Graduate College 3221-3222
College of Law 3223-3229
Lindner College of Business 3230-3576
College of Medicine 3577-3760
College of Nursing 3761-3838
College of Cooperative Education & Professional Studies 3839-3854
Blue Ash College 3855-4154
Clermont College 4155-4667
Blue Ash + Clermont Colleges 4668-4687
James L. Winkle College of Pharmacy 4688-4760

Advanced Medical Imaging Technology

Duration: **4 Years** Total Credits: **142** Award: **BS**

Overview

The University of Cincinnati Advanced Medical Imaging Technology major is a unique, innovative program that offers you the opportunity to become credentialed in two diagnostic medical imaging modalities, while obtaining a bachelor's degree.

Traditionally, programs specialize in a single diagnostic medical imaging modality and most programs are housed within a certificate or associate degree programs that are 12-24 months in length. The Advanced Medical Imaging Technology program curriculum ensures you are educated in multiple diagnostic medical imaging modalities giving you credentials in both magnetic resonance imaging (MRI) and nuclear medicine technology.

Magnetic Resonance Imaging (MRI)

Magnetic resonance imaging (MRI) is a technique that uses strong magnetic fields and radio waves to generate detailed images of the body.

Nuclear Medicine Technology

Nuclear medicine technology is a type of imaging that uses small amounts of radioactive substances to help creates a precise picture of the part of the body being imaged.

Both imaging techniques help diagnosis and detect disease and analyze human anatomy.

Board Examination Eligibility

After completing the Baccalaureate program, you will meet national board eligibility requirements for the American registry of Radiologic Technologists (ARRT) in both MRI and nuclear medicine technology as well as the Nuclear Medicine Technology Certification Board (NMTCB) nuclear medicine exam. UC student pass rate of nationally administered board examinations dramatically exceeds national averages for both modalities.

The clinical or professional portion of the curriculum will allow you to have individualized placements at some of the best medical and imaging facilities in the region. You will also gain research skills that will distinguish you from other credentialed students from associate or certificate programs.

Graduates are in a better position to advance within the profession, accepting positions of greater responsibility, and are prepared for continuing their education with a graduate or professional degree.

Program Handbook

You can find additional program information, such as policies, requirements, and more, in the program handbook.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Advanced Medical Imaging Technology program graduates generally employed as magnetic resonance imaging technologist and nuclear medicine technologist and are employed in hospitals, medical centers, outpatient clinics, and research facilities. Advancement in this field may involve promotion to supervisory and administrative positions, equipment and pharmaceutical sales, product support, and teaching.

Your Bachelor of Science in Advanced Medical Imaging Technology may also be used as a point of entry to graduate or medical school, should students seek to further their education.

Advising

Advisors will be there to help you at every step of your academic journey. If you have advising related questions, please visit the College of Allied Health Sciences' Academic Advising.

Special Programs

Distance Learning for AMIT Bachelor's Degree & Certificate Students

The AMIT program is fully accredited by federal, state and the Nuclear Medicine Technology JRCNMT accreditation for distance learning (DL) education. Program specific accreditation for Magnetic Resonance Imaging (MRI) is currently pending accreditation via the JRCERT accreditation. DL is granted for students on a case-by-case basis. It is generally reserved for students who attend clinicals greater than 60 miles from the University of Cincinnati main campus. Students may request DL privileges due to DL preference, accident or illness. Use in this scenario is at the discretion of the appropriate program director and clinical coordinator.

We are limited to DL regions within approximately 90-minute drive of the UC main campus per state authorization. Currently our distance learning opportunities include:

- Columbus, Ohio (limited placement)
- Lexington, Kentucky
- Louisville, Kentucky

Please contact the AMIT Program directly if you are interested in these opportunities: AdvMedImaging@ucmail.uc.edu

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements.

Clinical Admissions

Admission to the Advanced Medical Imaging Technology (AMIT) Program at the College of Allied Health Sciences, whether as a first-year, transfer, or transition student, **does not ensure automatic progression** into the third- and fourth-year professional curriculum, which includes clinical rotations. Progression requires students to successfully navigate a distinct, **selective, and highly competitive** admission process, initiated each Fall semester, typically a year before the professional curriculum begins.

This process evaluates several factors, including academic qualifications, relevant experience, and performance in a group project. While a minimum overall GPA of 3.0 and a Math and Science GPA of 3.0 are **required**, these metrics alone do not guarantee admission. The availability of spots each year is contingent upon clinical site capacity.

For comprehensive information on requirements, timelines, and application procedures, please visit: UC AMIT Secondary Admissions.

Transferring To UC

Students who have earned a high school diploma or GED and have attended a college or university other than the University of Cincinnati since earning their high school credentials are considered transfer students. Please visit UC Admissions for information about applying to the university as a Transfer Student.

Changing Majors Within UC

If you are currently enrolled in an undergraduate program at the University of Cincinnati (including UC Blue Ash and UC Clermont), but want to change your major to one in the College of Allied Health Sciences, please visit Transition Admissions for more information.

Application Deadlines

First-year application deadlines can be found at Admissions Deadlines.

For information about the Advanced Medical Imaging Technology professional curriculum deadlines, please visit Secondary Admissions.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

MRI Accreditation

The magnetic resonance program is accredited by the:

Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive
Suite 2850
Chicago, IL
60606-3182
Phone: 312-704-5300
Email: mail@jrcert.org

The program's current award is 5 years. General program accreditation information and the current accreditation award letter can be found here: https://www.jrcert.org/programs/university-of-cincinnati/

The Joint Review Committee on Education Radiologic Technology (JRCERT) monitors performance measures of programs and makes this information available to the public. Successful completion of a JRCERT-accredited program assures you that you will be provided with the knowledge, skills, and professional values required for career success.

Nuclear Medicine Accreditation

The Nuclear Medicine Technology Program is accredited in accordance with the standards as set forth by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT), 820 W. Danforth Road, #B1, Edmond, Oklahoma 73003. Program graduates will be eligible to apply for an examination administered either by the Nuclear Medicine Technology Certification Board (NMTCB) or the American Registry of Radiologic Technology (ARRT) and subsequently may be licensed by various state agencies.

The Advanced Medical Imaging Technology Nuclear Medicine Technology program is currently accredited by the JRCNMT. The most recent program accreditation renewal was in 2019, the program was awarded a 7 year accreditation award and is due for review again in 2026.

Advanced Medical Imaging Technology

BS

Advanced Medical Imaging Technology (BS) - Fall 2025

Duration: 4 Years

★Minimum Credits: 142 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
CHEM1030	General Organic and Biological Chemistry I (C- min)	3
CHEM1030L	General, Organic and Biochemistry Laboratory I (C- min)	1
COMM1071	Introduction to Effective Speaking (C- min)	3
HLTH1001	Success in Allied Health I (C- min)	1
MATH1021	College Algebra (C- min)	3
PSYC1001	Introduction to Psychology (C- min)	3

Spring Semester Year 1

Course	Title/Desc	Credit
AMIT2021	Survey of Medical Imaging (C- min)	2
CHEM1031	General, Organic, and Biochemistry II (C- min)	3
CHEM1031L	General, Organic, and Biochemistry Laboratory II (C- min)	1
ENGL1001	English Composition (C- min)	3
HLSC2012	Medical Terminology (C- min)	2
MATH1022	Trigonometry (C- min)	3

Secondary Admissions for 3rd and 4th year

Admission to the Advanced Medical Imaging Technology (AMIT) Program at the College of Allied Health Sciences, whether as a first-year, transfer, or transition student, does not ensure automatic progression into the third- and fourth-year professional curriculum, which includes clinical rotations. Progression requires students to successfully navigate a distinct, selective, and highly competitive admission process, initiated each Fall semester, typically a year before the professional curriculum begins. This process evaluates several factors, including academic qualifications, relevant experience, and performance in a group project. While a minimum overall GPA of 3.0 and a Math and Science GPA of 3.0 are required, these metrics alone do not guarantee admission. The availability of spots each year is contingent upon clinical site capacity. Spring Semester Year 4

Course	Title/Desc	Credit
AMIT4005	Diagnostic Magnetic Resonance Imaging II (C- min)	4
AMIT4008	MRI Physics and Instrumentation II (C- min)	3
AMIT4012	Magnetic Resonance Imaging Directed Practice II (C- min)	4
AMIT4091	AMIT Capstone (C- min)	2

Summer Semester Year 4

Course	Title/Desc	Credit
AMIT4006	Diagnostic Magnetic Resonance Imaging III (C- min)	4
AMIT4009	MRI Physics and Instrumentation III (C- min)	3
AMIT4013	Magnetic Resonance Imaging Directed Practice III (C- min)	4
AMIT4092	Medical Imaging Review (C- min)	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Medical Laboratory Science

Online

Duration: 2 Years Total Credits: 131 - 132 Award: BS

Overview

UC's seven-semester, online Bachelor of Science in Medical Laboratory Science program (BS MLS) offers working professional clinical laboratory technicians (CLTs) and medical laboratory technicians (MLTs) the opportunity to complete their bachelor's degree and develop the skills needed for professional growth in a rigorous program with the convenience of online learning — students complete almost all of the course work online with exceptions as follows: occasionally students will need to take proctored exams at a testing center or other location and clinical rotations required at the end of the program are completed on-site in laboratories, usually scheduled where the student works. Students may also apply for life experience credit to reduce or eliminate clinical rotation hours.

Associate degree credits transfer directly to the online BS in medical laboratory science. Graduates are eligible and well prepared for the Board of Certification (BOC) exam sponsored by the American Society for Clinical Pathology (ASCP) for the Medical Laboratory Scientist, MLS (ASCP) credential.

The most recent program outcomes can be found on the Program Outcomes page.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Ranked in the "Top 20 Best Jobs" in the *Jobs Rated Almanac*, MLS/MLTs have expanded career options. Hospitals, reference and research labs, industry and public health facilities all currently have open positions for qualified applicants.

---

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Columbus State Community College
- Cuyahoga Community College (Tri-C)
- Sinclair Community College
- Alamance Community College
- Northcentral Technical College
- Reading Area Community College
- Southwestern Community College

Changing Majors Within UC

Medical Laboratory Science : Online

BS

Guide: Medical Laboratory Science Online (BS) - effective Fall 2023

Duration: 2 Years

★Minimum Credits:

First Semester Courses

All students start the program with the required first semester courses.

First Semester Courses

Students must successfully earn a C- or better in MLSC 3054, MLSC 3063 and MLSC 3052 before being permitted to progress into the didactic courses.

Course	Title/Desc	Credit
MLSC3054	Clinical Fluid Analysis (C- min)	2
MLSC3063	Principles of Molecular and Immunological Studies (C- min)	3
MLSC3052	Special Topics in Medical Laboratory Science (C- min)	2

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Chemistry Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC4053	Advanced Clinical Molecular & Immunological Diagnostics (C- min)	3
MLSC4051	Clinical Chemistry (C- min)	3
MLSC4066	Advanced Clinical Chemistry (C- min)	3

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Hematology Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC3056	Hemostasis (C- min)	1
MLSC4057	Hematology (C- min)	3
MLSC4068	Advanced Hematology (C- min)	4

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Microbiology Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC4059	Special Microbiology (C- min)	3
MLSC4060	Clinical Microbiology (C- min)	3
MLSC4061	Advanced Clinical Microbiology (C- min)	3

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Immunohematology Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC3055	Statistics for Medical Laboratory Practice (C- min)	2
MLSC4062	Principles of Immunohematology (C- min)	3
MLSC4063	Advanced Immunohematology (C- min)	4

Clinical Courses Semester 6

Clinical Courses Semester 6

Clinical Semester Courses

Students must successfully complete all the courses from semesters 1- 5 and be in good academic standing (earned grades of C- or better in all courses and have a cumulative GPA of 2.25 or greater) to be permitted to register for the courses of the clinical semester. Students must submit the required Clinical Practice materials and Health Packet by the published deadline in order to matriculate through the curriculum. Failure to meet any published deadline for these requirements may delay program progression and completion. Students must complete the OSHA Bloodborne Pathogens, OSHA Hazardous Communications, and HIPAA Privacy Introduction annual training sessions in order to matriculate through the curriculum. These courses are offered online at UC at no charge to the student.

Course	Title/Desc	Credit
MLSC3051	Laboratory Operations (C- min)	2
MLSC3963	Advanced Lab Concepts (C- min)	2

Capstone Semester 7

Capstone Semester 7

Capstone Semester Courses

Students must successfully complete all the courses from semesters 1- 6 and be in good academic standing (earned grades of C- or better in all courses and have a cumulative GPA of 2.25 or greater) to be permitted to register for the courses of the final semester. Students must successfully earn a C- or better in all the courses of the final semester and meet requirements to graduate.

Course	Title/Desc	Credit
MLSC4058	Medical Laboratory Science Capstone (C- min)	2
MLSC4071	Advanced Clinical Correlations (C- min)	6

Course	Title/Desc	Credit
MLSC4069	Advanced Clinical Practice (C- min)	1 - 6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Medical Laboratory Science

Pre-Medicine

Duration: **4 Years** Total Credits: **131 - 132** Award: **BS**

Overview

The University of Cincinnati Medical Laboratory Science (MLS) Pre-Medicine is a unique program and track that will allow you to complete the standard program while substituting and adding some additional courses in order to fulfill common pre-med requirements with flexibility to take any specific prerequisite courses needed for targeted graduate programs. For example, the pre-med track replaces Biochemistry with Organic Chemistry and adds Physics. You should work with your academic advisor to determine any specific courses required for the programs you are applying.

After graduation, you will be prepared to enter medical and other professional health care programs while also being prepared to enter the in-demand Medical Laboratory Science profession. Entering medical school or related programs as an MLS gives you the advantage of a professional foundation in diagnostic laboratory testing, which factors heavily in the majority of physicians' decisions regarding patient care.

There are many benefits of entering a Pre-Medicine curriculum within the Medical Laboratory Science program. You will have the opportunity to have health-specific undergraduate education, get to learn and engage with other allied health majors allowing you to have exposure to other health disciplines. Your final clinical year gives you experience in a hospital/medical laboratory.

Graduates of the Pre-Medicine track are still graduating from a NAACLS* accredited Medical Laboratory Science program and will be well-prepared for the Board of Certification (BOC) exam sponsored by the American Society for Clinical Pathology (ASCP) for the Medical Laboratory, MLS (ASCP) credential.

Medical laboratory scientists are allied health professionals who participate in patient care by performing laboratory procedures that assist in the prevention, diagnosis and treatment of diseases. The analysis performed by medical laboratory scientists uses advanced biomedical and instrumentation and technology to perform laboratory testing on blood and body fluids in the area of chemistry, microbiology, hematology, immunology, toxicology, blood banking and molecular procedures.

Career

Graduates are well prepared to enter into graduate and professional health care programs such as medical, dental, physician assistant and those for graduate research. Additional education is needed to become a physician or surgeon.

Physicians and surgeons work with people across the lifespans and generally work in:

- Physicians' offices
- Hospitals
- Academic
- Government

Students graduating from the Medical Laboratory Science – Pre-Medicine track also have the option of pursuing a career as a Medical Laboratory Scientist. Most jobs for medical laboratory scientists require a bachelor's degree and certification. To be eligible to sit for a board of certification exam, most credentialing organizations require completion of a program accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Medical laboratory scientists work both independently and with a team in in a variety of settings, including:

- Hospital laboratories
- Independent laboratories
- Clinics and physicians' offices
- Research and development laboratories
- Public/government health agencies
- Forensics laboratories
- Pharmaceutical companies.

Regardless of the setting, clinical laboratory scientists consistently work in a challenging, fast paced and collegial environment.

Due to the high demand for Medical Laboratory Scientist professionals, graduates of our program have a 100% employment rate upon graduation, and generally are able to choose from several entry-level technologist positions.

Advising

Advisors will be there to help you at every step of your academic journey. If you have advising-related questions, please visit the College of Allied Health Sciences' Academic Advising.

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements.

Admission to the Clinical Year

The clinical year is required to complete the BS-MLS. All prerequisite courses must be completed before starting the clinical year. Admission to the clinical year is competitive and requires separate application. The deadline to apply is October 1 preceding the intended starting fall semester.

Highly qualified candidates may be offered Direct Admission to the clinical cohort concurrent with freshman acceptance to the university. Students not meeting qualification for direct admission can be admitted to their clinical cohort by applying for the clinical year.

For more information, please visit the Clinical Year Application webpage.

Transferring To UC

Students who have earned a high school diploma or GED and have attended a college or university other than the University of Cincinnati since earning their high school credentials are considered transfer students. Please visit UC Admissions for information about applying to the university as a Transfer Student.

Changing Majors Within UC

If you are currently enrolled in an undergraduate program at the University of Cincinnati (including UC Blue Ash and UC Clermont), but want to change your major to one in the College of Allied Health Sciences, please visit Transition Admissions for more information.

Application Deadlines

Application deadlines can be found at Admissions Deadlines.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Medical Laboratory Science

Duration: **4 Years** Total Credits: **131 - 132** Award: **BS**

Overview

The University of Cincinnati Bachelor of Science in Medical Laboratory Science (BS – MLS) program will prepare you for an exciting career as a medical laboratory scientist. Medical laboratory scientists are allied health professionals who participate in patient care by performing laboratory procedures that assist in the prevention, diagnosis and treatment of diseases. The analysis performed by medical laboratory scientists uses advanced biomedical and instrumentation and technology to perform laboratory testing on blood and body fluids in the area of chemistry, microbiology, hematology, immunology, toxicology, blood banking and molecular procedures.

Laboratory scientists perform manual and automated procedures and utilize laboratory information computer systems to analyze and transmit patient data. Additionally, medical laboratory scientists monitor test quality, integrate data, problem solve, conduct research, develop new test methods and consult with other members of the health care team.

The UC Medical Laboratory Science major combines a curriculum common to most undergraduate majors in the medical field with courses specific to the medical laboratory profession. The final year requires clinical rotations at partnering clinical laboratories.

Graduates of the NAACLS* accredited MLS program are well-prepared for the Board of Certification (BOC) exam offered by the American Society for Clinical Pathology (ASCP) for the Medical Laboratory, MLS (ASCP) credential.

The most recent program outcomes can be found on the Program Outcomes page.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Medical laboratory scientists, also known as Clinical Laboratory Scientists, work both independently and with a team in in a variety of settings, including:

- Hospital laboratories
- Independent laboratories
- Clinics and physicians' offices
- Research and development laboratories
- Public/government health agencies
- Forensics laboratories
- Pharmaceutical companies.

Regardless of the setting, clinical laboratory scientists consistently work in a challenging, fast paced and collegial environment.

Most jobs for medical laboratory scientists require a bachelor's degree and certification. To be eligible to sit for a board of certification exam, most credentialing organizations require completion of an MLS program accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). Advanced certification is available in each laboratory area for those who choose to pursue a higher level of training, education and experience. Graduate training in one of the laboratory disciplines will allow individuals to advance to supervisory positions and intermediate level research positions

Due to the high demand for Medical Laboratory Scientist professionals, virtually all of our graduates are employed and generally choose from several entry-level technologist positions.

Advising

Advisors will be there to help you at every step of your academic journey. If you have advising-related questions, please visit the College of Allied Health Sciences' Academic Advising.

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements.

Admission to the Clinical Year

The clinical year is required to complete the BS-MLS. All prerequisite courses must be completed before starting the clinical year. Admission to the clinical year is competitive and requires separate application. The deadline to apply is October 1 preceding the intended starting fall semester.

Highly qualified candidates may be offered Direct Admission to the clinical cohort concurrent with freshman acceptance to the university. Students not meeting qualification for direct admission can be offered admission to their clinical cohort by participating in the annual progression check.

For more information, please visit the Clinical Year Application page.

Transferring To UC

Students who have earned a high school diploma or GED and have attended a college or university other than the University of Cincinnati since earning their high school credentials are considered transfer students. Please visit UC Admissions for information about applying to the university as a Transfer Student.

Changing Majors Within UC

If you are currently enrolled in an undergraduate program at the University of Cincinnati (including UC Blue Ash and UC Clermont), but want to change your major to one in the College of Allied Health Sciences, please visit Transition Admissions for more information.

Application Deadlines

Application deadlines can be found at Admissions Deadlines.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS): 5600 N. River Rd., Suite 720, Rosemont, IL 60018; Phone 773-714-8880; Fax 773-714-8886; info@naacls.org; www.naacls.org.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Medical Laboratory Science

Online

Duration: 2 Years Total Credits: 131 - 132 Award: BS

Overview

UC's seven-semester, online Bachelor of Science in Medical Laboratory Science program (BS MLS) offers working professional clinical laboratory technicians (CLTs) and medical laboratory technicians (MLTs) the opportunity to complete their bachelor's degree and develop the skills needed for professional growth in a rigorous program with the convenience of online learning — students complete almost all of the course work online with exceptions as follows: occasionally students will need to take proctored exams at a testing center or other location and clinical rotations required at the end of the program are completed on-site in laboratories, usually scheduled where the student works. Students may also apply for life experience credit to reduce or eliminate clinical rotation hours.

Associate degree credits transfer directly to the online BS in medical laboratory science. Graduates are eligible and well prepared for the Board of Certification (BOC) exam sponsored by the American Society for Clinical Pathology (ASCP) for the Medical Laboratory Scientist, MLS (ASCP) credential.

The most recent program outcomes can be found on the Program Outcomes page.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Ranked in the "Top 20 Best Jobs" in the *Jobs Rated Almanac*, MLS/MLTs have expanded career options. Hospitals, reference and research labs, industry and public health facilities all currently have open positions for qualified applicants.

Medical Laboratory Science : Online

BS

Guide: Medical Laboratory Science Online (BS) - effective Fall 2023

Duration: 2 Years

★Minimum Credits:

First Semester Courses

All students start the program with the required first semester courses.

First Semester Courses

Students must successfully earn a C- or better in MLSC 3054, MLSC 3063 and MLSC 3052 before being permitted to progress into the didactic courses.

Course	Title/Desc	Credit
MLSC3054	Clinical Fluid Analysis (C- min)	2
MLSC3063	Principles of Molecular and Immunological Studies (C- min)	3
MLSC3052	Special Topics in Medical Laboratory Science (C- min)	2

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Chemistry Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC4053	Advanced Clinical Molecular & Immunological Diagnostics (C- min)	3
MLSC4051	Clinical Chemistry (C- min)	3
MLSC4066	Advanced Clinical Chemistry (C- min)	3

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Hematology Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC3056	Hemostasis (C- min)	1
MLSC4057	Hematology (C- min)	3
MLSC4068	Advanced Hematology (C- min)	4

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Microbiology Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC4059	Special Microbiology (C- min)	3
MLSC4060	Clinical Microbiology (C- min)	3
MLSC4061	Advanced Clinical Microbiology (C- min)	3

Rotating Didactics Semesters 2 - 5

The Rotating Didactic Courses are offered on a rotating basis over four semesters. Students are required to earn a C- or better in all courses in each series.

Immunohematology Series

Students must successfully earn a C- or better in all three courses in this series, which is offered on a rotating basis.

Course	Title/Desc	Credit
MLSC3055	Statistics for Medical Laboratory Practice (C- min)	2
MLSC4062	Principles of Immunohematology (C- min)	3
MLSC4063	Advanced Immunohematology (C- min)	4

Clinical Courses Semester 6

Clinical Courses Semester 6

Clinical Semester Courses

Students must successfully complete all the courses from semesters 1- 5 and be in good academic standing (earned grades of C- or better in all courses and have a cumulative GPA of 2.25 or greater) to be permitted to register for the courses of the clinical semester. Students must submit the required Clinical Practice materials and Health Packet by the published deadline in order to matriculate through the curriculum. Failure to meet any published deadline for these requirements may delay program progression and completion. Students must complete the OSHA Bloodborne Pathogens, OSHA Hazardous Communications, and HIPAA Privacy Introduction annual training sessions in order to matriculate through the curriculum. These courses are offered online at UC at no charge to the student.

Course	Title/Desc	Credit
MLSC3051	Laboratory Operations (C- min)	2
MLSC3963	Advanced Lab Concepts (C- min)	2

Capstone Semester 7

Capstone Semester 7

Capstone Semester Courses

Students must successfully complete all the courses from semesters 1- 6 and be in good academic standing (earned grades of C- or better in all courses and have a cumulative GPA of 2.25 or greater) to be permitted to register for the courses of the final semester. Students must successfully earn a C- or better in all the courses of the final semester and meet requirements to graduate.

Course	Title/Desc	Credit
MLSC4058	Medical Laboratory Science Capstone (C- min)	2
MLSC4071	Advanced Clinical Correlations (C- min)	6

Course	Title/Desc	Credit
MLSC4069	Advanced Clinical Practice (C- min)	1 - 6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Medical Laboratory Science

Pre-Medicine

Duration: 4 Years Total Credits: 131 - 132 Award: BS

Overview

The University of Cincinnati Medical Laboratory Science (MLS) Pre-Medicine is a unique program and track that will allow you to complete the standard program while substituting and adding some additional courses in order to fulfill common pre-med requirements with flexibility to take any specific prerequisite courses needed for targeted graduate programs. For example, the pre-med track replaces Biochemistry with Organic Chemistry and adds Physics. You should work with your academic advisor to determine any specific courses required for the programs you are applying.

After graduation, you will be prepared to enter medical and other professional health care programs while also being prepared to enter the in-demand Medical Laboratory Science profession. Entering medical school or related programs as an MLS gives you the advantage of a professional foundation in diagnostic laboratory testing, which factors heavily in the majority of physicians' decisions regarding patient care.

There are many benefits of entering a Pre-Medicine curriculum within the Medical Laboratory Science program. You will have the opportunity to have health-specific undergraduate education, get to learn and engage with other allied health majors allowing you to have exposure to other health disciplines. Your final clinical year gives you experience in a hospital/medical laboratory.

Graduates of the Pre-Medicine track are still graduating from a NAACLS* accredited Medical Laboratory Science program and will be well-prepared for the Board of Certification (BOC) exam sponsored by the American Society for Clinical Pathology (ASCP) for the Medical Laboratory, MLS (ASCP) credential.

Medical laboratory scientists are allied health professionals who participate in patient care by performing laboratory procedures that assist in the prevention, diagnosis and treatment of diseases. The analysis performed by medical laboratory scientists uses advanced biomedical and instrumentation and technology to perform laboratory testing on blood and body fluids in the area of chemistry, microbiology, hematology, immunology, toxicology, blood banking and molecular procedures.

Career

Graduates are well prepared to enter into graduate and professional health care programs such as medical, dental, physician assistant and those for graduate research. Additional education is needed to become a physician or surgeon.

Physicians and surgeons work with people across the lifespans and generally work in:

- Physicians' offices
- Hospitals
- Academic
- Government

Students graduating from the Medical Laboratory Science – Pre-Medicine track also have the option of pursuing a career as a Medical Laboratory Scientist. Most jobs for medical laboratory scientists require a bachelor's degree and certification. To be eligible to sit for a board of certification exam, most credentialing organizations require completion of a program accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Medical laboratory scientists work both independently and with a team in in a variety of settings, including:

- Hospital laboratories
- Independent laboratories
- Clinics and physicians' offices
- Research and development laboratories
- Public/government health agencies
- Forensics laboratories
- Pharmaceutical companies.

Regardless of the setting, clinical laboratory scientists consistently work in a challenging, fast paced and collegial environment.

Due to the high demand for Medical Laboratory Scientist professionals, graduates of our program have a 100% employment rate upon graduation, and generally are able to choose from several entry-level technologist positions.

Nutrition and Dietetics

Accelerated Diet Nutrition

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This innovative bachelor's plus master's program provides a foundation in nutrition, food science, medical nutrition therapy, health promotion and wellness. Completion of the didactic coursework meets the academic requirements for the Didactic Program in Dietetics (coursework to become a Registered Dietitian Nutritionist or RDN), set forth by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. This program also fulfills the 1000 hours of supervised practice experience and the graduate degree requirement for RDN credentialing exam eligibility.

Requirements to Become a Registered Dietitian Nutritionist

A minimum of a master's degree is required to be eligible to take the credentialing exam to become a registered dietitian nutritionist (RDN). In addition, the Commission on Dietetic Registration (CDR) requires that individuals to complete coursework and supervised practice in program(s) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Graduates who successfully complete the ACEND-accredited program are eligible to take the CDR credentialing exam to become an RDN.

In most states, graduates also must obtain licensure or certification to practice. View more information about state licensure requirements.

View more information about educational pathways to become a RDN.

To accommodate these accreditation requirements, the University of Cincinnati offers a combined program that integrates both the academic coursework and supervised practice components into a seamless (1-step) program. This allows students to obtain all the requirements for RD credentialing including graduating with a bachelor's and masters' in just 5 years vs the traditional pathway that could take a student about 6-7 years to complete. This coordinated program allows students to learn about different aspects of nutrition and dietetics practice in the classroom and then apply it in clinical, community, food service and a variety of other settings.

Students currently enrolled in the Nutrition & Dietetics major can apply to the accelerated program in their sophomore year. The program includes 3 of the 4 steps to prepare you to become a RDN:

1. All undergraduate didactic coursework
2. A minimum of 1000 hours of supervised practice
3. Students will complete the program with a graduate degree
4. Upon completion of the Accelerated Dietitian Nutritionist program, students will be eligible to take the national credentialing exam for the RDN.

In many states, RDNs will need a license or certification to practice. In the state of Ohio, with the RDN credential, a background check and payment of a fee is the requirement for a practitioner to receive his or her license to practice.

Student Handbook

You can view additional details about the program in the Accelerated Dietitian Nutritionist Student Handbook.

Success

Program outcome data is available upon request

Career

Registered Dietitian Nutritionist professionals work in a variety of settings such as hospitals, long-term care facilities, schools, supermarkets, private practice settings, eating disorder centers, with athletes, in academia, research, health departments, business corporations, health clubs, and many other areas.

In order to practice as a RDN, you must complete the DPD courses, obtain a master's degree, complete 1000 hours of a supervised practice internship, and pass the Commission on Dietetic Registration credentialing exam for RDNs. The RDN credential enables an individual to perform nutrition risk assessments and prescribe medical nutrition therapy to treat or prevent diseases such as diabetes, cardiovascular disease, gastrointestinal disease, renal disease, and so forth. Dietitians also work with healthy clients who have specialized dietary needs such as athletes, vegetarians, pregnant women, children who are picky eaters, etc.

Nutrition and Dietetics

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

The University of Cincinnati Nutrition & Dietetics major provides a strong foundation in nutrition, food science, medical nutrition therapy, health promotion, and wellness. This top-ranked program blends science and behavioral studies, preparing you to become an expert in food, nutrition, and disease prevention and management.

As a Nutrition & Dietetics student, you will have the opportunity to explore specialized areas of nutrition, including sports nutrition, community nutrition, and clinical dietetics, through coursework and experiential learning. The program equips you with the knowledge and skills needed to support individuals and communities in achieving optimal health through evidence-based nutrition strategies.

The Nutrition & Dietetics major is your first step toward becoming a Registered Dietitian Nutritionist (RDN). The curriculum meets the academic requirements for the Didactic Program in Dietetics (DPD), accredited by the Accreditation Council for Education in Nutrition & Dietetics (ACEND) of the Academy of Nutrition & Dietetics (AND). After completing your degree, you will be eligible to apply for an accredited dietetic internship. A master's degree in any field is also required before taking the Commission on Dietetic Registration (CDR) credentialing exam to become a RDN. Many states require additional licensure to practice.

Join a top-tier Nutrition & Dietetics program that prepares you for a rewarding career in health care, sports nutrition, public health, food service management, community wellness, clinical dietetics and beyond. Credentialed RDNs can work with a variety of populations and individuals across the lifespan.

Accelerated Dietitian Nutritionist Program at the University of Cincinnati

The Accelerated Dietitian Nutritionist Program (ADN) offers a fast-track pathway to becoming a Registered Dietitian Nutritionist (RDN) and is exclusively available to students in the Nutrition & Dietetics major. This rigorous program allows you to earn both a bachelor's and master's degree in just five years, reducing the time typically required by one to two years.

Students apply to the Accelerated Dietitian Nutritionist Program during their second year of undergraduate studies. The program integrates advanced coursework and a supervised practice internship, ensuring you gain the clinical, community, and food-service experience required to sit for the Commission on Dietetic Registration (CDR) credentialing exam and become a RDN.

By choosing this highly competitive, ACEND-accredited pathway, you can accelerate your career and enter the workforce sooner, fully prepared for roles in health care, sports nutrition, public health, food service management, community wellness, and clinical dietetics.

Career

Nutrition & Dietetics professionals work in a variety of settings:

- Hospitals
- Long-term care facilities
- Schools
- Athletic departments
- Supermarkets
- Private practice settings
- Eating disorder centers
- Academia
- Research
- Health departments
- Business corporations

- Health clubs
- The degree's curriculum also fulfills prerequisite coursework for graduate education in almost any health-related professional program.

Available credentials

Registered Dietitian Nutritionist (RDN) must complete the didactic coursework in dietetics (Bachelor of Science in Nutrition & Dietetics), an accredited post-baccalaureate dietetic internship, master's degree in any field, and pass the Commission on Dietetic Registration credentialing exam for RDNs. This credential enables the RDN to perform nutrition risk assessments and prescribe medical nutrition therapy to remediate or prevent disease. For those who choose to obtain the RDN credential, the average salary is about $72,000 and there are a variety of career options.

Nutrition and Dietetics Technician, Registered (NDTR) must complete the Bachelor of Science in Nutrition & Dietetics and then you can take the Commission on Dietetic Registration credentialing exam for NDTRs. This credential enables a NDTR to work in partnership with the RDN to screen, evaluate and educate patients on topics related to nutrition.

Certified Dietary Manager, Certified Food Protection Professional (CDM) can take the Certifying Board for Dietary Managers credentialing exam after completing the Bachelor of Science in Nutrition & Dietetics. This credential recognizes experts in managing dietary operations.

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements.

Graduation Requirements

To remain in the program, students must:

- Maintain a minimum 3.0 GPA with no less than C- in any DPD course,
- Adhere to policies and procedures, and
- Conduct themselves in a professional manner, adhering to the Student Code of Conduct

To complete the program, students must:

- Complete all didactic course requirements,
- Have a minimum 3.0 GPA in the DPD Program and
- Have no outstanding financial or other program obligations.

Application Deadlines

Application deadlines can be found at Admissions Deadlines.

Nutrition and Dietetics

Accelerated Diet Nutrition

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This innovative bachelor's plus master's program provides a foundation in nutrition, food science, medical nutrition therapy, health promotion and wellness. Completion of the didactic coursework meets the academic requirements for the Didactic Program in Dietetics (coursework to become a Registered Dietitian Nutritionist or RDN), set forth by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. This program also fulfills the 1000 hours of supervised practice experience and the graduate degree requirement for RDN credentialing exam eligibility.

Requirements to Become a Registered Dietitian Nutritionist

A minimum of a master's degree is required to be eligible to take the credentialing exam to become a registered dietitian nutritionist (RDN). In addition, the Commission on Dietetic Registration (CDR) requires that individuals to complete coursework and supervised practice in program(s) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Graduates who successfully complete the ACEND-accredited program are eligible to take the CDR credentialing exam to become an RDN.

In most states, graduates also must obtain licensure or certification to practice. View more information about state licensure requirements.

View more information about educational pathways to become a RDN.

To accommodate these accreditation requirements, the University of Cincinnati offers a combined program that integrates both the academic coursework and supervised practice components into a seamless (1-step) program. This allows students to obtain all the requirements for RD credentialing including graduating with a bachelor's and masters' in just 5 years vs the traditional pathway that could take a student about 6-7 years to complete. This coordinated program allows students to learn about different aspects of nutrition and dietetics practice in the classroom and then apply it in clinical, community, food service and a variety of other settings.

Students currently enrolled in the Nutrition & Dietetics major can apply to the accelerated program in their sophomore year. The program includes 3 of the 4 steps to prepare you to become a RDN:

1. All undergraduate didactic coursework
2. A minimum of 1000 hours of supervised practice
3. Students will complete the program with a graduate degree
4. Upon completion of the Accelerated Dietitian Nutritionist program, students will be eligible to take the national credentialing exam for the RDN.

In many states, RDNs will need a license or certification to practice. In the state of Ohio, with the RDN credential, a background check and payment of a fee is the requirement for a practitioner to receive his or her license to practice.

Respiratory Therapy

Online

Duration: 4 Years Total Credits: 120 Award: BS

Overview

The University of Cincinnati's online ***Bachelor of Science in Respiratory Therapy*** program is designed to improve real-world clinical competence while preparing active respiratory therapy professionals for a lasting future in the healthcare industry. The robust and engaging curriculum challenges students, promoting a deeper understanding of advanced healthcare operations, logistics, technology, leadership, ethics, and project management. Delivered by the industry-experienced faculty in the UC College of Allied Health Sciences, the online program advances respiratory therapy practice and research by focusing on current and future industry standards. The end result is a clinician who can make significant contributions to the field while positively affecting the future of respiratory care for a variety patients. Build on your experience, define your practice, and prepare for the future. Develop the expertise needed for advanced practice and leadership opportunities. Interact and network with an industry experienced faculty and healthcare professionals. Earn a bachelor of science in respiratory therapy in as few as 20 months (5 semesters). Continue working while your learn with flexible, 100 percent online classes.

Success

Program Goals:

The goal of the Bachelor of Science in Respiratory Sciences Program is to provide graduates of entry into respiratory care professional practice degree programs with additional knowledge, skills, and attributes in leadership, management, education, and research that will enable them to meet their current professional goals and prepare them for practice as advanced degree respiratory therapists.

The program course work and experiences emphasize the technical and academic competencies required of a respiratory therapist as well as the ethics and professionalism outlined by The American Association for Respiratory Care.

Career

The respiratory therapy industry is always growing and this degree is becoming as important as ever. Respiratory therapists are needed in intensive care units, emergency transport vehicles, labs, outreach agencies, and more. Learn more about the success and possibilities for respiratory therapists on our careers page.

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements.

Transferring To UC

For application requirements please visit our website.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

Click here for a list of this program's articulation agreements.

International Student Requirements

International transcripts must be evaluated for U.S. equivalency.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Respiratory Therapy, 500015, Bachelor of Science, University of Cincinnati holds Provisional Accreditation from the Commission on Accreditation for Respiratory Care. This status signifies that a program with an Approval of Intent has demonstrated sufficient compliance with the Standards (through submission of an acceptable Provisional Accreditation Self Study Report (PSSR) and any other documentation required by the CoARC, as well as satisfactory completion of an initial on-site visit.

Duration: 4 Years
★Minimum Credits: 120 Credits

Core Courses
Core courses required to be completed prior to taking advanced courses.

Course	Title/Desc	Credit
RSTH3001	Ethics of Respiratory Therapy (C- min)	3
RSTH3002	Health Care Documentation and Communication (C- min)	3
RSTH3004	Community Health Problems and Practices (C- min)	3
RSTH3010	Integration of Delivery of Respiratory Therapy (C- min)	3
RSTH3040	Management in Respiratory Therapy (C- min)	3
RSTH3050	Aging and Respiratory Therapy (C- min)	3
RSTH3065	Caregiving in the Respiratory Therapy Professions (C- min)	3
RSTH3080	Disease Management/Patient Education (C- min)	3
RSTH4060	Introduction to Respiratory Therapy Research (C- min)	4

Advanced Courses
Courses to be taken after core courses are completed.

Course	Title/Desc	Credit
RSTH4001	Research Methods & Analysis (C- min)	5
RSTH4030	Alternative Practices and Current Trends in Respiratory Care (C- min)	4
RSTH4050	Advanced Respiratory Therapy/Leadership & Project Management (C- min)	4
RSTH4070	Respiratory Therapy Specialty I w/ Observation (C- min)	3
RSTH4075	Respiratory Therapy Specialty II (C- min)	3
RSTH5001	Respiratory Therapy Capstone	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Speech-Language Hearing Sciences

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

The University of Cincinnati Bachelor of Science degree in Speech Language Hearing Sciences (SLHS) is designed to prepare students for accredited graduate programs in audiology or speech-language pathology. As a pre-professional program, we are preparing you with foundational knowledge for careers to assist children and adults throughout the lifespan who have difficulty communicating, swallowing and hearing.

The Speech Language Hearing Sciences major focuses on the study of human communication and its disorders. Coursework is completed in the areas of anatomy and neurophysiology, linguistics, speech and hearing science, speech, language, hearing development, and an overview of the clinical process. Biology, physics or chemistry, statistics, and social sciences are additional general education courses taken that meet the American Speech-Language-Hearing Association (ASHA) certification requirements. Clinical observation, interprofessional collaboration, and service-learning experiences are integral parts of the curriculum.

The SLHS curriculum allows students to choose an emphasis in one of the following areas: education/special education, allied health, deaf studies, audiology or you may choose to complete a minor or certificate instead. During the senior year, students engage in a capstone experience focusing on clinical services, a project, or research. There are opportunities during the undergraduate curriculum to get involved in research experiences. Review UC Undergraduate Research Experiences.

Career

A Bachelor of Science in Speech Language Hearing Sciences is a pre-professional degree that prepares students for graduate work in either audiology or speech-language pathology. A master's degree is necessary for professional certification and licensure as a speech-language pathologist, and a clinical doctoral degree is required to be certified as an audiologist.

Students are prepared for a variety of other graduate programs as well, including social service, special education, and health care or health care administration.

Graduates find careers in:

- hospitals
- nursing homes
- speech and hearing clinics
- schools
- educational programs for children with disabilities
- the armed services
- private practices
- universities
- governmental health agencies.

Advising

Advisors will be there to help you at every step of your academic journey. If you have advising related questions, please visit the College of Allied Health Sciences' Academic Advising.

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements.

Transferring To UC

Students who have earned a high school diploma or GED and have attended a college or university other than the University of Cincinnati since earning their high school credentials are considered transfer students. Please visit UC Admissions for information about applying to the university as a Transfer Student.

For more information, visit the Transfer Center within UC Admisisons.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Thomas More University

Changing Majors Within UC

If you are currently enrolled in an undergraduate program at the University of Cincinnati (including UC Blue Ash and UC Clermont), but want to change your major to one in the College of Allied Health Sciences, please visit Transition Admissions for more information.

Application Deadlines

Application deadlines can be found at Admissions Deadlines.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Speech-Language Hearing Sciences

BS

Speech Language & Hearing Sciences (BS) Three Years - effective fall 2025

Duration: 4 Years

★Minimum Credits: 120 Credits

Who would opt for the three year plan in Speech Language and Hearing Sciences?

Students who have earned Advanced Placement (AP) credits, International Baccalaureate (IB) credits, or dual enrollment college credit for courses required in the SLHS degree. Additionally, students who are interested in expediting their degree timeline by taking summer courses might consider the three year plan.

Credits earn by Advanced Placement, International Baccalaureate, or dual enrollment college courses

Students in the three year plan, often, but not always, have credits for the following course by way of Advanced Placement (AP), International Baccalaureate (IB), or dual enrollment college courses.

English, General Education (History and Humanities), Psychology

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
PSYC1001	Introduction to Psychology (C- min)	3
BoK: HP	History Gen. Ed. Elective (HP) (C- min)	3
BoK: HU	Gen. Ed. Elective (HU) Required (C- min)	3

Health Sciences

Online

Duration: **4 Years** Total Credits: **123** Award: **BSHS**

Overview

The University of Cincinnati Online Bachelor of Health Sciences - Pre-Occupational Therapy program provides students with an associate's degree in Occupational Therapy Assisting (OTA) the opportunity to obtain a Bachelor's degree in Health Sciences. The curriculum provides students with the knowledge and skills necessary to pursue a graduate-level occupational therapy degree and opportunities for professional advancement. Designed for full or part-time students, every class is available online, making it possible to receive your BS in Health Sciences in 2 to 4 years. You can earn your degree on your timeline with start dates each semester.

The University of Cincinnati's online programs are accredited by the Higher Learning Commission. Our knowledgeable instructors are experienced in the industry, experts in their field, and dedicated to our student body.

This program also has a dedicated program director, an experienced occupational therapist, who will also teach one of your classes.

Success

If a graduate degree or career advancement is your end goal, a Bachelor of Science in Health Sciences from UC Online can set you apart from the competition. Designed with students wishing to pursue a graduate degree in occupational therapy in mind, our courses satisfy the most common prerequisite requirements and carry with them the University of Cincinnati's reputation.

Occupational therapy graduate program admission requirements differ among institutions, so students should review prerequisite courses relevant to graduate programs of interest and work with their advisors to reach their goals. Due to the competitive nature of admissions to most OT graduate programs, completion of this degree does not guarantee acceptance to an occupational therapy program.

Career

The online Bachelor of Science in Health Sciences is an advanced and accessible next step for working OTAs who want to expand their career opportunities. Whether you're preparing for graduate school, seeking career specialization, want more autonomy, or looking to qualify for new opportunities in the world of healthcare, the University of Cincinnati Bachelor of Science in Health Sciences-Pre-Occupational Therapy can help you reach your goals.

Minoring

Students completing the program can obtain a minor in psychology and are able to get an additional minor in public health by taking six additional credit hours.

Health Sciences

Pre-Athletic Training

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a Pre-Athletic Training track within the Health Sciences major that specifically prepares you for entry into graduate level Athletic Training programs. The program also provides you with alternative options at the bachelor's level including a variety of fitness-related certifications and careers. We offer an exceptional educational experience in the fields of health sciences, exercise science, kinesiology, sports medicine, and athletic training. Our program is designed to prepare aspiring professionals for careers in the dynamic and ever-evolving realm of sports and health care.

The program gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

The bachelor's degree program meets and exceeds the requirements for application to most athletic training graduate programs to ensure you are prepared for the rigor of any future professional program. Our program fosters a deep appreciation for the intricate workings of the human body. By combining elements of health sciences, exercise science, and kinesiology, students gain valuable insights into injury prevention, rehabilitation, and enhancing athletic performance. The knowledge and skills acquired through our curriculum make graduates of our program well-prepared for the challenges of the sports medicine and athletic training industry and put most graduates in a position to be competitive graduate school candidates.

Early Assurance Programs

The UC Master of Science in Athletic Training program offers Early Assurance program options for Health Sciences – Pre-Athletic Training students to save their spot early for their graduate program. Your admission in the Health Sciences – Pre-AT program means you will automatically qualify for the Accelerated Early Assurance program which allows you to combine your undergrad and graduate degree in just 5 years.

Career

The most common career goal for students in the Health Sciences – Pre-Athletic Training track is becoming an athletic trainer after completing graduate training in athletic training.

Athletic trainers generally work in:

- Educational settings: universities and colleges, high schools, Private offices and clinics
- Hospitals
- Fitness centers
- Physicians' offices
- Professional sports teams and more

If you decide not to pursue an athletic training degree, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Master of Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs that are offered through medical facilities with people who have low risk medical conditions or controlled disease such as outpatient cardiac and pulmonary

rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Health Sciences

Pre-Occupational Therapy

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a hybrid Health Sciences major with a Pre-Occupational Therapy track that specifically prepares you for entry into graduate-level occupational therapy programs. Occupational therapists, also known as OTs, evaluate and treat patients of all ages with injuries, illnesses or disabilities using meaningful activities (occupations). Occupational therapists typically use self-care, work, play, and leisure occupations to help clients adapt to individual life circumstances to gain, sustain and maintain health.

This unique track also includes an Introduction to Occupational Therapy course taught by the Pre-Occupational Therapy Program Director, an experienced occupational therapist.

As a student in our Pre-Occupational Therapy program, you'll delve into the realms of exercise science and kinesiology, gaining insights that will set you apart in the competitive field of occupational therapy. Benefit from a supportive learning environment that fosters critical thinking, hands-on experience, and a deep understanding of the human body and its mechanics.

The combination of foundational training in the natural and behavioral sciences, combined with education in applied human studies, such as exercise physiology, biomechanics, kinesiology, nutrition and health and wellness, puts graduates in a position to be very competitive advanced-level education candidates.

Early Assurance Programs

The UC Doctor of Occupational Therapy program two Early Assurance Programs for Health Sciences – Pre-Occupational Therapy students to save their spot early for UC's graduate program.

Add value to your degree with a minor or certificate

Completion of this degree also includes a minor in psychology and the opportunity to earn minors/certificates in nutrition, public health, or developmental disabilities with minimal additional coursework.

Career

Students who study in the Health Sciences - Pre-Occupational Therapy track are primarily planning for entry into a graduate-level master's or doctoral occupational therapy degree program. After completing a graduate program students can become an occupational therapistst.

Occupational therapists typically work in:

- Hospitals
- Schools
- Clinics
- Nursing facilities
- Home health services

Employment opportunities at the bachelor's level are also available in fitness or health-related occupations. Graduates have also enrolled in graduate programs in public health, health promotion, or community health education, and more.

Curriculum

The Health Sciences - Pre-Occupational Therapy program includes both on-campus and online coursework. Your advisor can help you work through course modality options.

Health Sciences

Pre-Physician Assistant

Duration: **4 Years** Total Credits: **123** Award: **BSHS**

Overview

The University of Cincinnati offers a unique Physician Assistant (PA) track within the Health Sciences major that specifically prepares you for entry into graduate-level physician assistant programs.

The Health Sciences Pre-Physician Assistant is one of very few degrees that gives you focused preparation for physician assistant school. The program gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

Explore the University of Cincinnati's premier Health Sciences program, specializing in Pre-Physician Assistant studies. Our curriculum is designed to encompass a comprehensive approach to health, blending key elements of exercise science, kinesiology, and medicine. Discover unparalleled opportunities to prepare for a rewarding career as a physician assistant, with a focus on cutting-edge health sciences education.

The curriculum both meets and exceeds undergraduate prerequisite requirements for physician assistant schools to ensure you are prepared for the rigor of any future professional program. A comprehensive background in the basic sciences combined with applied studies in exercise physiology, biomechanics and kinesiology, biochemistry, cell biology and microbiology puts you in an excellent position to be a competitive candidate.

Career

Students in the Health Sciences – Pre-Physician track generally seek a career as a physician assistant after completing a physician assistant graduate program.

Physician assistants work with people across the lifespans and generally work in:

- Physician offices
- Hospitals
- Outpatient clinics
- Other health care settings

If you decide not to pursue a physician assistant program, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Medical school (MD)
- Osteopathic medical school (DO)
- Physician assistant school (PA-C)
- Chiropractic school (DC)
- Optometry school (OD)
- Pharmacy school
- Dental school (DDS or DMD)
- Doctor of Physical therapy programs
- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs offered through medical facilities with people with low-risk medical conditions or controlled disease such as outpatient cardiac and pulmonary rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs.

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Health Sciences

Pre-Pharmacy

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati Health Sciences – Pre-Pharmacy major specifically prepares you for entry into graduate level pharmacy programs. Health Sciences - Pre-pharmacy comprises all undergraduate coursework required for application to any Doctor of Pharmacy degree program.

Unlike other pre-pharmacy options, the Health Sciences track option gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service-learning and research opportunities in some of the top health care facilities. Additionally, you will learn alongside other allied health professions and develop a strong foundational understanding of the human body through active labs.

The curriculum meets and exceeds pharmacy school's undergraduate prerequisite requirements to ensure you are prepared for the rigor of any future professional program. A comprehensive background in the basic sciences combined with applied studies puts you in an excellent position to be a competitive candidate.

Career

Becoming a pharmacist is the most common career goal for students in the Health Sciences – Pre-Pharmacy track after completing a graduate Doctor of Pharmacy program.

Pharmacists practice as part of an interdisciplinary health care team to improve patients' lives by optimizing medication-related outcomes. They receive extensive education in the therapeutic management of disease states using evidence-based guidelines for drug therapy. They counsel patients on the use of prescription and nonprescription medications. They are core members of medical teams who provide direct patient care in hospitals, ambulatory clinics, long-term care facilities, and other health care settings. system and advance scientific innovation.

Pharmacists typically work in:

- Health-systems and Hospitals
- Community and Independently Owned Pharmacies
- Ambulatory Clinics
- Accountable Care Organizations
- Academia
- Specialty Pharmacies
- Pharmacogenomic Centers

Pharmacists can specialize and become Board Certified in a variety of areas such as:

- General Pharmacotherapy
- Ambulatory Care
- Oncology
- Cardiology
- Emergency Medicine
- Pediatrics
- Geriatrics
- Compounding and Sterile Preparations
- Infectious Disease
- Nuclear Pharmacy
- Nutritional Support
- Psychiatry
- Solid Organ Transplantation

If you decide not to pursue a pharmacy degree, you will be prepared for a variety of other graduate programs, certifications, and employment opportunities:

- Medical school (MD)
- Osteopathic medical school (DO)
- Physician assistant school (PA-C)

- Chiropractic school (DC)
- Optometry school (OD)
- Dental school (DDS or DMD)
- Doctor of Physical therapy programs
- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

If you choose not to pursue a graduate education, the following career opportunities are available to you:

- Biomedical researcher
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Graduating students are also eligible to earn professional certification from a variety of organizations.

Early Assurance to the Doctor of Pharmacy (PharmD) program

The James L. Winkle College of Pharmacy PharmCat Scholars Program will allow you to secure assurance of an interview for the Doctor of Pharmacy (PharmD) program at UC at UC as long as you remain in good standing with the program. High school and current UC students are eligible for the program if they meet the requirements. Learn more about the PhamCat Scholars Program.

Transferring To UC

Students who have earned a high school diploma or GED and have attended a college or university other than the University of Cincinnati since earning their high school credentials are considered transfer students. Please visit UC Admissions for information about applying to the university as a Transfer Student.

