivariate Data Analysis (C min)	3
EDST8051	Qualitative Research Methods I (C min)	3
EDST8053	Feminist Qualitative Methodologies (C min)	3
EDST8081	Mixed Methods Research I (C min)	3
EDST8082	Mixed Methods Research II (C min)	3
EDST8086	Experimental and Quasi-Experimental Research (C min)	3
EDST8087	Multilevel Models for Educational Research (C min)	3
EDST8088	Item Response Theory (C min)	3
ENED7004	Instrument Design and Validation (C min)	3
ENED7010	Quantitative Research Methods I in Engineering Education (C min)	3
PSYC7015	Graduate Statistics II (C min)	3

Research hours: ENED 8080 or ENED 8089

Students with a BS only need 48-54 research hours. Students with an MS ENED need 42 research hours; students with an MS in engineering or STEM need 36 research hours.

Research hours

Course	Title/Desc	Credit
ENED8080	Doctor of Philosophy Research	1 - 15
ENED8089	Doctor of Philosophy Dissertation Research	1 - 15

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Engineering

Duration: **5 Years** Award: **PHD**

Overview

The Environment Engineering graduate program is accredited at the advanced level by ABET and is ranked second nationally in the 1996 Gourman Report. Some programs are available on a part- time basis. The programs, their faculty, course work and research facilities and activities are described in detail in an information package from the department. The Department of Biomedical, Chemical, and Environmental Engineering offers the degrees of Master of Science and Doctor of Philosophy in Environmental Engineering and Environmental Science. The environmental engineering and science programs offer specializations in air pollution control/air quality, water quality processes, hazardous waste engineering and management, environmental hydrology and environmental engineering management.

Environmental Engineering

PHD

Environmental Engineering PHD 2019

Duration: 5 Years
Post Baccalaureate Minimum Credits: 94 Credits
Post Master's Minimum Credits: 60 Credits

Environmental Engineering PhD (post Master's)

Students pursuing a PhD after earning a master's degree must complete 12 credits of coursework and 48 credit hours of research. For students in Air Quality focus area, the PhD qualifying exam will include test questions from ENVE 6094 & 6064 and one of the following with advisor approval: ENVE 6047, 6053, 6071C, or 6022C. For Hydrosystems, test questions will come from ENVE 6026 & 6094 and CVE 6090. For Water Quality, test questions will come from ENVE 6047, 6053, and 6094.

Coursework

Students consult with their faculty advisor to select 12 credits of coursework which will complement their research area and satisfy any requirements imposed by the PhD qualifying exam.

Course	Title/Desc	Credit
6XXX+	Select courses in consultation with advisor (C min)	12 - 15

Research Hours (Post MS)

For students who have already completed a master's, at least 48 research credits are required.

Course	Title/Desc	Credit
ENVE8099	MS/PHD RESEARCH	1 - 15

Air Quality Focus Area (post baccalaureate)

Students without a master's degree need to complete master's degree course requirements in their focus area plus 12 additional credits in consultation with one's advisor.

Air Quality Requirement (post baccalaureate)

Students take both of the following courses.

Course	Title/Desc	Credit
ENVE6064	Air Resources Management (C min)	3
ENVE6022C	Atmospheric Chemistry and Monitoring (C min)	3

Hydrosystems Requirement (post baccalaureate)

Students choose one of the following courses.

Course	Title/Desc	Credit
CVE6090	Engineering Hydrology (C min)	3
ENVE6026	Environmental/Hydrologic Systems Analysis (C min)	3

Water Quality Requirement (post baccalaureate)

Students choose one of the following courses.

Course	Title/Desc	Credit
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3
ENVE6000	Applied Biology for Engineers (C min)	3

Lab Requirement (post baccalaureate)

Students enroll in following course.

Course	Title/Desc	Credit
ENVE6058C	Environmental Instrumentation (C min)	3

Focus Area Electives (post baccalaureate)

Students choose one of the following with advisor approval.

Course	Title/Desc	Credit
ENVE6071C	Aerosol Science, Engineering, and Control (C min)	4
ENVE6075	Air Quality Modeling and Data Analysis (C min)	3

Water Quality Focus Area (post baccalaureate)

Students without a master's degree need to complete master's degree course requirements in their focus area plus 12 additional credits in consultation with one's advisor.

Water Quality Requirement (post baccalaureate)

Students enroll in both of the following courses.

Course	Title/Desc	Credit
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3

Air Quality Requirement (post baccalaureate)

Students enroll in the following course.

Course	Title/Desc	Credit
ENVE6064	Air Resources Management (C min)	3

Hydrosystems Requirement (post baccalaureate)

Students choose one of the following courses.

Course	Title/Desc	Credit
CVE6090	Engineering Hydrology (C min)	3
ENVE6026	Environmental/Hydrologic Systems Analysis (C min)	3

Lab Requirement

Students enroll in the following course.

Course	Title/Desc	Credit
ENVE6058C	Environmental Instrumentation (C min)	3

Focus Area Electives

Students choose one of the following with advisor approval.

Course	Title/Desc	Credit
ENVE6054	Physical Chemical Processes for Water Quality Control (C min)	3
ENVE6055	Biological Processes for Water Quality Control (C min)	3
6XXX+	Any appropriate 6000+ level course approved by advisor (C min)	3 - 4

Course	Title/Desc	Credit
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3
ENVE6000	Applied Biology for Engineers (C min)	3
GEOG6071C	Introduction to Geographic Information Sciences (C min)	3
PLAN6071	Introduction to Geographic Information Systems (C min)	3
6XXX+	Any appropriate 6000+ level course approved by advisor (C min)	3 - 4

Course	Title/Desc	Credit

Additional Coursework Beyond Master's Requirements

Students take 12 additional courses beyond the MS curriculum. The courses should be selected in consultation with the student's advisor.

Course	Title/Desc	Credit
6XXX+	Additional 6000+ level courses (C min)	12 - 15

Additional Coursework Beyond Master's Requirements

Students take 12 additional courses beyond the MS curriculum requirement. The courses should be selected in consultation with the student's advisor.

Course	Title/Desc	Credit
6XXX+	Additional 6000+ level courses (C min)	12 - 15

Environmental Engineering PhD (post baccalaureate)

Students who matriculate directly into the PhD without a master's degree must complete all master's degree course requirements in their focus area plus an additional 12 credits of coursework and a total of 58 research credits.

Seminar

Students enroll in ENVE 7005 once and ENVE 6076 twice (once in fall and once in spring semesters).

Course	Title/Desc	Credit
ENVE7005	Safety, Facilities, & Resources Seminar for Environmental Engineering & Science	1
ENVE6076	Advanced Seminar in Environmental Engineering and Science	1
ENVE6076	Advanced Seminar in Environmental Engineering and Science	1

Research Hours

Students without a master's enroll in at least 58 research credits in their advisor's section of ENVE 8099.

Course	Title/Desc	Credit
ENVE8099	MS/PHD RESEARCH	1 - 15

Math Requirement

Students without a master's need to complete a math requirement.

Course	Title/Desc	Credit
ENVE6094	Probability and Estimation Methods for Engineering Systems (C min)	3

Hydrosystems Focus Area

Students without a master's degree need to complete master's degree course requirements in their focus area plus 12 additional credits in consultation with one's advisor.

Hydrosystems Requirement (post baccalaureate)

Students enroll in both courses.

Course	Title/Desc	Credit
CVE6090	Engineering Hydrology (C min)	3
ENVE6026	Environmental/Hydrologic Systems Analysis (C min)	3

Air Quality Requirement (post baccalaureate)

Students enroll in the following course.

Course	Title/Desc	Credit
ENVE6064	Air Resources Management (C min)	3

Water Quality Requirement (post baccalaureate)

Students choose one of the following courses.

Course	Title/Desc	Credit
ENVE6047	Chemical Principles of Environmental Systems (C min)	3
ENVE6053	Physical Principles of Environmental Systems (C min)	3
ENVE6000	Applied Biology for Engineers (C min)	3

Course	Title/Desc	Credit

Course	Title/Desc	Credit

Lab Requirement (post baccalaureate)

Students choose one of two versions of Intro to GIS.

Course	Title/Desc	Credit
GEOG6071C	Introduction to Geographic Information Sciences (C min)	3
PLAN6071	Introduction to Geographic Information Systems (C min)	3

Focus Area Electives (post baccalaureate)

Students choose one of the following with advisor approval.

Course	Title/Desc	Credit
ENVE6050	Civil and Environmental Infrastructure Systems Planning Under Uncertainty (C min)	3
STAT6041	Time Series (C min)	3
STAT6043	Applied Bayesian Analysis (C min)	3
6XXX+	Any appropriate 6000+ level course approved by advisor (C min)	3 - 4

Additional Coursework Beyond Master's Requirements

Students take 12 additional courses beyond the MS curriculum. The courses should be selected in consultation with the student's advisor.

Course	Title/Desc	Credit
6XXX+	Additional 6000+ level courses (C min)	12 - 15

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Materials Science

Duration: **4.5 Years** Award: **PHD**

Overview

The Materials Science and Engineering department offers Doctor of Philosophy (PhD), Master of Science (M.S.), and Master of Engineering (MEng) degrees in Materials Science and Engineering (MSE). The PhD program comprises primarily the sub-fields of metals, polymers, and ceramics, together with composites, electronic, photonic, bio and functional materials. The research focus areas of the MSE program are diverse including additive manufacturing; high temperature and lightweight alloys; shape memory alloys; functional thin films, magnetic materials, polymer structures and interfacial properties, scattering theory and experiments; conducting polymers and composites; biomaterials; nano materials and nano photonics, carbon nanotubes and graphene, smart materials; soft matter; energy materials, and nano biomedicine.

The research on metallurgical and ceramic science and engineering deals with a wide range of fundamental materials issues relating to phase transformations, microstructure evolution and mechanical properties, including fatigue, creep, fracture, and wear and how they are impacted by processing. Some examples of research areas include gas-phase alloying and sintering kinetics of 3D printed metallic materials; in-situ monitoring of sensitization and environmental cracking mechanisms of aluminum alloys; advanced mechanical surface treatment effects on mechanical properties, corrosion and stress corrosion cracking of lightweight, high temperature and nuclear alloys; design of alloys for extreme environments; and thermodynamic and computational modeling. Processing of metals and ceramics is another important emphasis of materials research such as powder metallurgy, ceramic sintering, thin film deposition, solidification and additive manufacturing processes like laser powder bed fusion.

Polymer materials research is principally in the areas of synthesis, processing, structure and property characterization. Advanced functional polymeric materials with structural hierarchy are investigated and developed for fundamental studies and application in extreme conditions: high pressure, temperature, corrosion, and dynamic stresses. The hierarchically-organized materials typically display elemental entities of different structural dimensions, characteristic length scales, and unique properties, and consist of nanoparticle interfaces with metals/ceramics, soft matter, and biological cells. Novel processing of nanomaterials is also used to create new composite materials with improved properties.

Career

The Doctor of Philosophy (PhD) degree in the Materials Science and Engineering Program is a four to six-year program that entails two years of coursework and research and the remainder focused on a specific research project. The PhD degree targets a career in research and development and/or teaching. Many graduates of the program have risen to be leaders and directors of research in major international corporations, national labs and university faculty members. Each year students generally publish one first-author peer-reviewed paper and present their work at one national conference. A written qualifier exam is required in four topical areas associated with the student's area of specialization. A research proposal is also presented for qualification. The degree culminates in a dissertation and oral defense.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
20DOC-MTSC-PHD

UC Advantages And Special Opportunities

The MSE program, in combination with the Advanced Materials Characterization Center and other Centers and laboratories has excellent facilities for materials processing, testing and characterization. Through their research projects and these facilities, students will have opportunities to learn the use of modern instrumental techniques including advanced processing, mechanical testing systems, scanning and transmission electron microscopy, compositional analysis, small-angle and wide-angle X-ray diffraction, Raman scattering, infrared and X-ray photoelectron infrared spectroscopy.

Materials Science

PHD

20DOC-MTSC-PHD

Duration: 4.5 Years
★Post Baccalaureate Minimum Credits: 96 Credits
★Post Master's Minimum Credits: 66 Credits

Materials Science PhD

Without a master's degree, students complete at least 90 credits. With a master's degree, students complete at least 60 credits.

Research hour requirements for PhD students entering with a master's degree

Students entering the PhD program with an approved master's degree must complete at least 30 credit hours of research.

Course	Title/Desc	Credit
MTEN9071	MS and PhD research in Materials Engineering	1 - 15

Research hour requirements for PhD students entering with a bachelor's degree

Students entering the PhD program with only a bachelor's degree must complete at least 60 credit hours of research.

Course	Title/Desc	Credit
MTEN9071	MS and PhD research in Materials Engineering	1 - 15

Materials Science PhD Core Courses

Students must choose complete 5 core courses in one of two options: metallurgy/ceramics or polymers.

Metallurgy/Ceramics Option

Students who choose the metallurgy/ceramics option must select five core courses for a total of 15 credit hours from the following courses.

Course	Title/Desc	Credit
MTEN7035	Advanced Thermodynamics	3
MTEN6097	Mechanical Behavior of Materials	3
MTEN6020	Materials Kinetics	3
MTEN7048	Crystallography and Diffraction	3
MTEN7010C	Materials Characterization	3
MTEN6070	Phase Transformations	3

Polymers Option

Students who select the polymers option must select five courses for a total of 15 credit hours from the following courses.

Course	Title/Desc	Credit
MTEN6034	Polymer Physics	3
MTEN7035	Advanced Thermodynamics	3
MTEN7032C	Polymer Analysis and Characterization	3
MTEN7094	Fundamentals of Polymer Science	3
MTEN7048	Crystallography and Diffraction	3
MTEN7010C	Materials Characterization	3

Materials Science Graduate Seminar

PhD students are required to enroll in one credit of the department's seminar course for the first six semesters of their degree. Attendance is mandatory and required for a PASS grade.

Course	Title/Desc	Credit
MTEN8071	Seminar in Materials Engineering	1

Materials Science PhD Other Courses

Students must complete 15 additional credit hours beyond the core courses. Nine credit hours must be from MTEN graduate level courses; the remaining 6 credits hours must be approved by the Materials Science department.

Course	Title/Desc	Credit
MTEN6XXX+	MTEN elective courses	9
6XXX+	Electives approved by advisor	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Mechanical Engineering

Duration: **5 Years** Award: **PHD**

Overview

The Mechanical Engineering graduate program in the Department of Mechanical and Materials Engineering (MME) offers both MS and PhD degrees. The PhD degree requires the completion of a dissertation in addition to the course credit hour requirements and qualifying exams.

Graduate level courses in core Mechanical Engineering areas as well as in emerging areas are offered. Academically, the program is grouped into research foci consisting of: (1) Structural Dynamics and Acoustics; (2) PHM, Intelligent Systems and Reliability Engineering; (3) Advanced Manufacturing; (4) Engineering Simulation and Applied Mechanics; (5) Nano-Technology and Bio-Medical Engineering; (6) Therma-Fluid and Enhanced Heat Transfer; (7) Advanced Materials Research.

Career

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Mechanical Engineering Ph.D.

UC Advantages And Special Opportunities

The Department has state-of-the-art research laboratories in Vibrations and Acoustics, Computational Mechanics, Nanotechnology, Manufacturing, Computational Fluid Dynamics, Thermal Processing and Thermal Fluids, Heat Mass Transfer, Fuel-Cells and Microscale Flow, and Heat Transfer. Currently, five major research centers are housed in the Department of Mechanical and Materials Engineering, which provide many opportunities for students and faculty to engage in scholarly research and knowledge creation. These are:

1. NSF Industry-University Cooperative Research Center for Intelligent Maintenance Systems
2. UC Simulation Center - a UC/P&G Collaboratory
3. Siemens Simulation Technology Center
4. NSF Engineering Research Center for Revolutionizing Metallic Biomaterials
5. Additive Manufacturing Center
6. Laser Shock Peening (LSP) Center

In addition, faculty in MME receive research funding from national agencies (NSF, DOE, NASA, DOD, EPA) as well as numerous industries. Research assistantships and teaching assistantships are available on a competitive basis.

Admission Requirements

- GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
- Transcript(s) and Degree Certificates (unofficial transcripts are used for admissions review, only admitted applicants submit official transcripts)
- GPA minimum 3.0 or equivalent
- Statement of Purpose
- Two letters of recommendation
- International students - English Proficiency Test: TOEFL (minimum 92) or IELTS (minimum 6.5)

Application Deadlines

Application deadlines and additional application information can be found at the CEAS Office of Graduate Studies.

Mechanical Engineering

PHD

Mechanical Engineering Ph.D.

Duration: 5 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 60 Credits

Completion of MS Requirements

Students without an MS are required to complete all MS degree requirements while enrolled in the PhD program and receive an MS degree. These include 12 credits of thesis and 18 credits of coursework.

Course	Title/Desc	Credit
MECH9015	Research/Thesis (C min)	12 - 15
6XXX+	Mechanical Engineering MS Coursework Coursework other than research/thesis, special topics, or graduate seminar. A minimum of 12 credit hours of MECH or EGFD coursework; plus 3 credits of advanced mathematics and 3 elective credits approved by thesis advisor.	18
	MS Thesis Defense Students are required to defend and pass their thesis defense.	0

PhD Coursework

After completing the MS requirements, students must complete a minimum of 18 graduate credits of coursework

Course	Title/Desc	Credit
EGFD6XXX+ MECH6XXX+	Mechanical PhD Courses A minimum of 12 credits of mechanical engineering courses (MECH or EGFD) beyond the master's requirements. Research (MECH9020), topics in mechanical engineering (MECH9021), dissertation (MECH9030), and seminar credits (MECH9022) do not count towards this requirement. The remaining course credits must be approved by the student's advisor.	12 - 15
MATH6XXX+	Advanced Math course A minimum of 3 credits in advanced math beyond the MS requirement	3 - 6

PhD Research/Dissertation

Students are required to complete a minimum of 42 research/dissertation credit hours beyond the MS requirements.

Course	Title/Desc	Credit
MECH9030	PhD Dissertation (C min)	1 - 15

Graduate Seminar

Full-time students are required to register for the graduate seminar all semesters in which the student maintains full-time status. These credits are not counted in the total for the degree.

Course	Title/Desc	Credit
MECH9022	Graduate Seminar	1

PhD Fundamentals Exam

Students are required to pass the PhD qualifying exam.

Course	Title/Desc	Credit
MECH9031	PhD Fundamentals Exam	0

PhD Dissertation Defense

Students must complete and successfully defend a PhD dissertation. This includes both written and oral components, as well as meet publication requirements.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Blockchain Technology

Duration: **1 Year** Total Credits: **15** Award: **Certificate**

Overview

This undergraduate certificate in blockchain technology is appropriate for students in a wide range of disciplines. Major topics including crypto-economics, blockchain security, smart contracting and law and regulation of blockchain technology are covered. It does not require the completion of a senior project.

UC offers a technical, interdisciplinary curriculum centered in fields such as computer engineering, computer science, businees, and law.

Career

Many careers are emerging in blockchain technologies. Other traditional fields, especially in economics and business, are directly impacted by blockchain technology. Familiarity is a great value to those working in these areas.

Curriculum

LAW2014	Law and Regulation of Blockchain Technology (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

Duration: **2 Years** Total Credits: **16** Award: **Certificate**

Overview

As a student in the Computer Science Certificate program at the University of Cincinnati, you will gain the skills to design, analyze, and develop software solutions for problems in various science, engineering and business domains.

Some important aspects of computer science that a student will learn by completing this certificate are: Basic skills to write computer programs, proficiency in Python programming language, knowledge of data structures and basic algorithms, and some concepts from artificial intelligence, machine learning, operating systems, and cloud computing.

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Gain education and hands-on training on computational systems, software development, data science, and artificial intelligence.
- Customize your experience with many student organizations and events including ACM student chapter and programming hackathons.
- Build an impressive resume by complementing your major degree program with valuable, transferable computer science skills.

Career

STEM and Business careers need computing and data analysis skills.

Majoring

Any major can apply.

Curriculum

Major Map Versions:
Computer Science Certificate
Computer Science Certificate Curriculum

UC Advantages And Special Opportunities

Computer Science skills imparted by this certificate will make practicioners of all STEM and Business disciplines more effective in their respective domains.

Admission Requirements

Students admitted to the certificate program should have successfully completed courses in:

- English (4 units)
- Preliminary Computer Programming (ENED1100 or CS1005C)
- Mathematics including high school algebra, geometry and pre-calculus

Transferring To UC

This certificate program is open to all UC matriculated and non-matriculated students.

International Student Requirements

For additional information on international requirements, visit UC's International Admissions page.

Application Deadlines

Applications are accepted on a rolling basis.

Students should apply approximately 2 years prior to their expected graduation date.

Cyber Operations

Duration: **1 Year** Total Credits: **16 - 19** Award: **Certificate**

Overview

The focus of our technical, interdisciplinary undergraduate certificate program is to produce exceptional cybersecurity professionals with expertise in various disciplines of cyber operations related to specialized intelligence, military, and law enforcement — ultimately increasing the security of our nation.

Success

In June 2014, the National Security Agency and U.S. Cyber Command designated the University of Cincinnati (UC) as a National Center of Academic Excellence in Cyber Operations (CAE-CO) for five consecutive academic years.

UC is the thirteenth of eighteen CAE-COs and offers a technical, **interdisciplinary** curriculum centered in fields such as computer science, computer engineering, information technology, political science, and criminology. Our educational offerings covers the entire cybersecurity spectrum -- human behavior and strategic policy analysis, software and network integration, algorithm development, data encryption and information security analytics.

Career

Professional careers in Cyber Operations.

Curriculum

It is an intercollegiate program with participating faculty that teach one or more courses required by the program. They contribute modules on special topics and/or offer training and research opportunities

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Cyber Operations Certificate

UC Advantages And Special Opportunities

As an extension of President Obama's National Initiative for Cybersecurity Education, the CAE-CO's supports the government's effort to better protect cyberspace. "The nation increasingly needs professionals with highly technical cyber skills to help keep America safe today and to help the country meet future challenges and adapt with greater agility" according to Dr. Stephen LaFountain, Dean of the College of Cyber at the National Security Agency.

CS2028C	Data Structures (C- min)	4
EECE2080C	Engineering Data Structures (C- min)	2

Select one of the following.

Course	Title/Desc	Credit
CS4071	Design and Analysis of Algorithms (C- min)	3
EECE4040	Advanced Data Structures and Algorithms (C- min)	3

Required Courses

Complete the three courses below.

Course	Title/Desc	Credit
POL2035	Cybersecurity: National and International Strategy and Policy (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3
CS5155	Cyber Defense Overview (C- min)	3

Elective Courses

Select one of the tracks below.

Track 1: Cyber Attacks and Security
9 credits required

Course	Title/Desc	Credit
CS5138	Malware Analysis (C- min)	3
CS5156	Security Vulnerability Assessment (C- min)	3
EECE5129	Distributed Operating Systems and Algorithms (C- min)	3
	POL5035 or IT5035 Just one of these cross-listed courses can be applied. (C- min)	3

Track 2: Network and Data Security
9 credit required

Course	Title/Desc	Credit
CS5143	Computer Networking (C- min)	3
CS5152	Intelligent Data Analysis (C- min)	3
CS5153	Network Security (C- min)	3
CS5158	Data Security and Privacy (C- min)	3

Track 3: Hardware and Cyber-Physical Systems Security
11-12 hours required

Course	Title/Desc	Credit
EECE5117C	Advanced Embedded Systems (C- min)	4
EECE5130	Trust in Digital Hardware (C- min)	3
EECE5123C	Security & Trust for Cyberphysical Systems (C- min)	4
EECE5134C	Hardware Design with FPGAs: Secure and Trustworthy Systems (C- min)	4

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Engineering Project Management

Duration: **1 Year** Total Credits: **12** Award: **Certificate**

Overview

During their careers, many engineers will be charged with managing projects. Project management is vital to the completion of engineering projects within scope, budget, and timeframe. It involves planning, organizing, and overseeing the execution of projects, and it represents a systematic approach to ensure that projects are completed efficiently and effectively. The certificate in engineering project management will provide students the formal academic training to lead projects and teams. The certificate is constructed to provide essential knowledge and the flexibility to gain additional knowledge regarding principles and practices of project management that fit a variety of career objectives.

Career

Engineer project managers can find employment virtually in all industries such as information technology, construction, healthcare, aerospace, energy, finance, government and public sector, advanced manufacturing. Possible career paths include but are not limited to:

- Project coordinators
- Project managers
- Program managers
- Team leaders
- Business analysts
- Quality coordinators

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Pre-junior students in good standing.

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered. Transferability is based on school accreditation, course/content comparability, year taken, and final grade. Submit all official transcripts for every school attended. Learn more about requesting your transcripts.

For further detailed information such as required grade point average, please refer to the Transfer Students page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

Applications are accepted on a rolling basis.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Heavy Highway Construction

Duration: **1 Year** Total Credits: **14 - 15** Award: **Certificate**

Overview

The Heavy Highway Construction Certificate prepares civil engineering and construction management students for careers in the heavy highway sector. As a student, you will gain specialized skills to tackle design and construction issues on complex projects such as highways, bridges, interchanges, and other large-scale infrastructure projects. Graduates of this program will have opportunities to contribute to essential infrastructure projects that shape our communities and facilitate economic growth.

Program Highlights:

- Dual Tracks: Students will select from two tracks to follow, tailored to your career goals: **Construction Management Track** or **Construction Engineering Track**.
- Open to All: The certificate is open to **UC students of all majors** who meet the prerequisites; **non-UC students** who wish to add this valuable credential to their resumes; **professionals** who are seeking continuing education for engineering licenses or to enhance their technical skills.

Why choose the Heavy Highway Construction Certificate?

- Industry Demand: Address the skills shortage in heavy highway construction, sought after by contractors and state departments of transportation (DOT).
- Real-World Skills: Gain practical knowledge through project-based learning courses.
- Co-op Opportunities: Explore co-op positions within the heavy highway construction sector.
- Career Prospects: Stand out in the growing heavy highway construction field with specialized expertise.
- Versatility: In-depth knowledge gained from the certificate can be applied to related sectors.
- Stay on Track: Earn the certificate without extending your graduation date.
- Scholarship Opportunities: Potential access to scholarships from the Ohio Contractors Association (OCA), the Flexible Pavements of Ohio (FPO), and other contractors in heavy highway construction.
- Fulfill Your Degree: Courses for the certificate can be “double counted,” so UC students in construction management or civil engineering programs can take the certificate courses and also count them toward their degree with minimal additional effort. The certificate achievement will be recorded on your permanent transcript.

Certificate made possible through generous support from JR Jurgensen Company and several Ohio Contractors Association (OCA) members.

Career

The certificate prepares students and professionals from construction management and civil engineering to thrive in the growing heavy highway construction sector.

Software Engineering

Duration: **1 Year** Total Credits: **16 - 18** Award: **Certificate**

Overview

The focus of our technical undergraduate certificate program is to produce exceptional software engineering professionals.

This program covers the fundamentals of programming and software development, including computer and software design. Topics include algorithms, data structures, software development and other areas. Career areas that certificate holders may pursue include IT manager, software engineering assistant, or software publishing assistant, to name a few.

Career

Professional careers in Software Engineering.

Software Engineering

Certificate

Software Engineering

Duration: 1 Year

★Minimum Credits: 16 - 18 Credits

Prerequisite Courses

A student will not receive credit for taking both of the cross-listed courses in any of the pre-requisite course categories.

Select one, but not both, of these courses.

Course	Title/Desc	Credit
CS1021C	Computer Science 1 (C min)	4
EECE1080C	Programming for ECE (C min)	4

Select one, but not both, of these courses.

Course	Title/Desc	Credit
CS2028C	Data Structures (C min)	4
EECE2080C	Engineering Data Structures (C min)	2

Select one, but not both, of these courses

Course	Title/Desc	Credit
CS4071	Design and Analysis of Algorithms (C min)	3
EECE4040	Advanced Data Structures and Algorithms (C min)	3

Elective Courses-6 or more credit hours must be taken in addition to those counted toward the Bachelor Degree requirements

Select two courses from one of the Tracks below.

Track 1: Advanced Software Engineering

Course	Title/Desc	Credit
CS5127	Requirements Engineering (C min)	3
CS5128	Large Scale Software Engineering (C min)	3
CS5167	User Interface I (C min)	3
EECE5132	Software Testing and Quality Assurance (C min)	3

Track 2: Intelligent Software Development

Course	Title/Desc	Credit
CS5152	Intelligent Data Analysis (C min)	3
CS5165	Introduction to Cloud Computing (C min)	3
CS5154	Information Retrieval (C min)	3
CS5173	Deep Learning (C min)	3

Track 3: Embedded and Systems Engineering

Course	Title/Desc	Credit
MECH5131	Introduction to Robotics (C min)	3
EECE5117C	Advanced Embedded Systems (C min)	4
CS5168	Parallel Computing (C min)	3
EECE5123C	Security & Trust for Cyberphysical Systems (C min)	4

Required Courses

Course	Title/Desc	Credit
EECE3093C	Software Engineering (C min)	4
CS3003	Programming Languages (C min)	3
EECE4029	Operating Systems & Systems Programming (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Electronics and Computing

Duration: 1 Year Total Credits: 18 - 26 Award: Minor

Overview

Biomedical Electronics leads to new and innovative biomedical and biochemical instruments and analysis systems for environmental sensing, point-of-care testing, haptics and biosurgery, microfluidics and labs-on-a-chip, and proteomics and genomics. In Biomedical Computing, software and hardware are developed to organize and analyze medical and biological data.

Career

Minoring

Biomedical Electronics leads to new and innovative biomedical and biochemical instruments and analysis systems for environmental sensing, point-of-care testing, haptics and biosurgery, microfluidics and labs-on-a-chip, and proteomics and genomics. In Biomedical Computing, software and hardware are developed to organize and analyze medical and biological data.

Curriculum

Fall: Senior Project I--conducted as part of MDIEP (3 cr)

Spring: Senior Project II--conducted as part of MDIEP (3 cr)

Two required courses:

1. BME 3050 Medical Device Design I (3 cr)
2. INTR2099C Introduction to Innovation Transformation (3 cr)**

Two elective courses chosen from:

- EECE 6017C Embedded Systems (4 cr)
- EECE 6038C Advanced Microsystems (4 cr)
- EECE 6007 Biomedical Microsystems (3 cr)
- EECE 6008 Fundamentals of MEMS (3 cr)
- EECE 6078 Biomicrofluidic Systems (3 cr)
- BME 2050Medical Device Dissection (3 cr)
- BME 4050C Medical Device Design II (3 cr)

***can count as general elective in CompE and EE curricula; other courses outside EECS are in CEAS and can count as technical electives.*

Biomedical Electronics and Computing

Minor

Biomedical Electronics and Computing (MIN) Curriculum

Duration: 1 Year

★Minimum Credits: 18 - 26 Credits

Required Courses

For BME majors - two courses required

Course	Title/Desc	Credit
BME3050	Medical Device Design I (C- min)	3
PD2030	Inquiry to Innovation (C- min)	3

For EE majors - first required course.

Course	Title/Desc	Credit
PD2030	Inquiry to Innovation (C- min)	3

For EE majors - second required course.

Select one course

Course	Title/Desc	Credit
EECE5106C	Biomedical Instrumentation (C- min)	3
EECE5107	Biomedical Microsystems (C- min)	3

For all other majors- one course required

Course	Title/Desc	Credit
PD2030	Inquiry to Innovation (C- min)	3

Elective Courses

Two courses are required for EE or BME majors. Students in all other majors are required to take 3 BME courses in the table below.

Electives that can be taken by students in any major

Course	Title/Desc	Credit
BME5110	Biomedical Ultrasound	3
BME5111	Magnetic Resonance Imaging and Spectroscopy	3
BME5113C	Biomedical Signal and Image Processing Lab	4
BME5114	Introduction to Medical Imaging and Diagnostic Technology	3
	EECE4148C/BME4148C Optics: These are cross listed (identical) courses. Students may apply just one of these courses to this minor.	3

Electives that can be taken only by Electrical Engineering majors

Course	Title/Desc	Credit
EECE5108	Fundamentals of MEMS	3
EECE5117C	Advanced Embedded Systems	4
EECE5178C	Biomicrofluidic Systems	4
EECE5151	Introduction to Sensors	3

Capstone courses

Capstone courses for BME majors

Course	Title/Desc	Credit
BME5001	BME Senior Capstone I	6
BME5002	BME Senior Capstone II	6

Capstone courses for EE majors (Senior Design Option)

Course	Title/Desc	Credit
EECE5001	Electrical Engineering Senior Design I	3
EECE5002	Electrical Engineering Senior Design II	3

Capstone courses for students in all other majors.

Course	Title/Desc	Credit
	Capstone courses for all other majors requires the approval of the Biomedical Electronics & Computing faculty advisor.	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemical Engineering

Duration: 2 Years Total Credits: 21 Award: Minor

Overview

As a student in the chemical engineering minor program at the University of Cincinnati, you will explore chemical topics to enhance your degree. Courses will introduce you to petrochemicals, plastics, fibers, pharmaceuticals, microelectronics, energy and materials that work to improve today's society. With a minor in chemical engineering, your skills will translate to other fields that seek to solve environmental problems and produce new materials on a large scale.

Career

Chemical Engineering principles can be applied in a wide range of contexts and industries; Graduates with a background in Chemical Engineering are employed not only in traditional chemical manufacturing positions, but in positions involved with food and consumer products, biotechnology, pharmaceuticals, energy (including alternative energy and biofuels), advanced materials, electronics, addressing environmental concerns such as carbon capture and waste reclamation, pulp and paper, utilities (including water, waste treatment, power generation, and natural gas), aerospace, and research.

Minoring

Completing the Chemical Engineering minor will provide you with many of the core chemical engineering skills. You'll learn the core principles of material and energy balances; chemical engineering thermodynamics; momentum, heat, and mass transfer; and chemical reaction engineering, and will have the opportunity to gain additional skills in an elective area such as chemical separations, process controls, industrial chemistry, or another area approved by the department.

Chemical Engineering

Minor

Chemical Engineering Minor

Duration: 2 Years
★Minimum Credits: 21 Credits

Core Chemical Engineering courses (18 Units)
Students in Environmental Engineering may substitute ENVE4062 for CHE4062.

Course	Title/Desc	Credit
CHE2064	Material and Energy Balances (C- min)	4
CHE3022	Transport I (C- min)	4
CHE3062	Chemical Engineering Thermodynamics (C- min)	4
CHE3023	Transport II (C- min)	3
CHE4062	Chemical Reaction Engineering (C- min)	3

Chemical Engineering Elective
A minimum of 3 units from the following courses

Course	Title/Desc	Credit
CHE4061	Separation Processes (C- min)	3
CHE4071	Process Dynamics and Controls (C- min)	3
CHE4075	Special Projects in Chemical Engineering (C- min)	1 - 4
CHE5082	Industrial Chemical Processes (C- min)	3
CHE5099	Special Topics in Chemical Engineering (C- min)	1 - 3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Science

Duration: 1 Year Total Credits: 20 - 21 Award: Minor

Overview

The Computer Science Minor at the University of Cincinnati is appropriate for students in a wide range of disciplines. The program teaches students a thorough understanding of computer programming and major computing areas such as software engineering, databases, operating systems, and computer architecture. Computer Science is an asset in fields encompassing engineering, mathematics, the sciences, the social sciences, and bioinformatics. The program does not require the completion of a related senior project.

Computer Science

Minor

Computer Science Minor

Duration: 1 Year

★Minimum Credits: 20 - 21 Credits

Introductory Courses

Select one of the options below

Option 1: 8 credit hours required

Course	Title/Desc	Credit
CS1021C	Computer Science 1 (C- min)	4
CS2028C	Data Structures (C- min)	4

Option 2: 9 credit hours required

Course	Title/Desc	Credit
EECE1080C	Programming for ECE (C- min)	4
EECE2080C	Engineering Data Structures (C- min)	2
EECE4040	Advanced Data Structures and Algorithms (C- min)	3

Required Group

Two courses are Required

Six credit hours must be taken from this group. Course in excess of the two required in this Group may also be used to meet the Elective Group Requirement. requirement.

Course	Title/Desc	Credit
CS3003	Programming Languages (C- min)	3
CS4033	Artificial Intelligence: Principles and Applications (C- min)	3
CS4065	Computer Networks and Networked Computing (C- min)	3
CS4092	Database Design and Development (C- min)	3
EECE3093C	Software Engineering (C- min)	4
EECE4029	Operating Systems & Systems Programming (C- min)	3

Elective Group

At least 6 credit hours must be completed from this group.

Course	Title/Desc	Credit
EECE3026	Introduction to Computer Architecture & Organization (C- min)	3
EECE3093C	Software Engineering (C- min)	4
EECE4038C	Embedded System Design (C- min)	3
EECE4029	Operating Systems & Systems Programming (C- min)	3
EECE5129	Distributed Operating Systems and Algorithms (C- min)	3
EECE5131	Interconnection Networks (C- min)	3
EECE5132	Software Testing and Quality Assurance (C- min)	3
EECE5135	Information Theory (C- min)	3
EECE5136	Intelligent Systems (C- min)	3
EECE5146	Principles and Practice of Evolutionary Computing (C- min)	3
EECE5149	Topics in Applied Machine Learning (C- min)	3
EECE5183	Compiler Theory and Practice (C- min)	3
	Higher-level CS Excludes CS1005C, 2005C, 2021, 3001, 5001, and 5002 (C- min)	0 - 6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Construction Management

Duration: 2 Years Total Credits: 18 Award: Minor

Overview

The field of construction management encompasses all facets of the design-build-construct continuum.

The minor in construction management (CM) is intended to familiarize students in related fields (such as architecture, business, or planning) with the skills necessary to evaulate construction methods, theories, and practices, such as scheduling, estimating, and project controls.

Career

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
CM Minor

Admission Requirements

Admission to the CM minor is open to UC students who are not already majoring in Construction Mangement, Civil Engineering, or Architectural Engineering.

Graduation Requirements

Successful completion of the minor requires that the student meet two conditions:
1. Satisfy all UC Bachelor's Degree graduation requirements for a degree that is not Construction Management, Civil Engineering, or Architectural Engineering, and
2. Completed the CM courses required for the CM Minor with an average in-minor GPA of no less than 2.5 and no grade less than a "C."

Construction Management

Minor

CM Minor

Duration: 2 Years
★Minimum Credits: 18 Credits

CM Minor Required Courses

Course	Title/Desc	Credit
CM2003	Construction Safety (C min)	1
CM3034	Construction Estimating and Costing (C min)	3
	Note: In addition to the required courses listed here, students must also complete a 3-credit CM elective from the adjacent list.	0
CM1001	Construction Drawings I (C min)	3
CM2001	Construction Documents, Law & Project Delivery Systems (C min)	3
CM3035	Project Planning Scheduling and Control (C min)	3
CM2004	Construction Equipment (C min)	2
	GPA Requirement Students must complete all courses required for the CM Minor with an average in-minor GPA of no less than 2.5 and now individual course grade of less than a "C."	0
	Note re: Required CM Minor Courses Up to two required CM courses (6 credit hours) may be replaced by CM Electives with the approal of the Construction Management Program Chair.	0

CM Minor Electives (Must choose at least one)

Course	Title/Desc	Credit
CM3003	Construction Methods and Supervision (C min)	3
CM3030	MEP Systems for Constructors 1 (C min)	3
CM4001	Quality & Safety Management (C min)	3
CM3036	Productivity and Lean Principles (C min)	3
CVE5136	Value Engineering and Constructability (C min)	3
CVE5138	Leadership/Decision Making (C min)	3
CVE5142	Sustainable Construction and LEED (C min)	3
CVE5144	Construction Law (C min)	3
CVE5145	Heavy Highway Estimating (C min)	3
CVE5146	MEP Systems for Constructors 2 (C min)	3
CVE5147	Applied Data Analysis for Building Energy Efficiency (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electrical Energy and SmartGrid

Duration: 1 Year Total Credits: 20 - 22 Award: Minor

Overview

Electric power generation, monitoring and control are important not only in large power plants and distribution systems, but also in fields such as aerospace and renewable electric energy. Skills can be applied to problems such as setting up remote power systems on temporary air bases or space stations and developing intelligent power distribution systems for the communities of today and tomorrow.

Career

Minoring

Electrical Energy and SmartGrid

Minor

Electrical Engineering and Smart Grid Technology (MIN) Curriculum

Duration: 1 Year

Minimum Credits: 20 - 22 Credits

Select one course from two of the following three groups.

All Prerequisite courses require a minimum grade of C

Group 1

EECE5119 is a prerequisite for EECE5126

Course	Title/Desc	Credit
EECE5111	RF and Microwave Wireless Communications (C- min)	3
EECE5125	Power Electronics (C- min)	3
EECE5137C	Solar PV System Fundamentals (C- min)	4
EECE5155	Power System Protection (C- min)	3
EECE7020	Advance Electric Energy and Power Electronics (C- min)	3
ELTN4069C	Electric Power and Power Electronics Systems (C- min)	4

Group 2

EECE3071 is a prerequisite for EECE511C; ELTN2003C or 4016C for ELTN4015C; and ELTN1041C & 2003C for ELTN4041C.

Course	Title/Desc	Credit
EECE5115C	Instrumentation & Industrial Control (C- min)	4
EECE5128C	Intelligent Machine Design (C- min)	4
EECE5144C	Introduction to Mechatronics (C- min)	4
EECE5151	Introduction to Sensors (C- min)	3
ELTN4015C	Flexible Automation (C- min)	4
ELTN4041C	Data Acquisition and Measurements (C- min)	4

Group 3

ELTN2003C is a prerequisite for ELTN4056C; EECE5117C or EECE5138C for EECE5123C; and ELTN2047C for ELTN4057C.

Course	Title/Desc	Credit
ELTN4056C	Computer Networks (C- min)	4
ELTN4057C	Wireless Communications and Networks (C- min)	4

Required Courses

Fall Semester

Select one course

Course	Title/Desc	Credit
EECE5116C	Electric Machines and Drives (C- min)	4

ELTN4011	Senior Design I (C- min)	3
ELTN4012	Senior Design II (C- min)	3

Course	Title/Desc	Credit
ELTN4059C	Photovoltaic Electric Energy (C- min)	4

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electronic Technology

Duration: 2 Years Total Credits: 18 - 19 Award: Minor

Overview

The Electronic Technology Minor at the University of Cincinnati teaches students how to incorporate practical and hands-on knowledge of electric, electronic and electromechanical devices into engineering systems. Students get an in-depth look into analog electronics, programmable logic controllers, sensors and electromechanical devices. In addition to classroom learning, students participate in a laboratory setting for hands-on experience.

The Electronic Technology minor is for students of various disciplines with the exception of students majoring in Computer Engineering, Electrical Engineering, or Electrical Engineering Technology.

Career

After building on a foundation of fundamental courses in electric circuits, this minor offers more intensive instruction in analog electronics, programmable logic controllers, sensors and electromechanical devices. Laboratory components in courses required for thisminor provide necessary hands-on experience.

Course	Title/Desc	Credit
ELTN1042	Circuit Analysis I (C- min)	3
ELTN1043C	Circuit Analysis II (C- min)	4
ELTN2003C	Electronics (C- min)	4

Required Advanced Courses

Students must complete two of the follwing four.

Course	Title/Desc	Credit
ELTN4015C	Flexible Automation (C- min)	4
ELTN4016C	Electric Machinery (C- min)	4
ELTN4085C	Digital Signal Processing (C- min)	4
ELTN4041C	Data Acquisition and Measurements (C- min)	4

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Embedded Systems

Duration: 1 Year Total Credits: 19 - 20 Award: Minor

Overview

The Embedded Systems Minor at the University of Cincinnati teaches the combination of customized hardware and software to carry out a specific set of tasks. We benefit from many embedded systems daily in our cars, medical devices, consumer electronics, and smart home appliances. New applications for embedded systems are constantly being developed. Embedded systems developers must pay particular attention to safety, reliability, and security in the products they design.