Changing Majors Within UC

If you are currently enrolled in an undergraduate program at the University of Cincinnati (including UC Blue Ash and UC Clermont), but want to change your major to one in the College of Allied Health Sciences, please visit Transition Students for more information.

Application Deadlines

Application deadlines can be found at Admissions Deadlines.

Accreditation

Health Sciences : Pre-Pharmacy

BSHS

Health Sciences: Pre-Pharmacy 4 Year Fall 2025

Duration: 4 Years

★Minimum Credits: 90 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life (C min)	3
BIOL1081L	Biology I Laboratory (C min)	1
CHEM1040	General Chemistry I (C min)	4
CHEM1040L	General Chemistry Laboratory I (C min)	1
HLTH1001	Success in Allied Health I (C min)	1
MATH1044	Applied Calculus I (C min)	3
SOC1001	Introduction to Sociology (C min)	3

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL2031C	Microbiology for Health Professionals (C min)	3
CHEM1041	General Chemistry II (C min)	4
CHEM1041L	General Chemistry Laboratory II (C min)	1
ENGL1001	English Composition (C min)	3
HLSC2012	Medical Terminology (C min)	2
STAT1031	Introduction to Statistics (C min)	3

Summer Semester Year 1

Course	Title/Desc	Credit
PHYS1051	General Physics I (Algebra-based) (C min)	4

Fall Semester Year 2

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I (C min)	4
CHEM2040	Organic Chemistry I (C min)	4
CHEM2040L	Organic Chemistry Laboratory I (C min)	1
ENGL2089	Intermediate Composition (C min)	3
PSYC1001	Introduction to Psychology (C min)	3
BoK: FA,HP,HU,TI	Double Dip General Education Elective (FA, HU, HP + TI) (C min)	3

Spring Semester Year 2

Course	Title/Desc	Credit
BIOL2002C	Anatomy and Physiology II (C min)	4
CHEM2041	Organic Chemistry II (C min)	4
CHEM2041L	Organic ChemistryLaboratory II (C min)	1
1XXX+ BoK: SCE	Select any Society, Culture, & Ethics (SCE) General Education Elective (C- min)	3

Pick one option below

Course	Title/Desc	Credit
MATH1045	Applied Calculus II (C min)	3
PHYS1052	General Physics II (Algebra-based) (C min)	4
PSCI2100	Drugs and Disease (C min)	3

Fall Semester Year 3

Course	Title/Desc	Credit
CHEM3040	Introduction to Biochemistry (C min)	3
HLSC2021C	Musculoskeletal Anatomy (C- min)	3
HLSC3023C	Kinesiology (C- min)	3
NUTR1030	Personal Nutrition (C- min)	3

Spring Semester Year 3

Course	Title/Desc	Credit
HLSC3014	Pharmacology for Health Sciences (C- min)	3
HLSC3022C	Introductory Biomechanics (C- min)	3
HLSC3032C	Physiology of Exercise (C- min)	3
HLTH3098	Research Methods in Health Sciences (C- min)	3

Pick one of the following (3 credits)

Course	Title/Desc	Credit
HLSC3034C	Exercise Testing and Prescription (C- min)	3
NUTR2020	Lifecycle Nutrition (C- min)	3
PSYC2051	Fundamentals of Psychopathology (C- min)	3

Fall Semester Year 4

Course	Title/Desc	Credit
HLSC3033C	Exercise Epidemiology and Special Topics (C- min)	3
HLSC4015C	Introductory Gross Anatomy (C- min)	3
HLSC4025C	Motor Control and Human Performance (C- min)	3
HLSC4037	Exercise and Special Populations (C- min)	2
PSYC2040	Developmental Psychology (C- min)	3

Capstone Experience: Pick one of the following.

Course	Title/Desc	Credit
HLSC5044	Health Sciences Research Capstone (C- min)	2
HLSC5045	Health Sciences Interprofessional Education (IPE) Capstone (C- min)	2

Spring Semester Year 4

Course	Title/Desc	Credit
HLSC4017	Introductory Pathophysiology (C- min)	3
HLSC4038	Exercise and Special Populations II (C- min)	1
NUTR2010	Nutrition and Exercise (C- min)	3
Free Electives	Elective, if need to be full time	3

Capstone: Pick one of the following.

Course	Title/Desc	Credit
HLSC5044	Health Sciences Research Capstone (C- min)	2
HLSC5045	Health Sciences Interprofessional Education (IPE) Capstone (C- min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Health Sciences : Pre-Pharmacy

BSHS

Health Sciences: Pre-Pharmacy and Undergrad (BS) - Fall 2025

Duration: 4 Years

★Minimum Credits: 90 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life (C min)	3
BIOL1081L	Biology I Laboratory (C min)	1
CHEM1040	General Chemistry I (C min)	4
CHEM1040L	General Chemistry Laboratory I (C min)	1
HLTH1001	Success in Allied Health I (C min)	1
MATH1044	Applied Calculus I (C min)	3
SOC1001	Introduction to Sociology (C min)	3

Spring Semester Year 1

Course	Title/Desc	Credit
HLSC2012	Medical Terminology (C min)	2
BIOL2031C	Microbiology for Health Professionals (C min)	3
CHEM1041	General Chemistry II (C min)	4
CHEM1041L	General Chemistry Laboratory II (C min)	1
ENGL1001	English Composition (C min)	3
STAT1031	Introduction to Statistics (C min)	3

Summer Semester Year 1

Course	Title/Desc	Credit
PHYS1051	General Physics I (Algebra-based) (C min)	4

Fall Semester Year 2

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I (C min)	4
CHEM2040	Organic Chemistry I (C min)	4
CHEM2040L	Organic Chemistry Laboratory I (C min)	1
PSYC1001	Introduction to Psychology (C min)	3
BoK: FA,HP,HU,TI	Double Dip General Education Elective (FA, HU, HP + TI) (C min)	3
ENGL2089	Intermediate Composition (C min)	3

Spring Semester Year 2

Course	Title/Desc	Credit
BIOL2002C	Anatomy and Physiology II (C min)	4
CHEM2041	Organic Chemistry II (C min)	4
CHEM2041L	Organic ChemistryLaboratory II (C min)	1
1XXX+ BoK: SCE	Select any Society, Culture, & Ethics (SCE) General Education Elective (C- min)	3

Pick one of the following

Course	Title/Desc	Credit
MATH1045	Applied Calculus II (C min)	3
PHYS1052	General Physics II (Algebra-based) (C min)	4
PSCI2100	Drugs and Disease (C min)	3

Summer Semester Year 2

Course	Title/Desc	Credit
CHEM3040	Introduction to Biochemistry (C min)	3

Additional Requirements to obtain Undergraduate Degree

In addition to the degree requirements listed above, successful completion of the following as well as the first year of the UC Doctoral of Pharmacy coursework will result in the student being granted an Undergraduate Degree in Health Sciences.

Required - 3 Credits

Course	Title/Desc	Credit
NUTR1030	Personal Nutrition (C- min)	3

Course	Title/Desc	Credit

Category A: Pick two of the following (6 credits)

Course	Title/Desc	Credit
HLSC2022C	Musculoskeletal Anatomy for DL (C- min)	3
HLSC3020	Introduction to Biomechanics and Kinesiology (C- min)	3
HLSC3031	General Exercise Physiology (C- min)	3
HLSC4020	Motor Learning and Movement Control (C- min)	3

Category B: Pick two of the following (6 credits)

Course	Title/Desc	Credit
HLSC3014	Pharmacology for Health Sciences (C- min)	3
HLSC4017	Introductory Pathophysiology (C- min)	3
PSYC2040	Developmental Psychology (C- min)	3
NUTR4050	Medical Nutrition Therapy I (C- min)	3

Elective: Pick one additional elective from Category A or B (3 credits)

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Health Sciences : Pre-Pharmacy

BSHS

Health Sciences: Pre-Pharmacy 2 Year Pathway Fall 2025

Duration: 4 Years

Summer Semester Year 2

Course	Title/Desc	Credit
CHEM3040	Introduction to Biochemistry (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Health Sciences

Pre-Medicine

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a Pre-Medicine track within the Health Sciences major that specifically prepares you for entry into graduate-level medicine, pharmacy, chiropractic, podiatry, dental, and optometry programs.

At the University of Cincinnati, we understand the importance of a well-rounded education to prepare you for the challenges of medical school. Our program is designed to equip students with the knowledge and skills necessary to pursue a career in medicine, with a focus on health sciences, exercise science, kinesiology, and essential pre-medical concepts.

Unlike other pre-med options, the Health Sciences track option gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

Our comprehensive curriculum integrates key elements of health sciences, exercise science, kinesiology, and pre-med coursework, providing a solid foundation for aspiring medical professionals. The curriculum both meets and exceeds undergraduate prerequisite requirements for medical school to ensure you are prepared for the rigor of any future professional program.

A background in the basic sciences combined with applied studies in exercise physiology, biomechanics and kinesiology, biochemistry, cell biology and microbiology puts you in an excellent position to be a competitive candidate.

Career

Medical school is the most common career goal for students in the Health Sciences – Pre-Med track. After completing medical school, students would be able to pursue a career as a physicians or surgeon.

Physicians and surgeons work with people across the lifespans and generally work in:

- Physicians' offices
- Hospitals
- Academic
- Government

If you decide not to pursue a medical degree, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Medical school (MD)
- Osteopathic medical school (DO)
- Physician assistant school (PA-C)
- Chiropractic school (DC)
- Optometry school (OD)
- Pharmacy school
- Dental school (DDS or DMD)
- Doctor of Physical therapy programs
- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs offered through medical facilities with people with low-risk medical conditions or controlled disease such as outpatient cardiac and pulmonary rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Advising

Advisors will be there to help you at every step of your academic journey. If you have advising related questions, please visit the College of Allied Health Sciences' Academic Advising.

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements

Transferring To UC

Students who have earned a high school diploma or GED and have attended a college or university other than the University of Cincinnati since earning their high school credentials are considered transfer students. Please visit UC Admissions for information about applying to the university as a Transfer Student.

Changing Majors Within UC

If you are currently enrolled in an undergraduate program at the University of Cincinnati (including UC Blue Ash and UC Clermont), but want to change your major to one in the College of Allied Health Sciences, please visit Transition Students for more information.

Application Deadlines

Application deadlines can be found at Admissions Deadlines.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Health Sciences

Pre-Physical Therapy

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a Pre-Physical Therapy track within the Health Sciences major that specifically prepares you for entry into graduate-level physical therapy programs. The program also provides alternative options at the bachelor's level, including various fitness-related certifications and careers.

The program gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

Our Pre-Physical Therapy program offers comprehensive exercise science and kinesiology education, ensuring you gain the knowledge and skills needed to thrive in this dynamic field. Our expert faculty members will guide you through cutting-edge concepts and practices, preparing you for a successful future.

The Health Sciences bachelor's degree program meets and exceeds the requirements for application to most physical therapy graduate programs to ensure you are prepared for the rigor of any future professional program. The comprehensive background in the basic sciences combined with applied studies in exercise physiology, biomechanics, kinesiology, and sports and wellness puts most graduates in a position to be competitive graduate school candidates.

Early Assurance Programs

The UC Doctor of Physical Therapy program offers two opportunities for Health Sciences – Pre-Physical Therapy students to save their spot early for their top-ranked highly competitive graduate program. High performing incoming first-year students can apply to the High School Early Assurance Pathway and high performing juniors can apply to the Junior Early Assurance Pathway.

Career

The most common career path for students in the Health Sciences – Pre-Physical Therapy track is becoming a physical therapist after completing a Doctor of Physical Therapy graduate degree program.

Physical therapists work with people across the lifespans and generally work in:

- Private offices and clinics
- Hospitals
- Home care
- Nursing and rehabilitation facilities
- Military and more

If you decide not to pursue a physical therapy degree, you will be prepared for various other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs offered through medical facilities with people with low-risk medical conditions or controlled disease such as outpatient cardiac and pulmonary rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Health Sciences

Undecided

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati Health Sciences – Undecided program is designed for students who know they want to major in Health Sciences but are not yet ready to commit to a track option.

Each Health Sciences track is designed to prepare students for a specific career field and/or graduate program; therefore, the Undecided track is a great option for those who are still exploring the best fit for them.

Current track options include:

- Pre-Athletic Training
- Pre-Medicine
- Pre-Occupational Therapy
- Pre-Pharmacy
- Pre-Physician Assistant
- Pre-Physical Therapy

Undecided students should take the opportunity to explore their strengths, career interests and talents before committing to a track and must do so before their junior year.

Undecided students should also consult with their advisor on decision-making and course selection while exploring track options.

The undecided track is only open to incoming first-year students.

Career

After learning about the possible career paths associated with each health sciences track, you can transition into the track that aligns best with your future career goals.

Health Sciences : Undecided

BSHS

Health Sciences: Undecided (BS) - effective fall 2025

Duration: 4 Years

★Minimum Credits: 122 Credits

Fall Semester Year 1

Course apply to any intended Health Sciences Track

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life (C- min)	3
BIOL1081L	Biology I Laboratory (C- min)	1
HLSC2016	Introduction to Health Professions & Practice (C- min)	2
SOC1001	Introduction to Sociology (C- min)	3

Consult with an advisor to add proper level Chemistry and Math, depending on intended Health Sciences Track.

Course	Title/Desc	Credit
CHEM1030	General Organic and Biological Chemistry I (C- min)	3
CHEM1030L	General, Organic and Biochemistry Laboratory I (C- min)	1
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
MATH1021	College Algebra (C- min)	3
MATH1044	Applied Calculus I (C- min)	3

Spring Semester Year 1

Course apply to any intended Health Sciences Track

Course	Title/Desc	Credit
BIOL1082	Biology II: Evolution, Physiology, and Ecology (C- min)	3
BIOL1082L	Biology II Laboratory (C- min)	1
ENGL1001	English Composition (C- min)	3
HLSC2012	Medical Terminology (C- min)	2

Consult with an advisor to add proper level Chemistry and Math, depending on intended Health Sciences Track.

Course	Title/Desc	Credit
CHEM1031	General, Organic, and Biochemistry II (C- min)	3
CHEM1031L	General, Organic, and Biochemistry Laboratory II (C- min)	1
CHEM1041	General Chemistry II (C- min)	4
CHEM1041L	General Chemistry Laboratory II (C- min)	1
MATH1022	Trigonometry (C- min)	3
MATH1045	Applied Calculus II (C- min)	3

Note:

Students will use the first year (or two) of the Health Sciences Undecided curriculum to explore options for next steps. Once a decision is made, the student will move into their desired Health Science track. This transition will occur no later than the start of Year #3.

Fall Semester Year 2

Course apply to any intended Health Sciences Track

Course	Title/Desc	Credit
NUTR1030	Personal Nutrition (C- min)	3
PSYC1001	Introduction to Psychology (C- min)	3

Consult with an advisor to add proper level Physics, Chemistry, and Biology, depending on intended Health Sciences Track.

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I (C- min)	4
CHEM2040	Organic Chemistry I (C- min)	4
CHEM2040L	Organic Chemistry Laboratory I (C- min)	1
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based) (C- min)	1

Spring Semester Year 2

Course apply to any intended Health Sciences Track

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition (C- min)	3
HLSC2021C	Musculoskeletal Anatomy (C- min)	3

Consult with an advisor to add proper level Physics, Chemistry, and Biology, depending on intended Health Sciences Track.

Course	Title/Desc	Credit
BIOL2002C	Anatomy and Physiology II (C- min)	4
CHEM2041	Organic Chemistry II (C- min)	4
CHEM2041L	Organic ChemistryLaboratory II (C- min)	1
PHYS1005C	Physics for Allied Health (C- min)	3

Course	Title/Desc	Credit
PHYS1052	General Physics II (Algebra-based) (C- min)	4
PHYS1052L	General Physics Lab II (Algebra-based) (C- min)	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Health Sciences

Duration: **4 Years** Total Credits: **123** Award: **BSHS**

Overview

The University of Cincinnati's online Bachelor of Science in Health Sciences degree is the perfect next step if you currently have an associate degree and are looking for a way to complete your bachelor's degree and advance your career or prepare for a graduate professional program.

Use this degree to apply to programs in physical therapy, medicine, dentistry, exercise science, occupational therapy, public health, health administration, physician's assistant, nurse practitioner and medical dietetics.

It's important to note that some graduate and professional programs may require additional or alternate coursework as pre-requisites in addition to minimum grade requirements. Our faculty advisors can help you navigate this. We also recommend you consult your intended graduate program for additional information.

Career

Advance your allied health associate degree through this bachelor's completion program and gain an edge on competition within the health care field.

The major career benefit of this program is that there are many job opportunities that you will now qualify for. Using this to your advantage now or in the future if you should ever wish to shift careers sets you up for success in the long run. Whether it's a position in health administration, hospital management or research and beyond, your options are wide-reaching. In fact, many jobs you could apply for with this degree make the list of 100 Best Jobs in 2020, according to U.S. News & World Report.

Health Sciences

Online

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati Online Bachelor of Health Sciences - Pre-Occupational Therapy program provides students with an associate's degree in Occupational Therapy Assisting (OTA) the opportunity to obtain a Bachelor's degree in Health Sciences. The curriculum provides students with the knowledge and skills necessary to pursue a graduate-level occupational therapy degree and opportunities for professional advancement. Designed for full or part-time students, every class is available online, making it possible to receive your BS in Health Sciences in 2 to 4 years. You can earn your degree on your timeline with start dates each semester.

The University of Cincinnati's online programs are accredited by the Higher Learning Commission. Our knowledgeable instructors are experienced in the industry, experts in their field, and dedicated to our student body.

This program also has a dedicated program director, an experienced occupational therapist, who will also teach one of your classes.

Success

If a graduate degree or career advancement is your end goal, a Bachelor of Science in Health Sciences from UC Online can set you apart from the competition. Designed with students wishing to pursue a graduate degree in occupational therapy in mind, our courses satisfy the most common prerequisite requirements and carry with them the University of Cincinnati's reputation.

Occupational therapy graduate program admission requirements differ among institutions, so students should review prerequisite courses relevant to graduate programs of interest and work with their advisors to reach their goals. Due to the competitive nature of admissions to most OT graduate programs, completion of this degree does not guarantee acceptance to an occupational therapy program.

Career

The online Bachelor of Science in Health Sciences is an advanced and accessible next step for working OTAs who want to expand their career opportunities. Whether you're preparing for graduate school, seeking career specialization, want more autonomy, or looking to qualify for new opportunities in the world of healthcare, the University of Cincinnati Bachelor of Science in Health Sciences-Pre-Occupational Therapy can help you reach your goals.

Minoring

Students completing the program can obtain a minor in psychology and are able to get an additional minor in public health by taking six additional credit hours.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Stark State College
- Fox College
- Kapi'olani Community College
- St. Louis College of Health Careers
- SUNY Erie Community College
- UA Cossatot Community College
- St. Louis College of Health Professions
- Hawkeye Community College
- Tulsa Community College
- Trident Technical College
- Allegany Community College
- San Juan Community College
- Lorain Community College

Health Sciences

Pre-Athletic Training

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a Pre-Athletic Training track within the Health Sciences major that specifically prepares you for entry into graduate level Athletic Training programs. The program also provides you with alternative options at the bachelor's level including a variety of fitness-related certifications and careers. We offer an exceptional educational experience in the fields of health sciences, exercise science, kinesiology, sports medicine, and athletic training. Our program is designed to prepare aspiring professionals for careers in the dynamic and ever-evolving realm of sports and health care.

The program gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

The bachelor's degree program meets and exceeds the requirements for application to most athletic training graduate programs to ensure you are prepared for the rigor of any future professional program. Our program fosters a deep appreciation for the intricate workings of the human body. By combining elements of health sciences, exercise science, and kinesiology, students gain valuable insights into injury prevention, rehabilitation, and enhancing athletic performance. The knowledge and skills acquired through our curriculum make graduates of our program well-prepared for the challenges of the sports medicine and athletic training industry and put most graduates in a position to be competitive graduate school candidates.

Early Assurance Programs

The UC Master of Science in Athletic Training program offers Early Assurance program options for Health Sciences – Pre-Athletic Training students to save their spot early for their graduate program. Your admission in the Health Sciences – Pre-AT program means you will automatically qualify for the Accelerated Early Assurance program which allows you to combine your undergrad and graduate degree in just 5 years.

Career

The most common career goal for students in the Health Sciences – Pre-Athletic Training track is becoming an athletic trainer after completing graduate training in athletic training.

Athletic trainers generally work in:

- Educational settings: universities and colleges, high schools, Private offices and clinics
- Hospitals
- Fitness centers
- Physicians' offices
- Professional sports teams and more

If you decide not to pursue an athletic training degree, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Master of Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs that are offered through medical facilities with people who have low risk medical conditions or controlled disease such as outpatient cardiac and pulmonary

rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Health Sciences

Pre-Medicine

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a Pre-Medicine track within the Health Sciences major that specifically prepares you for entry into graduate-level medicine, pharmacy, chiropractic, podiatry, dental, and optometry programs.

At the University of Cincinnati, we understand the importance of a well-rounded education to prepare you for the challenges of medical school. Our program is designed to equip students with the knowledge and skills necessary to pursue a career in medicine, with a focus on health sciences, exercise science, kinesiology, and essential pre-medical concepts.

Unlike other pre-med options, the Health Sciences track option gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

Our comprehensive curriculum integrates key elements of health sciences, exercise science, kinesiology, and pre-med coursework, providing a solid foundation for aspiring medical professionals. The curriculum both meets and exceeds undergraduate prerequisite requirements for medical school to ensure you are prepared for the rigor of any future professional program.

A background in the basic sciences combined with applied studies in exercise physiology, biomechanics and kinesiology, biochemistry, cell biology and microbiology puts you in an excellent position to be a competitive candidate.

Career

Medical school is the most common career goal for students in the Health Sciences – Pre-Med track. After completing medical school, students would be able to pursue a career as a physicians or surgeon.

Physicians and surgeons work with people across the lifespans and generally work in:

- Physicians' offices
- Hospitals
- Academic
- Government

If you decide not to pursue a medical degree, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Medical school (MD)
- Osteopathic medical school (DO)
- Physician assistant school (PA-C)
- Chiropractic school (DC)
- Optometry school (OD)
- Pharmacy school
- Dental school (DDS or DMD)
- Doctor of Physical therapy programs
- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs offered through medical facilities with people with low-risk medical conditions or controlled disease such as outpatient cardiac and pulmonary rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Health Sciences

Pre-Occupational Therapy

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a hybrid Health Sciences major with a Pre-Occupational Therapy track that specifically prepares you for entry into graduate-level occupational therapy programs. Occupational therapists, also known as OTs, evaluate and treat patients of all ages with injuries, illnesses or disabilities using meaningful activities (occupations). Occupational therapists typically use self-care, work, play, and leisure occupations to help clients adapt to individual life circumstances to gain, sustain and maintain health.

This unique track also includes an Introduction to Occupational Therapy course taught by the Pre-Occupational Therapy Program Director, an experienced occupational therapist.

As a student in our Pre-Occupational Therapy program, you'll delve into the realms of exercise science and kinesiology, gaining insights that will set you apart in the competitive field of occupational therapy. Benefit from a supportive learning environment that fosters critical thinking, hands-on experience, and a deep understanding of the human body and its mechanics.

The combination of foundational training in the natural and behavioral sciences, combined with education in applied human studies, such as exercise physiology, biomechanics, kinesiology, nutrition and health and wellness, puts graduates in a position to be very competitive advanced-level education candidates.

Early Assurance Programs

The UC Doctor of Occupational Therapy program two Early Assurance Programs for Health Sciences – Pre-Occupational Therapy students to save their spot early for UC's graduate program.

Add value to your degree with a minor or certificate

Completion of this degree also includes a minor in psychology and the opportunity to earn minors/certificates in nutrition, public health, or developmental disabilities with minimal additional coursework.

Career

Students who study in the Health Sciences - Pre-Occupational Therapy track are primarily planning for entry into a graduate-level master's or doctoral occupational therapy degree program. After completing a graduate program students can become an occupational therapistst.

Occupational therapists typically work in:

- Hospitals
- Schools
- Clinics
- Nursing facilities
- Home health services

Employment opportunities at the bachelor's level are also available in fitness or health-related occupations. Graduates have also enrolled in graduate programs in public health, health promotion, or community health education, and more.

Curriculum

The Health Sciences - Pre-Occupational Therapy program includes both on-campus and online coursework. Your advisor can help you work through course modality options.

Health Sciences

Pre-Pharmacy

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati Health Sciences – Pre-Pharmacy major specifically prepares you for entry into graduate level pharmacy programs. Health Sciences - Pre-pharmacy comprises all undergraduate coursework required for application to any Doctor of Pharmacy degree program.

Unlike other pre-pharmacy options, the Health Sciences track option gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service-learning and research opportunities in some of the top health care facilities. Additionally, you will learn alongside other allied health professions and develop a strong foundational understanding of the human body through active labs.

The curriculum meets and exceeds pharmacy school's undergraduate prerequisite requirements to ensure you are prepared for the rigor of any future professional program. A comprehensive background in the basic sciences combined with applied studies puts you in an excellent position to be a competitive candidate.

Career

Becoming a pharmacist is the most common career goal for students in the Health Sciences – Pre-Pharmacy track after completing a graduate Doctor of Pharmacy program.

Pharmacists practice as part of an interdisciplinary health care team to improve patients' lives by optimizing medication-related outcomes. They receive extensive education in the therapeutic management of disease states using evidence-based guidelines for drug therapy. They counsel patients on the use of prescription and nonprescription medications. They are core members of medical teams who provide direct patient care in hospitals, ambulatory clinics, long-term care facilities, and other health care settings. system and advance scientific innovation.

Pharmacists typically work in:

- Health-systems and Hospitals
- Community and Independently Owned Pharmacies
- Ambulatory Clinics
- Accountable Care Organizations
- Academia
- Specialty Pharmacies
- Pharmacogenomic Centers

Pharmacists can specialize and become Board Certified in a variety of areas such as:

- General Pharmacotherapy
- Ambulatory Care
- Oncology
- Cardiology
- Emergency Medicine
- Pediatrics
- Geriatrics
- Compounding and Sterile Preparations
- Infectious Disease
- Nuclear Pharmacy
- Nutritional Support
- Psychiatry
- Solid Organ Transplantation

If you decide not to pursue a pharmacy degree, you will be prepared for a variety of other graduate programs, certifications, and employment opportunities:

- Medical school (MD)
- Osteopathic medical school (DO)
- Physician assistant school (PA-C)

- Chiropractic school (DC)
- Optometry school (OD)
- Dental school (DDS or DMD)
- Doctor of Physical therapy programs
- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

If you choose not to pursue a graduate education, the following career opportunities are available to you:

- Biomedical researcher
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Graduating students are also eligible to earn professional certification from a variety of organizations.

Course	Title/Desc	Credit
MATH1045	Applied Calculus II (C min)	3
PHYS1052	General Physics II (Algebra-based) (C min)	4
PSCI2100	Drugs and Disease (C min)	3

Summer Semester Year 2

Course	Title/Desc	Credit
CHEM3040	Introduction to Biochemistry (C min)	3

Additional Requirements to obtain Undergraduate Degree

In addition to the degree requirements listed above, successful completion of the following as well as the first year of the UC Doctoral of Pharmacy coursework will result in the student being granted an Undergraduate Degree in Health Sciences.

Required - 3 Credits

Course	Title/Desc	Credit
NUTR1030	Personal Nutrition (C- min)	3

Course	Title/Desc	Credit

Category A: Pick two of the following (6 credits)

Course	Title/Desc	Credit
HLSC2022C	Musculoskeletal Anatomy for DL (C- min)	3
HLSC3020	Introduction to Biomechanics and Kinesiology (C- min)	3
HLSC3031	General Exercise Physiology (C- min)	3
HLSC4020	Motor Learning and Movement Control (C- min)	3

Category B: Pick two of the following (6 credits)

Course	Title/Desc	Credit
HLSC3014	Pharmacology for Health Sciences (C- min)	3
HLSC4017	Introductory Pathophysiology (C- min)	3
PSYC2040	Developmental Psychology (C- min)	3
NUTR4050	Medical Nutrition Therapy I (C- min)	3

Elective: Pick one additional elective from Category A or B (3 credits)

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Health Sciences : Pre-Pharmacy

Health Sciences

Pre-Physical Therapy

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati offers a Pre-Physical Therapy track within the Health Sciences major that specifically prepares you for entry into graduate-level physical therapy programs. The program also provides alternative options at the bachelor's level, including various fitness-related certifications and careers.

The program gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

Our Pre-Physical Therapy program offers comprehensive exercise science and kinesiology education, ensuring you gain the knowledge and skills needed to thrive in this dynamic field. Our expert faculty members will guide you through cutting-edge concepts and practices, preparing you for a successful future.

The Health Sciences bachelor's degree program meets and exceeds the requirements for application to most physical therapy graduate programs to ensure you are prepared for the rigor of any future professional program. The comprehensive background in the basic sciences combined with applied studies in exercise physiology, biomechanics, kinesiology, and sports and wellness puts most graduates in a position to be competitive graduate school candidates.

Early Assurance Programs

The UC Doctor of Physical Therapy program offers two opportunities for Health Sciences – Pre-Physical Therapy students to save their spot early for their top-ranked highly competitive graduate program. High performing incoming first-year students can apply to the High School Early Assurance Pathway and high performing juniors can apply to the Junior Early Assurance Pathway.

Career

The most common career path for students in the Health Sciences – Pre-Physical Therapy track is becoming a physical therapist after completing a Doctor of Physical Therapy graduate degree program.

Physical therapists work with people across the lifespans and generally work in:

- Private offices and clinics
- Hospitals
- Home care
- Nursing and rehabilitation facilities
- Military and more

If you decide not to pursue a physical therapy degree, you will be prepared for various other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs offered through medical facilities with people with low-risk medical conditions or controlled disease such as outpatient cardiac and pulmonary rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

Advising

Advisors will be there to help you at every step of your academic journey. If you have advising-related questions, please visit the College of Allied Health Sciences' Academic Advising.

Admission Requirements

The University of Cincinnati has established academic success criteria for first-year applicants to bachelor's degree programs. All students are encouraged to apply. Please visit High School Student Admissions for more information about first-year student admission requirements.

Transferring To UC

Students who have earned a high school diploma or GED and have attended a college or university other than the University of Cincinnati since earning their high school credentials are considered transfer students. Please visit UC Admissions for information about applying to the university as a Transfer Student.

Changing Majors Within UC

If you are currently enrolled in an undergraduate program at the University of Cincinnati (including UC Blue Ash and UC Clermont), but want to change your major to one in the College of Allied Health Sciences, please visit Transition Students for more information.

Application Deadlines

Application deadlines can be found at Admissions Deadlines.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Health Sciences

Pre-Physician Assistant

Duration: **4 Years** Total Credits: **123** Award: **BSHS**

Overview

The University of Cincinnati offers a unique Physician Assistant (PA) track within the Health Sciences major that specifically prepares you for entry into graduate-level physician assistant programs.

The Health Sciences Pre-Physician Assistant is one of very few degrees that gives you focused preparation for physician assistant school. The program gives you a hands-on undergraduate experience where you can gain direct patient care experiences through service learning and research opportunities in some of the top health care facilities, learn alongside other allied health professions, and develop a strong foundational understanding of the human body through active labs.

Explore the University of Cincinnati's premier Health Sciences program, specializing in Pre-Physician Assistant studies. Our curriculum is designed to encompass a comprehensive approach to health, blending key elements of exercise science, kinesiology, and medicine. Discover unparalleled opportunities to prepare for a rewarding career as a physician assistant, with a focus on cutting-edge health sciences education.

The curriculum both meets and exceeds undergraduate prerequisite requirements for physician assistant schools to ensure you are prepared for the rigor of any future professional program. A comprehensive background in the basic sciences combined with applied studies in exercise physiology, biomechanics and kinesiology, biochemistry, cell biology and microbiology puts you in an excellent position to be a competitive candidate.

Career

Students in the Health Sciences – Pre-Physician track generally seek a career as a physician assistant after completing a physician assistant graduate program.

Physician assistants work with people across the lifespans and generally work in:

- Physician offices
- Hospitals
- Outpatient clinics
- Other health care settings

If you decide not to pursue a physician assistant program, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Medical school (MD)
- Osteopathic medical school (DO)
- Physician assistant school (PA-C)
- Chiropractic school (DC)
- Optometry school (OD)
- Pharmacy school
- Dental school (DDS or DMD)
- Doctor of Physical therapy programs
- Athletic Training programs
- Occupational Therapy programs
- Orthotics and Prosthetics programs (CO or CP)
- Public Health programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics programs (MS or PhD)
- Nutrition programs and more.

Professional Certification Opportunities

American College of Sports Medicine (ACSM)

- Certified personal trainer - Many professionals who hold this certification work in public or medical facilities that offer organized programs for healthy people or for people with mild, controlled health conditions such as arthritis.

- Health/fitness instructor - Most professionals who hold this certification work in programs offered through medical facilities with people with low-risk medical conditions or controlled disease such as outpatient cardiac and pulmonary rehabilitation or diabetes programs.

National Strength and Conditioning Association (NSCA)

- Certified personal trainer (NSCA-CPT)- Many professionals who hold this certification work in or start small businesses in fitness and health
- Certified strength and conditioning specialist (CSCS) -Most professionals who hold this certification work in high school, collegiate or professional athletics. Some professionals work in public/retail fitness and health as facility managers responsible for the design and implementation of the facility's programs.

Career Opportunities

- Advanced coaching opportunities
- Activities director/fitness director at recreation facilities or camps
- Medical or biomedical equipment representative/sales
- Exercise equipment representative/sales
- Pharmaceutical product representative/sales

	CAHS Upper Level Elective (C- min)	3

Choose one of the following Microbiology electives and lab (3-4 credit hours)

Course	Title/Desc	Credit
MLSC3035C	Foundations of Clinical Microbiology (C- min)	3
BIOL2031C	Microbiology for Health Professionals (C- min)	3
BIOL4011	Microbiology (C- min)	3
BIOL4011L	Microbiology Laboratory (C- min)	1
MEDS3024C	Medical Microbiology (C- min)	3

Capstone Experience

Pick one of the following:

Course	Title/Desc	Credit
HLSC5044	Health Sciences Research Capstone (C- min)	2
HLSC5045	Health Sciences Interprofessional Education (IPE) Capstone (C- min)	2

Pick one General Education course from one of the following categories

Course	Title/Desc	Credit
BoK: FA,HP,HU	General Education Course (C- min)	3

Spring Semester Year 4

CAHS Upper Level Electives (Pick two courses from list)

Course	Title/Desc	Credit
	CAHS Upper Level Elective (C- min)	3
	CAHS Upper Level Elective (C- min)	3

Complete both General Education categories as outlined below

Course	Title/Desc	Credit
BoK: TI	General Education Electives (D min)	3
BoK: SCE	Select any Society, Ethic, and Culture (SCE) General Education Elective (C- min)	3

Capstone Experience

Pick one of the following:

Course	Title/Desc	Credit
HLSC5044	Health Sciences Research Capstone (C- min)	2
HLSC5045	Health Sciences Interprofessional Education (IPE) Capstone (C- min)	2

CAHS Upper Level Electives (Pick 4) at least 12 credits required

Students will take at least 12 credit hours of the following courses during their academic program.

CAHS Upper Level Electives

Course	Title/Desc	Credit
HLSC3033C	Exercise Epidemiology and Special Topics (C- min)	3
HLSC3014	Pharmacology for Health Sciences (C- min)	3
HLSC4017	Introductory Pathophysiology (C- min)	3
HLSC4015C	Introductory Gross Anatomy (C- min)	3
HLSC4025C	Motor Control and Human Performance (C- min)	3
MLSC3031	Clinical Immunology I (C- min)	3
NUTR4050	Medical Nutrition Therapy I (C- min)	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Health Sciences

Undecided

Duration: 4 Years Total Credits: 123 Award: BSHS

Overview

The University of Cincinnati Health Sciences – Undecided program is designed for students who know they want to major in Health Sciences but are not yet ready to commit to a track option.

Each Health Sciences track is designed to prepare students for a specific career field and/or graduate program; therefore, the Undecided track is a great option for those who are still exploring the best fit for them.

Current track options include:

- Pre-Athletic Training
- Pre-Medicine
- Pre-Occupational Therapy
- Pre-Pharmacy
- Pre-Physician Assistant
- Pre-Physical Therapy

Undecided students should take the opportunity to explore their strengths, career interests and talents before committing to a track and must do so before their junior year.

Undecided students should also consult with their advisor on decision-making and course selection while exploring track options.

The undecided track is only open to incoming first-year students.

Career

After learning about the possible career paths associated with each health sciences track, you can transition into the track that aligns best with your future career goals.

Social Work

Online

Duration: 4 Years Total Credits: 120 Award: BSW

Overview

Social work promotes human well-being by advocating for individuals, families, groups, and communities and providing avenues to improve financial and social status and interpersonal relationships.

Social workers practice in a wide range of service areas providing a variety of services, as the following description illustrates. They work with families in economic distress, offering help with basic needs such as food and housing. They work with persons with physical and mental disabilities and with older adults, providing care management connecting these clients to resources in the community that promote their ability to live independently. They investigate allegations of child abuse and neglect and provide counseling to families to correct these problems. They work with children in foster care, helping them adjust to new families and schools. They work with people with substance use problems, helping them find ways to recover from addiction and to become productive members of their communities. In all of these settings, social workers use the knowledge and skills acquired in undergraduate education for social work.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

Successful social workers are problem-solvers who like working with people and who are flexible, resourceful and tenacious. The helping process is rarely linear. Social workers must be willing to change their ideas to accommodate clients' experiences, aspirations, and goals. They need to understand the community where they are employed in order to make the best use of available resources.

Career

Social workers are employed in both the public and private social service sectors. Social workers work in community-based agencies that provide resources to meet basic human needs. They work with people facing difficult life situations, such as homelessness and domestic violence in shelters. They provide counseling and case management services for people with mental health problems in community mental health centers, psychiatric hospitals, residential treatment centers, corrections,and family service agencies. They work with people experiencing disability and health problems in hospitals, long-term care facilities, clinics, and agencies established to promote community living. They provide support to children and their families in schools and agencies serving youth. In the child welfare field, they are employed by adoption, foster care and family preservation agencies, and protective service agencies dealing with neglect and abuse of children. Other social workers work on policy and program development in government agencies. They may advocate on behalf of causes and communities in a variety of voluntary agencies.

Social Work: Online (BSW) Curriculum

Advising

The University of Cincinnati Online (UC Online) has enrollment advisers to help students get started in the Online Bachelor of Social Work program. Additional program staff are available to assist students while in the program and to help students achieve their academic goals.

UC Advantages And Special Opportunities

The Online BSW program is ideal for students who have previous coursework in pre-social work or a similar major. Students can be admitted to the program in fall or spring semester. All class work is online. Students receive support from UC Online advisors and program staff to help them achieve their academic goals. Program faculty and staff work with students to find a qualified field placement in their own communities, where students work alongside a professional social worker in the final two semesters of study.

The Online BSW program is fully accredited by the Council on Social Work Education. The UC BSW degree will be recognized by every master's in social work (MSW) graduate programs in the United States. Students can receive advanced standing credit toward the MSW degree in programs that offer this option.

Graduates of online BSW social work program are qualified to sit for the Bachelor's examination offered by the Association of Social Work Boards and to apply for licensing in states which offer social work licenses to BSW graduates. Licensing requirements are state specific and applicants should check with their state licensing board for specific requirements.

University Partnership Program

Students interested in a career in child welfare have the opportunity to participate in the University Partnership Program. Both BSW juniors and seniors are encouraged to apply to the program that provides specialized coursework, field practicum and individualized mentoring opportunities. Students who gain employment at an Ohio public children services agency upon graduation are eligible for an employment incentive of up to $10,000. Find out more information on the University Partnership Program webpage.

Special Programs

Through a partnership with the College of Education, Criminal Justice, and Human Services at the University of Cincinnati, students in the Online BSW program can gain additional credentials in Substance Abuse Counseling. Through special electives, students will fulfill the educational requirements for the Ohio Chemical Dependency Counseling Assistant Phase 1 (CDCA Phase 1) Exam or a similar exam in their home state. Students should check with their home state's addictions counseling credentialing board for specific requirements.

Admission Requirements

The University of Cincinnati Online BSW program admission requirements are as follows:

Students need a transfer in GPA of at least 2.75.

Students must have a minimum of 25 credit hours in social work, pre-social work, or similar major or associate degree program, including program pre-requisites or their equivalents (speak with an enrollment advisor at 888-628-3334 about transferring your credits).

Students must have completed introductory social work courses prior to beginning the program. If they don't have these courses, you may be eligible to enroll in our free targeted open online course (TOOC)* that provides this introductory information. Students can complete the course during the recruitment window and prior to registering for courses in the Online BSW program.

*The School of Social Work in the College of Allied Health Sciences offers a targeted open online course (TOOC), Introduction to Social Work. This online course allows participants to not only test drive a bachelor-level course but also earn prerequisite semester credit hours toward the UC Online BSW program. The (TOOC) course is free to test with an applicable transfer fee if used toward credit hours.

Program Volunteer Requirements

Applicants without a degree in human services must complete volunteer experience before beginning the placement portion of the social work program. Learn more about the volunteer requirement.

Transferring To UC

Students can transfer into the Online BSW Program from another college or University if they have completed **25 credit hours** and have a minimum **GPA of 2.75**. General education requirements are below.

The general education requirements can be fulfilled at another institution or once enrolled at the University of Cincinnati. If the pre-requisite courses are completed at UC, the student may be admitted to the Online BSW Program under the condition that all pre-requisites be completed in accordance with an agreed upon Plan of Study. Once the student is offered admission and has confirmed, an official credit evaluation will be completed. Please contact an enrollment advisor at 833-556-7600 for a course planning guide.

For more information, visit the Transfer Center within UC Admissions.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Columbus State Community College
- Lorain County Community College
- Sinclair Community College
- Clark State Community College

SW4071	Social Work Field Learning II (C- min)	5
SW4081	Social Work Field Seminar II (C- min)	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Social Work

Duration: **4 Years** Total Credits: **120** Award: **BSW**

Overview

The University of Cincinnati Bachelor of Social Work (BSW) program will challenge you to look inside to learn about yourself and then to look outside to find ways to be of service in the world.

Social workers practice in a wide range of service areas providing a variety of services, as the following description illustrates. They work with families in economic distress, offering help with basic needs such as food and housing. They work with persons with physical and mental disabilities and with older adults, providing care management connecting these clients to resources in the community that promote their ability to live independently. They investigate allegations of child abuse and neglect and provide counseling to families to correct these problems. They work with children in foster care, helping them adjust to new families and schools. They work with people with substance use problems, helping them find ways to recover from addiction and to become productive members of their communities. In all of these settings, social workers use the knowledge and skills acquired in undergraduate education for social work.

As a first-year student in UC's undergraduate Social Work program, you will start your educational journey as a member of the social work learning community, learning about the profession as well as completing general education requirements. Introductory courses in social work allow for the study of social problems and to experience social work through opportunities for service learning in the community.

The required courses for the social work degree begin in the junior year. You will begin to acquire the knowledge and skills necessary for the achievement of the core competencies for generalist social work practice as defined by the Council on Social Work Education. In the senior year, you will have a year-long, two days per week field placement in a local social service agency, practicing the skills you have learned under the supervision of a professional social worker.

The School of Social Work has affiliations with over 200 social service agencies in the greater Cincinnati area, providing a wealth of options for field learning. Senior-year coursework and seminars allow you to connect the theories you have studied to what you experience in the field as you reflect on your developing professional self. Unique to UC is the two-term research sequence; you will learn basic research methods and then design and carry out a research project in your field agency.

At the end of your UC education, you will be prepared for entry-level, generalist social work practice, which means that you will have the knowledge and skills needed to work with individuals, families, groups, communities, and organizations in a variety of settings and can become licensed as a social worker in the state of Ohio after passing your licensing exam.

You will also have the foundation education necessary for graduate study in social work. You may be admitted to the accelerated, one-year Master of Social Work program at UC or similar programs around the country.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Social workers work with individuals across the lifespan and are employed in both the public and private social service sectors. They work with people facing difficult life situations, such as homelessness, domestic violence, addiction, foster care, and the neglect and abuse of children. Other social workers are advocates for the community, working on policy and program development in government agencies.

Social Workers typically work in:

- Mental health clinics
- Schools
- Hospitals
- Corrections agencies
- Nursing homes
- Community development-based organizations

- Residential treatment centers
- Child welfare agencies
- Private practice

The following are required core courses and are offered on a rotating schedule.

Course	Title/Desc	Credit
SW3042	Mental Health Perspectives in Social Work (C- min)	3
SW3051	Human Diversity and Generalist Social Work Practice (C- min)	3
SW3031	Social Welfare Policy (C- min)	3
SW4050	Generalist Social Work Practice with Communities and Organizations (C- min)	3
SW3052	Generalist Social Work Practice With Groups (C- min)	3
SACN1000	Introduction to Substance Abuse Counseling (D min)	3
SACN2000	Basic Pharmacology (D min)	3
SACN2011	Drugs and Behavior (D min)	3
	Field Orientation	0
SACN2021	Assessment and Diagnosis in Substance Abuse Counseling (D min)	3

Fourth Year Semester 5: Capstone I

Students must successfully complete all required courses and be in good academic standing (earned a grade of a C- or better and maintain a cumulative GPA of 2.75 or greater).

Course	Title/Desc	Credit
SW4060	Social Work Research I (C- min)	3
SW4070	Social Work Field Learning I (C- min)	5
SW4080	Social Work Field Seminar I (C- min)	1

Fourth Year Semester 6: Capstone II

Students must successfully complete all required courses and be in good academic standing (earned a grade of a C- or better and maintain a cumulative GPA of 2.75 or greater). Capstone I is a prerequisite to Capstone II.

Course	Title/Desc	Credit
SW4061	Social Work Research II (C- min)	3
SW4051	Generalist Social Work Practice with Individuals and Families (C- min)	3
SW4071	Social Work Field Learning II (C- min)	5
SW4081	Social Work Field Seminar II (C- min)	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Speech-Language Pathology

Online

Duration: 2 Years Total Credits: 72 - 78 Award: MA

Overview

The University of Cincinnati offers one of the few top-ranked programs that provides an online Master of Arts Degree in Speech-Language Pathology. While the academic courses are delivered online, the program requires an in-person clinical practicum starting in the third semester. This practicum involves hands-on experience in live settings, beginning part-time and gradually increasing to full-time during the final year of the program.

The MA Online program involves the in-depth study of the various disorders of communication coupled with practicum experience. Students at the Master of Arts level are expected to acquire those skills which would enable them to identify and manage a full range of speech/language, swallowing, and hearing disorders. The Online MA Program is a collaboration with The University of Akron; therefore students admitted to UC will complete academic courses through both UC and Akron.

Graduates are required to acquire specific skills and knowledge according to the Council on Academic Accreditation in Speech-Language Pathology (Distance Education) in order to be certified by the American Speech-Language and Hearing Association and to be eligible for licensure in the State of Ohio (for speech-language pathology) and Ohio Department of Education (school) licensure. As such, you will complete course work in the areas of Language and Literacy, Phonology, Aphasia, Motor Speech, Dysphagia, Cognition, Voice, Craniofacial Anomalies, Stuttering, Augmentative and Alternative Communication, and Management of Children with Hearing Impairment.

Part-Time Curriculum

The MA Online program contains 3 years (8 semesters) of part-time study. This allows you the flexibility of maintaining employment during the first half of your program. Starting in the third semester, the program includes in-person clinical practicum components that begin as part-time and gradually increase to full-time during the final year of the program.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

The MA Online program prepares graduates for a career as a speech-language pathologist.

Speech-language pathologists (SLPs) evaluate, diagnose and treat people with speech, language, or swallowing difficulties. They work with many types of patients, including stroke victims who are relearning to communicate, babies who have trouble swallowing, people who speak with a stutter, and children with language delays.

Graduates find careers working with patients across the lifespan in a variety of locations:

- hospitals
- rehabilitation and long-term care facilities
- speech and hearing clinics
- schools
- educational programs
- the armed services
- private practice
- governmental health agencies

Speech-Language Pathology

TTI

Duration: 2 Years Total Credits: 72 - 78 Award: MA

Overview

The Master of Arts in Speech-Language Pathology Testing and Training International (TTI) program is a full-time, online learning program for Orthodox Jewish learners that leads to a master's degree in speech-language pathology. Qualified applicants must have either an undergraduate degree in communication sciences disorders or the required undergraduate prerequisite courses.

Program Requirement

Students must be a part of the SLP Testing and Training International program in order to be admitted to this program.

TTI is an academic consulting firm with the mission to provide higher education opportunities for Orthodox Jewish learners. In collaboration with TTI, UC's TTI online graduate program allows students to adhere to the religious and cultural traditions of the Orthodox Jewish community while obtaining a graduate degree in Speech-Language Pathology. Due to the sensitive cultural considerations that the program offers to students, all students admitted to this specific program must be affiliated with the TTI academic consulting firm.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

The MA in Speech-Language Pathology program prepares graduates for a career as a speech-language pathologist.

Speech-Language Pathology

Duration: **2 Years** Total Credits: **72 - 78** Award: **MA**

Overview

The top-ranked University of Cincinnati Master of Arts in Speech-Language Pathology program provides you with unique education and research opportunities along your path to becoming a speech-language pathologist.

The program involves the in-depth study of the various disorders of communication coupled with practicum experience. Students at the Master of Arts level are expected to acquire those skills which would enable them to identify and manage a full range of speech/language and hearing disorders.

Graduates are required to acquire specific skills and knowledge according to the Council on Academic Accreditation in Speech-Language Pathology in order to be certified by the American Speech-Language and Hearing Association and to be eligible for licensure in the State of Ohio in (for speech-language pathology) and Ohio Department of Education (school) licensure. As such, you will complete course work in the areas of Language and Literacy, Phonology, Aphasia, Motor Speech, Dysphagia, Cognition, Voice, Craniofacial Anomalies, Stuttering, Augmentative and Alternative Communication, and Management of Children with Hearing Impairment.

In order to provide you with adequate advanced didactic and practicum experience with persons manifesting communication disorders, a minimum of two years of study is necessary, including two summer terms. If you do not possess a well-rounded undergraduate major in Speech and Hearing, or come from another field, you must complete undergraduate requirements prior to beginning the graduate program.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). Required Hours = 13; Possible = 15

Required Coursework
All students must enroll in all listed classes.

Course	Title/Desc	Credit
CSD7033	Neurogenic Cognitive Disorders (C min)	3
CSD7013	Autism and Other Developmental Disabilities (C min)	3
CSD7077	School Issues and Procedures (C min)	3
CSD7034	Neurogenic Speech Disorders (C min)	3

1st Year Clinical Practicum

Course	Title/Desc	Credit
CSD7051	Clinical Practicum in Speech/Language Pathology (C min)	1

Electives* (see options under Summer Year 2)
Students may take 1 elective in the 1st Summer, with permission from the Program Director. Some 2nd year placements require an elective typically offered in Year 2. Students who meet program competency and professionalism standards in Year 1 are encouraged to seek-out these opportunities

Fall Semester Year 2

Required Hours = 11; Possible = 11

Required Coursework
All students must enroll in all listed classes.

Course	Title/Desc	Credit
CSD7015	Stuttering, Cluttering, & Typical Disfluency (C min)	3
CSD7046	Research Application Methods (C min)	3

2nd Year Clinical Practicum
All students must register for either: Medical Placement (7052) or School Placement (7053), depending on each student's unique placement.

Course	Title/Desc	Credit

Spring Semester Year 2

Required Hours = 10; Possible = 10

Required Coursework
All students must enroll in all listed classes.

Course	Title/Desc	Credit
CSD8094	Clinical Capstone in Speech-Language Pathology (C min)	2

2nd Year Clinical Practicum
All students must register for either: Medical Placement (7052) or School Placement (7053), depending on each student's unique placement.

Course	Title/Desc	Credit

Summer Semester Year 2

Required Hours = 10; Possible = 12

Required Coursework
All students must enroll in all listed classes.

Course	Title/Desc	Credit
CSD7009	Management of Individuals with Hearing Loss (C min)	3
CSD7030	Culturally Responsive Service Delivery in Speech-Language Pathology (C min)	3

Course	Title/Desc	Credit
CSD7052	Internship in Speech/Language Pathology (C min)	5
CSD7053	School Practicum in Speech-Language Pathology (C min)	5

Course	Title/Desc	Credit
CSD7052	Internship in Speech/Language Pathology (C min)	6
CSD7053	School Practicum in Speech-Language Pathology (C min)	6

Elective Options

Students must enroll in only ONE of the following electives.

Course	Title/Desc	Credit
CSD7073	Literacy for SLPs (C min)	2
CSD7036	Pediatric Dysphagia (C min)	2
CSD8032	Advanced Seminar in Acquired Cognitive-Linguistic Disorders (C min)	2

2nd Year Clinical Practicum

Enrollment is Program Dependent (permission required): Medical Placement (7052); Requests for a second summer placement must be made in by April 1st of Year 1 and are not guaranteed unless required for enrichment options. Credit is variable, 2-4, depending on part or full time placement.

Course	Title/Desc	Credit
CSD7052	Internship in Speech/Language Pathology (C min)	2 - 4

Elective Options*

Students will enroll in 0-2 electives this semester. The number of electives depends on the clinical placement a student is in. A full time placement = 0 electives, part time placement = 1 elective, no placement = 2 electives. Students may take an extra elective with permission.

Course	Title/Desc	Credit
CSD7039	Communication and Swallowing Related to Head and Neck Cancer (C min)	2
CSD7040	Craniofacial Anomalies (C min)	2
CSD7041	Early Intervention for Children with Communication Disorders (C min)	2
CSD7038	Advanced Augmentative & Alternative Communication (C min)	2
CSD8033	Advanced Seminar in Voice & Motor Speech Disorders (C min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Course	Title/Desc	Credit
CSD7012	Language Disorders in Later Childhood (C min)	3

Students will take an equivalent course at University at Akron to fulfill this requirement. Students should reference their curriculum guide and consult Akron advisor for course registration.

Course	Title/Desc	Credit
CSD8051C	Advanced Neurological Basis of Communication Disorders (C min)	3
CSD7024	Clinical Processes in CSD (C min)	3

Fall Semester 1

Required Hours = 7 (all taken at UC)

Course	Title/Desc	Credit
CSD7010	Speech Sound Disorders (C min)	3
CSD7032	Neurogenic Language Disorders (C min)	3
CSD7051	Clinical Practicum in Speech/Language Pathology (C min)	1

Spring Semester 2

Required Hours = 8 (5 taken at UC, 3 taken at Akron)

Required Courses taken at UC

Course	Title/Desc	Credit
CSD7035	Dysphagia (C min)	3
CSD7051	Clinical Practicum in Speech/Language Pathology (C min)	1
CSD7045	Dysphagia Assessment Simulation (C min)	1

Students will take an equivalent course at University at Akron to fulfill this requirement. Students should reference their curriculum guide and consult Akron advisor for course registration.

Course	Title/Desc	Credit
CSD7033	Neurogenic Cognitive Disorders (C min)	3

Summer Semester 2

Required Hours = 8 (5 taken at UC, 3 taken at Akron)

Course	Title/Desc	Credit
CSD7034	Neurogenic Speech Disorders (C min)	3
CSD7051	Clinical Practicum in Speech/Language Pathology (C min)	2

Students will take an equivalent course at University at Akron to fulfill this requirement. Students should reference their curriculum guide and consult Akron advisor for course registration.

Course	Title/Desc	Credit
CSD7037	Augmentative and Alternative Communication (C min)	3

Fall Semester 2

Required Hours = 8 (5 taken at UC, 3 taken at Akron)

Course	Title/Desc	Credit
CSD7051	Clinical Practicum in Speech/Language Pathology (C min)	2
CSD7014	Voice Disorders (C min)	3

Students will take an equivalent course at University at Akron to fulfill this requirement. Students should reference their curriculum guide and consult Akron advisor for course registration.

Course	Title/Desc	Credit
CSD7077	School Issues and Procedures (C min)	3

Spring Semester Year 3

Required Hours = 8 (2 taken at UC, 6 taken at Akron)

Course	Title/Desc	Credit

Summer Semester Year 3

Required Hours = 9 (All taken at UC)

Course	Title/Desc	Credit

Course	Title/Desc	Credit
CSD7051	Clinical Practicum in Speech/Language Pathology (C min)	2

Students will take an equivalent course at University at Akron to fulfill this requirement. Students should reference their curriculum guide and consult Akron advisor for course registration.

Course	Title/Desc	Credit
CSD7015	Stuttering, Cluttering, & Typical Disfluency (C min)	3
CSD7009	Management of Individuals with Hearing Loss (C min)	3

Course	Title/Desc	Credit
CSD7051	Clinical Practicum in Speech/Language Pathology (C min)	2
CSD7030	Culturally Responsive Service Delivery in Speech-Language Pathology (C min)	3
CSD7046	Research Application Methods (C min)	3
CSD8094	Clinical Capstone in Speech-Language Pathology (C min)	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Speech-Language Pathology

TTI

Duration: 2 Years Total Credits: 72 - 78 Award: MA

Overview

The Master of Arts in Speech-Language Pathology Testing and Training International (TTI) program is a full-time, online learning program for Orthodox Jewish learners that leads to a master's degree in speech-language pathology. Qualified applicants must have either an undergraduate degree in communication sciences disorders or the required undergraduate prerequisite courses.

Program Requirement

Students must be a part of the SLP Testing and Training International program in order to be admitted to this program.

TTI is an academic consulting firm with the mission to provide higher education opportunities for Orthodox Jewish learners. In collaboration with TTI, UC's TTI online graduate program allows students to adhere to the religious and cultural traditions of the Orthodox Jewish community while obtaining a graduate degree in Speech-Language Pathology. Due to the sensitive cultural considerations that the program offers to students, all students admitted to this specific program must be affiliated with the TTI academic consulting firm.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

The MA in Speech-Language Pathology program prepares graduates for a career as a speech-language pathologist.

Speech-language pathologists (SLPs) evaluate, diagnose and treat people with speech, language, or swallowing difficulties. They work with many types of patients, including stroke victims who are relearning to communicate, babies who have trouble swallowing, people who speak with a stutter, and children with language delays.

Graduates find careers working with patients across the lifespan in a variety of locations:

- hospitals
- rehabilitation and long-term care facilities
- speech and hearing clinics
- schools
- educational programs
- the armed services
- private practice
- governmental health agencies

MA Speech Lgnguage Pathology TTI 2025 Updated

Admission Requirements

Please see the program's Admission Requirements for detailed information on what you need in order to be a successful applicant.

Application Deadlines

Students must be a part of the TTI program in order to be admitted to this University of Cincinnati graduate program. Students applying to the TTI Online Program must submit preliminary application materials to TTI. The first step is to contact TTI through Malki Lesser at cdcs2001@yahoo.com. All information about the application process will be provided by TTI.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Master of Arts (M.A.) education program in speech-language pathology (distance education) at the University of Cincinnati is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Health Administration-Executive

Online

Duration: 2 Years Total Credits: 40 Award: MHA

Overview

Mission Statement:

The mission of the University of Cincinnati's innovative on-line Master of Health Administration (MHA) Degree Program is to provide working professionals who might not have ready access to traditional educational routes with a high-quality experiential and practice oriented curriculum in healthcare management, preparing them to serve as innovative, transformative, ethical healthcare leaders within teams, organizations and health systems.

We offer a competency-driven, evidence-based curriculum which, by including both academics and practitioners as faculty, is adaptive to the ever-changing healthcare environment encouraging lifelong learning. Our on-line approach is designed both to expand access and to allow mid-level and other working health professionals to develop and enhance nationally recognized competencies. Our faculty are committed to discovery, integration, application, and teaching. They create an online learning environment that is research-based and service-oriented, and which assures the best possible educational experience for all students, including individualized learning paths when necessary.

Vision Statement:

The vision of the UC MHA program is to be acknowledged as a national leader in leveraging online educational technology to prepare future leaders for the ever-changing healthcare environment. The faculty have been nationally recognized for published and presented research.

Our graduates will be further proof of our efforts:

- their evaluations will guide us
- their efforts will be recognized by their supervisors, colleagues, patients, and organizations as characterizing curious, competent, and compassionate stewards of the public and institutional trust, and
- their performance will reflect honor upon their alma mater, their employers, and their profession

Values Statement:

The University of Cincinnati's Master of Health Administration (MHA) degree program values a conception of the healthcare leader as a true health professional, rather than soley a manager. In this, we are in strong support of the American College of Healthcare Executives' (ACHE) Code of Ethics, with its focus on the healthcare managers responsibilities to:

- the profession
- patients or others served
- the organization and employees

In our faculty we value:

- a commitment to teaching informed by research and/or practice
- a dedication to service, whether to university, profession, or community
- the understanding that our learners are adults who are working and living full lives while improving their education
- a cooperative, collegial approach that allows for the development and maintenance of an integrated practice-oriented curriculum

Success

The University of Cincinnati Master of Health Administration program has graduates from all over the country. From presidents and vice presidents of hospital systems to chief operating officers, physicians, pharmacists, and nurses, the UC MHA program has over 750 graduates from over 20 states. Our graduates work for the Department of Labor to the Mayo Clinic in Arizona, Stanford Children's Health, to the University of Cincinnati Health System. The UC MHA program is a 100% online, with no residency requirement, allowing our students to attend school while working for some of the largest health care systems in the country.

Program Outcomes

Statistics on our students including graduation and employment rates can be viewed on the UC MHA Program Outcomes page.

Career

According to a 2022 Bureau of Labor Statistics report, health administrators' median salary is $104,830. The job outlook for health administrators is expected to rise by 28% over the next decade. Health administrators work in healthcare facilities, including hospitals, medical practices, nursing homes, and hospital systems. Health administrators prepare and monitor budgets, operating revenue, supervise staff, and ensure the quality improvement of the health system. Some of the careers that health administrators occupy include CEOs and CFOs of hospital systems, clinical managers, health information managers, and nursing home administrators. The majority of UC MHA program graduates work in higher management positions across the United States.

Advising

The University of Cincinnati Master of Health Administration (MHA) program has several advising and mentoring programs to help students as they move through the MHA program. Student success is critical to the success of MHA students. From the time an MHA student is accepted into the program, they are assigned a Student Success Coordinator that helps them with enrollment and course selection. During the first course of the MHA program, students are assigned an academic advisor from the faculty in the UC MHA program. UC MHA students are also given the opportunity to be matched with UC MHA Alumni in a mentoring program. Students are matched with alumni in order to network, provide guidance, and advise you as you go through the program.

Admission Requirements

- Bachelor's degree from a regionally accredited institution
- Official transcripts of all undergraduate and graduate work
- Undergraduate degree with a cumulative GPA of 3.0 (4.0 scale)
- Two letters of recommendation that address the applicant's academic readiness for graduate-level work, work ethic and habits, and the applicant's communication and interpersonal skills
- Resume/CV of personal, professional, and educational background. Applicants are strongly encouraged to highlight their experience in health care.
- Personal statement or brief essay (no more than three pages double-spaced) answering the following prompts:
    - What are your academic goals?
    - How will earning your MHA help you reach your professional goals?
    - How will you balance work and your online program?
    - What is your motivation for earning your MHA?
- At least two years of work experience in a healthcare setting is preferred. Students transitioning from undergraduate healthcare degrees are encouraged to highlight their experience through internships/practicums. Please highlight work experience within the resume and personal statement.
- Complete the University of Cincinnati online graduate application
- International applicants must have a minimum TOEFL (Test of English as a Foreign Language) score of 580 (paper version), 237 (computer), or 93 (Internet), and obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents.
- GRE is not required, but if you have taken the GRE/GMAT and would like to submit your scores, the University's code is 1833

Graduation Requirements

Please see the UC Graduate College Student Handbook.

Health Informatics

Online

Duration: 2 Years Total Credits: 33 Award: MHI

Overview

The University of Cincinnati's Online Master of Health Informatics program is a multifaceted program firmly established at the intersection of information technology and health. Graduates from this program are well prepared to improve patient care, quality, efficiency, safety, and population health using information technology and systems. Integrated into the operations of all modern health care organizations, health informatics practice includes the people, processes, technology, and systems required to acquire, store, retrieve, optimize, and use health information.

Informatics is a natural transition for those in health-oriented occupations including medicine, nursing, dentistry, pharmacy, public health, occupational therapy, and medical research. It is also a good fit for those in or looking to enter tech-savvy and technology-focused occupations related to information systems. Some professions that could thrive in the realm of health informatics include systems analysts, software developers, data analysts, information scientists, programmers, system administrators, and information security analysts.

Career

Health Informatics is a field with incredible growth potential and career opportunities are expected to expand significantly over the next few years. Pursuing your Master of Health Informatics from UC prepares you for these emerging roles and puts you in a position to seize new opportunities and dramatically increase your earning potential.

Master of Health Informatics Curriculum-Online

UC Advantages And Special Opportunities

- **Accelerated** - Graduate in as little as two years with the part-time option
- **Relevancy** - Focus on alignment with industry trends
- **Balance** - Pursue an education with online didactic courses
- **Opportunity** - Build your career at the intersection of health, data, and technology
- **Experience** - Interact with faculty experienced in health informatics and related disciplines

MHI Program Highlights

- Built around Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) competencies
- Emphasis on data management and analytics, and well-rounded curriculum with project management, leadership, interprofessional collaboration emphasis, team-work, information privacy and security, human factors topics, and workflow analysis.
- Coursework is 100% online
- Low faculty-to-student ratio – personalized coaching and feedback
- Flexible scheduling – designed for busy, working professionals
- No GRE or GMAT required for admission
- No healthcare or IT background or experience required
- Award-winning, well-rounded curriculum with real-world relevance
- Access to UC's expansive healthcare network
- Professional networking opportunities and unique practicum experience
- Affordable tuition with a significant return on investment

HIMSS Approved Education Partner:

The University of Cincinnati's Master of Health Informatics program is proud to be recognized as an Approved Education Partner (AEP) by the Healthcare Information and Management Systems Society (HIMSS).

As a HIMSS Approved Education Partner, UC's MHI program has met HIMSS' rigorous standards for delivering a world-class program. UC joins an exclusive group of educators authorized to offer a HIMSS-approved degree program online.

Special Programs

Health Information Security Certificate

The University of Cincinnati Health Information Security certificate allows you to gain a unique specialization in an area with increasing importance due to electronic health records and federal guidelines that demand greater efficiency in healthcare organizations.

Accelerated Health Informatics Program

The Health Information Management (HIM) + Master of Health Informatics (MHI) Accelerated program is open to eligible students currently enrolled in the Health Information Management bachelor's degree program. This program allows students to earn a bachelor's degree while also fulfilling coursework toward achieving a master's degree in Health Informatics.

IT Accelerated Program

The School of Information Technology (SoIT) has developed a program that offers students the opportunity to earn a Bachelor of Science in Information Technology or Cybersecurity, a Master's degree, and co-ops in an accelerated time frame.

Admission Requirements

- Bachelor's degree from an accredited institution
  - Cumulative GPA of 3.0 (on a 4.0 scale)
- Unofficial transcripts of all undergraduate and graduate coursework (if applicable)
- Two letters of recommendation that address the applicant's academic readiness for graduate-level work, work ethic, and habits, and the applicant's communication and interpersonal skills.
- Resume/CV of personal, professional, and educational background
- Letter of Intent: Two-page (double-spaced) or one-page (single-spaced) narrative summarizing the following:
  - What motivated you to pursue a graduate degree in Health Informatics?
  - Why are you interested in applying to UC's MHI program?
  - What are your short and long-term goals? How will this degree help you attain those goals? Please treat this as a written interview – explain any inconsistencies in your resume, transcripts, etc.
- Complete the University of Cincinnati online graduate application

Fast Track Admission

Automatic admission into the MS of Health Informatics program for students who completed a bachelor's degree from UC within the past five years.

Requirements:

- Cumulative GPA of 3.0 or above (for courses completed at UC)
- Earned 4-year undergraduate degree from UC
- Must complete the Online Graduate Application and select the "fast-track" option
- Students who meet the above requirements will be automatically admitted to the program

---

MHI Accelerated and Certificate Programs

Health Information Security Certificate

The University of Cincinnati Health Information Security certificate allows you to gain a unique specialization in an area with increasing importance due to electronic health records and federal guidelines that demand greater efficiency in healthcare organizations.

Accelerated Health Informatics Program

The Health Information Management (HIM) + Master of Health Informatics (MHI) Accelerated program is open to eligible students currently enrolled in the Health Information Management bachelor's degree program. This program allows students to earn a bachelor's degree while also fulfilling coursework toward achieving a master's degree in Health Informatics.

IT Accelerated Program

The School of Information Technology (SoIT) has developed a program that offers students the opportunity to earn a Bachelor of Science in Information Technology or Cybersecurity, a Master's degree, and co-ops in an accelerated time frame.

Transferring To UC

Transfer Policy

If you are considering transferring courses to the MHI graduate program, please review the transfer credit policy.

International Student Requirements

Transcripts for a degree received outside the U.S. must be evaluated by a member of the NACES organization of transcript evaluators.

Program can be completed from abroad (no student visa for distance learning).

Minimum score requirements for the following:

- Duolingo: 110
- PTE: 54
- TOEFL: 80
- IELTS: 6.5

Graduation Requirements

Completion of the 33 program credits including 6 hours of practicum.

A 3.0 GPA is required to graduate.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
University of Cincinnati's Master of Health Informatics (MHI) program is CAHIIM accredited and the first accredited MHI program in the state of Ohio.

The Health Informatics accreditor of University of Cincinnati is the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The College's accreditation for the Master degree in Health Informatics has been reaffirmed through 2029. All inquiries about the program's accreditation status should be directed by mail to CAHIIM, 200 East Randolph Street, Suite 5100, Chicago, IL, 60601; by phone at (312) 235-3255; or by email at info@cahiim.org.

The University of Cincinnati (UC) and all regional campuses are accredited through the Higher Learning Commission (HLC).

Medical Laboratory Science Leadership

Online

Duration: 2 Years Total Credits: 30 Award: MS

Overview

The Master of Medical Laboratory Science Leadership (MMLSL) is a 100% online laboratory leadership program that includes applications of advanced knowledge applicable across the entire laboratory. Students are provided with an opportunity to select a concentration in one of three areas. In addition to the complex core, the program includes integrative knowledge on the implementation of molecular diagnostics into all core laboratory areas, specialized integrative and translational medical diagnostics, educational applications specific to laboratory science and accreditation standards, or laboratory administration that focuses on human and financial resources along with the laboratory regulatory requirements.

The curriculum is designed to prepare advanced practitioners as well as leaders in the health care profession and in higher education. The Medical Laboratory Science Leadership program includes didactic and empiric learning in the core areas of advanced immunology, method development, evidenced-based practice, interprofessional collaboration, molecular diagnostics, quality management, laboratory science education, and laboratory administration. All students are required to have two years minimum of professional practice in medical laboratory science, and be currently employed within the profession. This provides the basis for integration of their past and current professional experiences into the discussions and personal reflection necessary in a successful leadership program and in support of the capstone project.

Career

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Medical Laboratory Science Leadership

UC Advantages And Special Opportunities

You can focus and excel in the career that is right for you when choosing 1 of 3 concentration options:

- Medical Lab Science Advanced Practice,
- Higher Education, or
- Health Administration.

The program consists of 6 medical lab science core classes, 1 capstone course, and 1 set of concentration courses.

Admission Requirements

- Complete the online UC application and pay application fee
- Unofficial transcripts from all college or universities attended uploaded to the application system
  - Shows a minimum baccalaureate degree: Must be from an accredited college or university
  - UC defines unofficial transcripts as copies (or translations) of transcripts provided by students to the university. Official transcripts are sent in sealed envelopes directly to UC from the student's attended universities.
    - If you are admitted and confirm that you accept the admission, you will then submit official transcripts directly to the Graduate School at UC. Further direction will be sent to you after admission. Official transcripts should not be sent to the Graduate School until you are accepted and have completed your online enrollment form included with your acceptance letter.
- Active Medical Laboratory Science credential for all certified laboratory professionals.
  - Upload an active (non-expired) copy of your MLS credential from ASCP, AMT, AABB or equivalent.
- CV/Resume
  - Upload your CV/Resume demonstrating a minimum of 2 years of professional practice in medical laboratory science or 5 years for applicants not holding current clinical certification.
- Two letters of recommendation
- Personal statement
- Provide a statement of your academic and professional goals

Transferring To UC

Students who have earned graduate credits from accredited institutions may be eligible to apply some or all of those credits towards their pursuit of the Master of Medical Laboratory Science Leadership degree, provided they are from an accredited institution. Please contact the program for specifics about the policy.

International Student Requirements

Transcripts for a Degree Program received outside the U.S. must be evaluated by a credible credential evaluation organization such as WES.

Because this is an online program, students abroad will not need visas, and will complete the program remotely.

Graduation Requirements

Completion of the 30 program credits including 3 hours of Capstone. A 3.0 GPA is required to graduate.

Application Deadlines

For application deadlines please visit our program page.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Nutrition Sciences

Clinical Nutrition

Duration: 2 Years Total Credits: 37 Award: MS

Overview

The University of Cincinnati Master of Science (MS) in Nutrition Sciences – Clinical Nutrition concentration was designed exclusively for students wanting to obtain the registered dietitian nutritionist (RDN) credential.

To qualify for the Clinical Nutrition concentration, you must either:

- be a student in the Accelerated Dietitian Nutritionist program or
- have a baccalaureate degree and a verification statement for completion of the Didactic Program in Dietetics (DPD) requirements of a nutrition and dietetics education program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

The MS in Nutrition Sciences – Clinical Nutrition concentration contains graduate coursework integrated with supervised practice experience (equivalent to the dietetic internship). At the completion of this program, students will be eligible to take the Commission on Dietetic Registration national credentialing exam for RDNs.

Don't have a DPD verification? Our Didactic Program in Dietetics certificate contains everything you need to obtain the necessary coursework.

Do you already have the RDN credential? Our Master of Science in Nutrition Sciences is our traditional graduate program that allows you to earn advanced nutrition knowledge, research training, and complete a thesis or capstone project. Research involvement is often one-way RDNs get promoted in professional practice.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Registered Dietitian Nutritionist professionals work in various settings such as hospitals, private practice settings, eating disorder centers, with athletes, long-term care facilities, schools, supermarkets, academia, research, health departments, businesses, food companies, health clubs, and many other areas.

Beginning in 2024 to practice as a RDN, you must complete the DPD courses, obtain a master's degree, complete 1000 hours of a supervised practice internship, and pass the Commission on Dietetic Registration credentialing exam for RDNs. The RDN credential enables an individual to perform nutrition risk assessments and prescribe medical nutrition therapy to treat or prevent diseases such as diabetes, cardiovascular disease, gastrointestinal disease, renal disease, etc. Dietitians also work with healthy clients who have specialized dietary needs, such as athletes, vegetarians, pregnant women, and children who are fussy eaters.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Nutrition Sciences

Duration: **2 Years** Total Credits: **37** Award: **MS**

Overview

The University of Cincinnati Master of Science in Nutrition Sciences is designed for students who have completed a baccalaureate degree in nutrition or other science-related discipline (health sciences, chemistry, biology, psychology, and others) and wish to earn credentials to practice nutrition and/or wish to gain further knowledge in nutrition. The program is also open to practicing dietitians, nurses, physicians, or other health professionals seeking to enhance their knowledge and credentials.

The goal of the Master of Science (MS) in Nutrition Sciences program is to prepare you to make significant contributions to the field of nutrition in professional research, practice, teaching, and leadership. To fulfill this goal, the program provides you with:

- a comprehensive knowledge of the biochemical and physiological aspects of human nutrition;
- knowledge of methodologies used in basic nutrition research, nutrition assessment, and nutrition intervention;
- skills in research design, implementation, evaluation, and interpretation.

Thesis or Capstone Option

The culminating experience of the MS in Nutrition Sciences program is the Thesis or Capstone project, which allows you to apply knowledge and skills learned from coursework in the design of your own research project. You have flexibility in how you fulfill this research requirement. Visit the Thesis Vs. Non-Thesis webpage to learn more.

Are you interested in becoming a Registered Dietitian Nutritionist (RDN)?

You can do this in two ways:

Complete the MS in Nutrition Sciences - Clinical Nutrition concentration

If you have completed your baccalaureate degree and have a verification statement for completion of the Didactic Program in Dietetics (DPD) requirements from a program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND®), you are eligible to apply to the MS in Nutrition Sciences - Clinical Nutrition concentration. This track includes graduate coursework integrated with the supervised practice experience (the equivalent of a dietetic internship). Students who complete this program would be eligible to take the national credentialing examination for RDNs.

Complete the MS in Nutrition Sciences + complete a traditional dietetic internship

Students enrolled in the MS in Nutrition Sciences program can work with their graduate advisor to determine entry into the Certificate of Didactic Program in Dietetics (DPD). This certificate allows you to complete the necessary coursework to become an RDN.

After completing the MS in Nutrition Sciences and Didactic Program in Dietetics, you will need to complete a traditional dietetic internship to be eligible to sit for the national credentialing examination for RDNs. These internships range in hourly experience from 1000 to 1200 hours and are typically 6 months to 1 year unpaid. Learn more on the Academy of Nutrition & Dietetics' directory of traditional dietetic internships.

Career

When you graduate you can work in a variety of settings including community nutrition agencies, worksite wellness programs, school nutrition programs, emergency food organizations, food industry, international nutrition organizations, media/marketing nutrition, and academic and research institutions. You may use the degree toward further graduate work at the doctoral level or pursuit of the registered dietitian credential.

Curriculum

The flexible nature of the program allows you to complete the program full-time or part-time. Depending on your needs, you can finish the program in 2 - 5 years.

Master of Nutrition Sciences (thesis)
Master of Nutrition Sciences (non-thesis)
Example of Schedule for Master of Nutrition Sciences (non-thesis) - 1.5 year plan

Advising

Upon confirmation as a student of UC, you will be assigned a graduate faculty advisor who will guide your coursework selection and serve as your project or thesis advisor and committee chair.

Admission Requirements

View detailed information on how you can be a successful applicant to the MS in Nutrition Sciences on the Admission Requirements page.

Transferring To UC

Admitted students transferring from another graduate program may seek Advanced Standing Credit for coursework that is similar to graduate courses in the MS in Nutrition Sciences program. Students must submit an official request for this to be approved by both the Graduate Program Director and the Graduate School.

Application Deadlines

Visit the How to Apply page to find information on application deadlines, fees, where to send your materials, and more.

Respiratory Therapy

Online

Duration: 2 Years Total Credits: 30 Award: MS

Overview

The Master of Science in Respiratory Therapy is designed to educate respiratory therapists with a bachelor's degree with increased knowledge and preparation to facilitate their transition into educator and/or managerial roles.

Program Goals

The goal of the Master of Science in Respiratory Therapy Program is to provide graduates of entry into respiratory care professional practice degree programs with additional knowledge, skills, and attributes in leadership, management, education, and research that will enable them to meet their current professional goals and prepare them for practice as advanced degree respiratory therapists. To that end, program coursework and experiences emphasize the competencies required of respiratory therapists to serve as leaders and educators in accordance with the standards of ethics and professionalism outlined by The American Association for Respiratory Care.

The program is designed for working adults who need to maintain employment while furthering their education. Students take 2 courses per semester for 5 semesters and have the ability to select one of three available concentrations that will focus on the career advancement that is right for them.

Career

The respiratory therapy industry is always growing and this degree is becoming as important as ever. Respiratory therapists are needed in intensive care units, emergency transport vehicles, labs, outreach agencies, and more. Learn more about the success and possibilities for respiratory therapists on our careers page.

Curriculum

Upon successful completion of the Master of Science in Respiratory Therapy program, students will be able to:

1. Employ evidence-based disease management protocols in case studies and simulated patients to develop appropriate treatment plans for the management of patients with chronic obstructive lung disease (including asthma, chronic bronchitis, bronchiectasis, and emphysema).

2. Synthesize leadership theories and models to improve leadership effectiveness in the healthcare and higher education environments through the interpretation and development of pro forma and strategic plans for educational or health care business units.

3. Create a research or quality assurance project proposal, collect, and analyze data, and defend evidenced-based research related to process improvement within health informatics, health care administration, or education environments.

4. Integrate specific engagement strategies designed to improve competence working with different populations into respiratory therapy, health informatics, health care administration, or education practice

Curriculum Guide Versions:
Master of Science in Respiratory Therapy-2025

Advising

For advising, information, questions or concerns, please contact the Program Director, Nancy Colletti (College of Allied Health Sciences).

UC Advantages And Special Opportunities

The Master's in Respiratory Therapy degree at University of Cincinnati Online is unique because you can choose 1 of 3 concentration options: Health Informatics, Higher Education or Health Administration, so you can focus and excel on the career that is right for you. The program consists of 6 respiratory core classes, 1 capstone course, and 1 set of concentration courses.

Admission Requirements

Students interested in applying to the online Master's of Respiratory Therapy must:

- Complete the online UC application and pay application fee
- Unofficial transcripts from all college or universities attended
  - Shows a minimum baccalaureate degree: Must be from an accredited college or university
  - Unofficial transcripts must be uploaded to the application system.
  - UC defines unofficial transcripts as copies (or translations) of transcripts provided by students to the university. Official transcripts are sent in sealed envelopes directly to UC from the student's attended universities.
    - If you are admitted and confirm that you accept the admission, you will then submit official transcripts directly to the Graduate School at UC. Further direction will be sent to you after admission. Official transcripts should not be sent to the Graduate School until you are accepted and have completed your online enrollment form included with your acceptance letter.
- Active Registered Respiratory Therapist credential
  - Upload an active (non-expired) copy of your RRT credential from the NBRC
- Active state license
  - Upload an active (non-expired) copy of your state license
- CV/Resume
  - Upload your CV/Resume demonstrating a minimum of 2 years of professional respiratory therapy experience
- Personal statement
- Provide a statement of your academic and professional goals

Transferring To UC

Students who have earned graduate credits from accredited institutions may be eligible to apply some or all of those credits towards their pursuit of the Master of Respiratory Therapy, provided they are from an accredited institution. Please contact the program for specifics about the policy.

Changing Majors Within UC

We will accept transfers from other UC majors as long as they meet the criteria for admission into this program.

International Student Requirements

Transcripts for a Degree Program received outside the U.S. must be evaluated by a credible credential evaluation organization such as WES.

Because this is an online program, students abroad will not need visas, and will complete the program remotely.

Graduation Requirements

Completion of the 30 program credits including 3 hours of Capstone. A 3.0 GPA is required to graduate.

Application Deadlines

For application deadlines please visit our program page.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Respiratory Therapy, 520015, Master of Science, University of Cincinnati, is currently in the process of seeking Commission on Accreditation for Respiratory Care (CoARC) accreditation for the Master of Science graduate respiratory care program. However, UC can provide no assurance that accreditation will be granted by the CoARC. Commission on Accreditation for Respiratory Care http://www.coarc.com/

Respiratory Therapy : Online

MS

Master of Science in Respiratory Therapy-2025

Duration: 2 Years

★Minimum Credits: 30 Credits

Core Requirements

Core Requirements

Students must complete all core requirements before entering Capstone.

Course	Title/Desc	Credit
RSTH6050	Respiratory Therapists as Disease Management Specialists (C min)	3
RSTH6075	Leadership Theory for Healthcare (C min)	3
RSTH7010	Respiratory Therapists in Higher Education (C min)	3
RSTH7020	Leadership in Respiratory Therapy (C min)	3
RSTH7030	Quality Improvement in the Delivery of Respiratory Care (C min)	3
RSTH7040	Evidenced Based Practice in Respiratory Care Research (C min)	3

Concentration Courses

Select 9 credit hours of a single concentration to fulfill the concentration requirement.

Health Informatics Concentration Courses

Course	Title/Desc	Credit
HI7001	The Healthcare and Public Health Landscape (C min)	3
HI7010	Health Informatics, Information Systems and Technology (C min)	3
HI7020	Vocabularies, Terminology, Knowledge Discovery and Related Health IT Standards (C min)	3
HI7040	Workflow Process Analysis, System Development, Human Factors and Usability (C min)	2
HI7060	Leadership and Strategic Management in Health Settings (C min)	2
RSTH7099	Guided Study (C min)	1 - 3

Health Administration Concentration Courses

Course	Title/Desc	Credit
HCA7001	Health Systems Management 1: Organization & Delivery (C min)	3
HCA7002	Health Systems Management 2: Principles of Leadership (C min)	3
HCA7031	Health Policy 1: Health Policy & Regulation (C min)	3
HCA7032	Health Policy 2: Legal & Ethical Issues (C min)	3
HPE7002	Culture, Equity, and Vulnerable Population Health (C min)	3
HPE7040	Social and Behavioral Foundations of Public Health (C min)	3

Education Concentration Courses

Choose 3 courses

Course	Title/Desc	Credit

Capstone

Capstone Course

Course	Title/Desc	Credit
RSTH7050	Capstone (C min)	3

Course	Title/Desc	Credit
IDT7100	Designing Online Assessments for Data-Driven Decisions (C min)	3
IDT7130	Applications and Issues of Teaching with Technology (C min)	3
IDT7160	Multimedia Studio (C min)	3
EDLD7060	Overview of the American Community College (C min)	3
EDLD8062	Educational Equity and Diversity in Higher Education (C min)	3
CI7080	Curriculum Development & Evaluation in Medical Education (C min)	3
CI7081	Attitude Formation and Change in Medical Education (C min)	3
CI7082	Human and Adult Learning in Medical Education (C min)	3
CI7083	Application of Instructional Design and Technology in Medical Education (C min)	3
HPE6024	Health and Wellness Coaching (C min)	3
HPE6026	Stress Reduction (C min)	3
HPE7002	Culture, Equity, and Vulnerable Population Health (C min)	3
HPE7010	Wellness and Chronic Disease (C min)	3
HPE7014	Grant Writing and Resource Development (C min)	3
HPE7040	Social and Behavioral Foundations of Public Health (C min)	3
SPED7052	Universal Design for Learning (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Athletic Training

Duration: **2 Years** Total Credits: **30 - 63** Award: **MSAT**

Overview

The University of Cincinnati Master of Science in Athletic Training (MSAT) program prepares you for a fast-paced and exciting career as an athletic trainer (AT). This degree is the entry level professional degree and meets the eligibility requirements for both the national professional examination administered by the Board of Certification (BOC) for Athletic Trainers and the state licensure exam necessary for practice.

The program provides students with:

- knowledge in the biomechanical/pathomechanical aspects of human movement and the physiological/pathophysiological aspects of injury and healing;
- knowledge and training in methodologies used in the evaluation, management, treatment, referral, and rehabilitation of people who have suffered an injury or illness;
- training in the skills necessary to recognize and reduce the risks associated with physical activity and sport;
- training in the skills required to manage the day-to-day operations of a sports medicine/athletic training practice;
- and basic skills in research design, implementation, evaluation, and interpretation.

This is a professional program of study that is guided by the Accreditation Standards for Athletic Training Education. Courses will be completed over two years of full-time study (six consecutive semesters). Included in the curriculum are intentionally designed interprofessional classroom, co-curricular and clinical experiences. Each semester the clinical experiences progress in complexity and with increasingly autonomous patient care and client-care experiences consistent with your level of training. These clinical experiences are with our nationally and regionally renowned clinical affiliates.

A variety of student backgrounds brings valuable experiences and perspectives to the program. As such, the program welcomes application from students with a bachelor's degree in any area of study as long as they meet program pre-requisites. The most applicable degrees, however, are those in Health Sciences, Exercise Science, Kinesiology, or other areas based in the natural sciences and human movement.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Students who graduate from the Master of Science in Athletic Training program enter into a career as an athletic trainer.

Athletic Trainers generally work in:

- Educational settings: universities and colleges, high schools, private offices and clinics
- Professional sports teams
- Hospitals
- Fitness centers
- Physicians' offices
- Performing arts medicine
- Military and tactical medicine
- Industrial medicine
- Health and wellness centers and more

The structure of the program as a Master of Science may also be useful for students who choose to pursue further graduate study at the doctoral level.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Social Work

Accelerated

Duration: 2 Years Total Credits: 44 - 60 Award: MSW

Overview

The University of Cincinnati Master of Social Work (MSW) program prepares you for a career in advanced social work practice. The program is designed to promote the integration of learning in the classroom with learning in a field practicum in an agency setting.

When you graduate with a Master of Social Work from the UC School of Social Work, you can expect to be prepared for advanced social work practice with individuals, families, groups, communities, and organizations and can become a licensed social worker in the state of Ohio after passing your licensing exam. Some students also choose to pursue a PhD at one of many universities across the country.

The Master of Social Work Accelerated program is a summer start program that can be completed in just one year.

Our Master of Social Work program has alternative part-time and full-time program options.

The University of Cincinnati MSW program incorporates a thoughtful blend of on-campus and online coursework, giving you the best of both worlds in a hybrid learning environment.

The direct practice concentration is designed to provide you with the knowledge and skills needed for specialized practice.

You may specialize in three areas of study:

- children & families
- health & aging
- mental health.

Your curriculum and field placements will be tailored to fit your area of interest and through these specialized areas, you will learn to use evidence-based interventions to assist individuals, families, and groups to make changes, solve problems, and become empowered.

Field Education

Field education is incorporated throughout the curriculum, giving you real-world experience in one of our 200+ social service agency partners.

Throughout the program, you will be assigned to an agency for 14 to 17 hours per week to work under the supervision of a qualified field instructor, a social worker employed at that agency.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Social workers practice in many settings, working with people and communities to find solutions to problems. Fields where social workers provide direct service to individuals, families, and groups include:

- Children and family services in child protective services, foster care agencies, adoptions, schools, and counseling agencies.
- Health services in hospitals, clinics, rehabilitation centers, and nursing homes.
- Mental health and substance use services in treatment, case management agencies, and private practice.
- Aging service in home care agencies and senior living communities.

- Legal services in correctional facilities, treatment agencies, and mediation services.

Other social workers work with community members to improve conditions in their area. Still others work in leadership roles in social service organizations.

Master of Social Work- 1 year Accelerated Full-Time

Admission Requirements

Visit the Admission Requirements to get information on what you need to apply.

Transferring To UC

One third (1/3) of the minimum credits needed to earn the UC MSW degree may be transfer credits. To receive transfer credits, you must have:

- Completed those courses within 5 years of being admitted to the MSW Program
- Earned a B grade or better in each class.

Application Deadlines

Review application deadlines and application instructions on the How to Apply page.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Master of Social Work (MSW) program is fully accredited by the Council on Social Work Education (CSWE).

Direct Practice/Advanced Practice I Course

Students will take one advanced practice I course in this group pertaining to their concentration: Mental Health, Health & Aging, or Children & Families.

Course	Title/Desc	Credit
SW8041	Advanced Practice with Children and Families I (C min)	3
SW8051	Advanced Practice in Health and Aging I (C min)	3
SW8061	Advanced Practice in Mental Health I: Major Mental Illness (C min)	3

Direct Practice/Advanced Practice II Course

Students will take one advanced practice II course from this group pertaining to their concentration: Mental Health, Health & Aging, or Children & Families.

Course	Title/Desc	Credit
SW8042	Advanced Practice with Children and Families II (C min)	3
SW8052	Advanced Practice in Health and Aging II (C min)	3
SW8062	Advanced Practice in Mental Health II (C min)	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Social Work

Accelerated

Duration: 2 Years Total Credits: 44 - 60 Award: MSW

Overview

The University of Cincinnati Master of Social Work (MSW) program prepares you for a career in advanced social work practice. The program is designed to promote the integration of learning in the classroom with learning in a field practicum in an agency setting.

When you graduate with a Master of Social Work from the UC School of Social Work, you can expect to be prepared for advanced social work practice with individuals, families, groups, communities, and organizations and can become a licensed social worker in the state of Ohio after passing your licensing exam. Some students also choose to pursue a PhD at one of many universities across the country.

The Master of Social Work Accelerated program is a summer start program that can be completed in just one year.

Our Master of Social Work program has alternative part-time and full-time program options.

The University of Cincinnati MSW program incorporates a thoughtful blend of on-campus and online coursework, giving you the best of both worlds in a hybrid learning environment.

The direct practice concentration is designed to provide you with the knowledge and skills needed for specialized practice.

You may specialize in three areas of study:

- children & families
- health & aging
- mental health.

Your curriculum and field placements will be tailored to fit your area of interest and through these specialized areas, you will learn to use evidence-based interventions to assist individuals, families, and groups to make changes, solve problems, and become empowered.

Field Education

Field education is incorporated throughout the curriculum, giving you real-world experience in one of our 200+ social service agency partners.

Throughout the program, you will be assigned to an agency for 14 to 17 hours per week to work under the supervision of a qualified field instructor, a social worker employed at that agency.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Social workers practice in many settings, working with people and communities to find solutions to problems. Fields where social workers provide direct service to individuals, families, and groups include:

- Children and family services in child protective services, foster care agencies, adoptions, schools, and counseling agencies.
- Health services in hospitals, clinics, rehabilitation centers, and nursing homes.
- Mental health and substance use services in treatment, case management agencies, and private practice.
- Aging service in home care agencies and senior living communities.

- Legal services in correctional facilities, treatment agencies, and mediation services.

Other social workers work with community members to improve conditions in their area. Still others work in leadership roles in social service organizations.

Curriculum Guide Versions:
Master of Social Work- 1 year Accelerated Full-Time

Admission Requirements

Visit the Admission Requirements to get information on what you need to apply.

Transferring To UC

One third (1/3) of the minimum credits needed to earn the UC MSW degree may be transfer credits. To receive transfer credits, you must have:

- Completed those courses within 5 years of being admitted to the MSW Program
- Earned a B grade or better in each class.

Application Deadlines

Review application deadlines and application instructions on the How to Apply page.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Master of Social Work (MSW) program is fully accredited by the Council on Social Work Education (CSWE).

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Audiology

Duration: **3 Years** Award: **AUD**

Overview

The top-ranked University of Cincinnati Doctor of Audiology graduate program will prepare you for an exciting career as an audiologist. The program involves in-depth study of the disorders of hearing and balance, coupled with practicum experiences in the areas of study. In order to provide the doctoral-level student with adequate advanced didactic and practicum experience with persons manifesting hearing and balance disorders including a capstone project, nine consecutive semesters of study are necessary, which includes summer terms and a one-year full-time final year clinical externship.

Audiology students complete course work across the professional scope of practice including anatomy and physiology, hearing and balance assessment, hearing aids, implantable hearing devices, and habilitative audiology in order to prepare them to evaluate patients of all ages and provide appropriate management.

Doctor of Audiology students are eligible for certification from the American Board of Audiology and state licensing in audiology. They also can meet eligibility for the ASHA certificate of Clinical Competence in Audiology, state certification as an educational audiologist and certification in animal audiology upon completion of the program.

Our on-site Speech & Hearing clinic and international service opportunities provide students with invaluable experiences while at UC. Additionally, students with an interest can pursue the animal audiology certificate with the FETCHLAB, the only site in the world to provide hearing aids to animals.

Finish Your Degree Faster

The Doctor of Audiology (AuD) program has converted to an accelerated 3-year (9 semester), full-time doctoral program. A summer program start will allow you to enter your final externship year on the typical national cycle while ensuring you receive didactic coursework across the entire scope of practice. This unique curriculum opportunity is one of very few in the country and was designed to allow you to graduate sooner and decrease your final tuition.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

UC's clinical doctorate in Audiology prepares graduates for a career as an audiologist. A doctoral degree is necessary for professional certification and licensure as an audiologist. Graduates find careers working with patients across the lifespan in a variety of settings:

- private practice
- hospitals
- physicians' offices
- speech and hearing clinics
- schools
- educational programs
- the armed services
- governmental health agencies

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Clinical Laboratory Science

Online

Duration: 3 Years Award: DCLS

Overview

The Doctorate of Clinical Laboratory Science (DCLS) is an advanced practice degree for practicing, professionally certified, medical laboratory scientists who are interested in increasing practical and theoretical knowledge of clinical laboratory science, advancing in the profession, and positively impacting the current healthcare system through interprofessional collaboration with other members of the healthcare team.

The DCLS will provide the depth of knowledge and training required to provide real-time clinical decision support thereby mitigating the challenges to improved patient outcomes associated with laboratory testing.

The DCLS will interpret complex testing panels, address appropriate clinical utility, and correlate test results with patient's symptomology to provide real-time clinical decision support. The DCLS will serve as a consistent resource for the patient and members of the healthcare team. By providing these consultations, the DCLS will enable meaningful use, appropriate utilization management, and provide interpretation leading to better patient care and safety while also lowering cost and increasing reimbursement.

DCLS graduates will be prepared to act as consultants to healthcare providers, serve as laboratory directors, educate patients and healthcare providers, perform, and disseminate research on evidence base practice and test utilization, and enter academic faculty positions.

Career

A Doctorate of Clinical Laboratory Science degree is designed to expand on the knowledge and skills beyond the bachelor's and master's levels. Professionals with this qualification can seek opportunities within **Higher Education**, **Technical Laboratory Roles**, and **Diagnostic Management**.

With this degree, you can qualify to become an advanced practice medical laboratory scientist to serve as a **High Complexity Laboratory Director (HCLD)** as defined by the Clinical Laboratory Improvement Amendments of 1988 (CLIA). These professionals oversee quality assurance for complex laboratory environments and help to verify that testing and general laboratory operations are being completed well.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
DCLS Major Map Final

Admission Requirements

Applicants will be required to submit the following:

- Transcripts of undergraduate and graduate course work
- A current curriculum vitae or resume (demonstrates laboratory experience)
- A statement of purpose (less than 1000 words) describing professional interests, career aspirations and clinical practice experience
- Three (3) letters of recommendation from individuals who have the knowledge to evaluate the applicant's academic and professional performance (two letters from professional supervisors/pathologists/laboratory manager and one letter from a college professor).

Admission to the DCLS Program will require the following:

- A bachelors and/or graduate degree in medical laboratory science or a related field or equivalent

- Generalist certification as a Medical Laboratory Scientist/Medical Technologist (ASCP, ASCPi, AMT or equivalent); must provide current certificate
- At least a B average (3.0/4.0 system) in all college work, or other evidence of promise that is judged satisfactory by the program
- Two years of full-time clinical, industry or research experience in medical laboratory science or equivalent; must provide written documentation from a direct supervisor or manager for verification upon program acceptance.
- Evidence of strong written and verbal communication skills, organization, problem solving, creative thinking and determination
- Students will be required to complete an impromptu writing sample as part of the virtual interview process

Upon Admission students will be required to complete the following:

- Students will be required to participate in a 2-week mandatory orientation, prior to the start of the first semester of the DCLS Program

Prior to Clinical Residency (Third Semester)

- Completion of a background check prior to clinical experience (s); as required by the University or clinical residency site. Students will be responsible for associated fees or costs.
- Provide immunization records, consistent with the clinical affiliate/residency and university requirements
- Provide a signed letter of support from clinical residence site(s) including a clinical facility fact sheet that identifies a primary contact for the completion of the clinical affiliation/residency agreement, and a qualified preceptor.

Transferring To UC

Doctoral students with a prior master's degree may petition their program to allow up to 30 transfer credits from the master's degree towards their doctoral degree.

International Student Requirements

An application to University of Cincinnati, including evidence of English language proficiency if applicable. Minimums for this program are:

- TOEFL ibt: 100
- IELTS: 7.0
- Duolingo: 120

Graduation Requirements

Student must successfully complete 81 credit hours with a 3.0 GPA to graduate.

Application Deadlines

February 1st for each fall semester.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
This program is currently applying for accreditation by the National Accrediting Agency for Clinical Laboratory Science (NAACLS), 5600 N. River Rd, Suite 720 Rosemont IL 60018-5119.

Physical Therapy

Duration: **3 Years** Award: **DPT**

Overview

The top-ranked University of Cincinnati Doctor of Physical Therapy (DPT) program graduates students with a DPT degree while also preparing each student for licensure and practice within the field of physical therapy.

Physical Therapists are movement experts who optimize quality of life through prescribed exercise, hands-on care, and patient education.

The program's well-rounded curriculum is designed to prepare graduates who will be effective practitioners of physical therapy in a wide variety of clinical settings. The program incorporates traditional coursework, research, and clinical experiences. Courses may involve lectures, active lab demonstrations, course-related field trips, and observations at off-campus sites.

Graduates of the program consistently exceed national averages on board exam pass rates.

Our clinical and research opportunities, state-of-the-art facilities, and location in Cincinnati's medical hub all add to the value of a degree from this program.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

The DPT program prepares graduates for a career as a physical therapist.

Physical therapists are allied health professionals that promote optimal health and function through the application of scientific principles to prevent, identify, assess, correct or alleviate acute or prolonged dysfunctions. Once you graduate from a DPT program, pass the board exam, and meet any state laws and exams that are required, you are eligible to work as a licensed Physical Therapist.

Graduates of our program find careers working with patients across the lifespan in a variety of locations including:

- Outpatient clinics
- Hospitals
- Private offices
- Home health care
- Nursing homes

Physical therapists provide care to people of all ages who have functional problems, including but not limited to:

- Cardiovascular & Pulmonary Conditions (heart attack, cystic fibrosis, bypass surgery)
- Integumentary Conditions (wounds, burns)
- Neurological Conditions (cerebral palsy, multiple sclerosis, spinal cord injury, stroke)
- Orthopedic Conditions (sprains, fractures, sports injuries, amputations, back and neck pain).
- The Surgeon General recently urged physicians to battle against opioid addiction. Physical therapy is recommended as a first-line approach.

Curriculum

8-Term Curriculum

The University of Cincinnati DPT program will transition from a 9-term to an 8-term curriculum starting with the entering class of Summer 2023.

An 8-term curriculum will allow you to graduate and enter the workforce faster - saving you both money and time.

This decision was made after thoughtful discussions with faculty, best practice reviews, benchmarking against peer PT programs, and forecasting future workforce needs. We have developed a curricular model that maintains the comprehensive, successful curriculum we are proud of while balancing rising student debt concerns and ensuring the student, graduate, and program outcomes that the UC DPT program has enjoyed since its inception continue well into the future.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Doctor of Physical Therapy Curriculum - Summer 2023

Advising

Upon entry into the program, students are assigned a faculty advisor.

Admission Requirements

Please visit our Admission Requirements page for detailed information about the admissions process.

No GRE required

The University of Cincinnati Doctor of Physical Therapy program no longer requires the GRE starting with the entering class of Summer 2023.

Early Admission Opportunities

The DPT program offers two early admission opportunities to qualified students. High school seniors entering the UC Bachelor of Health Sciences – Pre-Physical Therapy program may apply to the High School Early Assurance Pathway. UC juniors may apply to the Junior Early Assurance Pathway. Students who maintain minimum requirements for these programs have a spot reserved in the DPT program when they graduate.

Application Deadlines

Visit the How to Apply page to find information on application deadlines, where to send your materials, and more.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Doctor of Physical Therapy program at University of Cincinnati is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; telephone (703) 706-3245; email: accreditation@apta.org; website: http://www.capteonline.org. If needing to contact the program/institution directly, please call 513-558-7477 or email physicaltherapy@uc.edu.

Course	Title/Desc	Credit
PT8074	Professional Roles IV: Emergence into the Physical Therapy Profession (B min)	1

Course	Title/Desc	Credit
PT9003	Physical Therapy Practice III	4 - 14

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Occupational Therapy

Duration: **3 Years** Award: **OTD**

Overview

University of Cincinnati's Doctor of Occupational Therapy provides students with the opportunity to earn the highest level of education for an entry-level occupational therapist. The program will allow you to sit for the board licensing exam, and once you pass the board exam, and meet additional requirements set forth by the state in which you seek licensure, you will be eligible to work as a licensed occupational therapist (OT).

The mission of the Occupational Therapy Program at the University of Cincinnati is to educate students to become licensed occupational therapists capable of competently and independently evaluating, treating and/or consulting with clients, groups, and populations in a variety of settings. In addition, it is the mission of the program to educate those who might not have access to traditional forms of higher education through a mix of distance learning technologies and face-to- face instruction. The program strives for excellence in teaching, service, scholarly activity, and leadership while supporting the professional growth of faculty and students, instilling a commitment to lifelong learning, and responding to the needs of the region that it serves.

This intensive program is designed to prepare students for all areas of OT practice including pediatrics, rehabilitation, gerontology, mental health, and more. UC's OTD program has partnerships with over 150 fieldwork sites including Cincinnati Children's Hospital, UC Health, Veterans Medical Center, TriHealth, and more.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

Review pass rates on the NBCOT certification examination by state and program level.

Career

The OTD program prepares graduates for a career as an OT. OT's provide preventative and rehabilitation services to individuals of all ages in areas related to successful and satisfying physical, sensory, psychological, social, cognitive, and behavioral performance in meaningful activities (occupations).

Graduates find careers working with patients across the lifespan in a variety of locations:

- hospitals
- rehabilitation and long-term care facilities
- outpatient clinics
- nursing facilities
- community based programs
- mental health facilities

It is projected that the number of job opportunities will be particularly higher in hospital, skilled nursing, and community settings as the number of elderly needing occupational therapy is expected to rise in proportion to the increase of the elderly population.

Curriculum

The University of Cincinnati OTD program is a blended educational model that combines online and in-person learning activities. Students meet for a full day of in-person courses one day per week to participate in on-campus lab sessions and experiential community learning activities in addition to online instruction. The approximate ratio for educational content delivery is 60% on-campus and 40% online for the semesters 1, 2, 3, 4, 7, and 9 of the nine semester program. Semesters 5 and 6 involve semester long full-time clinical internships under the supervision of a licensed OT. Semester 8 involves on-site completion of the doctoral capstone at the student's assigned location.

Curriculum Guide Versions:
Doctorate of Occupational Therapy curriculum 2024

Admission Requirements

Please visit our Admission Requirements page for detailed information about the application process.

Early Admission Opportunities

The OTD program offers two early admission opportunities to qualified students. High school seniors entering the UC Bachelor of Health Sciences – Pre-Occupational Therapy program may apply to the High School Early Assurance Pathway. UC juniors may apply to the Junior Early Assurance Pathway. Students who maintain minimum requirements for these programs have a spot reserved in the OTD program when they graduate.

Application Deadlines

Visit the How to Apply page to find information on application deadlines, how to send your materials, and more.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The entry-level occupational therapy doctoral degree program at the University of Cincinnati has applied for accreditation and has been granted Preaccreditation Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 7501 Wisconsin Avenue, Suite 510E, Bethesda, MD 20814. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org. The program must complete an on-site evaluation and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Students must complete all program requirements, including coursework, 24 weeks of Level II fieldwork, and an individual 14-week capstone experience within 5 years of beginning the program. The doctoral capstone experience must be started after completion of all foundational coursework, Level II fieldwork, and preparatory activities defined in 2018 ACOTE OTD Standard D.1.3.