Environmental Engineering

Duration: **1.5 Years** Total Credits: **19** Award: **Minor**

Overview

The Environmental Engineering minor is intended to give engineering students a focused introduction in either **water quality** or **air quality** areas of Environmental Engineering. It is designed for students who wish to augment their major engineering program with courses addressing important environmental problems facing modern society in developed and developing countries. The minor provides students with a greater depth of experience and understanding of the roles environmental engineers can play in dealing with environmental issues.

Learning Outcomes:

The educational goals of the Environmental Engineering minor are:

1. Gain a broad understanding of one of the two areas (water quality focus, or air quality focus) within the environmental engineering minor as it relates to and in support of current and future civilization both regional and worldwide.
2. Develop depth in their scientific and engineering understanding of environmental engineering.
3. Be able to apply their knowledge to solve societal problems related to water quality or air quality.

Materials Engineering

Duration: 1 Year Total Credits: 15 Award: Minor

Overview

The primary responsibility of most engineers is the design and manufacture of industrial components and products. These products, be it a machinery or device, are usually comprised of engineering materials. Thus, an essential component of any engineering project is materials science and engineering, regardless of the discipline involved.

Engineers with a background in materials science invariably find enhanced professional growth, and demonstrate greater versatility and employability. This is aptly illustrated by job listings in the state of Ohio, in which “Materials Engineering” is the second most common keyword after “Mechanical Engineering”. These numbers reflect a nationwide trend, as shown by the US Bureau of Labor Statistics, which projects a 9% annual growth rate for positions in materials engineering over the next decade. A program of study in materials engineering is thus increasingly relevant in any engineer’s educational experience and as a valuable, career-boosting component of a professional CV.

Career

Minoring

A program of study in materials engineering is increasingly relevant in any engineer’s educational experience and as a valuable, career-boosting component of a professional CV.

With these requirements, a Materials Engineering Minor program of study is valuable to all engineers and designers. The focus of this program is to increase students’ knowledge of materials so as to broaden their Co-Op choices and experiences, and to augment their job prospects. The minor is designed to be flexible so that diverse disciplines including all Engineering majors in CEAS at UC can tailor the courses taken under this program, as suited to their individual needs.

Curriculum

The minor consists of the following parts:

1. Two required basic courses: MTEN3076, Materials selection in design; and any one of the following thermodynamics courses: AEEM2022, CHE2064, CHE3062, CVE2005, MECH2010.
2. At least three total courses in materials at a basic or advanced level. These courses can be taken from any of MTEN 20xx, 30xx, 40xx, 50xx, 60xx levels, as long as at least one of them is at a 50xx level or below.
3. Two courses from a master list of approved courses in the individual programs. This list includes courses from engineering and the physical sciences that have significant materials content (ex: MECH2030 “Solid Mechanics” and AEEM1001/ENED1030 “Statics & Basic Strength of Materials”). This list will be continually updated.
4. Substitutions are possible when classes not listed are similar to those listed, or if a particular class is not available.

Materials Engineering

Minor

Materials Engineering (MIN) Curriculum

Duration: 1 Year

★Minimum Credits: 15 Credits

MTEN-MIN Required Courses

Two courses/ six units required

Course	Title/Desc	Credit
MTEN3076	Materials Selection in Design	3
	Thermodynamics Select one course from AEEM2022, CHE2064, CHE3062, CVE2005, MECH2010. or MET2060.	3

MTEN Electives

At least three undergraduate level MTEN courses are required. One can choose any three from the list below:

Course	Title/Desc	Credit
MTEN3010	Ceramic Materials	3
MTEN3012	Introduction to Metallurgy	3
MTEN3013	Soda Cans to Smart Phones: How It's Made	3
MTEN3050C	Materials Processing	3
MTEN3051C	Materials Testing in Design	3
MTEN4034	Polymer Chemistry	3
MTEN5110	Physical Properties of Solids	3
MTEN5112C	Nanostructured Materials Engineering	3
MTEN5113	Introduction to Smart Structures	3
MTEN5115	Emerging Functional Materials	3
MTEN5120	Materials Kinetics	3
MTEN5125C	Polymer Processing	4
MTEN5134	Polymer Physics	3
MTEN5142	Composite Materials	3
MTEN5160	Corrosion and Electrochemistry	3
MTEN5170	Phase Transformations	3
MTEN5197	Mechanical Behavior of Materials	3
	MTEN courses Other upper level (3000, 4000, and 5000-level) MTEN courses can meet this requirement.	0 - 9

One of these Cross-listed course may be used as one of your three MTEN Electives.

Course	Title/Desc	Credit
ENFD3008	Nanoscale Science and Technology	3
CHEM3008	Nanoscale Science and Technology	3
PHYS3008	Nanoscale Science and Technology	3

Electives from student's engineering major (Six units required)

Two courses from a master list of approved courses in the individual programs. This list includes courses from engineering programs that have significant materials content. Substitutions are possible when classes not listed are similar to those listed, or if a particular class is not available. Contact Materials Minor Director for assistance.

BME Majors

Course	Title/Desc	Credit
BME2020	Statics and Dynamics	3
BME2040	Solid Mechanics	3
BME4051C	Biomaterials In Medical Devices	3
BME5124	Joint Biomechanics and Measurement Methods	3
BME5130	Functional Tissue Engineering	3

CE Majors

Course	Title/Desc	Credit
CVE2003C	Construction Materials and Lab	3
CVE2031	Statics	2
CVE2032	Basic Strength of Materials	2
CVE5111	Advanced Strength of Materials	3

ME Majors

Course	Title/Desc	Credit
MECH2020	Statics and Particle Dynamics	3
MECH2030	Solid Mechanics	3

ASE Majors

Course	Title/Desc	Credit
AEEM1001	Statics & Basic Strength of Materials	3
AEEM3058	Solid Mechanics I	3
AEEM4058	Solid Mechanics II	3
AEEM5058	Aerospace Structures and Materials	4

EE Majors

Course	Title/Desc	Credit
EECE2077	Semiconductor Devices	3
EECE2050C	Network Analysis	5
EECE2070L	Electronics Laboratory I	1
EECE3080	Engineering Electromagnetics	4

CHE Majors

Note: If MTEN5134 is not selected as the MTEN elective, one may alternatively take CHE5134 as one of the electives in the chemical engineering curriculum.

Course	Title/Desc	Credit

Course	Title/Desc	Credit
CHE3010	Solar Power for Africa	3
CHE5134	Polymer Physics	3
CHE5156	Electrochemical Engineering and Electrocatalysis	3
CHE5157	Fuel Cells (I)	3
CHE5159	Inorganic Membranes	3
CHE5180	Nanocolloids and their Applications	3
CHE5198	Molecular Engineering of Functional Nanomaterials	3

ENVE Majors

Course	Title/Desc	Credit
ENVE5147	Chemical Principles of Environmental Systems	3
ENVE5171C	Aerosol Science, Engineering and Control	4

MET Majors

Course	Title/Desc	Credit
MET2030	Manufacturing Processes	3
MET2073	Strength of Materials	3

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Nanoengineering

Duration: 1.25 Years Total Credits: 18 Award: Minor

Overview

Nanotechnology will be one of the key engines that drive our technological society in the twenty-first century. This rapidly growing area will enable a variety of novel engineering tools for efficient new energy storage and conversion, mechanical systems, aerospace structures, nano-photonics, semiconducting devices, electronics, biotechnology, medical diagnosis and therapy, and drug delivery. For instance, nanotechnology research has produced such materials as nano imaging agents for early cancer diagnosis, nano carriers for targeted drug delivery, nano composites for supercapacitors and advanced electrochemical energy storage devices; novel pulsed power capacitors for reducing the rate and rapid cycling demand on the batteries of hybrid/electric vehicles, and flexible, highly conductive, but low loss thin films for solar energy cells. All these developments in nanotechnology will require new knowledge in related materials and device applications. Thus, the training of students in the nanotechnology aspects of engineering for the next decade will present a major challenge in college level engineering education.

Career

Minoring

The Nano Engineering Minor program is implemented under the semester system. The focus of this program is to increase students' knowledge of nanotechnologies so as to broaden their Co-Op experience, and to augment their job prospects. The minor is designed to be flexible so that diverse disciplines including all Engineering majors in CEAS at UC can tailor the courses taken under this program, as suited to their individual needs.

For more on Nanoengineering visit http://www.min.uc.edu/me/mse/academic-minors/nano-engineering-minor

.

Curriculum

A new curriculum is developed that is tailored to the knowledge needs of different disciplinary areas including biomedical, mechanical, chemical, environmental, aerospace, and electrical engineering. The new NEM program focuses on nano- engineering applications to prepare students for the most active areas of today's nanotechnology industry. The program will provide students with first-hand experience in defining problems and finding solutions synthesized within the context of engineering education.

1. *Introduction to Nanoscale Science and Technology* (20-ENFD 3008), which is an introductory course designed to teach students about basic nanomaterials structure, synthesis, and characterization. Novel nanotechnologies in several key areas are also introduced in this course.
2. *Experimental Nanoscale Science and Technology* (20-ENFD-3010L) is a lab course that focuses on the hands on experiences involved in the current nanotechnologies that are introduced in 20-ENFD 3008.
3. *Fuel Cells II: Applications* (20-CHE 6058C), a dual-level course which deals with specific nanotechnology applications for sustainable energy generation and storage.
4. MTEN 6012C "Nanostructured Materials Engineering, which is a dual level course on the nano structures and properties at a higher level.

The Nano Engineering Minor consists of the following parts:

1. Three courses in nanotechnology: Experimental Nanoscale Science and Technology (20-ENFD- 3010L); Fuel Cells II: Applications (20-CHE 6058C), and Nanostructured Materials Engineering (MTEN 6012C).
2. One course from a master list of approved courses in the individual programs. This list includes courses from engineering and the physical sciences that have significant materials science content (ex: MECH 2030 "Solid Mechanics" and AEEM 1001/ENED 1030 "Statics & Basic Strength of Materials").
3. One fundamental course in nanotechnology: (20-ENFD 3008) *Introduction to Nanoscale Science and Technology*.
4. A Thermodynamics course from individual engineering program. For Biomedical Engineering, the required Thermodynamics course is MTEN 3082 *Introduction to Thermodynamics*, which is offered by the Materials Science and Engineering Program.
5. Substitutions are possible when classes not listed are similar to those listed, or if a particular class is not available. More course details can be found in the following table.

Nanoengineering

Minor

Nanoengineering (MIN) Curriculum

Duration: 1.25 Years
★Minimum Credits: 18 Credits

The university requirements for a minor are a minimum of 18 semester credits. Of these, 12 credits are to be satisfied by the core nanotechnology courses. The remaining credits will be fulfilled by courses already existing in the individual programs, which have significant NEM component, especially in the field of materials engineering. The NEM offers four nano-based courses: 1. Introduction to Nanoscale Science and Technology (ENFD3008), which is an introductory course designed to teach students about basic nanomaterials structure, synthesis, and characterization. Novel nanotechnologies in several key areas are also introduced in this course. 2. Fuel Cells II: Applications (CHE5158C), a dual-level course which deals with specific nanotechnology applications for sustainable energy generation and storage. 3. MTEN5112C "Nanostructured Materials Engineering, which is a dual level course on the nano structures and properties at a higher level.

Required Course

Course	Title/Desc	Credit
ENFD3008	Nanoscale Science and Technology	3

Required MTEN courses

Course	Title/Desc	Credit
MTEN5110	Physical Properties of Solids	3
MTEN5113	Introduction to Smart Structures	3
MTEN5112C	Nanostructured Materials Engineering	3
MTEN5115	Emerging Functional Materials (C min)	3

Thermodynamics

Students are required to complete one of the following courses.

Course	Title/Desc	Credit
AEEM2022	Thermodynamics and Energy Systems	3
CHE2064	Material and Energy Balances	4
CHE3062	Chemical Engineering Thermodynamics	4
CVE2005	Fluid Mechanics	3
MECH2010	Thermodynamics	4
MET2060	Thermodynamics	3
MTEN3082	Introduction to Thermodynamics	3

Material Science

Students are required to complete one of the following courses. If CVE2031 and 2032 are selected, both courses must be taken.

Course	Title/Desc	Credit
AEEM1001	Statics & Basic Strength of Materials	3
AEEM3058	Solid Mechanics I	3
AEEM4058	Solid Mechanics II	3
AEEM5058	Aerospace Structures and Materials	4
BME1030	Statics and Basic Strengths of Materials	3
BME2020	Statics and Dynamics	3
BME2040	Solid Mechanics	3
BME4051C	Biomaterials In Medical Devices	3
BME5124	Joint Biomechanics and Measurement Methods	3
BME5130	Functional Tissue Engineering	3
CHE5157	Fuel Cells (I)	3
CHE5159	Inorganic Membranes	3
CHE5180	Nanocolloids and their Applications	3
CVE2003C	Construction Materials and Lab	3
CVE2XXX	CVE2031 & 2032 Both courses must be taken to meet this requirement	4
CVE5111	Advanced Strength of Materials	3
EECE2050C	Network Analysis	5
EECE2070L	Electronics Laboratory I	1
EECE2077	Semiconductor Devices	3
EECE3080	Engineering Electromagnetics	4
ENVE5147	Chemical Principles of Environmental Systems	3
ENVE5171C	Aerosol Science, Engineering and Control	4
MECH2020	Statics and Particle Dynamics	3
MECH2030	Solid Mechanics	3
MET2030	Manufacturing Processes	3
MET2073	Strength of Materials	3
MTEN5115	Emerging Functional Materials	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Nanoscience and Nanotechnology

Duration: **1 Year** Total Credits: **18 - 24** Award: **Minor**

Overview

Nanotechnology is an exploding field where materials are created through the control of matter on the nanometer-length scale, at the level of atoms and molecules, and then combined into larger structures with profoundly different physical, optical, chemical, and mechanical properties. Nanotechnology is expected to enable revolutionary advances in materials, electronics, photonics, and medicine.

Nanoscience and Nanotechnology

Minor

Nanoscience and Nanotechnology (MIN) Curriculum

Duration: 1 Year

★Minimum Credits: 18 - 24 Credits

Required Courses

Fall Semester

Course	Title/Desc	Credit
	EECE5118 or EECE6018 Microfabrication of Semiconductor Devises (C- min)	3
	EECE5188 or EECE6088 Nano Devises for VLSI Technologies (C- min)	3

Electives - Four courses required

Students selecting the Senior Design option will take two courses from the lists below and the two Senior design courses. Students not selecting the Senior Design option will select four courses from the lists below

Fall Semester

Course	Title/Desc	Credit
EECE5108	Fundamentals of MEMS (C- min)	3
EECE5145	Introduction to Quantum Computing (C- min)	3
EECE5153	2D/3D Printing Technologies for Electronics/Optoelectronics (C- min)	3
PHYS5020	Introductory Quantum Mechanics I (C- min)	3
MTEN5110	Physical Properties of Solids (C- min)	3

Spring Semester

Course	Title/Desc	Credit
EECE5141C	Microfabrication Lab for Semiconductor Devices and MEMS (C- min)	3
MTEN5112C	Nanostructured Materials Engineering (C- min)	3
MTEN5113	Introduction to Smart Structures (C- min)	3
MTEN5115	Emerging Functional Materials (C- min)	3
PHYS5021	Introductory Quantum Mechanics II (C- min)	3

Offered every 18 months

Course	Title/Desc	Credit
EECE5151	Introduction to Sensors (C- min)	3

Senior Design Courses

Select a pair of courses from the column on the right. Note that the content must be approve as Nano related.d by the

Course	Title/Desc	Credit
	Senior Design course I (C- min)	3 - 6
	Senior Design Course II (C- min)	3 - 6

Senior Design in Nano-related area - select from the following pairs.

Courses will be added to the audit by exception once it is confirmed that the design project is in a nano-related area.

Senior Design for EE Majors

Course	Title/Desc	Credit
EECE5001	Electrical Engineering Senior Design I (C- min)	3
EECE5002	Electrical Engineering Senior Design II (C- min)	3

Senior Design for CMPE Majors

Course	Title/Desc	Credit
MET5091	Senior Design II (C- min)	1
MET5092	Senior Design III (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Robotics and Automation

Duration: 1 Year Total Credits: 21 - 30 Award: Minor

Overview

The Robotics and Automation Minor at the University of Cincinnati focuses on the development of new sensors and controls to achieve a higher level of performance from electro-mechanical, pneumatic, hydraulic, and hybrid robotics devices. Other topics include advanced hybrid hardware-software systems now make it possible to design elegant and sophisticated devices whose capabilities far surpass purely mechanical systems.

Robotics and Automation

Minor

Robotics and Automation (MIN) Curriculum

Duration: 1 Year

★Minimum Credits: 21 - 30 Credits

Required Courses

Select one course.

Course	Title/Desc	Credit
EECE5121	Haptics and Collaborative Robotics (C- min)	3
MECH5131	Introduction to Robotics (C- min)	3

Controls

Select one course.

Course	Title/Desc	Credit
AEEM4042	Fundamentals of Control Theory (C- min)	3
BME4020C	Control of Dynamical Systems (C- min)	4
EECE4090	Control Systems (C- min)	3
ELTN4072C	Feedback Control (C- min)	4
MECH4081	Signals, Systems and Controls (C- min)	3
MET	MET4052 and 4052L Motion Control and Lab (C- min)	3

Instrumentation & Industrial Control

Select one course.

Course	Title/Desc	Credit
EECE5115C	Instrumentation & Industrial Control (C- min)	4
EECE5151	Introduction to Sensors (C- min)	3
ELTN4015C	Flexible Automation (C- min)	4
MECH4071C	Mechatronics and Instrumentation Lab (C- min)	3
MET3050	Logic Control (C- min)	3

Instrumentation & Industrial Control

This course is taught at Chongqing University for JCI students.

Course	Title/Desc	Credit
EECE5112	Contemporary Instrumentation and Automation (C- min)	3

Elective

Select one course.

Course	Title/Desc	Credit
AEEM3077	Unmanned Aerial Vehicles (UAV) for Urban Communities (C- min)	3
AEEM5117	Intelligent Robotics (C- min)	3
EECE5117C	Advanced Embedded Systems (C- min)	4
EECE5128C	Intelligent Machine Design (C- min)	4
EECE5138C	Advanced Microsystem Design (C- min)	4
EECE5142	Digital Image Processing (C- min)	3
EECE5144C	Introduction to Mechatronics (C- min)	4
ELTN4041C	Data Acquisition and Measurements (C- min)	4
ELTN4056C	Computer Networks (C- min)	4
MECH5011	Packaging Technology and Machinery (C- min)	3
MECH5132	Robot Control and Design (C- min)	3
MECH5136	Robot Vision (C- min)	3
MECH5178	Introduction to Industrial Artificial Intelligence (C- min)	3
	MECH5099 This is a special Topics course with variable credit hours and variable content. Use of this course requires approval by petition. (C- min)	1 - 3
	EECE4005 This is a Special Studies course where content may vary. Use of this course requires approval by petition. (C- min)	3

If this elective option is selected, you must take both lecture and lab

Course	Title/Desc	Credit
MET5053	Manufacturing Automation (C- min)	2
MET5053L	Manufacturing Automation Laboratory (C- min)	1

Senior Project: must be approved as having a sufficient amount and depth of minor-related content to qualify as a capstone for the minor.

Select one of the options below.

Course	Title/Desc	Credit
AEEM5012C	Aircraft Design I (C- min)	3
AEEM5022C	Aircraft Design II (C- min)	3

Course	Title/Desc	Credit
AEEM5013	Spacecraft Design I (C- min)	3
AEEM5023	Spacecraft Design II (C- min)	3

Course	Title/Desc	Credit
AEEM5014C	Engine Design I (C- min)	3
AEEM5024C	Engine Design II (C- min)	3

Course	Title/Desc	Credit
BME5001C	BME Senior Capstone I (C- min)	6
BME5002C	BME Senior Capstone II (C- min)	6

Course	Title/Desc	Credit
CHE5045	Process Design I (C- min)	4
CHE5046	Process Design II (C- min)	4

Course	Title/Desc	Credit
EECE5001	Electrical Engineering Senior Design I (C- min)	3
EECE5002	Electrical Engineering Senior Design II (C- min)	3

Course	Title/Desc	Credit
EECE5031	Computer Engineering Senior Design I (C- min)	3
EECE5032	Computer Engineering Senior Design II (C- min)	3

Course	Title/Desc	Credit
ELTN4011	Senior Design I (C- min)	3

Course	Title/Desc	Credit

Course	Title/Desc	Credit
ELTN4012	Senior Design II (C- min)	3

Course	Title/Desc	Credit
MECH5051	Senior Design I (C- min)	3
MECH5052	Senior Design II (C- min)	3

Course	Title/Desc	Credit
MET5090	Senior Design I (C- min)	2
MET5091	Senior Design II (C- min)	1
MET5092	Senior Design III (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Very Large Scale Integration (VLSI)

Duration: 1 Year Total Credits: 18 Award: Minor

Overview

The Very Large Scale Integrated Minor at the University of Cincinnati dives into the sophisticated computer programs that are used to create circuit designs and to ensure they perform as desired, before they are produced in circuit foundries. VLSI, or Very Large Scale Integration, describes computer circuits or “chips.”

This minor is limited to students majoring in Electrical Engineering and Computer Engineering. There is a significant amount of technical prerequisite coursework which only these students would complete as part of their major requirements.

Career

This field is dynamic, due to new technologies necessary to deal with the continually shrinking size of circuits and with the constant need to reduce the electric power they use.

Biomedical Informatics

Duration: 2.5 Years Total Credits: 19 Award: Graduate Certificate

Overview

Biomedical informatics (BMI) is a rapidly growing interdisciplinary field, which encompasses the development and implementation of informatics systems for the improved delivery of health care, as well as computational and analytical methods that advance biomedical research. In recent years, BMI has become an integral component of both clinical and translational research and health care infrastructure, increasing the demand for researchers and professionals who can take advantage of these concurrent innovations.

Success

BMICP will train graduate students in both quantitative and biomedical programs to develop and apply computational methods addressing current problems in biomedicine, and to design and implement clinical informatics systems. At the same time, the program will be designed to also enable training of clinicians and health professionals with advanced degrees who are interested in the integration of electronic health record (EHR) and related systems with clinical practice and research.

Career

Research or professional careers in BMI

Curriculum

PRE-REQUISITES

Design & Analysis of Algorithms (20-CS-4071, or equivalent)
Introduction to Functional Genomics (26-GNTD/CS-881 -> 20-CS-7098C, or equivalent)

CORE COURSES

Databases (20-EECE-6010)
Introduction to Biostatistics (26-BE-767 -> 26-BE-7022)
Introduction to Medical Informatics (26-BE-8062)
Introduction to Bioinformatics (20-BME/CS-643 -> 20-CS-7099)
Topics in BMI/BMICP Journal Club (1 credit hour)

ELECTIVE COURSES
2 elective courses to be selected in coordination with BMICP faculty; when applicable these courses should reflect research interests/projects in the student's home program.

Artificial Intelligence I (20-CS-6033)
Computational System Biology (26-MCP-6031C)
Digital Image Processing (20-EECE-6042)
Intelligent Data Analysis (20-CS-6052)
Advanced Algorithms (20-CS-7081)
Principles of Clinical Trials (26-BE-7066)
Introduction to Epidemiology (26-BE-7076)
Decision and Cost-Effectiveness Analysis (26-BE-7068C)
Applied Bayesian Analysis (15-STAT 6043)
Pattern recognition (20-CS-8021)
Genetics of Complex Disease (26-BE-8068)
Introduction to Molecular Genetics (26-GNTD-8071)
Data Warehouse Design (20-EECE-8075)

UC Advantages And Special Opportunities

It is an intercollegiate with participating faculty that teach one or more courses required by the program. They contribute modules on special topics and/or offer training and research opportunities, including those involving clinical informatics systems.

Admission Requirements

• GRE - Required of all international students; GRE is exempt for students that earned a degree from an ABET accredited university (or equivalent accreditation) in the USA with a GPA of 3.0+
• Transcript(s) and Degree Certificates
• GPA minimum 3.0 or equivalent
• Statement of Purpose
• Two letters of recommendation
• International students - English Proficiency Test: TOEFL (minimum 92) or IELTS (minimum 6.5)

Graduation Requirements

Completion of required coursework.

Cyber Operations

Duration: **1 Year** Total Credits: **18 - 20** Award: **Graduate Certificate**

Overview

The focus of our technical, interdisciplinary graduate certificate program is to produce exceptional cybersecurity professionals with expertise in various disciplines of cyber operations related to specialized intelligence, military, and law enforcement — ultimately increasing the security of our nation.

Success

In June 2014, the National Security Agency and U.S. Cyber Command designated the University of Cincinnati (UC) as a National Center of Academic Excellence in Cyber Operations (CAE-CO) for five consecutive academic years.

UC is the thirteenth of eighteen CAE-COs and offers a technical, **interdisciplinary** curriculum centered in fields such as computer science, computer engineering, information technology, political science, and criminology. Our educational offerings covers the entire cybersecurity spectrum -- human behavior and strategic policy analysis, software and network integration, algorithm development, data encryption and information security analytics.

As an extension of President Obama's National Initiative for Cybersecurity Education, the CAE-CO's supports the government's effort to better protect cyberspace. "The nation increasingly needs professionals with highly technical cyber skills to help keep America safe today and to help the country meet future challenges and adapt with greater agility" according to Dr. Stephen LaFountain, Dean of the College of Cyber at the National Security Agency.

Career

Research or professional careers in Cyber Operations.

Curriculum

To receive a certificate in Cyber Operations (with or without a Master's degree) students will complete seven graduate courses targeting 8 mandatory knowledge units, two prerequisite undergraduate courses that target 2 additional mandatory knowledge units, and three additional graduate courses such that 4 optional knowledge units.

Data Science

Duration: **1 Year** Total Credits: **18 - 21** Award: **Graduate Certificate**

Overview

According to the McKinsey Global Institute, the US will need to increase the number of graduates with data science skills by 60% to meet demand that is estimated to be almost 500,000 jobs in 5 years. Data science includes IT expertise, but it also includes the ability to work with extremely large data sets and to communicate analytical findings to other professionals who can leverage those findings for strategic decision making.

The graduate certificate in Data Science prepares students to apply analytic techniques and algorithms (including statistical and data mining approaches) to large data sets to extract meaningful insights. Students acquire hands-on experience with relevant software tools, languages, data models, and environments for data processing and visualization. Working in teams, students communicate results of analysis effectively (visually and verbally) to a broad audience.

This certificate is a collaborative program between Computer Science and Business Analytics. Graduate credits earned apply to MS, MEng, and MBA programs. Companies seeking data scientists include dunhumby, Procter & Gamble, Google, Twitter LinkedIn, Facebook, Amazon, Teradata, Microsoft, AT&T, Verizon, and many, many others.

Data Science Certificate CEAS-2023

Advising

Please contact Ms. Julie Steimle (julie.steimle@uc.edu) for more information.

Dr. Raj Bhatnagar is the academic director (raj.bhatnagar@uc.edu).

Admission Requirements

Applicants must have a baccalaureate degree (BS or BA) and appropriate course work as described below.

Applicants should have obtained a grade of at least 3.0/4.0 (B or better) for at least undergraduate level background courses in the following areas:

1. database design and management: including experience with SQL queries and design and development of relational databases,
2. statistics: including basic knowledge of probability distributions, hypothesis testing, and linear regression, and
3. programming: including knowledge of data structures and experience developing medium-large software in C++ and/or java.

Graduation Requirements

Completion of compulsory courses and approved elective course work is required for the certificate.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Safety and Health Engineering

Duration: 0.5 Year Total Credits: 12 - 13 Award: Graduate Certificate

Overview

With the advent of new technologies there is an ever increasing need for safety professionals to define and establish hazard control methods within emerging technologies. Similarly, there is an on-going demand for occupational safety professionals in industry and governmental agencies. Engineering graduate students are in a unique position to apply their technical skills in conjunction with obtaining new skills in safety and health to address the aforementioned needs. The Safety and Health Engineering Certificate encourages graduate students to focus a portion of their program of study upon safety and health courses. Through obtaining the proposed certificate, the graduate engineering student will be in a better position to fulfill their professional duty to promote and hold paramount the safety, health, and welfare of the public.

Career

Many organizations and busineses employ safety and health professionals. Completion off the certificate provides individuals interested in this type of career a transcripted credential that demonstrates their competence in this field.

Curriculum

Students complete a minimum of 12 creditts from a list of approved courses.

Advising

Advising is provided through the CEAS graduate office and the program director.

UC Advantages And Special Opportunities

The College of Engineeering and the College of Medicine both provide coruuses to the certificate. The University has a strong relationship with NIOSH and this relationship informs the certificate course selection.

Admission Requirements

- Bachelor's degree from an ABET-accredited institution with an undergraduate GPA of 3.0 or higher. The GRE is not required for these applicants.
  - Applicants having an undergraduate degree in science or mathematics may also be considered if they have an undergraduate GPA above 3.0. These applicants must submit GRE Scores.
  - Applicants who have less than a 3.0 in an undergraduate program accredited by ABET may be considered for admission if they submit GRE scores and these are found to be acceptable.

International Student Requirements

Students must meet minimum English proficiency scores for CEAS graduate programs.

Graduation Requirements

Completion of a minimum of 12 credits and a cumulative GPA of 3.0 or better.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

College Teaching

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Certificate in College Teaching is an interdisciplinary certificate that aims to equip graduate-level students with the necessary development and tools to pursue a career in academia. The program allows students to gain skills in teaching, professional development, and accessibility. By allowing students to select classes they want to take from an expanded curriculum, they can mold the certificate into an experience that best fits their needs for their future career aspirations. In alignment with the Graduate College's mission, the Certificate in College Teaching is a student-centered program that supports the academic and professional growth of its participants across a broad range of disciplines.

Career

This certificate prepares students for a faculty career.

The U.S. Legal System

Duration: **1 Year** Award: **LLM**

Overview

The Master of Laws program is designed to introduce internationally trained lawyers to the U.S. legal system while providing students with the opportunity to design a course of study at Cincinnati Law that best advances their unique professional agendas. Graduates of the LLM program are better able to represent U.S. clients and are more prepared for negotiations and litigation with U.S. parties.

Students have the opportunity to focus on any of our nine Professional Pathways. LLM students have the option to earn a concentration in Business Law or International Legal Studies. UC Law also offers fellowships with the Ohio Innocence Project and through the Urban Morgan Institute for Human Rights.

Career

For international students, an LLM degree covers the necessary fundamentals of law in the United States. Graduates go on to various post-graduation careers such as lawyer, judge, business professional, consultant, banker, and more. Depending on previous professional and educational background, some LLM graduates are eligible to apply to take a bar exam in the US.

Curriculum

Students in the LLM program complete at least twenty-four credits hours in order to earn the LLM degree. This generally occurs within one academic year. Two courses are designed specifically for LLM students and are required to complete the program:

The U.S. Legal System. In this three-credit course, students gain a more advanced understanding of the critical features of the U.S. legal tradition, the functional components and participants in our legal system, and key legal concepts, including legal ethics and professional responsibility.

Legal Research & Writing for LLM Students. This three-credit course is similar to our traditional legal research & writing course, designed, however, to meet the needs of non-native English speakers. It is designed to help students develop the written communication skills, research skills, and persuasion strategies needed in both law school and professional practice as a lawyer.

Additional courses are selected by individual students working in consultation with the Assistant Dean and faculty. By choosing courses from among the range of those offered to all law students, LLM students are able to design a course of study that best advances their own professional agendas.

Students may select courses in areas of study, called professional pathways, such as Business and Entrepreneurship; Criminal; International; Innovation, Technology and Intellectual Property; Science, Health, and Environment; Public Interest; Litigation and Alternative Dispute Resolution; General and Small Practice. Students may also choose to complete our Business Law Concentration or Concentration in International Legal Studies.

Learn more about our curricular offerings.

Classroom instruction is integrated with practice observations at courtrooms, government agencies, law firms, and corporate offices. During these observations, participants interact with judges, attorneys, general counsel, and business executives, who convey critical insights about practice in the U.S., including:

- U.S. business customs
- Liaising effectively with counsel
- Navigating the U.S. judicial system

The College of Law will also provide forums for students to discuss their legal cultures, as well as to introduce their law firms or institutions to area attorneys and business executives. In this way, students, local attorneys, and executives have many opportunities to network and form lasting professional contacts.

Legal Studies

Online

Duration: 2 Years Total Credits: 30 Award: MSL

Overview

Our online Master of Legal Studies program is designed to grant students a working knowledge of the law that they can put to use in an industry or career that interacts with the law. This degree provides new skills and knowledge to enhance your existing skills rather than prepare you for a new career. The MLS program may provide alternatives for individuals who do not want to attend law school but do want to increase their legal knowledge. Master of Legal Studies degree students may enter the program for a variety of reasons; such as working with legal professionals regularly, working in highly regulated industries, or are business owners that want to be able to handle more legal aspects of their business.

This fully online, asynchronous legal studies program is designed for working professionals who would benefit from a sophisticated understanding of the U.S. legal system but do not intend to practice law. It helps professionals understand laws and regulations so they can perform better in their current and future roles.

Career

A Master of Legal Studies degree from Cincinnati Law can help you:

- Add value to your current role through greater understanding of how the law intersects with your responsibilities
- Increase your competitiveness as a job applicant by holding a master's degree in legal studies
- Enhance your resume by developing skills in specialized areas of the law

Economics

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Economics is the scientific study of how society manages its scarce resources. Economics majors at the UC Carl H. Lindner College of Business (Lindner) develop strong research and analytical skills while exploring issues such as the production of goods and services and the distribution of income among people. Economics involves both the investigation of theories to explain economic systems and the application of these theories to areas such as finance and banking, labor relations, poverty reduction, taxation and investment.

Success

Lindner College of Business economics majors typically possess (or are willing to develop) the strong analytical skills necessary for interpreting and evaluating arguments. Most enjoy reading and are successful when asked to work independently. Economics students are critical thinkers who enjoy vigorous in-class discussions and like to apply their learning to real-world problems, as well as to theoretical concerns. Consequently, they enjoy researching and debating different points of view on wide-ranging issues involving public affairs.

Career

Graduates with a BA in economics are prepared for many different career options. This also makes economics a popular major for students planning to enter graduate programs in areas such as law or business, where economics courses are often required for admission. Education is another career option for economics majors. Our graduates often find jobs as:

- Professional economists in academic institutions, business or government
- Financial advisers
- Business managers
- High school economics teachers

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional freshman courses include mathematics, English composition, economics, business communications and general education requirements.

The lower business core of accounting, business law, information systems, marketing and business analytics exposes all students to the fundamental business disciplines to prepare them to communicate across the different business functional fields. The upper business core, consisting of finance, international business, management, operations management and business professionalism, continues to give students additional skills in business fundamentals. Course work in the major allows students to build their skills as specialists. The capstone experience involves a project through which students can tie together all they have learned.

The UC economics program emphasizes traditional economics areas and is similar to economics majors offered in most colleges and universities throughout the country. It is more suited for students who would like to work for various government organizations, to advance to graduate or law schools or for students who are not yet sure which career paths they would like to pursue in the future (for example, business or government, law or academics).

The Lindner College of Business offers flexible degree requirements allowing students to pursue multiple areas of study. Free electives allow students to pursue a minor, certificate program or even complete a second major. Some of the most common pairings are listed below.

- Another business program
- Math
- Philosophy
- Business
- Foreign language
- Political science

The economics major requires completion of 36 semester hours of courses in the major.

Minoring

Minor Requirements

UC Lindner College of Business students may select economics as a major, part of a double major or a minor, allowing them to add economics as a second area of expertise to their chosen major.

LIndner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline-specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines. To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.

- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

The ***Kautz-Uible (K-U) Fund*** provides fellowships to economics and business economics majors, typically in their junior or senior years. Scholarship awardees are selected based on a holistic evaluation including strong academic credentials and financial need. The application process begins in early March. The K-U fund also provides funding for student activities and trips that allow students to further their experiential education by exploring international and domestic issues of economic importance.

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- **Dedicated Infrastructure of Honors Faculty and Staff**: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- **Foundation for Exploration, Freedom for Flexibility**: Students will utilize their learning communities to explore all that Lindner has to offer.
- **Specialized Academic and Experiential Learning**: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- **Personalized Honors Communities**: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Arts Program (Traditional Studies)
Freshman applicants to the BA program, please visit the Admissions Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus,or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Accounting

Duration: **4 Years** Total Credits: **120** Award: **BBA**

Overview

Accounting is a system that provides quantitative information about finances, maintains and audits financial records, and prepares reports for investors and managers to help them make business decisions. The accounting program at the UC Carl H. Lindner College of Business (Lindner) is designed to prepare students for careers in public and corporate accounting through a rigorous course of study. This includes general education requirements, as well as basic courses in all business disciplines, accounting and career exploration and development.

Success

Successful accountants possess excellent critical thinking skills and the ability to analyze information. Other attributes include:

- Problem solving skills
- Ability to identify and control risk
- Strong communication skills
- Team building skills

Successful graduates entering the accounting field can enhance their marketability in three ways:

- High grades, as many accounting employers look for an overall GPA of 3.2 or greater
- Work experience in the form of co-op or internships
- Leadership experiences in campus and/or community groups

Career

Graduates of the UC Lindner College of Business accounting program can find career opportunities in public and corporate accounting. Employers include both national and international public accounting firms (Big 4), regional and local public accounting firms, financial services firms, manufacturing firms and retailers, and others. Examples of jobs include:

- CPAs (Certified Public Accountants) in public auditing
- Managerial/cost accountants
- Internal revenue agents
- Tax consultants
- Internal auditors
- Financial executives
- Accounting professionals in governmental and non-profit organizations

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management,

Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The accounting program begins with basic conceptual business knowledge as the foundation for accounting career development. Students are exposed to course work covering all that comprises the discipline, including financial accounting, managerial accounting, auditing, taxation and accounting information systems.

Minoring

Lindner College of Business students may select accounting as a major, part of a double major or a minor, allowing them to add accounting as a second area of expertise to their chosen major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline-specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Accounting scandals of recent years have resulted in increased visibility for the profession as well as additional regulatory scrutiny and reporting requirements. The demand for accounting majors is, therefore, extremely high and professional placement is close to 100 percent.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.
- Specialized Academic and Experiential Learning: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- Personalized Honors Communities: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of study abroad programs in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international

experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)
Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Business Economics

Duration: 4 Years Total Credits: 120 Award: BBA

Overview

Economics is poised at the intersection between social science and business, and has great relevance for a wide range of public policy issues. The business economics program at the UC Carl H. Lindner College of Business combines the study of both economics and business, providing a strong theoretical and professional combination. Traditional economics courses prepare students to collect and analyze data, monitor economic trends and develop forecasts—essential to the ability of business firms to maximize profits and provide the quantity of goods or services that consumers will demand at a certain price. The program includes general education requirements as well as basic courses in all business disciplines, economics and career exploration and development.

Success

Business economics majors typically possess (or are willing to develop) the strong analytical skills necessary for interpreting and evaluating arguments. Most like to read and are successful when asked to work independently. Business economics students are critical thinkers who enjoy vigorous in-class discussions and like to apply their learning to real-world problems as well as to theoretical concerns. Consequently, they enjoy researching and debating different points of view on wide-ranging issues involving public affairs.

Career

Many students choose to further their studies in graduate school, especially in business and law schools. Career possibilities for students who graduate with a major in business economics include:

- Entry-level positions in line management
- Staff positions in fields such as operations research; labor and employment relations; sales and marketing; and banking and finance
- Foreign service employee
- Public utility corporation worker
- Government

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

Business economics at the UC Lindner College of Business (Lindner) provides a broad-based level of learning experiences for students contemplating a career in business. The economics core of the major provides students with a solid analytical background and the choice of advanced economics electives. The business economics major is best suited for the student desiring to work in the more analytical areas of business.

The Lindner College of Business offers flexible degree requirements allowing students to pursue multiple areas of study. Free electives allow students to pursue a minor, certificate program or even complete a second major. Some of the most common pairings are listed below.

- another business program
- foreign language
- math
- philosophy
- political science

The business economics major requires completion of 18 semester hours of courses in the major.

Minoring

The Lindner College of Business offers a minor in economics and a variety of minors in other business disciplines.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

The *Kautz-Uible (K-U) Fund* provides fellowships to economics and business economics majors, typically in their junior or senior years. Scholarship awardees are selected based on a holistic evaluation including strong academic credentials and financial need. The application process begins in early March. The K-U fund also provides funding for student activities and trips that allow students to further their experiential education by exploring international and domestic issues of economic importance.

The Undergraduate Economics Society provides an excellent opportunity for students to enhance their experience here at the university. Undergraduate economics and business economics majors are afforded an ideal setting to develop strong interpersonal and organizational skills, as well as long-lasting friendships. In the past, the society has organized off-campus trips, including tours of Chicago, New York, San Francisco and Washington, D.C. These trips have been sponsored by the Hewett-Kautz Fund. The society, in conjunction with the department, has scheduled guest speakers and career development and placement seminars intended to assist and advise students on career choices. Meetings are held for its members and new faces are always welcome.

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.

- **Specialized Academic and Experiential Learning**: An accelerated, interdisciplinary curriculum with problem solving as a common thread.

- **Personalized Honors Communities**: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)

Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Entrepreneurship

Duration: 4 Years Total Credits: 120 Award: BBA

Overview

Given that 90 percent of all firms are considered small or medium enterprises and that small businesses produce the majority of new jobs, the entrepreneurship major at UC's Carl H. Lindner College of Business provides excellent preparation for the world of business. Emphasis is placed on practical issues and interactions related to individual, social and corporate entrepreneurship. While it is anticipated that entrepreneurship majors are interested in starting their own ventures, majors are also well prepared to work for businesses and organizations that interact with small, entrepreneurial and family ventures on a regular basis.

Success

Entrepreneurship is a way of thinking and acting. People who are successful in entrepreneurial ventures have vision that they pursue with drive, determination and dedication. They seek to create solutions to problems using reason and logic. Working with abstract concepts, they work to figure out the relationships of one to another. They possess excellent communication skills and are able to exercise good time- and project-management skills. Entrepreneurs dream of possibilities, see opportunity often where others do not, take on challenges and persevere to achieve their goals.

Career

While the aspiring entrepreneur will find this program quite appealing, it will also prepare students to work for larger businesses and support organizations that interact with small, entrepreneurial and family owned ventures. In addition, coupling the entrepreneurship major with another major or minor enhances the student's entrepreneurial or organizational career options. For instance, a double major with information systems could lead to work as an independent consultant or work for a larger firm servicing small, entrepreneurial and family owned ventures; a double major with accounting could lead to opening an independent tax consulting business or a career with a larger accounting firm in its small and medium sized business division.

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The entrepreneurship major includes an introduction to the issues and concerns unique to closely-held business; detailed information on organizational forms (C-Corps, S-Corps, partnerships, proprietorships and LLC's); accounting, financial, information systems, tax and legal issues for new venture start-ups as well as those that are unique to privately held firms; and what is involved in the ideation,

conceptualization, formulation and launch of a new venture. All entrepreneurship majors are required to complete a capstone experience with a small entrepreneurial, closely held firm, larger organization or nonprofit to apply first hand the knowledge gained throughout the curriculum.

The entrepreneurship major requires completion of 18 semester hours of courses in the major.