Communication Science & Disorders

Duration: 3 Years Award: PHD

Overview

The University of Cincinnati Doctor of Philosophy (PhD) in Communication Sciences and Disorders allows students to specialize in audiology, speech-language pathology, or speech, language, and hearing science.

The PhD level of study emphasizes preparation for careers in college-level teaching, research and professional service.

PhD students are expected to complete course work in a major area of focus and to demonstrate, through a dissertation, contribution to knowledge in the areas of speech, language and hearing science, speech language pathology, or audiology. Students must also complete coursework in pedagogical techniques, supervision and lab management, and grant-writing and are expected to engage in mentored teaching experiences.

Students have the opportunity to interact with doctoral-level faculty in Communication Sciences & Disorders, faculty in other departments and adjunct faculty in the community, who provide expertise and research mentoring in a wide variety of scientific and clinical aspects of communication sciences and disorders.

During the program, students will create an individualized plan of study in consultation with an advisor and academic committee. This plan will constitute a road map for acquisition of expertise in the major area of focus as well as additional research and pedagogical skills.

Career

There is currently significant demand in higher education for teachers and researchers with PhD-level expertise in speech-language pathology, audiology, and speech, language and hearing science. Although our central mission is to prepare graduates for careers in teaching and research, employment opportunities also abound in health care and educational administration and other research settings.

Health and Rehabilitation Sciences

Duration: **4 Years** Award: **PHD**

Overview

The University of Cincinnati Ph.D. in Health and Rehabilitation Sciences is a research-intensive program designed to prepare students for research and teaching careers in fields related to athletic training, nutrition, occupational therapy, physical therapy, and movement science. The program will expand the knowledge and skills of clinically trained professionals and other students who seek doctoral research training by providing rigorous instruction in research methods, data analysis and advanced disciplinary content, intensive research mentoring, and additional preparation for future faculty roles, culminating in an original research dissertation. Graduates will be prepared to lead independent research operations in order to be qualified for faculty positions in education programs, research institutes, and research-oriented governmental or clinical settings.

Flexible Program Options

UC's Ph.D. in Health and Rehabilitation Sciences uses a hybrid curriculum, giving you the opportunity to engage in most courses either in-person or online. You can also choose from a part-time or full-time program option, allowing you to tailor your time to completion to fit your needs. The flexible nature of this program can allow students who are also clinicians to maintain some level of clinical activity through parts of the program.

Career

The focus of the Ph.D. program in Health and Rehabilitation Sciences is to prepare students for future faculty research and teaching roles while advancing the science of health and rehabilitation.

Graduates are employed at colleges and universities, hospitals, research facilities, government agencies, and more.

Accreditation bodies for many clinical training programs require that a minimum proportion of faculty have terminal degrees like a Ph.D. Thus, graduates are expected to be highly competitive for these positions. This Ph.D. program will also help students obtain valuable skills in research design, planning, implementation, analysis, and dissemination.

Curriculum

Total Graduate Credit Hours Required

Students without a prior master's degree or clinical doctorate: **90 credits**
Students with a prior master's degree or clinical doctorate: **60 credits**

Clinical Doctorate in Speech-Language Pathology

Online

Duration: 2 Years Award: SLPD

Overview

The University of Cincinnati's Clinical Doctorate in Speech-Language Pathology is a new program launching in 2026 that will prepare students for leadership opportunities and advanced clinical practice experiences. Our unique Speech-Language Pathology Doctorate (SLPD) program gives students the opportunity to complete and apply research, often clinical in nature, in a way that improves their professional and clinical practice and advances the field of speech-language pathology. This part-time fully online doctoral program will provide students with the chance to engage with other practicing clinicians and renowned faculty from the University of Cincinnati and beyond to further their professional and clinical expertise and develop their ability to mentor and lead others in their focus area. Students will gain knowledge and skills in critical thinking, clinical problem solving, application and interpretation of research, and develop their understanding and skillsets related to clinical education, teaching, supervision, and mentorship. Each student will select one of two tracks (healthcare or education) to further concentrate their learning and leadership preparation for their respective setting.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

UC's Clinical Doctorate in Speech-Language Pathology supports the career advancement of practicing SLPs through this unique 2-year part-time online program. Graduates of SLP-D programs continue practicing and have reported career advancement and leadership opportunities across a range of opportunities including but not limited to:

- educational programs including higher education
- speech and hearing clinics
- hospitals
- private practice
- schools
- governmental health agencies
- physician's offices

Advanced Medical Imaging Technology

Magnetic Resonance Imaging

Duration: 1 Year Total Credits: 32 - 41 Award: Certificate

Overview

The Advanced Medical Imaging Technology (AMIT) Magnetic Resonance Imaging (MRI) certificate program provides an avenue for post associate (baccalaureate preferred) students who are unable to pursue a second baccalaureate or an advanced degree.

Magnetic resonance imaging (MRI) is a technique that uses a magnetic field and radio waves to create detailed images of the organs and tissues within your body. These techniques are used to diagnosis disease and analyze human anatomy.

The program is 12 consecutive months in duration. Through a combination of classroom, online learning, and clinical instruction, students will be taught the specific skills needed for entry-level positions in MRI. You may also choose to study the second modality (Nuclear Medicine Technology) for an additional 12 month curriculum.

Upon completion of the professional curriculum, certificate students are eligible to sit for national board exams, a necessity in nearly all health care fields. It is our goal to supply you with the necessary level of training and experience to adequately prepare for these examinations.

For additional program details including program outcomes, the program's mission and vision, and more please visit the Magnetic Resonance Imaging (MRI) program page.

Career

Advanced Medical Imaging Technology program graduates are employed in hospitals, medical centers, outpatient clinics, and research facilities. Advancement in this field may involve promotion to supervisory and administrative positions, equipment and pharmaceutical sales, product support, and teaching.

Most full-time MRI Technologists work about 40 hours a week. They may, however, have evening, weekend or on-call hours. Opportunities for part-time and shift work also are available.

Special Programs

Distance Learning for AMIT Bachelor's Degree & Certificate Students

The AMIT program is fully accredited by federal, state and the Nuclear Medicine Technology JRCNMT accreditation for distance learning (DL) education. Program specific accreditation for Magnetic Resonance Imaging (MRI) is currently pending accreditation via the JRCERT accreditation. DL is granted for students on a case-by-case basis. It is generally reserved for students who attend clinicals greater than 60 miles from the University of Cincinnati main campus. Students may request DL privileges due to DL preference, accident or illness. Use in this scenario is at the discretion of the appropriate program director and clinical coordinator.

We are limited to DL regions within approximately 90-minute drive of the UC main campus per state authorization. Currently our distance learning opportunities include:

- Columbus, Ohio (limited placement)
- Lexington, Kentucky
- Louisville, Kentucky

Please contact the AMIT Program directly if you are interested in these opportunities: AdvMedImaging@ucmail.uc.edu

Admission Requirements

Visit the Admissions Information page to learn more about the requirements, prerequisites, deadlines and more.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outlined for certificate program students. Transfer students must still complete all program requirements and go through the admissions process.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

MRI Accreditation

The magnetic resonance program is accredited by the:

Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive
Suite 2850
Chicago, IL
60606-3182
Phone: 312-704-5300
Email: mail@jrcert.org

The program's current award is 5 years. General program accreditation information and the current accreditation award letter can be found here: https://www.jrcert.org/programs/university-of-cincinnati/.

The Joint Review Committee on Education Radiologic Technology (JRCERT) monitors performance measures of programs and makes this information available to the public. Successful completion of a JRCERT-accredited program assures you that you will be provided with the knowledge, skills, and professional values required for career success.

Developmental Disabilities

Duration: **2 Years** Total Credits: **12** Award: **Certificate**

Overview

The University of Cincinnati (UC) Undergraduate Certificate in Developmental Disabilities is designed to provide students from social work, allied health, nursing, medicine, political science, psychology, sociology, counseling, criminal justice, and other disciplines with the knowledge and skills to work with persons with developmental disabilities in a variety of social, healthcare, and educational settings. Students will explore and understand theories, programs, policies, interventions, and services related to this population.

The Certificate in Developmental Disabilities is a collaboration between the UC School of Social Work and the UC Center for Excellence in Developmental Disabilities (UCCEDD). The UCCEDD is a partnership program between the University of Cincinnati and Cincinnati Children's Hospital Medical Center (CCHMC). The certificate is in response to the rapidly growing disability field in Ohio and the U.S. which has led to high employer demand. It can be combined with other UC undergraduate degrees.

Career

Students will increase their competitiveness for positions in organizations that work for and with individuals with developmental disabilities, including healthcare providers, home-based services, education providers, recreation agencies, and other private and public sector organizations.

Didactic Program in Dietetics

Duration: **3 Years** Total Credits: **91** Award: **Certificate**

Overview

The on-campus University of Cincinnati Didactic Program in Dietetics (DPD) Certificate Program is designed for students who are interested in becoming a Registered Dietitian Nutritionist (RDN) but have not yet completed all required coursework. In order to be eligible, you must have completed at least a baccalaureate degree prior to entering the DPD Certificate Program. The DPD Certificate Program provides you with the coursework requirements necessary to apply for an accredited post-baccalaureate dietetic internship and ultimately become an RDN. These coursework requirements are set forth by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics.

Upon completion of the DPD Certificate, you will earn a DPD Verification Statement confirming your eligibility to enter an accredited dietetic internship. After completing a dietetic internship, you are required to pass the Commission on Dietetic Registration credentialing exam for RDNs. Most states also require certification or licensure in order to practice as an RDN.

Program Length

The DPD Certificate Program requires completion of 91 semester credit hours and can be pursued either full-time or part-time. The DPD Certificate is an on-campus program with some courses that have online options. Applicable courses from previous undergraduate and graduate degrees can be transferred into the program to reduce the number of credit hours required.

Students enrolled in the MS in Nutrition Program at UC will have completed many of the DPD Certificate courses upon graduation from the MS in Nutrition; these courses will all be applied toward the DPD Certificate requirements.

If you receive transfer credit for the majority of the science and general education requirements from previous degrees and/or have completed the MS in Nutrition at UC, you can generally complete the certificate program in approximately one year if you take classes full-time.

If you enter the program with minimal transfer credit for the science and general education requirements, you may need three years to complete the certificate program if you take classes full-time. If you take classes part-time, the time to completion will be longer.

Additional Information

The DPD Certificate includes the same Mission & Goals, Program Outcomes, and Program Costs as the BS in Nutrition and Dietetics.

- Mission & Goals
- Program Outcomes & Links
- Program Costs.

Career

Dietetics professionals work in a variety of settings such as hospitals, long-term care facilities, schools, supermarkets, private practice settings, eating disorder centers, with athletes, academia, research, health departments, business corporations, health clubs, and many other areas.

If you are interested in becoming a Registered Dietitian Nutritionist (RDN), you must complete the didactic coursework in dietetics (DPD Certificate Program), an accredited dietetic internship, and pass the Commission on Dietetic Registration credentialing exam for RDNs. This credential enables the RDN to perform nutrition risk assessments and prescribe medical nutrition therapy to remediate or prevent disease.

Medical Laboratory Science

Duration: **1.5 Years** Total Credits: **49** Award: **Certificate**

Overview

The University of Cincinnati Medical Laboratory Science certificate is designed for students who have already earned a bachelor's degree in a science discipline or who will complete one prior to starting the program who are interested in becoming a medical laboratory scientist. The program consists of medical laboratory science courses and clinical rotations required for NAACLS-accredited* Medical Laboratory Science (MLS) programs.

Graduates of the NAACLS* accredited MLS program are prepared for the Board of Certification (BOC) exam sponsored by the American Society for Clinical Pathology (ASCP) for the Medical Laboratory, MLS (ASCP) credential.

Medical laboratory scientists are allied health professionals who participate in patient care by performing laboratory procedures that assist in the prevention, diagnosis and treatment of diseases. The analysis performed by medical laboratory scientists include chemistry, microbiology, hematology, immunology, toxicology, blood banking and molecular procedures. Laboratory scientists perform manual and automated procedures and utilize laboratory information computer systems to analyze and transmit patient data. Medical laboratory scientists are also responsible for the quality control and quality assurance procedures in the laboratory.

The education of a medical laboratory scientist combines a curriculum common to most undergraduate majors in the medical field with a clinical program designed to produce individuals who possess a high level of technical proficiency.

Certificate students complete the clinical (fourth) year of the Bachelor of Science - Medical Laboratory Science (BS - MLS) curriculum. The clinical year starts only in the fall, lasting for three full-time semesters or as a part time or co-op option, both of which require two years to complete. Students apply in the fall preceding the intended starting fall semester.

Students take courses delivered in different formats: online, demonstration, traditional classroom lecture, collaborative learning and in laboratory settings. They gain technical proficiency and professional experience from clinical rotations in laboratories and blood banks. Locations and schedules vary depending on the corresponding content.

The most recent program outcomes can be found on the Program Outcomes page.

Career

Medical laboratory scientists work both independently and with a team in in a variety of settings, including:

- Hospital laboratories
- Independent laboratories
- Clinics and physicians' offices
- Research and development laboratories
- Public/government health agencies
- Forensics laboratories
- Pharmaceutical companies.

Regardless of the setting, clinical laboratory scientists consistently work in a challenging, fast paced and collegial environment.

Most jobs for medical laboratory scientists require a bachelor's degree and certification. To be eligible to sit for a board of certification exam, most credentialing organizations require completion of an MLS program accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). Advanced certification is available in each laboratory area for those who choose to pursue a higher level of training, education and experience. Graduate training in one of the laboratory disciplines will allow individuals to advance to supervisory positions and intermediate level research positions

Due to the high demand for Medical Laboratory Scientist professionals, virtually all of our graduates are employed and generally choose from several entry-level technologist positions.

Nuclear Medicine Technology

Duration: **1 Year** Total Credits: **32 - 41** Award: **Certificate**

Overview

The Advanced Medical Imaging Technology (AMIT) Nuclear Medicine Technology certificate program provides an avenue for post-associate (baccalaureate preferred) students who are unable to pursue a second baccalaureate or an advanced degree.

Nuclear medicine technology is a branch of medicine that deals with the use of radioactive substances in research, diagnosis, and treatment.

The program is 12 consecutive months in duration. Through a combination of classroom, online learning, and clinical instruction, students will be taught the specific skills needed for entry-level positions in Nuclear Medicine Technology. You may also choose to study the second modality (Magnetic Resonance Imaging) for an additional 12 month curriculum.

Upon successful completion of the professional curriculum, certificate students are eligible to sit for the ARRT nuclear medicine national board exam and the NMTCB national board exam. It is our goal to supply you with the necessary level of training and experience to adequately prepare for both of these examinations.

Mission, Outcomes & Goals

For additional details on the program's mission and goals, please visit the Mission & Vision page.

For additional information on our outcomes, please visit the Program Outcomes & Links page.

Career

Advanced Medical Imaging Technology – Nuclear Medicine Technology program graduates are employed in hospitals, medical centers, outpatient clinics, and research facilities. Advancement in this field may involve promotion to supervisory and administrative positions, equipment and pharmaceutical sales, product support, and teaching.

Most full-time Nuclear Medicine Technologists work about 40 hours a week. They may, however, have evening, weekend or on-call hours. Opportunities for part-time and shift work also are available.

Although Nuclear Medicine Technologists use radiation as part of their occupation, radiation hazards are minimized by the use of shielding and the application of radiation safety practices. All individuals working with radiation are monitored continuously for radiation exposure.

Nutrition Sciences

Duration: 1 Year Total Credits: 18 Award: Minor

Overview

The goal of the Nutrition Minor is to provide students in a variety of majors at the University of Cincinnati with a strong foundation of the basic principles of food and nutrition. To fulfill this goal, the minor will prepare students to be able to:

- explain basic principles of human nutrition;
- make sound decisions about food to enhance overall health;
- recognize the importance of exercise and fitness as it relates to health and wellness; and
- demonstrate familiarity with nutritional issues of various life stages.

The nutrition minor program is designed for students interested in health care or those enrolled in a variety of different undergraduate majors that have fulfilled the prerequisites needed to complete the minor curriculum. Students may find the nutrition minor beneficial for broadening future employment opportunities and for improving their personal nutrition, health, and lifestyle outcomes.

The nutrition minor requires completion of only 18 semester credit hours of coursework. The curriculum also offers flexibility to select electives based on your area of interest. Some courses are offered online and three courses count as UC's general education requirements:

- NUTR 1030: Personal Nutrition (NS)
- NUTR 1040: Food and Culture (SCE)
- NUTR 1050: Eating for Sports Performance (NS)

Career

The Nutrition Minor is designed to benefit those preparing to work in medical and health-related professions. Future physicians, nurses, dental professionals, psychologists, researchers, occupational and physical therapists and others will find that the nutrition minor will enable them to become more effective practitioners. In addition, those who work in corporate wellness, personal training, wellness centers, and fitness facilities will enter the job market with a more well-rounded educational profile that enhances the information and service they provide to their clients.

It is important to note that those obtaining the nutrition minor will not be able to provide one-on-one counseling in nutrition. To provide one-on-one counseling in nutrition, you will need the Registered Dietitian Nutritionist (RDN) credential. For additional information visit the Pathways to the RDN webpage.

Admission Requirements

Admission requirements to declare the minor include:

- Enrollment in a baccalaureate degree program at the University of Cincinnati
- Enrollment in a declared major at the University of Cincinnati
- A minimum University GPA of 3.0

Application Deadlines

Declare Minor

If you are ready to declare Nutrition Sciences as your minor, please view the Declare a Minor instructions.

Declaration of intent for minor programs must be submitted by the following days during the following semesters:

- Fall: July 1st
- Spring: November 1st
- Summer: March 1st

If you are accepted, please confirm your acceptance by the following days during the following semeters:

- Fall: August 1st
- Spring: December 1st
- Summer: April 1st

Accreditation

Nutrition Sciences

Minor

Nutrition Sciences Minor

Duration: 1 Year
★Minimum Credits: 18 Credits

Required Course

NUTR1030 is required for all students completing the minor and is a pre-requisite for upper-level nutrition courses.

Course	Title/Desc	Credit
NUTR1030	Personal Nutrition (C- min)	3

Minor Electives

Students must complete 15 credit hours from the list of electives.

Course	Title/Desc	Credit
HLTH3098	Research Methods in Health Sciences (C- min)	3
NUTR1040	Food and Culture (C- min)	3
NUTR1050	Eating for Sports Performance (C- min)	3
NUTR2010	Nutrition and Exercise (C- min)	3
NUTR2020	Lifecycle Nutrition (C- min)	3
NUTR3020	Advanced Nutrition I (C- min)	3
NUTR3021	Advanced Nutrition II (C- min)	3
NUTR4050	Medical Nutrition Therapy I (C- min)	3
NUTR4051	Medical Nutrition Therapy II (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Speech-Language Hearing Sciences

Duration: 1 Year Total Credits: 18 Award: Minor

Overview

The Speech Language Hearing Sciences minor provides students in a variety of majors at the University of Cincinnati with the opportunity to explore topics related to speech, language, swallowing & hearing disorders. Coursework will provide you with a strong foundation of the basic principles of working with individuals with communication disorders throughout the lifespan.

After completion of the minor, you will be able to:

- Explain basic principles of human communication & communication disorders across the lifespan
- Recognize connections between the discipline of communication disorders and the importance of advocacy for individuals with disabilities.
- Describe the influence of cultural and linguistic background on human communication, speech, language, swallowing, and hearing
- Demonstrate a beginning knowledge for the professions of speech-language pathology & audiology
- Discuss the historical challenges and the need for acceptance and respect of individuals with communication differences throughout the lifespan.

The Speech Language Hearing Sciences minor program is designed for students interested in health care, education, the vocal mechanism, and the sciences. You may find this minor beneficial for broadening future employment opportunities, graduate school, and/or for improving your own communication skills.

Coursework completed as part of this minor can also be used to fulfill some or all prerequisites for graduate studies in audiology, deaf education and speech-language pathology.

Career

The Speech Language Hearing Sciences minor creates an opportunity for you to explore fields and careers in human communication and communication disorders.

Additionally, the major is designed to benefit those preparing to work in medical, educational, and healthcare related professions including healthcare administration. Future physicians, nurses, teachers, special educators, psychologists, researchers, engineers, vocal performers, dieticians, occupational and physical therapists will find that this minor will enable them to become more effective practitioners.

Those who work in government health agencies, wellness centers, universities, and the armed forces will enter the job market with a more well-rounded educational profile that enhances the information and service they provide to individuals.

Curriculum

The minor requires completion of a minimum of 18 semester credit hours of coursework. The curriculum also offers flexibility to select electives based on your area of interest. Courses are offered online, hybrid & in-person.

The first required course counts toward UC's general education requirement:

CSD 1071 – Exploring Communication Disorders through Media & Literature (HU Humanities and Literature)

Speech-Language Hearing Sciences

Minor

Speech Language Hearing Sciences Minor 2025

Duration: 1 Year
★Minimum Credits: 18 Credits

Required Courses for SLHS Minor

All students in SLHS minor will complete the following courses:

6 required credits in the following courses will be completed

Course	Title/Desc	Credit
CSD1071	Exploring Communication Disorders Through Media & Literature (C- min)	3
CSD2010	Anatomy & Physiology of Speech Production, Swallowing and Hearing (C- min)	3

Elective Courses

All students in SLHS minor will complete 12 credits in elective courses

12 credits in any of the listed elective courses will be completed

Course	Title/Desc	Credit
CSD2072	Syntax for Language Assessment and Intervention (C- min)	1
CSD2071	Phonetics & Phonology (C- min)	3
CSD3061	Audiology I: Basic Audiometry, Anatomy & Hearing Disorders (C- min)	3
CSD3062	Audiology II: Aural Rehabilitation & Advanced Testing (C- min)	3
CSD3080	Speech and Language Development (C- min)	3
CSD4012	Neurological Foundations of Communication (C- min)	3
CSD4020	Speech and Hearing Science (C- min)	3
CSD4024	Clinical Processes in CSD (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Animal Audiology

Duration: **2 Years** Total Credits: **12** Award: **Graduate Certificate**

Overview

The University of Cincinnati (UC) offers the opportunity to specialize and train in a unique area through the Animal Audiology certificate program. The program is the only one of its kind and is designed for Audiology students as well as working audiologists.

Currently 80 breeds of dogs experience genetically related deafness with more experiencing deafness due to age and noise exposure. The American Kennel Club advises breeders to have puppies tested by means of a BAER test and registered with the Orthopedic Foundation for Animals. Owners are now routinely asking for hearing testing for older dogs as per their attending veterinarians. This applies to pets, working dogs, and military working dogs. Some veterinary neurologists are capable of performing the Brainstem Auditory Evoked Response (BAER) test, which is used for testing the hearing of animals, but are not specifically trained in advanced detailed diagnostic tests to make diagnostic judgments regarding audiological issues. This is the specific expertise of audiologists.

The following articles show the increase in interest and need for professional animal audiologists:

- Breed specific deafness prevalence in dogs
- BAER Testing sites
- Dalmatian Club of America: A Primer for BEAR Hearing Testing
- K9 Web: Healthcare

UC FETCHLAB

There are a number of practicing audiologists who will run BAER tests for screening the hearing of animals, but UC's FETCH-LAB is the only university lab in the nation that has the capability to teach animal audiology to its AuD students or to practicing audiologists, and to run advanced diagnostic audiology tests.

Career

With the Animal Audiology certificate, you open doors to a variety of career paths, such as working in veterinary clinics, animal rehabilitation centers, and research institutions focused on animal communication. Several graduates of the program now even have their own private FETCHLAB practices.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Certificate of Animal Audiology curriculum

Advising

Students enrolled in the AuD or PhD program in Communication Sciences and Disorders will be advised and mentored by CSD/FETCH-LAB faculty beginning in their first year. Practicing audiologists will be assigned a CSD/FETCH-LAB faculty member as a mentor upon acceptance in the program. Each student will have an audiology and veterinary advisor.

Health Care

Finance

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

Health Care Finance is a decision science that relies on an analytical framework for thinking through different incentives which can be associated with different forms of payment. How societies pay for health care and how many resources are devoted to health affects both the care people can get and its quality. Knowledge is needed to help patients and health care beneficiaries pay for medical expenses in the short and long terms.

Health Care

Policy & Regulation

Duration: **1 Year** Total Credits: **12** Award: **Graduate Certificate**

Overview

The demand for healthcare professionals trained in policy and regulation is on the rise. As the health care landscape becomes increasingly complex, the need for skilled professionals who are able to evaluate the impact of different programs and policies on the health of individuals and populations is critical. This certificate offers an understanding of how the law applies to the health care system while equipping you with the skills of organizing, managing and regulating the delivery of health care services.

Health Data Science and Artificial Intelligence

Online

Duration: 1 Year Total Credits: 13 - 20 Award: Graduate Certificate

Overview

Over the last decade, widespread Electronic Health Record (EHR) implementation and optimization has created the conditions for rapidly expanding data science and analytics capabilities. More recently, we have observed further expansion due to the proliferation of other digital health devices and emergence of artificial intelligence. These digital changes are contributing to improved coordination of care, creating efficiencies in the health space, the generation of large amounts of data, and enhancing personalized patient care. Today, the health care industry, including payers, providers, and the patients they serve, are poised to benefit from the availability of massive volumes of structured and unstructured data. In the next 5 years, it is expected that the availability of this data will drive solutions to increase patient engagement and satisfaction, and for clinical decision support.

Career

Graduates of this certifciate program increase their knowledge and skills in data science and artificial intelligence and are able to pursue careers involving AI, data management, health informatics, big data, data analysis, data visualization, business intelligence, and management.

Curriculum

Students will complete at least 13 credit hours (including elective courses).

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:

Health Information Security

Online

Duration: 1 Year Total Credits: 15 - 18 Award: Graduate Certificate

Overview

The University of Cincinnati Health Information Security certificate allows you to gain a unique specialization in an area with increasing importance due to electronic health records and federal guidelines that demand greater efficiency in healthcare organizations.

The healthcare industry accounts for a significant proportion of major data breaches. With increased electronic health records, a growing presence online, networked medical devices, and the mobility of health care data it has become essential for healthcare organizations to strengthen its information security and cybersecurity practices. Graduates of the Health Information Security certificate from the University of Cincinnati will be well positioned to impact healthcare information security.

Upon completing the health information security certificate, you will be able to:

- Detect threats and vulnerabilities to health information in order to develop mitigation strategy
- Apply critical thinking to evaluate practices, policy and legislation related to health information in order to advocate for change or adoption
- Apply technical and administrative skills and knowledge in order to practice how to secure health information
- Discuss the impact of health information breaches on public trust and healthcare practice in order to advocate for stronger protections and effective health information security strategy
- Develop a plan for disaster recovery and healthcare business continuity in order to identify best practices and practice how to strategize for health information disaster recovery planning

Students who do not have a healthcare background will complete 18 total credits. Students with a healthcare background will be exempt from taking HI 7001 and will only be required to complete 15 total credits. The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Students enrolled in the Master of Health Informatics program will be able to add this specialization by using electives to earn the graduate certificate. MHI students will take three of the required courses (HI 7001, HI 7010, HI 7030) as part of the master's program, the three additional courses (IT 7020C) and two elective courses (not counted towards your master's degree) to earn the graduate certificate. Electives can be substituted if approved by the Program Director.

Course availability is determined by the respective college offering the course.

Career

The demand for information security experts is soaring and a combination of related experience, advanced degrees and the understanding the intricacies of health care organizations will provide new employment and advancement opportunities to you.

Human Nutrition

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The University of Cincinnati online graduate certificate program in Human Nutrition is designed to educate medical students, residents and fellows, practicing clinicians and other health care professional (nurses, pharmacists, dietitians, health educators) with advanced content in nutrient metabolism and nutritional therapy across the lifespan. Although graduate training in nutrition toward a master's degree is an option, the rigors of a busy clinical schedule for the practicing health care professional often preclude them from pursuing graduate education in nutrition. This online program is designed for the working health care professional who desires to maintain employment while furthering their education in nutrition.

The program is taught by experienced graduate nutrition faculty, who will provide advanced nutrition coursework in an online environment to accommodate the busy working professional. Students can complete the 12 credit hour program completely online in as little as one year.

Career

The graduate-level content of this program is appropriate to enhance the career of health care professionals who need to understand how diet influences disease pathophysiology and treatment. Health care professionals who would benefit from the advanced content of this Certificate are medical students, residents and fellows, practicing clinicians, nurses, pharmacists, physical therapists, athletic trainers, occupational therapists, dietitians, health educators and others.

Curriculum

Social Work in Schools

Duration: **1.5 Years** Total Credits: **14** Award: **Graduate Certificate**

Overview

The Social Work in Schools (SWiS) program prepares you for social work practice in school settings. School Social Workers collaborate with teachers and school administration to maximize the educational experiences of students. School Social Workers use their specialized skills to assess and intervene with students and their families by helping to locate and utilize community resources to support the student's educational goals.

The School Social Work program at the University of Cincinnati is one of three in Ohio licensed by the Ohio Department of Education (ODE) through the College of Education, Criminal Justice and Human Services (CECH). The expected outcome of the program is to make MSW students eligible to apply for the Pupil Service Credential through ODE and to prepare professional School Social Workers for their unique role amongst traditional education and auxiliary professionals in the school system. This role encompasses specialized knowledge and skills, including social work assessment and intervention designed to support individual students, groups, classrooms, and whole school systems as well as and families and community engagement. Graduates of the program provide a critical dimension to the shared goal of maximizing the educational experiences of students.

Career

School Social Workers who are fully licensed with ODE's Pupil Service Credential are best positioned for employment within a school district. This is in marked contrast to those Social Workers who are employed by outside agencies and then provide services in the schools. Working with and for a school district means that the School Social Worker is embedded in school communities, focuses on building relationships with students and beyond. The School Social Worker is positioned to support whole school communities. School Social Workers employed in these settings also tend to be recognized for their unique training and qualifications and enjoy job stability and security.

Exploratory

Duration: **4 Years**

Overview

The exploratory program is designed for students not yet ready to commit to a major and leverages the many resources available at UC to help students make a good choice. Even for those who enter college with a declared major, multiple major changes are common. In many ways, this is as it should be. College is a time for self-discovery and exploration. Truly undecided students should take the opportunity to explore their strengths, academic interests and talents before committing to a major.

The exploratory program is also a good option for students trying to gain admission to a selective major. Students are encouraged to identify possible alternatives while working toward possible admission to the major of choice.

Exploratory students in UC's College of Arts and Sciences (A&S) have a specially assigned exploratory advisor to assist with decision-making and course selection while exploring degree options or working toward getting into a desired major in any college.

Students outside A&S who are considering a change of major should contact UC's Transfer & Transition Advising Center by emailing transition@uc.edu or calling 513-556-9000.

Success

Students in any UC college trying to identify their best-fit majors will be successful if they take advantage of the following resources and programs offered through the Center for Exploratory Studies:

- Professional Exploratory Advising: Advisors can give you information about all of UC's majors in every baccalaureate college as well as providing personal assessment and evaluation.
- Faculty contacts in various UC departments and colleges.
- Discovering UC Course (MLTI1075): This course helps students choose a UC major. The course includes faculty presentations from all of the UC colleges as well as some fun, experiential learning activities.
- First Year Experience Learning Communities: Designed to help students take classes to explore specific majors while providing a built in level of support from a Peer Leader.

Career

Approximately 70 percent of college-educated people in the workforce today are working in an area not directly related to their field of study in college. For some fields of work, such as teaching or the engineering specialties, a specific major is essential. For many, the most important factor is simply the liberal education you attain while completing your bachelor's degree. Employers value the competencies you will develop in critical thinking, effective communication, social responsibility and knowledge integration. Career options commonly associated with specific majors can be found on the Center for Exploratory Studies website.

Minoring

There is no minor available in exploratory studies.

Curriculum

This curriculum information is intended as a general information guide for students considering enrollment in this program. **These online tools are designed to assist you, but are not a substitute for planning with an academic or faculty advisor.**

If you are currently confirmed or enrolled, you can check your degree requirements online. If you are considering transferring to this major from another school, use u.select to see how credits you have earned will transfer to UC. See course descriptions by college.

Each student's schedule looks different, but the following is an example of what yours might look like during the first year:

- First Year
  - Learning Community or Freshman Seminar
  - English Composition
  - *Foreign Language
  - Humanities
  - Historical Perspectives
  - Discovering UC
  - *Quantitative Reasoning

*Requirements may depend on potential majors.

Students working toward acceptance into a highly selective major should consult with an exploratory advisor to determine the necessary courses and requirements for potential admission to that program.

A&S Core Template

Advising

The Center for Exploratoratory Studies is a university-wide service designed to assist students in choosing majors.

Starting at orientation, students are matched up with one of our award-winning team of professional exploratory advisors. Students work with their advisor throughout their entire first year and beyond until they have declared a major. Advisors offer curricular planning, major selection, and general assistance to ensure that students are successful in finding their 'best-fit' major. Exploratory advisors are trained in major selection and offer personal assessments designed to assist students in the major selection process.

Students seeking admission to one of UC's highly selective programs are advised on coursework and strategies designed to position them most competitively on the application and academic portfolio. Advisors work closely with campus representatives to learn about admissions and curricular requirements for these selective majors.

First year students are required to meet with their academic advisor prior to registration every semester. At this meeting, advisors discuss where students are in the major selection process, and offer curricular advise for the subsequent quarter.

While there is no deadline in selecting a major, it is not possible to graduate with a major in "exploratory." Students with over 60 credit hours will be blocked from registration until they have discussed an academic plan with their exploratory advisor.

Students outside A&S who are considering a change of major should contact UC's Transfer & Transition Advising Center by emailing transition@uc.edu or calling 513-556-9000. A transition advisor can assist you with switching majors and discussing classes for your next semester.

UC Advantages And Special Opportunities

The Center for Exploratory Studies has been recognized by the National Academic Advising Association as a best-practice model for assisting undecided students. It has also been featured in *The New York Times*.

Special Programs

UC offers several other unique programs that can also help students make informed academic decisions:

- The First Year Experience Program: An innovative, year-long, freshman program that helps students successfully transition from high school to the university setting through freshman seminars, academic workshops and first-year courses.
- College Success Skills: A course that focuses on vital skills acquisition, effective use of technology and campus resources.
- Discovering UC Course (MLTI1075): This course helps students choose a UC major. The course includes faculty presentations from all of the UC colleges as well as some fun, experiential learning activities.
- Learning Communities: Groups of students, studying and taking classes together.
- Internship and Study Abroad Programs: Students gain work experience and begin to develop a global perspective while strengthening their college records, earning credit, and traveling the world.
- Bearcat Promise Career Studio: Learn more about various career opportunities associated with each of UC's majors.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned

- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets one of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets one of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

In addition to meeting the university general education requirements, each college's requirements for graduation are different. Students will work with their college and departmental advisors to ensure graduation requirements are met.

Exploratory students intending to stay in the UC College of Arts and Sciences are strongly encouraged to follow the A&S core requirements checklist in order to effectively meet graduation requirements.

Application Deadlines

UC operates on a semester system, with 14-week grading periods beginning in August, January and May. While midyear admission is possible, the fall is generally the best time to enter the university, since many course sequences begin in that semester.

- Applicants to A&S who are enrolled or who were previously enrolled as degree students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Africana Studies

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Majors in Africana Studies use a variety of approaches to explore and better understand the experiences of African, African American, Afro-Latin, Afro-Caribbean and Afro-European populations in a global context. This interdisciplinary major employs analytical tools from fields such as sociology, psychology, literature, anthropology, politics and history to explore important social issues facing people of African descent, from continental Africa and throughout the African Diasporas.

In this major, students acquire effective skills in developing an interdisciplinary cultural and social approach to the field; an ability to combine an intersectional theoretical approach with an applied research focus; critical thinking, written and oral communication skills; and knowledge of Africana people of the Diasporas.

Success

People who are successful in Africana studies possess strong verbal and writing skills, making them excellent communicators. They work well with adults, children and the elderly. Many enjoy travel, finding firsthand experience necessary to learn more about the cultures of the Diaspora. Africana studies majors have versatile personalities and are able to adapt to many different circumstances.

Career

Graduates of this major pursue many different careers. A few examples include:

- Community organizer
- Public Administration
- Law
- Foreign Services
- Museum Curator
- Philanthropy
- Social Worker
- Education
- University Student Services
- Writer
- Financial Services

Minoring

The Department of Africana Studies offers a minor in Africana studies for undergraduates enrolled in any college of the university. Students minoring in Africana studies must complete required courses offered by the Department of Africana Studies and from approved courses offered in other academic areas. The minor is intended for students who want to develop a specialty in Africana studies that will complement their existing areas of study.

Is the minor for you?

A minor in Africana studies will provide students the unique opportunity to explore and learn about the cultural, social and historical experiences of people of African origin. Africana studies is inherently interdisciplinary and global in perspective. Students who minor in Africana studies must complete coursework offered by the Department of Africana Studies and from approved courses offered by other academic units throughout the university. A minor in Africana studies is a perfect complement to any major and is designed to attract students who seek intensive studies on the diverse cultures of Africa and the African Diaspora.

Career opportunities

Not only can the minor in Africana studies benefit students preparing for graduate programs in liberal arts disciplines, the minor can be used in conjunction with a traditional major to prepare for many professions. With the growing emphasis on multi-cultural education in the United States, a minor in Africana studies is an added advantage to students interested in teaching careers. Students preparing for careers in business might apply the minor to marketing careers where skills of working with diverse populations are in increasing demand. Students entering social service positions where knowledge of an African American clientele is a must might find the minor useful in supplementing their pre-professional or technical training. Africana studies courses take a global perspective. All students might benefit from a minor that stresses global issues.

File the Application to Minor in Africana Studies form with the department. In addition, declare the minor with the College of Arts and Sciences [click here to declare online]

A certificate in African studies is also offered. Students may want to enroll in the certificate program to enhance their major. Students are required to take courses from the Department of Africana Studies and/or from other colleges on campus.

Advising

For more information, please contact undergraduate program director, Dr. Guy-Lucien Whembolua at guy-lucien.whembolua.uc.edu

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences (A&S) enjoy many benefits afforded through study at a research-extensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

Internship Program - Senior majors can choose to enhance their coursework with work experience. An internship is an unpaid work experience that allows majors to use their curriculum-based knowledge in Africana studies to prepare for employment and/or graduate school after graduation. Designed to provide a learning experience that takes place in a setting outside the university, the unpaid internship gives majors academic credit for practical experience. A variety of locations offer opportunities to apply the skills and knowledge learned within Africana studies. For example, some students might investigate internship opportunities in community organizations such as the NAACP, the Urban League, Cincinnati Neighborhood Community Councils, advocacy groups, the United Way and similar fraternal and religious organizations. Other majors may pursue internships in public sector settings such as the Cincinnati Public Schools, and various agencies of city government. Still other majors might investigate internships in private sector settings such as local corporations and black-owned and operated businesses.

Teaching Practicum - Upon invitation of the faculty, senior majors may earn academic credits by serving as teaching assistants. Students work closely with faculty members who teach lower division core courses. This is a training situation for senior majors interested in pedagogical issues in Africana studies. Students will serve as teaching assistants in African Diaspora cultures, African and African American history, literature and sociology.

Angelene Jamison-Hall Scholarship in Africana Studies - The department invites its majors to apply for two $500 scholarships to be awarded in the autumn of any given academic year.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cumulative and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries, please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

International Student Requirements

International applicants, please visit the International Admissions page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

AFST3079	Racism: Race and Race Relations in the United States and Beyond	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Anthropology

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Anthropology is from the Greek *anthropos* (human) + *logia* (study). It is the science that studies human variation from its beginnings millions of years ago to the present day. To an anthropologist, diversity itself – seen in body shapes and sizes, blood types, different kinds of languages, customs, clothing, religion and ideas about the world – provides a frame of reference for understanding any single aspect of life.

Archaeologists study the things humans created, used, and left behind to understand ancient societies and how they lived.

Biological anthropologists study our species and its close relatives, tracing their biological origins, development and genetic diversity to understand human evolutionary history.

Cultural anthropologists seek to describe how societies and their institutions are constituted to explain differences among them.

Success

While each branch of anthropology carries its own special techniques and required skill sets, certain attributes common to all will help a student succeed:

- open-mindedness and willingness to understand how other social and cultural systems work
- intellectual curiosity about human similarities and differences
- desire to find out how things actually are vs. how someone thinks they "should be"
- analytic ability and, for some branches, some quantitative and statistical skills
- verbal facility: ability to read carefully and write clearly and concisely
- desire to cultivate a disciplined imagination

Career

Graduates of the anthropology program receive broad training that enables them to pursue a wide range of exciting career options. This training includes courses in cultural and biological anthropology and archaeology, as well as numerous field and lab methods. Graduates may work in research, teaching, or administration, in industry, government, non-governmental organizations and many other private and public institutions. Below are just a few examples of the range of jobs that anthropology graduates carry out:

- Museum Curator and Technician
- Community Outreach Manager
- Social Science Analyst
- Conservation Manager
- Forensic Technician
- Human Resource Managers
- Urban and Regional Planner
- Social Service Worker
- Lobbyist
- Community Organizer
- Legislative Aides
- Research Assistant
- Counselor
- Teacher

- Society for American Archaeology
- Society for Applied Anthropology
- The Archaeology and CRM Professionals Resource
- The Leakey Foundation

Minoring

The Department of Anthropology offers a minor for undergraduates enrolled in any college of the university.

Students must complete a minimum of 20 hours as follows:

- Required Courses: ANTH1001 Cultural Anthropology, ANTH 1003 Biological Anthropology, ANTH 1005 Introduction to Archaeology, or ANTH1007 Introduction to Linguistic Anthropology, 9 hours
- Elective Coursework: ANTH 2000-level or above, 8 hours
- Advanced Elective Course: ANTH 3000-level or above, 3 hours

UC Advantages And Special Opportunities

It is possible to complete the BA in anthropology in three years, utilizing summer terms and advanced standing credit options. Click here for a three-year plan.

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Majors get a solid grounding in all four branches of anthropology from an accessible faculty actively practicing, or "professing," their fields. There are opportunities to become involved in faculty research and fieldwork, and the program stresses training and practice in learning to think like an anthropologist - a skill highly transferable into fields that reward careful thinking and respect for data (law, medicine, investigation, etc.).

A capstone activity or experience is required by the university general education program. Anthropology majors choose from among four capstone theory courses. It is important to check with the department when planning the senior year.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)

- Intermediate Algebra (MATH 0034)
- Algebra for College (MATH 0039)
- Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Arabic Language and Culture

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

The Arab world, made up of 22 countries and the Palestinians, extends from the Arabian/Persian Gulf in the east to the Atlantic Ocean in the west and has a population of about 300 million, 20 million of whom are Christian Arabs. Arabic is their dominant mode of expression. It is also an important language in other countries. Arabic is the language of Islam, and more than a billion people use it as a vital spiritual component of their daily lives. The United Nations adopted Arabic as one of its six official languages in 1974.

Events in the Middle East affect our daily lives, and only through the study of Arabic can one gain necessary insights into the cultural, religious, and political forces that motivate the inhabitants of that vital region - insights that our monolingual media seldom provide.

Middle East is the birthplace of civilization and the cradle of the three monotheistic religions. It also contains some of the world's greatest archeological and religious sites. It is the locus of two thirds of the world's known oil reserves. Moreover, it is rich with interesting cultures and warm, hospitable people. A good knowledge of Arabic will greatly enhance the enjoyment of travel in the region and the ability to work and interact with Arabic speaking people. Qualified students may seek available funding - for example, from the UC Office of International Programs, the Taft Foundation, and federal agencies - to enroll in an Arabic study abroad program.

Career

The diligent study of Arabic can lead to exciting careers in various fields. The following are only a few of the many positions open to those who have a high proficiency in Arabic:

1. Communications: foreign correspondent, reporter, translator.
2. International finance: international banker, international consultant, political risk analyst.
3. Industry: manager of government relations for oil companies, market analyst for export companies.
4. Government: foreign service officer, development program officer, intelligence analyst, government relations specialist, translator or interpreter.
5. Law: contractual and corporation consultant.
6. Academia: teaching and research positions. The U.S. government currently considers Arabic a critical language and many scholarships and fellowships in Arabic studies are available.

[The above paragraphs are adapted from the website of The American Association of Teachers of Arabic.]

Minoring

The minor is equivalent to the Certificate in Arab language and Culture.

Archaeology

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Archaeology students learn how to examine archaeological sites, landscapes, and material culture to make inferences about people in the past. Archaeology majors develop research skills that enable them to investigate problems, analyze and evaluate data, and infer aspects of ancient human behavior and modes of organization.

The Archaeology BA program provides students with interdisciplinary training in archaeological methods (for example, how to survey, excavate, document, and interpret archaeological sites and past landscapes), theoretical approaches, laws, and ethics. A core requirement of this program is the completion of an archaeological field school or public archaeological internship where students gain valuable hands-on experience with field and laboratory methods that prepare them for future careers. Students pursue a unified curriculum while focusing their major elective coursework across or within one of the following three Concentration Areas:

Environmental and Landscape Archaeology. Explore topics from landscape and spatial archaeology, GIS, environmental anthropology, historical ecology, bioarchaeology, agricultural systems, human–environment interaction, cultural landscapes, and sustainability through interdisciplinary coursework in Anthropology, Environmental Studies, Geology, and Geography.

Archaeology of Social Complexity. Explore topics from regional archaeologies (North America, Mesoamerica, Europe, Africa, Asia, the Mediterranean, and the Near East); the development of agriculture, complex societies, and cities; and material culture through interdisciplinary coursework in Anthropology, Architecture, Africana Studies, and Classics.

Material Culture, Cultural Heritage, and Museum Studies. Explore topics from public archaeology, archaeological laws and ethics, material culture, heritage studies, and strategies for representing ancient and modern cultural practices through interdisciplinary coursework in Anthropology, Architecture, Classics, and History.

Success

With its emphasis on research and professional training, the program provides undergraduate students with opportunities to directly participate in scholarly research through hands-on activities. The program incorporates information about recent discoveries and current interpretations of archaeological research in order that students will appreciate the evolving nature of knowledge and theories in the field. The program also integrates core values of citizenship, cultural diversity, cultural heritage appreciation and historic preservation.

Career

Students graduating with an Archaeology BA can expect to obtain jobs in the fields of cultural resource management, public archaeology, historic preservation, museum studies, and natural resource management. Graduates of the UC Bachelors in Archaeology program who choose to continue their study in MA or PhD. programs will be well prepared for graduate level work.

There is a critical need in the U.S. for individuals trained in archaeology to address the demand created by development and infrastructure expansion. In addition to cultural resource management and environmental assessment firms, many local,state and national government agencies employ archaeologists (ex. Department of Interior, Bureau of Land Management, US Army Corps of Engineers, National Park Service, the US Forest Service, the US Fish and Wildlife Service and the Ohio Department of Transportation, among others.

Websites that highlight employment opportunities in archaeology worldwide include the following:

- American Anthropological Association
- American Association of Museums
- American Cultural Resources Association
- Archaeological Institute of America
- The Archaeology and CRM Professionals Resource
- Central States Anthropological Society
- eCultural Resources
- Midwest Archaeological Conference
- Society for American Archaeology
- Society for Historical Archaeology

Minoring

Minors are not available in the archaeology program. Students interested in a related minor or certificate might consider the following:

- Minor in anthropology
- Certificate in historic preservation
- Certificate in Mediterranean archaeology
- Certificate in GIS

Archaeology

UC Advantages And Special Opportunities

The University of Cincinnati has strong relationship with community partners such as the Cincinnati Musuem Center, the Archaeological Research Institute, and local CRM firms, that offer opportunities to enrich students' training in field methods, public archaeology, curation, and other areas of archaeological practice.

Students in the UC College of Arts and Sciences (A&S) enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The University of Cincinnati Center for Field Studies (UCCFS) is an off-campus resource located on 17.6 acres of South Shaker Farm in Miami Whitewater Forest, Hamilton County, Ohio. It is connected administratively to the UC College of Arts and Sciences and the Departments of Anthropology, Biological Sciences, Geography, and Geology and the School of Enviornment and Sustainability. Designed to serve the Greater Cincinnati region, the UCCFS provides a base of operations for on-site and regional field research, a protected area for long-term environmental research and a training center for interdisciplinary research and education activities.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum and a 2.0 at most recent institution

For more information, Pathways Advising and Student Success

Transfer students should apply using our transfer student online application

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Asian Studies

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Asia is gaining increasing economic and strategic prominence in the world, and Asian countries have rich and fascinating cultures and heritages. Asian studies is an interdisciplinary major that explores the languages, cultures, economics, history, geography and politics of Asian countries. Students often combine an Asian studies degree or certificate with another major field of study. Students may also study abroad in Asia, pursue internships and apply for fellowships.

Success

Asian studies majors are fluent in one or two Asian languages and have in-depth knowledge about Asia. Their course work prepares them to think critically, communicate effectively, work across cultures and draw upon multiple disciplines in examining issues.

Career

American businesses, governmental and nongovernmental organizations are deeply involved in Asia, yet there are not enough American professionals who are knowledgeable about the region. A degree or certificate in Asian studies, especially when combined with another field of study, makes students highly sought in an increasingly global marketplace. In addition to being well-prepared for graduate school, graduates of the program have gone on to pursue careers such as:

- Teaching in an Asian country
- Working with U.S. firms interested in Asia
- Research and analysis

Minoring

An undergraduate minor in Asian studies is offered for students majoring in another area. It is offered to students in any college at the University of Cincinnati. Students not pursuing a bachelor's degree are awarded a certificate.

Major Map Versions:
Asian Studies (BA)

Advising

For more information please contact the program director, whose name and information appear on this page.

UC Advantages And Special Opportunities

Asian studies at UC is an interdisciplinary major that explores the languages, cultures, economics, history, geography and politics of Asian countries. By taking courses from several disciplines, students acquire a variety of analytical tools and examine issues and problems from multiple perspectives. Expertise in languages, courses from many disciplines and study-abroad opportunities in Asia are important aspects of the Asian studies experience at UC.

Special Programs

Internships, Co-op and Study Abroad Opportunities

Students may contact UC's Institute for Global Studies, the Experience-Based Learning and Career Education and view the UC College of Arts and Sciences internships Web page for information on study abroad and internships.

Students have pursued internships in organizations such as

- The Global Center of Cincinnati
- The Japan America Society of Greater Cincinnati
- The Cincinnati Chinese Chamber of Commerce

Admission Requirements

Freshman applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

International Student Requirements

International applicants, please visit the International Admissions page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

SOC	2089	0 - 3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Biology is the scientific study of life and life processes. Biologists study the organization of life from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them, how the body works, the causes of diseases, etc. will often find a biology major very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Since many science courses involve laboratories, students who enjoy active, hands-on learning will enjoy the biology major. Visual learners will especially appreciate the beauty and complexity of the natural world. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology have a wide range of career options as well as options for graduate study in biology. The BA degree may be preferable for students seeking a second major in biology or those interested in careers in teaching or entering the workforce in areas such as ecology/environment, working with animals, and laboratory research upon graduation. The BA degree will generally not serve the needs of a pre-Professional student (pre-med, pre-vet, etc.) who should instead select the BS degree in biology. A few examples of career fields open to BA biology majors include the following (many of which require additional degrees):

- Academic, industrial, environmental/organismal, medical/pharmaceutical researcher
- Occupational therapist, physical therapist
- Hospital / healthcare administration
- Law, specifically areas that include environmental issues and patent law requiring a solid scientific background
- Medical lab technologist
- Nurse
- Middle/high school educator
- Forestry, horticulture, park service, wildlife/fishery biologist
- Pharmaceutical / medical device sales or marketing
- Regulatory affairs specialist
- Scientific writing
- Zookeeper, naturalist

Minoring

Students working toward an undergraduate degree at UC can earn a minor, while non-degree students (e.g., graduate students, non-matriculated students) can earn a certificate. The requirements are the same for both. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics , BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; consult list of upper level courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.
  Click here to declare the minor online

Advising

Contact department via information which appears on this page.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Faculty within the Department of Biological Sciences are actively engaged in research in a variety of areas. Undergraduates have the opportunity to participate in this research and can earn academic credit that can be applied toward their upper-level biology course requirements. Outstanding undergraduates (with a GPA of at least 3.3 overall) may apply for admission to the honors program in biology as early as the spring semester of their sophomore year.

Teaching laboratories within the department are well-equipped and devoted to undergraduate education. Faculty are involved and dedicated to employing new teaching methods and technology that enrich students' educational experiences.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College
- Terra State Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned

- at least a 2.0 GPA

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Undergraduate Research

One Research Lab course can be counted towards the lab requirement if it was taken for 3 or more hours of credit

Course	Title/Desc	Credit
BIOL4095	Undergraduate Research	1 - 6
BIOL4096	Undergraduate Research	1 - 6
BIOL4097	Undergraduate Research	1 - 6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemistry

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

At UC College of Arts and Sciences, you can focus in biological chemistry in a program that gives you the flexibility to pursue a second major or the foundation for a career in healthcare. You'll have access to UC's state-of the-art laboratories with cutting-edge instrumentation to help you conduct experiments and analyze your results. Here, your research matters. You'll have the opportunity to dedicate yourself full time to pursuing your research interests in biochemistry as part of your undergraduate degree.

Success

The UC College of Arts and Sciences (A&S) BA program in chemistry with a concentration in biological chemistry is well suited for students with a background and interest in science and the health professions. The program provides for extensive laboratory work in addition to formal lecture courses. Either one semester of undergraduate research or biochemistry research is required for the BA program and satisfies the student's capstone requirement. Chemistry majors also learn to observe critically and record what happens in the laboratory; they analyze data and apply chemical knowledge learned in the classroom to draw conclusions about their observations.

Career

Graduates of this major are employed as:

- Chemists and biochemists in the manufacturing industry and in state, local or federal governments
- Chemistry teachers and professors
- Research and development specialists
- Health care professionals

Minoring

Click here to declare the program online

Chemistry Minor

The minor is designed for students who want a strong background in chemistry to complement their major area of study. Students who are enrolled in pre-professional programs may also find a minor in chemistry to be helpful to their professional preparation. To obtain a minor in chemistry, a minimum of 26 credits must be successfully completed, with the following distribution:

- General Chemistry and Lab: CHEM 1040-1041, 1040L-1041L (10 credits)
- Organic Chemistry and Lab: CHEM 2040-2041, 2040L – 2041L (10 credits)
- At least six credits from any additional chemistry courses numbered 2050 or higher [except 2080, 4080, 5020, 5030 and 5080].

Certificate Program

There is no certificate program in chemistry for students currently enrolled in a major at the University of Cincinnati. Rather, the minor in chemistry described above is available. Students not currently enrolled in a major may earn a certificate in chemistry (but not a minor in chemistry) by completing the same set of requirements needed for the minor.

Individuals not yet enrolled as UC students may declare the certificate after establishing non-matriculated status.

Students interested in pursuing a minor in chemistry should see the undergraduate program director to plan a program.

UC Advantages And Special Opportunities

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

4+1 Cosmetic Science Master's Degree

Chemistry majors interested in a career as a Cosmetic Scientist can now complete their bachelor's and master's degree in 5 years, without having to take the GRE. Students will be introduced to cosmetic science classes after their first year while continuing to study basic chemistry and eventually will move onto a full year of cosmetic science during the 5th year. They will have two co-op opportunities, one each during the third and fourth year. Once in graduate school, students' coursework will include skin care science, hair care science, formulation science, and color cosmetics in order to be well-prepared to enter this rapid-growth job market.

Special Programs

The BA program in chemistry with a concentration in biological chemistry provides a strong foundation in chemistry and biochemistry with sufficient flexibility to allow graduates to pursue a wide range of career options. This program also integrates well with the optional academic internship program in the department. The opportunities for undergraduate research are extensive as well, and strongly encouraged. Many undergraduates co-author journal publications from the research they conduct in the department.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for students attending other universities if they were admissible directly from high school and have a 2.0 overall GPA and a GPA of 2.0 at their most recent institution.

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to UC's College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Classical Civilization

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Classical civilization is the study of the culture, history, language and literature of ancient Greece and Rome. Classical civilization majors develop language skills and enrich their lives through an interdisciplinary exploration of the Greek and Roman worlds. They study such things as mythology, philosophy, religion, politics and other areas where the ancient Greeks and Romans made decisive contributions to world civilization.

Success

Classical civilization students possess an eye for detail, curiosity about languages -- including their own -- and love of history. Some well-known students, past and recent, are:

- Karl Marx, Friedrich Nietzsche and Sigmund Freud
- Theodor Mommsen and Toni Morrison (both recipients of the Nobel Prize for literature)
- Oscar Wilde, Erich Segal ("Love Story") and J.K. Rowling ("Harry Potter")
- Garry Wills (Catholic cultural critic) and Archbishop Pilarczyk of Cincinnati
- David Packard (of Hewlett-Packard) and Charles Geschke (founder of Adobe)
- James Baker (former secretary of state)

Career

Classical civilization students receive a strong liberal arts education that enables them to pursue a graduate degree in diverse fields of study including law, medicine and the ministry, and that allows them to move into a great variety of careers in industry, business and public service, as shown by our "baker's dozen" list under success factors. Depending on the actual courses taken, they could also pursue careers in archaeology, historical preservation and museum work. (Those who want to pursue an academic career in Greek or Latin per se should consider our classics major, which focuses more heavily on language and literature.) Classical civilization students develop critical thinking, communication, reading and writing skills to a high level of competence and precision. Such skills are highly valued in the private and public sphere.

Graduates find careers in:

- law
- medicine
- ministry
- industry
- business (advertising, public relations, publishing)
- public services (administration, foreign service, journalism, libraries)
- archaeology (consultant, researcher, teacher, tourism)
- historical preservation (archives, historical societies)
- museum work

Minoring

The Department of Classics offers a minor in classical civilization as well as a minor in classics for undergraduates enrolled in any college of the university.

The Classics Department, along with the College of Education, Criminal Justice, and Human Services (CECH) offers a program that allows students to earn a teaching certificate in Latin and become secondary school teachers of Latin. More information can be found on the department's website.

The department also offers a certificate in ancient Greek. More information can be found the department's website.

Special Programs

The Department of Classics at the University of Cincinnati offers a unique and dynamic environment, thanks to the generous patronage of the Semple Classics Fund, a bequest of Louise Taft Semple, established "for promoting the study of classics in an endeavor to make vital and constructive in the civilization of our country the spiritual, intellectual, and esthetic inheritance we have received from Greek and Roman civilizations."

Among other things, the Semple Classics Fund supports:

- the John Miller Burnam Classical Library, the largest such library in the world
- a large number of graduate students
- a world-class faculty

It also awards Semple Scholarships to outstanding undergraduates in classics or classical civilization at the University of Cincinnati and the Semple Traveling Scholarships for a period of undergraduate study abroad, especially in Athens and Rome.

The Department of Classics has an international reputation as a leader in the field of Greek Bronze Age archaeology. It is particularly known for its excavations at Troy and Pylos under the direction of Carl Blegen. This tradition of excellence in archaeology continues today with current field projects at Pylos, Apollonia (Albania), and Episkopi-Bamboula (Cyprus).

Admission Requirements

Freshmen Students -- http://admissions.uc.edu/information/high-school.html

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Classics

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Classics is the study of the language and literature of ancient Greece and Rome. Classics majors develop language skills and eventually read Homer, Plato or the New Testament, and Cicero, Virgil or Augustine in the original. They also study such subjects as mythology, philosophy, religion, politics and other areas where the ancient Greeks and Romans made decisive contributions to world civilization.

Success

Classics students possess an eye for detail, curiosity about languages (including their own) and love of reading. Some such students include:

- Karl Marx, Friedrich Nietzsche and Sigmund Freud
- Theodor Mommsen and Toni Morrison (both recipients of the Nobel Prize for literature)
- Oscar Wilde, Eric Segal ("Love Story") and J.K. Rowling ("Harry Potter")
- Garry Wills (Catholic cultural critic) and Archbishop Pilarczyk of Cincinnati
- David Packard (as in Hewlett-Packard) and Charles Geschke (founder of Adobe)
- James Baker (former Secretary of State)

Career

Classics students often pursue academic careers. Classics majors go on to graduate school to earn advanced degrees in classics or related fields such as archaeology, history or philosophy. Classics students receive a strong liberal arts education that enables them to pursue a graduate degree in many other fields of study including law, medicine and the ministry, and allows them to move into a great variety of careers in industry, business and public services, as shown under success factors. Classics students develop high-level critical thinking, communication, reading and writing skills. Such competence and precision are highly valued in both the private and public spheres.

Classics advanced degree:

- researcher
- teacher

Archaeology advanced degree:

- consultant
- museum work

History advanced degree:

- archives
- historical societies

Philosophy advanced degree:

- law
- medicine
- ministry
- industry
- business
- advertising
- public relations
- publishing
- public services
- administration
- foreign service
- journalism
- libraries

Minoring

The Department of Classics offers a minor in classical civilization as well as a minor in classics for undergraduates enrolled in any college of the university.

The Classics Department, along with the College of Education, Criminal Justice, and Human Services (CECH) offers a program that allows students to earn a teaching certificate in Latin and become secondary school teachers of Latin. More information can be found department's website.

The department also offers a certificate in ancient Greek. More information can be found the department's website.

UC Advantages And Special Opportunities

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

The Department of Classics at the University of Cincinnati offers a unique and dynamic environment thanks to the generous patronage of the Semple Classics Fund, a bequest of Louise Taft Semple, established "for promoting the study of classics in an endeavor to make vital and constructive in the civilization of our country the spiritual, intellectual, and esthetic inheritance we have received from Greek and Roman civilizations."

Among other things, the Semple Classics Fund supports:

- the John Miller Burnam Classical Library, the largest such library in the world
- a large number of graduate students
- a world-class faculty

It also awards Semple Scholarships to outstanding undergraduates in classics or classical civilization at the University of Cincinnati and the Semple Traveling Scholarships for a period of undergraduate study abroad, especially in Athens and Rome.

The Department of Classics has an international reputation as a leader in the field of Greek Bronze Age archaeology. It is particularly known for its excavations at Troy and Pylos under the direction of Carl Blegen. This tradition of excellence in archaeology continues today with current field projects at Pylos, Apollonia (Albania), and Episkopi-Bamboula (Cyprus).

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cumulative.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Transfer students should apply using our transfer student online application

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to UC's College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Communication

Online

Duration: 4 Years Total Credits: 120 Award: BA

Overview

The academic discipline of communication focuses on discourse among people, organizations and social institutions. The award-winning communication faculty members share a distinctive focus on contemporary social problems. Their research and the undergraduate program centers on understanding issues of voice, identity, public participation and advocacy/leadership across communication domains including interpersonal, organizational, political, rhetorical, environmental, health and mediated communication.

Students in the program develop strong communication skills grounded in an advanced, theory-based understanding of communication processes. Classroom skills are further developed through experiential learning and community engagement with team-based projects, internships and residencies, service learning and collaboration with community organizations.

Transfer students can complete this program totally online. Refer to the "Transfering to UC" section below for appropriate admission requirements.

Success

Communication majors have excellent critical-thinking and writing abilities, and they are concerned with understanding society and improving social institutions and the well-being of individuals. Communication is an excellent major for students who are interested in working with people and groups in a variety of fields, e.g., business, social work and law.

Career

Graduates with a BA in communication from the UC College of Arts and Sciences (A&S) are well prepared for many different career options. In our modern world, success in business and industry requires a sophisticated understanding of communication processes. Positions in human resource management, as well as marketing and public relations, require strong communication skills. Communication students are well prepared for advanced study in such areas as law and business because of the critical thinking skills they acquire along with the more practical speaking and writing skills at the core of a communication major. Graduates find jobs as:

- Admissions counselors
- Advertising account executives
- Communication educators
- Event planners
- Human resource specialists
- Marketing managers
- Sales representatives

Minoring

Any UC student can complete a minor in communication. The minor consists of 36 credits, including two Core Foundation courses, one Performance course, one Advanced Elective (3000-level or above), and two additional elective courses. For more details, visit the Minor in Communication webpage.

The department also offers a Public Relations Certificate for students who are interested in specializing in public relations. The certificate consists of 21 credit hours for Communication Majors, and 18 credit hours for non-Communication majors. Required courses emphasize both theory and practice through phases such as situation analysis, audience analysis, strategic analysis of options and planning, message design and program implementation and evaluation. A graduate should be well prepared to work in a variety of PR applications, including agencies, nonprofit organizations, corporations, government, advocacy organizations, health care and others. For more details, visit the Public Relations Certificate webpage.

The department also offers an Applied Communication Certificate for students who are not majors in Communication but want to enhance their professional communication skills. The certificate consists of 18 credit hours, including two Composition courses, one Performance course, one Research Methods course, and two Applications courses. Whether leading corporate meetings, writing effectively, explaining technical specs to consumers, negotiating workplace conflict, brokering business deals, understanding employee concerns, teaching a class, presenting an innovative design to clients, interviewing patients, collaborating with community leaders, dialoguing with diverse populations, or delivering a closing statement to jurors, this interdisciplinary certificate program helps develop the presentation and analytical skills necessary for the wide variety of careers our graduates pursue. For more details, visit the Professional Communication Certificate webpage.

Communication (BA) Curriculum: Must have a COMM-DL major for this option

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Undergraduate Student Organizations

- CommuniCATS
- Lambda Pi Eta
- UC Forensics/Debate Team
- UC Public Relations Student Society of America (PRSSA)
- UC Influence - Student Public Relations Firm

Internships

Communication majors can greatly enhance their educational experience while in college by conducting an internship in a field they are interested in exploring. Multiple internships in different careers in communication serve to both strengthen students' resumes and prepare them for the professional world. Requirements for internship include:

- Must be a communication major in good standing.
- Completion of the prerequisite course Careers in Communication.
- Registered for Internship course.

Departmental Honors

All graduating communication majors who earn a 3.4/4.0 GPA or above in the major will earn "Honors" status. All graduating communication majors who earn a 3.66 in the major will earn "High Honors" status. Students will be designated with their departmental honors at graduation. Maintaining a high GPA is important to your future success. High grades are necessary for admission into many of the top graduate programs. High grades also demonstrate to potential employers that you are intelligent, hard-working, able to learn and able to deliver what is asked of you.

- However, high grades alone will not be enough to set academically gifted students apart. You need to be able to demonstrate your achievements. For that reason, the department encourages honors students to seek out additional academic challenges.

  The communication major is a dynamic and challenging degree. The department is proud of our students who achieve high grades. We encourage you to get to know the faculty. Personal recommendations can be very helpful. Moreover, we welcome you to consider furthering your education with a master's degree from our department. Of course, the faculty is also happy to talk with you about preparing for additional graduate and career opportunities that are available.

  - Original research or participation in faculty research is a great way to prepare for graduate school. Original research also shows potential employers that you are able to design and implement a project and to seek out knowledge about an important question. Students interested in research should discuss the possibility of creating a project in communication with faculty members who share your area of interest.
  - Enrolling in an advanced course will stretch you academically and give you exposure to the graduate program. Seeking out challenges is a great way to set yourself apart.
  - Demonstrating leadership is key to translating classroom knowledge into the world. Employers and graduate programs look for potential leaders. Departmental advisors can help you to find out about communication-related organizations for students as well as leadership opportunities available in each.
  - Awards and achievements are another way to help you succeed. The Department of Communication offers a number of scholarships and competitions through which you can distinguish yourself. Talk to your professors and advisors. You'll be glad you did!

Admission Requirements

Admission criteria to A&S online transfer-completer programs are:

- 61 semester (92 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

If you don't have 61 credit hours, please ask about other options for degree completion.

Transferring To UC

Admission criteria to A&S online transfer-completer programs are:

Communication

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Whether you're giving a presentation, negotiating labor contracts or launching a social media campaign, it pays to know how to communicate. At UC, you'll master this fine art and develop communication skills sought after in virtually every industry. Our Communication graduates go on to successful careers in public relations and marketing, business, law, government, nonprofit or any field that requires solid communication skills.

UC's award-winning faculty members will help you better understand and learn how to motivate audiences. Find a personal mentor through UC's communication alumni group, which leverages the expertise and connections of more than 5,000 alumni.

Here, you'll have a chance to gain professional experience and pack your portfolio by collaborating with professional and community organizations on real-world projects based on your own interests. And there's plenty to choose from — UC's urban location in the heart of Cincinnati gives you access to internships and co-ops with professionals in a thriving market of Fortune 500 companies, newspaper and broadcast media and nonprofit organizations.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please see the curriculum map linked below for more information.

Success

Communication majors have excellent critical-thinking and writing abilities, and they are concerned with understanding society and improving social institutions and the well-being of individuals. Communication is an excellent major for students who are interested in working with people and groups in a variety of fields, e.g., business, social work and law.

Career

Graduates with a BA in communication from the UC College of Arts and Sciences (A&S) are well prepared for many different career options. In our modern world, success in business and industry requires a sophisticated understanding of communication processes. Positions in human resource management, as well as marketing and public relations, require strong communication skills. Communication students are well prepared for advanced study in such areas as law and business because of the critical thinking skills they acquire along with the more practical speaking and writing skills at the core of a communication major. Graduates find jobs as:

- Admissions counselors
- Advertising account executives
- Communication educators
- Event planners
- Human resource specialists
- Marketing managers
- Sales representatives

Minoring

Any UC student can complete a minor in communication. The minor consists of 36 credits, including two Core Foundation courses, one Performance course, one Advanced Elective (3000-level or above), and two additional elective courses. For more details, visit the Minor in Communication webpage.

The department also offers a Public Relations Certificate for students who are interested in specializing in public relations. The certificate consists of 21 credit hours for Communication Majors, and 18 credit hours for non-Communication majors. Required courses emphasize both theory and practice through phases such as situation analysis, audience analysis, strategic analysis of options and planning, message design and program implementation and evaluation. A graduate should be well prepared to work in a variety of PR applications, including agencies, nonprofit organizations, corporations, government, advocacy organizations, health care and others. For more details, visit the Certificate in Public Relations webpage.

The department also offers an Applied Communication Certificate for students who are not majors in Communication but want to enhance their professional communication skills. The certificate consists of 18 credit hours, including two Composition courses, one Performance course, one Research Methods course, and two Applications courses. Whether leading corporate meetings, writing effectively, explaining technical specs to consumers, negotiating workplace conflict, brokering business deals, understanding employee

concerns, teaching a class, presenting an innovative design to clients, interviewing patients, collaborating with community leaders, dialoguing with diverse populations, or delivering a closing statement to jurors, this interdisciplinary certificate program helps develop the presentation and analytical skills necessary for the wide variety of careers our graduates pursue. For more details, visit the Certificate in Professional Communication webpage.

Communication
Communication (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available on the Law 3+3 Program webpage.

Optional Co-op Track

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences. Participation in the co-op track will be noted on students' transcripts.

Special Programs

Undergraduate Student Organizations

- CommuniCATS
- Lambda Pi Eta
- UC Forensics/Debate Team
- UC Public Relations Student Society of America (PRSSA)
- UC Influence - Student Public Relations Firm

Internships

Communication majors can greatly enhance their educational experience while in college by conducting an internship in a field they are interested in exploring. Multiple internships in different careers in communication serve to both strengthen students' resumes and prepare them for the professional world. Requirements for internship include:

- Must be a communication major in good standing.
- Completion of the prerequisite course Careers in Communication.
- Registered for Internship course.

Departmental Honors

All graduating communication majors who earn a 3.4/4.0 GPA or above in the major will earn "Honors" status. All graduating communication majors who earn a 3.66 in the major will earn "High Honors" status. Students will be designated with their departmental honors at graduation. Maintaining a high GPA is important to your future success. High grades are necessary for admission into many of the top graduate programs. High grades also demonstrate to potential employers that you are intelligent, hard-working, able to learn and able to deliver what is asked of you.

- However, high grades alone will not be enough to set academically gifted students apart. You need to be able to demonstrate your achievements. For that reason, the department encourages honors students to seek out additional academic challenges.

The communication major is a dynamic and challenging degree. The department is proud of our students who achieve high grades. We encourage you to get to know the faculty. Personal recommendations can be very helpful. Moreover, we welcome you to consider furthering your education with a master's degree from our department. Of course, the faculty is also happy to talk with you about preparing for additional graduate and career opportunities that are available.

- Original research or participation in faculty research is a great way to prepare for graduate school. Original research also shows potential employers that you are able to design and implement a project and to seek out knowledge about an important question. Students interested in research should discuss the possibility of creating a project in communication with faculty members who share your area of interest.
- Enrolling in an advanced course will stretch you academically and give you exposure to the graduate program. Seeking out challenges is a great way to set yourself apart.
- Demonstrating leadership is key to translating classroom knowledge into the world. Employers and graduate programs look for potential leaders. Departmental advisors can help you to find out about communication-related organizations for students as well as leadership opportunities available in each.
- Awards and achievements are another way to help you succeed. The Department of Communication offers a number of scholarships and competitions through which you can distinguish yourself. Talk to your professors and advisors. You'll be glad you did!

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cumulative.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Columbus State Community College
- Lorain County Community College
- Sinclair Community College
- North Central State College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cumulative.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Communication

Online

Duration: 4 Years Total Credits: 120 Award: BA

Overview

The academic discipline of communication focuses on discourse among people, organizations and social institutions. The award-winning communication faculty members share a distinctive focus on contemporary social problems. Their research and the undergraduate program centers on understanding issues of voice, identity, public participation and advocacy/leadership across communication domains including interpersonal, organizational, political, rhetorical, environmental, health and mediated communication.

Students in the program develop strong communication skills grounded in an advanced, theory-based understanding of communication processes. Classroom skills are further developed through experiential learning and community engagement with team-based projects, internships and residencies, service learning and collaboration with community organizations.

Transfer students can complete this program totally online. Refer to the "Transfering to UC" section below for appropriate admission requirements.

Success

Communication majors have excellent critical-thinking and writing abilities, and they are concerned with understanding society and improving social institutions and the well-being of individuals. Communication is an excellent major for students who are interested in working with people and groups in a variety of fields, e.g., business, social work and law.

Career

Graduates with a BA in communication from the UC College of Arts and Sciences (A&S) are well prepared for many different career options. In our modern world, success in business and industry requires a sophisticated understanding of communication processes. Positions in human resource management, as well as marketing and public relations, require strong communication skills. Communication students are well prepared for advanced study in such areas as law and business because of the critical thinking skills they acquire along with the more practical speaking and writing skills at the core of a communication major. Graduates find jobs as:

- Admissions counselors
- Advertising account executives
- Communication educators
- Event planners
- Human resource specialists
- Marketing managers
- Sales representatives

Minoring

Any UC student can complete a minor in communication. The minor consists of 36 credits, including two Core Foundation courses, one Performance course, one Advanced Elective (3000-level or above), and two additional elective courses. For more details, visit the Minor in Communication webpage.

The department also offers a Public Relations Certificate for students who are interested in specializing in public relations. The certificate consists of 21 credit hours for Communication Majors, and 18 credit hours for non-Communication majors. Required courses emphasize both theory and practice through phases such as situation analysis, audience analysis, strategic analysis of options and planning, message design and program implementation and evaluation. A graduate should be well prepared to work in a variety of PR applications, including agencies, nonprofit organizations, corporations, government, advocacy organizations, health care and others. For more details, visit the Public Relations Certificate webpage.

The department also offers an Applied Communication Certificate for students who are not majors in Communication but want to enhance their professional communication skills. The certificate consists of 18 credit hours, including two Composition courses, one Performance course, one Research Methods course, and two Applications courses. Whether leading corporate meetings, writing effectively, explaining technical specs to consumers, negotiating workplace conflict, brokering business deals, understanding employee concerns, teaching a class, presenting an innovative design to clients, interviewing patients, collaborating with community leaders, dialoguing with diverse populations, or delivering a closing statement to jurors, this interdisciplinary certificate program helps develop the presentation and analytical skills necessary for the wide variety of careers our graduates pursue. For more details, visit the Professional Communication Certificate webpage.

Major Map Versions:
Communication (BA) Curriculum: Must have a COMM-DL major for this option

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Undergraduate Student Organizations

- CommuniCATS
- Lambda Pi Eta
- UC Forensics/Debate Team
- UC Public Relations Student Society of America (PRSSA)
- UC Influence - Student Public Relations Firm

Internships

Communication majors can greatly enhance their educational experience while in college by conducting an internship in a field they are interested in exploring. Multiple internships in different careers in communication serve to both strengthen students' resumes and prepare them for the professional world. Requirements for internship include:

- Must be a communication major in good standing.
- Completion of the prerequisite course Careers in Communication.
- Registered for Internship course.

Departmental Honors

All graduating communication majors who earn a 3.4/4.0 GPA or above in the major will earn "Honors" status. All graduating communication majors who earn a 3.66 in the major will earn "High Honors" status. Students will be designated with their departmental honors at graduation. Maintaining a high GPA is important to your future success. High grades are necessary for admission into many of the top graduate programs. High grades also demonstrate to potential employers that you are intelligent, hard-working, able to learn and able to deliver what is asked of you.

- However, high grades alone will not be enough to set academically gifted students apart. You need to be able to demonstrate your achievements. For that reason, the department encourages honors students to seek out additional academic challenges.

  The communication major is a dynamic and challenging degree. The department is proud of our students who achieve high grades. We encourage you to get to know the faculty. Personal recommendations can be very helpful. Moreover, we welcome you to consider furthering your education with a master's degree from our department. Of course, the faculty is also happy to talk with you about preparing for additional graduate and career opportunities that are available.

  - Original research or participation in faculty research is a great way to prepare for graduate school. Original research also shows potential employers that you are able to design and implement a project and to seek out knowledge about an important question. Students interested in research should discuss the possibility of creating a project in communication with faculty members who share your area of interest.
  - Enrolling in an advanced course will stretch you academically and give you exposure to the graduate program. Seeking out challenges is a great way to set yourself apart.
  - Demonstrating leadership is key to translating classroom knowledge into the world. Employers and graduate programs look for potential leaders. Departmental advisors can help you to find out about communication-related organizations for students as well as leadership opportunities available in each.
  - Awards and achievements are another way to help you succeed. The Department of Communication offers a number of scholarships and competitions through which you can distinguish yourself. Talk to your professors and advisors. You'll be glad you did!

Admission Requirements

Admission criteria to A&S online transfer-completer programs are:

- 61 semester (92 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

If you don't have 61 credit hours, please ask about other options for degree completion.

Transferring To UC

Admission criteria to A&S online transfer-completer programs are:

- 61 semester (92 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

If you don't have 61 credit hours, please ask about other options for degree completion.

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission criteria to A&S online transfer-completer programs are:

English

Creative Writing

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Our top-ranked Creative Writing program pairs aspiring undergraduate students with professors and instructors who are award-winning working artists, to study in small, close-knit workshop classes that emphasize the fruitful symbiosis between close reading and inventive writing. Students are encouraged to take courses in writing poetry, fiction, creative nonfiction, and cross genre or hybrid forms, where they gain a robust understanding of the literary conversation in which they wish to participate, and enjoy careful individual attention to their own original work.

In addition to growing as writers, readers, and thinkers, the workshop model trains students to give and receive criticism, problem-solve in creative and original ways, work effectively in a solo and self-disciplined way as well as in a collaborate group, and think broadly about the application of their work to their communities, in a living and evolving literary tradition. Students go on to work in such areas as advertising, copywriting, writing for television and cinema, arts administration, digital content creation, magazine writing and editing, information analysis, book publishing, law, education, and more.

Success

The English degree offers unique opportunities for undergraduate students to shape their curriculum according to their interests and future professional goals. All undergraduate students take a core group of courses designed to introduce them to the history, language, and current disciplinary discourses of English studies. Beyond the core courses, students choose a track designed to develop their skills and talents in Creative Writing (Fiction, Literary Nonfiction, Poetry), Literary & Cultural Studies, or Rhetoric & Professional Writing. We also offer a track in English Education to supplement a major in Secondary Language Arts through the College of Education, or to lead into a Master's degree plus licensure. Undergraduate students can double major in two tracks of English, and can also combine a major in one of the tracks with a certificate in a different track; the program offers certificates in Copyediting & Publishing, Creative Writing, and Professional Writing; Literary Journalism jointly with the Dept. of Journalism; and English courses play a role in the curriculum requirements of several interdisciplinary certificates, including Medical Humanities, Digital Engagement, and Film & Media Studies.

Students who pursue a BA in English – Creative Writing should desire to build on their strengths in writing, reading, and critical thinking. The Creative Writing track of the English major is specifically designed for students who wish to explore the writing of poetry, fiction, and literary nonfiction; improve their editorial skills; and examine works of literature through the lens of craft. Students take a sequence of workshop courses, culminating in a capstone that will result in a substantial body of work. Literature classes in the chosen genre continue to expand students' reading, writing, and critical thinking skills, as well as their knowledge of both canonical and contemporary works.

Career

English majors enjoy satisfying careers and admission to graduate programs due to their ability to read closely, write clearly, research thoroughly, and think critically. From first-year composition through senior capstone courses, English students engage a wide range of historical and contemporary texts and subject matter, including global, ethnic, minority, and popular literatures; film and visual media; and scientific and professional writing. Our majors are known and respected for their ability to communicate effectively both verbally and in writing, and find success in such diverse fields as law, business, media, education, publishing, and science. English – Creative Writing graduates are well suited for careers in:

- Book and magazine publishing
- Arts administration
- Education
- Marketing and public relations
- Film and television writing
- Advertising
- Law
- Libraries
- Journalism

Minoring

A minor in English complements any major, and offers students from other disciplines the opportunity to develop the reading, writing, and critical thinking skills that employers seek in college graduates. Students choose courses from Creative Writing, Literary & Cultural Studies, and Rhetoric & Professional Writing, and may focus on one particular area of study or take courses from two or all three tracks in order to explore different areas of English.

Students can delcare the minor online through the Program Changes & Readmissions Form.

The department of English offers three certificate programs: Copyediting & Publishing, Creative Writing, and Professional Writing; plus Literary Journalism jointly with the Dept. of Journalism. Certificate programs provide more focus and less time commitment than a minor, and provide an opportunity for undergraduate students to more fully develop skills in reading, writing, and analysis in their chosen area of interest.

The Creative Writing certificate is designed for students who wish to write poems, fiction, or nonfiction, to improve their writing and abilities through workshops taught by practitioners, and possibly to go on to graduate programs in creative writing and careers such as teaching and editing. The program is also for students who wish to broaden their perspectives of literature to include that of the writer.

UC Advantages And Special Opportunities

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available on the College of Law 3+3 Programs page.

Special Programs

Publications and Organizations

English is home to an undergraduate journal, *Short Vine*, and the nationally prominent literary journal *The Cincinnati Review*. *Short Vine* is edited by English majors in the practicum course Creative Writing & Literary Publishing.

Events

The Creative Writing Program's Visiting Writers Series brings a number of distinguished authors to campus each semester. Visitors often conduct a colloquium with creative writing students in addition to giving a public reading. Each year, through the Elliston Poet-in-Residence Program, a distinguished poet comes to campus to give public lectures and readings, and to conduct poetry seminars and workshops. The biennial Emerging Fiction Writers Festival brings four writers to campus for two days of readings and panels. Past visiting writers have included Rita Dove and Colson Whitehead.

The Undergraduate English Society welcomes all English majors, and hosts events such as roundtable discussions on graduate school, job fairs, film screenings, and outings to plays and readings.

Experiential learning

English students can intern with local businesses, nonprofits, university offices, state agencies, media outlets, and museums, and earn college credit while developing reading and writing skills. Students can also gain valuable experience by taking research-intensive or service learning courses, by studying abroad, and by entering their work in the department's writing contest each year.

Renowned faculty

Creative Writing faculty have collectively published dozens of books of fiction, poetry, literary nonfiction, and criticism. They have won awards from the National Endowment for the Arts, the Fulbright Program, and the National Book Awards program.

Admission Requirements

Freshman applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have at least a 2.0 GPA in all college-level courses (both at UC and at other institutions).

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

English

English Education

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Do you want a career as a high school or middle school English teacher? This track of the English major, coupled with a Bachelor's or Master's degree in Secondary Education, trains you to enter the teaching profession in English Language Arts at the secondary level and makes you more competitive on the job market. The courses you take provide a thorough knowledge of literature and approaches to literary and cultural analysis, as well as instruction in effective stylistic, analytic, and creative writing. Through the Secondary Education major, students also have opportunities to study drama and/or journalism, because Secondary English teachers are often asked to supervise a school's drama program or to advise the school newspaper or yearbook. This track has been specially designed to align with a major in Secondary Education through UC's College of Education, Criminal Justice, & Human Services (CECH) so that you don't have to take many extra classes to achieve a double major.

This Baccalaureate program is designed for students who wish to earn a Bachelor's degree in English with a track in English Education and then, following graduation, enter UC's Secondary Education graduate program to receive a Master's degree in Curriculum and Instruction plus licensure to teach. Students will fulfill the requirements of the College of Arts & Sciences. Please note: Students who wish to *double major* in English and in Secondary Education with a concentration in English Language Arts should declare English Education as a *second* major (MAJ-ENGL) and Secondary Education (in the College of Education) as the first major.

Success

The English degree offers unique opportunities for undergraduate students to study the history, language, and current disciplinary discourses of English studies. While undergraduate students can choose from tracks in Creative Writing, Professional Writing, and Literary & Cultural Studies, students in the English Education track will focus on coursework that will prepare them to teach Language Arts in middle and high school settings. The English Department also offers certificates in Creative Writing, Professional Writing, and Copyediting & Publishing, and English courses play a role in the curriculum requirements of several interdisciplinary certificates, including Literary Journalism, Medical Humanities, Digital Engagement, and Film & Media Studies.

Students who declare the major to prepare for entry into a Master's plus Licensure program in Education (or who pursue a second major in English Education) should desire to build on their strengths in writing, reading, and critical thinking, while learning valuable techniques for teaching Language Arts.

Career

If you want to join a profession in which jobs are plentiful and you can make a real difference in young people's lives, by cultivating a love of reading and helping to develop their skills as critical thinkers and writers, this track is for you!

English majors enjoy satisfying careers and admission to graduate programs due to their ability to read closely, write clearly, research thoroughly, and think critically. From first-year composition through senior capstone courses, English students engage a wide range of historical and contemporary texts and subject matter, including global, ethnic, minority, and popular literatures; film and visual media; and scientific and professional writing. Our majors are known and respected for their ability to communicate effectively both verbally and in writing, and find success in such diverse fields as law, business, media, education, publishing, and science. A major in English Education will complement your major in Secondary Education, taking you more deeply into English Studies and making you more appealing to potential employers.

Minoring

Minoring in English

A minor in English complements any major, and offers students from other disciplines the opportunity to develop the reading, writing, and critical thinking skills that employers seek in college graduates. Students choose courses from Creative Writing, Literary & Cultural Studies, and Rhetoric & Professional Writing, and may focus on one particular area of study or take courses from two or all three tracks in order to explore different areas of English.

Certificates in English

The department of English offers three certificate programs: Professional Writing, Creative Writing (Poetry, Fiction, and Literary Nonfiction), and Copyediting & Publishing; we also offer a certificate in Literary Journalism jointly with the Department of Journalism and English courses play a pivotal role in the certificate in Medical Humanities. Certificate programs provide more focus and less time

commitment than a minor, and provide an opportunity for undergraduate students to more fully develop skills in reading, writing, and analysis in their chosen area of interest.

Curriculum

The curriculum for a major in English Education is designed to align with the curriculum for Secondary Education in Language Arts. Students should consult advisors in both programs prior to registering for classes.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
English: English Education (Optional Co-op Subplan)

Advising

Students will complete the requirements for the major in English Education as they complete the degree in Secondary Education with a concentration on Language Arts. Consult the advisors in Secondary Education to ensure that you take the correct courses at the appropriate point in your academic career.

UC Advantages And Special Opportunities

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

Publications and Organizations

English is home to an undergraduate journal, *Short Vine*, and the nationally prominent literary journal *The Cincinnati Review*. English majors in the experiential course Creative Writing & Literary Publishing edit and publish *Short Vine.* English majors also have opportunities to join the Undergraduate English Society (UES); events include roundtable discussions on graduate school, job fairs, film screenings, and outings to plays and readings.

Events

English majors enjoy opportunities to hear a number of distinguished authors read their work through our Visiting Writers Series. Likewise, the biennial Emerging Fiction Writers Festival brings four writers to campus for two days of readings and panels. Past visiting writers have included Rita Dove and Colson Whitehead.

Experiential learning

English students can intern with local businesses, nonprofits, university offices, state agencies, media outlets, museums, and more, and earn college credit while developing reading and writing skills. Students can also gain valuable experience by taking research-intensive or service learning courses, by studying abroad, and by entering their work in the department's writing contest each year.

Renowned faculty

English faculty are active scholars who publish and present in their field. Many teach both undergraduate and graduate courses, and develop strong relationships with their students.

Admission Requirements

Freshman applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

English

Literary & Cultural Studies

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Students in the Literary & Cultural Studies track hone their skills as attentive **readers** of literature (poems, plays, literary fiction and nonfiction) and other media (films, comics, television shows, songs, and websites, for example), and as **writers** engaged in literary analysis and cultural criticism. Our students gain knowledge of literary language, form, genres, and histories through study of national, ethnic, and world literatures. They also sharpen their skills as critical **thinkers** by drawing on various literary, cultural, and interdisciplinary theories—from psychoanalytic theory and post-structuralism to queer theory and the digital humanities—to analyze texts. In doing so, they engage issues involving culture, identity, language, ethics, race, gender, class, and globalism, among many others.

Critical thinking, close reading, and reflective, analytic, and persuasive writing are among the vital skills you can acquire as an LCS student and readily apply to your other courses and your career. Our students also get practice in conducting effective **research**, which becomes central to projects undertaken in our senior capstone course. The typical LCS course strongly encourages a substantial amount of discussion among students as well as with the teacher. Graduates from our program pursue successful careers in areas such as law, education, writing and editing, publishing, library sciences, arts administration, social justice work, public relations, business, and any field where careful and critical reading and effective communication are valued.

Success

The English degree offers unique opportunities for undergraduate students to shape their curriculum according to their interests and future professional goals. All undergraduate students take a core group of courses designed to introduce them to the history, language, and current disciplinary discourses of English studies. Beyond the core courses, students choose a track designed to develop their skills and talents in Creative Writing (fiction, literary nonfiction, poetry), Literary & Cultural Studies, or Rhetoric & Professional Writing. Undergraduate students can double major in two tracks of English, and can also combine a major in one of the tracks with a certificate in a different track; the program offers certificates in Copyediting & Publishing, Creative Writing, Professional Writing, and Literary Journalism (jointly with the Dept. of Journalism). English courses play a role in the curriculum requirements of several interdisciplinary certificates, including Digital Engagement, Film & Media Studies, and Medical Humanities.

Students who pursue a BA in English – Literary & Cultural Studies should desire to build on their strengths in writing, reading, and critical thinking. The Literary & Cultural Studies track is specifically designed for students who wish to hone those skills through the study of literature.

Career

English majors enjoy satisfying careers and admission to graduate programs due to their ability to read closely, write clearly, research thoroughly, and think critically. From first-year composition through senior capstone courses, English students engage a wide range of historical and contemporary texts and subject matter, including global, ethnic, minority, and popular literatures; film and visual media; and scientific and professional writing. Our majors are known and respected for their ability to communicate effectively both verbally and in writing. English – Literary & Cultural Studies graduates are well suited for careers in:

- Law
- Education
- Writing and editing
- Publishing
- Library sciences
- Arts administration
- Social justice work
- Public relations
- Business

Minoring

Minoring in English

A minor in English complements any major, and offers students from other disciplines the opportunity to develop the reading, writing, and critical thinking skills that employers seek in college graduates. Students choose courses from Creative Writing, Literary & Cultural Studies, and Rhetoric & Professional Writing, and may focus on one particular area of study or take courses from two or all three

tracks in order to explore different areas of English.

Certificates in English

The department of English offers three certificate programs: Copyediting & Publishing, Professional Writing, and Creative Writing (poetry, fiction, and literary nonfiction), and Literary Journalism jointly with the Dept. of Journalism. Certificate programs provide more focus and less time commitment than a minor, and provide an opportunity for undergraduate students to more fully develop skills in reading, writing, and analysis in their chosen area of interest.

A certificate in Creative Writing is an excellent complement to a major in Literary & Cultural Studies, providing students with perspectives of the craft through the lenses of both reader and writer.

UC Advantages And Special Opportunities

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

Publications and Organizations

English is home to an undergraduate journal, *Short Vine*, and the nationally prominent literary journal *The Cincinnati Review*. English majors in the course ENGL 3096 Creative Writing & Literary Publishing edit *Short Vine* and learn about the publishing process from start to finish. Additionally, the Undergraduate English Society is open to all English majors, and members host and participate in events including roundtable discussions on graduate school, job fairs, film screenings, and outings to plays and readings.

Events

Literary & Cultural Studies majors enjoy opportunities to hear a number of distinguished authors read their work through our Visiting Writers Series. Likewise, the biennial Emerging Fiction Writers Festival brings four writers to campus for two days of readings and panels. Past visiting writers have included Rita Dove and Colson Whitehead.

Experiential learning

English students can intern with local businesses, nonprofits, university offices, state agencies, media outlets, museums, and more, and earn college credit while developing reading and writing skills. Students can also gain valuable experience by taking research-intensive or service learning courses, by studying abroad, and by entering their work in the department's writing contest each year.

Renowned faculty

Literary & Cultural Studies faculty are active scholars who publish and present in their field. Many teach both undergraduate and graduate courses, and develop strong relationships with their students.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Terra State Community College
- North Central State College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

English

Rhetoric & Professional Writing

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

The Rhetoric and Professional Writing track (RPW) prepares students to write persuasively and effectively in public and professional settings. We emphasize experiential learning opportunities, such as client-based class projects and internships, and offer students interdisciplinary and collaborative experiences that are important for a wide range of professional environments. The track prepares students to be informed, responsible participants in civic affairs and can lead to employment in commercial and non-profit organizations or graduate work in professional writing.

Success

The English degree offers unique opportunities for undergraduate students to shape their curriculum according to their interests and future professional goals. All undergraduate students take a core group of courses designed to introduce them to the history, language, and current disciplinary discourses of English studies. Beyond the core courses, students choose a track designed to develop their skills and talents in Creative Writing (fiction, literary Nonfiction, poetry), Literary & Cultural Studies, or Rhetoric & Professional Writing. We also offer a track in English Education to supplement a major in Secondary Language Arts through the College of Education, or to lead into a Master's degree plus licensure. Undergraduate students can double major in two tracks of English, and can also combine a major in one of the tracks with a certificate in a different track; the program offers certificates in Copyediting & Publishing, Creative Writing, and Professional Writing; Literary Journalism jointly with the Dept. of Journalism; and English courses play a role in the curriculum requirements of several interdisciplinary certificates, including Digital Engagement, Film & Media Studies, and Medical Humanities.

Students who pursue a BA in English – Rhetoric & Professional Writing should desire to build on their strengths in writing, reading, and critical thinking. The RPW track is designed for students who want to be the bridge between art and science. Professional writers are the artists who bring to life the science of business, technology, discoveries, and world events. They are the storytellers who translate complex phenomena to a target audience, connecting ideas and people. Professional writers do more than just put words on paper. They design. They create. They promote. They edit. They analyze. They construct ideas. They deliver results.

Career

English majors enjoy satisfying careers and admission to graduate programs due to their ability to read closely, write clearly, research thoroughly, and think critically. From first-year composition through senior capstone courses, English students engage a wide range of historical and contemporary texts and subject matter, including global, ethnic, minority, and popular literatures; film and visual media; and scientific and professional writing. Our majors are known and respected for their ability to communicate effectively both verbally and in writing, and find success in such diverse fields as law, business, media, education, publishing, and science.

Our Professional Writing curriculum emphasizes in-depth understanding of communication processes that bridge disciplines and industries and enables our graduates to consider numerous career opportunities. We incorporate theory with practice into all our classes, considering issues of effectiveness, consequence, and responsibility. Students advance their skills in writing, editing, design, project management, and technology. English – Rhetoric & Professional Writing graduates are well suited for careers in:

- Science
- Technology
- Business
- Non-profit management
- Civic affairs
- Technical communication
- Editing and publishing
- Web development
- Medicine and healthcare
- Environmental writing

Minoring

A minor in English complements any major, and offers students from other disciplines the opportunity to develop the reading, writing, and critical thinking skills that employers seek in college graduates. Students choose courses from Creative Writing, Literary & Cultural Studies, and Rhetoric & Professional Writing, and may focus on one particular area of study or take courses from two or all three tracks in order to explore different areas of English.

Click here to declare the minor online

The department of English offers three certificate programs: Copyediting & Publishing, Professional Writing, and Creative Writing (poetry, fiction, and literary nonfiction), plus Literary Journalism jointly with the Dept. of Journalism. Certificate programs provide more focus and less time commitment than a minor, and provide an opportunity for undergraduate students to more fully develop skills in reading, writing, and analysis in their chosen area of interest.

The Professional Writing certificate prepares you to write, edit, and design projects in your field and complements any major or career. Courses in the program incorporate elements of communication, marketing, journalism, and web development and offer students experiential learning opportunities as well as access to industry professionals.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

Experiential learning

English students can intern with local businesses, nonprofits, university offices, state agencies, media outlets, and more, and earn college credit while developing reading and writing skills. Students can also gain valuable experience by taking research-intensive or service learning courses, by studying abroad, and by entering their work in the department's writing contest each year.

Our Professional Writing program takes an innovative approach to experiential learning that incorporates service learning through client-based projects and internships. The service-learning element stresses students' reflection on their experience in terms of being a professional consultant—a role that significantly affects the nature of the work performed and raises special ethical issues. Students also complete a rigorous internship.

Internship program

The Professional Writing track offers a robust internship program. Students who apply for and secure an internship take two courses and earn six credit hours for internship work. In addition, many classes in Professional Writing complete client-based projects such as websites and publications.

Renowned faculty

Rhetoric & Professional Writing faculty are experienced professional writers and editors with many years of experience in fields such as business, medicine and healthcare, science, technology, social sciences, and technical and environmental writing.

Publications and Organizations

The Undergraduate English Society includes all English majors, and is open to anyone interested. Events include roundtable discussions on graduate school, job fairs, film screenings, and outings to plays and readings. English is also home to an undergraduate journal, *Short Vine*, and the nationally prominent literary journal *The Cincinnati Review*. *Short Vine* is edited by students in the experiential course ENGL 3096 Creative Writing & Literary Publishing.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Environmental Studies

Duration: 4 Years Total Credits: 120 Award: BA

Overview

The Environmental Studies BA program produces professionals who are knowledgeable in the traditional areas of humanities, social sciences, and natural sciences, and have the skills to understand the origins of environmental problems and develop viable environmental solutions.

Students are trained to think analytically, reason critically, communicate effectively, and lead responsibly. This program equips students to make positive contributions to their local community, the country, and the world by connecting knowledge and action to solve environmental problems. Environmental Studies students can "speak the language" of the multiple disciplines involved in environmental problem solving and address the problems of climate change, environmental justice, resource depletion, population growth, public health, and hunger using creative and sustainable approaches.

Success

Success in environmental studies requires both a curiosity about and a passion for the natural world. Understanding the complexity of environmental problems and developing effective solutions requires creativity, flexibility, imagination, and a talent for both written and oral communication. Successful students have strong analytical and critical thinking skills and an interest in an interdisciplinary approach to environmental problem solving.

Career

The Environmental Studies BA curriculum includes more of the social sciences and humanities aspects of environmental studies than does the BS degree option. The goal of the BA is to equip students with transferrable and employable skills and knowledge for successful careers in environmental journalism, policy, law, advocacy, and planning in government agencies, non-profit organizations, businesses, and academia.

Curriculum

The Environmental Studies BA program provides students with a structured interdisciplinary curriculum to broaden their perspectives on environmental issues. The curriculum links environmental science with anthropology, history, literature, journalism, philosophy, communication, economics, philosophy, and other fields in the social sciences and humanities. Students study a broad range of environmental thinking and explore different facets of environmental problems and solutions through the lenses of environmental justice, advocacy, policy, governance, management, and planning.

The program offers team-based projects, writing-intensive courses, service and experiential earning, and collaborations with community organizations. The program also offers study abroad opportunities.

Environmental Studies

BA

Environmental Studies BA (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
EVST1011	Introduction to Environmental Studies I (C- min)	3
PD1015	Next Bearcat Lives Here	3
BoK: QR	Quantitative Reasoning	3
BoK: SCE	Foreign Language	3

Spring Semester Year 1

Course	Title/Desc	Credit
EVST1012	Introduction to Environmental Studies 2 (C- min)	3
BoK: SCE	Foreign Language	3
BoK: SCE	Society, Culture, & Ethics	3
	A&S First-Year Seminar Course option list provided each semester by advising office	3
Free Electives	Free Elective	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2170	Professionalism for the Major	2

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
EVST1050	Environmental Inquiry (C- min)	3
PD2170	Professionalism for the Major	2
POL2031	Environmental Policy (C- min)	3
BIOL CHEM GEOL BoK: NS	Natural Sciences (BIOL, CHEM, or GEOL) (C- min)	3 - 4
	Foreign Language or Free Elective	3

Spring Semester Year 2

Course	Title/Desc	Credit
PHIL3027	Environmental Ethics (C- min)	3
BIOL CHEM GEOL BoK: NS	Natural Sciences (BIOL, CHEM, or GEOL) (C- min)	3 - 4
	Foreign Language or Free Elective	3

Literature & Writing (select one)

Course	Title/Desc	Credit

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Film and Media Studies

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Film, television, and screen media have grown increasingly ubiquitous and complex in the 21st century, making it essential that we are able to understand, control, and create media in the workplace and in our professional, civic and private lives. The interdisciplinary BA program in Film & Media Studies is built to train students to comprehend, analyze, and participate in local and global film and screen media cultures and industries. Majors will explore important issues, theories, movements, and histories of media throughout the globe. They will study both traditional and new media and technologies from film and television to video games and web series. They will gain both theoretical and practical knowledge of the many ways of making and distributing screen media. The major in Film and Screen Media Studies will prepare students for careers in media and technology, education, journalism, filmmaking, audio-visual archives, as well as prepare them for graduate studies in media.

In addition to classroom instruction, the program offers numerous internships and international study tours that provide experiential learning and practical training. The program is designed to pair with a variety of other majors and minors to equip students with a strong and marketable toolbox of relevant skills and certifications.

Career

Career Possibilities:

- Film programmer
- Museums & festival curator
- Game designer
- Journalist
- Editor
- Screenwriter
- Teacher
- Filmmaker
- Copywriter
- Digital marketing
- Media producer

Majoring

BA in Film & Media Studies (36 credits)

Introductory Core (9 cr.) *Students should take each of the following three courses. It is recommended to take 1051 first, but 1052 and 1053 can be done out of sequence.*

FILM 1051 Intro Film & Media

FILM 1052 Film & Media History

FILM 1053 Global Film & Media

Advanced Core (12 cr.) *Take each of the following courses. Other 4000-level courses can replace the Capstone with prior arrangement.*

FILM 2001 Exploring Media

FILM 3001 Film Genres & Movements

FILM 3002 Film Theory

FILM 5001 Seminar in Film & Media Studies

Experiential Core (6 cr.) *Take two of the following courses.*

FILM 2081 Making Media

FILM 2091 Cinema Study: Europe

FILM 2095 Film & Media Intern

Major Electives (9 cr.) *Take three of the following courses.* FILM 3001 *may be repeated from the Advanced Core requirement when the topic is different.*

FILM 1055 TV Genres - Fulfilled by E-Media 1075

FILM 2005 Topics in Film Studies

FILM 2008 Game Studies

FILM 2015 Intro Screenwriting

FILM 2053 Nazi(s in) Cinema

FILM 2060 Sex and Race at the Movies

FILM 3001 Film Genres & Movements

FILM 3009 Topics: Film & History

FILM 4035 Euro Travel Film

Minoring

Minor in Film and Media Studies (18 credits)

Core Courses [12 Credits] These courses should be taken in the first 3 semesters of studies. It is recommended that you take 1051 first, but 1052 and 1053 need not be taken in chronological order.

FILM1051 Introduction to Film Studies

FILM1052 Film and Media History

FILM1053 Global Film and Screen Media

FILM 2001 Exploring Screen Media

Experiential Requirement [3 Credits]

FILM 2081 – Theory and Practice (also DMC 2081)

FILM 2091 – Study Tour: Europe

FILM 2092: Study Tour: Montreal

FILM 2095: Internship

Elective Film and Screen Media Course [3 Credits] Students will select one course from the following list (or another approved course)

FILM 2005 – Topics

FILM2008 – Game Studies

FILM 2052 Cinematic Storytelling (Also ENGL 2052)

FILM 2053 Nazis in Cinema (also GRMN 2053)

FILM 2060 Sex and Race at the Movies (also WGS 2060)

FILM3001 – Film Movements (Or the course in the offering department that 3001 is linked to)

FILM3002 – Film Theory

FILM 3009 – Advanced Topics in Film and History

FILM 3094 – Issues in Film Studies

FILM 3096 – Race and Gender in Video Games

FILM4005 – Seminar in Film and Screen Media Studies

FILM 4035 – Travels in European Cinema

FILM5050 – Capstone

Film & Media Studies - effective spring 2025

UC Advantages And Special Opportunities

The graduate certificate in Film & Media Studies unites faculty and students from three Colleges (A&S, CCM, and DAAP) in order to offer students training in both theory and practice. UC's strengths in media production and in visual studies combine to offer students hands-on experience in production along with training in the analysis of media and visual culture.

Special Programs

Any student in good standing in his or her graduate program qualifies. Applications will be made to the Director of Film Media and Visual Studies. Applications will consist of: (1) a statement of purpose, (2) a transcript, and (3) a letter of support from the applicant's graduate program director. To apply please go to the online application

Admission Requirements

For information, please visit UC's Undergraduate Admissions pages if you are a high school applicant, transfer student, international student, or admitted student.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA.

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Application Deadlines

Applications accepted at any time.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

French

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Fluency in a second language is a valuable skill. French is an official language of 28 countries on five continents, including France, Canada, Belgium, Senegal and Vietnam. Learning French will allow you to converse with and better understand people throughout the world. Along with English, French is the world's most important diplomatic language. It is an official language of such organizations as the United Nations, UNESCO, NATO and the international Red Cross.

France, one of the world's largest economies, is a leader in the export of luxury goods and technology. Canada's French-speaking province of Quebec is in itself one of the largest trading partners of the United States. For this reason, French is an important language for conducting business in the United States and elsewhere. Finally, French is unsurpassed as a language of culture. Discussions about literature, art, gastronomy and fashion inevitably start from and return to France. By studying French, you will be able to experience the varied products of French culture firsthand and to travel more easily in the world's top-rated tourist destination.