Minoring

Lindner College of Business students may select entrepreneurship as a major, part of a double major, or a minor, allowing them to add entrepreneurship as a second area of expertise to their chosen major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline-specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

Commercial Media Production students should consult with their advisor.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

UC's entrepreneurship program has been ranked among the top programs in the nation by both Entrepreneur Magazine and the Princeton Review.

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.

- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.

- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.

- Specialized Academic and Experiential Learning: An accelerated, interdisciplinary curriculum with problem solving as a common thread.

- Personalized Honors Communities: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of study abroad programs in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)
Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Finance

Duration: 4 Years Total Credits: 120 Award: BBA

Overview

Finance is an analytical discipline focusing on critical decisions faced by individuals, businesses and nonprofit organizations. It integrates disciplines, drawing on economics as the basis of its theory, accounting as the basis for understanding the information used in the decision making process and the tools of quantitative analysis for the analytical work. An understanding of financial theory and practice evolves to serve as a basis for either entering a financial position in the work force or continuing with graduate studies.

Success

Successful individuals in finance possess excellent critical thinking skills and the ability to analyze information. Other attributes include:

- Quantitative proficiency
- Ability to identify and control risk
- Strong organizational skills
- Detail-orientation
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision-making
- Capacity for teamwork

Career

Finance graduates are prepared to work in the broad areas of financial institutions and markets, investments and corporate finance.

Corporate finance opportunities include:

- Credit analyst/manager
- Treasury analyst
- Cash manager
- Capital budgeting analyst

Investment opportunities include:

- Securities analyst
- Stock broker
- Securities trader
- Currency trader
- Investment banker
- Portfolio manager
- Financial Planning and Wealth Management (CFP)

Positions in financial institutions and markets include:

- Credit trust officer
- Branch manager
- Bank examiner
- Operations officer
- Loan officer

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service

that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The Finance major begins with the core subjects of Corporate Finance (how a firm makes decisions to optimize performance and value) and Investments (understanding the trade-off between risk and return and portfolio theory) and then continues with two other required courses that focus on valuation principles and Excel modeling skills. Students then have the opportunity to take 12 credit hours of Finance elective courses.

Students can choose to join one of two sub-plans in the major. The Analytic Finance Academy provides a very challenging sub-plan for engaged, ambitious students that includes special sections of three required Finance courses and the opportunity to take up to 12 credit hours of Master's level electives. The Financial Planning sub-plan covers the entire body of knowledge required to sit for the Certified Financial Planners exam after graduation. Both of these sub-plans will appear on your transcripts.

The finance major requires completion of 24 semester credit hours of courses in the major.

Minoring

UC Lindner College of Business students may select finance as a major, part of a double major or a minor, allowing students to add finance as a second area of expertise to their chosen major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall

- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.
- Specialized Academic and Experiential Learning: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- Personalized Honors Communities: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)
Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

Information Systems

Duration: **4 Years** Total Credits: **120** Award: **BBA**

Overview

Today, most organizations cannot function or compete effectively without computer-based information systems. Enterprises often ascribe their productivity, improved customer service or competitive advantage in the market place to their information systems (IS). The UC Carl H. Lindner College of Business (Lindner) prepares students to function at the intersection of business and technology and to design and build the solutions that allow businesses to effectively leverage information technology.

Success

Successful graduates typically have an interest in information technology and an affinity for being in a fast paced, exciting environment where the underlying technology changes all the time. They have good communication skills and are needed to serve as translators between business needs and technology-based solutions, a role for which they are uniquely qualified. Finally, they possess the analytical/logical mind needed to translate ill-defined business problems and opportunities into clear, well-structured technology-based solutions.

Career

Given the wide diversity of possible roles in the field, students can choose a career path that best fits their skills and preferences, ranging from highly technical to primarily business focused. Those interested in the more business-oriented jobs have such starting options as business process or systems analysts, data modelers and project managers. Those interested in more technical roles can choose to become web developers, database managers or network designers.

A popular option pursued by many of our graduates is to join IT Leadership Programs at such corporations as GE, Citigroup, Johnson & Johnson and Fifth Third Bank. These programs expose students to multiple areas within the IS function of a company; graduates typically spend 4-6 months in each role, for a total of two years, after which they assume longer term roles in an area of mutual fit.

Salaries for IS graduates remain among the highest in the college.

Majoring

The **Lindner First Year Experience** (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The IS major provides students a solid theoretical background in the analysis, design, development and deployment of computer-based information systems. Students acquire strong technical skills in databases, systems analysis and design, Web development, business process modeling, business intelligence tools, telecommunications and project management along with problem solving skills through the team-oriented project-based courses in the program.

The information systems major requires completion of 18 semester hours of courses in the major.

Minoring

Lindner College of Business students may select information systems as a major, part of a double major or a minor, allowing students to add information systems as a second area of expertise to their chosen major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.

- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- **Dedicated Infrastructure of Honors Faculty and Staff**: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- **Foundation for Exploration, Freedom for Flexibility**: Students will utilize their learning communities to explore all that Lindner has to offer.
- **Specialized Academic and Experiential Learning**: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- **Personalized Honors Communities**: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)
Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Course	Title/Desc	Credit
BoK: NS	Natural Sciences Select a minimum of six credit hours	6
BoK: FA,HP,HU,SS	Breadth of Knowledge Select one course from two different areas	6

Course	Title/Desc	Credit
	Free Electives Select any approved college-level courses	17

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Insurance and Risk Management

Duration: **4 Years** Total Credits: **120** Award: **BBA**

Overview

Insurance is an industry that employs people in a variety of functional roles, including accounting, finance, advertising, information systems, sales and sales management and operations. Risk management is an activity that strategically controls the risks inherent in doing business in a variety of industries, such as financial services, health care, manufacturing and entertainment. The two are often paired, because the core business of both industries is to help others manage risks.

Success

Successful professionals in the insurance and risk management field have an analytical mind set. Other attributes include:

- Quantitative proficiency
- Ability to identify and control risk
- Strong organizational skills
- Detail oriented
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision-making
- Capacity for teamwork

Career

The insurance and risk management major at UC's Carl H. Lindner College of Business is designed to equip students for productive careers focused on managing risks, both within corporations, as a user of risk management techniques, or within the insurance or financial services industry, as a supplier of risk management products and services. In private-sector insurance carriers, graduates will find positions in the areas of property or casualty, or life and health insurance. The number of positions available for private-sector insurance carriers and related activities has grown dramatically in recent years. The implementation of the Affordable Care Act is likely to lead to greater demand for those in the insurance workforce. Managing the risks of health insurance pools is likely to increase the demand for actuaries as well. The need for customer service representatives and financial and marketing functions is also likely to grow.

To learn more about the future of the insurance industry in Ohio, visit Insurance in Ohio.

Majoring

The **Lindner First Year Experience** (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management,

Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

Minoring

Lindner College of Business students may select insurance and risk management as a major, part of a double major or a minor, allowing them to add insurance and risk management as a second area of expertise to their chose major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline-specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.
- Specialized Academic and Experiential Learning: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- Personalized Honors Communities: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of study abroad programs in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)
Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

International Business

Duration: 4 Years Total Credits: 120 Award: BBA

Overview

Global companies compete in a challenging business economy. This requires the need for business professionals who possess a combination of business and international skills. Formal international management education gives students cultural training, a comprehensive understanding of global and regional economies, and a socio-political analysis of multiple regions. Graduates of the international business program at the UC Carl H. Lindner College of Business are positioned to be highly sought, especially for companies with overseas assignments.

Success

Individuals who are attracted to international business are those who are able to accept and work within the culture, customs and attitudes of another country. They must be flexible and be able to adapt to change and unexpected situations, some of which are beyond their control. Other attributes include:

- Excellent oral, written and electronic communication capabilities
- Ability to take risks
- Strong initiative and goal-driven qualities
- Organizational skills
- Analytical problem solving
- Leadership skills
- Competence in decision-making
- Capacity for teamwork
- Ability to multi-task

Career

The international business major provides a gateway to jobs in the global economy. Combining this major with a finance major leads to opportunities in international finance and banking. Coupling international business with a major in information systems, marketing or operations management can provide the experience to make graduates attractive for international assignment opportunities.

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The objective of the international business major is to provide the foundation of understanding necessary to work in the global economy. Courses are designed to enhance knowledge developed in other business courses as well as to provide new skills specific to international business. Beginning with the Global Business Environment course, the student selects courses in international accounting, finance, management and marketing.

The international business major requires completion of 18 semester hours of courses in the major. Students must also complete a study abroad or other qualifying significant international experience selected from pre-approved list.

Minoring

Lindner College of Business students may select international business as a major, part of a double major or a minor, allowing students to add international business as a second area of expertise to their chosen major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline-specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

The *International Business Co-op Program*, administered through the Division of Professional Practice at the University of Cincinnati, provides exciting opportunities for UC business students to learn a second language and gain international work experience.

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.
- Specialized Academic and Experiential Learning: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- Personalized Honors Communities: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of study abroad programs in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international

experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year students are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)

Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

MKTG4071	International Marketing	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Marketing

Duration: 4 Years Total Credits: 120 Award: BBA

Overview

Marketing is a broad and integrated system of activities that helps organizations provide products and services that satisfy customers. Selling and advertising are the most visible parts of marketing, but there is much more. Marketers conduct research to gain insight into consumer motivation and behavior. This enables them to provide products and services in the right assortment, with the right message, at the right place, at the right price and time.

Success

Successful marketers have excellent written and oral communication skills and are comfortable working in group settings. Typically, they are interested in understanding human behavior. Quantitative analysis and mathematical proficiency are also important in the marketing professions.

Career

Graduates of this major in the UC Carl H. Lindner College of Business pursue many different careers. A few examples include: professional selling, sales management, retail management, marketing research, customer service, brand management, product development, advertising and public relations.

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The marketing major is launched with courses in consumer behavior and marketing research. Students then select four courses to support their desired career path in marketing. The marketing major requires completion of 18 semester hours of courses in the major.

Minoring

UC Lindner College of Business students may select marketing as a major, part of a double major or a minor, allowing students to add marketing as a second area of expertise to their chosen major. Another Lindner program that may be attractive to students interested in marketing is the minor in professional sales.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline-specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

Marketing BBA

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.
- Specialized Academic and Experiential Learning: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- Personalized Honors Communities: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of study abroad programs in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)

Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Operations Management

Duration: 4 Years Total Credits: 120 Award: BBA

Overview

Managing and directing activities of all forms is crucial in organizations. Operations management is concerned with designing efficient and productive processes by effectively allocating resources, controlling inventory, scheduling projects, ensuring quality and improving overall organizational efficiency to achieve success. Operations management professionals are employed by airlines, federal agencies, banks, health facilities, retailers, manufacturers, logistics companies and consulting agencies.

Success

Successful professionals in the operations management field are problem solvers and have an analytical mind set. Other attributes include:

- Quantitative proficiency
- Ability to identify and control risk
- Strong organizational skills
- Detail oriented
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision-making
- Capacity for teamwork

Career

The operations management major at UC's Carl H. Lindner College of Business, which provides a management career path in both manufacturing and service organizations, enjoys an outstanding reputation. Positions offered recently to graduating students include production manager, operations manager and purchasing manager, among others.

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one's passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The operations management major focuses on understanding project and quality management, supply chain management, operations planning and scheduling, service operations and operations strategy. Operations management professionals typically employ computer-based tools such as spreadsheets, project management software and enterprise resource planning (ERP) systems.

The operations management major requires completion of 18 semester hours of courses in the major.

Minoring

The UC Lindner College of Business does not offer a minor in operations management.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors website.

Please note: students may not double count courses between Lindner majors and minors.

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.

- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

OM majors benefit from the expertise of a world class faculty:

- Research by QAOM faculty has been ranked as high as fourth in the nation among all business schools.
- The QAOM faculty's teaching reputation is outstanding, having won several awards.
- OM majors also benefit strongly from the faculty's interaction with local business and industry.

The student chapter of APICS, the Association for Operations Management, interacts regularly with the Cincinnati chapter and affords students the opportunity to meet leading operations managers in the greater Cincinnati region. In addition, OM students have a history of being student leaders in the university during their collegiate studies.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- **Dedicated Infrastructure of Honors Faculty and Staff**: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- **Foundation for Exploration, Freedom for Flexibility**: Students will utilize their learning communities to explore all that Lindner has to offer.
- **Specialized Academic and Experiential Learning**: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- **Personalized Honors Communities**: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the

co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)
Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Real Estate

Duration: 4 Years Total Credits: 120 Award: BBA

Overview

Real estate professionals provide a service that affects lives, and they contribute to development that impacts societies everywhere. The industry spans a wide variety of related opportunities, including mortgage banking, construction, title insurance, property management, brokerage and leasing, appraising and real estate development. For those with a good knowledge of the industry, coupled with an entrepreneurial spirit, real estate can provide a profitable career.

Success

Individuals who are successful in the real estate industry possess excellent "people" and sales skills. Other attributes include:

- Excellent oral, written and electronic communication capabilities
- Ability to take risks
- Strong initiative and goal-driven qualities
- Organizational skills
- Analytical problem solving
- Leadership skills
- Competence in decision-making
- Capacity for teamwork
- Ability to multi-task

Career

Opportunities of this program are numerous and vary greatly.

Positions include:

- Brokerage and leasing
- Property management
- Urban planning and administration
- Corporate real estate management
- Land development and construction
- Real estate financing
- Appraisal
- Investment analysis
- Asset management
- Consulting
- Market research
- Feasibility analysis

Majoring

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one’s passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The real estate major requires completion of 18 semester hours of courses in the major.

Minoring

UC's Lindner College of Business students may select real estate as a major, part of a double major or a minor, allowing students to add real estate as a second area of expertise to their chosen major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaurate degree programs may pursue a discipline specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors Website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- **Dedicated Infrastructure of Honors Faculty and Staff**: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- **Foundation for Exploration, Freedom for Flexibility**: Students will utilize their learning communities to explore all that Lindner has to offer.
- **Specialized Academic and Experiential Learning**: An accelerated, interdisciplinary curriculum with problem solving as a common thread.
- **Personalized Honors Communities**: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Business Administration Program (Traditional Studies)
Freshman applicants to the BBA programs, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Business Analytics

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Business Analytics is a rapidly expanding business discipline, enabled by explosive growth in data, computing power and software availability. Analytics can be defined as the scientific process of transforming data into insights, and ultimately into better decisions. Graduates from UC's Carl H. Lindner College of Business with a bachelor of science degree in business analytics are well-equipped to apply descriptive, predictive and prescriptive models to data in order to help organizations better analyze data and make better operational and strategic decisions.

Success

Business analytics students are individuals with strong technical and quantitive abilities who have a natural curiosity for investigating how data can be used to generate insights and improve decisions. Successful professionals in business analytics can communicate with both technical and non-technical stakeholders to help frame important questions, determine what data are needed, apply appropriate analytics models, and then translate the output of those models to postively impact organizations and society. Other attributes of successful graduates include:

- Quantitative proficiency
- Ability to use computer programming languages
- Inquisitive nature to ask questions and seek answers
- Ability to translate ill-formed questions into structured problem-solving methodologies
- Attention to detail
- Excellent oral and written communication capabilities
- Ledership skills
- Capacity for teamwork

Career

UC Lindner College of Business graduates with a degree in business analytics fulfill a critical need for companies across all industries. Likely job roles filled by graduates include positions as data analysts, risk analysts, data scientists, management scientists, and management consultants, as well as roles associated with specific functional areas such as marketing analytics, healthcare analytics, supply-chain analytics, sports analytics, and others.

Some graduates may also choose to extend their education in business analytics by continuing on to earn a Master of Science in Business Analtyics degree from the Carl H. Lindner College of Business. These students will expand the depth of their knowledge in analytics as well as be exposed to additional tools and methodologies for implementing business analytics.

Majoring

UC is one of the few universities in the world to offer a business analytics degree at the undergraduate level. The bachelor of science degree in business analytics ensures that students are exposed to many different topics in descriptive, predictive and prescriptive analytics including statistical modeling, data management, data visualization, regression, forecasting, data mining, and decision modeling. Co-ops or internships are strongly encouraged for students seeking to earn a degree in business analytics. As the birthplace of co-op, and with a location in Cincinnati that is home to many firms that specialize in business analytics, UC is well positioned to provide these experiences to students.

The Lindner First Year Experience (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one’s passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The bachelor of science in business analytics degree requires completion of 18 semester hours of courses in the major. This allows ample additional credits to pick up additional minors or even another degree to complement the degree in business analytics.

Minoring

UC Lindner College of Business also offers a minor in business analytics, allowing students to add business analytics as a second area of expertise to their chosen major.

Lindner students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline-specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines.

To add a minor, students who wish to add a minor should follow these instructions.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

The bachelor of science degree in business analytics is one of the few undergraduate programs of its kind in the nation. The degree builds upon the Lindner College's long history of success in business analytics education and utilizes UC's location in Cincinnati, Ohio, where many leading companies are located who specialize in using analytics capabilities as a competitive advantage. The UC Center for Business Analytics helps to connect UC students and faculty to leading analytics practitioners in Cincinnati and beyond by facilitating experiential-education opportunties for students and research opportunities for faculty.

Multiple organizations have recognized Lindner College's business analytics programs as being among the best such programs in the world. The faculty in the Operations, Business Analytics & Information Systems Department are leaders in their field; many of the faculty are recognized thought-leaders in analytics based on their research and educational accomplishments. The best-selling textbooks in analytics are authored by UC Lindner College faculty.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- Dedicated Infrastructure of Honors Faculty and Staff: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.
- Foundation for Exploration, Freedom for Flexibility: Students will utilize their learning communities to explore all that Lindner has to offer.
- Specialized Academic and Experiential Learning: An accelerated, interdisciplinary curriculum with problem solving as a common thread.

- **Personalized Honors Communities**: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Science in Business Analytics

Freshman applicants to the bachelor of science in business analytics degree, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;
- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of business administration is granted to those who satisfactorily complete the required coursework for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses and the last 30 hours of your degree must be taken in residence) and must contract for graduation with an academic advisor.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Industrial Management

Duration: **4 Years** Total Credits: **120** Award: **BSIM**

Overview

Because of the complexity of most production systems, managers responsible for ensuring delivery of goods and services in every industry require an enormous amount of assistance and support. Industrial management graduates from UC's Carl H. Lindner College of Business oversee the planning, scheduling and coordination of work flow and processing activities to deliver quality products and services effectively and efficiently. They support other managers in finance and marketing functions to make the overall organization operate effectively.

A degree in industrial management positions students for such challenges, through education in subjects pertinent to direct supervision of tasks (line jobs) as well as support activities such as quality management, project planning and materials control (staff jobs).

Success

Industrial managers are individuals with strong technical and quantitative abilities who desire management careers. Successful professionals in the industrial management field are problem solvers and have an analytical mind set. Other attributes include:

- Quantitative proficiency
- Ability to identify and control risk
- Strong organizational skills
- Attention to detail
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision making
- Capacity for teamwork

Career

UC's bachelor's degree in industrial management (BSIM) enjoys an outstanding reputation and recruiters throughout the Midwest compete for its quality graduates. Positions offered recently to graduating students include production manager, manufacturing engineer, industrial marketing representative and purchasing manager, among others. Salaries are typically in the 90th percentile of graduates from the Lindner College of Business. Recently a vice president of purchasing at a major automobile firm commented, "The alumni base of BSIMs from Cincinnati is really strong. BSIM graduates from UC are in top positions in every firm in the automotive industry supply chain."

Majoring

The BSIM, which provides the operations management training to technically-oriented students, is one of the few undergraduate programs of its kind in the nation. This degree provides a unique curriculum combining engineering basics (mathematics, physics, chemistry, mechanics) with the standard business courses. Co-op is strongly encouraged in the BSIM program to provide the valuable work experience and the foundation for contextual learning.

The **Lindner First Year Experience** (FYE), is an immersive experience centered around Experiential Learning and designed to develop business problem-solvers. It provides opportunities to cultivate one’s passions and interests to determine potential career paths, and provides high-impact practical learning to prepare students for real-world experiences. This, in turn, allows students to develop holistically—academically, socially, and professionally—while forming and fostering a sense of community within our college, university, and industry. Lindner's first year experience entails a student being placed into a Learning Community (LC) of approximately 20 or so other first year business students. The LC will take three business curricular classes together at a specific time block. Each student LC acts as a team throughout the first-year courses and works together on Project Strategy and Project Innovation. Through Project Strategy, students perform a strategic analysis of a real-world company. Teams meet with executives from the organization, research and brainstorm strategies, and ultimately present their recommendations to the company. Project Innovation encourages students to develop creative, entrepreneurial and innovative skills by dreaming up a new product or service that targets fellow college students. Students then build a complete business plan for their idea. LC's will also complete a Career Success Strategies course in the spring of their first-year to prepare for pursuing their first co-op. The Lindner FYE is a full year experience taking place in both the Fall and Spring semesters. Being involved with their LC for the entirety of their first year means students are supported in making campus wide connections to their peers, professors, advisors, and resources.

Additional first year courses include Mathematics, English composition, Economics, Business Communications and General Education requirements.

The lower core of the business curriculum includes Accounting, Business Law, Information Systems, Marketing and Business Analytics. Each class exposes all students to the fundamental business disciplines and prepares them to communicate across the different business functional fields. The upper core of the business curriculum, consisting of Finance, International Business, Management, Operations Management and Business Design and Ethics, continues to give students additional skills in business fundamentals. Course work in the student's chosen major allows students to build their skills as specialists. The capstone experience, taken before students are ready to graduate, involves a class project which ties together all they have learned throughout their time here in Lindner.

The BSIM major requires completion of 22 semester hours of courses in the major.

Minoring

The Lindner College of Business does not offer a minor in industrial management.

LIndner students may add a minor or double major in another discipline, allowing them to add a second area of expertise to their chosen major. Students who wish to add a minor should follow these instructions.

Qualified UC students enrolled in non-Lindner baccalaureate degree programs may also pursue a discipline specific minor in the Lindner College of Business or a minor in business administration, which follows a sequence of courses designed to give them experience in the business fundamental disciplines. To add a minor, students who wish add a minor should follow these instructions.

For more application information and a complete list of minor options, visit the Business Minors website.

Please note: students may not double count courses between Lindner majors and minors.

Advising

Academic advisors are trained to assist students and are available on an appointment basis and on a walk-in basis during specific periods. They can help with questions about scheduling, academic planning, course pre-requisites, the curriculum, and how study abroad and co-op fit with degree plans.

The Carl H. Lindner College of Business has assigned advisors for all students. Current students who need assistance may:

- Contact their advisor in My Bearcats Network
- Come to the Undergraduate Programs Suite in Lindner Hall
- Telephone (513) 556-7030

Prospective students interested in transitioning to Lindner are invited to attend an information session. Information session dates and times can be found online under transition students. Additional details about planning your transition can be supported by the Transition Advising Center. Transition students must attend orientation before registering for Lindner classes.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.

- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

The BSIM is one of the few undergraduate programs of its kind in the nation. The program enjoys an outstanding reputation, and its graduates, who are recruited vigorously, join a strong base of distinguished alumni.

Research by faculty who run the BSIM program has been ranked as high as fourth in the nation amongst all business schools.

The BSIM program has state of the art lab technology, including software licenses for Microsoft project, SAP R3 system for Enterprise Resource Planning (ERP), ARENA and Promodel for simulation and optimizers such as CPlex.

Special Programs

Lindner Business Honors (LBH) attracts ambitious students who are intellectually curious and face new challenges head on. In alignment with the college's unique distinctions, Honors is built on four pillars:

- **Dedicated Infrastructure of Honors Faculty and Staff**: A team of outstanding professionals to help student's leverage the skills and knowledge they develop to pursue new experiences.

- **Foundation for Exploration, Freedom for Flexibility**: Students will utilize their learning communities to explore all that Lindner has to offer.

- **Specialized Academic and Experiential Learning**: An accelerated, interdisciplinary curriculum with problem solving as a common thread.

- **Personalized Honors Communities**: Personalized communities that support the entire college experience and foster a special sense of legacy.

The Lindner College of Business offers a variety of **study abroad programs** in every continent of the globe ranging from one week to a full semester abroad. General international business and culture programs are offered to freshmen and sophomores while discipline specific programs are offered to upper classmen. Students receive credit toward their degree, while gaining real-world international experience in their area of study. Study Abroad includes academic coursework at UC, and lectures, company visits and cultural activities overseas. To learn more, visit Study Abroad.

Universal Co-operative Education provides students with real-world work experiences with leading businesses throughout the United States.** These opportunities are the perfect time for students to "test" out their major(s) and discover which type(s) of work they most enjoy. Our employer partners pay students real money and assign students real work (versus just "busy work") which means the co-op experience provides Lindner students with a huge competitive advantage when they enter the workforce. Because different employers and industries have different staffing needs throughout the year, co-op may be part-time, full-time, or during various terms. New first year students must complete two co-op rotations to meet graduation requirements.

**International co-ops are possible/supported but not common.

Admission Requirements

First-year applicants are those who have not enrolled in college or university courses (other than Dual Enrollment or College Credit Plus courses) since graduating from high school.

Bachelor of Science in Industrial Management

Freshman applicants to the BSIM program, please visit the Admission Requirements page for further information. Applicants are advised that Lindner requires four units* of college preparatory mathematics for admission to all bachelor degree programs. For the BSIM, a Physics laboratory science is required and a Chemistry laboratory science is recommended.

*Four units of college preparatory mathematics, to include at least algebra I and II, and two additional units such as calculus, pre-calculus, or finite mathematics.

Transferring To UC

Students wishing to transfer to the UC Lindner College of Business may find additional details about transfer requirements here.

Students may apply online at Admissions. Lindner admits transfer students to begin in each academic term.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Columbus State Community College
- Chatfield College

Changing Majors Within UC

Applicants wishing to transition from other UC colleges to the Lindner College of Business must meet or exceed each of the admission requirements stated below. Please note that the collegiate grade point average for students transitioning from other colleges is calculated utilizing all college-level course work attempted at each UC college and other universities attended.

1. Cumulative collegiate grade point average (GPA) of 2.5 or higher on a 4.0 scale over all course work.

2. Must demonstrate appropriate progress toward completion of the required mathematics courses.

- BBA or BA degrees: Math 1044 (Applied Calculus I – 3 hrs) with a grade of C- or better; or
- BBA or BA degrees: Math 1046 (Business Calculus – 5 hrs) with a grade of D- or better;

- BS degrees: Math 1061 (Calculus I – 4 hrs), C- or better

3.At least 30 completed semester hours.

To apply, complete the Change of College Web Form. Applications deadlines are listed on the application.

Lindner accepts transitions students every term. Students must meet the above admissions requirements by the end of the semester prior to admission.

International Student Requirements

The UC Lindner College of Business welcomes international applicants who seek a challenging academic environment. If your native language is not English, you will be required to take an English proficiency examination. Please reference the Office of Admissions Web site with international student information for the Lindner minimum standards.

International applicants at the first-year level must have a strong mathematics background and be prepared to begin the college's calculus sequence.

The University of Cincinnati requires that all transcripts be official copies with an official translation attached. Lindner requires all students who have earned credit at foreign universities to have the documents evaluated by a credit evaluation service prior to registering for classes at the university. A copy of the evaluation must be received by Lindner at least two weeks prior to the date the student is scheduled to register for classes.

Such an evaluation may be obtained from:

World Education Services
568 Broadway, Suite 301
P.O. Box 745
New York, NY 10013
USA
Web address: wes.org

Other such agencies may be located via the Internet.

Although the Lindner College of Business does not require international applicants to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT), it is highly recommended.

Contact the Office of Admissions for further information regarding admission procedures and deadlines for Lindner.

Graduation Requirements

The degree of bachelor of science in industrial management is granted to those complete satisfactorily the required course work for the specified degree, with university, college, major and minor grade point averages of 2.0 or better. This includes the university's general education requirements. All students must meet the residency requirements of the college (50% of business courses in the last 30 hours of your degree must be taken in residence) and must contract for graduation.

Application Deadlines

Prospective Freshmen - Additional details regarding the freshman application deadlines can be found here.

Changing Majors within UC- Students applying for admission to the Lindner College of Business from other UC colleges should complete a Change of College Web Form in accordance with the?application deadlines printed on the form.

Transferring to UC- Additional details regarding the transfer application for admission can be found here.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

Business Administration

Online

Duration: 1 Year Total Credits: 35 - 48 Award: MBA

Overview

The University of Cincinnati's dynamic and comprehensive online MBA program offers a mixture of academic, research-intensive learning combined with real-life learning experiences, teaching you to create solutions with real business impact. It's a chance to dive deep into the knowledge you need to develop key business skills, as well as an opportunity to show potential employers what you're made of.

The MBA online program faculty are the same faculty that teach on campus and are comprised of leading-edge thinkers, award-winning researchers and active business practitioners. You can earn your degree from our AACSB-accredited College of Business at an accelerated pace — in as few as 12 months.

https://online.uc.edu/masters-programs/business-administration/

Career

The MBA is a general management degree that improves career stability and mobility. Many management roles prefer candidates with an MBA. Also, the MBA is a good degree to help job-seekers switch career fields.

Seventy-two percent of Lindner MBA students who graduated during the 2019-2020 academic year accepted a full-time position within three months with an average strating salary of $93,681.

Curriculum

The coursework for the Master of Business Administration online is accelerated and based on 7-week terms to provide flexibility to students by compressing the average time to completion. This program includes MBA program courses, including a capstone experience, and a choice of electives, for a total of 38 credit hours. Additional business foundations courses will be required for students whose undergraduate degree is in a non-business field.

Admission Requirements

- GMAT or GRE score (optional)
- Résumé
- References
- TOEFL scores (if you are an international applicant)
- Unofficial transcripts are used for admissions review. Official transcripts required from all colleges attended when offered admission
- One Essay

Transferring To UC

Students can transfer up to 12 semester hours of graduate credit from an AACSB accredited university. The course must have been taken within the past five years, with a grade of B or better. Courses must be approved by the academic director.

International Student Requirements

Minimum required score for the IELTS is 6.5 and for the TOEFL is 90.

Graduation Requirements

The MBA degree is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or more. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study each academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Carl H. Lindner College of Business holds AACSB accreditation. AACSB International business accreditation is an achievement earned only by programs of the highest caliber. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. Less than one-third of U.S. business school programs and only 15% of business school programs worldwide meet the rigorous standards of AACSB International accreditation.

MBA

MBA Online

Duration: 1 Year

★Minimum Credits: 35 - 48 Credits

Business Foundations Courses

Students without an undergraduate degree in business may be required to take some or all of the following business foundations courses.

Course	Title/Desc	Credit
ACCT7000	Foundations in Accounting (C min)	2
BANA7011	Data Analysis (C min)	2
ECON7000	Foundations in Economics (C min)	2
FIN7000	Foundations in Finance (C min)	1
MKTG7000	Marketing Foundations (C min)	1
MGMT7000	Organizations (C min)	2

MBA Core Courses

Students must complete the following 11 core courses. Students with an undergraduate degree in a discipline listed below could be eligible to waive the core course in that discipline, dropping the minimum requirements to 21-22 hours.

Course	Title/Desc	Credit
ACCT7012	Accounting for Managerial Decisions (C min)	3
BA7010	Corporate Legal and Social Responsibility (C min)	2
BA7012	MBA Capstone (C min)	2
BANA7012	Decision Modeling (C min)	2
ECON7020	Managerial Economics (C min)	2
FIN7014	Financial Management (C min)	3
IS7011	Information and Technology Management (C min)	2
MGMT7012	Strategic Management (C min)	2
MGMT7014	Leadership and Organizations (C min)	2
MKTG7011	Marketing for Managers (C min)	2
OM7011	Operations and Supply Chain Management (C min)	2

Global Requirement

All MBA students are required to complete a 2 credit hour global component. Courses not listed below would require approval of the academic director.

Course	Title/Desc	Credit
MGMT7017	Managing Across Cultures (C min)	2
INTB8XXX+	Global Requirement All MBA students are required to complete 2 credits of global component. Any Lindner graduate study abroad course may be used to meet this requirement. (C min)	2

MBA Electives

Students must complete 12 credit hours of elective courses, 6000 level or above (graduate level excluding ACCT 7000, BANA 7011, ECON 7000, FIN 7000, MKTG 7000, MGMT 7000). Although business courses are the norm, business related courses from other colleges are considered with the approval of the academic director. Certificate requirements, available in a variety of business disciplines, are fulfilled with these elective hours. If MGMT 7017 is taken as a global requirement, it may not count as an elective.

Course	Title/Desc	Credit
6XXX+	MBA Electives	12

Curriculum Guide Versions:
MBA 2020
MBA-JD Dual Degree Student Group Fall 2020
MBA-MArch Dual Degree for Fall 2021

Admission Requirements

Application Checklist:

- **Resume:** Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammar mistakes. It should be no longer than two pages. *We recommend two years of work experience by the time you enter the MBA program. This may include co-op or internship experience.*
- **Transcript:** An unofficial transcript (or degree audit) is required from each institution attended, including in-progress coursework, even if from the University of Cincinnati. These documents must show a complete record of your courses and grades. Uploading an unofficial transcript is recommended, but an official transcript may also be sent. Your application will not be reviewed until all transcripts are received.
- **One Essay:**
  - At the University of Cincinnati Lindner College of Business, we value thought-driven leaders. With this in mind, please upload a personal statement expressing the following:
    - How will the pursuit of a Lindner MBA overcome a weakness and/or amplify a strength you have to become an effective leader?
    - How do you see the Lindner MBA degree, once obtained, changing or shaping your short-term and long-term career goals?

Formatting: We recommend that your essay be 250-500 words, double-spaced.

- Letters of Recommendation:
  Please select one recommender who was, or currently is, a supervisor that can speak to your professional experience. Letters of recommendations must come directly from the listed recommender on your application.

IMPORTANT: Your application will not move forward in the review process until we receive the letter of recommendation.

- Standardized Tests: The GMAT and GRE are currently optional. If submitting scores, they must be sent officially from the testing agency.
- Application Fee: Applicants are required to compete the $65 ($70 for international applicants) fee payment in order to complete their application.

International Student Requirements

English Language Proficiency Requirements:

The following exams and minimum scores are accepted as proof of English proficiency:

- TOEFL: minimum score of 90 iBT
- IELTS: minimum score of 6.5 overall band
- See this page for qualified waivers

Note: If you are an international student, please include your converted GPA using the WES iGPA Calculator in addition to your non-converted GPA and class (if applicable), as well as the country where you received your degree.

If your bachelor's degree is a three-year degree you must submit the free WES degree equivalency tool.

Graduation Requirements

The MBA degree is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or more. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study during the academic year of graduation.

Application Deadlines

Full-Time Cohort Deadlines: Application decisions for the full-time, cohort MBA program are released in rounds. A complete application (including fee payment and all materials received) must be submitted by the following dates:

- **Early Action:** October 15, 2024
- **Round 1:** December 15, 2024
- **Round 2:** February 15, 2025 (International final deadline)
- **Round 3:** April 15, 2025
- **Rolling:** June 15, 2025 (If space available)

Lindner (Online) MBA Deadlines:

Applied Economics

Duration: **1 Year** Total Credits: **30 - 38** Award: **MS**

Overview

Do you want to learn from leaders in the field about advanced econometrics, industrial organization, urban, regional, and labor economics? Do you want a graduate degree in economics that offers you exceptional job placement and the opportunity for significant career advancement opportunities? Are you looking for a master's program in economics that offers you the opportunity to study either full or part time?

The MS in Applied Economics at University of Cincinnati provides our students with a solid training in economic theory and applications, and also provides a very strong background in applied econometrics. By the end of the program, our students understand how to build sensible models based upon economic principles, and how to actually estimate, test, interpret, and explain these models.

Program highlights:

- Graduates satisfy all requirements to take the Certified Business Economist® exam from the National Association for Business Economics (NABE)
- Hands-on research experience in partnership with the Kautz-Uible Economics Institute and the UC Economics Center
- STEM discipline recognition for international students

Success

Over the past five years, more than half of our Master of Science in Applied Economics students accepted a full-time position before graduation. Our graduates earn an average starting salary in excess of $80,500 and are hired by companies including Amazon, J.P. Morgan Chase, Nielsen, and Procter & Gamble.

Career

The MS in Applied Economics degree provides students with an exceptional set of applied economic and econometric analytical tools that have demonstrated value in the marketplace. Graduates enjoy success as:

- Analysts in market research, insurance, healthcare, banking, and finance
- Positions with consulting firms as well as in public-sector planning and economic analysis organizations
- Excellent preparation for further study in a PhD program. Over the last several years, we have placed graduates in PhD programs at Indiana, Vanderbilt, Oregon, Duke, University of Texas, Purdue University, and others.

Curriculum Guide Versions:
22-MAS-APEC-MS

Admission Requirements

Prerequisites:

- Introductory-level course in microeconomic theory
- Introductory-level course in macroeconomic theory
- One semester, or two quarters, of college-level calculus
- One course in college-level statistics

Note: You may apply to the program without the prerequisite course(s), but they must be completed with grades submitted to the Lindner College of Business by June 1 prior to the start of the fall semester.

Application Checklist:

- **Resume:** Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.
- **Transcript:** An unofficial transcript (or degree audit) is required from each institution attended, including in-progress coursework, even if from the University of Cincinnati. These documents must show a complete record of your courses and grades. Uploading

an unofficial transcript is recommended, but an official transcript may also be sent. Your application will not be reviewed until all transcripts are received.

- **Personal Statement:** Please upload a personal statement expressing the following:
    - How will the MS Economics program prepare you to meet your career goals?
    - How does your background prepare you to be successful in the program?
    - What short- or long-term career goals do you have?
    - Optional: Is there something in your resume or application that needs a brief explanation? Areas in this field may include academic outliers, career breaks, completion of additional coursework, etc.
    - Formatting: We recommend the personal statement be between 250 and 500 words, double-spaced.
- **Letters of Recommendation:**
  Please select two recommenders who will be able to discuss your professional performance, academic performance, and work style. This can include previous supervisors, faculty members, or mentors. Letters of recommendations must come directly from the listed recommender on your application.

  IMPORTANT: Your application will not move forward in the review process until we receive both letters of recommendation.

- **Standardized Tests:** The GMAT and GRE are currently optional. If submitting scores, they must be sent officially from the testing agency.
- **Application Fee:** Applicants are required to submit the $65 ($70 for international applicants) fee payment in order to complete their application.

International Student Requirements

English Language Proficiency Requirements:

The following exams and minimum scores are accepted as proof of English proficiency:

- TOEFL: minimum score of 80 iBT
- IELTS: minimum score of 6.5 overall band
- Duolingo (DET): minimum score of 110
- PTE: minimum score of 54
- See this page for waiver options

Note: If you are an international student, please include your converted GPA using the WES iGPA Calculator in addition to your non-converted GPA and class (if applicable), as well as the country where you received your degree.

If your bachelor's degree is a three-year degree you must submit the free WES degree equivalency tool.

Graduation Requirements

The degree of Master of Science in Applied Economics is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or above. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study during the academic year of graduation.

Application Deadlines

Accepting Applications for the Fall term

- International deadline: March 15, 2025
- Domestic deadline: July 31, 2025

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Carl H. Lindner College of Business holds AACSB accreditation. AACSB International business accreditation is an achievement earned only by programs of the highest caliber. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. Less than one-third of U.S. business school programs and only 15% of business school programs worldwide meet the rigorous standards of AACSB International accreditation.

MKTG7000	Marketing Foundations (C min)	1
IS6030	Data Management (C min)	2

Core Courses

Students must complete the following 5 core courses (18 credit hours).

Course	Title/Desc	Credit
ECON8010	Econometrics (C min)	4
ECON8011	Time Series Econometrics (C min)	4
ECON8020	Microeconomic Theory (C min)	4
ECON8021	Game Theory (C min)	2
ECON8030	Macroeconomic Theory (C min)	4

Career Management

Students in the Full-Time program must complete BA7077.

Course	Title/Desc	Credit
BA7077	Career Management (C min)	0

Capstone

All students must complete a culminating project; choose from the following.

Course	Title/Desc	Credit
ECON8090	Masters Research Practicum (C min)	2
ECON8093	Master's Internship (C min)	1 - 6
MLTI6000	Study Abroad for Graduate Students (C min)	1 - 25

Electives

Students must complete 10 credit hours from the following courses. Substitutions may be made with prior approval of the academic director of the program.

Course	Title/Desc	Credit
BANA7042	Statistical Modeling (C min)	2
ECON7023	Smart Contract Design (C min)	2
ECON8012	Advanced Statistical Models (C min)	2
ECON8013	Bayesian Econometrics (C min)	2
ECON8014	Spatial Econometrics (C min)	2
ECON8015	Panel Data Econometrics (C min)	2
ECON8031	Topics in Macroeconomic Theory (C min)	2
ECON8056	Competition and Regulation (C min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Administration Accounting

Duration: **1 Year** Total Credits: **30 - 54** Award: **MS**

Overview

The Master of Science in Business Administration-Accounting Program (MSBA in Accounting) is a degree program which, when added to a business bachelors degree in Accounting or its equivalent, satisfies the education requirements to sit for the Certified Public Accountant (CPA) Examination in the State of Ohio and 45 other states, the District of Columbia, Puerto Rico and Guam. The MSBA in Accounting Program is designed for the following types of students:

1. Students with a bachelors degree in accounting (30-semester graduate credits)
2. Students with non-accounting business degrees (54-semester graduate credits)
3. Students with non-business degrees (55-semester graduate credits)

The MSBA in Accounting Program is offered in two formats:

1. Full-Time Program where students can take 12 to 18 semester credits of coursework per term
2. Part-Time Program where students take two courses per term in the evenings

Successful accountants possess excellent critical thinking skills and the ability to analyze information. Other attributes include:

- Problem solving skills
- Ability to identify and control risk
- Strong communication skills
- Team building skills

Successful graduates entering the accounting field can enhance their marketability in three ways:

- High grades, as many accounting employers look for an overall GPA of 3.2 or greater
- Work experience in the form of co-op or internships
- Leadership experiences in campus and/or community groups

Success

Career

Graduates of the UC Lindner College of Business accounting program can find career opportunities in public and corporate accounting. Employers include both national and international public accounting firms (Big 4), regional and local public accounting firms, financial services firms, manufacturing firms, and retailers. Examples of jobs include:

- CPAs (Certified Public Accountants) in public auditing
- Managerial/cost accountants
- Internal revenue agents
- Tax consultants
- Internal auditors
- Financial executives
- Accounting professionals in governmental and non-profit organizations

ACCT3072	Introduction to Taxation (C min)	3
ACCT3073	Cost Accounting (C min)	3
ACCT4083	Auditing (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Administration Business Analytics

Duration: 1 Year Total Credits: 33 - 41 Award: MS

Overview

The University of Cincinnati Master of Science in Business Analytics program provides you with expertise in descriptive, predictive, and prescriptive analytics. That is one of the many reasons why the University of Cincinnati MS in Business Analytics has been ranked among the Top 10 business analytics programs in the United States (currently ranked #1 according to *Predictive Analytics Today*) and why many of our graduates are working as business analysts and data scientists at world-leading companies such as Google, Disney, Procter & Gamble, and Facebook.

The Lindner MS program in Business Analytics seeks full-time and part-time students with quantitative or technical backgrounds (mathematics, engineering, statistics, science, economics, etc.) who are interested in pursuing careers in the fields of business analytics and data science. Work experience is not required to enter the program, which can be completed in less than a year.

The MS Business Analytics program is recognized as a STEM (Science, Technology, Engineering, and Mathematics) designated program, eligible for the 24-month OPT extension for international students.

Success

Backed by Lindner's career-driven student resources, services and community partnerships, graduates of the MS in Business Analytics earn an average starting salary of $99,874 and have found employment with top companies, including:

- Google
- Disney
- Procter & Gamble
- Facebook
- Amazon
- Apple Inc.

Career

More than 90% of graduates are employed within three months of graduation. Students are hired by leading employers such as Amazon, Disney, U.S. Bank, IBM, Kroger, Macy's, Morgan Stanley, and Procter & Gamble. Recent graduates have accepted jobs in a wide variety of fields such as data science, consultancy, consumer analysis, and financial risk analysis.

Curriculum

Program core courses are in optimization, simulation, data mining, probability, data management, and statistical methods. Elective courses include data visualization, multivariate statistics, forecasting, case studies, current topics, operations management, and information systems. The capstone experience requires students to demonstrate their skills through a research project, an extended case analysis, or an internship.

UC Advantages And Special Opportunities

As part of our continual focus on the real-world application of classroom learnings, corporate partners visit the University of Cincinnati campus each week to present seminars, to recruit, and to interview our Master of Science in Business Analytics students.

Admission Requirements

Important Prerequisites for Business Analytics:

- Two semesters (or three quarters) of college-level calculus
- One course in linear algebra or matrix methods
- A basic knowledge of computer programing is not required for admission but must be acquired before starting the program. Examples of programming languages include: C, C++, Java, Matlab, Python, R, Ruby, SAS or Visual Basic.

Application Requirements:

- **Resume -** Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.

- **Transcript -** An unofficial transcript (or degree audit) is required from each institution attended, including in-progress coursework, even if from the University of Cincinnati. These documents must show a complete record of your courses and grades. Uploading an unofficial transcript is recommended, but an official transcript may also be sent if you do not have access to a copy of your unofficial transcript. Your application will not be reviewed until all transcripts are received.

- **Essays -** We recommend the personal statement be between 250 and 500 words, double-spaced. At the University of Cincinnati Lindner College of Business, we value thought-driven leaders. With this in mind, please upload a personal statement expressing the following:

    - How will the MS BANA program prepare you to meet your career goals?
    - How does your background prepare you to be successful in the program?
    - What short- or long-term career goals do you have?
    - Optional: Is there something in your resume or application that needs a brief explanation? Areas in this field may include academic outliers, career breaks, completion of additional coursework, etc.
- **Letters of Recommendation -** Please select two recommenders who will be able to discuss your professional performance, academic performance, and/or work style. This can include previous supervisors, faculty members, or mentors. Letters of recommendation must come directly from the listed recommender on your application. IMPORTANT: Your application will not move forward in the review process until we receive both letters of recommendation.

- **Standardized Tests -** The GMAT and GRE are optional. If you choose to submit scores, they must be sent officially from the testing agency.

- **Application Fee -** Applicants are required to complete the fee payment of $65 ($70 for international applicants) in order to complete their application.

International Student Requirements

English Language Proficiency Requirements:

The following exams and minimum scores are accepted as proof of English proficiency:

- TOEFL: minimum score of 95 iBT
- IELTS: minimum score of 6.5 overall band
- Duolingo minimum score of 110
- See this page for qualified waivers

Note: If you are an international student, please include your converted GPA using the WES iGPA Calculator in addition to your non-converted GPA and class (if applicable), as well as the country where you received your degree.

If your bachelor's degree is a three-year degree you must submit the free WES degree equivalency tool.

Graduation Requirements

The degree of Master of Science in Business Analytics is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or higher. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study each academic year. Students must also be registered for at least one credit hour in the year of graduation.

Application Deadlines

Fall 2025

- Final International Deadline: March 15, 2025

- Final Domestic Deadline: July 1, 2025

Accreditation

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Administration Finance

Duration: **1 Year** Total Credits: **30 - 38** Award: **MS**

Overview

The University of Cincinnati's Master of Science in Finance is ranked 7th overall (4th among public institutions) among the best, most affordable programs in the nation by Master of Finance Degrees.

Designed for our world's future financial leaders, the University of Cincinnati's Master of Science in Finance program provides students the training in both the theory and application of financial concepts needed to succeed in the industry. Our nationally-ranked program is among the Top 10 best value programs in the country, allowing you to get the most out of your investment, while also putting your career at the forefront.

Success

Lindner Master of Science in Finance graduates achieve a 92% placement rate within three months of graduation, earning an average starting salary of $85,901. Our alumni have been hired at successful companies and organizations such as:

- Citibank
- Goldman Sachs
- EY
- Fifth Third Bank
- Fidelity
- United Nations

Career

Whether your interest is in financial planning, investments, real estate, corporate finance, or risk management and insurance, our MS Finance program enables you to fast track your career. Recent graduates have accepted jobs in a wide variety of fields, including investment banking, corporate finance, wealth management, financial risk management, portfolio management, lending, financial planning and analysis, private equity, equity analyst, and real estate development.

MS Finance/MBA Dual Degree 2020

Admission Requirements

Application Requirements:

- **Resume -** Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.

- **Transcript -** An unofficial transcript (or degree audit) is required from each institution attended, including in-progress coursework, even if from the University of Cincinnati. These documents must show a complete record of your courses and grades. Uploading an unofficial transcript is recommended, but if you do not have access to your unofficial transcript, an official transcript may also be sent. Your application will not be reviewed until all transcripts are received.

- **Essays -** We recommend the personal statement be between 250 and 500 words, double-spaced. At the University of Cincinnati Lindner College of Business, we value thought-driven leaders. With this in mind, please upload a personal statement expressing the following:

    - How will the MS Finance program prepare you to meet your career goals?
    - How does your background prepare you to be successful in the program?
    - What short- or long-term career goals do you have?
    - Optional: Is there something in your resume or application that needs a brief explanation? Areas in this field may include academic outliers, career breaks, completion of additional coursework, etc.

- **Letters of Recommendation -** Please select two recommenders who will be able to discuss your professional performance, academic performance, and/or work style. This can include previous supervisors, faculty members, or mentors. Letters of recommendation must come directly from the listed recommender on your application. IMPORTANT: Your application will not move forward in the review process until we receive both letters of recommendation.

- **Standardized Tests -** The GMAT and GRE are optional. If you choose to submit scores, they must be sent officially from the testing agency.

- **Application Fee -** Applicants are required to complete the fee payment of $65 ($70 for international applicants) in order to complete their application.

International Student Requirements

English Language Proficiency Requirements:

The following exams and minimum scores are accepted as proof of English proficiency:

- TOEFL: minimum score of 90 iBT
- IELTS: minimum score of 6.5 overall band
- Duolingo minimum score of 110
- See this page for qualified waivers

Note: If you are an international student, please include your converted GPA using the WES iGPA Calculator in addition to your non-converted GPA and class (if applicable), as well as the country where you received your degree.

If your bachelor's degree is a three-year degree you must submit the free WES degree equivalency tool.

Graduation Requirements

The degree of Master of Science in Finance is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or more. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study during the academic year of graduation.

Application Deadlines

Fall 2025

- Final International Deadline: March 15, 2025
- Final Domestic Deadline: July 1, 2025

Spring 2026

- Priority & International Deadline: October 1, 2025
- Final Domestic Deadline: November 15, 2025

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Carl H. Lindner College of Business holds AACSB accreditation. AACSB International business accreditation is an achievement earned only by programs of the highest caliber. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. Less than one-third of U.S. business school programs and only 15% of business school programs worldwide meet the rigorous standards of AACSB International accreditation.

Admission Requirements

Application Requirements:

Resume - Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.

Transcript - You must have a US bachelor's degree from an accredited institution, or for international students the equivalent of a US bachelor's degree by the time of application. You may submit an unofficial copy of all of your undergraduate and graduate transcripts (and degree documents if applicable) with your application; official transcripts will be required if you're admitted and enroll.

If you are an interntinal applicant, you may be required to submit a NACES approved course by course evaluation on your transcript. Please contact the Graduate Programs Office to see if this is a requirement for your program.

Essays - Please complete the following prompt in 500 words or less:

Why do you want to complete this program and how will it help you in your chosen career field?

Letters of Recommendation - Please select two recommenders who will be able to discuss your professional performance, academic performance, or work style. This can include previous supervisors, faculty members, or mentors. Letters of recommendation must come directly from the listed recommender on your application.

IMPORTANT: Your application will not move forward in the review process until we receive both letters of recommendation.

Standardized Tests - The GMAT and GRE are optional, however, we will consider the scores in the application process, if submitted. The admissions committee accepts the GMAT) Graduate Management Admissions Test) and GRE (Graduate Record Examination) test scores.

Test scores must be sent officially from the testing agency to UC.

Application Fee - Applicants are required to compete the $65 ($70 for international applicants) fee payment in order to complete their application

Transferring To UC

Students can transfer up to 12 semester hours of graduate credit from an AACSB accredited university. The course must have been taken within the past five years, with a grade of B or better. Courses must be approved by the academic director.

International Student Requirements

English Proficiency

If your native language is not English, you must demonstrate your proficiency in English. This includes submitting an IELTS, TOEFL, or Duolingo test score. Please click the link below to see the minimum score to be eligible for the program.

Entry Exam Requirements

Graduation Requirements

The degree of Master of Science in Finance is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or more. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study during the academic year of graduation.

Application Deadlines

Application Deadlines

- Apply by the priority deadline for first consideration for funding, an earlier admissions decision, additional time to find housing, and for international students, additional time to secure your visa

-Applications will close when a program reaches capacity, so it's important to apply early

-Your application is not considered complete until we have all the application materials (listed below)

Summer 2024

- Part-Time start only
- Priority: February 15, 2024
- Final Domestic: April 15, 2024
- International applicants are not permitted to enroll in Summer part-time study

Fall 2024

- Priority & international deadline: January 31, 2024
- International deadline: April 15, 2024
- Final Domestic: July 31, 2024

Spring 2025

- Priority & International deadline: October 15, 2024
- Final Domestic: December 1, 2024

Business Administration Information Systems

Duration: **1.5 Years** Total Credits: **36 - 45** Award: **MS**

Overview

The Lindner Master of Science in Information Systems program presents an innovative leading-edge curriculum that is designed to give students the skills necessary to succeed in a challenging career. With daytime, evening, and weekend classes available, the program attracts students from diverse backgrounds who share a common passion for technology.

A significant and unique feature of the program is that it requires an experiential component for both full-time and part-time students. The experiential component gives students the opportunity to work with faculty in applying their classroom education to critical projects in their internships or full-time positions.

Success

Lindner Master of Science in Information Systems graduates achieve a 92% placement rate within three months of graduation, earning an average starting salary of $89,073. Our alumni have been hired at successful companies and organizations such as:

- Deloitte
- EY
- Cummins
- General Electric
- SAP
- KPMG
- PwC
- Accenture
- Proctor & Gamble
- Unilever

Career

Graduates with a Master's in Information Systems aren't just advancing their education; they become sought-after employees, powering up their salary potential. As businesses dive deeper into the digital realm, from software nuances to the vast expanse of cloud computing, there's a surging demand for experts.

IS8040	Enterprise Architecture (C min)	2
IS8064	CIO Forum (C min)	2
OM7083	Supply Chain Strategy and Analysis (C min)	2
IS8036	Survey of Machine Learning and Artificial Intelligence (C min)	2
BANA7046	Data Mining I (C min)	2
BANA7075	Machine Learning Design for Business (C min)	2
IS8070	Special Topics in Information Systems (C min)	1 - 2
IS7085	Governance of AI/ML Systems (C min)	2
IS7065	Generative Artificial Intelligence for Business (C min)	2
IS8036	Survey of Machine Learning and Artificial Intelligence (C min)	2
IS8060	IS Compliance and Policy (C min)	2

Non-IS Electives Requiring Pre-Approval (no more than 6 hours permitted)

Non IS electives must be graduate level courses (6000 level and above). These can be business or business-related, and must be approved by the academic director.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Administration Marketing

Online

Duration: 1 Year Total Credits: 32 - 39 Award: MS

Overview

The Master of Science in Marketing (MS-Marketing) program provides students with the tools and real-world experience necessary to pursue a successful career in marketing. The program has been developed to provide students with an innovative and specialized academic curriculum offering both breadth and depth of coverage in Marketing. Students will receive in-depth training in all areas of marketing, including branding, strategy, market research, buyer behavior, product management, and international issues. The program is designed to meet the needs of students who have graduate or undergraduate degrees in both business and non-business areas, and can be completed either full-time or part-time.

Experience-based learning is an integral component of the MS-Marketing program. Real-world field-study experiences will provide students with the opportunity to acquire practical, hands-on knowledge to establish or further their careers in the marketing profession.

Career

Earning an MS in Marketing opens the door onto a wide array of career opportunities. This program has helped our alumni find careers at high-profile organizations such as Abercrombie & Fitch, the Cincinnati Reds, Oracle, and Toyota. Many manager and director positions either require or recommend that candidates have a graduate degree.

MS-Marketing Online

Admission Requirements

Application Checklist:

Resume

Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.

Transcript

You must have a US bachelor's degree from an accredited institution, or for international students the equivalent of a US bachelor's degree, by the time of application. You may submit an unofficial copy of all of your undergraduate and graduate transcripts (and degree documents if applicable) with your application; official transcripts will be required if you're admitted and enroll. If you are an international applicant, you may be required to submit a NACES approved course by course evaluation of your transcript. Please contact the LCB Graduate Programs Office to see if this is a requirement for your program.

Essays

Please complete the following prompt in 500 words or less:

Please upload a Statement of Purpose that answers the following questions. What is your career focus in marketing? What role or job do you aspireto after completing your degree? What is your long term ambition?

Letters of Recommendation

Please select two recommenders who will be able to discuss your professional performance, academic performance, or work style. This can include previous supervisors, faculty members, or mentors. Letters of recommendation must come directly from the listed recommender on your application. IMPORTANT: Your application will not move forward in the review process until we receive both letters of recommendation.

Standardized Tests

The GMAT and GRE are currently optional. If submitting test scores, they must be sent officially from the testing agency.

Application Fee

Applicants are required to compete the $65 ($70 for international applicants) fee payment in order to complete their application.

Transferring To UC

Students can transfer up to 12 semester hours of graduate credit from an AACSB accredited university. The course must have been taken within the past five years, with a grade of B or better. Courses must be approved by the academic director.

International Student Requirements

English Proficiency

If your native language is not English, you must demonstrate your proficiency in English. This includes submitting an IELTS, TOEFL, or Duolingo test score. Please click the link below to see the minimum score to be eligible for the program.

Entry Exam Requirements

Graduation Requirements

The degree of Master of Science in Marketing is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or more. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study during the academic year of graduation.

Application Deadlines

Application Deadlines

- Apply by the priority deadline for first consideration for funding, an earlier admissions decision, additional time to find housing, and for international students, additional time to secure your visa

-Applications will close when a program reaches capacity, so it's important to apply early

-Your application is not considered complete until we have all the application materials

Summer 2024 - Part-Time start only (no international applicants may apply for a part-time start)

- Priority: February 15, 2024
- Final: April 15, 2024

Fall 2024

- Priority & international deadline: January 31, 2024
- International deadline: April 15, 2024
- Final Domestic deadline: July 31, 2024

Spring 2025

- Priority & International deadline: October 15, 2024
- Final Domestic deadline: December 1, 2024

Next Steps

The program makes every effort to review and respond to applications in a timely manner, typically within two to three weeks of the application being completed. During peak periods, or very early in the admissions cycle, additional review time may be needed.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Carl H. Lindner College of Business holds AACSB accreditation. AACSB International business accreditation is an achievement earned only by programs of the highest caliber. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. Less than one-third of U.S. business school programs and only 15% of business school programs worldwide meet the rigorous standards of AACSB International accreditation.

Admission Requirements

Application Requirements:

- **Resume -** Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.

- **Transcript -** An unofficial transcript (or degree audit) is required from each institution attended, including in-progress coursework, even if from the University of Cincinnati. These documents must show a complete record of your courses and grades. Uploading an unofficial transcript is recommended, but an official transcript may also be sent. Your application will not be reviewed until all transcripts are received.

- **Essays -** At the University of Cincinnati Lindner College of Business, we value thought-driven leaders. With this in mind, please upload a personal statement expressing the following:

- What specific professional changes are you seeking, and how do you believe this program will facilitate those changes? How will you leverage the University of Cincinnati Lindner Alumni network and connections with business leaders for your career advancement?
- What aspects of the marketing graduate program appeal to you and why?"
- What global issues are you interested in, and how do you see these elements benefiting your career?

Formatting: We recommend the personal statement be between 250 and 500 words, double-spaced.

- Letters of Recommendation - Please select two recommenders who will be able to discuss your professional performance, academic performance, and/or work style. This can include previous supervisors, faculty members, or mentors. Letters of recommendation must come directly from the listed recommender on your application. IMPORTANT: Your application will not move forward in the review process until we receive both letters of recommendation.

- Standardized Tests - The GMAT and GRE are optional. If submitting scores, they must be sent officially from the testing agency.

- Application Fee - Applicants are required to complete the fee payment of $65 ($70 for international applicants) in order to complete their application.

International Student Requirements

English Language Proficiency Requirements:

The following exams and minimum scores are accepted as proof of English proficiency:

- TOEFL: minimum score of 90 iBT
- IELTS: minimum score of 6.5 overall band
- ?Duolingo minimum score of 110
- See this page for qualified waivers

Note: If you are an international student, please include your converted GPA using the WES iGPA Calculator in addition to your non-converted GPA and class (if applicable), as well as the country where you received your degree.

If your bachelor's degree is a three-year degree you must submit the free WES degree equivalency tool.

Graduation Requirements

The degree of Master of Science in Marketing is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or more. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study during the academic year of graduation.

Business Administration Tax

Online

Duration: 2 Years Total Credits: 30 Award: MS

Overview

The Master of Science in Taxation Program is a degree program which, when added to a business baccalaureate degree in Accounting or its equivalent, satisfies the education requirements to sit for the Certified Public Accountant (CPA) Examination in the State of Ohio and 45 other states, the District of Columbia, Puerto Rico and Guam with similar education requirements. The MSBA in Taxation Program is designed for the following types of students:

1. Students with a baccalaureate degree in accounting (30-semester graduate credits)
2. Students with non-accounting business degrees (54-semester graduate credits)
3. Students with non-business degrees (55-semester graduate credits).

The MSBA in Taxation Program is offered as a part-time program where students take two courses per term in an online delivery modality.

Successful tax accountants possess excellent critical thinking skills and the ability to analyze information. Other attributes include:

- Problem solving skills
- Ability to identify and control risk
- Strong communication skills
- Team building skills

Successful graduates entering the accounting field can enhance their marketability in three ways:

- High grades, as many accounting employers look for an overall GPA of 3.2 or greater
- Work experience in the form of co-op or internships
- Leadership experiences in campus and/or community group

Career

Graduates of the UC Lindner College of Business accounting program can find career opportunities in public and corporate accounting. Employers include both national and international public accounting firms (Big 4), regional and local public accounting firms, financial services firms, manufacturing firms and retailers and others. In addition, it is not uncommon for accountants to be self-employed providing tax services as a consultant or through their own firm. Examples of jobs include:

- CPAs (Certified Public Accountants) in public auditing
- Internal revenue agents
- Tax consultants
- Internal auditors
- Financial executives
- Tax professionals in governmental and non-profit organizations

Admission Requirements

- Resume - Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.

- Transcript - An unofficial transcript (or degree audit) is required from each institution attended, including in-progress coursework, even if from the University of Cincinnati. These documents must show a complete record of your courses and grades. Uploading an unofficial transcript is recommended, but an official transcript may also be sent. Your application will not be reviewed until all transcripts are received.

- Goal Statement - Statement of purpose essay explaining in less than 500 words how the Lindner MS Tax program will further your career goals.
- **Letters of Recommendation -** One of recommendation. This can be an academic or professional recommender. Please note that the name and email address of the recommender are required.
- **Standardized Tests -** The GMAT and GRE are optional. f submitting scores, they must be sent officially from the testing agency.
- **Application Fee -** Applicants are required to complete the fee payment of $65 ($70 for international applicants) in order to complete their application.

International Student Requirements

English Language Proficiency Requirements:

The following exams and minimum scores are accepted as proof of English proficiency:

- TOEFL: minimum score of 80 iBT
- IELTS: minimum score of 6.5 overall band
- Duolingo minimum score of 110
- See this page for qualified waivers

Note: If you are an international student, please include your converted GPA using the WES iGPA Calculator in addition to your non-converted GPA and class (if applicable), as well as the country where you received your degree.

Graduation Requirements

The degree of Master of Science in Taxation is granted to those who satisfactorily complete the required course work, carrying a minimum GPA of 3.0 or more. The degree must be completed within five years of acceptance into the program. All students must contract for graduation and be enrolled for at least one credit hour of study each academic year.

Application Deadlines

Summer 2025	Priority : March 15, 2025 Final: April 15, 2025
Fall 2025	Priority : March 15, 2025 Final: July 1, 2025
Spring 2026	Priority: October 1, 2025 Final: November 15, 2025

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Carl H. Lindner College of Business holds AACSB accreditation. AACSB International business accreditation is an achievement earned only by programs of the highest caliber. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. Less than one-third of U.S. business school programs and only 15% of business school programs worldwide meet the rigorous standards of AACSB International accreditation.

Human Resources

Duration: **1 Year** Total Credits: **30 - 38** Award: **MSHR**

Overview

In an increasingly competitive global marketplace, leaders know that people are an organization's most critical resource. Bottom-line business success depends on the quality of its employees and the effectiveness of employee relations. The Lindner Master of Science in Human Resources program prepares students for leadership roles in managing people and building employee capabilities.

Success

In the graduate human resources degree program, you receive personalized career support connecting you to UC's extensive network of business professionals in Cincinnati and the Midwest. Top employers who have hired recent graduates of the HR program include:

- Cincinnati Children's Hospital
- General Electric
- Health Carousel LLC
- Intelligrated
- Market6 Inc.
- Medpace Inc.
- PNC Financial Services
- Macy's

Career

Our most successful graduates come with focused interest in the Human Resources function, excellent written and oral communication skills, and a deep interest in people. The ability to use data to address HR issues is also emerging as critical to success in HR.

Students from the Lindner MSHR program have positions with titles such as HR Director, HR Manager, HR Generalist, Director of Talent Acquisition, Benefits Director, and Compensation Manager. The Lindner Career Services office is available to assist MSHR students with placement upon graduation.

Admission Requirements

Application Requirements:

- **Resume -** Ensure your resume clearly lists the dates of any professional (ex: full-time role, internships, co-ops), volunteer, non-profit, or any other leadership experiences. There is no formatting requirement, however, please review your resume for any grammatical mistakes and it should not be longer than 2 pages.

- **Transcript -** An unofficial transcript (or degree audit) is required from each institution attended, including in-progress coursework, even if from the University of Cincinnati. These documents must show a complete record of your courses and grades. Uploading an unofficial transcript is recommended, but an official transcript may also be sent. Your application will not be reviewed until all transcripts are received.

- **Essays -** At The University of Cincinnati Lindner College of Business, we value thought-driven leaders, with this in mind please upload a personal statement expressing the following:

    - How will the MS HR program prepare you to meet your career goals?
    - How does your background prepare you to be successful in the program?
    - What short- or long-term career goals do you have?
    - Optional: Is there something in your resume or application that needs a brief explanation? Areas in this field may include academic outliers, career breaks, completion of additional coursework, etc.

Formatting: We recommend the personal statement be between 250 and 500 words, double-spaced.

- **Letters of Recommendation -** Please select two recommenders who will be able to discuss your professional performance, academic performance, and/or work style. This can include previous supervisors, faculty members, or mentors. Letters of recommendation must come directly from the listed recommender on your application. IMPORTANT: Your application will not move forward in the review process until we receive both letters of recommendation.

- **Standardized Tests -** The GMAT and GRE are optional. If submitting scores, they must be sent officially from the testing agency.

- **Application Fee -** Applicants are required to complete the fee payment of $65 ($70 for international applicants) in order to complete their application.

MGMT7087	High Performing Teams (C min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Administration

Duration: **5 Years** Award: **PHD**

Overview

The program is designed to provide the background and skills necessary to conduct independent research and to prepare the student for a primary career in academia (research and teaching). Areas of concentration include: Accounting, Economics, Finance, Management, Marketing, and Operations/Business Analytics/Information Systems.

Visit the Carl H. Lindner College of Business PhD Programs webpage to learn more about the program and its concentrations.

Career

Most graduates go on to tenure-track academic jobs, although some go into industry or government positions.

22DOC-BA-PhD-FIN
22DOC-BA-PhD-ACCT
22DOC-BA-PHD-OM
22DOC-BA-PHD-QA

Advising

Advising is available through the College Doctoral Program Director, the Assistant Program Director, and/or the Departmental Doctoral Coordinators.

Admission Requirements

- Official GRE or GMAT scores
- Official TOEFL or IELTS scores (international applicants only)
- Unofficial academic transcripts are used for admissions review. Official transcripts are required when offered admission.
- Two letters of recommendation
- Essay--statement of purpose
- Resume

Transferring To UC

Students must go through the formal application process. There are no transfer policies.

International Student Requirements

The Test of English as a Foreign Language (TOEFL) is required for all applicants whose native language is other than English. Official scores from the Educational Testing Service must be submitted before an admissions decision can be made. Copies of test scores are not acceptable. Presently, the minimum TOEFL score acceptable for graduate work in the College of Business is 100 internet-based (250 computer-based or 600 paper-based). The average TOEFL score for doctoral students is 111 internet- based (273 computer-based or 640 paper-based).

The English proficiency requirement is met for applicants with degrees (e.g., bachelor's or master's) earned in English from accredited universities and colleges in the US, Canada, England, Australia, New Zealand or other English-speaking countries. A copy of the transcript is required.

Upon arrival at the University, each international student's English language proficiency is re-tested. No international student will be permitted to teach in the classroom before he or she has demonstrated satisfactory oral and written English proficiency.

Graduation Requirements

The degree will be granted for no less than the equivalent of three years of full-time graduate study. The last 30 credits, exclusive of research credits, must be completed at the University of Cincinnati or under its direction.

Application Deadlines

The Graduate Faculty of the College of Business makes admission decisions for applicants to their departments. Admissions are highly selective and require strong intellectual abilities and a mature commitment to research. Previous academic background in business may not be necessary for admission.

Students are admitted for graduate study beginning in Fall semester only. There are no admissions in mid-year. The application deadline is January 15th. Before admission to the University is complete, all international students must fulfill US Immigration and Naturalization Service requirements and register with the UC Office of International Student Services.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Carl H. Lindner College of Business holds AACSB accreditation. AACSB International business accreditation is an achievement earned only by programs of the highest caliber. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. Less than one-third of U.S. business school programs and only 15% of business school programs worldwide meet the rigorous standards of AACSB International accreditation.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Analytics

Duration: 1 Year Total Credits: 18 - 19 Award: Certificate

Overview

Business Analytics is a rapidly growing field that is very visible in the work place today and offers many opportunities. Business Analytics uses data, statistical and modeling tools to improve organizational decision making by describing what has occurred, predicting what will occur and prescribing what should occur. These techniques are used by companies from consumer product goods giant Procter & Gamble to non-profits like the YMCA. This undergraduate certificate can be a strong complement to any business major by developing analytical skills that can be used across business functions including operations, finance, purchasing, accounting, marketing, economics, and management.

Success

Successful professionals in the business analytics field are problem solvers and have an analytical mind set. Other attributes include:

- Quantitative proficiency
- Ability to identify and control risk
- Strong organizational skills
- Detail oriented
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision-making
- Capacity for teamwork

Career

A number of business related career paths would benefit from the addition of Business Analytics certificate. Below are examples.

Accounting: Auditing, Actuarial Science

Economics: Econometrics

Finance: Financial Analysis, Financial Management, Risk Management

Information Systems: Database Analysis, Business Intelligence

Management: Strategy & Business Development, Human Resources

Marketing: Market Research, Market Analysis, Customer Management, Brand Management

OM&IM: Operations & Production Management, Logistics, Supply Chain, Management, Quality Analysis, Inventory Analysis

Business Analytics Certificate

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.

- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Admission Requirements

Lindner College of Business students may apply to add the minor to their major. Non-Lindner students already pursuing a baccalaureate degree in any college at the University of Cincinnati can add the minor to their program as long as they meet the following requirements:

- Have 30 earned semester credit hours
- Have at least a 3.0 University GPA and be enrolled in a four-year degree granting program
- Complete at least 50 percent of all minor coursework in the Lindner College of Business
- Earn a 2.0 in minor courses to be certified with the minor.

Students will be notified by email of their acceptance into the program and the process for registration in the Lindner classes required for the minor.

Graduation Requirements

Students who have been accepted to the certificate will see the certificate appear on their application for graduation. Students apply for graduation in the certificate as they normally would for their bachelor's degree.

Application Deadlines

Application deadlines for business minors and certificates follow the "application for change in college" dates.

Fall Semester – July 1

Spring Semester – November 1

Summer Semester – March 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Law and Ethics

Duration: **4 Years** Total Credits: **18** Award: **Certificate**

Overview

The **Business Law & Ethics Certificate Program** at the Carl H. Lindner College of Business delivers unique experiences through the intersection of law, business, and ethics. Courses combine exposure to both business and legal issues in which students learn about legal theories, explore ethical scenarios, and gain familiarity with regulatory issues affecting business policies, procedures and decisions. Students are introduced to laws covering intellectual property, consumer protection and reading and drafting contracts as well.

Success

Students interested in this program may have already taken the business law course (BLAW 2080) and wish to pursue the area further. Successful practitioners in this area possess critical thinking skills and the ability to analyze information. Students may seek to learn more effective negotiation skills.

Career

The **Business Law & Ethics Certificate Program** is ideal for aspiring corporate leaders, attorneys, entrepreneurs, and human resources and compliance professionals. Students will acquire critical reasoning skills needed to excel in industries ranging from corporations to government agencies to new business ventures. Experiences will help students to develop into principled decision makers, strong critical thinkers and effective leaders in the global workplace.

Electives can be tailored to complement your primary major. For example:

- Marketing Majors: The Business Law & Ethics Certificate Program is an excellent counter balance for Marketing Majors offering students an opportunity to sharpen their analytical skills and gain exposure to relevant topic areas such as Intellectual Property and Consumer Protection Laws (media law, deceptive advertising, etc.).
- Accounting Majors: The Business Law & Ethics Certificate Program is a strong complement for Accounting Majors offering students an opportunity to gain familiarity with regulatory issues in the field and lay the foundation for preparation for the CPA Exam.

Advising

Students may contact a business law professor to learn more about this certificate program. E-mail Professor Westrich to set up an appointment: westriwy@ucmail.uc.edu

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Admission Requirements

Current Lindner students may add this certificate to enhance their majors. Non-Lindner students already pursuing a baccalaureate degree in any college at the University of Cincinnati can add the certificate to their program as long as they meet the following requirements:

- Have 30 earned semester credit hours
- Have at least a 3.0 University GPA and be enrolled in a four-year degree granting program
- Complete at least 50 percent of all certificate coursework in the Lindner College of Business
- Earn a 2.0 in certificate courses to be certified with the certificate.

  To apply for the certificate, students should visit the Lindner Program Options site.

  Students will be notified by email of their acceptance into the program and the process for registration in the Lindner classes required for the minor.

Graduation Requirements

Students who have been accepted to the certificate will see the certificate appear on their application for graduation. Students apply for graduation in the certificate as they normally would for their bachelor's degree.

Application Deadlines

Applications deadlines for the business certificates follow the "application for change in college" dates.

Fall Semester– July 1

Spring Semester – November 1

Summer Semester – March 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

ORGL2070	Organizational Leadership and the Law	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Information Systems

Duration: **1 Year** Total Credits: **18** Award: **Certificate**

Overview

Information Systems (IS) program at UC's Carl H. Lindner College of Business prepares students to be a business problem-solver utilizing business data, information, technologies, and domain knowledge to support innovation and coordination of information resources. The objective of the IS certificate is to create IS visionary leaders who understand their evolving businesses environment, the role of IS, and targeted customer markets in delivering technology-based business solutions.

Success

Students who enter the IS certificate typically have an interest in information technology and an affinity for being in a fast paced, exciting environment where the underlying technology changes all the time. They have good communication skills and are needed to serve as translators between business needs and technology-based solutions, a role for which they are uniquely qualified. Finally, they possess the analytical/logical mind needed to translate ill-defined business problems and opportunities into clear, well-structured technology-based solutions.

Career

Given the wide diversity of possible roles in the field, students can choose a career path that best fits their skills and preferences, ranging from highly technical to primarily business focused. Those interested in the more business-oriented jobs have such starting options as business process or systems analysts, data modelers and project managers. Those interested in more technical roles can choose to become web developers, database managers or network designers.

A popular option pursued by many of our graduates is to join IT Leadership Programs at such corporations as GE, Citigroup, Johnson & Johnson and Fifth Third Bank. These programs expose students to multiple areas within the IS function of a company; graduates typically spend 4-6 months in each role, for a total of two years, after which they assume longer term roles in an area of mutual fit.

Accounting

Duration: **2 Years** Total Credits: **18** Award: **Minor**

Overview

Accounting is the language of business, and fluency in accounting opens many doors. All organizations require some kind of accounting system, and those who understand these systems are better positioned to manage their organizations. Activities are typically evaluated based upon accounting data in the form of budgets, internal reports, and financial statements. Familiarity with the systems that underlie these numbers is valuable to professionals working in large corporations, small businesses, hospitals, government, schools, and nonprofit organizations. Completing an Accounting minor will also enhance the ability to intelligently analyze, interpret and understand financial statements. When job-seeking, a minor in Accounting typically signifies a strong work ethic and superior analytical skills. However, please note: *A minor in Accounting will not normally qualify a student for an accounting position at a company, nor will the student with an accounting minor be eligible to sit for the CPA exam.*

Success

Successful accountants possess excellent critical thinking skills and the ability to analyze information. Other attributes include:

- Problem solving skills
- Ability to identify and control risk
- Strong communication skills
- Team building skills

Career

The accounting minor allows students to add value to their degree by developing specialized expertise in accounting that fits their particular goals and interests. Students enhance their resume with the skills, experience and knowledge necessary to compete in today's global business environment.

A number of career paths would particularly benefit from the addition of an Accounting minor. Examples of disciplines that would benefit from the addition of an Accounting minor include: Economics, Entrepreneurship, Finance, Information Systems, Marketing, Management and Law.

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.

- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Accounting scandals of recent years have resulted in increased visibility for the profession as well as additional regulatory scrutiny and reporting requirements. The demand for people with accounting skills is, therefore, extremely high and professional placement is close to 100 percent.

Admission Requirements

Lindner College of Business students may apply to add the minor to their major. Non-Lindner students already pursuing a baccalaureate degree in any college at the University of Cincinnati can add the minor to their program as long as they meet the following requirements:

- Have 30 earned semester credit hours
- Have at least a 3.0 University GPA and be enrolled in a four-year degree granting program
- Complete at least 50 percent of all minor coursework in the Lindner College of Business
- Earn a 2.0 in minor courses to be certified with the minor.

Students will be notified by email of their acceptance into the program and the process for registration in the Lindner classes required for the minor.

Graduation Requirements

Students who have been accepted to the minor will see the minor appear on their application for graduation. Students will apply for graduation in the minor as they normally would for their bachelor's degree.

Application Deadlines

Applications deadlines for the business minors follow the "application for change in college" dates.

Business Administration

Duration: 2 Years Total Credits: 30 Award: Minor

Overview

The business administration minor at the Carl H. Lindner College of Business presents an ideal option for students enrolled in non-business baccalaureate degree programs. This minor offers students with the opportunity to develop a strong business foundation that supports careers across varied professions and industries. Students studying in areas in the arts and sciences can develop professional distinction and enhance their resume with the business administration minor.

Success

Individuals who are successful in business have the following attributes:

- Quantitative proficiency
- Strong organizational skills
- Detail orientation
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision-making
- Capacity for teamwork

Career

Students who are majoring in a non-business discipline can add value to their degree with a complementary business minor. Students with a major in the arts or sciences develop professional distinction and can enhance their resume with a general business minor. This credential helps students stand out in today's competitive job market.

Economics

Duration: **1.5 Years** Total Credits: **18** Award: **Minor**

Overview

Economics is the scientific study of how society manages its scarce resources. The economics minor at the UC Carl H. Lindner College of Business (Lindner) helps students develop strong research and analytical skills while exploring issues such as the production of goods and services and the distribution of income among people. Economics involves both the investigation of theories to explain economic systems and the application of these theories to areas such as finance and banking, labor relations, poverty reduction, taxation and investment.

Success

Students who add an economics minor typically possess the strong analytical skills necessary for interpreting and evaluating arguments. Most enjoy reading and are successful when asked to work independently. Economics students are critical thinkers who enjoy vigorous in-class discussions and like to apply their learning to real-world problems, as well as to theoretical concerns. Consequently, they enjoy researching and debating different points of view on wide-ranging issues involving public affairs.

Career

Students who combine a minor in economics with another major increase their options for a wide variety of careers. Many career tracks require the kind of understanding and analysis of contemporary events and trends enhanced by the study of economics. These include professions in health, education, agriculture, urban and regional affairs, law, journalism, energy and environmental careers.

Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Special Programs

The *Kautz-Uible (K-U) Fund* provides fellowships to economics and business economics majors, typically in their junior or senior years. Scholarship awardees are selected based on a holistic evaluation including strong academic credentials and financial need. The application process begins in early March. The K-U fund also provides funding for student activities and trips that allow students to further their experiential education by exploring international and domestic issues of economic importance.

The *Undergraduate Economics Society* provides an excellent opportunity for students to enhance their experience here at the university. Undergraduate economics and business economics majors are afforded an ideal setting to develop strong interpersonal and organizational skills, as well as long-lasting friendships. In the past, the society has organized off-campus trips, including tours of Chicago, New York, San Francisco and Washington, D.C. These trips have been sponsored by the Hewett-Kautz Fund. The society, in conjunction with the department, has scheduled guest speakers and career development and placement seminars intended to assist and advise students on career choices. Meetings are held for its members and new faces are always welcome.

Admission Requirements

Lindner College of Business students may apply to add the minor to their major. Non-Lindner students already pursuing a baccalaureate degree in any college at the University of Cincinnati can add the minor to their program as long as they meet the following requirements:

Entrepreneurship/Family Business

Duration: **1.5 Years** Total Credits: **18** Award: **Minor**

Overview

Given that 90 percent of all firms are considered small or medium enterprises and that small businesses produce the majority of new jobs, the entrepreneurship minor at UC's Carl H. Lindner College of Business (Lindner) provides excellent preparation for the world of business. Emphasis is placed on practical issues and interactions related to individual, social and corporate entrepreneurship. Students who add the entrepreneurship minor to another degree program may be interested in starting their own ventures. Many with this background are also well prepared to work for businesses and organizations that interact with small, entrepreneurial and family ventures on a regular basis.

Success

Entrepreneurship is a way of thinking and acting. People who are successful in entrepreneurial ventures have vision that they pursue with drive, determination and dedication. They seek to create solutions to problems using reason and logic. Working with abstract concepts, they work to figure out the relationships of one to another. They possess excellent communication skills and are able to exercise good time- and project-management skills. Entrepreneurs dream of possibilities, see opportunity often where others do not, take on challenges and persevere to achieve their goals.

Career

While the aspiring entrepreneur will find this program quite appealing, it will also prepare students to work for larger businesses and support organizations that interact with small, entrepreneurial and family owned ventures. Coupling the entrepreneurship minor with another major enhances the student's entrepreneurial or organizational career options. For instance, adding this minor to an information systems major could lead to work as an independent consultant or work for a larger firm servicing small, entrepreneurial and family owned ventures. Combining this minor with an accounting major could lead to opening an independent tax consulting business or a career with a larger accounting firm in its small and medium sized business division.

Entrepreneurship/Family Business Minor

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Admission Requirements

Lindner College of Business students may apply to add the minor to their major. Non-Lindner students already pursuing a baccalaureate degree in any college at the University of Cincinnati can add the minor to their program as long as they meet the following requirements:

- Have 30 earned semester credit hours
- Have at least a 3.0 University GPA and be enrolled in a four-year degree granting program
- Complete at least 50 percent of all minor coursework in the Lindner College of Business
- Earn a 2.0 in minor courses to be certified with the minor.

Students will be notified by email of their acceptance into the program and the process for registration in the Lindner classes required for the minor.

Graduation Requirements

Students who have been accepted to the minor will see the minor appear on their application for graduation. Students apply for graduation in the minor as they normally would for their bachelor's degree.

Application Deadlines

Applications deadlines for the business minors follow the "application for change in college" dates.

Fall Semester – July 1

Spring Semester – November 1

Summer Semester – March 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

ENTR3XXX+	Any ENTR course at the 3000 level or higher.	3
MKTG4029	Direct Marketing	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Finance

Duration: 1.5 Years Total Credits: 18 Award: Minor

Overview

Finance is concerned with decisions about money. Finance decisions deal with how money is raised and used by businesses, governments and individuals.

The study of finance consists of several interrelated areas:

1. Financial markets and institutions. Banks, insurance companies, savings and loans, and credit unions are all part of the financial services marketplace.
2. Investments. Both businesses and individuals make decisions regarding the securities that will be selected for their investment portfolios.
3. Financial services. There are a number of specialized organizations that deal with the management of money, including brokerage firms, pension plans, and mutual funds.
4. Managerial finance. Firms must make decisions about cash flows, both inflows and outflows. Funds must be raised and wisely expended.

Success

Successful individuals in finance possess excellent critical thinking skills and the ability to analyze information. Other attributes include:

- Quantitative proficiency
- Ability to identify and control risk
- Strong organizational skills
- Detail-orientation
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision-making
- Capacity for teamwork

Career

Finance is a part of people's lives no matter their chosen career. Therefore, it is vitally important that students have some understanding of general finance concepts.

A number of career paths would benefit from the addition of a Finance minor.

Accounting: Financial Accounting, Tax Accounting

Economics: Economic Policy, Economic Development

Engineering: Project Management

Health Care: Health Care Administration, Health Care Policy

Information Systems: Financial Systems, Enterprise Systems

Management: Human Resources, Strategy

Marketing: Market Analysis, Pricing and Promotion

Insurance and Risk Management

Duration: 1.5 Years Total Credits: 18 Award: Minor

Overview

Insurance is an industry that employs people in a variety of functional roles, including accounting, finance, advertising, information systems, sales and sales management and operations. Risk management is an activity designed to strategically control the risks inherent in doing business in a variety of industries, such as financial services, health care, manufacturing and entertainment. The two are often paired, because the core business of both industries is to help others manage risks.

Success

Successful professionals in the insurance and risk management field have an analytical mind set. Other attributes include:

- Quantitative proficiency
- Ability to identify and control risk
- Strong organizational skills
- Detail oriented
- Excellent oral, written and electronic communication capabilities
- Leadership skills
- Competence in decision-making
- Capacity for teamwork

Career

The minor in insurance and risk management is recommended for students who want to pursue a career in a functional area of business (e.g. finance, accounting, marketing) in insurance and insurance-related enterprises. These students will gain an understanding of the operations, functional roles, products and services in the insurance industry. Students who seek to obtain a major in finance, actuarial science, business analytics, information systems or accounting may find it advantageous to combine their major with a minor in insurance and risk management. This will give them the understanding of the insurance industry as a context in which they might apply these functional skills.

International Business

Duration: 1.5 Years Total Credits: 18 Award: Minor

Overview

Global companies compete in a challenging business economy. This requires the need for business professionals who possess a combination of business and international skills. Formal international management education gives students cultural training, a comprehensive understanding of global and regional economies, and a socio-political analysis of multiple regions. Students who earn the international business minor at the UC Carl H. Lindner College of Business (Lindner) are positioned to be highly valued, especially for companies with overseas assignments.