Success

Students in French usually possess strong verbal skills, some facility with languages and a desire to travel and interact with other cultures.

Career

Students who have earned a BA in French have become:

- Secondary education teacher
- Instructor at colleges and universities
- Foreign service officer
- Translator
- Interpreter
- Sales representative
- Director of marketing
- Lawyer

Minoring

To obtain the minor in French (or French certificate for graduate or non-degree students), you must complete a total of at least 21 credit hours in French at 2000-level and above.

1. **Pre-Requisite Courses** (not applicable toward 21-hour minor requirement)
    - For beginning students, complete or place out of the basic language sequence
        - FREN 1011, 1012, 1013, 1014 (Extended Basic French), 12 credits; OR
        - FREN 1001, 1002 (Basic French), 10 credits
    - Complete or place out of Composition and Conversation
        - FREN 2015, 2016 (French Composition and Conversation), 6 credits
        - Students who take the courses may count 2015, 2016 as electives toward the total number of 21 hours of credit for the minor.
2. **Required Courses**
    - FREN 3001 (French Grammar and Composition), 3 credits
    - FREN 3041 (Introduction to French Literature), 3 credits
3. **Elective Courses**, 9-15 credits
    - Students choose FREN courses at the 3000 level or above (FREN 2015, 2016 will count for those starting at the 2000-level and earning a B or higher). Students must earn a minimum of 9 credits in the College of Arts and Sciences at UC. Of these, a minimum of 6 credits toward the minor must be at the 2000-level or higher. FREN 4001 is strongly recommended.

Total hours required in the French minor: 21

Per the department's undergraduate policies, students need to earn a C or higher in all classes counting towards the French minor.

Students can declare the minor online using the Program Changes & Readmissions Form.

Advising

Contact the program director, whose name and information appear on this page.

UC Advantages And Special Opportunities

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Study Abroad

The Department of Romance Languages & Literatures strongly encourages students to study abroad. We sponsor a variety of programs of different durations in different countries-- from Mexico and Spain to France, Italy and Brazil. Learn more about Study Abroad.

Admission Requirements

Incoming firest-year students should review the High School Student admissions page.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.

- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

FREN GPA

A cumulative 2.0 minimum GPA is required in all major coursework.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Geography

Human-Urban Economic

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Geography examines the spatial dimensions of human activities and their interactions with physical landscapes. Geographers use social and physical sciences to study the way people interact with each other and their environment.

Geography is hugely important today in making sense of big data through maps and other interactive media. At UC's College of Arts and Sciences, geography students use geospatial technology such as satellites, and drones to investigate problems facing society. At UC, your research will help people make the most informed decisions about urban planning, environmental science or industry.

UC is recognized nationally as a top research university by the Carnegie Foundation. Here, your research matters. At UC you can follow your interests with study abroad or international fieldwork.

At UC, you learn to think spatially and apply quantitative and qualitative methods to your research. UC geography graduates work in business, government, academia and nonprofit groups. The U.S. Bureau of Labor Statistics predicts geography jobs will grow by 7 percent in the next decade. The job market is especially strong for those with skills in Geographic Information Systems (GIS) with BS, BA, MA and PhD degrees.

Success

Students are successful when they have an interest in learning about and understanding (1) world events, (2) local events within cities, (3) the urban, global, economic and political processes underlying world and local events, (4) human impact on the physical environment and (5) when they have the skills necessary to process, display and analyze geographic information.

Career

Geography provides a good educational background for students interested in a variety of careers in business, various government agencies (federal, state, county, city), nonprofit agencies or as college and university professors. Geography provides strong preparation for professional and graduate schools (law, medicine, business, geography or other physical or social sciences). Employment for students with strong geographic computer skills (GIS) is particularly strong. Examples of geography-related jobs in various areas include:

- U.S. Agency for International Development
- Audubon Society
- Bureau of Land Management
- Bureau of the Census
- Cartographer
- Geographic software programming
- Housing and urban development
- Market research
- Sierra Club
- Teaching
- Travel industry

Minoring

Students minoring in geography choose a concentration in one of the following: human geography, urban and economic geography, environmental geography, regional geography or geographic information systems (GIS).

Students must pass all required geography courses with a C or better.

Curriculum

Geography: Human Urban Economic BA (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences (A&S) enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Geography majors often engage in study abroad opportunities or international field trips. Some students pursue professional internships arranged on an *ad hoc* basis.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

UC operates on a semester system, with three 14-week grading periods beginning in late August, early January, and early May. While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to teh UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

GEOG5191C	Advanced GIS & Web GIS	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Geology

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Geology has undergone a revolution in the past decade, becoming an interdisciplinary science that emphasizes the study of major Earth systems - the solid Earth, the Earth's surface, the hydrosphere, atmosphere, and cryosphere (ice!), and the ancient and modern biosphere. Geology majors learn how these systems work and how they are connected. Geology majors integrate knowledge of Earth materials, the processes that have shaped them and the deep chronology of Earth history to understand global change through time.

Success

Geology provides many opportunities for travel and fieldwork. Students who enjoy hiking and camping and can learn by examining samples of minerals, rocks, fossils, soils and other geologic materials will be ready to succeed in geology. Map reading and the ability to visualize in three dimensions help enormously in "seeing" landscapes and the geometry of rock formations. Geology includes quantitative analysis of a variety of data, and ability in mathematics can be indispensable. Geology integrates aspects of chemistry, physics and biology. Students attracted to science in general will succeed.

Career

The Bachelor of Arts in Geology degree program is designed for undergraduates who wish to study geology as a foundation for careers in a variety of areas, such as environmental law, natural resource industry, land use planning, earth science education, science journalism and many government positions. There are positions for graduates with a BA in geology in environmental consulting, secondary education and other related fields. Graduates with a BA in geology are generally well prepared for graduate study, which is required for many professional positions although, as noted below, additional courses in math and associated sciences may be required in graduate school. The skills that geology majors learn in observation, data analysis, field mapping, surveying, computing and communicating make them well prepared for a wide variety of employment. Career possibilities include:

- Environmental engineer
- Environmental consultant
- Environmental Protection Agency employee
- Petroleum geologist
- Employee of state geological surveys
- Park naturalist
- Museum curator
- University professor
- Employee of the U.S. Geological Survey
- Book editor
- Computer analyst
- Public policy consultant

Minoring

Important advances in our understanding of Earth materials, processes and history are being made by integrating different branches of geology. More than ever before, earth scientists from different subdisciplines are collaborating to establish links among different Earth systems (for example, erosion and the geomorphic evolution of the Himalayas has helped govern its tectonic and metamorphic evolution). To this end, the Department of Geosciences welcomes students from all other disciplines to pursue a minor in geology.

In addition, even students with primary interest in such fields as political science would benefit from expertise in geology because of the public policy ramifications.

The UC College of Arts and Sciences requires 33-35 credits for completion of a minor.

Click here to declare the minor online

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Field Study

The Department of Geology provides majors the special combination of emphasizing field study that is local, regional and international in scope, encouraging majors to pursue their own interests and supporting independent student research projects all in a student-friendly atmosphere. Field- and lab-based courses and field trips are an essential part of the undergraduate program. Field trips are regularly taken to Alaska, Iceland and the Himalaya of northern India. Most majors attend summer field camp, and the department provides scholarships to help support their expenses. Students have recently attended camps in Alaska, Italy, Nevada, California and Hawaii. Working as assistants to department graduate students in their field and laboratory research is an additional opportunity for majors.

Capstone

Each senior is required to complete a "capstone experience" that involves: a) hands-on integration of knowledge, b) analytical and problem-solving aspects, c) written and oral documentation and d) demonstration of some aspect of social relevance. There is considerable flexibility in this requirement. Geology students have two major options: a) field course/camp experience (recommended for most students) or b) individualized training and research projects. Students should work with the undergraduate advisor to determine which option is the most appropriate.

I. Field course option: The primary means for completing the capstone experience will involve "traditional" geology field camps (typically four to six weeks mapping).

II. Individualized study option: Alternatively, students may propose an individualized program of rigorous study and research. This program must involve a field component (it might include, for example mapping a quadrangle under supervision of a faculty member, together with a report; it might also include a project that involves the collection and analysis of field samples).

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of*

their earned hours comes to at least 120.

- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Geology

BA

Geology BA (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
ENGL1001	English Composition	3
GEOL1001C	First Year Seminar I: Geology and Paleontology (C- min)	3
BoK: HP	Historical Perspectives	3

Spring Semester Year 1

Course	Title/Desc	Credit
GEOL1002C	First Year Seminar II: Earth Surface Processes and Environmental Issues (C- min)	3
GEOL	GEOL1003L: Physical Geology Laboratory Must take the section of the course offered by the College of Arts & Sciences. (C- min)	1
PD1170	Career Readiness for the Liberal Arts	1
BoK: HU	Humanities	3

Select one lecture and the corresponding lab

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life (C- min)	3
BIOL1081L	Biology I Laboratory (C- min)	1
CHEM1041	General Chemistry II (C- min)	4
CHEM1041L	General Chemistry Laboratory II (C- min)	1
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based) (C- min)	1
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based) (C- min)	1

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following courses in Fall Semester of Year 2:

Students may declare the co-op track after completing the two courses below. They will work with their advisor to choose the appropriate semester and co-op course for each experience.

Course	Title/Desc	Credit
GEOL2100	Careers in the Geosciences	1
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 1 full-time co-op or 2 part-time co-ops and a sprint:

Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
GEOL2005C	Geomorphology and Surface Hazards (C- min)	3
GEOL2008C	Mineralogy (C- min)	3
GEOL2100	Careers in the Geosciences (C- min)	1
	Foreign Language	3 - 5
Free Electives	Free Elective if needed	3

Spring Semester Year 2

Course	Title/Desc	Credit
GEOL2004C	Sedimentary Geology and Earth History (C- min)	3
GEOL2012	The Earth System (C- min)	3
BoK: SS	Social Sciences	3
	Foreign Language	3 - 5

Quantitative Reasoning (select one)

Optional Co-op Plan

Full-time option

Experience 1 (Option 1): Full-time Co-op

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Quantitative Reasoning (select one)

Course	Title/Desc	Credit
MATH1044	Applied Calculus I (C- min)	3
MATH1061	Calculus I (C- min)	4

Course	Title/Desc	Credit
MATH1045	Applied Calculus II (C- min)	3
MATH1062	Calculus II (C- min)	4
STAT1034	Elementary Statistics I (C- min)	3

Experience 2 (option 2): 2 Part-time Coops and 1 sprint

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
	COOP2000 and COOP3000 and Any course with an EL Attribute and advisor approval This option included 2 part-time Co-ops and a sprint	0

Fall Semester Year 3

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
GEOL	GEOL 3000-level courses Take one or two from GEOL3000C, 3002, 3005C (a total of 9 credits at the 3000-level is needed over fall and spring terms) (C- min)	3 - 6
	Foreign Language or Free Elective	3
Free Electives	Free Elective	3
Free Electives	Free Elective if needed	3

Spring Semester Year 3

Course	Title/Desc	Credit
GEOL	GEOL3000-level courses Take one or two from GEOL3003C, 3004C, 3006 (a total of 9 credits at the 3000-level is needed over fall and spring terms) (C- min)	3 - 6
HIST BoK: HP	Historical Perspectives (HIST)	3
	Foreign Language or Free Elective	3
Free Electives	Free Elective	3
Free Electives	Free Elective if needed	3

Summer Semester Year 3

Course	Title/Desc	Credit
	CAPSTONE Participate in a 3-6 hour field camp or related field or laboratory experience. GEOL upper-level field courses (GEOL4023, GEOL4033) may be used toward this requirement. This requirement also fulfills the Experiential Learning and Culminating Career Education Touchpoint.	3 - 6

Fall Semester Year 4

Course	Title/Desc	Credit
GEOL4XXX	GEOL4000-level course See details below (C- min)	3 - 7
BoK: SS	Social Sciences	3
Free Electives	Free Elective	3
BoK: SCE	Society, Culture, & Ethics	3
Free Electives	Free Elective if needed	3

Spring Semester Year 4

Course	Title/Desc	Credit
GEOL4XXX	GEOL4000-level course See details below (C- min)	3 - 7
Free Electives	Free Elective	3
BoK: FA,HU	Fine Arts or Humanities	3
Free Electives	Free Elective	3
Free Electives	Free Elective if needed	3

Geology Major Requirement

Each major course (GEOL, MATH, STAT, BIOL, PHYS) must be passed with a C- or better and the major GPA must be a minimum 2.0 or higher.

Geology 4000-level course requirement

Two out of the three required courses must be from the list below.

Course	Title/Desc	Credit
GEOL	GEOL 4000-level course list GEOL4001C, 4002C, 4003, 4004, 4007, 4010C, 4012C, 4013, 4018C, 4024, 4025C, 4028, 4029, 4036, 4037, 4038, 4040, 4042, 4044, 4048C, 4049C, 4050C, 4051C, 4053C/4054C, 4056, 4058, 4059. (C- min)	3 - 4

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

German Studies

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

German is an interdisciplinary program that focuses on the language, culture, history, politics and literature of Germany and other German-speaking countries, as well as their influence on other cultures in Europe and beyond. The Department of German Studies at UC specializes in contemporary Germany, which boasts one of the world's most powerful economies and holds a central leadership role within the European Union. We believe, however, that today's Germany cannot be understood without reference to German history. Therefore, we offer courses that range from the Middle Ages to the 21st century and deal with a wide variety of topics and texts. We also place a great deal of emphasis on the impact that German culture has had on Cincinnati and consider German-American studies to be a vital component of our program.
Through academic course work, participation in study-abroad programs and interaction with outstanding faculty and visiting lecturers from around the world, German majors and minors have the opportunity to broaden their horizons and develop skills that will enrich their lives and enable them to contribute to greater global awareness when they assume roles in careers and society.

Success

Successful students in German studies come from a wide variety of backgrounds and skills. Verbal and musical learners are especially likely to succeed in German. However, students with a background in engineering also have found great success. If you are curious about other cultures, enjoy reading, are interested in traveling and experiencing the world, or can see yourself living and working abroad for some time, you should consider majoring in German studies.

Career

Students with a BA in German studies often pursue teaching careers, either in secondary education or in colleges and universities, following completion of graduate studies in the field. Many go on to professional schools, such as law and medicine. Other graduates become interpreters, translators and researchers or establish careers in the business world. Through careful planning, students can major in two fields and thus gain a greater breadth in their studies. German studies majors have gone on to become:

- Anthropologist
- Foreign correspondent
- Exchange trader
- Foreign service officer
- Social worker
- International account manager
- Interpreter
- National security agent
- Teacher
- Translator

Minoring

German Studies Minor

- GRMN 2002 (5 credits): Second Year German 2
- GRMN 3001-3002 (6 credits): Introduction to German Studies 1 & 2

The remaining nine credits may be earned by taking any courses the department offers aside from the required courses and the basic language courses. This choice of electives includes our study-abroad offerings. We also offer special options for students in other colleges, such as engineering, business, DAAP and CCM, who wish to pursue a minor in German studies and whose programs include co-op or other experience in a German-speaking country.

German-American Studies Certificate

Students pursuing a degree at the university may also earn a certificate in German-American studies, which requires introductory courses on the German-American experience and German culture as well as an extensive independent project.

German Studies (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The German studies program at UC provides students with a solid background in the German language and all aspects of German, Austrian and Swiss culture. We have special strengths in film studies, German-American studies and contemporary German literature and culture. We have strong study-abroad programs in Germany and work closely with other programs, such as European Studies and the international co-op program. We work with our majors and minors to customize their course of study to their needs and goals.

Study Abroad

The Munich program is a five-week, intensive-immersion language and culture course during the summer. There are three hours of intensive language instruction each day, Monday through Friday, plus a daily program of conversation classes conducted while visiting cultural and historical sites in and around Munich, and weekend excursions, all under the direction of a professor from UC's Department of German Studies. The Munich program may be used to satisfy some core requirements for the German major and minor; see the undergraduate director for details.

The summer field trip to Berlin is an interdisciplinary course taught in English for undergraduate students from across the University of Cincinnati. The variety in the background and interests of the participants assures the vitality of the experience, one focused on Berlin’s material culture, past, present and future. Students finish the course with an individual project completed in the autumn semester.

The 4+1 Master's Degree Program

Students complete all of the requirements for the German major, which includes the Survey of German Literature sequence typically required of first-year MA students. During their fourth (senior) year, students will be permitted to enroll in graduate courses. They can then complete the credit and course requirements for the MA in just one additional year with a standard full-time graduate course load.

More information is available on the German Studies website.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

GRMN3XXX+	Any GRMN3000+ level course	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

History

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

History majors study and analyze human experiences of the past. By doing so, they become better able to understand other societies in addition to their own. History majors develop strong critical thinking, reading and writing skills as they master research methods and historiography.

Success

History majors must possess the ability to learn how to analyze primary sources and historical facts, to participate in informed discussion of conflicting historical perspectives and to appreciate the diversity of human experience over space and time. In addition, history students must be committed to developing skills in critical thinking, research methods and the integration of that knowledge in writing and oral communication.

We emphasize the importance of these skills because History, like other departments in the Arts & Sciences, focuses on helping students develop valuable transferable skills that will make you highly adaptable in a rapidly changing global economy, and make you an astute participant in politics and society. In addition, you will have the wisdom that comes with learning how we got to this moment in history so that you are better prepared to interpret the extraordinary complexity of the present and future. Some of these transferable skills include the ability to:

- Organize and manage diverse and complex information
- Express strong and persuasive evidence-based arguments in writing and speech
- Build unparalleled research skills through deep and broad inquiry
- Explore the complexity of the human experience across time and space
- Use the lessons of the past to understand the present

Career

In addition to being well-prepared for graduate, law or medical school, graduates of the history program pursue careers as:

- Archivists
- Academic advisors
- Librarians
- Educators
- Diplomats
- Filmmakers
- Museologists

Minoring

History Minor

The history minor requires 18 credit hours in history as follows:

- 6 credit hours in survey courses, which may be taken in any combination of 1000 and/or 2000-level HIST classes.
- 3 credit hours of HIST elective above 1007 (1007-5199)
- 3 credit hours of HIST 3000: Introduction to Historical Thinking
- 6 credit hours of upper division courses, which may be taken in any 3001-5199 HIST classes.

Historic Preservation Certificate

Students interested in public history and historic preservation can also pursue a certificate in history preservation, an interdisciplinary program between the department and UC's College of Design, Architecture, Art, and Planning (DAAP).

Programs that share courses and other similarities with history include classics, women's, gender, and sexuality studies, Asian studies and political science. Students might consider combining history with one of these programs or another as a second major or minor.

Delcare the minor or certificate using the online program update form.

UC Advantages And Special Opportunities

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available on the Law 3+3 webpage.

Admission Requirements

First year applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transition Advising Center (current UC students) or the Transfer Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Southern State Community College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*

- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

History

BA

History (Optional Co-op Subplan)

Duration: 4 Years
Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
PD1015	Next Bearcat Lives Here	3
HIST	Any HIST1000-2000 level course	3
HIST	A&S First-Year Seminar HIST1099-001 or HIST1099-002	3
BoK: SCE	Foreign Language	3
Free Electives	Free Elective	3

Spring Semester Year 1

Course	Title/Desc	Credit
HIST	HIST1000-2000 level course Must be 1007-level or above	3
MATH STAT BoK: QR	Quantitative Reasoning (MATH or STAT)	3
BoK: SS	Social Sciences	3
BoK: SCE	Foreign Language	3
Free Electives	Free Elective	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following courses in Fall Semester of Year 2:
Students may declare the co-op track after completing HIST2110 and PD2170. They will work with their advisor to choose the appropriate semester and co-op course for each experience.

Course	Title/Desc	Credit
HIST2110	History Out There: Careers for History Majors	1
PD2170	Professionalism for the Major	2

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
HIST2110	History Out There: Careers for History Majors	1
HIST	Any HIST1000-2000 level course	3
HIST3XXX+	Any HIST3000+ level course	3
PD2170	Professionalism for the Major	2
BoK: QR	Quantitative Reasoning	3
Free Electives	Free Elective	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
HIST3000	Introduction to Historical Thought and Methods (C min)	3
HIST3XXX+	Any HIST3000+ level course	3
	Foreign Language or Free Elective	3
Free Electives	Free Elective	3

Optional Co-op Plan

Experience 1
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
HIST3XXX+	Any HIST3000+ level course	3

Spring Semester Year 3

Course	Title/Desc	Credit
HIST3XXX+	Any HIST3000+ level course	3

Optional Co-op Plan

Experience 2
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12

Course	Title/Desc	Credit

Course	Title/Desc	Credit
HIST	12 at the upper level (3001-5199) 3001, 3002, 3003, 3004, 3005, 3006, 3007, 3008, 3009, 3011, 3012, 3015, 3016, 3017, 3018, 3019, 3020, 3021, 3022, 3023, 3024, 3025, 3027, 3028, 3029, 3031, 3035, 3036, 3038, 3039, 3040, 3042, 3046, 3047, 3048, 3050, 3051, 3052, 3056, 3057, 3058, 3059, 3061, 3062, 3063, 3074, 3075, 3076, 3078, 3079, 3080, 3081, 3082, 3086, 3087, 3088, 3089, 3093, 3096, 3097, 3098, 3099, 3100, 3101, 3102, 3107, 3108, 3110, 3111, 3113, 3123, 3135, 3151, 3152, 3154, 3155, 3156, 3158, 3160, 3161, 3166, 3180, 3187, 3190, 3191, 3192, 3196, 3197, 3198, 4002, 4003, 4004, 4010, 4011, 4025, 4026, 4027, 4028, 4044, 4045, 4051, 4052, 4053, 4055, 4065, 4066, 4067, 4086, 4088, 4089, 4090, 4092, 4095, 4099, 4115, 4167, 5001, 5070, 5110, 5115, 5120, 5122, 5124, 5125, 5126, 5127, 5129, 5132, 5140. 5145, 5146, 5147, 5150	12

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

International Affairs

Duration: 4 Years Total Credits: 120 Award: BA

Overview

As a long-established interdisciplinary major offered by the School of Public and International Affairs (SPIA), the International Affairs major allows you to delve into the workings of global and regional politics, cultures, and societies. In the major, you learn how you can make a difference in such international issues as poverty, war, climate change, and protecting human rights. The major prepares you for careers in government, nongovernmental organizations, the private sector, and more. Our majors acquire an understanding of world affairs, knowledge of particular regions and countries, and competency in foreign languages – all vital skills for citizens and professionals in the twenty-first century. International Affairs majors work with our award-winning faculty to examine real-world challenges such as climate change, international conflict, economic development, public health crises, and global inequalities.

The International Affairs major allows students to take courses in political science, history, economics, women's, gender and sexuality studies, journalism, environmental studies, geography, foreign languages, and more. It is easy for students to design their own paths within the major or complete another major, minor, or certificate in many of the fields offered across an array of schools and departments at UC.

International Affairs students have ample opportunities to learn and thrive outside the classroom. Students can take advantage of UC's Study Abroad programs, including several programs led or co-led by SPIA. Students can also choose to pursue a Co-Op track, taking on paid professional positions and integrating their experiences into their undergraduate degrees. Many of our students participate in on-campus activities relevant to their futures as foreign affairs professionals, including clubs such as our award-winning Model United Nations chapter. International Affairs majors are particularly competitive for some SPIA and UC scholarships and awards, for example the Tolley International Human Rights Scholarship. Meanwhile, we work closely with our International Affairs students to help them apply for major fellowships and grants, such as the Fulbright Scholarship, the Boren Scholarship, the Critical Languages Scholarship, and more – all awards that our students have recently won. Students also benefit from the wide range of international affairs programming offered by SPIA, including through its Portman Center for Policy Solutions, the Taft lecture series, its partnership with the Future University of Egypt, and the connections SPIA provides to International Affairs alumni working in the field. In short, the major offers deep and well-rounded preparation for a life and career on the global stage.

Success

International Affairs majors graduate from UC with compelling skills – language and cultural knowledge, and the ability to analyze political trends in a variety of settings. Many majors also develop quantitative skills as well, for example the ability to understand and analyze statistics. These skills help our graduates stand out in the job market and in graduate school and law school applications. With a sophisticated understanding of how global politics shapes the lives of people around the world and here in the United States, our graduates are poised to work in sectors ranging from diplomacy to intelligence to business.

Career

Graduates with a BA in international affairs are prepared for careers in many sectors, including:

- Government (diplomacy, intelligence, military, and more)
- Multi-lateral organizations (the United Nations and many others)
- International and National Nongovernmental organizations
- Businesses and multinational corporations
- Consulting
- Journalism, communications, and public relations
- Law
- Advocacy (human rights, environmentalism, and more)
- Education and higher education
- Politics

Many of our majors also pursue advanced degrees, going to law school, master's programs, Ph.D. programs, and more.

Minoring

Minors are not available in the International Affairs program. However, students can choose to pursue a minor in Political Science, Journalism, History, Geography, Economics or other disciplines. Similarly, they can pursue a parallel degree (major, minor) in one or several foreign languages, Law and Society, Liberal Arts, Interdisciplinary Studies, Political Science, Women, Gender and Sexuality Studies, Environmental Studies and others.

Advising

The College of Arts and Sciences provides advising to all A&S students to advance each individual student's educational goals and plans. Further A&S information can be found here.

For further information, please contact the SPIA program director, whose name and information appear on this page.

The School of Public and International Affairs faculty provide advising about course content, specific program requirements, professional opportunities, and post-baccalaureate education. Faculty advisors and office hours are provided on the SPIA website.

UC Advantages And Special Opportunities

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

College of Arts and Sciences

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies, and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Co-op

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences. Participation in the co-op track will be noted on students' transcripts.

Special Programs

The International Affairs Program has an advanced foreign language requirement. This competence, combined with a working knowledge of other countries and cultures, make International Affairs majors preferred candidates for employment opportunities in the public and private sector in the United States and around the globe. The International Affairs curriculum at UC enables students to complement the major by completing a variety of certificate programs in foreign languages and area studies (Asian studies, European studies, Middle Eastern studies, Latin American studies, Judaic studies). The School of Public and International Affairs, the administering unit for the major, offers certificates in War, Peace, and Security; Legal Studies; International Human Rights; and Cybersecurity.

Admission Requirements

Please visit the Undergraduate Admissions page for more information.

International students should visit the Undergraduate Admissions for International Students page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries, please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA

International Student Requirements

International students should visit the Undergraduate Admissions for International Students page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Journalism

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Journalism is both an interdisciplinary field and a distinct knowledge base for the critical study of media and related issues, and the development of writing, editing and observational skills in a liberal arts curriculum. An intellectual review of traditional disciplines and their biases is intrinsic to journalism studies. As such, journalism teaches critical thinking on two different levels: by questioning the view from the center (theories, methods and practices) in any given field or endeavor, and by evaluating and clearly and publicly expressing these views and concerns to either specific or mass public audiences.

Success

Successful journalists are curious about people, cultures and science, about how political and economic systems work and why they fail. They are critical thinkers who know how to observe, listen and ask questions. They are skilled writers, editors and visual communicators. The foundation for a successful career in journalism is a strong liberal arts education.

Career

Graduates with a BA in journalism from the UC College of Arts and Sciences (A&S) are prepared for many different career options:

- Writer
- Reporter
- Analyst
- Correspondent
- Editor for magazines, newspapers and the electronic media
- Corporate writers
- Public relations

Minoring

There is no minor in journalism; a certificate is offered in its place. The certificate in journalism is designed for students who wish to pursue careers in reporting, news writing, magazine writing, copy editing or publishing, and for those students who wish to apply skills learned in journalism to work in other fields, such as public relations and corporate communications.

In addition to the writing seminar or photojournalism workshop and internship, which should be taken during the senior year, there are required journalism courses for the journalism writing certificate. Details on the seminar and courses, along with a recommended schedule for when they should be taken, are available on the English department website (artsci.uc.edu/english/).

Journalism

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

A unique characteristic of the journalism program is the university's urban environment. The city and neighborhoods become the classroom. The judicial, legislative and executive branches of government are available for real-life reporting experiences. Student journalists can readily cover business, industry, education, medicine, college/professional athletics and the arts in a metropolitan area. UC journalism majors are in a top media market where internships are readily available and from where a pool of qualified journalists and editors serve as adjuncts and guest faculty.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cumulative and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

For more information, Pathways Advising and Student Success

Transfer students should apply using our transfer student online application

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cumulative.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Judaic Studies

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

This interdisciplinary major combines the study of Hebrew with history, literature, philosophy and other fields to familiarize students with the experience of the Jews of the past and present. Judaic studies offers students a wide range of approaches to exploring and understanding Jewish history, culture and religion.

Success

Successful Judaic studies degree candidates demonstrate the core abilities and skills required in many liberal arts disciplines: academic focus, time management and the ability to develop high-level critical thinking skills. In particular, Judaic studies is suited to students who work well with languages and wish to study Judaism in its religious, historical, literary and cultural contexts. The program welcomes students of all backgrounds - field biology majors do not need to be mice and Judaic studies majors do not need to be Jewish!

Career

Judaic studies graduates are well-prepared for further academic work in Judaic studies, Near and Middle Eastern studies, religious studies, Holocaust studies and other related fields. As a multi- and interdisciplinary field, Judaic studies provides an outstanding general education. A Judaic studies degree also prepares one for careers in research and in various private- and-public sector fields. In addition to pursuing graduate study, Judaic majors and minors enjoy careers in:

- education
- community service
- a wide variety of religion-affiliated organizations
- journalism
- social work
- business
- and many other fields that value individuals whose skills include research, writing and critical thinking.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

The University of Cincinnati's Department of Judaic Studies offers the student a unique academic and cultural experience. Since UC is a state-affiliated school, students of all backgrounds are welcome, and the program carries no theological or political agenda. The department enjoys a healthy relationship with nearby institutions such as Hebrew Union College-Jewish Institute of Religion, the Jacob Marcus Center, the American Jewish Archives and the Center for Holocaust Education, and students have ongoing opportunities to work with those institutions.

The department's faculty represents a wide range of disciplines within the field and boasts both distinguished publication records and numerous teaching and service awards. At the same time, professors and instructors are engaged and accessible, offering students personal attention and a feeling of community in a large university setting.

Transferring To UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Latin American, Caribbean, and Latino/a/x Studies

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Why Study LACLS?

Latin America and the United States have always been intertwined – through people, politics, economies, cultures, and environments. Those historic connections will only intensify in future years in an increasingly globalized world. Today, the diverse and growing Latinx community represents almost 20% of the total U.S. population, with new growth concentrated in the South, Midwest, and Northeast. Understanding Latin American, Caribbean, and Latinx cultural perspectives, language, and history is increasingly vital for students pursuing careers in education and social work, medicine and public health, business and marketing, human resources, law and advocacy, and politics and international relations. As an interdisciplinary program with over 20 faculty across multiple departments and colleges, LACLS provides students with a flexible curriculum tailored to their interests and a broad range of valuable skills and knowledge.

Success

LACLS majors must possess intellectual curiosity and an open appreciation for the diversity of human experiences and cultures. Students usually have some facility with language and an interest in travel and learning about other societies. Majors will develop transferrable skills such as critical thinking and analysis, evaluating evidence and making arguments, clear verbal and written communication, and research.

Career

In addition to being well prepared for graduate, law, or medical schools, graduates of the LACLS program pursue careers in:

- Teaching & Education
- Medicine & Public Health
- Public Policy & Advocacy
- Law & Legal Aid
- Business/Marketing
- Human Relations
- Foreign Service
- Social Work

Majoring

The LACLS Major consists of 36 credit hours and a flexible curriculum which can be tailored to student interests and professional goals. In addition to other requirements, LACLS majors must complete a minor, certificate, or double major in an affiliated discipline. The Major's flexible curriculum allows students to design programs of study that best prepare them for their unique professional goals. All LACLS majors should consult with the program director when they declare their major.

1. Required (6 Credit Hours)
    - History 1020/LAS 2001 -- Latin American History/Intro to Latin American Studies
    - Applied Skills Course (Language, Methods, Service Learning, Practicum, depending on Concentration, for example Span 2015 or 2016, Span 1025 for Educators, Anth 4072 Ethnographic Methdos, Soc 3022 Methods in Social Research)
2. Anthro, History, Geography, and/or Politics (6 Credit Hours)
3. Language, Literature, and/or Gender Studies (6 Credit Hours)
4. Partial Coverage Courses (6 Credit Hours)
5. Electives (9 Credit Hours drawn from Categories 2 & 3. One partial coverage course may be applied with approval from advisor)
6. 3 Credit Hours for Capstone Project

Minoring

A LACLS Minor consists of 18 credit hours and a flexible curriculum which can be tailored to student interests and professional goals. The Minor's flexibility allows students to design programs of study that best prepare them for their unique professional goals.

1. Required (6 Credit Hours)
    - History 1020/LAS 2001 -- Latin American History/Intro to Latin American Studies
    - Applied Skills Course (Language, Methods, Service Learning, Practicum, depending on Concentration, for example Span 2015 or 2016, Span 1025 for Educators, Anth 4072 Ethnographic Methdos, Soc 3022 Methods in Social Research)
2. Anthro, History, Geography, and/or Politics (3 Credit Hours)
3. Language, Literature, and/or Gender Studies (3 Credit Hours)

4. Electives (6 Credit Hours drawn from Categories 2, 3, and/or Partial Coverage Courses)

Advising

Contact the Director of LACLS, Professor Mauricio Espinoza (espinojm@ucmail.uc.edu).

Special Programs

Study Abroad

Studying Abroad offers students an opportunity to practice and learn language skills in real world settings and to explore Latin American societies and cultures first hand. UC offers multiple opportunities for students to Study Abroad in Latin America, including Exchange Programs, Faculty-Led Programs, External Programs, and Co-Op Programs. Visit UC International for more information.

UC also offers students opportunities to live and work in Latin America through the Go Global Career Education program. This program helps students find International Co-ops, Study Tours, and International Experiences as well as explore funding opportunities.

Internship Opportunities

Internships prepare students for professional success by providing valuable work experience, skills, and networking possibilities. LACLS students are encouraged to work in at least one internship. Academic credit can be obtained, including credit for the Capstone Requirement, with prior permission from the LACLS Program Director. On completion of the internship, the workplace supervisor must submit a letter of evaluation to the LACLS Program Director.

See UC Internships for more information.

INROADS provides competitive scholarships to off pay for internships.

Service Learning Opportunities

The Department of Romance Languages and Literatures offers several programs for service learning opportunities in which students interact with various communities while using their language skills. For more information see https://www.artsci.uc.edu/departments/rall/undergrad/service-learning.html.

Research

Research experience is especially important for students interested in pursuing graduate study as well as students interested in a variety of professional fields such as marketing and public policy. For more information about undergraduate research and competitive grants to fund research projects, see UC Undergraduate Research and Taft Research Center Student Awards.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cumulative and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

For more information, Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cumulative.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

International Student Requirements

Visit UC's International Admissions page for undergraduate students.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Liberal Arts

Online

Duration: 4 Years Total Credits: 120 Award: BA

Overview

The term "liberal arts" can simply refer to the disciplines of the humanities, social sciences and sciences, but in this case, it refers more generally to a curriculum designed to provide a foundation of knowledge of culture (humanities), society (social sciences) and science (sciences) while developing intellectual and practical skills (critical thinking, ethical thinking, analytical thinking, problem solving and effective communication) that can be applied in real-world settings. This kind of education is highly regarded because it fosters the development of valuable skills that are applicable to a wide range of activities, including the ability to learn and apply knowledge, deal with complexity and adapt to change.

Success

The program is well-suited for students whose needs and interests are not being met by existing A&S majors, such as those

- who have several areas of interest or wish to pursue a course of study that spans several disciplines.
- who are preparing for graduate study in an interdisciplinary or multi-disciplinary area not incorporated in any existing programs at the university (e.g., linguistics, forensics, urban studies, religious studies).
- who are aiming for a career where multidisciplinary education could be appropriate or even advantageous (law, diplomacy, public service, mediation, environmental advocacy, etc).
- whose engagement in campus or community groups inspires multidisciplinary interests.
- who are transferring in from a branch campus or elsewhere with an associate of arts or science degree.
- who are non-traditional and seeking further education to complement life/job experiences.

Career

Liberal arts majors with strong training in multiple disciplines are prepared to undertake a wide variety leadership positions that stress teamwork and visionary thinking. Each individualized degree plan supports and enhances career potential within the identified degree goals.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Admission Requirements

Admission criteria to A&S online transfer-completer programs are:

- 61 semester (92 quarter) hours earned
- at least a 2.0 GPA cum and a 2.0 at most recent institution

If you don’t have 61 credit hours, please ask about other options for degree completion.

Transferring To UC

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Liberal Arts

Medicine, Health & Society

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Great program for students preparing to enter the health care industry. Students will be able to identify, analyze, and resolve moral, policy, cultural, and social conflicts as they might arise in the care of patients. These future health professionals will be able to identify and promote policies and practices that ensure scientific research, health care delivery, and technological innovation are conducted in a socially and ethically responsible manner. They will also appreciate how bioscience and health care take place within cultural and social contexts and how culture interacts with an individual's experience of illness and the way medicine is practiced.

Students must complete two of the following three certificates: 15CERT2-BIOE (Bioethics), 15CERT2-MEDH (Medical Humanities), 15CERT2-MINH (Minority Health). In addition students musts complete a minor in Anthropology, English, History, Philosophy, or Sociology OR complete 15CERT2-PMED (the premedical certificate). Credit hours may vary according to the choices students make. For each certificate or minor included in this degree program, at least 9 credit hours must apply only to that certificate/minor and not to either of the other two. Each certificate/minor must include at least one course at the 3000 level or above.

Success

Students interested in a certificate in Bioethics will develop their skills in observation, analysis, empathy and self-reflection. This certificate will help students identify, analyze, and resolve moral and social conflicts as they might arise in the care of patients and new technology and research. It heightens a student's sensitivity to the health care experiences of others as well as technological advancements and how those are shaped by social, political and cultural circumstances

Medical humanities lie at the intersection of human experience, medical practice and scientific technology. It refers to the interdisciplinary and multi-disciplinary application of the humanities and social sciences to health education and its practice. It provides insight into the human condition, suffering, personhood and our responsibility to each other. It also helps us understand how bioscience and health care take place within cultural and social contexts and how culture interacts with the individual experience of illness and the way medicine is practiced.

Similar factors for the Minority Health certificate.

Career

This major is appropriate for any student interested in pursuing a career related to health care, including medicine, public health policy, or patient advocacy, and provides an interdisicplinary foundation for graduate study in law, chaplaincy, hospital administration, philanthropy, or other fields where moral, cultural, social, and policy issues delated to health and disease may arise.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)

- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Certificate Requirement
Choose TWO Certificates

Major Requirements

Complete 2 certificates and 1 minor

Minor Requirement
Choose ONE Minor

Course	Title/Desc	Credit
	Students are required to complete 2 of the following certificates: Medical Bioethics (BIOE) || Disability Studies (DS) || Global Health (GBLHS) || Medical Humanities (MEDH) || Minority Health (MINH)	30 - 39
	To satisfy your two-certificate requirement, you must acquire at least 30 unique credits in total for the two certificates. For example, if you selected medical humanities (an 18-credit certificate) and global health (a 15-credit certificate), and you chose one three-credit course which counts as an elective in both certificates, you may still be able to satisfy both certificates, and you would still satisfy your 30-credit total here. However, if you chose two overlapping courses, you would have only 27 unique credits and you would still have to take one additional elective course in one of the certificates to reach your 30 unique credits. Note: you may have the option for two overlapping 3-credit courses if you are pairing two 18-credit certificates (disability studies, medical humanities, minority health). Bioethics. a 21-credit certificate, offers the option to overlap at least two courses when paired with any other certificate.	0

Course	Title/Desc	Credit
	In addition to two certificates, students are required to complete one of the following: Pre-Medicine Certificate (PMED) || Africana Studies Minor (AFST) || Anthropology Minor (ANTH) || Classical Civilization Minor (CLCV) || English Minor (ENGL) || History Minor (HIST) || Philosophy Minor (PHIL) || Sociology Minor (SOC).	20 - 39
	At least 15 credits for this pre-medicine certificate or chosen minor must be "unique" and cannot overlap with credits for selected certificates.	0

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Liberal Arts

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

The term "liberal arts" can simply refer to the disciplines of the humanities, social sciences and sciences, but in this case, it refers more generally to a curriculum designed to provide a foundation of knowledge of culture (humanities), society (social sciences) and science (sciences) while developing intellectual and practical skills (critical thinking, ethical thinking, analytical thinking, problem solving and effective communication) that can be applied in real-world settings. This kind of education is highly regarded because it fosters the development of valuable skills that are applicable to a wide range of activities, including the ability to learn and apply knowledge, deal with complexity and adapt to change.

Success

The program is well-suited for students whose needs and interests are not being met by existing A&S majors, such as those

- who have several areas of interest or wish to pursue a course of study that spans several disciplines.
- who are preparing for graduate study in an interdisciplinary or multi-disciplinary area not incorporated in any existing programs at the university (e.g., linguistics, forensics, urban studies, religious studies).
- who are aiming for a career where multidisciplinary education could be appropriate or even advantageous (law, diplomacy, public service, mediation, environmental advocacy, etc).
- whose engagement in campus or community groups inspires multidisciplinary interests.
- who are transferring in from a branch campus or elsewhere with an associate of arts or science degree.
- who are non-traditional and seeking further education to complement life/job experiences.

Career

Liberal arts majors with strong training in multiple disciplines are prepared to undertake a wide variety leadership positions that stress teamwork and visionary thinking. Each individualized degree plan supports and enhances career potential within the identified degree goals.

Minoring

A minor in liberal arts is not available.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries, please contact us at artsci@ucmail.uc.edu

Liberal Arts

Online

Duration: 4 Years Total Credits: 120 Award: BA

Overview

The term "liberal arts" can simply refer to the disciplines of the humanities, social sciences and sciences, but in this case, it refers more generally to a curriculum designed to provide a foundation of knowledge of culture (humanities), society (social sciences) and science (sciences) while developing intellectual and practical skills (critical thinking, ethical thinking, analytical thinking, problem solving and effective communication) that can be applied in real-world settings. This kind of education is highly regarded because it fosters the development of valuable skills that are applicable to a wide range of activities, including the ability to learn and apply knowledge, deal with complexity and adapt to change.

Success

The program is well-suited for students whose needs and interests are not being met by existing A&S majors, such as those

- who have several areas of interest or wish to pursue a course of study that spans several disciplines.
- who are preparing for graduate study in an interdisciplinary or multi-disciplinary area not incorporated in any existing programs at the university (e.g., linguistics, forensics, urban studies, religious studies).
- who are aiming for a career where multidisciplinary education could be appropriate or even advantageous (law, diplomacy, public service, mediation, environmental advocacy, etc).
- whose engagement in campus or community groups inspires multidisciplinary interests.
- who are transferring in from a branch campus or elsewhere with an associate of arts or science degree.
- who are non-traditional and seeking further education to complement life/job experiences.

Career

Liberal arts majors with strong training in multiple disciplines are prepared to undertake a wide variety leadership positions that stress teamwork and visionary thinking. Each individualized degree plan supports and enhances career potential within the identified degree goals.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Admission Requirements

Admission criteria to A&S online transfer-completer programs are:

- 61 semester (92 quarter) hours earned
- at least a 2.0 GPA cum and a 2.0 at most recent institution

If you don’t have 61 credit hours, please ask about other options for degree completion.

Transferring To UC

Admission criteria to A&S online transfer-completer programs are:

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Mathematics

Mathematics

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Mathematical sciences include the disciplines of pure mathematics, applied mathematics and statistics. Mathematicians and statisticians use representations of abstract ideas and relationships to solve problems, in order to arrive at a general understanding of how these representations work, as well as how they could be applied. Mathematical sciences majors learn complex analytical and problem-solving skills while exploring a range of mathematical topics and problems.

Success

The field of mathematical sciences is quite diverse, so success factors tend to vary. Certainly, good reasoning skills and logical thinking, along with the ability to communicate abstract concepts are important. Mathematicians enjoy challenging problems and find it difficult to stop working on a problem until they arrive at a satisfactory solution.

Career

Graduates with a BA in mathematical sciences are prepared for a variety of careers.

State and Federal Agencies

- statistician
- forecaster
- technical manager
- member of research and design team
- numerical analyst
- cryptographer
- signal processing analyst

Business and Industry

- financial analyst
- actuarial scientist
- marketing consultant
- systems analyst
- biomathematical researcher

Education

- secondary mathematics teacher
- university instructor or researcher

Minoring

The Department of Mathematical Sciences offers an undergraduate minor in mathematics for students majoring in another area. It is offered to students in any college at the University of Cincinnati. Advanced placement and calculus transfer credit can be counted toward the minor.

Total credit hours required: 24

Required Courses:

- MATH 1061, Calculus I (4 credits)
- MATH 1062, Calculus II (4 credits)
- MATH 2063, Multivariable Calculus (4 credits)
- MATH 2076, Linear Algebra (3 credits)

Students must complete an additional 9 credits (3 courses) of selected upper division mathematics and statistics courses, chosen in consultation with a departmental advisor.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Majors are strongly urged to learn a scientific programming language such as C++, Python, or Java.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.

- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Organizational Leadership

Non-Profit

Duration: 4 Years Total Credits: 120 Award: BA

Overview

For students with a specific interest in nonprofit work, the organizational leadership program provides an option for pursuing a specialized track in nonprofit leadership. This track enables students to take an equivalent set of core courses in leadership and business fundamentals as those in the "traditional" ORGL program. However, the foundational core courses focus specifically on the fundamentals of community leadership and the unique components faced in a nonprofit.

Success

Organizational leadership majors enjoy working in team-based environments and desire to make an impact in their organizations and communities. They understand how organizations function, have strong critical thinking and problem solving skills and are self-, socially-, and globally-aware. These characteristics enable our students to succeed in a variety of careers, including human resources, sales, banking and public service.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in organizational leadership are prepared for further academic or professional study and for many different career options in the nonprofit and for-profit sectors.

Graduates are employed as:

- Human resource recruiter
- Marketing manager
- Bank financial loan officer
- Retail manager
- Loan processor, financial institution
- Sales representative
- Local government agencies
- Hospital administration supervisor
- Restaurant owner/manager
- Airline customer service manager
- Education administrator
- Employee relations representative
- Training and development manager
- Health care administration

Organizational leadership students may also choose to go on to law school, master's programs in business administration, human resource management or graduate programs in communication, psychology and other liberal arts disciplines.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

The minor requires 15 credit hours of course work as outlined below:

Course Requirements for Minor:

- ORGL 2050 (3 hrs): Foundations of Leadership
- ORGL 2051 (3 hrs): Organizational Behavior for Effective Leaders
- ORGL 3050 (3 hrs): The Practice of Leadership

Elective Coursework: (choose two):

- How to Change The World I (ORGL2010)
- Changemakers: Travel Lessons (ORGL2011)
- Leading The Diverse Workplace (ORGL2095)
- Org Assessment and Evaluation (ORGL3053)
- Org Development and Planning (ORGL3055)
- Lessons in Leadership (ORGL4050)

- Innovation and Change (ORGL4051)

Students are limited to one course substitution in the elective courses. For instance, if a student takes a diversity course outside the minor, he or she can use that for credit toward the minor, but must choose other electives from the lists provided to complete the requirements for the minor.

Certificate in Talent Development

A certificate in talent development is also available. Students completing any program at the university may pursue the certificate, which is also available to non-degree seeking students.

Minor in Business

Students majoring in organizational leadership might pursue the business minor. Interested students should make an appointment with the business minor advisor by contacting the Undergraduate Programs Office in the College of Business.

Advising

Contact the program director, whose name and information appear on this page.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Co-op Option

During your sophomore year, this major will allow you to choose a co-op rotation track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate your experience within your undergraduate degree. Engaging in several meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and provides you with a competitive edge as you enter the workforce after graduation.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While mid-year admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S. All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

AFST HPE PSYC	Health AFST3052: Community Health and Minorities; HPE3071: Health Education Program Planning, Implementation, and Evaluation; PSYC3034: Diversity and Health	3
PLAN SW	Urban/Economic Development SW2055: Poverty in America; PLAN2002: Foundations for Urban Economic Planning; PLAN2004: Social Structure and Change	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Organizational Leadership

Talent Development

Duration: 4 Years Total Credits: 120 Award: BA

Overview

For students with a specific interest in working with people and organizational psychology, the organizational leadership program provides an option for pursuing a specialized track in talent development. This track enables students to take an equivalent set of core courses in leadership and business fundamentals as those in the "traditional" ORGL program. However, elective coursework for students in the TD track focuses specifically on the fundamentals of talent development (e.g., training and development, talent motivation and reward).

Success

Organizational leadership majors enjoy working in team-based environments and desire to make an impact in their organizations and communities. They understand how organizations function, have strong critical thinking and problem solving skills and are self-, socially-, and globally-aware. These characteristics enable our students to succeed in a variety of careers, including human resources, sales, banking and public service.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in organizational leadership are prepared for further academic or professional study and for many different career options in the nonprofit and for-profit sectors.

Graduates are employed as:

- Human resource recruiter
- Marketing manager
- Bank financial loan officer
- Retail manager
- Loan processor, financial institution
- Sales representative
- Local government agencies
- Hospital administration supervisor
- Restaurant owner/manager
- Airline customer service manager
- Education administrator
- Employee relations representative
- Training and development manager
- Health care administration

Organizational leadership students may also choose to go on to law school, master's programs in business administration, human resource management or graduate programs in communication, psychology and other liberal arts disciplines.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

The minor requires 15 credit hours of course work as outlined below:

Course Requirements for Minor:

- ORGL 2050 (3 hrs): Foundations of Leadership
- ORGL 2051 (3 hrs): Organizational Behavior for Effective Leaders
- ORGL 3050 (3 hrs): The Practice of Leadership

Elective Coursework: (choose two):

- How to Change The World I (ORGL2010)
- Changemakers: Travel Lessons (ORGL2011)
- Leading The Diverse Workplace (ORGL2095)
- Org Assessment and Evaluation (ORGL3053)
- Org Development and Planning (ORGL3055)

- Lessons in Leadership (ORGL4050)
- Innovation and Change (ORGL4051)

Students are limited to one course substitution in the elective courses. For instance, if a student takes a diversity course outside the minor, he or she can use that for credit toward the minor, but must choose other electives from the lists provided to complete the requirements for the minor.

Certificate in Talent Development

A certificate in talent development is also available. Students completing any program at the university may pursue the certificate, which is also available to non-degree seeking students.

Minor in Business

Students majoring in organizational leadership might pursue the business minor. Interested students should make an appointment with the business minor advisor by contacting the Undergraduate Programs Office in the College of Business.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Organizational Leadership

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Organizational leadership is an interdisciplinary program that combines a liberal arts education and selective business subjects with classes, guest lectures and seminars in leadership. The core curriculum of the ORGL program focuses on understanding theoretical and practical approaches to leadership. “Leadership,” by definition, is not limited to for-profit enterprises, but extends to all forms of organizational life (e.g., non-profit, government, education) as well as our interpersonal and group relationships. Accordingly, this program provides a coherent pathway for students wishing to become leaders across all sectors by targeting skill areas essential for leadership, organizational success and a lifetime of personal and professional achievement.

Success

Organizational leadership majors enjoy working in team-based environments and desire to make an impact in their organizations and communities. They understand how organizations function, have strong critical thinking and problem solving skills and are self-, socially-, and globally-aware. These characteristics enable our students to succeed in a variety of careers, including human resources, sales, banking and public service.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in organizational leadership are prepared for further academic or professional study and for many different career options in the nonprofit and for-profit sectors.

Graduates are employed as:

- Human resource recruiter
- Marketing manager
- Bank financial loan officer
- Retail manager
- Loan processor, financial institution
- Sales representative
- Local government agencies
- Hospital administration supervisor
- Restaurant owner/manager
- Airline customer service manager
- Education administrator
- Employee relations representative
- Training and development manager
- Health care administration

Organizational leadership students may also choose to go on to law school, master's programs in business administration, human resource management or graduate programs in communication, psychology and other liberal arts disciplines.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

The minor requires 15 credit hours of course work as outlined below:

Course Requirements for Minor:

- ORGL 2050 (3 hrs): Foundations of Leadership
- ORGL 2051 (3 hrs): Organizational Behavior for Effective Leaders
- ORGL 3050 (3 hrs): The Practice of Leadership

Elective Coursework: (choose two):

- How to Change The World I (ORGL2010)
- Changemakers: Travel Lessons (ORGL2011)
- Leading The Diverse Workplace (ORGL2095)
- Org Assessment and Evaluation (ORGL3053)
- Org Development and Planning (ORGL3055)

- Lessons in Leadership (ORGL4050)
- Innovation and Change (ORGL4051)

Students are limited to one course substitution in the elective courses. For instance, if a student takes a diversity course outside the minor, he or she can use that for credit toward the minor, but must choose other electives from the lists provided to complete the requirements for the minor.

Certificate in Talent Development

A certificate in talent development is also available. Students completing any program at the university may pursue the certificate, which is also available to non-degree seeking students.

Minor in Business

Students majoring in organizational leadership might pursue the business minor. Interested students should make an appointment with the business minor advisor by contacting the Undergraduate Programs Office in the College of Business.

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While mid-year admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Capstone (Final Semester)

Select One

Course	Title/Desc	Credit
ORGL	Capstone ORGL5000 or ORGL5001 (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Organizational Leadership

Non-Profit

Duration: 4 Years Total Credits: 120 Award: BA

Overview

For students with a specific interest in nonprofit work, the organizational leadership program provides an option for pursuing a specialized track in nonprofit leadership. This track enables students to take an equivalent set of core courses in leadership and business fundamentals as those in the "traditional" ORGL program. However, the foundational core courses focus specifically on the fundamentals of community leadership and the unique components faced in a nonprofit.

Success

Organizational leadership majors enjoy working in team-based environments and desire to make an impact in their organizations and communities. They understand how organizations function, have strong critical thinking and problem solving skills and are self-, socially-, and globally-aware. These characteristics enable our students to succeed in a variety of careers, including human resources, sales, banking and public service.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in organizational leadership are prepared for further academic or professional study and for many different career options in the nonprofit and for-profit sectors.

Graduates are employed as:

- Human resource recruiter
- Marketing manager
- Bank financial loan officer
- Retail manager
- Loan processor, financial institution
- Sales representative
- Local government agencies
- Hospital administration supervisor
- Restaurant owner/manager
- Airline customer service manager
- Education administrator
- Employee relations representative
- Training and development manager
- Health care administration

Organizational leadership students may also choose to go on to law school, master's programs in business administration, human resource management or graduate programs in communication, psychology and other liberal arts disciplines.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

The minor requires 15 credit hours of course work as outlined below:

Course Requirements for Minor:

- ORGL 2050 (3 hrs): Foundations of Leadership
- ORGL 2051 (3 hrs): Organizational Behavior for Effective Leaders
- ORGL 3050 (3 hrs): The Practice of Leadership

Elective Coursework: (choose two):

- How to Change The World I (ORGL2010)
- Changemakers: Travel Lessons (ORGL2011)
- Leading The Diverse Workplace (ORGL2095)
- Org Assessment and Evaluation (ORGL3053)
- Org Development and Planning (ORGL3055)
- Lessons in Leadership (ORGL4050)

- Innovation and Change (ORGL4051)

Students are limited to one course substitution in the elective courses. For instance, if a student takes a diversity course outside the minor, he or she can use that for credit toward the minor, but must choose other electives from the lists provided to complete the requirements for the minor.

Certificate in Talent Development

A certificate in talent development is also available. Students completing any program at the university may pursue the certificate, which is also available to non-degree seeking students.

Minor in Business

Students majoring in organizational leadership might pursue the business minor. Interested students should make an appointment with the business minor advisor by contacting the Undergraduate Programs Office in the College of Business.

Advising

Contact the program director, whose name and information appear on this page.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Co-op Option

During your sophomore year, this major will allow you to choose a co-op rotation track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate your experience within your undergraduate degree. Engaging in several meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and provides you with a competitive edge as you enter the workforce after graduation.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While mid-year admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S. ORGL3005	Staffing Organizations (C- min)	3
ORGL3055	Organizational Development and Planning (C- min)	3
ORGL3073	Human Resource Information Systems and Applications (C- min)	3
ORGL3080	Health and Safety (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Philosophy

Cognitive Studies

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Student will learn to reason critically: analyze the logical structure of arguments, construct and criticize arguments, analyze concepts and evaluate definitions, understand the relevance and use of empirical evidence, and how to employ and evaluate it. The individual will learn to write clearly and convincingly, in a way that articulates critical reasoning. The successful student will become conversant with the central problems and advances in the philosophical, scientific, anthropological, and sociological study of the mind and cognition. This student will also become familiar with central works in the philosophy of psychology and cognitive science.

This program prepares the student for graduate study in philosophy, and more generally for those professions in which it is central to employ clear thinking and a reasoned justification of opinion, and to integrate information from a diverse range of perspectives and traditions.

Success

The best reason to study philosophy is simply because it is interesting. However, in addition to satisfying a need to know, philosophy offers a number of additional benefits. Students who study philosophy learn to think deeply and carefully about complex issues. They learn to construct precise arguments in defense of their ideas. They learn to write well. Because most of our courses are small (especially at the 3000-level and above), students receive close personal attention to better help them develop these important skills.

UC Advantages And Special Opportunities

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The department sponsors a vibrant speaker series and an annual colloquium featuring multiple speakers addressing a single theme. Undergraduate majors are expected to attend these events. One of the best ways to experience the thrill of philosophy is to observe professional philosophers debating the issues with one another. Undergraduate students will have opportunities to speak with and ask questions of visiting speakers.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a 2.0 cumulative GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Philosophy

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Philosophy deals with basic questions, such as: What is knowledge? What makes something morally wrong? What is the mind? What is art? Some courses deal with the history of thought about such questions. Other courses deal with contemporary discussions of these questions. In addition, philosophy deals with a variety of questions that arise in the context of contemporary science and morality, such as: What is evolution? Can computers think? May doctors assist in suicide? Courses dealing with these sorts of questions are often interdisciplinary in nature, drawing on such subjects as biology, psychology and medicine.

Success

The best reason to study philosophy is simply because it is interesting. However, in addition to satisfying a need to know, philosophy offers a number of additional benefits. Students who study philosophy learn to think deeply and carefully about complex issues. They learn to construct precise arguments in defense of their ideas. They learn to write well. Because most of our courses are small (especially at the 3000-level and above), students receive close personal attention to better help them develop these important skills.

Career

- Professor
- Attorney
- Medical doctor
- Journalist
- Entrepreneur

Minoring

All courses credited toward a minor in philosophy must be courses in the UC College of Arts and Sciences. Exceptions will be considered on an individual basis. Students must earn a C or better in all courses counted toward the minor.

Students minoring in philosophy must complete a total of at least 21 semester credits in courses from the philosophy department (7 courses) and in so doing must meet the following requirements:

- Two introductory courses (6 semester credits) from the following list: Philosophy 1000, 1001,1002, 1003 or 1004
- A logic course, either Philosophy 1011 or Philosophy 2010 (3 credits)
- At least 3 courses (9 credits) at the 3000-level or above
- An additional 1 elective (3 credits) in philosophy

PHIL2028	Business Ethics (C min)	3
PHIL3023	Science, Philosophy and Society (C min)	3
PHIL3040	Philosophy of Science (C min)	3

Additional Requirement

Complete Minor or Certificate within A&S OR complete a double-major, dual-degree, or cross-college major

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Philosophy

Cognitive Studies

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Student will learn to reason critically: analyze the logical structure of arguments, construct and criticize arguments, analyze concepts and evaluate definitions, understand the relevance and use of empirical evidence, and how to employ and evaluate it. The individual will learn to write clearly and convincingly, in a way that articulates critical reasoning. The successful student will become conversant with the central problems and advances in the philosophical, scientific, anthropological, and sociological study of the mind and cognition. This student will also become familiar with central works in the philosophy of psychology and cognitive science.

This program prepares the student for graduate study in philosophy, and more generally for those professions in which it is central to employ clear thinking and a reasoned justification of opinion, and to integrate information from a diverse range of perspectives and traditions.

Success

The best reason to study philosophy is simply because it is interesting. However, in addition to satisfying a need to know, philosophy offers a number of additional benefits. Students who study philosophy learn to think deeply and carefully about complex issues. They learn to construct precise arguments in defense of their ideas. They learn to write well. Because most of our courses are small (especially at the 3000-level and above), students receive close personal attention to better help them develop these important skills.

UC Advantages And Special Opportunities

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The department sponsors a vibrant speaker series and an annual colloquium featuring multiple speakers addressing a single theme. Undergraduate majors are expected to attend these events. One of the best ways to experience the thrill of philosophy is to observe professional philosophers debating the issues with one another. Undergraduate students will have opportunities to speak with and ask questions of visiting speakers.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a 2.0 cumulative GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Physics

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Physics is the study of the physical laws of nature. Physicists apply these laws to draw conclusions about a wide range of phenomena, from the structures of subatomic particles to planetary motion. Physics majors develop strong analytical skills, learning to produce and examine critically exact quantitative evidence for theories about the workings of the universe.

Success

The successful physics student must possess strong skills in mathematics, analytical thinking and writing, and problem solving. The student should be imaginative and welcome challenges. For greatest success, the student should function well both individually and as part of a group.

Career

The study of physics provides excellent training in quantitative and analytic approaches to solving problems, as well as experience with computers and laboratory equipment. Physics BA graduates are highly sought for professional programs in law, economics, medicine, neuroscience, business and teachings.

The emphasis on modeling and problem-solving skills as an intrinsic part of a physics education means that graduates of this major can and do pursue many different careers. In addition to continuing on to professional schools like law, medicine, teaching and business, opportunities of our recent graduates include:

- Science teacher
- Banking and finance
- Military officer
- Accelerator operator
- Research technician
- Computer engineer
- Software development
- Actuary
- Medical physics

Minoring

The undergraduate minor in physics is designed to provide students with a sound introduction to both classical and modern physics. It is offered to students in any college at the University of Cincinnati; however, the required physics courses must be taken in UC College of Arts and Sciences (A&S).

Course Requirements (32 total credit hours):

Required Courses (22 hours):

PHYS 2005-2006, 2005L-2006L, College Physics I & II with Labs (10 hours)

MATH 1061-1062, Calculus I & II (8 hours)

MATH 2063, Multivariable Calculus (4 hours)

Core Elective (choose one of the following three courses) (3-5 hours):

PHYS 2076, Semiconductor Physics for Engineers (3 hours)

PHYS 3001C, Intermediate Physics I, (5 hours)

PHYS 3002C, Intermediate Physics II, (5 hours)

Physics Electives (5-8 hours):

Take additional PHYS courses beyond the required and core courses, to reach a total of at least 20 credit hours of physics. At least 6 credits from the core or physics electives must come from 3000 level or higher physics courses.

Click here to declare the minor online

Physics

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The physics faculty members engage in forefront research in the major areas in physics. Opportunities are available for students to be involved in such research, often leading to publications. Our relatively small class size allows for significant personal attention to each student. Our curriculum is designed to be flexible to allow for different career goals. Our majors have access to excellent computer facilities, and computation is incorporated intrinsically into our courses. The department recently began offering an optional co-op experience in the summer before the junior or senior year for qualifying students. UC is one of only a few physics departments in the country to offer such an opportunity.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Political Science

Gender and Multicultural Politics

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Political science is the study of politics and government, both in the United States and around the globe, investigating theories, behavior, and institutions. The concentration in Gender and Multicultural Politics will facilitate crucial understandings about the furtherance of and the barriers to democracy, peace, development, sustainability, human rights, and social justice within and across polities. Political science majors develop strong research and analytical skills, while exploring topics such as the philosophies on which governments have been founded, the ways in which citizens affect and are affected by their governments, and relationships within the international community. For further information visit the School of Public and International Affairs webpage.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please visit UC's Co-op information for further details.

Success

Political science majors develop the strong analytical skills necessary for interpreting and evaluating evidence and arguments that can be applied in a variety of professional settings.

Political science majors research a broad range of domestic and international social, political, cultural, and economic issues. Students learn how to conduct independent research. They engage in in-class discussions, evaluate the relevancy of different arguments, and apply their professional skills to solve theoretical and real-world problems. Through in-class discussion and hands-on experiential learning opportunities, students work with our award-winning faculty to study and evaluate theory, policy, and action. These unique experiences make them strong candidates for employment in government, private businesses, and the non-profit sector.

A number of courses in the Gender and Multicultural Politics Concentration are cross-listed with Women's, Gender, and Sexuality Studies and/or count for such certificates as International Human Rights, so students could use the concentration to complete other credentials, including preparing for graduate work in Political Science, whether at the doctoral level where students can concentrate in Feminist Comparative and International Politics or in the social justice-oriented Masters in Public Administration program.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in political science with concentration in gender and multicultural studies are prepared for many different career options.

Many political science majors use their degree to establish careers in:

- state, local and federal government
- private sector
- non-governmental sector
- non-profit
- party politics
- education
- journalism and public relations
- law
- public policy
- related disciplines

Majors also pursue graduate degrees in political science, becoming attorneys, consultants, lobbyists, leaders in private and public corporations, professors and researchers in colleges and universities.

Minoring

Students minoring in political science must complete a total of 21 hours with no less than a 2.0 grade point average.

I. Three Introductory Courses (9 hours from the following):

- POL 1001 – Power and Politics: Understanding the Political World

- POL 1010 - Introduction to American Politics
- POL 1040 - Introduction to Political Theory
- POL 1060 - Introduction to Comparative Politics
- POL 1080 - Introduction to International Relations
- POL 1090 – Law, Politics and Society

II. **Four Upper-Level Courses** (12 hours in Political Science at the 2000-level and above)

Click here to declare the minor online

Advising

The College of Arts and Sciences provides advising to all A&S students to advance each individual student's educational goals and plans. Further A&S information can be found here.

For further information, please contact the SPIA program director, whose name and information appear on this page.

The School of Public and International Affairs faculty provide advising about course content, specific program requirements, professional opportunities, and post-baccalaureate education. Faculty advisors and office hours are provided on the SPIA website.

UC Advantages And Special Opportunities

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

College of Arts and Sciences

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Co-op

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences.?Participation in the co-op track will be noted on students' transcripts.

Special Programs

Political science majors benefit from the active research mission of the School of Public and International Affairs (SPIA), including not only faculty scholarship but also a vibrant graduate program, both of which enhance the learning environment for undergraduates. In conjunction with the political science major, SPIA administers certificate programs in security studies (international and homeland security) and international human rights. The school also enjoys long-standing research excellence in political behavior, public opinion polling, survey research and other areas of American politics.

Political science majors belong to the Political Science Student Association and the undergraduate chapters of the national law fraternity Phi Alpha Delta and the national honor society in political science Pi Sigma Alpha. They participate actively in the Model United Nations Club, Mock Trial, Pre-Law club, the Alexander Hamilton Society and other organizations on campus.

Students are also eligible to apply for grants for research and travel from The Charles Phelps Taft Research Center.

Special programs include honors, independent study, internships, credit for approved field projects in the metropolitan area and competitive congressional internships in Washington, D.C.

Admission Requirements

Please visit the Undergraduate Admissions page for more information.

International students should visit the Undergraduate Admissions for International Students page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps or this major:

- Cincinnati State Technical & Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA

International Student Requirements

International students should visit the Undergraduate Admissions for International Students page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.

- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

POL5001	Senior Thesis II	2 - 3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Political Science

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Political science is the study of politics and government, both in the United States and around the globe, investigating theories, behavior, and institutions. Political science majors develop strong research and analytical skills, while exploring topics such as the philosophies on which governments have been founded, the ways in which citizens affect and are affected by their governments, and relationships within the international community. For further information visit the School of Public and International Affairs webpage.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please visit UC's Co-op information for further details.

Success

Political science majors develop the strong analytical skills necessary for interpreting and evaluating evidence and arguments that can be applied in a variety of professional settings. Political science majors research a broad range of domestic and international social, political, cultural, and economic issues. Students learn how to conduct independent research. They engage in in-class discussions, evaluate the relevancy of different arguments, and apply their professional skills to solve theoretical and real-world problems. Through in-class discussion and hands-on experiential learning opportunities, students work with our award-winning faculty to study and evaluate theory, policy, and action. These unique experiences make them strong candidates for employment in government, private businesses, and the non-profit sector.

Career

Like students who graduate with other social science and liberal arts majors, graduates with a BA in political science are prepared for many different career options. Many political science majors use their degree to establish careers in:

- state, local and federal government
- private sector
- non-governmental sector
- non-profit
- party politics
- education
- journalism and public relations
- law
- public policy
- related disciplines

Majors also pursue graduate degrees in political science, becoming attorneys, consultants, lobbyists, leaders in private and public corporations, professors and researchers in colleges and universities.

Minoring

Students minoring in political science must complete a total of 21 hours with no less than a 2.0 grade point average. For the most up-to-date information about minoring in Political Science, please view the Minor in Political Science program information on the SPIA website.

I. **Three Introductory Courses** (9 hours from the following):

- POL 1001 - Democracy and Political Science
- POL 1010 - Introduction to American Politics
- POL 1040 - Introduction to Political Theory
- POL 1060 - Introduction to Comparative Politics
- POL 1080 - Introduction to International Relations
- POL 1090 – Law, Politics and Society

II. **Four Upper-Level Courses** (12 hours in Political Science at the 2000-level and above)

Advising

The College of Arts and Sciences provides advising to all A&S students to advance each individual student's educational goals and plans. Further A&S information can be found here.

For further information, please contact the SPIA program director, whose name and information appear on this page.

The School of Public and International Affairs faculty provide advising about course content, specific program requirements, professional opportunities, and post-baccalaureate education. Faculty advisors and office hours are provided on the SPIA website.

UC Advantages And Special Opportunities

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

College of Arts and Sciences

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Co-op

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences.?Participation in the co-op track will be noted on students' transcripts.

Special Programs

Political science majors benefit from the active research mission of the School of Public and International Affairs (SPIA), including not only faculty scholarship but also a vibrant graduate program, both of which enhance the learning environment for undergraduates. In conjunction with the political science major, SPIA administers certificate programs in security studies (international and homeland security) and international human rights. The school also enjoys long-standing research excellence in political behavior, public opinion polling, survey research and other areas of American politics.

Political science majors belong to the Political Science Student Association and the undergraduate chapters of the national law fraternity Phi Alpha Delta and the national honor society in political science Pi Sigma Alpha. They participate actively in the Model United Nations Club, Mock Trial, Pre-Law club, the Alexander Hamilton Society and other organizations on campus.

Students are also eligible to apply for grants for research and travel from The Charles Phelps Taft Research Center.

Special programs include honors, independent study, internships, credit for approved field projects in the metropolitan area and competitive congressional internships in Washington, D.C.

Admission Requirements

Please visit the Undergraduate Admissions page for more information.

International students should visit the Undergraduate Admissions for International Students page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA

International Student Requirements

International students should visit the Undergraduate Admissions for International Students page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Political Science

Gender and Multicultural Politics

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Political science is the study of politics and government, both in the United States and around the globe, investigating theories, behavior, and institutions. The concentration in Gender and Multicultural Politics will facilitate crucial understandings about the furtherance of and the barriers to democracy, peace, development, sustainability, human rights, and social justice within and across polities. Political science majors develop strong research and analytical skills, while exploring topics such as the philosophies on which governments have been founded, the ways in which citizens affect and are affected by their governments, and relationships within the international community. For further information visit the School of Public and International Affairs webpage.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please visit UC's Co-op information for further details.

Success

Political science majors develop the strong analytical skills necessary for interpreting and evaluating evidence and arguments that can be applied in a variety of professional settings.

Political science majors research a broad range of domestic and international social, political, cultural, and economic issues. Students learn how to conduct independent research. They engage in in-class discussions, evaluate the relevancy of different arguments, and apply their professional skills to solve theoretical and real-world problems. Through in-class discussion and hands-on experiential learning opportunities, students work with our award-winning faculty to study and evaluate theory, policy, and action. These unique experiences make them strong candidates for employment in government, private businesses, and the non-profit sector.

A number of courses in the Gender and Multicultural Politics Concentration are cross-listed with Women's, Gender, and Sexuality Studies and/or count for such certificates as International Human Rights, so students could use the concentration to complete other credentials, including preparing for graduate work in Political Science, whether at the doctoral level where students can concentrate in Feminist Comparative and International Politics or in the social justice-oriented Masters in Public Administration program.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in political science with concentration in gender and multicultural studies are prepared for many different career options.

Many political science majors use their degree to establish careers in:

- state, local and federal government
- private sector
- non-governmental sector
- non-profit
- party politics
- education
- journalism and public relations
- law
- public policy
- related disciplines

Majors also pursue graduate degrees in political science, becoming attorneys, consultants, lobbyists, leaders in private and public corporations, professors and researchers in colleges and universities.

Minoring

Students minoring in political science must complete a total of 21 hours with no less than a 2.0 grade point average.

I. Three Introductory Courses (9 hours from the following):

- POL 1001 – Power and Politics: Understanding the Political World

- POL 1010 - Introduction to American Politics
- POL 1040 - Introduction to Political Theory
- POL 1060 - Introduction to Comparative Politics
- POL 1080 - Introduction to International Relations
- POL 1090 – Law, Politics and Society

II. **Four Upper-Level Courses** (12 hours in Political Science at the 2000-level and above)

Advising

The College of Arts and Sciences provides advising to all A&S students to advance each individual student's educational goals and plans. Further A&S information can be found here.

For further information, please contact the SPIA program director, whose name and information appear on this page.

The School of Public and International Affairs faculty provide advising about course content, specific program requirements, professional opportunities, and post-baccalaureate education. Faculty advisors and office hours are provided on the SPIA website.

UC Advantages And Special Opportunities

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

College of Arts and Sciences

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Co-op

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences.?Participation in the co-op track will be noted on students' transcripts.

Special Programs

Political science majors benefit from the active research mission of the School of Public and International Affairs (SPIA), including not only faculty scholarship but also a vibrant graduate program, both of which enhance the learning environment for undergraduates. In conjunction with the political science major, SPIA administers certificate programs in security studies (international and homeland security) and international human rights. The school also enjoys long-standing research excellence in political behavior, public opinion polling, survey research and other areas of American politics.

Political science majors belong to the Political Science Student Association and the undergraduate chapters of the national law fraternity Phi Alpha Delta and the national honor society in political science Pi Sigma Alpha. They participate actively in the Model United Nations Club, Mock Trial, Pre-Law club, the Alexander Hamilton Society and other organizations on campus.

Students are also eligible to apply for grants for research and travel from The Charles Phelps Taft Research Center.

Special programs include honors, independent study, internships, credit for approved field projects in the metropolitan area and competitive congressional internships in Washington, D.C.

Admission Requirements

Please visit the Undergraduate Admissions page for more information.

International students should visit the Undergraduate Admissions for International Students page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps or this major:

- Cincinnati State Technical & Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA

International Student Requirements

International students should visit the Undergraduate Admissions for International Students page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.

- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

POL1080	Introduction to International Relations	3
STAT1034	Elementary Statistics I	3
	A&S First-Year Seminar List provided each semester by advising office	3
BoK: SCE	Foreign Language	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2070	Professionalism and Purpose	3

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
PD2070	Professionalism and Purpose	3
POL1060	Introduction to Comparative Politics	3
POL3001C	Quantitative Research and Data Analysis	3
POL	Gender & Multicultural Politics course from list below	3
	Foreign Language or Free Elective	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
POL	Gender & Multicultural Politics course from list below	3
POL	POL Area Emphasis course from lists below	3
BoK: NS	Natural Sciences	3
	Foreign Language or Free Elective	3

Optional Co-op Plan

Experience 1
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
POL	POL Elective course from Gender & Multicultural Politics or Optional lists below	3
POL	POL Area Emphasis course from lists below	3
BoK: HP	Historical Perspectives	3
BoK: SS	Social Sciences	3
Free Electives	Free Elective	3

Spring Semester Year 3

Course	Title/Desc	Credit
POL	POL Elective from Gender & Multicultural Politics or Optional lists below	3
POL	POL Area Emphasis course from lists below	3
BoK: FA,HU	Fine Arts or Humanities	3
BoK: SCE	Society, Culture, & Ethics	3
Free Electives	Free Elective	3

Optional Co-op Plan

Experience 2
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Fall Semester Year 4

Course	Title/Desc	Credit

Spring Semester Year 4

Course	Title/Desc	Credit

Course	Title/Desc	Credit
POL	POL Elective from Area of Emphasis or Optional lists below	3
	POL4090, INT3001, or any Experiential Learning course	3
BoK: HU	Humanities	3
Free Electives	Free Elective	3

Course	Title/Desc	Credit
POL	Capstone from Gender & Multicultural Capstone list below	3
BoK: NS	Natural Sciences	3
Free Electives	Free Elective	3
Free Electives	Free Elective	3
Free Electives	Free Elective	3

Optional Co-op Plan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0

POL5000	Senior Thesis I	2 - 3
POL5001	Senior Thesis II	2 - 3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Psychology

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Psychology is the scientific study of the behavior of animals and humans. Psychology majors develop strong research and analytical skills while exploring all phases of human life. They study behavior of individuals and groups, both the well-adjusted and the dysfunctional. Students of psychology are interested in conducting research to discover patterns of human behavior, as well as in applying psychological principles and techniques to solving social and individual problems.

Success

Psychology is a very broad discipline involving research and application in every aspect of living beings (human and animal). Skills that make for excellence in some aspect of psychology include: developing and carrying out empirical research (both applied and theoretical), interpreting results, communicating to others, listening, engaging, involving, showing an interest in others, observing and many more.

Career

A BA in psychology can be a pre-professional degree, leading to graduate study in psychology and many other fields. The strong critical thinking skills, along with the abilities to research, write and understand human behavior, and acquiring skills to work with others developed in the BA curriculum are highly valued in a wide range of positions in industry, business, law and social services. The master's degree is generally the minimum professional degree for licensing or certification of psychologists who work in education, business, hospitals, clinics, prisons and private practice.

Career possibilities (some of which will require completion of graduate programs) include:

- Human Resource professional
- Caseworker
- Clinical, research or school psychologist
- College or university professor
- Counselor
- Mental health worker
- Research psychologist
- Marketing researcher

Minoring

The minor in psychology requires a total of 18 credit hours. Students must complete Introduction to Psychology, PSYC1001 3 credits. In addition, students must complete 15 credits of coursework in psychology at the 2000 level or above.

Curriculum

UC Advantages And Special Opportunities

Students in UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

Honors Program

Qualified majors are automatically invited to participate in an honors program culminating in independent research. The department supports fieldwork and internships, as well as opportunities in research and teaching assisting. Students can also become involved in Psi Chi, the National Psychology Honor Society.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Columbus State Community College
- Lorain County Community College
- Sinclair Community College
- Southern State Community College
- North Central State College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). PSYC2051	Fundamentals of Psychopathology (C- min)	3
PSYC2053	Personality (C- min)	3
PSYC2070	Psychobiology (C- min)	3

4000-Level Experiential Learning (3+ credit hours)

Instructor permission required. Students have to complete an interview with one core faculty member before they sign for credit.

Course	Title/Desc	Credit
PSYC4041	Research Practicum in Developmental Science (A- min)	3 - 6
PSYC4042	Service Learning in Developmental Science (A- min)	3 - 6
PSYC4043	Fieldwork Practicum in Developmental Science (A- min)	3 - 6

5000-Level Capstone (3 credit hours)

Pre-Requisite: PSYC 2002C/ORGL 2004C with a minimum grade of A-

Course	Title/Desc	Credit
PSYC5050	Research Capstone: Child Health and Mental Health (A- min)	3

Developmental Science (DS) Track

The application process for the Developmental Science (DS) track requires an interview with one of the core faculty members. Typically, this interview takes place when students interview for one of the experiential learning credits (i.e., research practicum, service learning, fieldwork practicum). Interested students are asked to contact one of the core faculty members. To be eligible for the track, students have to complete all required course work with a minimum grade of A-. Additional courses may qualify, pending permission from core faculty. Courses are not guaranteed to be offered in any given semester. Students are encouraged to consult with their academic advisor when determining their plan for meeting track requirements.

2000-Level Foundational course (3 credit hours)

Pre-requisite: PSYC1001 with a minimum grade of A-

Course	Title/Desc	Credit
PSYC2040	Developmental Psychology (A- min)	3

Course	Title/Desc	Credit
PSYC5053	Research Capstone: Children's Learning (A-min)	3
PSYC5059	Research Capstone: Neuropsychology (A-min)	3

3000-Level Electives in area of Developmental Science

Minimum of 6 credit hours; more credit hours are recommended

Course	Title/Desc	Credit
PSYC3020	Cognitive Neuropsychology (A-min)	3
PSYC3022	Lifespan Brain Development (A- min)	3
PSYC3033	Developmental Issues in Health Psychology (A-min)	3
PSYC3044	Cognitive Development (A- min)	3

Working with People

A minimum of 1 credit hour in one of the following courses is required

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
INT3001	Academic Internships for Multidisciplines - Semester 1	1 - 12
PD1085	Post-Experience Reflection Course	1
PSYC2052	Fieldwork Practicum	1 - 6
PSYC2096	Teaching Practicum	1 - 6
PSYC2097	Research Practicum	1 - 6

A minimum of 1 credit hour in one of the following courses is required

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Public Relations

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

The Public Relations program is a career focused major for students interested in community relations, corporate communication, employee/member relations, government relations, integrated marketing communication, strategic communication, and other PR-allied fields. The program offers team-based projects, internships and co-ops, service and experiential learning, and collaboration with community organizations. Students are trained to think analytically, communicate strategically, and lead responsibly. Students learn communication theory and market-current skills, all within the context of cultural sensitivity and ethical responsibility. This program equips students to make a positive contribution to their local community, nation, and world by making connections between theory and practice in the arena of public relations.

Success

Public Relations majors have excellent critical thinking, writing, and interpersonal skills. They can map the big picture and implement the small details. They are strategic, creative, compassionate, and—above all—ethical. Public Relations is an excellent major for students who are interested in working for organizations or causes in for-profit, non-profit, and government settings.

Career

In our rapidly evolving digital world, success in any organization requires a sophisticated understanding of communication processes. Positions in public relations and allied fields rely even more heavily on strong oral and written communication skills. Graduates with a Public Relations BA from the UC College of Arts and Sciences are equipped with strong analytical, communication, and creative skills. As such, they are well prepared for many different career options. Graduates find jobs such as:

- Campaign Manager
- Communication Specialist
- Event Planner
- Executive Coach
- Fundraising Director
- Human Resources Officer
- Public Relations Specialist
- Social Media Manager
- Technical Writer
- Training and Development Officer

Public Relations students are also well prepared for advanced study in such areas as advocacy, law, marketing, and public policy.

Minoring

The Communication Department also offers a Public Relations Certificate. The certificate consists of 21 credit hours for Communication majors and 18 credit hours for non-Communication majors. Required courses emphasize both theory and practice through situation analysis, audience analysis, strategic analysis of options and planning, message design, and program implementation and evaluation. A graduate should be well prepared to work in a variety of PR applications, including agencies, nonprofit organizations, corporations, government, advocacy organizations, healthcare and others. For more details, visit the Certificate in Public Relations webpage.

Curriculum

The Public Relations BA requires 42 credit hours in major coursework with a minimum GPA of 2.0. Twelve credit hours must be at the 4000-level or above.

Students take 9 credit hours of Communication Core courses, 3 credit hours of a Research Methods course, 21 credit hours of Public Relations Core courses, 3 credit hours of Communication electives, 3 credit hours of Mediated Communication electives, and 3 credit hours of Ethics electives.

Students must also complete a pre-approved minor or certificate in order to earn the Public Relations BA.

Advising

For more information about the Public Relations program, please contact the School of Communication, Film, and Media Studies.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research, and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies, and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

The Department of Communication's Public Relations program is one of fewer than 40 programs that has earned the Certification in Education for Public Relations (CEPR) by the Public Relations Society of America (PRSA). The program's location in Cincinnati gives students abundant opportunities for internships, co-ops, networking, mentoring, and jobs.

Special Programs

Undergraduate student organizations:

- UC Public Relations Student Society of America (PRSSA)
- UC Influence—Student Public Relations Firm

Internships

Public Relations majors greatly enhance their educational experience while in college by conducting an internship in the public relations field. Multiple internships serve to both strengthen students' resumes and prepare them for the professional world. Requirements for internship include:

- Must be a Public Relations major in good standing
- Completion of the prerequisite course PD 2070: Professionalism & Purpose
- Registered for COMM 3091: Internship in Communication

Departmental Honors

All graduating Public Relations majors who earn a 3.4/4.0 GPA or above in the major will earn "Honors" status. All graduating Public Relations majors who earn a 3.66/4.0 GPA or above in the major will earn "High Honors" status. Students will be designated with their departmental honors at graduation. Maintaining a high GPA is important to your future success. High grades are necessary for admission into many of the top graduate programs. High grades also demonstrate to potential employers that you are intelligent, hard-working, able to learn, and able to deliver what is asked of you.

However, high grades alone will not be enough to set academically gifted students apart. You need to be able to demonstrate your achievements. For that reason, the department encourages honors students to seek out additional academic challenges.

The Public Relations major is a dynamic and challenging degree. The department is proud of our students who achieve high grades. We encourage you to get to know the faculty. Personal recommendations can be very helpful. Moreover, we welcome you to consider furthering your education with a master's degree from our department. Of course, the faculty is also happy to talk with you about preparing for additional graduate and career opportunities that are available.

Original research or participation in faculty research is a great way to prepare for graduate school. Original research also shows potential employers that you are able to design and implement a project and to seek out knowledge about an important question. Students interested in research should discuss the possibility of creating a project in public relations with faculty members who share your area of interest.

Enrolling in an advanced course will stretch you academically and give you exposure to the graduate program. Seeking out challenges is a great way to set yourself apart.

Demonstrating leadership is key to translating classroom knowledge into the world. Employers and graduate programs look for potential leaders. Departmental advisors can help you to find public relations-related organizations for students as well as leadership opportunities available in each.

Awards and achievements are another way to help you succeed. The Department of Communication offers a number of scholarships and competitions through which you can distinguish yourself. Talk to your professors and advisors. You'll be glad you did!

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cumulative.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

For more information, visit the Transfer Center in the Office of Admissions.

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cumulative.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cumulative

International Student Requirements

The Office of International Admissions works exclusively with undergraduate students.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati
- Be in good academic standing, that is, not on academic probation, disciplinary probation, or suspension
- Complete the residency requirement by earning at least 30 credits after matriculating into the college
- Complete all of the requirements of the Public Relations major
- Complete at least one pre-approved minor or certificate
- Complete the College Core requirements
- Submit an application for graduation to the registrar's office by the posted deadline.

Application Deadlines

While mid-year admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Social Justice

Duration: 4 Years Total Credits: 120 Award: BA

Overview

The Social Justice major is designed to provide students with the opportunity to undertake a multidisciplinary program of study on the history, theories, practices, and implications of social justice within and across societies. Social justice is anchored in understanding how fairness manifests in societies, including processes to identify and address barriers to justice. Completing the Social Justice major will allow students to explore a wide range of perspectives, critically examine diverse domestic and transnational systems of domination, oppression, and inequity, and explore how they relate and intersect with each other.

Students will also learn about contemporary and past emancipatory movements that have struggled for change with justice in mind for all. At the end of the program, students will not only understand the sources of oppression, but also be able to imagine that a more just world is possible -a world with less cruelty, environmental destruction, and inequities, both domestic and international.

The BA in Social Justice requires 39 credits of coursework in multidisciplinary subjects that cover topics and theories related to justice, oppression, and social change. The degree requirements can be completed in three years. The program brings together new courses and currently offered courses across UC's College of Arts and Sciences (A&S), College-Conservatory of Music, UC-Blue Ash, College of Education, Criminal Justice, and Human Services, College of Medicine, UC-Clermont, and Office of the Provost. Coursework includes three courses in foundational core areas that cover an introduction to the specialty area, methodology, and a cumulative capstone course.

Students will also complete courses in two cluster areas: five courses in Activism and social change, and five courses in Power and Identity.

Activism and Social Change courses focus on social movements and community organizing that challenge and transform adverse social conditions. Power and Identity courses focus on the intersection between authority and control and socially constructed categories including, but not limited to race, gender, social class, sexuality, religion, etc.

The main goal of the program is to provide students with diverse historical, contemporary, and future-oriented perspectives related to Social Justice, and how this topic impacts the lives of communities of people in the US and globally. Additional programmatic goals include developing students' critical communication, reading, writing, and thinking skills and understanding and application of research methods and analytical abilities. As Social Justice majors, students will have the opportunity to focus on an area of specific interest while also taking advantage of a highly collaborative, interdisciplinary, and broad-based liberal arts curriculum that prepares them to understand and work for justice in societies. In order to fulfill their missions, including those of social responsibility, many employers, both governmental and non-governmental, currently seek graduates who have expertise and are enthusiastic about social justice.

Graduates of this program will be well prepared to contribute in this capacity, as leaders, organizers, citizens, etc., with the skills and capacity to work for justice in their communities.

Career

Graduates of this major pursue many different careers. A few examples include:

- Advocate
- Certified Health Education Specialist (CHES)
- Community Health Worker
- Community Specialist
- Government Program Specialist
- Lawyer
- Mental Health Counselor
- Political Analyst
- Politician
- Public Administrator
- Social Services Director

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Sociology

Co-op

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Sociology is the scientific study of society and the various groups that make up a society. Sociology majors develop strong research and analytical skills while exploring the social causes and consequences of human behavior. They study the structure of societies and groups and explain how social change occurs within them. Sociologists both develop theories about social behavior and apply these theories to solve social problems and form social policy.

Success

Sociology majors have good critical-thinking abilities and are concerned with understanding society and improving social institutions and the well-being of individuals. Strong writing, math and computer skills are important for sociology majors in their education and subsequent career work. The skills of analysis, research, reading and writing that a student majoring in sociology acquires are highly valued in a wide range of business positions. Sociology is an excellent major for students who are interested in working with people and groups in a variety of fields, e.g, business, social work, law and medicine.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in sociology are prepared for many different career options. The skills and interests of a sociology major could lead to careers in:

- Sociologist (requires graduate training)
- Human Services
- Administrative Support
- Management
- Market Research
- Social Science Research
- Career Counseling
- Public Health
- Law
- Ministry
- Medical Services

Master's graduates may:

- Teach in community colleges
- Assist with research and planning in government agencies, private corporations or civic organizations

A PhD is usually required for:

- Teaching and research at the university level
- Directing research programs

Minoring

A minor in sociology is often of interest to students in allied behavioral and social sciences, including criminal justice, social work, psychology and other fields.

Course requirements (18 credit hours):

Required Courses (6 hours):

SOC 1001, Introduction to Sociology (3 credit hours)

SOC 3005, Survey of Sociological Theory (3 credit hours)

SOC Electives (12 hours at or above 2000-level).

Click here to declare the minor online

Curriculum

SOCIOLOGY CO-OP Program

The Sociology Co-op Program is an optional track available to students pursuing a Bachelor of Arts in Sociology(College of Arts and Sciences). Students accepted to the program will participate in professional development coursework and complete two semesters of full-time (or part-time), paid cooperative education work in the Sociology field by graduation. The Sociology Co-op Program option is offered in partnership through the Division of Professional Practice and Experiential Learning (ProPEL) and the College of Arts and Sciences.

The Sociology Co-op Track is an optional program for students pursuing a Bachelor of Arts in Sociology from the University of Cincinnati's College of Arts & Sciences. Students accepted into the track will participate in mandatory professional development coursework offered by the Division of Experience-Based Learning & Career Education and complete two semesters of paid, full-time cooperative education work in the Sociology field before graduation. Sophomores accepted into the track can complete 120 credit hours of coursework and all three co-op rotations within four years.

Students interested in the Sociology Co-op Track must complete these 3 steps in the proper order:

1. Register for PD 2070: Professionalism & Purpose (sections 004 or 005) during your sophomore year.

PD 2070 serves as the prerequisite for our SociologyCo-op Track and Internship class. Topics include career planning, resumes, cover letters, interviewing, and additional professional development coursework.

2. Consult with your PD 2070 instructor and the Sociology Undergraduate Studies Director (beginning in week ten of PD 2070) to determine which experiential learning pathway (co-op, internships, both, neither) best matches your individual goals.

3. Declare your intention to enter the Sociology Co-op Track by notifying the Sociology Undergraduate Studies Director, Dr. David Maume, in writing (1018 Crosley Tower) or by email at maumedj@ucmail.uc.edu.

Initial cohorts will be kept small and students accepted into the Co-op track will start their job search the semester following PD 2070 and begin working the semester after that. Students then rotate between taking classes and working until they complete two semesters of co-op and fulfill the mandatory university and departmental graduation requirements.

The following schedules outline the most common co-op pathway to graduation:

	Fall	Spring	Summer
Year1:	Classes (15cr)	Classes (15cr) & PD1170 (1cr)	
Year2 :	PD 2070 (3cr) Classes (12cr)	Classes (15cr)	COOP 3051 (Job 1)
Year3:	Classes (15cr)	COOP 4051 (Job 2) OR classes (15cr)	Classes (15cr) OR COOP 4051 (Job2)
Year4:	Classes (15cr)	Capstone (3cr) & Classes (12cr) GRADUATE!!!	

Contact Dr. David Maume for more information

Advising

For more details on majoring or minoring in Sociology, please contact the Department of Sociology to schedule an appointment with the Director of Undergraduate Studies.

(513) 556-4700 or sociology@uc.edu.

Special Programs

Students who declare sociology as their major early in their academic career may combine the sociology major with certificates in other disciplines. The sociology major works well with a certificate in business for students planning business careers. Adding a certificate in planning offered by DAAP can lead to careers in community, government and business. The major also can be used with a certificate in journalism for a future in professional writing or majors can select the criminal justice track for careers in areas such as law enforcement or parole.

UC's Sociology Department has strong emphases in social inequality, work and family, social psychology and population and urban research. Students get strong grounding in theory, statistics and research methods, culminating in a research-oriented capstone experience. This is a relatively small department with excellent teachers, about 90-100 majors and an active undergraduate sociology club.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Current Freshmen Class Profile is 3.044-3.660 (on a 4.0 scale) HS GPA with an ACT combined score 21-26

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- At least a cumulative 2.0 GPA and a 2.0 at most recent institution
- Successfully completed one semester of English composition or its equivalent
- Successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC math placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- At least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- Successfully completed one semester of English composition or its equivalent
- Successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC math placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Sociology

Duration: 4 Years Total Credits: 120 Award: BA

Overview

Sociology is the scientific study of society and the various groups that make up a society. Sociology majors develop strong research and analytical skills while exploring the social causes and consequences of human behavior. They study the structure of societies and groups and explain how social change occurs within them. Sociologists both develop theories about social behavior and apply these theories to solve social problems and form social policy.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please see the curriculum map linked below for more information.

Career

You'll find graduates of our program employed at organizations such as the U.S. Census and other government agencies, local and national-level non-profits, tech companies, and more. Their job titles include: Senior Researcher, UX Researcher, Program Manager, Case Manager, Director of Human Resources, Community Partnership Manager, Regional Sales Manager, and Executive Recruiter, just to name a few.

Sociology majors are critical thinkers who are concerned with understanding society and improving social institutions and the well-being of individuals. In the coursework for the major, you will develop skills in *data analysis, research design and methods, statistical analysis, close reading, and writing*... skills that are highly valued in a wide range of jobs. Sociology is an excellent major for students who are interested in working with people and ideas in a variety of fields, including social research, social work/social services, human resources, law, and medicine.

Graduates with a BA in sociology are prepared for many different career options. The skills and interests of a sociology major could lead to careers in:

- Human Services, including at non-profit organizations and government agencies
- Management
- Human Resources
- Market Research and UX Research
- Social Science Research, including on topics such as health, housing, economic inequality, population change, and more
- Fundraising and Grantwriting
- Community organizing
- Project Management
- Career Counseling
- Academic Advising
- Public Health
- Immigration Advocacy
- Law
- Medical Services/Health Care (analyst, quality assurance, patient advocate, etc.)
- Sociologist (requires graduate training)

Masters graduates may:

- Teach in two-year or community colleges
- Conduct research and planning in government agencies, private corporations or civic organizations

A PhD is usually required to:

- Teach at the university level
- Direct research centers or programs in higher education or at the national level

Minoring

A minor in sociology is often of interest to students in allied behavioral and social sciences, including criminal justice, social work, psychology and other fields.

UC Advantages And Special Opportunities

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences. Participation in the co-op track will be noted on students' transcripts.

Sociology

BA

Sociology (Optional Co-Op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
PD1015	Next Bearcat Lives Here	3
SOC1001	Introduction to Sociology	3
BoK: SCE	Foreign Language	3
	A&S First-Year Semimar List provided each semester by advising office	3

Spring Semester Year 1

Course	Title/Desc	Credit
SOC2XXX+	Any SOC2000+ level course	3
BoK: FA,HU	Fine Arts or Humanities	3
MATH STAT BoK: QR	Quantitative Reasoning (MATH or STAT)	3
BoK: SCE	Foreign Language	3
Free Electives	Free Elective	3

Optional Co-Op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

Professionalism and Careers

All co-op students must first complete the following courses in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2070	Professionalism and Purpose	3
SOC3100	Sociology Careers Workshop	1

Students will complete 3 co-op experiences:

Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
PD2070	Professionalism and Purpose	3
SOC2XXX+	Any SOC2000+ level course	3
SOC2XXX+	Any SOC2000+ level course	3
SOC3100	Sociology Careers Workshop	1
BoK: HU	Humanities Elective	3
	Foreign Language or Free Elective	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
SOC2XXX+	Any SOC2000+ level course	3
SOC2XXX+	Any SOC2000+ level course	3
BoK: NS	Natural Sciences	3
	Foreign Language or Free Elective	3

Optional Co-Op Plan

Experience 1

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
SOC3019C	Statistics in Sociology (C- min)	4
SOC3022	Methods in Social Research (C- min)	3
BoK: NS	Natural Sciences	3
BoK: SCE	Society, Culture, & Ethics	3
Free Electives	Free Elective	1

Spring Semester Year 3

Course	Title/Desc	Credit
SOC3005	Survey of Sociological Theory (C- min)	3
HIST BoK: HP	Historical Perspectives (HIST)	3
BoK: SS	Social Sciences	3
Free Electives	Free elective	3
Free Electives	Free Elective	3

Optional Co-Op Plan

Experience 2

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Fall Semester Year 4

Spring Semester Year 4

Course	Title/Desc	Credit
SOC2XXX+	Any SOC2000+ level course	3
BoK: HP	Historical Perspectives	3
	Experiential Learning Elective	3
Free Electives	Free Elective	3
Free Electives	Free Elective	3

Course	Title/Desc	Credit
SOC4084	Social Inequality (C- min)	3
SOC5000	Capstone: Selected Topics (C- min)	3
Free Electives	Free Elective	3
Free Electives	Free Elective	3
Free Electives	Free Elective	1

Optional Co-op Plan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0
COOP4000	COOP for ARTS & SCIENCES - Part time (Experience 3)	1 - 12
	Any Experiential Learning course and advisor approval	0

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

UC's Sociology Department has strong emphases in social inequality, work and family, social psychology and population and urban research. Students get strong grounding in theory, statistics and research methods, culminating in a research-oriented capstone experience. This is a relatively small department with excellent teachers, about 90-100 majors and an active undergraduate sociology club.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Current Freshmen Class Profile is 3.044-3.660 (on a 4.0 scale) HS GPA with an ACT combined score 21-26

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- At least a cumulative 2.0 GPA and a 2.0 at most recent institution
- Successfully completed one semester of English composition or its equivalent
- Successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC math placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- At least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- Successfully completed one semester of English composition or its equivalent
- Successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC math placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Spanish

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Students of Spanish study the language, culture, and literature of Spain, most of Latin America, and the Spanish-speaking United States. Spanish majors develop linguistic skills and enrich themselves through the study of a variety of cultures.

Success

Students in Spanish usually possess strong verbal skills, some facility with languages and a desire to travel and interact with other cultures.

Career

Students with a BA in Spanish often seek teaching careers, either in secondary education or in colleges and universities following completion of graduate studies in the field. Spanish is also a strong liberal arts major that allows students to develop critical thinking, reading and writing skills in addition to knowledge of a foreign language and culture. Our increasingly multilingual society makes this combination of skills highly valued in a wide range of positions in the public and private sectors.

Career possibilities include:

- teacher
- interpreter
- translator
- researcher
- international law
- social services

Minoring

Students working toward an undergraduate degree at UC can earn a minor in Spanish, while non-degree students (e.g., graduate students, non-matriculated students) can earn an equivalent certificate (not to be confused with the business certificate).

To graduate with a minor in Spanish, students must complete a total of at least 21 credit hours in Spanish at 2000-level and above:

1. **Pre-requisite Courses** (not applicable toward 21-hour minor requirement)
    - Complete or place out of the basic language sequence:
        - SPAN 1011, 1012, 1013, 1014 (Extended Basic Spanish), 12 credits; OR
        - SPAN 1001, 1002 (Basic Spanish), 10 credits
    - Basic Courses I. Complete or place out of the Composition and Conversation sequence:
        - SPAN 2015, 2016 (Spanish Composition and Conversation), 6 credits
2. **Basic Courses II**. All Spanish minors must take the following required courses first (6 credits):
    - SPAN 3001 (Spanish Grammar and Composition), 3 credits
    - SPAN 3002 (Speaking in Spanish), 3 credits
3. **Core Courses** (6 credits)
    - SPAN 4001 (Advanced Grammar), pre-req: SPAN 3002, 3 credits
    - From the following list, students must choose a minimum of one course. Courses taken above the minimum number will count toward the elective requirements.
        - SPAN 3081 (Las Tres Culturas), 3 credits
        - SPAN 3082 (Latin America Today), 3 credits
        - SPAN 3083 (Spain Today), 3 credits
        - SPAN 3084 (Hispanic Culture in the US), 3 credits
        - A film course - either SPAN 3031 (Spanish Film) or SPAN 3032 (Latin American Film), 3 credits
4. **Electives** (9 credits)
    - Students may take any SPAN courses at the 3000/4000 level (including 2015-2016 for those starting at the 2000 level and earning a B or higher). Students may also take 3000-level Spanish Service Learning courses when available.

Credits required for the minor can also be obtained through study abroad or transfer.

Students can delcare the minor via the online form.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The Department of Romance Languages offers students the possibility of interacting with excellent faculty in small, seminar-style courses. We do all we can to help students study abroad; in particular, we transfer credits from most study-abroad programs.

Study Abroad

The Department of Romance Languages strongly encourages students to study abroad. We sponsor a number of programs of varying durations in different countries -- from Mexico and Spain to France, Italy and Brazil. Learn more about Study Abroad.

Cumulative GPA of 2.0 is required for the SPAN major coursework.

Spanish Elective Credit

Course	Title/Desc	Credit
SPAN	Spanish Electives Total SPAN electives must equal 27 semester credits of SPAN courses at 3000 level or higher, and also may include SPAN2060 and SPAN2031 (SPAN2031 only if it is taken before SPAN3001).	27

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Women's, Gender and Sexuality Studies

Duration: **4 Years** Total Credits: **120** Award: **BA**

Overview

Women's, gender, and sexuality studies is an interdisciplinary major that explores the complexity of human experiences and lives. Through a broad range of subjects, women's studies raises questions about gender, race, sexual identity, nationality and social class, focusing particularly on their intersections. Women's, gender, and sexuality studies also examines women's roles and achievements historically and cross-culturally. This program of study challenges stereotypes and inequalities, promotes critical thinking and self-awareness and empowers individuals to work for social change.

Success

Attention to the intersections between theory and practice is at the heart of women's, gender, and sexuality studies. As an interdisciplinary course of study, women's studies calls for a range of verbal, analytic and critical skills, as well as the ability to integrate different modes of scholarly inquiry. Students with a keen interest in literature, social science or critical analysis can also focus their work in elective courses.

Career

- advocate for domestic violence or hate crime victims
- art therapist
- battered women's center director
- business owner
- clinical social worker
- doctor
- health clinic medical assistant
- human services administrator
- lawyer
- minister
- recreational therapist
- town manager
- union organizer
- writer

Minoring

Minor/Certificate Information

The women's, gender, and sexuality studies minor consists of core courses offered within the department and elective courses offered by other departments across the university. Because of the interdisciplinary structure of the program, students can often pursue this minor with any other major without having to take additional credits or increasing time to degree. Students often minor in women's, gender, and sexuality studies to apply their insights on gender to another field and to gain an additional credential that serves them well for graduate and professional work.

Minor/Certificate Application

Students interested in minoring in women's, gender, and sexuality studies should complete the Declaration of A&S Minor and schedule an advising session with the undergraduate director.

Capstone Additional Notes

Applied capstone option requires student to complete Internship. Prior to enrollment in internship, student must complete WGS2062 (offered spring semester only) and PD2070.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Digital Media Collaboration

Duration: **4 Years** Total Credits: **120** Award: **BIS**

Overview

The Digital Media Collaborative program offers today's digital storytellers the opportunity to create a unique and interdisciplinary path to discover their voice, sharpen their skills, develop new talents, and build their portfolios. Students will leave well prepared to enter the world of digital arts and media.

When combined with a non-media minor or major from UC, this degree can be used to create individuals who are interested in going into other fields but who have extensive knowledge and experience in media production, making these students highly employable in their respective fields.

Career

- Filmmaker
- Screenwriter
- Director
- Television Show Creator
- Animator
- Game Designer
- Producer
- Editor
- Cinematographer
- Sound Designer
- Countless Other Roles in Film & TV Production, Screenwriting, Animation, Gaming, Media for Marketing, Audio Production, Camera Department, Post Production, Producing, & More!
- *...and numerous more possibilities, as the degree is tailored to the student's individual career goals!*

Minoring

Several minors/certificates are available in this field of study:

- Animation
- Directing Film and Television
- Screenwriting

More are being developed based on industry needs and innovations.

Advising

Contact the School of Communication, Film, and Media Studies whose information appears on this page.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulateive 2.0 GPA

Graduation Requirements

To graduate from UC's College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Interdisciplinary

Online

Duration: 4 Years Total Credits: 120 Award: BIS

Overview

Don't start over – start new! The Bachelors of Interdisciplinary Studies (BIS) is a unique transfer-completer degree program that offers you the opportunity to apply previously earned credit and get to the graduation stage faster. Along the way, you choose from multiple disciplines and gain knowledge, methods, and theories that enhance your individual educational and career goals.