Success

Individuals who are attracted to international business are those who are able to accept and work within the culture, customs and attitudes of another country. They must be flexible and be able to adapt to change and unexpected situations, some of which are beyond their control. Other attributes include:

- Excellent oral, written and electronic communication capabilities
- Ability to take risks
- Strong initiative and goal-driven qualities
- Organizational skills
- Analytical problem solving
- Leadership skills
- Competence in decision-making
- Capacity for teamwork
- Ability to multi-task

Career

The international business minor enhances students' career options in the global economy. Students who combine this minor with a finance major may find opportunities in international finance and banking. Coupling international business with a major in information systems, marketing or operations management can provide the experience to make graduates attractive for international assignment opportunities.

Marketing

Duration: **1.5 Years** Total Credits: **18** Award: **Minor**

Overview

Marketing is a broad and integrated system of activities that helps organizations provide products and services that satisfy customers. Selling and advertising are the most visible parts of marketing, but there is much more. Marketers conduct research to gain insight into consumer motivation and behavior. This enables them to provide products and services in the right assortment, with the right message, at the right place, at the right price and time.

Success

Successful marketers have excellent written and oral communication skills and are comfortable working in group settings. Typically, they are interested in understanding human behavior. Quantitative analysis and mathematical proficiency are also important in the marketing professions.

Career

Graduates of this minor in the Lindner College of Business pursue many different careers. A few examples include: professional selling, sales management, retail management, marketing research, customer service, brand management, product development, advertising and public relations.

Marketing Minor

UC Advantages And Special Opportunities

Success in today's business environment is primarily driven by who students are and how they act. Accordingly, Lindner offers an innovative approach to business education that we call PACE. The PACE framework allows students to create a customized roadmap for developing proficiency in *Professionalism, Academics, Character and Engagement* to ensure they can successfully pursue the personal and professional goals they are passionate about.

Professionalism

- Lindner's real-world learning opportunities ensure that our students learn the professional communication skills they need to excel in today's business environment.
- Lindner's Career Services (career services) team works with undergraduate students to help them obtain real world work experience through Lindner's Universal Co-operative Education requirement. All new first-year students must complete two co-op rotations to meet graduation requirements. Career services guides students in developing resumes, learning interviewing techniques, and obtaining the practical skills that fulfill the expectations of businesses.

Academics

- Lindner students are distinct individuals with unique goals and interests, and that is why our curriculum ensures that students have a foundational understanding of the key business functions. The breadth of majors and minors allows students to add a second major or minor that will customize their education for added value. Students can augment in-class learning with co-operative education, internships and international study abroad experiences.

Character

- Character means having the strength and conviction to both lead and work with teams made up of people with differing backgrounds and viewpoints. Lindner students build these skills through hands-on, collaborative projects, often working with Cincinnati businesses.

Engagement

- Students' lives and careers will be comprised of more than just work. Community service, citizenship and organizational involvement are all key components of personal growth. Lindner empowers students to get involved in the things they care about via the student organizations within the Lindner College of Business, the 300-plus organizations within the University of Cincinnati and ongoing partnerships with service organizations.

Admission Requirements

Lindner College of Business students may apply to add the minor to their major. Non-Lindner students already pursuing a baccalaureate degree in any college at the University of Cincinnati can add the minor to their program as long as they meet the following requirements:

- Have 30 earned semester credit hours
- Have at least a 3.0 University GPA and be enrolled in a four-year degree granting program
- Complete at least 50 percent of all minor coursework in the Lindner College of Business
- Earn a 2.0 in minor courses to be certified with the minor.

Students will be notified by email of their acceptance into the program and the process for registration in the Lindner classes required for the minor.

Graduation Requirements

Students who have been accepted to the minor will see the minor appear on their application for graduation. Students apply for graduation in the minor as they normally would for their bachelor's degree.

Application Deadlines

Applications deadlines for the business minors follow the "application for change in college" dates.

Fall Semester – July 1

Spring Semester – November 1

Summer Semester – March 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UC Lindner College of Business has been accredited continuously since 1919 by AACSB International, the Association to Advance Collegiate Schools of Business, the premier accrediting agency for business colleges.

INTB3093	Study Abroad: South Africa - Microbusiness Marketing Strategy	3
INTB3098	Study Abroad - European Union	3
INTB3094	Global Social Entrepreneurship: Sustainable and Profitable Solutions	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Professional Sales

Duration: **1.5 Years** Total Credits: **18** Award: **Minor**

Overview

The purpose of this minor is to prepare students for success in a professional selling environment and develop the ability to use professional sales skills for success in other careers. Sales representatives sell in the business to business sector, the service industry and in retailing.

Success

Successful sales representatives have excellent written and oral communication skills and are comfortable working in group settings. Typically, they are interested in understanding human behavior. Quantitative analysis and mathematical proficiency are also important in these professions.

Career

Sales graduates could be employed in inside sales (office environment) and outside sales (regional, domestic, or global travel). A sales minor insures success in the first job that will lead to future promotions.

A number of career paths would benefit from the addition of a sales minor.

Biology/Chemistry: Pharmaceutical sales

Communication: All types of sales, recruiting, and development

Economics: Financial services and insurance sales

Engineering: Technical sales

Finance: Financial services and insurance sales

Liberal Arts: All types of sales, recruiting, and development

Marketing: Advertising/service industry sales

Sports Management: Professional sports sales

Real Estate

Duration: **1.5 Years** Total Credits: **18** Award: **Minor**

Overview

Real estate is a profession that provides a service that affects lives and contributes to development that impacts societies everywhere. The industry spans a wide variety of related opportunities, including mortgage banking, construction, title insurance, property management, brokerage and leasing, appraising and real estate development. For those with a good knowledge of the industry, coupled with an entrepreneurial spirit, real estate can provide a profitable career.

Success

Individuals who are successful in the real estate industry possess excellent "people" and sales skills. Other attributes include:

- Excellent oral, written and electronic communication capabilities
- Ability to take risks
- Strong initiative and goal-driven qualities
- Organizational skills
- Analytical problem solving
- Leadership skills
- Competence in decision-making
- Capacity for teamwork
- Ability to multi-task

Career

The minor in real estate in the Carl H. Lindner College of Business is an ideal complement to many business degrees, as it will provide students with career options in functional areas within brokerage and leasing or property management firms, urban planning and administration or corporate real estate management. Students pursuing degrees in disciplines that impact the real estate field will also find the real estate minor to be of value. Related disciplines include architecture, construction, geography and urban planning.

Business Foundations

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

Knowledge of business can be a competitive advantage for individuals in virtually all professions, including medicine, pharmacy, music, architecture, engineering, and many others. This is true both for current students engaged in their initial job searches, and professionals who find themselves increasingly dealing with business related issues. This certificate provides a foundation in key business disciplines such as accounting, finance, marketing, and management. The certificate is deliberately designed with maximum flexibility to allow students to tailor the program to their individual interests and career needs.

Electives

Students must complete 2 credit hours of elective courses, 6000 level or above (graduate level excluding ACCT 7012, BA 7010, BA 7012,BANA 7012, ECON 7020, FIN 7014, MKTG 7011, MGMT 7012, MGMT 7014, OM 7011, IS7011). Although business courses are the norm, business related courses from other colleges are considered with the approval of the academic director.

Course	Title/Desc	Credit
ACCT6XXX+ BA6XXX+ BANA6XXX+ BLAW6XXX+ DASC6XXX+ ECON6XXX+ FIN6XXX+ HUMR6XXX+ IS6XXX+ MGMT6XXX+ MKTG6XXX+ OM6XXX+	Electives (C min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Business Foundations

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

Knowledge of business can be a competitive advantage for individuals in virtually all professions, including medicine, pharmacy, music, architecture, engineering, and many others. This is true both for current students engaged in their initial job searches, and professionals who find themselves increasingly dealing with business related issues. This certificate provides a foundation in key business disciplines such as accounting, finance, marketing, and management. The certificate is deliberately designed with maximum flexibility to allow students to tailor the program to their individual interests and career needs.

Corporate Finance

Duration: **1 Year** Award: **Graduate Certificate**

Overview

Finance is one of the foundational disciplines in business. There is the financial services industry that creates demand for finance professionals – this sector includes banks, insurance companies, brokerage and investment companies, and others that sell finance-based services. In addition, every business needs its own in-house professionals to manage the many financial decisions that must be made on an ongoing basis, such as capital budget allocations, developing strategies to raise and manage equity, long-term debt, and working capital, and investing the cash the business raises. The Graduate Certificate in Corporate Finance is aimed primarily at the latter market, including courses in Financial Information and Valuation, Financial Management, and Advanced Capital Budgeting.

Data Science

Duration: **1 Year** Total Credits: **15 - 19** Award: **Graduate Certificate**

Overview

Data Analytics is growing rapidly in organizations across the globe. From large to small, public to private, and profit to nonprofit, organizations are using analytics to improve decision making. Executives realize that leveraging new technologies and better utilizing available data can lead to more effective strategies and, ultimately, to better ways to service their customers.

However, many organizations lack the knowledge to effectively utilize data analytics. As a result, a strong demand for professionals with analytics skills has developed and will continue. The Data Analytics certificate prepares individuals to develop logical data models, construct data warehouses, build visually effective data displays and use sophisticated analytical techniques to glean valuable insights.

Students not in the MS-Business Analytics program must complete the following seven core courses (15 credit hours).

Course	Title/Desc	Credit
BANA6037	Data Visualization (C min)	2
BANA6043	Statistical Computing (C min)	2
CS6052	Intelligent Data Analysis (C min)	3
BANA7038	Data Analysis Methods (C min)	2
IS7034	Data Warehousing and Business Intelligence (C min)	2
IS7036	Data Mining for Business Intelligence (C min)	2
IS8034	Big Data Integration (C min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Digital Marketing

Duration: **1 Year** Total Credits: **12** Award: **Graduate Certificate**

Overview

In industry, marketing endeavors can be described across four inter-connected categories (reference Appendix A for additional detail):

1. ***Strategy + Analysis:*** Understanding buyer values and decision-making processes; brand positioning; outcome driven innovation; and inclusive and intercultural engagement.
2. ***Planning + Design***: digital content strategies, brand identity, sales team engagement, integrated marketing programs.
3. ***Execution***: Leverage engagement channels and tech platforms to distribute digital content using digital platforms and properties, interactive digital strategies, and technology, and leveraging digital behaviors to achieve digital sales.
4. ***Assessment***: Conduct program analytics using digital behavior-based business analytics insights to implement communication program changes; and integrate findings into eCommerce processes and technology platforms.

This core coursework for this certificate consists of 4 courses (8 credits) and addresses each of these categories. The elective course options (4 credits) enable a student to deepen their focus in a specific category or continue their studies across multiple category categories. This philosophy is consistent with how marketing professionals experience their careers; and consistent with the MS Marketing program's philosophy to enable student to be intentional with their coursework and design their studies to achieve a specific goal.

Career

Packaging our existing graduate courses in this Digital Marketing Certificate will enable UC to maintain competitive market position in (1) perception of expertise in digital media marketing and (2) alignment with Cincinnati's national profile as a source for digital agencies and prospective employees. Importantly, this certificate will align with the Digital Futures Initiative on campus. Upon completion of the Graduate Certificate in Digital Marketing, marketing professionals will be better prepared to lead their organizations using contemporary digital marketing strategies and proven decision science theory and practices.

Curriculum Guide Versions:
Digital Marketing Graduate Certificate 24

Admission Requirements

- Current résumé
- Essay (you can preview the essay for your program by starting an application)
- Scanned transcripts
- Contact information for one or more references who will provide letters of recommendation electronically. If you are currently in a graduate degree program at Lindner and want to use a recommendation from your previous application contact your advisor for assistance.
- International applicants will need to provide TOEFL or IELTS scores

The certificate will be open to all UC graduate students in good standing. However, members of the community with baccalaureate degrees can also apply. In general, successful applicants will be expected to have a GPA of 3.0 or higher in their undergraduate program. Transcripts will be required. Additional factors that will be considered are the applicant's experience level, and prior graduate education, if any. Applicants will not be required to take standardized tests for admission to the certificate.

Although the credits from the certificate can be subsequently applied towards a graduate degree program, admission to the certificate does not imply admission to the degree program. Students who wish to earn a graduate degree in addition to the certificate must apply, meeting the then current admission criteria for admission into the degree program. A student's performance on the certificate courses will be considered when making an admission decision to the degree program.

Enterprise Resource Planning

Duration: **1 Year** Award: **Graduate Certificate**

Overview

The Enterprise Resource Planning (ERP) Graduate Certificate is designed for students and working professionals who want to enhance their management and technical skills, or enter/advance careers, in enterprise systems. No prior ERP experience is required and students acquire skills in the evaluation, installation, utilization and application of ERP software across multiple business functions.

Current graduate students from any discipline, IT professionals, project team members and other professionals can benefit from a knowledge of ERP systems in any environment. Afternoon, evening and Saturday classes accommodate working professionals. Credits from the ERP Graduate Certificate can be applied toward a Master of Science in Information Systems degree.

Entrepreneurship

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

Entrepreneurship includes much more than just the "traditional" sole proprietor concept. There's also intrapreneurship (corporate entrepreneurship), social entrepreneurship, and global entrepreneurship. No matter what form your new venture might take, to succeed you need to know how to financially analyze the opportunity, how to secure your competitive advantage, how to market your new venture and ultimately how to manage your new business.

The Entrepreneurship certificate will provide you with those skills and also teach you how to leverage your current technical, creative and/or industry knowledge in an entrepreneurial context. Learn more: http://business.uc.edu/graduate/certificates/cert-crossdisciplinary.html

Finance

Duration: **1 Year** Award: **Graduate Certificate**

Overview

Finance is a foundational discipline in business. The financial services industry creates demand for finance professionals at banks, insurance companies, brokerage and investment companies, and others that sell finance-based services. Every business needs its own in-house professionals to manage the many financial decisions that must be made on an ongoing basis, such as capital budget allocations, developing strategies to raise and manage equity, long-term debt, and working capital, and investing the cash the business raises.

The Graduate Certificate in Corporate Finance is aimed primarily at the latter market, including courses in Corporate Finance and Advanced Capital Budgeting. http://business.uc.edu/graduate/certificates/cert-finance.html

Health Care

Finance

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

Health Care Finance is a decision science that relies on an analytical framework for thinking through different incentives which can be associated with different forms of payment. How societies pay for health care and how many resources are devoted to health affects both the care people can get and its quality. Knowledge is needed to help patients and health care beneficiaries pay for medical expenses in the short and long terms. http://business.uc.edu/graduate/certificates/cert-health.html

International Business

Duration: **1 Year** Award: **Graduate Certificate**

Overview

The Graduate Certificate in International Business is designed to give students in-depth expertise in cross-functional areas related to doing business in a global context. This includes issues such as cross-cultural management, global entrepreneurship, international marketing, international operations management, supply chain management, strategic management in the global context, and international financial management. Additionally, students have the opportunity to participate in global short-course seminar programs (1-2 weeks in length) in Europe, South America and China. This certificate will provide deep, cross-functional knowledge that is useful to those with a strong business background as well as those with expertise in other areas, such as engineering, medicine, design, liberal arts, etc., who have moved into, or are seeking to move into, a managerial role. The certificate emphasizes the use of logical/critical thinking and case analytic methods to solve global business problems.

The certificate in International Business Certificate is offered through the International Programs Office and the Management Department in the College of Business. Students will work closely with faculty experts in global business from diverse disciplines. This certificate has been developed in conjunction with leading Cincinnati-area companies to provide the necessary knowledge and skills to allow graduates to succeed in global business. Students who complete the certificate in International Business will be well positioned to improve effectiveness and increase efficiencies of existing global business operations or to move into new countries or regions. This certificate is also an excellent means of gaining a competitive advantage for those seeking, or entering, jobs with global business responsibilities.

The certificate in International Business can be completed in one calendar year. The credits earned in the International Business certificate can be applied toward an MBA or other advanced degree, pending admission to the degree program and within the limits stated by that program. http://business.uc.edu/graduate/certificates/cert-crossdisciplinary.html

Investment Management

Duration: **1 Year** Total Credits: **12 - 15** Award: **Graduate Certificate**

Overview

Finance is one of the foundational disciplines in business. There is the financial services industry that creates demand for finance professionals – this sector includes banks, insurance companies, brokerage and investment companies, and others that sell finance-based services. In addition, every business needs its own in-house professionals to manage the many financial decisions that must be made on an ongoing basis, such as capital budget allocations, developing strategies to raise and manage equity, long-term debt, and working capital, and investing the cash the business raises. The Graduate Certificate in Investment Management is aimed primarily, although not exclusively, at the financial services industry, including such courses as Options and Futures, and Portfolio Management.

Career

Investment managers provide money management services to individuals and to institutional entities such as educational institutions, governments, insurance companies, and pension and retirement plans.

Marketing

Duration: **1 Year** Total Credits: **12 - 13** Award: **Graduate Certificate**

Overview

Doctors, lawyers, architects, chemists, physical therapists, pharmacologists – all professions with deep technical and clinical expertise, yet they often need business and commercial skills to take full advantage of their new degree in the marketplace. If you are one of these highly trained technical professionals, you need to get a foothold in the marketplace and start your career moving forward. The Graduate Certificate in Marketing is designed to train you to do just that.

The Graduate Certificate in Marketing will prepare you to leverage your deep technical, clinical, or creative background for success in the business world, teach you the skills and expertise needed to apply marketing frameworks and tools to advance your professional goals within your chosen field, enable you to gain enough marketing expertise to increase your earning potential and remain competitive.

This unique certificate program provides flexibility to support your specific career track,

- Practice Building: This track is for the new attorney, doctor, accountant, architect, etc. who is planning to start or join a private professional practice
- Corporate Marketing: This track is for the pharmacologist, nurse, scientist, or other specialist seeking roles in the large corporate setting
- Creative Services Marketing: This track is for the designer, artist, musician, or technician in the creative field who wants to succeed at commercializing their creations
- Technical Sales: This track is designed for the engineer, scientist or other technical expert who seeks to join a firm working directly with customers – sales, customer service, or field consulting.

The credits you earn for the Graduate Certificate in Marketing may apply toward a Master of Science in Marketing degree should you decide to come back and complete this graduate work (subject to admission into the MS Marketing Program).

Operations Excellence

Duration: **1 Year** Total Credits: **12** Award: **Graduate Certificate**

Overview

The Graduate Certificate in Operations Excellence is designed to give students in-depth expertise in the functional areas of a business related to operations planning and execution. This includes issues such as supply chain management, supplier sourcing, staff scheduling, inventory reduction, quality initiatives, cost control and project management. This certificate will provide deep, specific knowledge that is useful to those with a strong business background as well as those with expertise in other areas, such as engineering, medicine, design, liberal arts, etc., who have moved into, or are seeking to move into, a managerial role. The certificate emphasizes the use of logical thinking and analytical methods to solve operational problems in service and manufacturing environments.

The certificate in Operations Excellence is offered through the Department of Operations & Business Analytics in the Carl H Lindner College of Business. Students will work closely with faculty experts in operations management and business analytics. This certificate has been developed in conjunction with leading Cincinnati-area companies to provide the necessary knowledge and skills to allow graduates to succeed in business. Students who complete the certificate in Operations Excellence will be well positioned to improve existing business processes, reduce costs and increase efficiencies. This certificate is also an excellent means of gaining a competitive advantage for those seeking, or entering, jobs with managerial responsibilities including cost metrics and operational efficiencies.

The certificate in Operations Excellence can be completed in one calendar year and requires 12 quarter-credit hours. These credit hours include a core course in operations management and then a flexible choice of 8 credit hours of advanced electives. The credits earned in the Operations Excellence certificate can be applied toward an MBA or other advanced degree, pending admission to the degree program and within the limits stated by that program. http://business.uc.edu/graduate/certificates/cert-operations.html

Professional Selling and Sales Management

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

In today's marketplace, customers have access to more information and more vendors than ever before. Thus, success in sales now requires more than just product knowledge. You must also be able to understand your customers' needs (especially the unspoken ones) and use those insights to form lasting win-win relationships.

The Professional Selling and Sales Management certificate will hone your listening, selling and negotiation skills. The curriculum is ideal for new sales professionals as well as for mid-career salespeople seeking leadership roles.

Public Economics

Duration: **1 Year** Total Credits: **12** Award: **Graduate Certificate**

Overview

Are you interested in working for a nonprofit or the government? The Graduate Certificate in Public Economics teaches the economic principles and empirical techniques necessary for leadership in these organizations.

Success

After earning this certificate, you will be able to:

- Develop an in-depth understanding of the institutions and incentives for careers in the public sector. Students are prepared to enter fields that include public health, education, environmental policy, and many others.
- Analyze and synthesize economic data sets from government agencies.
- Demonstrate statistical programming language skills and modelling techniques.
- Present findings from an economic analysis project, both in writing and in front of an audience.

Graduates with a public economics certificate demonstrate to future employers that they are trained in the analytical techniques, methodologies, and economic theories necessary to succeed in a public service career.

Real Estate

Duration: **1 Year** Total Credits: **12 - 15** Award: **Graduate Certificate**

Overview

As recent economic events have clearly demonstrated, the Real Estate sector can have a profound effect on the US economy. Thus, Real Estate, including both the residential and commercial sectors, is an area of considerable interest. The Lindner College of Business has a Center for Real Estate, which has strong programs and ties with the local corporate community. This Certificate addresses the need for and interest in Real Estate education among our graduate students and community partners.

Medical Sciences

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

This major is jointly housed in the UC College of Medicine and Cincinnati Children's Hospital, and is designed to ensure pre-medicine students who successfully complete the program are prepared to enter a medical school. UC offers a range of pre med programs and support services to help students find the best pathway to achieve their goals.

Medical Sciences comprises biological sciences, applied sciences & stem cell engineering, informatics and technology, with an emphasis on human health and disease. Medical Sciences provide the scientific basis for modern medical practices.

The Bachelor of Science in Medical Sciences will develop firsthand skills in scientific research, creative inquiry, writing and presenting, and working in medical facilities. Along with a strong foundation of knowledge in the core academic disciplines including chemistry, biology, physics, calculus, statistics, as well as the humanities, and social sciences, the program offers new foundational courses in integrative medicine. Students will be mentored by medical and graduate students, residents, medical researchers and faculty members of the College of Medicine and Children's Hospital. This academic and mentoring foundation will serve as the platform for advanced courses in physiology, genetics, pharmacology, biochemistry, and other medical sciences courses, which uniquely define this Major. Our expectation is that each student will navigate their studies within a close cohort of peers, and develop into a skilled student able to make informed decisions to successfully enter a field that they find satisfying, rewarding, and fascinating.

Success

We are dedicated to your success. Students who successfully complete the program are prepared to enter a medical school, or a graduate program in a health sciences or other scientific discipline. These can include traditional medicine (MD), Osteopathic Medicine (DO), Physician Assistant (PA), Anesthesia Assisting, pharmacy, dentistry, optometry, Chiropractic Medicine (DC), or a doctoral degree (PhD) in chemistry, biology, neuroscience, physiology, pharmacology, or a variety of other medically-related disciplines. Some of our students choose to enter graduate degree programs such as a master's in Public Health (MPH). This career path requires a very strong academic commitment. Not only should students maintain excellent academic performance, but also develop an intellectual curiosity. They must acquire the analytical skills and logical abilities to conduct scientific research, as well as excellent critical thinking and communication skills. Students should also possess a strong sense of social responsibility and a desire to contribute to human society.

If your objective is a career in medicine, UC's Pre-Professional Advising Center should be your first stop in preparing for medical school. In addition, the Association of American Medical Colleges (AAMC) provides information for prospective medical students at its website:

- UC's Pre-Professional Advising Center
- Aspiring Docs—a resource provided by the AAMC
- UC College of Medicine—information for prospective medical students

Additional Online Resources:

- The Student Doctor Network
- Medical School HQ

UC Pre-Medical Programs:

- Pre-Medical School Programs—UC offers a range of programs to enrich the experience of undergraduate students whose goal is medical school, including summer programs and MCAT review
- Master's in Physiology Program—UC's gap-year or special master's program designed to help students improve their credentials for admission to medical school

Career

Find out more about careers in medicine at the AAMC website

UC Advantages And Special Opportunities

University Honors Program (UHP)

The UHP is a university-wide program offering enrichment to undergraduate students through experiential, reflective, integrative and interdisciplinary learning. The UHP recognizes that there are many outstanding, high achieving undergraduates who are not admitted to the program as incoming freshmen. We encourage interested UC students to apply to the UHP through the transition admission process during their first or second year.

Opportunities for Academic and Professional Development

Applying for a prestigious fellowship will advance a student professionally and personally, and it signals to future employers that a student has the vision, transformational thinking skills, and drive to make significant contributions wherever their career takes them.

UC's Office of Nationally Competitive Awards (NCA) is a resource for outstanding students who wish to compete for these highly competitive fellowships. We encourage students to meet with us in their **freshman year** to identify appropriate opportunities and to receive guidance on developing themselves as competitive candidates. Contact nca@uc.edu to schedule an appointment.

Special Programs

UC Biomedical Research Programs:

- Summer Research Programs at UC College of Medicine
- PhD Programs in Biomedical Sciences at UC College of Medicine
- Medical Scientist Training Program (MSTP)—the combined MD/PhD training program run jointly by UC College of Medicine and Cincinnati Children's Hospital Medical Center

Admission Requirements

Admission to the Medical Sciences Program is very competitive. Students are expected to have a minimum 29 ACT or 1300 SAT, an unweighted High School GPA of 3.5 or higher, and involvement in extracurricular activities. With these criteria in mind, the program pays very close attention to co-curricular activities as well as the personal statement and essay that is submitted as part of the application for admission to UC. Applications are reviewed holistically keeping all of these aspects in mind.

Note: Meeting the above academic standards does not guarantee admission.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

BoK: FA,HP,HU	Fine Arts or Historical Perspectives or Humanities (C min)	3
Free Electives	Free Elective, if needed	0 - 3

Capstone (select one); complete sequence from fall semester

Course	Title/Desc	Credit
MEDS5031	Biomedical Research Capstone 2 (C min)	3 - 6
MEDS5051	Health & Community: Service-Learning Capstone 2 (C min)	3 - 6

Medical Sciences Electives - Group 1

Minimum of 6 credit hours

Group 1 Electives

If more than 6 credit hours taken from Group 1, additional credits will count towards Group 2 elective requirement.

Course	Title/Desc	Credit
MEDS3018	Cell & Cancer Biology (C min)	3
MEDS3022	Human Medical Genetics (C min)	3
MEDS3024C	Medical Microbiology (C min)	3
MEDS4029	Fundamentals of Medical Pharmacology (C min)	3

Medical Sciences Electives - Group 2

15 total credit hours required; only 6 hours can be from 2000-level coursework

Group 2 Electives

Course	Title/Desc	Credit
MEDS2040	Life in Medicine (C min)	3
MEDS2060	Introduction to Database Systems and Applications (C min)	2 - 4
MEDS2061	Introduction to Medical Informatics (C min)	3
MEDS2087	Fundamentals of Integrative Health and Medicine (C min)	3
MEDS2088	Science and Practice of Mind-Body Medicine (C min)	3
MEDS2089	Mental Well-being and Self-Care (C min)	3
MEDS2090	Music and Health (C min)	3
MEDS2091	The Philosophy of Yoga (C min)	3
MEDS2092	Introduction to Nature Based Therapies and Ecopsychology (C min)	3

Free Electives

Any academic course

MEDS courses that can be used as Free Electives

The following MEDS courses do not count toward Group 1 or Group 2 Electives.

Course	Title/Desc	Credit
MEDS3010	Special Topics in Medical Sciences (C min)	1 - 3
MEDS3015	Independent Study in Medical Sciences (C min)	1 - 3
MEDS3071	Healthy Lifestyle for Brain Health (C min)	3
MEDS3100	Healthcare Exploration through Patient Care 2 (C min)	1
MEDS3101	Healthcare Exploration through Patient Care 3 (C min)	3

Public Health

Online

Duration: 4 Years Total Credits: 120 Award: BS

Overview

The online Bachelor of Science in Public Health, at the University of Cincinnati (UC), integrates key aspects of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, communities and individuals. The interdisciplinary public health program is a collaboration of multiple colleges, at UC, working together to develop high quality public health professionals that will be able to work with communities, organizations and individuals to protect, maintain and enhance quality of life.

This program will not only prepare students for entry level public health jobs, it will also prepare students for various science-focused and public health graduate programs, including epidemiology, environmental health, healthcare leadership/administration, medicine, pharmacy, nursing, social work, and other health-related professions. Students in this program will increase their awareness of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system and the monitoring of diseases in the community through their study of applied public health research.

All graduates of the program are eligible to sit for the national certification exam to become certified health education specialists (CHES).

Success

Public health professionals must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Further, those majoring in public health are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for public health professionals, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Career

Graduates of this program can work in a variety of settings including public health departments, health organizations, non-profit organizations, voluntary health agencies, hospitals and insurance companies.

Potential career opportunities include:

- Health Educator
- Health Communication Specialist
- Prevention Specialist
- Environmental Health Specialist
- Infectious Disease Specialist
- Disaster Preparedness Coordinator

Minoring

We offer a minor in Public Health.

UC Advantages And Special Opportunities

Opportunities for internships are outstanding in the Greater Cincinnati area. Internship locations include Northern Kentucky Health Department, American Heart Association, Cincinnati Health Department, Cincinnati Children's Hospital Medical Center, Cradle Cincinnati, PreventionFIRST!, TriHealth, The Center for Closing the Health Gap and other outstanding companies and agencies.

Another advantage of studying at UC is the fact that the public health program is offered at the undergraduate and masters levels. This provides students with the opportunity to obtain advanced degrees and to interact with graduate-level public health students.

All graduates of the program are eligible to sit for the national certification exam to become certified health education specialists (CHES). The Certified Health Education Specialist (CHES) examination is a competency-based tool used to measure possession, application, and interpretation of knowledge in the Seven Areas of Responsibility for Health Education Specialists. There is a 90-Day

Eligibility Option offered to students scheduled to graduate within 90 days of the exam date, please speak with an Academic Advisor regarding this opportunity.

Special Programs

Eta Sigma Gamma

ESG is a national student health education honorary organization with a chapter (Gamma Eta) at UC. The mission of the honorary is to promote the discipline of health education by elevating the standards, ideals, competence and ethics of professionally prepared men and women in health education.

Delta Omega Honorary Society in Public Health - Gamma Rho Chapter

This organization strives to preserve, promote, and improve the health and well-being of the vulnerable populations, communities, and individuals in the Tristate area and Greater Cincinnati. To fulfill this mission, we foster collaborations among the public health and health professions in education, research, and service.

Global Public Health Brigades

GPHB strives to increase the quality of life of impoverished rural communities locally and abroad. This will be accomplished through student brigades to different communities, focusing on education about global and public health.

Healthcats

Healthcats is a pre-health student organization that focuses on health promotion, volunteerism, and undergraduate collaboration in the Cincinnati community. We strive to create an environment where students are able to learn about different healthcare career paths and apply teamwork skills through a variety of health-related group volunteer events. Our general body meetings aim to share opportunities and information with our members that may advance their undergraduate careers, as well as foster relationships between pre-health students that they may utilize in their future professional endeavors.

Admission Requirements

Admission requirements and instructions can be found on UC Online's B.S. in Public Health Admission Requirement page.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (UC and any prior institutions combined)

International Student Requirements

International students should contact the University of Cincinnati Office of Admissions for details. 513-556-1100.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec. 1*****
- Rolling Deadline: Feb 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Rolling Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Rolling Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

The online Bachelor of Science in Public Health, at the University of Cincinnati (UC), integrates key aspects of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, communities and individuals. The interdisciplinary public health program is a collaboration of multiple colleges, at UC, working together to develop high quality public health professionals that will be able to work with communities, organizations and individuals to protect, maintain and enhance quality of life.

This program will not only prepare students for entry level public health jobs, it will also prepare students for various science-focused and public health graduate programs, including epidemiology, environmental health, healthcare leadership/administration, medicine, pharmacy, nursing, social work, and other health-related professions. Students in this program will increase their awareness of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system and the monitoring of diseases in the community through their study of applied public health research.

All graduates of the program are eligible to sit for the national certification exam to become certified health education specialists (CHES).

Success

Public health professionals must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Further, those majoring in public health are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for public health professionals, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Career

Graduates of this program can work in a variety of settings including public health departments, health organizations, non-profit organizations, voluntary health agencies, hospitals and insurance companies.

Potential career opportunities include:

- Health Educator
- Health Communication Specialist
- Prevention Specialist
- Environmental Health Specialist
- Infectious Disease Specialist
- Disaster Preparedness Coordinator

Minoring

We offer a minor in Public Health.

UC Advantages And Special Opportunities

Opportunities for internships are outstanding in the Greater Cincinnati area. Internship locations include Northern Kentucky Health Department, American Heart Association, Cincinnati Health Department, Cincinnati Children's Hospital Medical Center, Cradle Cincinnati, PreventionFIRST!, TriHealth, The Center for Closing the Health Gap and other outstanding companies and agencies.

Another advantage of studying at UC is the fact that the public health program is offered at the undergraduate and masters levels. This provides students with the opportunity to obtain advanced degrees and to interact with graduate-level public health students.

All graduates of the program are eligible to sit for the national certification exam to become certified health education specialists (CHES). The Certified Health Education Specialist (CHES) examination is a competency-based tool used to measure possession, application, and interpretation of knowledge in the Seven Areas of Responsibility for Health Education Specialists. There is a 90-Day

Eligibility Option offered to students scheduled to graduate within 90 days of the exam date, please speak with an Academic Advisor regarding this opportunity.

Special Programs

Eta Sigma Gamma

ESG is a national student health education honorary organization with a chapter (Gamma Eta) at UC. The mission of the honorary is to promote the discipline of health education by elevating the standards, ideals, competence and ethics of professionally prepared men and women in health education.

Delta Omega Honorary Society in Public Health - Gamma Rho Chapter

This organization strives to preserve, promote, and improve the health and well-being of the vulnerable populations, communities, and individuals in the Tristate area and Greater Cincinnati. To fulfill this mission, we foster collaborations among the public health and health professions in education, research, and service.

Global Public Health Brigades

GPHB strives to increase the quality of life of impoverished rural communities locally and abroad. This will be accomplished through student brigades to different communities, focusing on education about global and public health.

Healthcats

Healthcats is a pre-health student organization that focuses on health promotion, volunteerism, and undergraduate collaboration in the Cincinnati community. We strive to create an environment where students are able to learn about different healthcare career paths and apply teamwork skills through a variety of health-related group volunteer events. Our general body meetings aim to share opportunities and information with our members that may advance their undergraduate careers, as well as foster relationships between pre-health students that they may utilize in their future professional endeavors.

Admission Requirements

Admission requirements and instructions can be found on UC Online's B.S. in Public Health Admission Requirement page.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (UC and any prior institutions combined)

International Student Requirements

International students should contact the University of Cincinnati Office of Admissions for details. 513-556-1100.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec. 1*****
- Rolling Deadline: Feb 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Rolling Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Rolling Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Public Health: Online

Duration: 4 Years

Minimum Credits: 120 Credits

Public Health Requirements

Core Coursework

Students will complete 45 credit hours of core coursework.

Course	Title/Desc	Credit
BIOL1XXX	BIOL1021 or BIOL1022 Students will complete either Introductory Biology I or II (C- min)	3
HPE1002	Introduction to Public/Community Health (C- min)	3
HPE1004	Introduction to Epidemiology (C- min)	3
COMM2004	Communicating About Health, Environment and Science (C- min)	3
PD2088	Professionalism and Public Health Pathways (C- min)	3
AFST3052	Community Health and Minorities: Yeserday, Today, and Tomorrow (C- min)	3
HLTH3098	Research Methods in Health Sciences (C- min)	3
HPE3071	Program Planning, Implementation and Evaluation (C- min)	3

Public Health Requirements

Core Coursework

Students will complete 45 credit hours of core coursework.

Course	Title/Desc	Credit
NBSN3087	Health Issues of Vulnerable and Marginalized Populations (C- min)	3
NBSN3090	Global Health (C- min)	3
POL3023	Health Politics & Policy in the U.S. (C- min)	3
ENGL4092	Technical and Scientific Writing (C- min)	3
HPE4048	Social and Behavioral Foundations of Public Health (C- min)	3
MEDS4053	Evidence-Based Public Health (C- min)	3
HPE5091	Internship in Public Health (C- min)	3

Electives

Students in the Health Administration concentration will complete 32 credit hours of elective coursework. Students in other concentrations will complete 33 credit hours of coursework.

Course	Title/Desc	Credit
	Electives A combination of free and advisor approved electives	32 - 33

General Education Requirements

General Education Requirements

Students will complete 18 credit hours of general education coursework.

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
ENGL2089	Intermediate Composition	3
BoK: FA,HP,HU	Fine Arts, Historical Perspectives, or Humanities Students will complete coursework with the FA, HP, or HU Breadth of Knowledge (BoK) code	3
BoK: QR	Statistics HPE2071 is recommended but other statistics courses are acceptable (C- min)	3
BoK: SS	Social Sciences Electives PSYC1001 and SOC1001 are recommended but other Social Sciences courses are acceptable (C- min)	6

Concentration Options

Students will complete 24-25 credit hours of one of the available concentrations

Global Health Concentration

Course	Title/Desc	Credit
PH2024	Global Health Dynamics (C- min)	3
PH2050	Determinants of Global Health (C- min)	3
PH3066	Climate, Pandemics, Population, & Ecology of Human Health (C- min)	3
	PH4010 Global Health Policy & Ethics (C- min)	3
	PH4030 Global Health Systems (C- min)	3

Concentration Options

Students will complete 24-25 credit hours of one of the available concentrations

Health Administration Concentration

Course	Title/Desc	Credit
HIM3012C	Health Information Systems (C- min)	5
HCA3031	Introduction to Health Care Economics (C- min)	3
	HCA3032 Legal & Ethical Issues in Health Care (C- min)	3
ALH4021	Healthcare Delivery Systems (C- min)	3
	HCA4022 Quality Improvement in Health Care (C- min)	3

Concentration Options

Students will complete 24-25 credit hours of one of the available concentrations

Health Education & Promotion Concentration

Course	Title/Desc	Credit
HPE1020	Principles and Foundations of Health Promotion and Education (C- min)	3
HPE2006	Emerging Health Issues (C- min)	3
HPE3001	Health Across the Lifespan I: Adolescent and Child (C- min)	3
HPE3002	Health Across the Lifespan II: Adult and Aging (C- min)	3

Course	Title/Desc	Credit
	PH4060 Leadership & Diplomacy in Global Health (C- min)	3
	Global Health Electives (C- min)	6

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Public Health

Duration: **2 Years** Total Credits: **42** Award: **MPH**

Overview

The Master of Public Health (MPH) Program in the University of Cincinnati (UC) College of Medicine is one of the largest Programs of Public Health in the tri-state region. Our mission is to promote health, prevent disease, and protect the environment of our communities, locally and beyond, through evidence-based interdisciplinary approaches in education, research, practice, and community engagement.

The MPH program, housed in UC Department of Environmental and Public Health Sciences with collaborations throughout the College of Medicine and Cincinnati Children's Hospital Medical Center, offers concentrations in biostatistics, epidemiology, environmental public health, global health, health education and promotion, health services management, and occupational public health. It offers robust training in the classroom and the field and gives students experience in policy and research opportunities. As a core professional degree, skills gained through the UC MPH Program are recognized as being directly applicable to public health practice and careers worldwide.

Career

Biostatistics

The UC MPH Biostatistics concentration provides training in advanced statistical methods, regression models, logistical and generalized linear models, data manipulation, visualization, data mining techniques, and both clinical and observational studies design. This program prepares students for positions such as a statistical consultant, a data analyst, or a project manager in health-related organizations such as pharmaceutical companies, state and federal health care organizations, research establishments focusing on clinical trials, statistical consulting companies, and academic establishments requiring biostatistical support.

Environmental Public Health

The UC MPH Environmental Public Health concentration provides training in toxicology fundamentals, infectious diseases, risk assessment, policy development, advocacy, and implementation. This program prepares students for positions within public health, for positions in agencies including, but not limited to, the Environmental Protection Agency, National Institutes of Occupational Safety and Health, local health departments, state health departments, the Centers for Disease Control and Prevention, non-profit agencies and for-profit agencies.

Epidemiology

The UC MPH Epidemiology concentration provides training in the design of human population studies, clinical studies, population disease surveillance, human subject ethics, risk assessment, risk communication, basic biostatistics and data analysis. This program prepares students for positions such as project manager, research study coordinator, or technical specialist in health-related organizations that focus on population health assessment, research programs focusing on population factors related to health outcomes, or clinical trials, in local, state or federal government, academic institutions or private enterprises.

Global Health

The UC MPH-Global Health concentration provides training in analytical and methodological skills to effectively assess population health and disease surveillance, human subject ethics, and risk exposure. This program prepares students to critically evaluate key challenges, policies, and processes as they affect the health of populations in a global context. Students will build skills around strategic planning, professional networking, crisis management, and the development of policy initiatives under international frameworks and institutions, including diplomacy and leadership.

Health Services Management

The UC MPH Health Services Management concentration provides training in management, global health, leadership, informatics, quality improvement, innovation, community health development, policy development, advocacy, and overarching organizational strategy development and implementation. This program prepares students for positions within public health, healthcare and associated human services organizations.

Occupational Public Health

The UC MPH-Occupational Public Health concentration fulfills important requirements of the Accreditation Council for Graduate Medical Education (ACGME) as well as the American Board of Preventive Medicine (ABPM) as residents prepare for their board certification in Preventive Medicine with a specialty in Occupational Medicine. This program prepares students to assume leadership positions in settings that include: government agencies, universities, corporate medical departments, hospital-based occupational medicine departments, insurance companies, and ambulatory occupational medicine practices.

UC Advantages And Special Opportunities

UC MPH students have the opportunity to learn from internationally recognized faculty and network with local public health leaders to build their professional network. Our program offers opportunities to interact with leading public health professionals from Cincinnati Children's Hospital Medical Center (CCHMC), University of Cincinnati Medical Center (UC Health), Environmental Protection Agency (EPA), the National Institute for Occupational Safety and Health (NIOSH), regional and local health departments, and more.

Biomedical Research Technologies

Duration: 2 Years Total Credits: 30 Award: MS

Overview

Housed in the nation's third ranked pediatric hospital, this unique MS program offers rigorous training in the most current techniques used in Biomedical research.

The MS in the Biomedical Research Technologies offers:

- Hands-on training in state-of-the-art, high-end research facilities
- Low student:instructor ratios
- Paid internship options in clinical, basic science or industrial laboratories
- Job placement assistance

Career

Curriculum

The BMRT curriculum strongly emphasizes hands-on laboratory training in state-of-the art techniques integral to the modern biomedical research laboratory in academia, biotechnology/pharmaceutical industries, or government.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Biomedical Research Technologies 2021

Admission Requirements

Pre-requisites for admission to the MS program

- Baccalaureate degree or higher degree from an accredited college or university
- A grade-point average (GPA) of 3.0 or better (on a 4.0 scale)
- A strong background in biology and/or biochemistry
- Previous research experience
- Graduate Record Exam (GRE) score is not required, but strongly encouraged (Institution code:1833; Department Code: 0208)
- TOEFL score if English is not the student's primary language (institution code:1833; Department code: 99)
- Two to four letters of recommendation to be submitted electronically using the online application system.

Application Deadlines

All materials must be received by February 1.

Clinical and Translational Research

Clinical Research Professional

Duration: 2 Years Total Credits: 30 Award: MS

Overview

The Master of Science in Clinical and Translational Research - Clinical Research Professionals Track (MSCTR-CRP) is a 30 credit hour program designed to be completed in 2-3 years, on a part-time basis, to allow trainees to meet other responsibilities while enrolled in classes. In addition to the successful completion of 30 credit hours of course work, students are required to complete a culminating project in the form of a capstone or a thesis.

Successful graduates of the program will receive formal training in the management of clinical research, improving their abilities to coordinate and lead studies in a variety of settings, including academic health centers and pharmaceutical companies. Students will be able to demonstrate the organizational, communication, and operational skills needed to manage and execute complex clinical research projects; develop and implement procedures related to data management, research/regulatory documentation, and quality assurance; and lead and manage diverse clinical research teams effectively.

Career

The Master of Science in Clinical & Translational Research - Clinical Research Professionals track (MSCTR-CRP) is designed specifically for clinical research professionals who coordinate, manage, and lead collaborative research projects and clinical trials.The program provides a strong foundation in research methodology and program/project management, including training in research ethics and the Institutional Review Board (IRB) process. The disciplinary purpose and ultimate goal of the program is to provide clinical professionals with the necessary preparation for successful careers in clinical research.

It is anticipated that most graduates of the program will hold positions as clinical research assistants, clinical research senior professionals, clinical research managers, clinical research directors, research nurses, clinical research coordinators (I-IV), senior clinical research coordinators, data managers, and research assistants.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Clinical and Translational Research

Duration: **2 Years** Total Credits: **30** Award: **MS**

Overview

The Master of Science in Clinical and Translational Research program is a 30 credit hour program designed to be completed in 2 years, on a part-time basis, to allow trainees to meet clinical duties and other responsibilities while enrolled in classes. In addition to the successful completion of 30 credit hours of course work, a thesis is required to earn the Master of Science degree. Successful graduates of the program will leave with the epidemiological and statistical knowledge to conduct independent and collaborative clinical studies in their special areas of practice and interest.

Career

The Master of Science degree program in Clinical and Translational Research is designed to provide clinical professionals (physicians, nurses, and other terminal degree clinical professionals) with the necessary preparation for successful career development and independent investigator awards. The program emphasizes specific training in clinical epidemiology/clinical effectiveness, molecular epidemiology, clinical trials, and translational research that will enable clinicians to translate scientific advances into applications for improved clinical practice and human health. The disciplinary purpose and ultimate goal of the program is to move practitioners from the realm of personal clinical experience to objective evidence.

It is anticipated that most graduates of the program will hold positions as clinician-investigators in academic settings and will develop into independently-funded clinical researchers.

Students will be able to demonstrate the organizational, communication, and operational skills needed to manage and execute complex clinical research projects; develop and implement procedures related to data management, research/regulatory documentation, and quality assurance; and lead and manage diverse clinical research teams effectively.

Career

The Master of Science in Clinical & Translational Research - Clinical Research Professionals track (MSCTR-CRP) is designed specifically for clinical research professionals who coordinate, manage, and lead collaborative research projects and clinical trials.The program provides a strong foundation in research methodology and program/project management, including training in research ethics and the Institutional Review Board (IRB) process. The disciplinary purpose and ultimate goal of the program is to provide clinical professionals with the necessary preparation for successful careers in clinical research.

It is anticipated that most graduates of the program will hold positions as clinical research assistants, clinical research senior professionals, clinical research managers, clinical research directors, research nurses, clinical research coordinators (I-IV), senior clinical research coordinators, data managers, and research assistants.

Clinical and Translational Research : Clinical Research Professional

MS

Master of Science - CRP Track Effective Fall 2024

Duration: 2 Years

★Minimum Credits: 30 Credits

Core Courses

Introduction to Biostatistics

Students must take BDS7022 Introduction to Biostatistics (B- min required).

Course	Title/Desc	Credit
BDS7022	Introduction to Biostatistics (B- min)	3

Project Management & Evaluation

Students must take BE7033 Project Management & Evaluation (B- min required).

Course	Title/Desc	Credit
BE7033	Project Management and Evaluation (B- min)	3

Clinical Research Regulatory Overview

Students must take BE7036 Clinical Research Regulatory Overview (B- min required).

Course	Title/Desc	Credit
BE7036	Clinical Research Regulatory Overview (B- min)	3

Principles of Clinical Trials

Students must take BE7066 Principles of Clinical Trials (B- min required).

Course	Title/Desc	Credit
BE7066	Principles of Clinical Trials (B- min)	3

Introduction to Epidemiology

Students must take BE7076 Introduction to Epidemiology (B- min required).

Course	Title/Desc	Credit
BE7076	Introduction to Epidemiology (B- min)	3

IRB Submission Process for Researchers

Students must take BE7081 IRB Submission Process for Researchers (B- min required).

Course	Title/Desc	Credit
BE7081	IRB Submission Process for Researchers (B- min)	1

Research Methods for Human Population Studies

Students must take BE8082 Research Methods for Human Population Studies (B- min required).

Course	Title/Desc	Credit

Ethics Requirement

Research Ethics

Students must choose either BE7067 Scientific Integrity or GNTD7003 Ethics in Research to meet the ethics course requirement (Pass required). NOTE: BE7067-002 is the NIH compliant section of that course.

Course	Title/Desc	Credit
BE7067	Scientific Integrity & Research Ethics	1 - 2
GNTD7003	Ethics in Research	1

Free Electives & Culmination

Free Electives

Students can choose any graduate course within the subject codes listed below. Courses outside of these subject codes need director approval.

Course	Title/Desc	Credit
BDS7XXX+ BE7XXX+ BMIN7XXX+ DB7XXX+ EDST7XXX+ ENV7XXX+ GC7XXX+ GNTD7XXX+ HI7XXX+ HPE7XXX+ PH7XXX+ PHDD7XXX+	7000+ Electives	0 - 6

Non-Thesis Research

Thesis track students are required to take a minimum of 2 credit hours of ENV7091. Up to 6 additional research credits can be taken from ENV7091 or ENV8091 (non-thesis research) for a combined maximum of 8 total research credit hours.

Course	Title/Desc	Credit
ENV8091	Research	1 - 6

Culmination

Student can choose to complete BE7092 Capstone or ENV7091 MS Thesis Research. Thesis track students are required to take a minimum of 2 credit hours of ENV7091. Up to 6 additional research credits can be taken from ENV7091 or ENV8091 (non-thesis research) for a combined maximum of 8 total research credit hours.

Course	Title/Desc	Credit
ENV7091	Master's Thesis Research	2 - 8
BE7092	Clinical Research Professionals Capstone Project	2

Course	Title/Desc	Credit
BE8082	Research Methods for Human Population Studies (B- min)	3

Clinical Research Professionals Seminar

Students must take BE9064 Clinical Research Professionals Seminar (B- min required).

Course	Title/Desc	Credit
BE9064	Clinical Research Professionals Seminar (B- min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Health

Biostatistics

Duration: 2.5 Years Total Credits: 60 Award: MS

Overview

Housed in UC's department of Environmental Health with collaborations throughout the College of Medicine and Cincinnati Children's Hospital Medical Center, the Division of Biostatistics and Bioinformatics offers exciting training and research opportunities in biomedical data sciences. Training programs in the division combine rigorous statistical and computational education rooted in the probability theory and computer science with the exposure to a broad range of biomedical research applications.

Biostatistics is a data science field concerned with application of statistical reasoning in the biomedical and public health research. Biostatisticians develop statistical methodologies that are tailored to address specific biomedical data analysis problems. Biostatisticians are also members of interdisciplinary biomedical research teams whose role is to ensure optimal use of data to answer specific biomedical research questions.

Bioinformatics is an interdisciplinary field that develops methods and computational tools for understanding high-dimensional biomedical data. Bioinformatics combines computer science, statistics, mathematics, and engineering to manage, process and analyze biomedical data. There and many overlaps between Biostatistics and Bioinformatics in terms of methodologies utilized and domains of application in biomedical research. However, Bioinformatics tends to be more focused on the analysis and interpretation of high dimensional datasets such as genomics, proteomics and metabolomics. Furthermore, Bioinformatics research objectives often involve development of software tools that facilitates management and analysis of large and complex datasets.

Both Biostatistics and Bioinformatics are integral parts of the new emerging field of Biomedical Data Sciences. Data Sciences in general is a field dedicated to extraction knowledge from data. In the context of the biomedical and public health research, data sciences integrate traditional statistical reasoning with the technological and computational solutions needed to organize, integrate and analyze relevant data. The biomedical and public health research is increasingly becoming data-intensive and data-driven. The challenges and opportunities offered by accessing, managing, analyzing, and integrating datasets of diverse data types (exposure, health, behavioral, genomics, genetics, etc) is captured by the term "Big Data". The graduate programs and research within our division reflect rapidly increasing role that the data sciences play in contemporary biomedical and public health research.

Current methodological research undertaken by division faculty includes statistical methods for multiple hypothesis testing, statistical genetics, supervised and unsupervised Bayesian and machine learning methods for genomics data analysis, methods for next generation sequencing data analysis, statistical geospatial modeling, integrative statistical models for Big Data, computational drug screening, and protein structure modeling.

A few examples of interdisciplinary biomedical research projects that involve division faculty are study of predictive transcriptional signature for juvenile idiopathic arthritis, genomic determinants of kidney cancer, cancer treatment clinical trials, and numerous biomedical projects investigating gene-environment interactions.

Curriculum Guide Versions:
MS Biostatistics Fall 2018

Admission Requirements

You will need the following to complete your application:

- Contact Information
- College(s) attended
- Selection of your desired program
- CV or resume
- Statement of Purpose and objectives
- Unofficial transcripts for ALL higher education institutions attended
- Three Letters of Recommendation from individuals familiar with your academic or professional background.
- GRE, GMAT, and/or MCAT scores

    - The Admissions Review Committee will take into account many factors for admissions decisions. Official GRE, GMAT, or MCAT scores should be at the 50th percentile or better.
- International applicants whose native language is not English (please refer to the International Office's English Proficiency Requirement to see your status, https://grad.uc.edu/fac-staff/handbook/graduate-admission/international-admission/english.html) must take the TOEFL exam and submit official scores directly from the testing agency.
- Official transcripts of all colleges and universities must be submitted if accepted to the program. These must be official, therefore copies cannot replace official records from higher educational institutions attended.

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Application Deadlines

If you would like to submit an electronic application for the Biostatistics and Bioinformatics program, please visit our Online Graduate School Application and complete the form.

Funding is generally only available in the Fall semester and any application to be considered for funding must be completed by February 1st.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Environmental Health : Biostatistics

MS

MS Biostatistics Fall 2018

Duration: 2.5 Years
★Minimum Credits: 30 Credits

MS Biostatistics Core Courses

Students are required to complete the following core courses.

Course	Title/Desc	Credit
BE7024	Computational Statistics (B- min)	3
BE7088	Regression Analysis (B- min)	3
BE7089	Experimental Design (B- min)	3
GNTD7003	Ethics in Research (B- min)	1
STAT6021	Mathematical Statistics I (B- min)	3
STAT6022	Mathematical Statistics II (B- min)	3

Biostatistics Seminar

Students are required to complete 2 credit hours (2 semesters) of Biostatistics Seminar.

Course	Title/Desc	Credit
BE8029	Biostatistics Seminar	1
BE8029	Biostatistics Seminar	1

Biomedical Credits

Students are required to complete 3 credit hours or more in Biomedical coursework from the list below.

Course	Title/Desc	Credit
BE7076	Introduction to Epidemiology (B- min)	2
CB8080	Cancer Biology and Therapeutics (B- min)	4
GNTD7001	Principles of Molecular and Cellular Biology (B- min)	1 - 4
GNTD8001C	Introduction to Functional Genomics (B- min)	3
MCP6031C	Computational Systems Biology (B- min)	2
TOX7082	Survey of Toxicology (B- min)	2

Biostatistics Credits

Students are required to complete one course (3 credits) from the list below.

Course	Title/Desc	Credit
BE7026	General Linear Model (B- min)	3
BE7090C	Applied Survival Analysis (B- min)	3
BE7091	Applied Multivariate Analysis (B- min)	3

Course	Title/Desc	Credit
BE6XXX+ BMIN6XXX+ CB6XXX+ CS6XXX+ EECE6XXX+ ENV6XXX+ GNTD6XXX+ MATH6XXX+ MCP6XXX+ TOX6XXX+	Free Electives Students are required to complete 4 credit hours or more of Free Electives from the Course Catalog List with assistance from their advisor.	4

Master's Thesis Research

Students are required to complete 2 credit hours or more of Master's Thesis Research.

Course	Title/Desc	Credit
ENV7091	Master's Thesis Research (B- min)	1 - 15

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Health

Epidemiology

Duration: 2.5 Years Total Credits: 60 Award: MS

Overview

Epidemiology is defined as the study of the distribution and determinants of disease, disability and injury within human populations.

The goals of the epidemiologist are to identify the factors or agents that are linked with objectively measured patterns of harm; to advance and evaluate methods of disease prevention; and to aid in planning and evaluation of the effectiveness of programs that advance public health.

The results of epidemiological research have had a great influence on clinical medicine. Current faculty research undertaken in the Division is wide ranging and includes health effects related to exposures to lead, arsenic, manganese, mercury, solvents, fuels, pesticides, organochlorines and other persistent organic pollutants, fibers, radiation, nutritional and lifestyle factors, alcohol and illicit drugs, and work-related ergonomic disorders. The health outcomes being studied include: allergy, asthma, reproductive, hormone, many types of cancer, genetics of complex diseases, growth and development, neurological and psychiatric disorders, pulmonary disease, injuries, stroke, heart disease, bone health, mortality and exposure body burden.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Health

Industrial Hygiene

Duration: 2.5 Years Total Credits: 60 Award: MS

Overview

Academic study is available in two programs: Industrial Hygiene and Occupational Ergonomics. Two certificate programs provide additional opportunity for Industrial Hygiene students to obtain specialized training; these are Hazardous Substances and Biomonitoring.

The Environmental and Occupational Hygiene division faculty maintain nationally and internationally recognized research programs in the broad areas of anticipation, recognition, evaluation and control of workplace and environmental exposures. Specific research programs are devoted to the techniques for sampling chemical and biological aerosols, relationships between exposures and internal markers of effect, relationship between exposure and such chronic diseases as silicosis and lung cancer, occupational ergonomics, biomechanics, safety, relationship between workplace physical/chemical risk factors and workers' neuromuscular performance, historic and current exposure assessment, characterization of lead exposures, environmental intervention studies, and effect of neurotoxic chemicals on neurobehavioral performance. M.S. students conduct independent research which advances their particular field of interest.

MS Industrial Hygiene Effective Fall 2025

UC Advantages And Special Opportunities

Graduate study is supported by the National Institute for Occupational Safety and Health Education and Research training grant and by University and other sources. The Powell/Cohrssen Occupational Hygiene Scholarship is awarded annually to a second year M.S. candidate.

Admission Requirements

You will need the following to complete your application:

- Contact Information
- College(s) attended
- Selection of your desired program
- CV or resume
- Statement of Purpose and objectives
- Unofficial transcripts for ALL higher education institutions attended
- Three Letters of Recommendation from individuals familiar with your academic or professional background.
- International applicants whose native language is not English (please refer to the International Office's English Proficiency Requirement, https://grad.uc.edu/fac-staff/handbook/graduate-admission/international-admission/english.html) must take the TOEFL exam and submit official scores directly from the testing agency.
- International transcripts should be evaluated by WES.
- Official transcripts of all colleges and universities must be submitted if accepted. These must be official, therefore copies cannot replace official records from higher educational institutions attended.

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Application Deadlines

If you would like to submit an electronic application for the Envirionmental and Industrial Hygiene program, please visit our Online Graduate School Application and complete the form.

Only students applying to the full-time programs in Environmental and Industrial Hygiene are eligible to receive University Graduate Assistantship funding. This funding in not available for our part-time MS programs in Industrial Hygiene. Funding is generally only available in the Fall semester and any application to be considered for funding must be completed by February 1st.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.The M.S. course of study in Industrial Hygiene is accredited by the Applied Sciences Accreditation Commission of ABET (ASAC/ABET).

Current Topics II

Students are required to complete 2 credit hours (2 semesters) of EIH8082 Current Topics II (Pass required).

Course	Title/Desc	Credit
EIH8082	Current Topics in Occupational Hygiene II	1
EIH8082	Current Topics in Occupational Hygiene II	1

Environmental Health Seminar

Students are required to complete 4 credit hours (4 semesters) of ENV7001 Environmental Health Seminar.

Course	Title/Desc	Credit
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Genetic Counseling

Duration: **2 Years** Total Credits: **62 - 70** Award: **MS**

Overview

Established in 1982, the University of Cincinnati Genetic Counseling Graduate Program is one of the oldest genetic counseling programs in the country. Students benefit from the program's unique partnership with Cincinnati Children's Hospital Medical Center--one of the top three pediatric medical centers in the nation.

Degree requirements include coursework, clinical rotations and research. Genetic counseling students take approximately 15 credit hours per semester for four total semesters. They receive immediate hands-on experience in clinical rotations from the first semester to the last, interacting with patients in multidisciplinary settings including prenatal, pediatric and adult genetics. By graduation each student will have been the primary genetic counselors for at least 50 but often for 100 or more cases. Additionally, students complete a master's thesis research project culminating in a manuscript suitable for publication.

Career

After completing the two-year master's program, graduates are prepared for any genetic counseling job they choose--and for the certification exams required to practice. Typically, 90-100% of our graduates pass the certification exam. All find employment after graduation in clinical, academic, research, laboratory or industry positions. Employers include hospitals, clinics, universities, and clinical laboratories.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Masters of Science in Genetic Counseling 2023

Admission Requirements

- Baccalaureate degree or foreign equivalent
- 3 letters of recommendation submitted through the online system
- Unofficial transcripts are used for admissions review. Official transcripts required when offered admission.
- CV
- For students whose first language is not English: TOEFL scores

*All undergraduate degrees are accepted, although you will have a competitive edge if you have strong grades in coursework in the biological sciences, including genetics. You can also prepare yourself by working or volunteering in a counseling/helping environment and by shadowing and/or interning with a genetic counselor.

Application Deadlines

If you would like to submit an electronic application for the Genetic Counseling Program, please visit our On-Line Graduate School Application. When searching for the program, you can select either the program name or the college name (College of Medicine).

Unoffical transcripts from all Universities/Colleges attended should be uploaded to your application.

Make sure to visit the Genetic Counseling Program website or contact the program directly for information about application requirements or to inquire about materials that need to be submitted when applying to this program.

Note: Please apply by January 5 of the calendar year in which you wish to be considered for an interview.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Genetic Counseling Graduate Program is accredited by the Accreditation Council for Genetic Counseling.

Immunology

Duration: **2.5 Years** Total Credits: **30** Award: **MS**

Overview

The Immunology Graduate Program at the University of Cincinnati and Cincinnati Children's Hospital aims to provide unparalleled training for the next generation of forward-thinking and innovative immunologists in the backdrop of one of the most picturesque and multi-cultural mid-West Cities of USA, Cincinnati OH.

Our program offers rigorous coursework and practical training in some of the world's most outstanding immunology laboratories. Our top-notch faculty's extensive experience in teaching and expertise in all areas of immunology provides the student a well-rounded immunology training experience and preparedness for future post-graduate career path in immunology.

The Immunology Graduate Program offers full-time and part-time MS programs. These advanced degrees are offered to prepare students for productive careers in academic institutions, industry and government in the expanding field of immunology. Both MS tracks require core coursework in Immunology, Molecular Genetics, Cell Biology and Biochemistry. The full-time MS track is a thesis based research track, while the part-time MS track is a comprehensive literature review based track. Unfortunately, no programmatic stipend or tuition support is available for MS students. Employees of CCHMC and UC may be eligible for tuition benefits. Employees of Cincinnati Children's and UC may be eligible for tuition benefits. Please contact your HR Department.

Immunology MS course map

UC Advantages And Special Opportunities

Students in the Immunology Graduate Program have access to outstanding core-facilities including state-of-the-art flow cytometry and cell sorting, 2-photon imaging, gene targeting and transgenic mouse core, bioinformatics core, gene expression core,pluripotent stem cell facility, laser capture microdissection core, viral vector core, and many others.

Graduation Requirements

Successful defense of a thesis.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

MS

Immunology MS course map

Duration: 2.5 Years

★Minimum Credits: 30 Credits

Year 1

Fall Semester

Required Courses

Course	Title/Desc	Credit
GNTD7001	Principles of Molecular and Cellular Biology (B min)	4
IMMU8001	Journal Club	1
IMMU8004	Immunology Seminar	1
IMM8007	Student Postdoc Research Seminar	1
IMM8072	Thesis Research (B min)	1 - 12

Year 1

Spring Semester

Required Courses

Course	Title/Desc	Credit
GNTD7003	Ethics in Research (B min)	1
IMMU8072	Research (B min)	1 - 12
IMMU8001	Journal Club	1
IMMU8004	Immunology Seminar	1
IMM8007	Student Postdoc Research Seminar	1
MG7023	Immunology (B min)	2
PMM8099	Immunology of Disease (B min)	2

Other Requirements

Required milestones

Lab selection
Complete 3 lab rotations Summer and 2 in the fall. Declare permanent lab by March 30.

Year 2

Fall Semester

Required Courses

Course	Title/Desc	Credit
IMMU8072	Research (B min)	1 - 12
IMMU8001	Journal Club	1
IMM8004	Distinguished Lecturer Seminar	1
IMMU8007	Student Post Doc Forum	1
MG7003	Introductory Microbiology (B min)	3

Statistics Course

Choose 1 course from the following:

Course	Title/Desc	Credit
PH7011	Statistical Computation and Software (B min)	1
BE7022	Introduction to Biostatistics (B min)	3
BE7061	Biostatistics in Research (B min)	3
MCP8001	Grant Writing in Biomedical Science (B min)	2
BIOL8001C	Data Analysis (B min)	3

Year 2

Spring Semester

Required Courses

Course	Title/Desc	Credit
IMM8072	Thesis Research (B min)	1 - 12

Other Requirements

Required milestones

Thesis prep and defense
Select committee members by the end of August. Schedule at least 3 Committee meetings before defense. Defend.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Molecular Gen, Biochemistry, Microbiology

Duration: **2 Years** Total Credits: **30 - 40** Award: **MS**

Overview

The Department of Molecular Genetics, Biochemistry and Microbiology offers both a thesis and a non-thesis Master of Science degree that can be tailored to suit the student's particular interests. The master's program offers diverse opportunities in learning and research, thereby providing the fundamental knowledge base required for successful entry into technical and scientific positions at an advanced level. Students who have completed the M.S. degree have also pursued addtional biomedical science-related degree programs in professional or graduate schools.

Curriculum Guide Versions:
Molecular Genetics Master's Curriculum Guide

Admission Requirements

- GREs are not required, but highly recommended. We will waive the GRE requirement for applicants who demonstrate a strong record in relevant STEM courses such as organic chemistry, biochemistry, physical chemistry, molecular genetics, etc and have attained an overall GPA of >3.5.
- Official college transcripts only if offered admission. Unofficial transcripts are used for admissions review.
- 3 letters of reference
- Curriculum Vitae or Resume
- Personal statement
- TOEFL or IELTS scores for non-native English speakers
  - Minimum Scores: TOEFL 100 or IELTS 7

Application Deadlines

If interested in applying to the Molecular Genetics Master of Science program, please submit an application. Make sure to visit the Molecular Genetics, Biochemistry, & Microbiology website or contact the program directly for information about application requirements or to inquire about materials that need to be submitted when applying to this program.

Deadline for application is March 1 of the preceding academic year.

Molecular, Cellular and Biochemical Pharmacology

Applied Pharmacology & Drug Toxicology

Duration: 1 Year Total Credits: 32 Award: MS

Overview

Master's in Pharmacology students gain an educational foundation in Pharmacology plus a behind-the-scenes look into the FDA drug approval process including nonclinical & clinical safety assessments and regulatory guidance. MS students also have the unique advantage to network with experts currently working in the field through special lectures and networking events. Graduates of our program are prepared for employment in the biopharmaceutical and biotech industries, contract research organizations (CROs), government (FDA), or continuing education in medical (MD/DO) or graduate (Ph.D.) school.

Career

Due to the diversity of our students' interests, our program works diligently to introduce them to new experiences in drug safety while providing a solid foundation in pharmacology. About half of our students use our program as a gap year experience, preparing for advanced academic training in the life sciences (MD, PhD, DMD, PharmD, DVM), with our remaining graduates employed in academia or with contract research organizations associated with the pharmaceutical industry.

Curriculum

Our MS in Pharmacology program offers a 10-month non-thesis or 2-yr thesis option. All students are immersed in pharmacology core courses with the addition of Drug Discovery, Safety Pharmacology, and Drug Toxicology. One unique aspect of our program is networking opportunities with industry experts through special lectures along with several trips to regional industry. Our students also gain hands-on research experiences in laboratories of expert UC and Cincinnati Children's faculty.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
MCBP- MS Applied Pharmacology & Drug Toxicology Thesis
MCBP - MS Applied Pharmacology & Drug Toxicology Non-Thesis

Special Programs

The MS in Pharmacology program provides students with a special emphasis in nonclinical drug development. This research area applies pharmacologic and toxicologic principles to investigate new chemical and biological therapies for safety before they are administered to humans. It is a necessary component of the FDA drug approval process, which aims to evaluate a ***new*** drug's capacity to cause adverse effects at therapeutic doses (Safety Pharmacology) and/or harm at high doses (Drug Toxicology). These two equal, but distinct, aims (Safety Pharmacology and Drug Toxicology) are vital for protecting the public against harmful new drugs.

Admission Requirements

- Undergraduate degree in life sciences or a STEM discipline (GPA 3.0 or higher)
- Unofficial Transcript(s)
- Submission of proof of English language proficiency for non-native English speakers (For those submitting a TOEFL score, a minimum 90 iBT or equivalent is required)
- Reference letters (minimum 2)

Women and underrepresented minority students are encouraged to apply. Scholarship opportunities are available for underrepresented students.

Previous biomedical research experience is helpful but not required for admission.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Occupational Safety and Ergonomics

Duration: **2.5 Years** Total Credits: **60 - 78** Award: **MS**

Overview

This interdisciplinary course of study includes classes is offered with courses from the Department of Environmental Health (DEH) in the College of Medicine and the Department of Mechanical, Industrial and Nuclear Engineering (MINE) in the College of Engineering & Applied Sciences. The curriculum is designed to provide dual emphasis on the health and engineering aspects of ergonomics and safety, and to prepare the students to meet the current and future ergonomic/safety concerns of the workforce. In general, a student with an undergraduate engineering degree will apply for admission into OSE through MINE while those with majors in medical sciences, biology, chemistry, physics, psychology and management will apply through the DEH. Students are encouraged to take as many elective courses as possible from both departments in order to ensure broad based training in both the engineering and the health aspects of ergonomics and safety.

Curriculum Guide Versions:
MS Occupational Safety and Ergonomics Effective Fall 2025

Admission Requirements

You will need the following to complete your application:

- Contact Information
- College(s) attended
- Selection of your desired program
- CV or resume
- Statement of Purpose and objectives
- Unofficial transcripts for ALL higher education institutions attended
- Three Letters of Recommendation from individuals familiar with your academic or professional background.
- GRE, GMAT, and/or MCAT scores
    - The Admissions Review Committee will take into account many factors for admissions decisions. Official GRE, GMAT, or MCAT scores should be at the 50th percentile or better.
- International applicants whose native language is not English (please refer to the International Office's English Proficiency Requirement, https://grad.uc.edu/fac-staff/handbook/graduate-admission/international-admission/english.html) must take the TOEFL exam and submit official scores directly from the testing agency of a minimum of 580(paper), 237(computer), or 100(internet) to be considered for the program. The above website also gives a list of additional exams and certificates that are approved by the University.
- International transcripts should be evaluated by WES.
- Official transcripts of all colleges and universities must be submitted if accepted to the program. These must be official, therefore copies cannot replace official records from higher educational institutions attended.

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Application Deadlines

If you would like to submit an electronic application for the Occupational Safety and Ergonomics, Program please visit our On-Line Graduate School Application and complete the form.

The deadlines for complete applications for each semester are as follows:

- Fall - July 1st
- Spring - November 1st

Only students applying to the full-time programs in Occupational Safety and Ergononmics are eligible to receive University Graduate Assistantship funding. This funding in not available for our part-time MS or PhD programs in Occupational Safety and Ergonomics. Funding is generally only available in the Fall semester and any application to be considered for funding must be completely submitted by February 1st.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Free Electives

Students are required to complete at least 3 graduate level credit hours from the following subject codes. Courses outside of these subject codes need adviser approval.

Course	Title/Desc	Credit
AE6XXX+ ANCH6XXX+ BANA6XXX+ BDS6XXX+ BE6XXX+ BME6XXX+ CHEM6XXX+ CVE6XXX+ EIH6XXX+ ENV6XXX+ ENVE6XXX+ GNTD6XXX+ HPE6XXX+ MECH6XXX+ MTEN6XXX+ OCCM6XXX+ OSE6XXX+ PH6XXX+ STAT6XXX+ TOX6XXX+	Free Electives	3 - 6

Culmination

Students are required to complete at least 1 credit hour of ENV7091 Master's Thesis Research after the approval of their Statement of Intent.

Course	Title/Desc	Credit
ENV7091	Master's Thesis Research	1 - 15

Course	Title/Desc	Credit
EIH8081	Current Topics in Occupational Hygiene I	1
EIH8081	Current Topics in Occupational Hygiene I	1

Current Topics II

Students are required to complete 2 credit hours (2 semesters) of EIH8082 Current Topics II (Pass required).

Course	Title/Desc	Credit
EIH8082	Current Topics in Occupational Hygiene II	1
EIH8082	Current Topics in Occupational Hygiene II	1

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pathobiology and Molecular Medicine

Duration: 3 Years Total Credits: 30 Award: MS

Overview

The Master's Degree in Pathobiology & Molecular Medicine aims to prepare students with a strong foundation of knowledge and skills in basic biomedical science and translational science. Our program goals are training and educating the next generation of scientists to explore the mechanisms and pathogenesis of human disease, fostering innovation and discovery in biomedical research

Success

Most students take 1-2 years to complete the program. All students are required to earn at least 30 credit hours during the program. Students are required to maintain a GPA of 3.0 throughout their time in the MS program. A thesis is required for graduation, or students can write a peer-reviewed article or publish a co-authored paper.

Career

The goals of the PMM master's program are to prepare students for admission to PhD and/or MD/PhD programs, as well as research careers in basic and translational medicine in both academia and industry. The learning outcome of the program is to produce scientists trained to investigate the molecular and biochemical mechanisms of disease using the most advanced scientific approaches and experimental techniques.

Physiology

Duration: **1 Year** Total Credits: **34** Award: **MS**

Overview

The master's (MS) in physiology is a one-year program designed to help college graduates strengthen their academic credentials in preparation for application to U.S. medical schools. The cornerstone of our program is to provide our students with a significant side-by-side experience with first year medical students (M1) at the University of Cincinnati College of Medicine.

Our master's program is approximately 11 months in duration (it begins in mid-August and ends in mid-June). Participants can only enroll in the program as full-time students. **While there is no guarantee that completion of this program will lead to acceptance to medical school, the master's program provides credentials that allow for direct comparison of our graduates to current medical school students at the University of Cincinnati College of Medicine.**

Toxicology

Duration: **2 Years** Total Credits: **30** Award: **MS**

Overview

The Master of Science in Toxicology curriculum emphasizes genetic and molecular mechanisms underlying environmentally-related diseases. Major focus areas for research are the genetic, epigenetic, biochemical and physiological determinants of individual and population susceptibility to environmental diseases. Research topics include carcinogenesis, respiratory diseases, obesity and diabetes, biodefense, microbial genomics and various organ-specific toxicities. Pathways studied include gene regulation, signal transduction, oxidative stress and mitochondrial function, metal transport and toxicity. Methodologies include transgenic and recombinant inbred mouse models, knockout mouse models, bioinformatics, epigenetics, proteomics, and genomics.

Toxicology

MS

Required Courses for a Master of Science Degree in Environmental Genetics & Molecular Toxicology

Duration: 2 Years

★Minimum Credits: 30 Credits

Required Coursework

The following are required courses.

Course	Title/Desc	Credit
GNTD7001	Principles of Molecular and Cellular Biology (B- min)	4
GNTD7002	Biochemistry and Cellular Metabolism (B- min)	3
BE7022	Introduction to Biostatistics (B- min)	3
GNTD7003	Ethics in Research (B- min)	1
TOX7082	Survey of Toxicology (B- min)	2

Course	Title/Desc	Credit
	MS Research ENV7091 Take a minimum of 3 credit hours of MS Research.	3

Environmental Health Seminar & EGMT Seminar

Both courses are required to be taken each semester throughout graduate studies.

Course	Title/Desc	Credit
ENV7001	Environmental Health Seminar	1
TOX8039	Environmental Genetics and Molecular Toxicology Student Seminar	1

Elective Courses

Pick from the following electives so that your TOTAL credit hours to graduate meet a minimum of 30 credit hours.

Course	Title/Desc	Credit
EIH8043	Human Biological Monitoring and Biological Markers	2
EIH8078	Applied Risk Assessment	2
BE8062	Introduction to Medical Informatics	3
GNTD8003	Career Opportunities in Biomedical Sciences	2
GC7080	Teratology	2
CB8080	Cancer Biology and Therapeutics	4
GC7020	Human Genetics	3
GNTD8001C	Introduction to Functional Genomics	3
TOX8051	Environmental Genetics and Molecular Toxicology Core Course	6
DB9088	Regulation of Gene Expression	2
MG7024	Mechanisms of Signal Transduction	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Informatics

Duration: **5 Years** Award: **PHD**

Overview

Biomedical Informatics (BMI) is an interdisciplinary field that combines knowledge of information sciences and medical sciences to optimize the use and application of biomedical data across the spectrum - from molecules to individuals to populations.

BMI encompasses computational and analytical methods that advance biomedical research, as well as the implementation and management of information technology used to improve the practice of healthcare. The field spans and draws upon a number of related disciplines, including bioinformatics, genomics, systems biology, biostatistics, big data, and healthcare analytics.

Biomedical Informatics is now the key to understanding biology and medicine. As an avalanche of data and an increased sophistication of technology change the way biomedical research is conducted, the discipline of biomedical informatics is an integral component of clinical and translational research for the health care infrastructure. Demand for researchers and health professionals trained in the field is rapidly increasing.

The BMI PhD program trains graduate students in both quantitative and biomedical disciplines to develop and apply computational methods addressing current problems in biomedicine. Students and faculty work together to better understand data-driven challenges of biomedical research and healthcare. Students engage in high-impact research while embedded in some of the premier health care centers in the nation.

Success

Successful applicants to the program typically have a strong quantitative and/or computational background and a keen interest in biomedical informatics or a related discipline. Those with a major of study in areas such as biology, mathematics, computer science, bioengineering, chemistry, or statistics are well positioned to enter the field.

Curriculum Guide Versions:
PhD Curriculum 6.6.24

UC Advantages And Special Opportunities

The graduate program in Biomedical Informatics (BMI) is centered in the Cincinnati Children's Hospital Medical Center (CCHMC), a world-class leader in pediatric healthcare, with a reputation for excellence in patient care, research, and medical education. CCHMC is ranked in the top three of the best children's hospitals in the U.S. and among the top pediatric medical centers nationwide receiving research grants from the National Institutes of Health (NIH).

Admission Requirements

- **Completed Baccalaureate Degree or higher (from accredited institution)**
  - Preferred 3.5 GPA or higher (4.0 scale)
  - Transcripts from all previous institutions attended
- **Completed Graduate Record Examination (GRE)**
  - Preferred score 300 or above
- **English Proficiency Test (international applicants only)**
  - TOEFL (minimum 100)
  - IELTS (minimum 7)

Application Deadlines

The application deadline for the Biomedical Informatics (BMI) PhD program is **February 15**. All materials, including unofficial transcripts, test scores, letters of recommendation, etc., should be submitted by this date.

Any questions regarding the application process should be directed to the BMI Program Coordinator at bmigrad@uc.edu.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Biomedical Informatics

PHD

PhD Curriculum 6.6.24

Duration: 5 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 66 Credits

Core Courses

Students are required to complete all courses within this grouping.

Course	Title/Desc	Credit
BMIN7003	Biomedical Informatics Seminar	1
BMIN7053	Intro to Medical Informatics (B- min)	3
BMIN7054	Data Science for Biomedical Research (B- min)	3
BMIN7099	Introduction to Bioinformatics (B- min)	3
BMIN8001	Biomedical Informatics Practicum (B- min)	3
BMIN8089	Dissertation Research	1 - 15
GNTD7003	Ethics in Research	1
GNTD8001C	Introduction to Functional Genomics (B- min)	3

General Medical Sciences

Students are required to select two courses from this list.

Course	Title/Desc	Credit
BE7066	Principles of Clinical Trials (B- min)	3
BE7068C	Decision and Cost-Effectiveness Analysis (B- min)	3
BE7076	Introduction to Epidemiology (B- min)	2
GNTD7001	Principles of Molecular and Cellular Biology (B- min)	1 - 4

Data Management & Analysis

Students are required to select two courses from this list.

Course	Title/Desc	Credit
BE7022	Introduction to Biostatistics (B- min)	3
BE7024	Computational Statistics (B- min)	3
BE8093	Introduction to Database Systems and Applications (B- min)	3
BME7061	Biostatistics in Research (B- min)	3
CS6051	Database Theory (B- min)	3

Technical Electives

Students are required to select three courses from this grouping.

Course	Title/Desc	Credit
BANA7015	Advanced Health Care Data Analytics, Business Intelligence, and Reporting (B- min)	3
BE7022	Introduction to Biostatistics (B- min)	3
BE7070	Quantitative and Qualitative Data Collection Methods for Health Services Research (B- min)	2
BE7071	Quality Improvement and Patient Safety (B- min)	1
BE7074	Community-Based Participatory Research (B- min)	1 - 3
BE7080	Analysis of Internet Health Data (B- min)	3
BE8068	Genetics of Complex Disease (B- min)	2
BME7061	Biostatistics in Research (B- min)	3
BME8064	Advanced Statistical Methods in Biomedical research (B- min)	3
CS6033	Artificial Intelligence (B- min)	3
CS6052	Intelligent Data Analysis (B- min)	3
CS6065	Introduction to Cloud Computing (B- min)	3
CS6067	User Interface I (B- min)	3
CS7081	Advanced Algorithms I (B- min)	3
CS8021	Pattern Recognition (B- min)	3
EECE6042	Digital Image Processing (B- min)	3
EECE8075	Data Warehousing and Mining (B- min)	3
MCP6031C	Computational Systems Biology (B- min)	3
STAT6043	Applied Bayesian Analysis (B- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Cancer and Cell Biology

Duration: **5 Years** Award: **PHD**

Overview

Graduate training in Cell and Cancer Biology has a long history at UC. For many years, the Program was run by the Department of Cancer and Cell Biology. In 1994, the Program was expanded and is now truly interdisciplinary and interdepartmental, with participation from over 50 faculty members from multiple departments and divisions of UC as well as Cincinnati Children's Hospital Medical Center (CCHMC). Faculty selected to join the program are recognized leaders in their fields and provide excellence and dedication in graduate training. As a consequence, our graduate students excel in research, are highly successful in their scientific careers, and experience a richer environment for learning Cancer and Cell Biology.

All PhD students accepted to the program receive a full-tuition scholarship, a nationally competitive stipend, and a health insurance plan. Successful completion of the program typically involves four to six years beyond the Bachelor's degree, varying according to background and special interests. It is our philosophy that the PhD training must be intellectually stimulating, congenial, and geared toward a successful career in modern research.

Cancer & Cell Biology Curriculum Guide (2022)

Advising

Program faculty are concentrated in the UC Department of Cancer Biology, which administers the Program, and in the Division of Experimental Hematology and Cancer Biology at Children's Hospital, with additional faculty drawn from more than 10 other departments/divisions at the University of Cincinnati College of Medicine and Cincinnati Children's Hospital Medical Center.

The Program Manager provides general advising on coursework and administrative support to all students. Students' mentors will provide individualized guidance to students in their labs.

Admission Requirements

Please view the "How to Apply" page on our program website to view the most up-to-date Admission Requirements.

Application Deadlines

The Cancer & Cell Biology Graduate Program Admissions Committee will review applications on a rolling basis during the application window. All required materials must be submitted online to the University of Cincinnati Graduate School by the deadline provided on the "How to Apply" on our website. We have limited slots available in the program and encourage you to apply early to remain competitive.

After a thorough screening of applications, personal interviews will be arranged for a select group of competitive candidates. Some interviews will be on campus while others will be conducted remotely. The interview serves as an opportunity for the applicant to meet faculty and graduate students, to see the Program's research facilities, and for members of the Program to evaluate the prospective student.

Noteworthy Considerations When Completing Your Application

- Select "Fall" as the semester to apply ***not*** "Summer", even though accepted students will begin in the program in July.
- While we use grades and test scores as part of our ranking process, we give greatest emphasis to the candidate's personal statement, research experience, letters of recommendation, and interviews.
- For select candidates, an Offer of Admission will be made between January and April of the spring prior to the fall admission.
- The program begins July 1. New students are only admitted once per year.
- Effective Fall 2019, the GRE or MCAT is ***not*** a required component of the application; however, it is highly encouraged to submit test scores to contribute to a holistic view of your abilities.

You can direct any questions or comments regarding the Cancer & Cell Biology Graduate Program to cellcoordinator@uc.edu.

Development, Stem Cells & Regenerative Medicine

Duration: **4.5 Years** Award: **PHD**

Overview

This program is located within the Cincinnati Children's Hospital Medical Center; a world class center of research into the basic science underlying childhood disease. It is ranked in the top five children's hospitals in the USA, and second in NIH funding. Aspects of developmental, molecular, and cellular biology are studied, using all animal model systems. The faculty consists of equal numbers of basic scientists and clinicians, most of whom are national or international leaders in their fields. The program is unique in having many collaborative projects between scientists and clinicians aimed at understanding both fundamental developmental mechanisms, and the applications of these to childhood disease. There is a very high level of faculty/student interaction and mentorship.

Students typically take 5 years to complete the program, and publish their work in premier journals. After a series of lab rotations, they select a thesis project and mentor. A qualifier examination is taken at the beginning of the second year. The program offers outstanding courses in developmental biology, at all levels, from introductory to advanced, for students entering from different backgrounds, and is unique in having a course, taught collaboratively by scientists and clinicians, on the developmental basis of childhood diseases.

Career

In addition to becoming a recognized authority in your specific field of research, graduate education lets you acquire many sophisticated skills such as hypothesis generation, problem solving, project management, time management, integration of diverse information, as well as mastering written and oral communication. These are transferable competencies that prepare you for a diverse set of careers.

Graduates of the DSRM PhD Program have established successful careers in a wide variety of fields. While those aspiring towards careers in academic research typically find post-doctoral fellowships in prestigious laboratories around the world, others have gone on to other careers in industry, scientific writing, clinical medicine, teaching, and administration.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
DSRM PhD

Admission Requirements

- A bachelors degree (or equivalent) from an accredited college or university
- A grade-point average (GPA) of 3.2 or better (on a 4.0 scale); unofficial transcripts are acceptable for admissions, but official copies must be provided upon matriculation
- A strong background in biology and/or biochemistry
- Previous research experience is preferred
- A personal background statement
- A curriculum vitae/resume
- Three letters of recommendation

International Student Requirements

Please visit the English Language Proficiency Requirements page for more information.

Application Deadlines

Our application deadline is February 1, however we admit on a rolling basis so applicants are encouraged to submit their materials as soon as possible.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Environmental Health

Big Data

Duration: 6 Years Award: PHD

Overview

Housed in UC's Department of Environmental Health with collaborations throughout the College of Medicine and Cincinnati Children's Hospital Medical Center, the Division of Biostatistics and Bioinformatics offers exciting training and research opportunities in biomedical data sciences. Training programs in the division combine rigorous statistical and computational education rooted in the probability theory and computer science with the exposure to a broad range of biomedical research applications.

Biostatistics is a data science field concerned with application of statistical reasoning in the biomedical and public health research. Biostatisticians develop statistical methodologies that are tailored to address specific biomedical data analysis problems. Biostatisticians are also members of interdisciplinary biomedical research teams whose role is to ensure optimal use of data to answer specific biomedical research questions.

Bioinformatics is an interdisciplinary field that develops methods and computational tools for understanding high-dimensional biomedical data. Bioinformatics combines computer science, statistics, mathematics, and engineering to manage, process and analyze biomedical data. There and many overlaps between Biostatistics and Bioinformatics in terms of methodologies utilized and domains of application in biomedical research. However, Bioinformatics tends to be more focused on the analysis and interpretation of high dimensional datasets such as genomics, proteomics and metabolomics. Furthermore, Bioinformatics research objectives often involve development of software tools that facilitates management and analysis of large and complex datasets.

Both Biostatistics and Bioinformatics are integral parts of the new emerging field of Biomedical Data Sciences. Data Sciences in general is a field dedicated to extraction knowledge from data. In the context of the biomedical and public health research, data sciences integrate traditional statistical reasoning with the technological and computational solutions needed to organize, integrate and analyze relevant data. The biomedical and public health research is increasingly becoming data-intensive and data-driven. The challenges and opportunities offered by accessing, managing, analyzing, and integrating datasets of diverse data types (exposure, health, behavioral, genomics, genetics, etc) is captured by the term "Big Data". The graduate programs and research within our division reflect rapidly increasing role that the data sciences play in contemporary biomedical and public health research.

Current methodological research undertaken by division faculty includes statistical methods for multiple hypothesis testing, statistical genetics, supervised and unsupervised Bayesian and machine learning methods for genomics data analysis, methods for next generation sequencing data analysis, statistical geospatial modeling, integrative statistical models for Big Data, computational drug screening, and protein structure modeling.

A few examples of interdisciplinary biomedical research projects that involve division faculty are study of predictive transcriptional signature for juvenile idiopathic arthritis, genomic determinants of kidney cancer, cancer treatment clinical trials, and numerous biomedical projects investigating gene-environment interactions.

The Division of Biostatistics and Bioinformatics offers both a doctoral program in Biostatistics as well as a doctoral program in Biostatistics with a track in Big Data. If you are interested in applying for the PhD with a track in Big Data you will indicate this in your personal statement of your application.

Curriculum Guide Versions:
PhD Biostatistics Big Data Track Post-Bacc Fall 2018
PhD Biostatistics Big Data Track Post-Masters Fall 2018

Admission Requirements

You will need the following to complete your application:

- Contact Information
- College(s) attended
- Selection of your desired program
- CV or resume

- Statement of Purpose and objectives
- Unofficial transcripts for ALL higher education institutions attended
- Three Letters of Recommendation from individuals familiar with your academic or professional background.
- GRE, GMAT, and/or MCAT scores
    - The Admissions Review Committee will take into account many factors for admissions decisions. Official GRE, GMAT, or MCAT scores should be at the 50th percentile or better.
- International applicants whose native language is not English (please refer to the International Office's English Proficiency Requirement, https://grad.uc.edu/fac-staff/handbook/graduate-admission/international-admission/english.html) must take the TOEFL exam and submit official scores directly from the testing agency.
- International transcripts should be evaluated by WES.
- Official transcripts of all colleges and universities must be submitted if accepted. These must be official, therefore copies cannot replace official records from higher educational institutions attended.

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Application Deadlines

If you would like to submit an electronic application for the Biostatistics program, please visit our On-Line Graduate School Application and complete the form.

Only students applying to the full-time programs in Biostatistics and Bioinformatics are eligible to receive University Graduate Assistantship funding. This funding in not available for our part-time MS or PhD programs in Biostatistics and Bioinformatics. Funding is generally only available in the Fall semester and **any application to be considered for funding must be completed by February 1st.**

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Environmental Health : Big Data

PHD

PhD Biostatistics Big Data Track Post-Bacc Fall 2018

Duration: 6 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 60 Credits

Core Courses

Students must complete the following required PhD Biostatistics core courses (16 credits).

Course	Title/Desc	Credit
BE7024	Computational Statistics (B- min)	3
BE7088	Regression Analysis (B- min)	3
BE7089	Experimental Design (B- min)	3
GNTD7003	Ethics in Research (B- min)	1
STAT6021	Mathematical Statistics I (B- min)	3
STAT6022	Mathematical Statistics II (B- min)	3

Biostatistics Seminar

Students are required to complete 4 semesters (4 credit hours) of Biostatistics Seminar.

Course	Title/Desc	Credit
BE8029	Biostatistics Seminar	1
BE8029	Biostatistics Seminar	1
BE8029	Biostatistics Seminar	1
BE8029	Biostatistics Seminar	1

Environmental Health Seminar

Students are required to complete 4 semesters (4 credit hours) of Environmental Health Seminar.

Course	Title/Desc	Credit
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1

Biomedical Credits

Students are required to select a minimum of 4 credit hours from the list of courses below.

Course	Title/Desc	Credit
BE7076	Introduction to Epidemiology (B- min)	2
CB8080	Cancer Biology and Therapeutics (B- min)	4
GNTD7001	Principles of Molecular and Cellular Biology (B- min)	1 - 4
MCP6031C	Computational Systems Biology (B- min)	2
TOX7082	Survey of Toxicology (B- min)	2

Biostatistics Big Data Track Required Courses

Students are required to complete all courses listed below (9 credits).

Course	Title/Desc	Credit
BE8093	Introduction to Database Systems and Applications (B- min)	3
BMIN7099	Introduction to Bioinformatics (B- min)	3
GNTD8001C	Introduction to Functional Genomics (B- min)	3

Biostatistics Big Data Track (Choose One Course)

Students are required to select one course from the list below (3 credits).

Course	Title/Desc	Credit
BE7082	Introduction to Data Science (B- min)	3
CS6037	Machine Learning (B- min)	3

Course	Title/Desc	Credit
BE6XXX+ BME6XXX+ BMIN6XXX+ CB6XXX+ CS6XXX+ ENV6XXX+ GNTD6XXX+ MATH6XXX+ MCBP6XXX+ PH6XXX+ STAT6XXX+	Free Electives Students are required to complete a minimum of 43 credits of free electives. Electives must be determined with a consultation from an advisor.	43

Dissertation Research Requirement

Students are required to complete a minimum of 7 Dissertation Research credits after the approval of their Statement of Intent.

Course	Title/Desc	Credit
ENV9091	Ph.D. Dissertation Research	1 - 15

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Dissertation Research Requirement

Students are required to complete a minimum of 7 Dissertation Research credits after the approval of their Statement of Intent.

Course	Title/Desc	Credit
ENV9091	Ph.D. Dissertation Research	1 - 15

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Health

Biostatistics

Duration: 6 Years Award: PHD

Overview

Housed in UC's department of Environmental Health with collaborations throughout the College of Medicine and Cincinnati Children's Hospital Medical Center, the Division of Biostatistics and Bioinformatics offers exciting training and research opportunities in biomedical data sciences. Training programs in the division combine rigorous statistical and computational education rooted in the probability theory and computer science with the exposure to a broad range of biomedical research applications.

Biostatistics is a data science field concerned with application of statistical reasoning in the biomedical and public health research. Biostatisticians develop statistical methodologies that are tailored to address specific biomedical data analysis problems. Biostatisticians are also members of interdisciplinary biomedical research teams whose role is to ensure optimal use of data to answer specific biomedical research questions.

Bioinformatics is an interdisciplinary field that develops methods and computational tools for understanding high-dimensional biomedical data. Bioinformatics combines computer science, statistics, mathematics, and engineering to manage, process and analyze biomedical data. There and many overlaps between Biostatistics and Bioinformatics in terms of methodologies utilized and domains of application in biomedical research. However, Bioinformatics tends to be more focused on the analysis and interpretation of high dimensional datasets such as genomics, proteomics and metabolomics. Furthermore, Bioinformatics research objectives often involve development of software tools that facilitates management and analysis of large and complex datasets.

Both Biostatistics and Bioinformatics are integral parts of the new emerging field of Biomedical Data Sciences. Data Sciences in general is a field dedicated to extraction knowledge from data. In the context of the biomedical and public health research, data sciences integrate traditional statistical reasoning with the technological and computational solutions needed to organize, integrate and analyze relevant data. The biomedical and public health research is increasingly becoming data-intensive and data-driven. The challenges and opportunities offered by accessing, managing, analyzing, and integrating datasets of diverse data types (exposure, health, behavioral, genomics, genetics, etc) is captured by the term "Big Data". The graduate programs and research within our division reflect rapidly increasing role that the data sciences play in contemporary biomedical and public health research.

Current methodological research undertaken by division faculty includes statistical methods for multiple hypothesis testing, statistical genetics, supervised and unsupervised Bayesian and machine learning methods for genomics data analysis, methods for next generation sequencing data analysis, statistical geospatial modeling, integrative statistical models for Big Data, computational drug screening, and protein structure modeling.

A few examples of interdisciplinary biomedical research projects that involve division faculty are study of predictive transcriptional signature for juvenile idiopathic arthritis, genomic determinants of kidney cancer, cancer treatment clinical trials, and numerous biomedical projects investigating gene-environment interactions.

The Division of Biostatistics and Bioinformatics offers both a Doctoral program in Biostatistics as well as a Doctoral program in Biostatistics with a track in Big Data. If you are interested in applying for the PhD with a track in Big Data you will indicate this in your personal statement of your application.

Environmental Health

Epidemiology

Duration: **6 Years** Award: **PHD**

Overview

Epidemiology is defined as the study of the distribution and determinants of disease, disability and injury within human populations.

The goals of the epidemiologist are to identify the factors or agents that are linked with objectively measured patterns of harm; to advance and evaluate methods of disease prevention; and to aid in planning and evaluation of the effectiveness of programs that advance public health.

The results of epidemiological research have had a great influence on clinical medicine. Current faculty research undertaken in the Division is wide ranging and includes health effects related to exposures to lead, arsenic, manganese, mercury, solvents, fuels, pesticides, organochlorines and other persistent organic pollutants, fibers, radiation, nutritional and lifestyle factors, alcohol and illicit drugs, and work-related ergonomic disorders. The health outcomes being studied include: allergy, asthma, reproductive, hormone, many types of cancer, genetics of complex diseases, growth and development, neurological and psychiatric disorders, pulmonary disease, injuries, stroke, heart disease, bone health, mortality and exposure body burden.

Curriculum Guide Versions:
PhD Epidemiology Post-Masters Effective Fall 2025
PhD Epidemiology Post-Bacc Effective Fall 2025

Admission Requirements

- Official college transcript(s)
- Official GRE score
- Official TOEFL test score if English is not your native language
  - Please refer to the International Office for questions regarding the English Proficiency Requirement
- Three letters of recommendation submitted through the online recommendation system

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Graduation Requirements

The following are required of PhD students in the Division of Epidemiology to Graduate:

- Satisfactorily completed all required coursework (90 credit hours)
  - No "I" or "NG" grades
- Pass Qualifying Exam
- Dissertation Committee members and Statement of Intent approved by Degrees Committee.
- Successful defense of Dissertation and signed by Dissertation Committee members
- Complete On-Line Graduation Application
- Electronic Dissertation and approval forms turned in to the Graduate School

Application Deadlines

If you would like to submit an electronic application for the Epidemiology program, please visit our On-Line Graduate School Application and complete the form.

Only students applying to the full-time PhD Program in Epidemiology are eligible to receive University Graduate Assistantship funding. This funding in not available for our MS or part-time PhD programs in Epidemiology. Funding is generally only available in the Fall semester and **any application to be considered for funding must be completed by February 1st.**

Accreditation

Environmental Health : Epidemiology

PHD

PhD Epidemiology Post-Masters Effective Fall 2025

Duration: 6 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 60 Credits

Core Courses

Introduction to Epidemiology

Students must take BE-7076 Introduction to Epidemiology (B- min required)

Course	Title/Desc	Credit
BE7076	Introduction to Epidemiology (B- min)	3

Advanced Epidemiologic Study Design & Analysis

Students must take BE-8069 Advanced Epidemiologic Study Design & Analysis (B- min required)

Course	Title/Desc	Credit
BE8069	Advanced Epidemiologic Study Design and Analysis (B- min)	3

Molecular Epidemiology

Students must take BE-9073C Molecular Epidemiology (B- min required)

Course	Title/Desc	Credit
BE9073C	Molecular Epidemiology (B- min)	2

Preparing, Writing, and Reviewing Grant Proposals

Students must take BE-9075 Preparing, Writing, and Reviewing Grant Proposals (B- min required)

Course	Title/Desc	Credit
BE9075	Preparing, Writing, and Reviewing Grant Proposals (B- min)	3

Introduction to Biostatistics

Students must take BDS-7022 Introduction to Biostatistics (B- min required)

Course	Title/Desc	Credit
BDS7022	Introduction to Biostatistics (B- min)	3

Data Analysis with R and SAS

Students must take BDS-8083 Data Analysis with R and SAS (B- min required)

Course	Title/Desc	Credit
BDS8083	Data Analysis with R and SAS (B- min)	3

Required Courses

Epidemiology Seminar

Students are required to complete 4 credit hours (4 semesters) of Epidemiology Seminar.

Course	Title/Desc	Credit
BE8028	Epidemiology Seminar	1
BE8028	Epidemiology Seminar	1
BE8028	Epidemiology Seminar	1
BE8028	Epidemiology Seminar	1

Environmental Health Seminar

Students are required to complete 3 credit hours (3 semesters) of Environmental Health Seminar.

Course	Title/Desc	Credit
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1

Biostatistics Credits

Students are required to complete 6 credit hours or more in Biostatistics-specific courses. Students should select courses from the course catalog list with assistance from their academic adviser (B- min required).

Course	Title/Desc	Credit
BDS6XXX+	Biostatistics Credits Students are required to complete 6 credit hours or more in Biostatistics. (B- min)	6

Epidemiology Credits

Students are required to complete 6 credit hours or more in Epidemiology-specific courses. Students should select courses from the course catalog list with assistance from their academic adviser (B- min required).

Course	Title/Desc	Credit
BE6XXX+	Epidemiology Credits Students are required to complete 6 credits or more in Epidemiology. (B- min)	6

General Research Requirement

Students are required to complete a minimum of 1 credit hour of General Research prior to Qualifying Exam.

Course	Title/Desc	Credit
ENV8091	Research	1 - 15

Free Electives

Students are required to complete a minimum of 4 credit hours of free electives. Students should select courses from the course catalog list with assistance from their academic adviser.

Course	Title/Desc	Credit
BDS6XXX+ BE6XXX+ EDLD6XXX+ ENV6XXX+ GC6XXX+ GEOG6XXX+ GNTD6XXX+ MATH6XXX+ MG6XXX+ NURS6XXX+ PD6XXX+ PH6XXX+ PSTP6XXX+ SOC6XXX+ STAT6XXX+ TOX6XXX+	Free Elective Students are required to complete 5 credit hours or more of Free Electives.	4

Dissertation Research Requirement

Students are required to complete a minimum of 7 credit hours of Dissertation Research after the approval of their Statement of Intent.

Course	Title/Desc	Credit
ENV9091	Ph.D. Dissertation Research	1 - 15

Regression Analysis
Students must take BDS-7088 Regression Analysis (B- min required)

Course	Title/Desc	Credit
BDS7088	Regression Analysis (B- min)	3

Experimental Design
Students must take BDS-7089 Experimental Design (B- min required)

Course	Title/Desc	Credit
BDS7089	Experimental Design (B- min)	3

Biostatistics in Research
Students must take BDS-7061 Biostatistics in Research (B- min required)

Course	Title/Desc	Credit
BDS7061	Biostatistics in Research (B- min)	3

Survey of Toxicology
Students must take TOX-7082 Survey of Toxicology (B- min required)

Course	Title/Desc	Credit
TOX7082	Survey of Toxicology (B- min)	2

Ethics in Research
Students must take GNTD-7003 (Pass required)

Course	Title/Desc	Credit
GNTD7003	Ethics in Research	1

★ This is the typical minimum number of credit hours students must complete.

Environmental Health

Industrial Hygiene

Duration: **6 Years** Award: **PHD**

Overview

All students learn to anticipate, recognize, evaluate, and design programs and systems to control exposures in the environmental or occupational setting that are causing or may be expected to result in adverse human health effects. Academic study at the Ph.D. level is available in three areas of concentration: Industrial Hygiene, Occupational Ergonomics, Biomonitoring. Graduate study is supported by a National Institute for Occupational Safety and Health Education and Research training grant, University and other resources.

Career

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
PhD Industrial Hygiene Post-Baccalaureate Effective Fall 2025
PhD Industrial Hygiene Post-Masters Effective Fall 2025

Admission Requirements

You will need the following to complete your application:

- Contact Information
- College(s) attended
- Selection of your desired program
- CV or resume
- Statement of Purpose and objectives
- Unofficial transcripts for ALL higher education institutions attended
- Three Letters of Recommendation from individuals familiar with your academic or professional background.
- International applicants whose native language is not English (please refer to the University's English Proficiency Requirement for more information, https://grad.uc.edu/fac-staff/handbook/graduate-admission/international-admission/english.html) must take the TOEFL exam and submit official scores directly from the testing agency to be considered for the program. The above website also gives a list of additional exams and certificates that are approved by the University.
- International transcripts should be evaluated by WES.
- Official transcripts of all colleges and universities must be submitted if accepted to the program. These must be official, therefore copies cannot replace official records from higher educational institutions attended.

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Application Deadlines

If you would like to submit an electronic application for the Envirionmental and Industrial Hygiene program, please visit our Online Graduate School Application and complete the form.

Only students applying to the full-time programs in Environmental and Industrial Hygiene are eligible to receive University Graduate Assistantship funding. This funding in not available for our part-time programs in Environmental and Industrial Hygiene. Funding is generally only available in the Fall semester and **any application to be considered for funding must be completed by February 1st.**

Immunology

Duration: **5.5 Years** Award: **PHD**

Overview

The Immunology Graduate Program at the University of Cincinnati and Cincinnati Children's Hospital aims to provide unparalleled training for the next generation of forward-thinking and innovative immunologists. Our program offers rigorous coursework and practical training in some of the world's most outstanding immunology laboratories within the *U.S. News & World Report* #1 ranked Cincinnati Children's Hospital. Our top-notch faculty's extensive experience in teaching and expertise in all areas of immunology provides the student with a well-rounded immunology training experience and preparedness for a future post-graduate career path in immunology.

All Ph.D. students accepted to the program receive coverage for the full cost of tuition, a nationally competitive stipend, and a health insurance plan.

Our program seeks first-class applicants with outstanding undergraduate training. Ideal candidates have training in biological sciences and preferably have research experience.

Career

Our graduates move onto traditional academic Post Docs at Harvard, Stanford, and Duke, and the NIH; others get nontraditional Post Docs in industry at companies like Eli Lilly and Jansen Pharmaceuticals.

Our Alumni are in the industry as well as Academia. They lead research teams, consult for large corporations, work in tech transfer, clinical trial management, patent law, work for the FDA, CDC, and oversee compliance and integrity.

Curriculum

Curriculum Guide Versions:
Immunology PhD course map

UC Advantages And Special Opportunities

Students in the Immunology Graduate Program have access to outstanding core facilities including state-of-the-art flow cytometry and cell sorting, 2-photon imaging, gene targeting and transgenic mouse core, bioinformatics core, gene expression core, pluripotent stem cell facility, laser capture microdissection core, viral vector core, and many others. More information on Research at CCHMC.

Special Programs

International Research Training Group (IRTG)

An IRTG has been established between the Immunology Graduate Program and the University of Lübeck/Research Center Borstel in Lübeck, Germany.

The research focus of the IRTG is:

1. Humoral and Cellular Pathways of Allergic Inflammation
2. Immuno-Regulation of infection-driven inflammation

Students interested in research projects encompassed by these areas may have the opportunity to study and perform research in the beautiful city of Lübeck in north-central Germany for a 3-6 month period.

Admission Requirements

Qualified applicants should meet the following requirements:

- A bachelor's degree (or higher degree) from an accredited college or university
- GPA of 3.0 on a 4.0 scale
- Strong undergraduate background in biology, preferably with some research experience
- **GRE is not required

International Student Requirements

Our program requires a TOEFL score of 100 iBT or higher, or a 7.0 overall band score on the IELTS.

Graduation Requirements

Successful defense of a dissertation and publication of at least one first-author article. Two first-author articles are preferred.

Application Deadlines

Admission deadline is January 1 for Summer enrollment. The program begins during the month of July for new students.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

IMMU8072	Research	3 - 12

Other Requirements

Require milestones

Lab selection

Complete 3 lab rotations and declare permanent lab by June 30

Course	Title/Desc	Credit
Research Experience	complete 3 lab rotations and selection of final lab	0

Year 2

Required courses

Fall semester

Course	Title/Desc	Credit
MG7003	Introductory Microbiology (B min)	3
IMM8001	Immunology Journal Club	1
IMMU8004	Immunology Seminar	1
IMMU8007	Student Post Doc Forum	1
IMMU8072	Research (B min)	1 - 12

Statistics or Research Methods Requirement

Students must complete 1 Statistics or Research Methods course (1-3 credit hours).

Course	Title/Desc	Credit
BE7011	Statistical Computation and Software (B min)	1
BE7022	Introduction to Biostatistics (B min)	3
BE7061	Biostatistics in Research (B min)	3
BME7061	Biostatistics in Research (B min)	3
MCP8001	Grant Writing in Biomedical Science (B min)	2
BIOL8001C	Data Analysis (B min)	3

Year 2

Required courses

Spring Semester

Course	Title/Desc	Credit
GNTD7003	Ethics in Research	1
IMMU8001	Journal Club	1
IMMU8004	Immunology Seminar	1
IMMU8007	Student Post Doc Forum	1
IMMU8072	Research (B min)	1 - 12
IMMU8090	Advanced Topics I (B min)	1

Optional Electives

Students may choose to complete any of the below electives up to 10 hours.

Course	Title/Desc	Credit
BE6XXX+ CB6XXX+ GNTD6XXX+ IMMU6XXX+ MG6XXX+	Optional Electives (C min)	0 - 10

Other Requirements

Required milestones

Qualifying process

The goal of the Oral Qualifying examination is to determine whether the student has sufficiently demonstrated the intellectual capacity to develop and defend an independent research project. There are several different aspects (metrics) by which the student will be assessed including: (i) the quality of the written proposal and the presentation; (ii) the depth of knowledge in the research area and in basic immunology; (iii) the ability to answer questions and defend the research proposal. These points will be directly assessed by the committee during the examination.

Course	Title/Desc	Credit
Other Experience	Early fall present your preliminary proposal (research aims page) to your oral qualifying committee. 7 weeks later schedule your oral qualifying exam (full research proposal)	0
Other Experience	Declare dissertation committee members	0

Year 3-5

Required courses

Every Semester until Graduation

Course	Title/Desc	Credit
IMMU8001	Journal Club	1
IMMU8004	Immunology Seminar	1

other requirements

Required milestones

continued progress toward graduation

Course	Title/Desc	Credit

Course	Title/Desc	Credit
IMMU8007	Student Post Doc Forum	1
IMMU8072	Research (B min)	3 - 12

Course	Title/Desc	Credit
Other Experience	Schedule progress report meetings with your dissertation committee every 6 months	0
Other Experience	Publish, Publish, Publish 2 first author articles are required for graduation	0
Research Experience	Continue working on your research project till you and your committee believe you are ready to defend.	0

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Interdisciplinary - Neuroscience

Duration: **5 Years** Total Credits: **90** Award: **PHD**

Overview

The University of Cincinnati Neuroscience Graduate Program is a degree-granting program of interdisciplinary study. The program supports study in a wide range of Neuroscience-related research areas, including but not limited to neural development; neurobiology of addiction; biology of neurological diseases and neurodegeneration; neuroimaging; neuroendocrinology of stress, obesity and diabetes; and cognitive neuroscience. The program is composed of over 70 faculty in multiple departments in the Colleges of Medicine, Arts and Sciences, Engineering, Pharmacy, Allied Health and the Children's Hospital of Cincinnati. All students have access to a full range of core facilities, including genomics, proteomics, functional MRI, confocal microscopy and rodent behavioral and metabolic phenotyping. The program covers stipend, tuition and health insurance for all students, and provides additional support for domestic and international travel to conferences. Program initiatives include opportunities for international collaboration and career counseling.

There are over 30 PhD students currently in the program. Recent graduates have gone on to post-doctoral work and Johns Hopkins, Cambridge, Washington University and Michigan. Students in the program are supported by training grants from NINDS, NIDDK and NIBIB, and by generous gifts from the Daniel L. Kline Fund.

Curriculum Guide Versions:
Neuroscience Doctoral Program

International Student Requirements

English proficiency is a requirement for doctoral candidacy in the neuroscience graduate program. International students whose first language is not English must take the Test of English as a Foreign Language (TOEFL). International applicants must score at least 100 on the TOEFL Internet-based test (iBT). The minimum overall score for the International English Language Testing System (IELTS) is 6.5.

Graduation Requirements

- All students must complete a minimum of 90 graduate credit hours with at least 30 credit hours of didactic course work. A minimum grade point average of 3.0 is required.
- Qualifying Examination: After approval of a pre-proposal is granted by the Qualifying Exam Committee, a full proposal (formatted as a NIH predoctoral grant application) will be submitted to the qualifying exam committee. The doctoral candidate will subsequently provide a presentation of the proposal to the committee during which time questions about the proposal raised by committee members, including methodology and neuroscientific principles, will be addressed by the doctoral candidate.
- At least one first-author, peer-reviewed journal article published or in press is required.
- Dissertation Submittal and Defense: A final dissertation based on research performed will be submitted to the candidate's chosen Dissertation Committee consistent with the guidelines published in the NGP Handbook. The seminar-style dissertation defense will be conducted in public with questions and comments welcomed from the audience. After the public portion, the Dissertation Committee will conduct a closed examination. Following approval of 4/5 of the Dissertation Committee, recommendation to confer the degree of Doctor of Philosophy in Neuroscience will be submitted to the Graduate School.

Application Deadlines

If you would like to submit an electronic application for the Neuroscience/Medical Science Scholars Interdisciplinary program, please visit our On-Line Graduate School Application and complete the form.

Make sure to visit the Neuroscience/Medical Science Scholars Interdisciplinary website or contact the program directly for information about application requirements or to inquire about materials that need to be submitted when applying to this program.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Molecular and Developmental Biology

Duration: **5 Years** Award: **PHD**

Overview

The Program is centered in the Cincinnati Children's Hospital Medical Center; a world class center of research into the basic science underlying childhood disease. It is ranked in the top five children's hospitals in the USA, and second in NIH funding. Aspects of developmental, molecular, and cellular biology are studied, using all animal model systems. The faculty consists of equal numbers of basic scientists and clinicians, most of whom are national or international leaders in their fields. The Program is unique in having many collaborative projects between basic scientists and clinicians aimed at understanding both fundamental developmental mechanisms, and the applications of these to childhood disease. There is a very high level of faculty/student interaction and mentorship.

Students typically take 5 years, and publish their work in premier journals. After a series of lab rotations, they select a thesis project and mentor. A qualifier examination is taken at the beginning of the second year. The Program offers outstanding courses in developmental biology, at all levels, from introductory to advanced, for students entering from different backgrounds, and is unique in having a course, taught collaboratively by basic scientists and clinicians, on the developmental basis of childhood diseases.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
DSRM PhD

Admission Requirements

- A baccalaureate degree (or equivalent) from an accredited college or university
- A grade-point average (GPA) of 3.2 or better (on a 4.0 scale); unofficial transcripts are acceptable for admissions, but official copies must be provided upon matriculation
- A strong background in biology and/or biochemistry
- Previous research experience is preferred
- Graduate Record Exam (GRE) score (Institution code:1833; Department Code: 0208); the Biology Subject test in encouraged, but not required
- A personal background statement
- Three letters of recommendation to be submitted electronically

Transferring To UC

Transfer students are evaluated on a case-by-case basis.

International Student Requirements

- TOEFL score if English is not the student's primary language (institution code:1833; Department code: 99)

Application Deadlines

Our application deadline is February 1, however we admit on a rolling basis so applicants are encouraged to submit their materials as soon as possible.

If you would like to submit an electronic application for the Molecular & Developmental Biology program, please visit our On-Line Graduate School Application and complete the form.

Make sure to visit the Molecular & Developmental Biology website or contact the program directly at mdbprog@cchmc.org or 513-636-4545 for information about application requirements or to inquire about materials that need to be submitted when applying to this program.

Molecular Gen, Biochem, Microbiology

Duration: **5 Years** Award: **PHD**

Overview

The Department of Molecular Genetics, Biochemistry and Microbiology offers a nationally visible doctoral program for students interested in laboratory research and advanced training at a top competitive level. The program provides multiple laboratory opportunities in the molecular aspects of modern biomedical research, and is complemented by an extensive choice of courses across the disciplines of molecular genetics, biochemistry, microbiology, immunology, and bioinformatics. We have developed our research programs in several "focus areas" namely: cancer biology and regenerative medicine, cardiovascular biology and biochemistry, microbiology and immunology, and structural biology. Each represents a dynamic research area within the flourishing field of molecular medicine. Many individual research programs directly impact questions of human biology and disease. Thus, the doctoral program offers diverse opportunities in research while integrating the fundamental knowledge base required for tomorrow's biomedical scientist, providing training and experience that is second-to-none.

In biology and medicine, the coming decades will be dominated by application of information derived from knowledge of the human genome. Our ongoing commitment is to ensure that students graduating from this program are equipped with the highest technical, intellectual and communication skills required for successful participation in this exciting future.

Curriculum Guide Versions:
Molecular Genetics PhD Curriculum Guide

Admission Requirements

- GREs are not required, but highly recommended. We will waive the GRE requirement for applicants who demonstrate a strong record in relevant STEM courses such as organic chemistry, biochemistry, physical chemistry, molecular genetics, etc and have attained an overall GPA of >3.5
- Unofficial transcripts are used for admissions review. Official college transcripts required when offered admission.
- 3 letters of reference
- Curriculum Vitae or Resume
- Personal statement
- TOEFL or IELTS scores for non-native English speakers
    - Minimum Scores: TOEFL 100 or IELTS 7

Application Deadlines

If you are interested in applying to the Molecular Genetics Doctoral program, please submit a Graduate School Application. Make sure to visit the Molecular Genetics, Biochemistry, & Microbiology website or contact the program directly for more information.

Applicants for the Doctoral Programs are encouraged to submit application materials by December 15 for matriculation in the Fall Semester of the following year. Applications submitted up until January 15 will be considered, pending availability of space.

Molecular Gen, Biochem, Microbiology

PHD

Molecular Genetics PhD Curriculum Guide

Duration: 5 Years
★Post Baccalaureate Minimum Credits: 90 - 160 Credits
★Post Master's Minimum Credits: 66 - 136 Credits

Fall Semester Year 1

Students should register for 15 hours minimum

Course	Title/Desc	Credit
GNTD7001	Principles of Molecular and Cellular Biology (B- min)	4
MG7010	Graduate Seminar in Molecular Genetics 1 (B- min)	2
MG7003	Introductory Microbiology (B- min)	3
MG9003	Laboratory Rotations	6 - 18

Spring Semester Year 1

Students should register for 15 hours minimum

Course	Title/Desc	Credit
GNTD7002	Biochemistry and Cellular Metabolism (B- min)	3
MG7011	Graduate Seminar in Molecular Genetics 2 (B- min)	2
MG9003	Laboratory Rotations	6 - 18
6XXX+	Electives Students must chose from electives in the College of Medicine in consultation with the Program Director	2 - 8
GNTD7003	Ethics in Research	1

Select 2 of the following five courses

Students must take two of the five listed courses and should select from the other to fulfill the elective requirement when possible

A standard typical schedule that fulfills this requirement would be to take MG7003 in the Fall of Year 1 and GNTD7002 in the Spring of Year 1

Course	Title/Desc	Credit
GNTD7002	Biochemistry and Cellular Metabolism (B- min)	3
MG7023	Immunology (B- min)	2
MG7024	Mechanisms of Signal Transduction (B- min)	2
MG7025	Chemistry, Structure, and Therapeutic Applications of Biological Molecules (B- min)	3
MG7003	Introductory Microbiology (B- min)	3

Fall Semester Year 2

Students should register for 15 hours minimum

Course	Title/Desc	Credit
MG7010	Graduate Seminar in Molecular Genetics 1 (B- min)	1
MCP8001	Grant Writing in Biomedical Science (C min)	2
MG9001	Dissertation Research	6 - 18

Spring Semester Year 2

Students should register for 15 hours minimum

Course	Title/Desc	Credit
MCP8050C	Statistics and Experimental Design for the Biomedical Sciences (C min)	3
Other Experience	In the Spring of Year 2, students will complete their Qualifying Exam. This Exam is comprised of a NIH style grant proposal that will be submitted and then defended. Successful completion of the Qualifying Exam will serve an important step in the advancement to Candidacy.	0
MG9001	Dissertation Research	6 - 18

Fall Semester Year 3

Course	Title/Desc	Credit
MG9001	Dissertation Research	1 - 18

Spring Semester Year 3

Course	Title/Desc	Credit
MG9001	Dissertation Research	1 - 18

Fall Semester Year 4

Spring Semester Year 4

Course	Title/Desc	Credit
MG9001	Dissertation Research	1 - 18

Course	Title/Desc	Credit
MG9001	Dissertation Research	1 - 18

Fall Semester Year 5

Course	Title/Desc	Credit
MG9001	Dissertation Research	1 - 18

Spring Semester Year 5

Course	Title/Desc	Credit
MG9001	Dissertation Research	1 - 18

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Molecular, Cellular and Biochemical Pharmacology

Duration: **5 Years** Total Credits: **90** Award: **PHD**

Overview

Pharmacology is the study of the physical and chemical properties and mechanism of action of the biochemical substances (pharmacological agents) that regulate life processes. Pharmacological agents may be drugs or natural regulatory substances including peptides, chemicals and gene products and transcription factors. The Molecular Pharmacology program is highly integrative and includes research specialization in the areas of molecular biology, biochemistry, cellular and subcellular biology, neurobiology, electrophysiology, cardiovascular biology, physiology, genetics, genomics and proteomics, bioinformatics, biomedical engineering, biophysics and structural biology. Research projects typically employ approaches at the subcellular, cellular, organ and whole animal levels. The program is academically rigorous and students with a high level of achievement in biology, chemistry, pharmacology, biochemistry, physics, engineering or pharmacy are encouraged to apply.

The Ph.D. program typically requires 4-5 years of study (no MS necessary). Students primarily take didactic courses and rotate in research lab the first year (3 rotations required). Students participate in departmental and college seminars, journal clubs and begin their dissertation research work the second year, after qualification. A variety of funded laboratory environments are available with access to multiple training grants.

Occupational Safety and Ergonomics

Duration: **3 Years** Award: **PHD**

Overview

The Environmental and Occupational Hygiene division faculty maintain nationally and internationally recognized research programs in the broad areas of anticipation, recognition, evaluation and control of workplace and environmental exposures. Specific research programs are devoted to the techniques for sampling chemical and biological aerosols, relationships between exposures and internal markers of effect, relationship between exposure and such chronic diseases as silicosis and lung cancer, occupational ergonomics, biomechanics, safety, relationship between workplace physical/chemical risk factors and workers' neuromuscular performance, historic and current exposure assessment, characterization of lead exposures, environmental intervention studies, and effect of neurotoxic chemicals on neurobehavioral performance. Ph.D. students conduct independent research which advances their particular field of interest.

Curriculum Guide Versions:
PhD Occupational Safety and Ergonomics Post-Baccalaureate Effective Fall 2025
PhD Occupational Safety and Ergonomics Post-Masters Effective Fall 2025

Admission Requirements

You will need the following to complete your application:

- Contact Information
- College(s) attended
- Selection of your desired program
- CV or resume
- Statement of Purpose and objectives
- Unofficial transcripts for ALL higher education institutions attended
- Three Letters of Recommendation from individuals familiar with your academic or professional background.
- GRE, GMAT, and/or MCAT scores
  - The Admissions Review Committee will take into account many factors for admissions decisions. Official GRE, GMAT, or MCAT scores should be at the 50th percentile or better.
- International applicants whose native language is not English (please refer to the university English Proficiency Requirement, https://grad.uc.edu/fac-staff/handbook/graduate-admission/international-admission/english.html) must take the TOEFL exam and submit official scores directly from the testing agency to be considered for the program. The above website also gives a list of additional exams and certificates that are approved by the University.
- International transcripts should be evaluated by WES.
- Official transcripts of all colleges and universities must be submitted if accepted to the program. These must be official, therefore copies cannot replace official records from higher educational institutions attended.

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Application Deadlines

If you would like to submit an electronic application for the Occupational Safety and Ergonomics Program please visit our Online Graduate School Application and complete the form.

The deadlines for complete applications for each semester are as follows:

- Fall - July 1st
- Spring - November 1st

Only students applying to the full-time programs in Occupational Safety and Ergonomics are eligible to receive University Graduate Assistantship funding. This funding in not available for our part-time MS or PhD programs in Occupational Safety and Ergonomics. Funding is generally only available in the Fall semester and **any application to be considered for funding must be completely submitted by February 1st.**

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Occupational Safety and Ergonomics

PHD

PhD Occupational Safety and Ergonomics Post-Baccalaureate Effective Fall 2025

Duration: 3 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 71 Credits

Core Courses

PhD OSE Core Courses

Students are required to complete the following core courses (B- min required).

Course	Title/Desc	Credit
BDS7022	Introduction to Biostatistics (B- min)	3
BE7076	Introduction to Epidemiology (B- min)	2
EIH7007	Principles of Occupational Exposure Assesment (B- min)	2
EIH7041C	Practice in Occupational Exposure Assessment I (B- min)	2
EIH7042C	Practice in Occupational Exposure Asessment II (B- min)	2
EIH7043C	Aerosol Properties and Measurement (B- min)	2
EIH7084	Survey of Physiology (B- min)	1
EIH7090C	Physical Aspects of the Environment (B- min)	2
EIH8019	Occupational Health, Hygiene and Safety Workshop I (B- min)	2
EIH8020	Occupational Health, Hygiene and Safety Workshop II (B- min)	2
EIH8034	Hazardous Materials Management (B- min)	2
EIH9004	Identification of Potential Workplace Exposures (B- min)	3
GNTD7003	Ethics in Research (B- min)	1
MECH6050	Occupational Safety Engineering (B- min)	3
MECH6052	System Safety Engineering (B- min)	3
OSE7092C	Principles of Ergonomics (B- min)	2
OSE7044C	Biomechanical and Physiological Aspects of Muscular Activity (B- min)	2
OSE7048C	Introduction to Measurement Techniques in Ergonomics (B- min)	2

Required Courses

Professional Development

Students are required to complete 2 credit hours (2 semesters) of EIH8084 Professional Development (Pass required).

Course	Title/Desc	Credit
EIH8084	Professional Development	1
EIH8084	Professional Development	1

Teaching Practicum

Students are required to complete 2 credit hours (2 semesters) of EIH7025C Teaching Practicum (B- min required).

Course	Title/Desc	Credit
EIH7025C	Teaching Practicum in Environmental Health (B- min)	1
EIH7025C	Teaching Practicum in Environmental Health (B- min)	1

Communication Course

Students are required to complete BE8076 Successful Scientific Writing (B- min required).

Course	Title/Desc	Credit
BE8076	Successful Scientific Writing (B- min)	2

Grant Writing Course

Students must choose one of the following courses: BE9075, HPE7014, or MCP7001 to fulfill this requirement.

Course	Title/Desc	Credit
BE9075	Preparing, Writing, and Reviewing Grant Proposals (B- min)	3
HPE7014	Grant Writing and Resource Development (B- min)	3
MCP8001	Grant Writing in Biomedical Science (B- min)	2

Environmental Health Seminar

Students are required to complete 4 credit hours (4 semesters) of ENV7001 Environmental Health Seminar.

Course	Title/Desc	Credit

Electives and Dissertation

Focused Electives within DEPHS

Students are required to complete at least 3 graduate level credit hours within the following subject codes: BE, BDS, PH, EIH, TOX, OSE, OCCM, or ENV. Courses outside of these subject codes need adviser approval.

Course	Title/Desc	Credit
BDS6XXX+ BE6XXX+ EIH6XXX+ ENV6XXX+ OCCM6XXX+ OSE6XXX+ PH6XXX+ TOX6XXX+	Focused Electives within DEPHS	3

Focused Electives outside DEPHS

Students are required to complete at least 3 graduate level credit hours within the following subject codes: ANCH, BME, ENVE, GNTD, HPE, or MECH. Courses outside of these subject codes need adviser approval.

Course	Title/Desc	Credit
ANCH6XXX+ BME6XXX+ ENVE6XXX+ GNTD6XXX+ HPE6XXX+ MECH6XXX+	Focused Electives outside DEPHS	3

Focused Electives in Statistics and Data Sciences

Students are required to complete at least 3 graduate level credit hours within the following subject codes: BDS, STAT, or BANA. Courses outside of these subject codes need adviser approval.

Course	Title/Desc	Credit
BANA6XXX+ BDS6XXX+ STAT6XXX+	Focused Electives in Statistics and Data Sciences	3

Free Electives

Students can select free electives from the following subject codes.

Course	Title/Desc	Credit

Current Topics I

Students are required to complete 2 credit hours (2 semesters) of EIH 8081 Current Topics I (Pass required).

Course	Title/Desc	Credit
EIH8081	Current Topics in Occupational Hygiene I	1
EIH8081	Current Topics in Occupational Hygiene I	1

Current Topics II

Students are required to complete 2 credit hours (2 semesters) of EIH8082 Current Topics II (Pass required).

Course	Title/Desc	Credit
EIH8082	Current Topics in Occupational Hygiene II	1
EIH8082	Current Topics in Occupational Hygiene II	1

Course	Title/Desc	Credit
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1

Course	Title/Desc	Credit

ENV7001	Environmental Health Seminar	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pathobiology and Molecular Medicine

Duration: **5 Years** Award: **PHD**

Overview

The graduate program in Pathobiology & Molecular Medicine offers a course of study in biomedical research leading to a Ph.D. degree. The program is administered by two clinical departments: Pathology and Internal Medicine. Pathology is a branch of medical science concerning the study of the nature of human disease and its causes, whereas medicine is concerned with therapeutic strategies to prevent or cure human diseases.

Doctoral students in the Pathobiology & Molecular Medicine graduate program are exposed to each of these disciplines in a program of study that unites contemporary investigative research in biomedical sciences with an understanding of human disease and the challenges that face effective treatment.

Career

Curriculum

Coursework

All students participate in a core curriculum of academic courses for the first year. This is comprised of a series of lectures and laboratories that encompass basic molecular and cellular biology and the molecular mechanisms of human disease. Additional elective coursework and two to three research laboratory rotations are tailored to the student's individual research interests. The student also has the option of participating in an industrial or government research entity.

Independent Research

At the beginning of the second year, students select a laboratory and begin work on their independent research project. A student may choose from approximately forty participating laboratories directed by faculty members that conduct research in the following general focus areas: Cardiovascular & Lipid Disorders; Digestive & Kidney Disease; Endocrine, Metabolic, & Bone Disorders; Hematology/Oncology; and Immunology & Infectious Diseases.

Since an individual research project may span more than one focus area, the student's thesis committee will also recommend attendance at select clinical and research seminars in the focus area(s) which are likely to complement the student's research activities. The completion of all requirements for the Ph.D. degree generally takes five years.

Curriculum Guide Versions:
Pathobiology and Molecular Medicine Entering 2023-2024

Special Programs

The following is a list of potential funding sources and awards:

- Albert J. Ryan Fellowship
- Internal Medicine Trainee Grant
- Provost Graduate Fellowship
- University Research Council Graduate Student Summer Research Fellowships
- University Deans Distinguished Dissertation Fellowship Program
- Graduate Dean's Excellence Scholarship
- Fellowship for Doctoral Students Aspiring to Academic Careers
- GSGA Research Fellowships
- Albert C. Yates Fellows and Scholars Program
- Ford Foundation Fellowships for Minorities
- Sigma Xi Grants in Aid of Research

Admission Requirements

Complete the UC Graduate Admissions Application, including:

- Personal Statement Essay
- Transcript from an accredited college or university with at least a B average

- Three letters of recommendation from people familiar with your academic record
- International Applicants only: Proof of English language proficiency

International Student Requirements

Applicants for whom English is not the native language must score a minimum of 100 iBT on the Test of English as a Foreign Language (TOEFL). All enrolled international graduate students must demonstrate oral proficiency in the use of the English language by passing the University's Oral English Proficiency
Test (OEPT). Students who fail the OEPT are required to take at least one-quarter of English as a Second Language prior to retaking the examination. Students may take the examination twice a year and
must pass the examination before they will be admitted to doctoral candidacy.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Systems Biology & Physiology

Duration: **5 Years** Total Credits: **90** Award: **PHD**

Overview

The Systems Biology and Physiology PhD program is focused on understanding the network structure of organisms. Our large (more than 60) multidisciplinary faculty is composed of recognized experts committed to excellence. In this program, you will conduct research in four modern buildings with a full range of equipment and core facilities. As a Ph.D. student in this program, you will be able to choose a course of study that will prepare you to be a successful researcher, a dedicated teacher, or an entrepreneur. By working directly with members of the faculty and other researchers, you will develop the creative-thinking skills that will fully prepare you to be a leader in your chosen field.

Toxicology

Duration: **5 Years** Total Credits: **90** Award: **PHD**

Overview

The Doctor of Philosophy in Toxicology curriculum emphasizes genetic and molecular mechanisms underlying environmentally-related diseases. Major focus areas for research are the genetic, epigenetic, biochemical and physiological determinants of individual and population susceptibility to environmental diseases. Research topics include carcinogenesis, respiratory diseases, obesity and diabetes, biodefense, microbial genomics and various organ-specific toxicities. Pathways studied include gene regulation, signal transduction, oxidative stress and mitochondrial function, metal transport and toxicity. Methodologies include transgenic and recombinant inbred mouse models, knockout mouse models, bioinformatics, epigenetics, proteomics, and genomics.

Admission Requirements

You will need the following to complete your application:

- Contact Information
- College(s) attended
- Selection of your desired program
- CV or resume
- Statement of Purpose and objectives
- Unofficial transcripts for ALL higher education institutions attended
- Three Letters of Recommendation from individuals familiar with your academic or professional background.
- GRE, GMAT, and/or MCAT scores
    - The Admissions Review Committee will take into account many factors for admissions decisions. Official GRE, GMAT, or MCAT scores should be at the 50th percentile or better.
- International applicants whose native language is not English (please refer to the International Office's English Proficiency Requirement, https://grad.uc.edu/fac-staff/handbook/graduate-admission/international-admission/english.html) must take the TOEFL exam and submit official scores directly from the testing agency to be considered for the program. The above website also gives a list of additional exams and certificates that are approved by the University.
- International transcripts should be evaluated by WES.
- Official transcripts of all colleges and universities must be submitted if accepted to the program. These must be official, therefore copies cannot replace official records from higher educational institutions attended.

International Student Requirements

Please visit the International Office's website for any requirements or questions regarding International Students.

Application Deadlines

If you would like to submit an electronic application for the Program please visit our Online Graduate School Application and complete the form.

The deadlines for complete applications for each semester are as follows:

- Fall - July 1st
- Spring - November 1st

Only students applying to the full-time programs in Toxicology are eligible to receive University Graduate Assistantship funding. This funding in not available for our part-time MS or PhD programs in Toxicology. Funding is generally only available in the Fall semester and **any application to be considered for funding must be completely submitted by February 1st.**

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Toxicology

PHD

PhD Toxicology Post-Bacc Fall 2025

Duration: 5 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 60 Credits

Core Courses

Principles of Molecular and Cellular Biology

Students must take GNTD7001 Principles of Molecular and Cellular Biology (B- min required).

Course	Title/Desc	Credit
GNTD7001	Principles of Molecular and Cellular Biology (B- min)	4

Biochemistry and Cellular Metabolism

Students must take GNTD7002 Biochemistry and Cellular Metabolism (B- min required).

Course	Title/Desc	Credit
GNTD7002	Biochemistry and Cellular Metabolism (B- min)	3

Ethics in Research

Students must take GNTD7003 Ethics in Research (Pass required).

Course	Title/Desc	Credit
GNTD7003	Ethics in Research	1

Career Opportunities in Biomedical Sciences

Students must take GNTD8003 Career Opportunities in Biomedical Sciences (B- min required).

Course	Title/Desc	Credit
GNTD8003	Career Opportunities in Biomedical Sciences (B- min)	2

Introduction to Biostatistics

Students must take BDS7022 Introduction to Biostatistics (B- min required).

Course	Title/Desc	Credit
BDS7022	Introduction to Biostatistics (B- min)	3

Survey of Toxicology

Students must take TOX7082 Survey of Toxicology (B- min required).

Course	Title/Desc	Credit
TOX7082	Survey of Toxicology (B- min)	2

Recurring Courses

Environmental Health Seminar

Students must take at least 8 semesters of ENV7001 Environmental Health Seminar.

Course	Title/Desc	Credit
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1
ENV7001	Environmental Health Seminar	1

EGMT Seminar

Students must take at least 5 semesters of TOX8039 EGMT Seminar.

Course	Title/Desc	Credit
TOX8039	Environmental Genetics and Molecular Toxicology Student Seminar	1
TOX8039	Environmental Genetics and Molecular Toxicology Student Seminar	1
TOX8039	Environmental Genetics and Molecular Toxicology Student Seminar	1
TOX8039	Environmental Genetics and Molecular Toxicology Student Seminar	1
TOX8039	Environmental Genetics and Molecular Toxicology Student Seminar	1

Free Electives & Culmination

Free Electives

Students can choose from the following focused electives so that their total degree credit hours equals 90. Post-Baccalaureate students will take a maximum of 47 free elective credit hours.

Course	Title/Desc	Credit
BDS7099	Introduction to Bioinformatics	3
BE8062	Introduction to Medical Informatics	3
CB8080	Cancer Biology and Therapeutics	5
DB9085C	Introduction to Developmental Biology	3
DB9088	Regulation of Gene Expression	2
EIH7084	Survey of Physiology	1
EIH8043	Human Biological Monitoring and Biological Markers	2
EIH8078	Applied Risk Assessment	2
GC7020	Human Genetics	3
GC7080	Teratology	2
GNTD8001C	Introduction to Functional Genomics	3
MCBP8027	Systems Pharmacology	3
MCP7000	Human Physiology	4
MG7024	Mechanisms of Signal Transduction	2
PMM8084C	Histology for Research	2
PMM8099	Immunology of Disease	2

PhD Dissertation Research

Students must take a minimum of 7 credit hours of ENV9091 PhD Dissertation Research. Total research hours will vary depending on the number of free electives students register for.

Course	Title/Desc	Credit
ENV9091	Ph.D. Dissertation Research	1 - 15

EGMT Core Course

Students must take TOX8051 EGMT Core Course (B- min required).

Course	Title/Desc	Credit
TOX8051	Environmental Genetics and Molecular Toxicology Core Course (B- min)	6

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Toxicology

PHD

PhD Toxicology Post-Masters Fall 2025

Duration: 5 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 60 Credits

Core Courses

Introduction to Biostatistics

Students must take BDS7022 Introduction to Biostatistics (B- min required).

Course	Title/Desc	Credit
BDS7022	Introduction to Biostatistics (B- min)	3

Principles of Molecular and Cellular Biology

Students must take GNTD7001 Principles of Molecular and Cellular Biology (B- min required).

Course	Title/Desc	Credit
GNTD7001	Principles of Molecular and Cellular Biology (B- min)	4

Biochemistry and Cellular Metabolism

Students must take GNTD7002 Biochemistry and Cellular Metabolism (B- min required).

Course	Title/Desc	Credit
GNTD7002	Biochemistry and Cellular Metabolism (B- min)	3

Ethics in Research

Students must take GNTD7003 Ethics in Research (Pass required).

Course	Title/Desc	Credit
GNTD7003	Ethics in Research	1

Career Opportunities in Biomedical Sciences

Students must take GNTD8003 Career Opportunities in Biomedical Sciences (B- min required).

Course	Title/Desc	Credit
GNTD8003	Career Opportunities in Biomedical Sciences (B- min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Clinical Anatomy

Duration: **1 Year** Total Credits: **12 - 18** Award: **Certificate**

Overview

Students interested in a career in health care face the difficult challenge of finding ways to distinguish themselves from other applicants when applying to highly competitive programs in nursing, physical therapy, physician assistant, graduate school in biomedical sciences, and medical school. While these programs aim at producing different types of health care workers, they share a commonality in that knowledge of the human body (anatomy) is critical to success. This certificate was designed to provide recognition for students who develop a foundation of knowledge related to the clinical application of anatomical information by completing a series of select courses in the anatomical sciences (gross anatomy, histology, embryology, and neuroanatomy).

Career

A certificate in clinical anatomy will be a useful credential for students interested in persuing a career in health care. Nearly every health care-related field requires a foundation of knowledge in human anatomy. The courses that contriubte to the Clinical Anatomy Certificate are designed to provide students with a broad overview of anatomy-related information that will allow for a more seamless transition into advanced studies in healthcare.

Curriculum

The Clinical Anatomy Certificate required to earn a minimum of 12 credits using the courses and criteria outlined below:

One of the following core courses:

- MEDS 4052C: Human Gross Anatomy (4cr)
- HLSC4015C: Introductory Gross Anatomy (3cr)

Any combination of the following elective courses to reach the 12 credit hour minimum:

- MEDS 3027C: Medical Histology (3cr)
- MEDS 4021: Clinical Embryology (3cr)
- MEDS 4048C: Clinical Neuroanatomy (3cr)
- HLSC 2021C: Musculoskeletal Anatomy (3cr)
- MEDS 3015: Independent Study in Medical Sciences (1-2cr)

Major Map Versions:
Clinical Anatomy Certificate

Advising

Please contact your major advisor for assistance with scheduling for certificate courses. Questions regarding the curriculum can be addressed to the Certificate Director, Professor Andrew Thompson.

Admission Requirements

Students must be matriculated to UC at the time they apply for the certificate. At the time of the application, students should have a minimum grade-point average of 2.5. Applicants will be asked to include a statement explaining why they are applying for the certificate and how it fits within their future career goals.

Graduation Requirements

Make sure that you have declared the certificate program online. Next, make sure that the certificate program director is aware of when you are finishing the program. If you are pursuing another bachelor's degree, your certificate will be reviewed at the time that you submit your separate degree application.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Clinical Anatomy

Certificate

Clinical Anatomy Certificate

Duration: 1 Year

★Minimum Credits: 12 - 18 Credits

Core Course

Take one of the following courses.

Course	Title/Desc	Credit
HLSC4015C	Introductory Gross Anatomy (C min)	3
MEDS4052C	Human Gross Anatomy (C min)	4

Elective Courses

Take any combination of the following courses to reach the 12 credit certificate minimum. Note: students who wish to take "MEDS3015: Independent Study in Medical Sciences" as part of the certificate must work with the Clinical Anatomy Certificate Director to develop an appropriate learning plan that aligns with the learning outcomes of the Certificate.

Course	Title/Desc	Credit
HLSC2021C	Musculoskeletal Anatomy (C min)	3
MEDS3015	Independent Study in Medical Sciences	1 - 2
MEDS3027C	Medical Histology (C min)	3
MEDS4021	Clinical Embryology (C min)	3
MEDS4048C	Clinical Neuroanatomy (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Clinical and Translational Science

Duration: **1 Year** Total Credits: **12** Award: **Certificate**

Overview

The Certificate program is geared towards students currently enrolled in undergraduate programs at UC who are interested in gaining knowledge and experience in biomedical research. Course topics include: an overview of clinical and translational science, ethics, introduction to clinical trials, Good Clinical Practice (GCP), and team-based research skills. The goal of the Certificate program is to prepare graduates to enter the workforce as clinical research staff.

Career

The Certificate program will prepare graduates for challenging and fulfilling careers in clinical and translational research. Graduates will complete internships in both clinical care and biomedical research as preparation for research careers in academia or industry. The demand for clinical research professionals is high both locally and nationally, with a median income of $78,600 in 2024.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Undergraduate Certificate in Clinical & Translational Science

Admission Requirements

Eligible applicants must be current students at UC in good academic standing with a GPA of 2.5 or higher. Application requirements include:

- **Personal Statement**: Your background and career goals statement should describe your personal history and the factors that have brought you to where you are now, educationally and/or professionally. Include any past experience relevant to research, or future hopes to work in this field. It should also describe why you are interested in this program and how the program supports your career goals.
- At least **one letter of recommendation**. This letter should ideally be from a professional or academic reference (e.g., work manager or faculty member).

Integrative Health

Duration: **1 Year** Total Credits: **15** Award: **Certificate**

Overview

The undergraduate Certificate in Integrative Health and Wellness is offered through the College of Medicine via the Center for Integrative Health and Wellness.

The undergraduate Integrative Health and Wellness Certificate enables students to become more active in their own healthcare and that of their community to focus more on health prevention and promotion and less so on disease or sick care. This certificate will help interdisciplinary students across a wide spectrum of fields to become collaborative and transformative practitioners, educators and/or patients that focus on the use of integrative and complementary health approaches to achieve optimal health.

Success

This 15 credit hour certificate will provide a solid introductory background for students to the concepts and evidence-base of integrative health concepts and therapies in the broad concept of improving personal and community wellness. Students will be from a variety of health-related and non-health programs, and will be able to apply these concepts at a level appropriate and useful to them. The focus will be on introducing concepts, understanding the relevant scientific evidence-base, and learning applicability to improve personal and community wellness.

Career

The Integrative Health and Wellness Certificate is designed to complement a major chosen by a student that is relevant to the student's career goals. This program will allow you to provide a foundation to explore various complementary and integrative therapies to implement into your personal wellbeing. This program will provide useful background information to those interested in the health care field and to those interested in government and insurance as this is a growing field of interest.

Medical Informatics

Duration: **2 Years** Total Credits: **15** Award: **Certificate**

Overview

The undergraduate Medical Informatics certificate is offered through the College of Medicine.

This 15-hour certificate will provide students with the fundamental knowledge and skills encapsulated in medical informatics (MedInfo). MedInfo is a subarea of biomedical informatics that includes imaging informatics, clinical informatics, and public health informatics.

Career

Data Science is a fast-growing research area in recent years. It has great potential to transform healthcare and improve human health using innovative artificial intelligence and digital health solutions. The MedInfo certificate will allow the UC Medical Sciences students as well as other students to develop fundamental knowledge, skills, and experience in the areas of biomedical data science.

Medical Informatics

Certificate

Medical Informatics Certificate

Duration: 2 Years

★Minimum Credits: 15 Credits

About the Certificate

Students must complete a minimum of 15 credit hours for the MedInfo certificate. Students may choose from the Medical Sciences or Business Analytics tracks. Students should speak with an advisor prior to selecting a track and beginning the certificate.

Foundation Course (all tracks)

MEDS2061 must be completed by all MedInfo students, regardless of track.

Course	Title/Desc	Credit
MEDS2061	Introduction to Medical Informatics	3

Medical Sciences Track

Data Management & Programming

Course	Title/Desc	Credit
MEDS2060	Introduction to Database Systems and Applications	3

Data Analysis

Complete one

Course	Title/Desc	Credit
MEDS3023C	Statistics and Experimental Design for the Biomedical Sciences	3

Capstone Project

Complete 3 credit hours in a course below

Course	Title/Desc	Credit
MEDS3015	Independent Study in Medical Sciences	1 - 3
MEDS3030	Biomedical Research Rotation	2 - 6
MEDS5030	Biomedical Research Capstone 1	3 - 6
MEDS5031	Biomedical Research Capstone 2	3 - 6

Electives

Complete 3 credits of elective through one of the courses below or any course listed in the above categories not already used as part of the certificate.

Course	Title/Desc	Credit
MEDS3090	Medical Imaging: Science and Application	3
MEDS4030	Introduction to Medical Device Innovation	3

Business Analytics Track

Data Management & Programming

Course	Title/Desc	Credit
BANA4143	Data Management for Analytics	3

Data Analysis

Complete one

Course	Title/Desc	Credit
BANA4080	Data Mining and Analysis	3
BANA4085	Spreadsheet Analytics	3
BANA4090	Forecasting and Risk Analysis	3
BANA4095	Decision Models	3
BANA4137	Descriptive Analytics and Data Visualization	3

Capstone Project

Note: If student completed a health-related data analysis project in their Data Management/Programming or Data Analysis course, students may be eligible to waive this course. Students should speak with an advisor for more information and seek approval from the program director.

Course	Title/Desc	Credit
MEDS3015	Independent Study in Medical Sciences	3

Electives

Complete 3 credits of elective through the course below or any course listed in the above categories not already used as part of the certificate.

Course	Title/Desc	Credit
OM4089	Healthcare Management & Operations	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Integrative Health and Wellness

Duration: 1 Year Total Credits: 18 - 19 Award: Minor

Overview

The Undergraduate Integrative Health and Wellness Minor developed by the UC Center for Integrative Health and Wellness (CIHW) will enable students to become more active in their own healthcare and that of their community to focus more on overall wellness and less so on disease or sick care. We aim to provide students with a broad-based exposure to healthy behaviors and evidence-based complementary approaches. This minor will help interdisciplinary students across a wide spectrum of fields to become collaborative and transformative practitioners, educators and/or patients that focus on the use of integrative and complementary health approaches to achieve optimal health.

Success

The Integrative Health minor consists of 18 hours and will prove to be attractive to many different majors as it provides them with a basic understanding of the different aspects and modalities in this field of study and how this can relate and benefit your everyday life.

Career

Students who choose to complete an integrative health minor increase their awareness of emerging issues in integrative and complementary health. They will become aware of how integrative health care brings conventional and complementary approaches together in a coordinated way focusing on a patient-focused approach to health care and wellness which often including mental, emotional, functional, spiritual, social, and community aspects. In other words, treating the whole person rather than, for example, one organ system.

Medical Sciences

Duration: **2 Years** Total Credits: **18** Award: **Minor**

Overview

Medical Sciences comprises biological sciences, applied sciences & engineering, informatics and technology, with an emphasis on human health and disease. Medical Sciences provide the scientific basis for modern medicine practices. The Medical Sciences Program is an interdisciplinary program with teaching faculty from the Colleges of Medicine (both basic science and clinical faculty), Allied Health Sciences, Arts & Sciences, and Engineering & Applied Science. The Minor in Medical Sciences complements majors such as Biological Sciences, Biomedical Engineering, Business, Chemistry, Health Sciences, and Neuroscience. The Minor in Medical Sciences prepares students to be competitive for admission to professional schools (including medicine, dentistry, and pharmacy), graduate school doctoral and master's programs in the life sciences, and post-baccalaureate health professions programs (including occupational, physical, and speech & language therapy, and genetic counseling).

Success

If your objective is a career in medicine, UC's Pre-Professional Advising Center should be your first stop in preparing for medical school. In addition, the Association of American Medical Colleges (AAMC) provides information for prospective medical students at its website:

- UC's Pre-Professional Advising Center
- Aspiring Docs—a resource provided by the AAMC

Additional Online Resources:

- The Student Doctor Network
- Medical School HQ

UC Pre-Medical Programs:

- Pre-Medical School Programs—UC offers a range of programs to enrich the experience of undergraduate students whose goal is medical school, including summer programs and MCAT review
- Master's in Physiology Program—UC's gap-year or special master's program designed to help students improve their credentials for admission to medical school

Career

Find out more about a career in biomedical research at the AAMC website.

UC Biomedical Research Programs:

- Summer Research Programs at UC College of Medicine
- PhD Programs in Biomedical Sciences at UC College of Medicine
- Medical Scientist Training Program (MSTP)—the combined MD/PhD training program run jointly by UC College of Medicine and Cincinnati Children's Hospital Medical Center

Exploring Other Health Professions

Find everything you want to know about a wide variety of health careers at ExploreHealthCareers.org

UC Master's Programs in Health Sciences/Health Professions:

- Genetic Counseling
- Pharmacology
- Public Health

Minoring

A total of 18 semester credits are needed to satisfy the requirements of the minor.

The Medical Sciences minor is a selective program based at the University of Cincinnati College of Medicine and Cincinnati Children's Hospital Medical Center, and is taught by the faculty at these institutions. It is intended to provide students who major in any discipline outside the College of Medicine with a broad but rigorous foundation in both the scientific and clinical aspects of medicine and medical research.

The curriculum for the minor includes challenging courses to engage students interested in the health professions and biomedical sciences. Progress toward the minor is tracked via degree audits and successful completion of the minor is documented on your UC transcript. Several of our graduates have gone on to top medical schools across the nation.

Maddy Kramer, MA
Academic Advisor
kramermd@ucmail.uc.edu
513-558-9897

Admission Requirements

To declare the Minor in Medical Sciences in the College of Medicine, students are required to complete the online form.

At the time of application submission, students must:

- have a cumulative GPA of 3.5 or above; AND
- have at least one (1) semester of Organic Chemistry with lab (CHEM 2040, CHEM 2040L) completed

Questions may be directed to anna.stryker@uc.edu or (513) 558-9619.

Transferring To UC

Consult the Undergraduate Admissions webpage for information on transfer admission.

Graduation Requirements

The Medical Sciences minor requires a total of eighteen (18) credits. At least fifteen (15) of those credits must be approved College of Medicine courses. The remaining credits may be approved College of Medicine courses or approved non-College of Medicine science courses. Students must receive a grade of "C" or better in all minor courses. Here is the curriculum showing the course list.

Application Deadlines

Applications for admission to the Minor in Medical Sciences Program are open throughout the academic year. Applications must be submitted by using the online declaration form.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Medical Sciences

Minor

Medical Sciences Minor

Duration: 2 Years

★Minimum Credits: 18 Credits

Approved CoM Courses

Minimum of 15 hours from this list. Remainder of 18 total hours can come either from this list, or from Approved non-CoM courses. A maximum of 6 credit hours can be MEDS3030, MEDS3050, and/or MEDS4042L.

Medical Sciences

Course	Title/Desc	Credit
MEDS2040	Life in Medicine	3
MEDS2087	Fundamentals of Integrative Health and Medicine	3
MEDS2088	Science and Practice of Mind-Body Medicine	3
MEDS2089	Mental Well-being and Self-Care	3
MEDS3015	Independent Study in Medical Sciences	1 - 3
MEDS3020	Introduction to Medical Biochemistry	3
MEDS3021	Fundamentals of Molecular Genetics	3
MEDS3022	Human Medical Genetics	3
MEDS3023C	Statistics and Experimental Design for the Biomedical Sciences	3
MEDS3024C	Medical Microbiology	3
MEDS3026	Medical Physiology	4
MEDS3027C	Medical Histology	3
MEDS3030	Biomedical Research Rotation	2 - 6
MEDS3040	Becoming a Master Physician	3
MEDS3050	Health & Community: Service-Learning Rotation	2 - 6
MEDS3052C	Informatics for the 21st Century Medical Professional	3
MEDS3060	Interprofessional Education in Health Sciences and Medicine	1
MEDS3070	Mindfulness Based Stress Reduction and Mindful Self Compassion	3
MEDS3080	Introduction to Cancer Biology	2
MEDS3090	Medical Imaging: Science and Application	3
MEDS4021	Clinical Embryology	3
MEDS4023	Immunology	2
MEDS4024	Mechanisms of Signal Transduction	2

Approved Non-CoM Courses

Up to 3 hours from Approved Non-CoM courses. Remainder of 18 hours comes from the CoM Approved Courses.

Biological Sciences

Course	Title/Desc	Credit
BIOL3020C	Human/Comparative Anatomy	4
BIOL3021	Human/Comparative Physiology	3
BIOL3030	Human Genetics	3
BIOL3052	Medical Botany	3
BIOL3077	DNA Forensics	3
BIOL4011	Microbiology	3
BIOL4011L	Microbiology Laboratory	2
BIOL4020C	Invertebrate Zoology	4
BIOL4022C	Vertebrate Zoology	4
BIOL4040	Neurobiology	3
BIOL4043	Medical Parasitology	3
BIOL4061	Molecular Genetics of Eukaryotes	3
BIOL4091C	Biotechnology Laboratory Methods	4
BIOL5102C	Bioinformatics	4
BIOL5104	Behavioral Genetics	3
BIOL5177	Evolution: The Secret of Life	3
BIOL5180	Immunology	3
BIOL5193C	Human Physiology & Biomechanics	4

Biomedical Engineering

Course	Title/Desc	Credit
BME2000	Introduction to Biomedical Engineering in the Clinical Environment	3
BME2000C	Biomedical Engineering in the Clinical Environment	4
BME4010C	Research Design II	3
BME4021C	Tissue Biomechanics	4
BME4050C	Medical Device Design II	3
BME4051C	Biomaterials In Medical Devices	3
BME4060	Mathematical Models of Physiology	3
BME4061	Biostatistics in Research	3
BME6010	Biomedical Ultrasound	3
BME6011	Magnetic Resonance Imaging and Spectroscopy	3

Approved Non-CoM Courses

Up to 3 hours from Approved Non-CoM courses. Remainder of 18 hours comes from the CoM Approved Courses.

Chemistry

Course	Title/Desc	Credit
CHEM3040	Introduction to Biochemistry	3
CHEM4040	Intermediate Biochemistry: Synthesizing the Molecules of Life	3
CHEM4041	Intermediate Biochemistry: Transducing and StoringEnergy in Biological Systems	3

Health Sciences

Course	Title/Desc	Credit
BME6012	Biomedical Signal and Image Processing	3
BME6024	Joint Biomechanics and Measurement Methods	3
BME6030	Functional Tissue Engineering	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Public Health

Duration: **2 Years** Total Credits: **18** Award: **Minor**

Overview

Students who choose to complete a public health minor increase their awareness of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system and the monitoring of diseases in the community. Students from a wide variety of majors will find a Public Health minor attractive as it provides them with a basic understanding of each of the core areas of public health, introduces students to career opportunities and prepares students for admission to graduate programs in public health and other health-related programs. Students are able to select from a diverse offering of electives, both online and in the classroom, across multiple colleges as a part of the minor. The degree can be completed online, in-person or a combination of both.

Current baccalaureate majors can request to declare the minor by clicking here.

Success

The Public Health minor is ideal for students in a baccalaureate degree program in a health-related field, but it may also appeal to students in other colleges who have an interest in public health, such as those in pre-law, urban planning, criminal justice, education, and landscape design. By adding a public health minor, students increase their awareness of emerging issues in public health.

Career

The minor will introduce students to career opportunities and prepare students for admission to graduate programs in public health and other health-related programs.

Public health career opportunities include health educator, health communication specialist, environmental health specialist, infectious disease specialist, diseaster preparedness coordinator and health services adminstrator.

Minoring

The minor is a collaborative effort spanning seven colleges. The College of Medicine will certify completion of the minor to award the program upon graduation. Students can complete coursework across the following partner colleges: College of Allied Health Sciences, College of Arts and Sciences, College of Design, Architecture, Art and Planning, College of Education, Criminal Justice, and Human Services, College of Nursing, College of Medicine, and College of Pharmacy. The University of Cincinnati regional campuses, UC Blue Ash and UC Clermont, are also a part of this collaboration.

Curriculum

A total of 18 credit hours is required. Students will complete three required core courses, which are essential to studies in public health, including Introduction to the field of Public Health, Introduction to Biostatistics, and Epidemiology courses. Students are able to select from a diverse offering of electives, both online and in the classroom, across multiple colleges to complete the minor. This will allow majors in online programs to pursue the minor, if interested. The interdisciplinary curriculum was intentionally designed to span multiple colleges and offer students the ability to tailor their minor electives to complement their major area of focus. Students will complete three elective courses. For more information about core courses and elective, see the *Major Map.*

Public Health

Minor

Public Health Minor

Duration: 2 Years

★Minimum Credits: 18 Credits

Required Coursework

Students are required to complete one course from each of the following three groups:

Introduction to Public Health

Course	Title/Desc	Credit
HPE1002	Introduction to Public/Community Health	3

Biostatistics

Students are required to complete one of the following courses:

Course	Title/Desc	Credit
NBSN2182	Introduction to Statistics for Health Professions	3
STAT1031	Introduction to Statistics	3
STAT1034	Elementary Statistics I	3

Epidemiology

Students are required to complete one of the following courses:

Course	Title/Desc	Credit
HPE1004	Introduction to Epidemiology	3
PH3030	Epidemiological Concepts in Public Health	3

Elective Coursework

Students are required to complete 9 additional hours of electives. Any 3 courses may be taken. Electives are grouped into categories to support student interest and career goals, but any combination of courses can be taken.

Behavioral & Mental Health Promotion

Courses that examine individual and community behaviors, mental health, and strategies for improving well-being.

Course	Title/Desc	Credit
MEDS2087	Fundamentals of Integrative Health and Medicine	3
MEDS2088	Science and Practice of Mind-Body Medicine	3
PSYC2010	Human Sexuality	3
PSYC3011	Health Psychology	3
PSYC3057	Community Involvement	3
SOC2073	Drugs and Society	3
WGS2010	Human Sexuality	3

Global & Environmental Health

Courses focused on worldwide health issues, environmental factors, and the impact of place and geography on health.

Course	Title/Desc	Credit
GEOG1007	Places, plagues and people: How epidemics shaped our world	3
MLSC2020	Medical Laboratory Science Environmental Issues	3
NBSN3090	Global Health	3
PH2024	Global Health Dynamics	3
PH2050	Determinants of Global Health	3
PH3066	Climate, Pandemics, Population, & Ecology of Human Health	3
PH4054	Global Health Study Abroad Experience	3

Elective Coursework

Current Issues in Public Health

Courses that focus on timely or specialized public health issues and evolving areas of concern.

Course	Title/Desc	Credit
CSD3033	Exposed: The Impact of The Opioid Epidemic On America's Children	3
HPE2006	Emerging Health Issues	3
MEDS4051	Introduction to the HIV/AIDS epidemic	1
MEDS4056	Vaccines and Public Health	2

Health Promotion & Education

Learn how to design, deliver, and evaluate programs that promote health and prevent disease across diverse populations.

Course	Title/Desc	Credit
COMM2004	Communicating About Health, Environment and Science	3
HPE1020	Principles and Foundations of Health Promotion and Education	3
HPE3001	Health Across the Lifespan I: Adolescent and Child	3
HPE3002	Health Across the Lifespan II: Adult and Aging	3
HPE3082	Health Education Methods & Materials	3
HPE4010	Risk Reduction & Disease Prevention in Public Health Education	3
MEDS2093	Food Literacy in Health and Wellness	3

Elective Coursework

Health Administration & Policy

Examine how healthcare systems are structured, managed, and influenced by policy, ethics, and leadership.

Course	Title/Desc	Credit
ALH4021	Healthcare Delivery Systems	3

Elective Coursework

Social & Structural Determinants of Health

Courses that explore how societal systems, structures, culture, identity, and policy impact health outcomes.

Course	Title/Desc	Credit

Elective Coursework

Urban Health & the Built Environment

Explore how urban planning, design, and community infrastructure influence health, equity, and access in cities and communitites.

Course	Title/Desc	Credit
DAAP1011	Design, Art and the Built Environment	3

Course	Title/Desc	Credit
HCA3031	Introduction to Health Care Economics	3
HCA3032	Introduction to Healthcare Law and Ethics	3
HCA	4022 Quality Improvement in Healthcare	3
HCA4023	Principles of Leadership for Health Professions Students	3
HIM3012C	Health Information Systems	5
HIM4016	Financial Management in Healthcare	5
MEDS4135	Biomedical Ethics I - Fall	1
MEDS4136	Biomedical Ethics II - Spring	1

Course	Title/Desc	Credit
AFST3052	Community Health and Minorities: Yeserday, Today, and Tomorrow	3
HPE2002	Culture, Equity, and Health	3
MEDS3051	Underserved and Global Public Health	3
NBSN3087	Health Issues of Vulnerable and Marginalized Populations	3
NBSN4081	Focus on Community	3
NUTR1040	Food and Culture	3
SOC2044	Health, Medicine, and Society	3
SW2050	Families in America	3
SW2055	Poverty in America	3

Course	Title/Desc	Credit
DAAP2013	A Non-Designer's Guide to Graphic Design	3
DAAP2016	Design Thinking for Non DAAP Majors	3
DAAP3000	Applied Trend Research and Analysis	3
PLAN2054	Introduction to Geographic Information Systems	3
PLAN5160	Healthy Urban Planning	3
PLAN5179	Social Justice and the City	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biomedical Informatics

Duration: **2.5 Years** Total Credits: **19** Award: **Graduate Certificate**

Overview

Biomedical Informatics (BMI) is an interdisciplinary field that combines knowledge of information sciences and medical sciences to optimize the use and application of biomedical data across the spectrum - from molecules to individuals to populations.

BMI encompasses computational and analytical methods that advance biomedical research, as well as the implementation and management of information technology used to improve the practice of healthcare. The field spans and draws upon a number of related disciplines, including bioinformatics, genomics, systems biology, biostatistics, big data, and healthcare analytics.

The BMI Graduate Certificate is a joint program between the UC College of Medicine and UC College of Engineering & Applied Science, in partnership with Cincinnati Children's Hospital Medical Center. It trains students from both quantitative and biomedical backgrounds to develop and apply computational methods addressing current problems in biomedicine, as well as to design and implement clinical informatics systems. The program also enables the training of clinicians and health professionals who are interested in the integration of the electronic health record (EHR) and related systems with clinical practice and research.

Success

Successful applicants typically have a strong quantitative and/or computational background and a keen interest in biomedical informatics or a related discipline. Those with a major of study in areas such as biology, mathematics, computer science, bioengineering, chemistry, or statistics are well positioned to enter the program.

Career

Curriculum

UC Advantages And Special Opportunities

The graduate program in Biomedical Informatics (BMI) is centered in the Cincinnati Children's Hospital Medical Center (CCHMC), a world-class leader in pediatric healthcare, with a reputation for excellence in patient care, research, and medical education. CCHMC is ranked in the top three of the best children's hospitals in the U.S. and among the top pediatric medical centers nationwide receiving research grants from the National Institutes of Health (NIH).

Admission Requirements

- **Completed Baccalaureate Degree or higher** *(from accredited institution)*
  - Preferred 3.0 GPA or higher
- **English Proficiency Requirement** ***(international applicants only)***
  - TOEFL or IELTS

The application requires students to submit official transcripts from all previous institutions attended (unless already on file with the University of Cincinnati), as well as two letters of recommendation.

Application Deadlines

Applications are accepted for a Fall Semester, Spring Semester, or Summer Semester begin term.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Clinical and Translational Research

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Clinical and Translational Research Training program is intended to be an introduction to the field of Clinical and Translational Research.

The certificate is open to those who work in a healthcare industry and hold at least a bachelor's degree. It will provide trainees with the fundamentals of epidemiology, biostatistics, research ethics, and more. This graduate certificate is typically earned within one year, but it can be completed entirely online during a 6-week summer session.

Career

The Clinical and Translational Research Training program is designed to train the clinical research workforce of the future, preparing graduates for careers in academic health centers, private clinical research organizations, research non-profits, or government agencies.

Non-Thesis Research Elective Hours

Students have the option of completing a maximum of 2 non-thesis research hours to fulfill the certificate's elective credit hours.

Course	Title/Desc	Credit
ENV8091	Research	1 - 2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Community-Engaged Research for Health

Duration: **0.5 Year** Total Credits: **12 - 15** Award: **Graduate Certificate**

Overview

As community engagement initiatives within academic centers continue to mobilize, the need for well-trained community-engaged researchers is vital to the success of an institution's community engagement initiatives. This Certificate will be geared towards graduate students, faculty members, and academic or community researchers who are interested in integrating community engagement into their research design. Graduates from the Certificate will obtain the skills and resources needed in order to conduct community-engaged research.

Career

CEnR for Health is a unique subset of clinical and translational research that has its own framework of guiding principles, ethics, and methods. Completion of this Certificate will enhance the skills of principal investigators, clinical research staff, and graduate students, making them more marketable to employers, and more prepared to ethically and effectively design, implement, and participate in CEnR for Health. Given the rising value and importance of CEnR, this Certificate will give researchers an advantage when applying for jobs at the UC Academic Health Center as well as Clinical Research Organizations (CROs) or when transitioning between roles.

Curriculum

Curriculum Guide Versions:
Graduate Certificate in Community-Engaged Research for Health

Admission Requirements

Students applying to the Graduate Certificate in Community-Engaged Research for Health must meet the minimum Graduate School requirements for post-baccalaureate status. Applicants must have a bachelor's degree from a U.S.-accredited college or university or an equivalent degree from another country, a minimum grade-point average of 3.00 or foreign equivalent, a personal statement and statement of career goals, and at least one letter of recommendation.

International applicants from non-English speaking countries must demonstrate proficiency in English in one of two ways: having completed the USMLE or providing official scores from one of several standardized language tests (IELTS score of 6.5, TOEFL score of 96ibt).

Eligible applicants will be reviewed by the Admissions Committee.

Health and Wellness Coaching

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Osher Center for Integrative Health at the University of Cincinnati (OCIH) strives to improve the health of our local and global community through innovative, internationally-recognized research, education, clinical practice, and community engagement focused on advancing integrative health and wellness.

The growing field of Health Coaching emphasizes preventive care and lifestyle modifications, which has been shown to reduce the incidence of chronic diseases and improve overall public health. Health Coaches also engage the patient, so they feel more impowered to take an active role in managing their care, thus leading to better adherence to their personal healthcare plan. Incorporating health coaching into healthcare settings can also enhance the overall quality of care, promote patient-centered approaches, and contribute to better health outcomes while supporting the well-being of healthcare professionals.

Throughout this program, students will gain valuable leadership skills to take to their organizations and learn to integrate health coaching principles to address personal health needs for individuals. They will employ concepts in innovation such as design thinking to deliver creative solutions for improving cultures of wellbeing and mitigating health disparities. Students will also learn an interdisciplinary understanding as our program will cover diverse aspects of health, including nutrition, exercise, and mental health, fostering a holistic approach to wellness. After completing the certificate students will be eligible to sit for the National Board-Certified Health and Wellness Coach (NBC-HWC) credential.

Career

Students will be prepared to work in a number of different settings such as universities, for-profit and non-profit organizations, corporate wellness organizations, hospitals and clinics, insurance companies, fitness centers, and more.

Curriculum

The Graduate Certificate in Health Coaching will provide a comprehensive foundation, advanced skills, and a higher level of professionalism for the health care professional, ultimately benefiting both health coaches and their clients. This program will enhance the overall quality of care, promote patient-centered approaches, and contribute to better health outcomes while supporting the well-being of healthcare professionals.

Integrative Health

Duration: **0.5 Year** Total Credits: **15** Award: **Graduate Certificate**

Overview

The Graduate Certificate in Integrative Health will provide an innovative and interdisciplinary graduate program enabling students to acquire advanced knowledge and skills to enhance their professional careers, their own lives as well as the lives of their patients.

Career

The CIHW's innovative, interdisciplinary graduate program enables students to acquire advanced knowledge and skills to enhance their professional careers, their own lives as well as the lives of their patients. This field aims to get to the root cause of the disease to fix the problem rather than simply putting a band aid on the problem/symptom. Our courses help enrich our students personal and professional lives, and to prepare them for future roles that demand new and innovative ways of thinking.

Curriculum

There are three required courses for this certificate and two additional elective courses. The three required core courses are:

Course Number	Course Title	
Graduate Certificate Core Courses - 9 credit hours *(grade of B- or above required)*

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Telehealth

Online

Duration: 1 Year Award: Graduate Certificate

Overview

The 21st Century healthcare provider will utilize a wide variety of tools in managing their patient's health. In addition, the patient will also utilize these tools. These tools will integrate telecommunications, information systems, and personal computing, and perhaps have comprehensive decision support systems and even artificial intelligence.

Telemedicine, telehealth, e-Health, and mobile health (m-Health) are all areas that are rapidly growing and becoming highly effective tools in healthcare. These terms continue to evolve as technology continues to become available (e.g. mobile phones and associated health-related apps). All health professional graduates and health care workers in the field should have a basic understanding of what telemedicine, telehealth and connected health is and how it can improve clinical practice.

The Telehealth Medicine Graduate Certificate program is designed to teach and reinforce concepts of telehealth to a wide variety of individuals, including physicians, residents, nurses, allied health professionals, information technology specialists, and administrators. This certificate program will provide a solid foundation for those engaged in training, and prepare them for new challenges facing healthcare.

Bachelor of Science in Nursing

Duration: **4 Years** Total Credits: **121** Award: **BSN**

Overview

Our direct-admission Bachelor of Science in Nursing leverages technology and innovation, embraces equity and inclusion, promotes interprofessional collaboration, and enables experiential learning, so that when students graduate, they're ready to lead.

As part of the UC Academic Health Center (medical campus), our clinical partners include a Level I trauma center, Level III obstetric unit, the nation's top pediatric hospital, and multiple outpatient surgery centers and community hospitals.

High school students apply for direct admission to the bachelor's program. Transition and transfer students apply to join the program as a sophomore.

Traditional Undergraduate BSN - Graduating Class of 2022 Forward

Special Programs

Every undergraduate student puts his or her classroom knowledge to the test in our simulation laboratory and in clinical settings. We also offer co-op and international programs that take experiential learning to the next level.

Undergraduate Co-Op

The undergraduate co-op program offers students additional personal and professional growth opportunities through one-on-one mentoring from experienced preceptors in various clinical settings. Students gain valuable, hands-on experience and further develop interpersonal and professional skills. New graduates enter the workforce even more prepared to function independently in clinical settings, delegate appropriately and supervise unlicensed assistive personnel.

Additional benefits:

- Ability to explore career options
- Experience at higher levels of responsibility
- Opportunity to establish professional contacts

The co-op program does not extend the traditional four-year degree timeline. Students apply in January of their third year and serve in the program from June through graduation.

Dedicated Education Units

Dedicated Education Units (DEU) at Cincinnati Children's Hospital Medical Center and Cincinnati VA Medical Center offer students enhanced clinical experiences by pairing them with experienced staff nurses who volunteer as instructors throughout clinical courses. This close collaboration between the college and partnering clinical organizations provides students with clinical experiences that more closely model how nurses practice in the real world.

International Clinicals/International Experiential Learning Opportunities

The college offers students opportunities to study abroad in various locations. Designed to develop responsible citizens of the world, participants earn course credits while enhancing their cultural competency and challenging their understanding of global health issues and disparities.

In recent years, students have traveled to destinations in Tanzania, Thailand, the United Kingdom and Japan. Partial scholarships for participants are available through UC International.