Success

You can be successful in Interdisciplinary Studies if you are highly-motivated, goal-oriented and enjoy working independently. With support from an academic adviser, you will translate a career or personal goal into a solid academic plan that is broadly based and rounds out your degree plan.

Career

You will be prepared to embark on a variety of pathways, including

- new leadership positions with your current employer that require a bachelor's degree.
- new employment opportunities that showcase your critical thinking skills and your global perspective.
- professional degree programs such as law or medicine.

Individualized plans of study can be constructed to prepare for many career paths.

Interdisciplinary

Interdisciplinary Nursing Preparation

Duration: **4 Years** Total Credits: **120** Award: **BIS**

Overview

The Bachelors of Interdisciplinary Studies (BIS) is a unique degree program that offers you the opportunity to create their own major. Interdisciplinary Studies students learn from multiple disciplines and gain knowledge, methods, and theories that enhance your individual educational and career goals.

Interdisciplinary Nursing Preparation is a partnership between Cincinnati Arts and Sciences and Cincinnati College of Nursing. It was created as a direct response to the demand for universities and training programs to expand interdisciplinary educational opportunities and programs to help foster collaboration among students before they enter the health workforce. Through this program, you will get expert advising, additional nursing courses and an interdisciplinary experience that prepares you to apply to the Accelerated Direct-Entry Master of Science in Nursing (MSN) program, designed specifically for students who hold a bachelor's degree and want to be an RN.

Students should be advised that they will not hold a degree in nursing by earning this degree alone.

Success

You can be successful in Interdisciplinary Studies if you are highly motivated, goal-oriented and enjoy working independently. Interdisciplinary Studies students have the organizational skills and vision to translate a career or personal goal into a solid academic plan that is broadly based and delves into several areas of knowledge. As an INP student, you will complete all necessary pre-requisite courses for entrance into Cincinnati's College of Nursing. To be eligible to apply for the Accelerated Direct-Entry MSN program, students must complete all required pre-requisites with the minimum grade of B-.

Career

Interdisciplinary Studies INP majors can be prepared to embark on a variety of pathways, including undergraduate and graduate degrees that prepare you for RN licensure.

In addition to nursing pre-requisites, you are encouraged to explore areas of passion, such as global or minority health, leadership, or medical humanities.

Minoring

Minors are not available in interdisciplinary studies.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Interdisciplinary: Nursing Prep

Advising

While enrolled in Interdisciplinary Nursing Preparation, you will receive all the services and opportunities available through the Center for Exploratory Studies for the first year of the program. Students choosing to remain in the program will then continue on with an advisor in the A&S Advising Office. If you begin at UC as a transfer or transition student, you will begin working with an advisor in the A&S Advising Office immediately.

These include a professional advisor who will:

- Help you choose classes tailored to your interests and passions
- Work with you to create an individualized advising plan
- Supply guidance on gaining acceptance into another UC college
- Provide you with personalized assessments and access to Learning Communities

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research at nationally-ranked hospitals, and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a

nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)

Graduation Requirements

To graduate from UC's College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits from the University of Cincinnati.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

Applicants to UC's College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Additional Requirements

Course	Title/Desc	Credit
	(INTR-BIS) CLUSTER INFORMATION: Students are required to complete 2 clusters totaling 27 credit hours. One cluster is defined as "Nursing Studies" and the second cluster is the student's choice. Each cluster must have at least three credit hours of upper level coursework at the 3000 level or higher.	27
	(INTR-BIS) A&S CREDIT INFORMATION: Of the 36 credit hours required by this major, a minimum of 18 credits must come from A&S disciplines. Nine of the 18 credits will come from the Introductory, Methodology and Capstone courses.	18
3XXX+	(INTR-BIS) 3000+ COURSE INFORMATION: This major requires students to complete a minimum of 24 credit hours (out of 120 credits) of coursework at the 3000-level or higher.	24

Course	Title/Desc	Credit
PHYS	3001C or 3002C	5
POL3000	Political Inquiry: Approaches and Methods	3
PSYC	2001C or 2002C	4
SOC	3005 or 3022C	3 - 4
SPAN3001	Spanish Grammar and Composition	3
WGS4004	Feminist Methods & Methodologies	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Interdisciplinary

Law and Society

Duration: 4 Years Total Credits: 120 Award: BIS

Overview

Law is an integral part of all facets of our society. The Bachelor's in Interdisciplinary Studies: Law and Society major helps students meet the demand for leaders who have a solid understanding of law, the institutions where law is created, and how law intersects with our societies, cultures, economies, and politics. The degree program analyzes how law informs and is shaped by political, societal, and cultural processes. This program is hosted in the School of Public and International Affairs and in partnership with UC College of Law. While Political Science and Law are at the center of the program, expertise and specialization come from many other disciplines, including (but not limited to):

- Sociology
- Environmental Studies
- History
- Women, Gender, and Sexuality Studies
- Business
- English
- Journalism
- Philosophy

This multidisciplinary approach allows you to customize your degree not only by selecting one of many pathways for degree completion but also through the consideration of a double major. This degree is a relevant pathway to Law school.

Law and Society majors develop strong research and analytical skills by studying the dynamics of law in domestic and international contexts. For further information visit the School of Public and International Affairs webpage.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please visit UC's Co-op information for further details.

Success

Law and Society majors typically develop the strong analytical skills necessary for interpreting and evaluating arguments that can be applied in a variety of professional settings. Law and Society majors have a passion for how the law impacts different populations and our communities. Through in-class discussion and hands-on experiential learning opportunities, students work with our award-winning faculty to apply their knowledge and skills to real-world problems that relate to law. These unique experiences make them strong candidates for employment in government, private businesses, and the non-profit sector, as well as candidates for Law school and other graduate programs.

Career

Like students who graduate with other social science and liberal arts majors, graduates with a degree in the Law and Society major are prepared for many different career options. The interdisciplinary nature of this unique degree means students acquire many different transferable skills needed by employers, such as critical thinking, leadership, and teamwork. While many majors use their degree to prepare for law school and eventual legal careers, other students establish careers in:

- criminal justice
- state, local and federal government
- private sector
- non-governmental sector
- party politics
- education
- journalism and public relations

Majors also pursue graduate degrees in public policy, public administration, political science, or related fields, becoming consultants, lobbyists, leaders in private and public corporations, non-profit managers, local government leaders, researchers, and educators.

Advising

The College of Arts and Sciences provides advising to all A&S students to advance each individual student's educational goals and plans. Further A&S information can be found here.

For further information, please contact the SPIA program director, whose name and information appear on this page.

The School of Public and International Affairs faculty provide advising about course content, specific program requirements, professional opportunities, and post-baccalaureate education. Faculty advisors and office hours are provided on the SPIA website.

UC Advantages And Special Opportunities

College of Arts and Sciences

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Co-op

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences. Participation in the co-op track will be noted on students' transcripts. Built with **maximum flexibility**, the optional **co-op** allows students to combine academic coursework with **FULL or PART time paid work experience** (co-op). Co-op for Law and Society does not extend students' graduation timeline and it can help them explore, revise, and define their professional goals.

Admission Requirements

Please visit the Undergraduate Admissions page for more information.

International students should visit the Undergraduate Admissions for International Students page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

International Student Requirements

International students should visit the Undergraduate Admissions for International Students page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Interdisciplinary

Duration: **4 Years** Total Credits: **120** Award: **BIS**

Overview

The Bachelors of Interdisciplinary Studies (BIS) is a unique degree program that offers students the opportunity to create their own major. Interdisciplinary Studies students learn from multiple disciplines and gain knowledge, methods, and theories that enhance their individual educational and career goals.

Success

Students can be successful in Interdisciplinary Studies if they are highly motivated, goal-oriented and enjoy working independently. Interdisciplinary Studies students have the organizational skills and vision to translate a career or personal goal into a solid academic plan that is broadly based and delves into several areas of knowledge. This degree option is appropriate for freshmen who would like to individualize their major as well as for continuing students whose interests transcend a single major. Transfer students can easily incorporate previously earned credit into a BIS plan of study.

Career

Interdisciplinary Studies majors can be prepared to embark on a variety of pathways, including

- graduate studies that are not reflected by existing majors within the university;
- to pursue professional degree programs such as law or medicine;
- and to undertake employment that requires multiple responsibilities and where varied perspectives are appropriate and useful, in careers as such as administrators, analysts, public service workers, arts professionals, community organizers, and human rights and environmental advocates.

Individualized plans of study can be constructed to prepare for many career paths, and students are advised to check with graduate admissions offices and career development advisors regarding specific undergraduate degree requirements.

Minoring

Minors are not available in interdisciplinary studies.

UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The interdisciplinary studies (individualized) option provides a special opportunity for qualified, highly motivated students to design and complete a major that complements their unique interests and strengths while drawing upon the wide-ranging expertise of a notable liberal arts faculty. This program is especially attractive to students whose goals and visions extend beyond traditional academic boundaries and disciplines. The cross-disciplinary nature of interdisciplinary studies helps enable students to learn how to integrate a variety of perspectives and methodologies. By connecting skills and knowledge from multiple sources, students will be better prepared to face real-world situations in their communities, their workplaces and their homes.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from UC's College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to UC's College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Interdisciplinary

Interdisciplinary Nursing Preparation

Duration: **4 Years** Total Credits: **120** Award: **BIS**

Overview

The Bachelors of Interdisciplinary Studies (BIS) is a unique degree program that offers you the opportunity to create their own major. Interdisciplinary Studies students learn from multiple disciplines and gain knowledge, methods, and theories that enhance your individual educational and career goals.

Interdisciplinary Nursing Preparation is a partnership between Cincinnati Arts and Sciences and Cincinnati College of Nursing. It was created as a direct response to the demand for universities and training programs to expand interdisciplinary educational opportunities and programs to help foster collaboration among students before they enter the health workforce. Through this program, you will get expert advising, additional nursing courses and an interdisciplinary experience that prepares you to apply to the Accelerated Direct-Entry Master of Science in Nursing (MSN) program, designed specifically for students who hold a bachelor's degree and want to be an RN.

Students should be advised that they will not hold a degree in nursing by earning this degree alone.

Success

You can be successful in Interdisciplinary Studies if you are highly motivated, goal-oriented and enjoy working independently. Interdisciplinary Studies students have the organizational skills and vision to translate a career or personal goal into a solid academic plan that is broadly based and delves into several areas of knowledge. As an INP student, you will complete all necessary pre-requisite courses for entrance into Cincinnati's College of Nursing. To be eligible to apply for the Accelerated Direct-Entry MSN program, students must complete all required pre-requisites with the minimum grade of B-.

Career

Interdisciplinary Studies INP majors can be prepared to embark on a variety of pathways, including undergraduate and graduate degrees that prepare you for RN licensure.

In addition to nursing pre-requisites, you are encouraged to explore areas of passion, such as global or minority health, leadership, or medical humanities.

Minoring

Minors are not available in interdisciplinary studies.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Interdisciplinary: Nursing Prep

Advising

While enrolled in Interdisciplinary Nursing Preparation, you will receive all the services and opportunities available through the Center for Exploratory Studies for the first year of the program. Students choosing to remain in the program will then continue on with an advisor in the A&S Advising Office. If you begin at UC as a transfer or transition student, you will begin working with an advisor in the A&S Advising Office immediately.

These include a professional advisor who will:

- Help you choose classes tailored to your interests and passions
- Work with you to create an individualized advising plan
- Supply guidance on gaining acceptance into another UC college
- Provide you with personalized assessments and access to Learning Communities

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research at nationally-ranked hospitals, and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a

nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Interdisciplinary

Law and Society

Duration: 4 Years Total Credits: 120 Award: BIS

Overview

Law is an integral part of all facets of our society. The Bachelor's in Interdisciplinary Studies: Law and Society major helps students meet the demand for leaders who have a solid understanding of law, the institutions where law is created, and how law intersects with our societies, cultures, economies, and politics. The degree program analyzes how law informs and is shaped by political, societal, and cultural processes. This program is hosted in the School of Public and International Affairs and in partnership with UC College of Law. While Political Science and Law are at the center of the program, expertise and specialization come from many other disciplines, including (but not limited to):

- Sociology
- Environmental Studies
- History
- Women, Gender, and Sexuality Studies
- Business
- English
- Journalism
- Philosophy

This multidisciplinary approach allows you to customize your degree not only by selecting one of many pathways for degree completion but also through the consideration of a double major. This degree is a relevant pathway to Law school.

Law and Society majors develop strong research and analytical skills by studying the dynamics of law in domestic and international contexts. For further information visit the School of Public and International Affairs webpage.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please visit UC's Co-op information for further details.

Success

Law and Society majors typically develop the strong analytical skills necessary for interpreting and evaluating arguments that can be applied in a variety of professional settings. Law and Society majors have a passion for how the law impacts different populations and our communities. Through in-class discussion and hands-on experiential learning opportunities, students work with our award-winning faculty to apply their knowledge and skills to real-world problems that relate to law. These unique experiences make them strong candidates for employment in government, private businesses, and the non-profit sector, as well as candidates for Law school and other graduate programs.

Career

Like students who graduate with other social science and liberal arts majors, graduates with a degree in the Law and Society major are prepared for many different career options. The interdisciplinary nature of this unique degree means students acquire many different transferable skills needed by employers, such as critical thinking, leadership, and teamwork. While many majors use their degree to prepare for law school and eventual legal careers, other students establish careers in:

- criminal justice
- state, local and federal government
- private sector
- non-governmental sector
- party politics
- education
- journalism and public relations

Majors also pursue graduate degrees in public policy, public administration, political science, or related fields, becoming consultants, lobbyists, leaders in private and public corporations, non-profit managers, local government leaders, researchers, and educators.

Advising

The College of Arts and Sciences provides advising to all A&S students to advance each individual student's educational goals and plans. Further A&S information can be found here.

For further information, please contact the SPIA program director, whose name and information appear on this page.

The School of Public and International Affairs faculty provide advising about course content, specific program requirements, professional opportunities, and post-baccalaureate education. Faculty advisors and office hours are provided on the SPIA website.

UC Advantages And Special Opportunities

College of Arts and Sciences

Students in UC's College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Co-op

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences. Participation in the co-op track will be noted on students' transcripts. Built with **maximum flexibility**, the optional **co-op** allows students to combine academic coursework with **FULL or PART time paid work experience** (co-op). Co-op for Law and Society does not extend students' graduation timeline and it can help them explore, revise, and define their professional goals.

Admission Requirements

Please visit the Undergraduate Admissions page for more information.

International students should visit the Undergraduate Admissions for International Students page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

International Student Requirements

International students should visit the Undergraduate Admissions for International Students page for more information.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Interdisciplinary : Law and Society

BIS

Interdisciplinary: Law & Society (Optional LAW Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C-min)	3
PD1015	Next Bearcat Lives Here	3
POL1010	Introduction to American Politics	3
BoK: SS	Social Sciences (non-POL discipline)	3
BoK: SCE	Foreign Language	3

Spring Semester Year 1

Course	Title/Desc	Credit
LAW2001	Introduction to Law and the Legal Profession	3
POL1090	Law, Politics, and Society	3
MATH STAT BoK: QR	Quantitative Reasoning (MATH or STAT)	3
BoK: SCE	Foreign Language	3
	A&S First-Year Seminar: List provided each semester by advising office.	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2070	Professionalism and Purpose	3

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
PD2070	Professionalism and Purpose	3
BoK: QR	Quantitative Reasoning	3
	Interdisciplinary Cluster: See INTR-BIS additional information below.	3
	Interdisciplinary Cluster: See INTR-BIS additional information below.	3
	Foreign Language or Elective	3

Select one

Course	Title/Desc	Credit
POL1040	Introduction to Political Theory	3
POL1080	Introduction to International Relations	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
	Interdisciplinary Methodology: Select one from list below.	3
	Interdisciplinary Cluster: See INTR-BIS additional information below.	3
BoK: NS	Natural Sciences	3
	Foreign Language or Elective	3

Optional Co-op Plan

Experience 1
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
	Interdisciplinary Cluster: See INTR-BIS additional information below.	3
BoK: NS	Natural Sciences	3
3XXX+	3000+ Level Elective	3
3XXX+	3000+ Level Elective	3
Free Electives	Experiential Learning/Elective	3

Course	Title/Desc	Credit
3XXX+	(INTR-BIS) 3000+ COURSE INFORMATION: INTR-BIS major requires students to complete a minimum of 24 credit hours (out of 120 credits) of coursework at the 3000-level or higher.	24

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Interdisciplinary

Online

Duration: 4 Years Total Credits: 120 Award: BIS

Overview

Don't start over – start new! The Bachelors of Interdisciplinary Studies (BIS) is a unique transfer-completer degree program that offers you the opportunity to apply previously earned credit and get to the graduation stage faster. Along the way, you choose from multiple disciplines and gain knowledge, methods, and theories that enhance your individual educational and career goals.

Success

You can be successful in Interdisciplinary Studies if you are highly-motivated, goal-oriented and enjoy working independently. With support from an academic adviser, you will translate a career or personal goal into a solid academic plan that is broadly based and rounds out your degree plan.

Career

You will be prepared to embark on a variety of pathways, including

- new leadership positions with your current employer that require a bachelor's degree.
- new employment opportunities that showcase your critical thinking skills and your global perspective.
- professional degree programs such as law or medicine.

Individualized plans of study can be constructed to prepare for many career paths.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biochemistry

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Chemists explore the molecular structure of matter in order to develop theories about how these structures work and to apply those theories to the development of useful new products. Biochemistry applies the ideas and theories of chemistry to the complex realm of biological systems. Biochemists explore the chemical structure and functioning of biological molecules such as proteins, enzymes and DNA. Biochemists also study the chemical reactions that provide energy to cells so that they can carry out their physiological functions. An important goal of biochemistry is to use an understanding of the chemical basis of biological systems to develop new and more effective pharmaceutical agents to prevent or cure serious illnesses.

Success

UC's College of Arts and Sciences (A&S) BS program in biochemistry is well suited for students with a background and interest in sciences such as biology and chemistry. The BS biochemistry program is most appropriate for students with strengths in biology, chemistry and mathematics. Also, since the program requires extensive laboratory work, an enjoyment of hands-on laboratory work is important. Biochemistry majors learn to critically observe and record what happens in the laboratory; they analyze data and apply knowledge learned in the classroom to draw conclusions about their observations.

Career

Graduates of this major are employed as:

- scientists in the pharmaceutical industry
- scientists in state, local or federal government laboratories
- scientists in biomedical research labs
- chemistry and biochemistry teachers and professors
- industrial research and development scientists, including personal and health care products
- forensic scientists
- toxicologists
- physicians and health care professionals

Minoring

Click here to declare the program online

Chemistry Minor

The minor is designed for students who want a strong background in chemistry to complement their major area of study. Students who are enrolled in pre-professional programs may also find a minor in chemistry to be helpful to their professional preparation. To obtain a minor in chemistry, a minimum of 26 credits must be successfully completed, with the following distribution:

- General Chemistry and Lab: CHEM 1040-1041, 1040L-1041L (10 credits)
- Organic Chemistry and Lab: CHEM 2040-2041, 2040L – 2041L (10 credits)
- At least six credits from any additional chemistry courses numbered 2050 or higher [except 2080, 4080, 5020, 5030 and 5080].

Certificate Program

There is no certificate program in chemistry for students currently enrolled in a major at the University of Cincinnati. Rather, the minor in chemistry described above is available. Students not currently enrolled in a major may earn a certificate in chemistry (but not a minor in chemistry) by completing the same set of requirements needed for the minor.

Individuals not yet enrolled as UC students may declare the certificate after establishing non-matriculated status.

Students interested in pursuing a minor in chemistry should see the undergraduate program director to plan a program.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

4+1 Cosmetic Science Master's Degree

Chemistry majors interested in a career as a Cosmetic Scientist can now complete their bachelor's and master's degree in 5 years, without having to take the GRE. Students will be introduced to cosmetic science classes after their first year while continuing to study basic chemistry and eventually will move onto a full year of cosmetic science during the 5th year. They will have two co-op opportunities, one each during the third and fourth year. Once in graduate school, students' coursework will include skin care science, hair care science, formulation science, and color cosmetics in order to be well-prepared to enter this rapid-growth job market.

Special Programs

Important experiential opportunities are available to students in this program, including undergraduate research and academic internships. Undergraduate research is strongly encouraged, and many undergraduates co-author journal articles from the research they conduct in the department. The optional academic internship program in chemistry allows students in the program to have industrial lab experience along with their formal course of study.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries, please contact us at artsci@ucmail.uc.edu

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.

- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Biochemistry

BS

Biochemistry BS (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life	3
BIOL1081L	Biology I Laboratory	1
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I	4

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL1082	Biology II: Evolution, Physiology, and Ecology	3
BIOL1082L	Biology II Laboratory	1
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
MATH1062	Calculus II	4
PD1170	Career Readiness for the Liberal Arts	1
	A&S First-Year Seminar List provided each semester by advising office	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:
Students may declare the co-op track after completing one of the following courses below. They will work with their advisor to choose the appropriate semester and co-op course for each experience.

Course	Title/Desc	Credit
PD2066	Professionalism and Purpose for Natural Science	3
CHEM2080	Sophomore Seminar for Chemistry Majors	1

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
CHEM2040	Organic Chemistry I	4
CHEM2040L	Organic Chemistry Laboratory I	1
	CHEM2080 or PD2066	3
PHYS2001	College Physics I (Calculus-based)	4
BoK: SCE	Foreign Language	3

Spring Semester Year 2

Course	Title/Desc	Credit
CHEM2041	Organic Chemistry II	4
CHEM2041L	Organic ChemistryLaboratory II	1
CHEM2050	Analytical Chemistry	3
ENGL2089	Intermediate Composition	3
PHYS2002	College Physics II (Calculus-based)	4
BoK: SCE	Foreign Language	3

Optional Co-op Plan

Experience 1
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
BIOL2083	Genetics	3
CHEM3020	Physical Chemistry I: Thermodynamics, Statistical Mechanics, and Kinetics	3
BoK: FA,HU	Fine Arts or Humanities	3
BoK: SS	Social Sciences	3
	Foreign Language or Free Elective	3

Spring Semester Year 3

Course	Title/Desc	Credit
CHEM3040	Introduction to Biochemistry	3
CHEM3045L	Characterization and Analysis of Biological Molecules	2
HIST BoK: HP	Historical Perspectives (HIST)	3
BoK: SCE	Society, Culture, & Ethics	3
	Foreign Language or Free Elective	3

Optional Co-op Plan

Experience 2
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Course	Title/Desc	Credit

Fall Semester Year 4

Course	Title/Desc	Credit
CHEM3046L	Characterization and Analysis of Biomolecular Interactions	2
CHEM4040	Intermediate Biochemistry: Synthesizing the Molecules of Life	3
CHEM5080	Senior Seminar for Chemistry Majors	1
BoK: HP	Historical Perspectives	3
BoK: SS	Social Sciences	3

Spring Semester Year 4

Course	Title/Desc	Credit
CHEM4041	Intermediate Biochemistry: Transducing and StoringEnergy in Biological Systems	3
CHEM5030	Undergraduate Research in Chemistry	2
BoK: HU	Humanities	3
Free Electives	Free Elective	3
Free Electives	Free Elective	2

Optional Co-op Plan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4000	COOP for ARTS & SCIENCES - Part time (Experience 3)	1 - 12
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0
	Any course with Experiential Learning attribute and advisor approval	0

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Biology of Animals

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

This concentration within the biology major is an opportunity for students to explore, in greater detail, the behaviors, phylogeny, anatomy, physiology and environmental interactions of animals. Students are able to focus their upper level elective courses on animals and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them and who love to learn about, interact with, or observe animals will often find this concentration within the biology major to be very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Students who enjoy active, hands-on learning will enjoy this concentration, especially learning about animals in laboratory and natural environments. Visual learners will especially appreciate the complexity and behaviors of the animals they will study. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology and a concentration in biology of animals have a wide range of career options as well as options for graduate study. The MS or PhD degree in biology can lead to careers in teaching and research. Students interested in applying to veterinary school will find this concentration to be particularly appropriate. A few examples of career fields open to biology majors with this concentration include the following (most require additional post-graduate training):

- Academic, industrial, environmental / organismal, medical/pharmaceutical researcher
- Anatomist
- Animal behaviorist (Ethnologist)
- Biology teacher (Middle/High School)
- Ecologist
- Entomologist (Insects)
- Fish and wildlife management specialist
- Fisheries / wildlife biologist
- Herpetologist (Amphibians & Reptiles)
- Ichthyologist (Fish)
- Invertebrate biologist
- Laboratory animal medicine specialist
- Mammalogist
- Marine biologist
- Museum curator
- Natural resources manager
- Naturalist
- Ornithologist (Birds)
- Vertebrate biologist
- Veterinarian, veterinary technician
- Zoologist

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Cell Biology or

Ecology/Evolution. During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in UC's College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies, and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are not required to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

UC's College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

- Chemistry (BA or minor)
- Environmental studies
- Geographic information sciences
- Geography
- Geology
- Neuroscience
- Psychology
- Spanish

Experiential Learning

Experiential learning is a large part of the biology undergraduate major. Students are strongly encouraged to conduct research and take unique courses such as this field course held at the Cincinnati Center for Field Studies at Miami Whitewater Forest.Watch the YouTube Video. Internships can also be completed for free elective credit.

Minoring

Students working toward an undergraduate degree at UC can earn a minor, while non-degree students (e.g., graduate students, non-matriculated students) can earn a certificate. The requirements are the same for both. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements outlined below.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics, BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; must be chosen from list of upper level biology courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Faculty within the Department of Biological Sciences are actively engaged in research in a variety of areas. Undergraduates have the opportunity to participate in this research and can earn academic credit that can be applied toward their upper-level biology course requirements. Research can also be done in nearby biology laboratories outside of the department, such as at the UC Medical school, Cincinnati Zoo and Botanical Garden, or the Environmental Protection Agency. Outstanding undergraduates (with a GPA of at least 3.3 overall) may apply for admission to the honors program in biology as early as the spring semester of their sophomore year.

Teaching laboratories within the department are well-equipped and devoted to undergraduate education. Faculty are involved and dedicated to employing new teaching methods and technology that enrich students' educational experiences.

Admission Requirements

Freshman applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- At least a 2.0 GPA cum

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.

- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the college core requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Biomedical Studies

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This concentration within biomedical sciences is an opportunity for students to explore in greater detail the areas of biology that are most relevant to careers in professional biomedical areas, such as medicine, dental, nursing, and other allied health fields. It should provide an excellent preparation for the standardized tests which are required for admission to these professional schools, as well as a background that should prepare students well for the advanced coursework in these professional programs. Students are able to focus their upper level elective courses in areas such as human and comparative anatomy and physiology, medical botany, microbiology, cellular physiology, genetics and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life, from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them, how the body works, the causes of diseases, etc., will often find a biology major very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Since many science courses involve laboratories, students who enjoy active, hands-on learning will enjoy the biology major. Visual learners will especially appreciate the beauty and complexity of the natural world. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology with a concentration in biomedical studies have a wide range of career options as well as options for graduate study in biology, where an MS or PhD degree can lead to careers in teaching and research. Students interested in applying to medical, dental, pharmacy, physican assistant or other professional schools will find this concentration to be particularly appropriate. A few examples of career fields open to biology majors with this concentration include the following (most of which require additional postgraduate training):

- Academic, industrial, medical / pharmaceutical researcher
- Chiropractor
- Community health educator
- Dentist
- Genetic counselor
- Geneticist / medical geneticist
- Hospital / healthcare administrator
- Imaging technologist, medical lab technologist
- Medical researcher
- Nurse / nurse practitioner
- Occupational health specialist
- Optometrist
- Pharmacist
- Pharmaceutical / medical device sales or marketing
- Pharmacologist
- Physician
- Physician assistant
- Physical therapist, occupational therapist
- Podiatrist

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Cell Biology (or

Ecology/Evolution). During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in the UC College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are **not required** to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

UC's College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

- Chemistry (BA or minor)
- Environmental studies

- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.

- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the college core requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

	Biology Lecture options: BIOL3030, BIOL3041, BIOL3077, BIOL4040, BIOL4041, BIOL4052, BIOL4062, BIOL5104, BIOL5121, BIOL5151, BIOL5180, BIOL5182	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Cell & Molecular Biology

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This concentration within the biology major is an opportunity for students to explore in greater detail the molecular basis of living organisms, including cellular physiology and genetics. Students are able to focus their upper level elective courses on cell biology, genetics, molecular biology and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life, from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them and who love to learn about living organisms at their most basic level will often find this concentration within the biology major to be very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Students who enjoy active, hands-on learning will enjoy this concentration, especially learning modern cellular and molecular laboratory techniques. Visual learners will appreciate the complexity of the processes they will study. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology with a concentration in cell/molecular biology have a wide range of career options as well as options for graduate study in biology, where an MS or PhD degree can lead to careers in teaching and research. Students interested in applying to medical, dental, veterinary or other professional schools will find this concentration to be particularly appropriate. A few examples of career fields open to biology majors with this concentration include the following (most of which require postgraduate training):

- Academic, industrial, medical / pharmaceutical researcher
- Bacteriologist
- Bioinformaticist
- Biology teacher (middle/high school)
- Biotechnologist
- Cell biologist
- Dentist, Optometrist, Chiropractor
- Developmental biologist
- Food technologist
- Forensic scientist
- Genetic counselor
- Geneticist/medical geneticist
- Genomist
- Immunologist
- Medical technologist
- Molecular biologist
- Neurobiologist
- Occupational health specialist
- Pharmacist
- Pharmaceutical / medical device sales or marketing
- Pharmacologist, Toxicologist
- Physical therapist, Occupational therapist
- Physician, Physician Assistant, Nurse
- Virologist

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Cell Biology (or Ecology/Evolution). During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in the UC College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies, and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are **not required** to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

The UC College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

- Chemistry (BA or minor)
- Environmental studies
- Geographic information sciences
- Geography
- Geology
- Neuroscience
- Psychology
- Spanish

Experiential Learning

Experiential learning is a large part of the biology undergraduate major. Students are strongly encouraged to conduct research and take unique courses such as this field course held at the Cincinnati Center for Field Studies at Miami Whitewater Forest. Watch the YouTube Video. Internships can also be completed for free elective credit.

Minoring

Students working toward an undergraduate degree at UC can earn a minor, while non-degree students (e.g., graduate students, non-matriculated students) can earn a certificate. The requirements are the same for both. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements outlined below.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics, BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; must be chosen from list of upper level biology courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Faculty within the Department of Biological Sciences are actively engaged in research in a variety of areas. Undergraduates have the opportunity to participate in this research and can earn academic credit that can be applied toward their upper-level biology course requirements. Research can also be done in nearby biology laboratories outside of the department, such as at the UC Medical school, Cincinnati Children's Hospital Medical Center, or the Environmental Protection Agency. Outstanding undergraduates (with a GPA of at least 3.3 overall) may apply for admission to the honors program in biology as early as the spring semester of their sophomore year.

Teaching laboratories within the department are well-equipped and devoted to undergraduate education. Faculty are involved and dedicated to employing new teaching methods and technology that enrich students' educational experiences.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the college core requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

	Biology Lab options: BIOL3012C, BIOL3020C, BIOL3024&BIOL3024L, BIOL4011&BIOL4011L, BIOL4020C, BIOL4022C, BIOL4043&BIOL4043L, BIOL4053C, BIOL4055C, BIOL5193C	4
	Biology Lecture options: BIOL3021, BIOL3041, BIOL3077, BIOL4023, BIOL4030, BIOL4040, BIOL4041, BIOL4052, BIOL5104, BIOL5151, BIOL5177, BIOL5180, BIOL5182	3

Biomedical Concentration

Upper level electives- 5 required, 2 of which must be labs

Course	Title/Desc	Credit
	Biology Lab options: BIOL3020C, BIOL4011&BIOL4011L, BIOL4020C, BIOL4022C, BIOL4043&BIOL4043L, BIOL4053C, BIOL4055C, BIOL4091C, BIOL5102C, BIOL5193C	4
	Biology Lecture options: BIOL3021, BIOL3030, BIOL3041, BIOL3052, BIOL3077, BIOL4040, BIOL4041, BIOL4052, BIOL4062, BIOL5104, BIOL5121, BIOL5151, BIOL5180, BIOL5182	3

Evolution & Ecology Concentration

Upper level electives- 5 required, 2 of which must be labs

Course	Title/Desc	Credit
	Biology Lab options: BIOL3010C, BIOL3011C, BIOL3012C, BIOL3024&BIOL3024L, BIOL3051C, BIOL3090 BIOL4020C, BIOL4022C, BIOL4025C	4
	Biology Lecture options: BIOL3015, BIOL3041, BIOL3052, BIOL3077, BIOL4023, BIOL4030, BIOL5104, BIOL5160, BIOL5175, BIOL5177	3

CELL & MOLECULAR BIOLOGY CONCENTRATION

Upper level electives- 5 required, 2 of which must be labs

Course	Title/Desc	Credit
	Biology Lab options: BIOL4011&BIOL4011L, BIOL4025C, BIOL4043&BIOL4043L, BIOL4053C, BIOL4055C, BIOL4091C, BIOL5102C	4
	Biology Lecture options: BIOL3030, BIOL3041, BIOL3077, BIOL4040, BIOL4041, BIOL4052, BIOL4062, BIOL5104, BIOL5121, BIOL5151, BIOL5180, BIOL5182	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Ecology & Evolution

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This concentration within the biology major is an opportunity for students to explore, in greater detail, the interactions among living organisms and their environments. It also allows the further exploration of evolutionary processes at molecular, organismal and ecosystem levels. Students are able to focus their upper level elective courses on ecology, evolution and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life: the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that enables them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them and who love to learn about, interact with or observe living organisms in their natural environment will often find this concentration within the biology major to be very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Students who enjoy active, hands-on learning will enjoy this concentration, especially learning about various ecosystems and examining fossils and other evidence for evolution and natural selection. Visual learners will especially appreciate the complexity of the organisms and environments they will study. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology and a concentration in ecology and evolutionary biology have a wide range of career options as well as options for graduate study. The MS or PhD degrees in biology can lead to careers in teaching and research. A few examples of career fields open to biology majors with this concentration include the following (many of which require additional postgraduate studies):

- Academic, industrial, environmental / organismal researcher
- Botanist
- Conservation specialist
- Consultant
- Ecologist
- Environmental studies specialist
- Evolutionary biologist
- Fish and wildlife management specialist
- Landscape specialist
- Law, specifically areas that include environmental issues requiring a solid scientific background
- Marine biologist
- Middle/high school educator
- Museum curator
- Natural resources manager
- Naturalist, Zookeeper
- Paleontologist
- Peace corps worker
- Regulatory affairs specialist
- Scientific writer
- Soil scientist
- Veterinarian

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Ecology/Evolution (or Cell Biology). During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in the UC College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are **not required** to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

UC's College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

- Chemistry (BA or minor)
- Environmental studies
- Geographic information sciences
- Geography
- Geology
- Neuroscience
- Psychology
- Spanish

Experiential Learning

Experiential learning is a large part of the biology undergraduate major. Students are strongly encouraged to conduct research and take unique courses such as this field course held at the Cincinnati Center for Field Studies at Miami Whitewater Forest. Watch the YouTube Video. Internships can also be completed for free elective credit.

Minoring

Students working toward an undergraduate degree at UC can earn a minor, while non-degree students (e.g., graduate students, non-matriculated students) can earn a certificate. The requirements are the same for both. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements outlined below.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics, BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; must be chosen from list of upper level biology courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

4+1 Cosmetic Science Master's Degree

Biology majors interested in a career as a Cosmetic Scientist can now complete their bachelor's and master's degree in 5 years, without having to take the GRE. Students will be introduced to cosmetic science classes after their first year while continuing to study basic chemistry and eventually will move onto a full year of cosmetic science during the 5th year. They will have two co-op opportunities, one each during the third and fourth year. Once in graduate school, students' coursework will include skin care science, hair care science, formulation science, and color cosmetics in order to be well-prepared to enter this rapid-growth job market.

Special Programs

Faculty within the Department of Biological Sciences are actively engaged in research in a variety of areas. Undergraduates have the opportunity to participate in this research and can earn academic credit that can be applied toward their upper-level biology course requirements. Research can also be done in nearby biology laboratories outside of the department, such as at the UC Medical school, Cincinnati Children's Hospital Medical Center, or the Environmental Protection Agency. Outstanding undergraduates (with a GPA of at least 3.3 overall) may apply for admission to the honors program in biology as early as the spring semester of their sophomore year.

Teaching laboratories within the department are well-equipped and devoted to undergraduate education. Faculty are involved and dedicated to employing new teaching methods and technology that enrich students' educational experiences.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the college core requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Biology is the scientific study of life and life processes. Biologists study the organization of life, from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them, how the body works, the causes of diseases, etc., will often find a biology major very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Since many science courses involve laboratories, students who enjoy active, hands-on learning will enjoy the biology major. Visual learners will especially appreciate the beauty and complexity of the natural world. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology have a wide range of career options as well as options for graduate study in biology. With a BS degree in biology, graduates may immediately enter careers in some technical fields or they may pursue a post-graduate degree. A few examples of career fields open to biology majors include the following (many of which require additional degrees):

- Academic, industrial, environmental / organismal, medical / pharmaceutical researcher/cosmetic science
- Occupational therapist, physical therapist,
- Physician, optometrist, dentist, chiropractor, physician assistant
- Law, specifically areas that include environmental issues and patent law requiring a solid scientific background
- Medical lab technologist, imaging technologist, nurse
- College/university, middle/high school educator
- Forestry, horticulture, park service, wildlife/fishery biologist
- Regulatory affairs specialist, hospital / healthcare administration, scientific writing
- Pharmaceutical / medical device sales or marketing
- Veterinarian, zookeeper, naturalist

Minoring

Students working toward an undergraduate degree at UC can earn a minor. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements outlined below.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics, BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; must be chosen from list of upper level biology courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.

Evolution & Ecology Concentration

Upper level electives- 5 required, 2 of which must be labs

Course	Title/Desc	Credit
	Biology Lab options: BIOL3010C, BIOL3011C, BIOL3012C, BIOL3024&BIOL3024L, BIOL3051C, BIOL3090 BIOL4020C, BIOL4022C, BIOL4025C, BIOL4093C	4
	Biology Lecture options: BIOL3015, BIOL3041, BIOL3042, BIOL3052, BIOL3077, BIOL4023, BIOL4030, BIOL4070, BIOL5104, BIOL5142, BIOL5160, BIOL5175, BIOL5177	3

Cell & Molecular Biology Concentration

Upper level electives- 5 required, 2 of which must be labs

Course	Title/Desc	Credit
	Biology Lab options: BIOL4011&BIOL4011L, BIOL4025C, BIOL4043&BIOL4043L, BIOL4053C, BIOL4055C, BIOL4091C, BIOL5102C	4
	Biology Lecture options: BIOL3027, BIOL3030, BIOL3041, BIOL3077, BIOL4040, BIOL4041, BIOL4052, BIOL4062, BIOL4070, BIOL5104, BIOL5121, BIOL5142, BIOL5151, BIOL5180, BIOL5182	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

BS

Biology (BS) 4+1 for Cosmetic Science MS Curriculum (Optional Co-op Plan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
MLTI1011	Learning Community	0
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life	3
BIOL1081L	Biology I Laboratory	1
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
	A&S First-Year Seminar List provided each semester by advising office.	3

Quantitative Reasoning (select one)

Course	Title/Desc	Credit
MATH1044	Applied Calculus I	3
MATH1061	Calculus I	4

Spring Semester Year 1

Course	Title/Desc	Credit
MLTI1011	Learning Community	0
BIOL1082	Biology II: Evolution, Physiology, and Ecology	3
BIOL1082L	Biology II Laboratory	1
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
ENGL1001	English Composition (C- min)	3
PD1170	Career Readiness for the Liberal Arts	1
STAT1034	Elementary Statistics I	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete ONE of the following courses in Fall Semester of Year 2:

Course	Title/Desc	Credit
BIOL2061	Professionalism, Purpose, and Careers in Biology	2
PD2045	Professionalism, Purpose, and Success on the Pre-Health Pathway	2

Students will complete 2 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Select one

Course	Title/Desc	Credit
BIOL2083	Genetics	3
BIOL2084C	Ecology and Evolution	4

Select one combination of lecture and corresponding lab

Course	Title/Desc	Credit
CHEM2030	Survey of Biochemistry I	4
CHEM2030L	Survey of Biochemistry Laboratory I	1
CHEM2040	Organic Chemistry I	4
CHEM2040L	Organic Chemistry Laboratory I	1

Course	Title/Desc	Credit

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Biology of Animals

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

This concentration within the biology major is an opportunity for students to explore, in greater detail, the behaviors, phylogeny, anatomy, physiology and environmental interactions of animals. Students are able to focus their upper level elective courses on animals and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them and who love to learn about, interact with, or observe animals will often find this concentration within the biology major to be very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Students who enjoy active, hands-on learning will enjoy this concentration, especially learning about animals in laboratory and natural environments. Visual learners will especially appreciate the complexity and behaviors of the animals they will study. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology and a concentration in biology of animals have a wide range of career options as well as options for graduate study. The MS or PhD degree in biology can lead to careers in teaching and research. Students interested in applying to veterinary school will find this concentration to be particularly appropriate. A few examples of career fields open to biology majors with this concentration include the following (most require additional post-graduate training):

- Academic, industrial, environmental / organismal, medical/pharmaceutical researcher
- Anatomist
- Animal behaviorist (Ethnologist)
- Biology teacher (Middle/High School)
- Ecologist
- Entomologist (Insects)
- Fish and wildlife management specialist
- Fisheries / wildlife biologist
- Herpetologist (Amphibians & Reptiles)
- Ichthyologist (Fish)
- Invertebrate biologist
- Laboratory animal medicine specialist
- Mammalogist
- Marine biologist
- Museum curator
- Natural resources manager
- Naturalist
- Ornithologist (Birds)
- Vertebrate biologist
- Veterinarian, veterinary technician
- Zoologist

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Cell Biology or

Ecology/Evolution. During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in UC's College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies, and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are not required to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

UC's College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

- Chemistry (BA or minor)
- Environmental studies
- Geographic information sciences
- Geography
- Geology
- Neuroscience
- Psychology
- Spanish

Experiential Learning

Experiential learning is a large part of the biology undergraduate major. Students are strongly encouraged to conduct research and take unique courses such as this field course held at the Cincinnati Center for Field Studies at Miami Whitewater Forest.Watch the YouTube Video. Internships can also be completed for free elective credit.

Minoring

Students working toward an undergraduate degree at UC can earn a minor, while non-degree students (e.g., graduate students, non-matriculated students) can earn a certificate. The requirements are the same for both. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements outlined below.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics, BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; must be chosen from list of upper level biology courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.

Advising

Contact department via information which appears on this page.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Faculty within the Department of Biological Sciences are actively engaged in research in a variety of areas. Undergraduates have the opportunity to participate in this research and can earn academic credit that can be applied toward their upper-level biology course requirements. Research can also be done in nearby biology laboratories outside of the department, such as at the UC Medical school, Cincinnati Zoo and Botanical Garden, or the Environmental Protection Agency. Outstanding undergraduates (with a GPA of at least 3.3 overall) may apply for admission to the honors program in biology as early as the spring semester of their sophomore year.

Teaching laboratories within the department are well-equipped and devoted to undergraduate education. Faculty are involved and dedicated to employing new teaching methods and technology that enrich students' educational experiences.

Admission Requirements

Freshman applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- At least a 2.0 GPA cum

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.

- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the college core requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

	Biology Lab options: BIOL4011&BIOL4011L, BIOL4025C, BIOL4043&BIOL4043L, BIOL4053C, BIOL4055C, BIOL4091C, BIOL5102C	4
	Biology Lecture options: BIOL3030, BIOL3041, BIOL3077, BIOL4040, BIOL4041, BIOL4052, BIOL4062, BIOL5104, BIOL5121, BIOL5151, BIOL5180, BIOL5182	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Biomedical Studies

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This concentration within biomedical sciences is an opportunity for students to explore in greater detail the areas of biology that are most relevant to careers in professional biomedical areas, such as medicine, dental, nursing, and other allied health fields. It should provide an excellent preparation for the standardized tests which are required for admission to these professional schools, as well as a background that should prepare students well for the advanced coursework in these professional programs. Students are able to focus their upper level elective courses in areas such as human and comparative anatomy and physiology, medical botany, microbiology, cellular physiology, genetics and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life, from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them, how the body works, the causes of diseases, etc., will often find a biology major very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Since many science courses involve laboratories, students who enjoy active, hands-on learning will enjoy the biology major. Visual learners will especially appreciate the beauty and complexity of the natural world. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology with a concentration in biomedical studies have a wide range of career options as well as options for graduate study in biology, where an MS or PhD degree can lead to careers in teaching and research. Students interested in applying to medical, dental, pharmacy, physican assistant or other professional schools will find this concentration to be particularly appropriate. A few examples of career fields open to biology majors with this concentration include the following (most of which require additional postgraduate training):

- Academic, industrial, medical / pharmaceutical researcher
- Chiropractor
- Community health educator
- Dentist
- Genetic counselor
- Geneticist / medical geneticist
- Hospital / healthcare administrator
- Imaging technologist, medical lab technologist
- Medical researcher
- Nurse / nurse practitioner
- Occupational health specialist
- Optometrist
- Pharmacist
- Pharmaceutical / medical device sales or marketing
- Pharmacologist
- Physician
- Physician assistant
- Physical therapist, occupational therapist
- Podiatrist

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Cell Biology (or

Ecology/Evolution). During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in the UC College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are **not required** to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

UC's College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

- Chemistry (BA or minor)
- Environmental studies
- Geographic information sciences
- Geography
- Geology
- Neuroscience
- Psychology
- Spanish

Experiential Learning

Experiential learning is a large part of the biology undergraduate major. Students are strongly encouraged to conduct research and take unique courses such as this field course held at the Cincinnati Center for Field Studies at Miami Whitewater Forest. Watch the YouTube Video. Internships can also be completed for free elective credit.

Minoring

Students working toward an undergraduate degree at UC can earn a minor, while non-degree students (e.g., graduate students, non-matriculated students) can earn a certificate. The requirements are the same for both. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements outlined below.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics, BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; must be chosen from list of upper level biology courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.

Advising

Contact department via information which appears on this page.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Faculty within the Department of Biological Sciences are actively engaged in research in a variety of areas. Undergraduates have the opportunity to participate in this research and can earn academic credit that can be applied toward their upper-level biology course requirements. Research can also be done in nearby biology laboratories outside of the department, such as at the UC Medical school, Cincinnati Children's Hospital Medical Center, or the Environmental Protection Agency. Outstanding undergraduates (with a GPA of at least 3.3 overall) may apply for admission to the honors program in biology as early as the spring semester of their sophomore year.

Teaching laboratories within the department are well-equipped and devoted to undergraduate education. Faculty are involved and dedicated to employing new teaching methods and technology that enrich students' educational experiences.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.

- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the college core requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Cell & Molecular Biology

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This concentration within the biology major is an opportunity for students to explore in greater detail the molecular basis of living organisms, including cellular physiology and genetics. Students are able to focus their upper level elective courses on cell biology, genetics, molecular biology and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life, from the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that will enable them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them and who love to learn about living organisms at their most basic level will often find this concentration within the biology major to be very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Students who enjoy active, hands-on learning will enjoy this concentration, especially learning modern cellular and molecular laboratory techniques. Visual learners will appreciate the complexity of the processes they will study. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology with a concentration in cell/molecular biology have a wide range of career options as well as options for graduate study in biology, where an MS or PhD degree can lead to careers in teaching and research. Students interested in applying to medical, dental, veterinary or other professional schools will find this concentration to be particularly appropriate. A few examples of career fields open to biology majors with this concentration include the following (most of which require postgraduate training):

- Academic, industrial, medical / pharmaceutical researcher
- Bacteriologist
- Bioinformaticist
- Biology teacher (middle/high school)
- Biotechnologist
- Cell biologist
- Dentist, Optometrist, Chiropractor
- Developmental biologist
- Food technologist
- Forensic scientist
- Genetic counselor
- Geneticist/medical geneticist
- Genomist
- Immunologist
- Medical technologist
- Molecular biologist
- Neurobiologist
- Occupational health specialist
- Pharmacist
- Pharmaceutical / medical device sales or marketing
- Pharmacologist, Toxicologist
- Physical therapist, Occupational therapist
- Physician, Physician Assistant, Nurse
- Virologist

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Cell Biology (or Ecology/Evolution). During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in the UC College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies, and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are **not required** to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

The UC College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Ecology & Evolution

Duration: 4 Years Total Credits: 120 Award: BS

Overview

This concentration within the biology major is an opportunity for students to explore, in greater detail, the interactions among living organisms and their environments. It also allows the further exploration of evolutionary processes at molecular, organismal and ecosystem levels. Students are able to focus their upper level elective courses on ecology, evolution and related topics.

Biology is the scientific study of life and life processes. Biologists study the organization of life: the structures of molecules to the balance of ecosystems. Biology majors learn to observe critically the details of all life; they analyze data and apply biological knowledge learned in the classroom to draw conclusions about their observations.

Biologists are able to make significant contributions to maintaining the health and well-being of the human population, as well as preserving and protecting the environment. They develop a knowledge base and scientific way of thinking that enables them to make informed personal health and public policy decisions.

Success

Students who have an interest in the living world around them and who love to learn about, interact with or observe living organisms in their natural environment will often find this concentration within the biology major to be very rewarding. Successful biology majors are good at making careful observations and recording information in a logical way. They excel at analyzing that information (critical thinking), which often involves employing basic math skills. Students who enjoy active, hands-on learning will enjoy this concentration, especially learning about various ecosystems and examining fossils and other evidence for evolution and natural selection. Visual learners will especially appreciate the complexity of the organisms and environments they will study. The major requires a significant amount of hard work and study time, but can result in a very rewarding career.

Career

Graduates with a BS in biology and a concentration in ecology and evolutionary biology have a wide range of career options as well as options for graduate study. The MS or PhD degrees in biology can lead to careers in teaching and research. A few examples of career fields open to biology majors with this concentration include the following (many of which require additional postgraduate studies):

- Academic, industrial, environmental / organismal researcher
- Botanist
- Conservation specialist
- Consultant
- Ecologist
- Environmental studies specialist
- Evolutionary biologist
- Fish and wildlife management specialist
- Landscape specialist
- Law, specifically areas that include environmental issues requiring a solid scientific background
- Marine biologist
- Middle/high school educator
- Museum curator
- Natural resources manager
- Naturalist, Zookeeper
- Paleontologist
- Peace corps worker
- Regulatory affairs specialist
- Scientific writer
- Soil scientist
- Veterinarian

Majoring

The study of biology includes several subdisciplines, and the major offers students the flexibility to create their own course of study within this range of possibilities. Majors begin by establishing a broad base in the discipline, taking a two-semester sequence in introductory biology (lecture/lab), followed by two semesters of sophomore biology courses in Genetics and Ecology/Evolution (or Cell Biology). During the final two years, biology majors must complete upper-level electives in biology, which must include a laboratory component. Undergraduate research may be used to fulfill one of the lab requirements.

The Department of Biological Sciences in the UC College of Arts and Sciences (A&S) is now offering students the option of graduating with a concentration in a specific area of biology. The concentrations offered are biology of animals, cell and molecular biology, biomedical studies and ecology and evolution. To graduate with one of these concentrations, a student must declare the particular concentration of their major and then select upper level courses and the capstone from lists of appropriate courses within the concentration. Students are **not required** to choose a concentration. They can choose their biology major electives to match their interests (whether focused or varied) and thus earn a general degree in biological sciences.

UC's College of Arts and Sciences' flexible degree requirements allow for and highly encourage students to pursue multiple areas of study. Free electives allow for enough credits for students to pursue a minor, certificate program or even complete a second major. Students who have selected this concentration have completed second majors or minors in a number of different fields, for example those listed below.

- Chemistry (BA or minor)
- Environmental studies
- Geographic information sciences
- Geography
- Geology
- Neuroscience
- Psychology
- Spanish

Experiential Learning

Experiential learning is a large part of the biology undergraduate major. Students are strongly encouraged to conduct research and take unique courses such as this field course held at the Cincinnati Center for Field Studies at Miami Whitewater Forest. Watch the YouTube Video. Internships can also be completed for free elective credit.

Minoring

Students working toward an undergraduate degree at UC can earn a minor, while non-degree students (e.g., graduate students, non-matriculated students) can earn a certificate. The requirements are the same for both. See an undergraduate student advisor in the Department of Biological Sciences to create a plan to meet the requirements outlined below.

Course Requirements (31-32 hours):

- Biology I & II with Labs, BIOL 1081-1082, 1081L-1082L (8 hours)
- Genetics, BIOL 2083 (3 hours)
- Evolution and Ecology, BIOL 2084C OR Cell Biology, BIOL 2085C (4 hours)
- General Chemistry I & II with Labs, CHEM 1040-1041, 1040L-1041L (10 hours)
- Two upper level electives, BIOL 3000 and above (6-7 hours)*
  *Two courses are required; must be chosen from list of upper level biology courses posted by Biology department each academic year. One must have a lab component - this may be taken either by completing a combined course (designated C) or by completing a lecture course with a companion laboratory course, or by completing Undergraduate research for 3 credits in a single semester with a public presentation.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

4+1 Cosmetic Science Master's Degree

Biology majors interested in a career as a Cosmetic Scientist can now complete their bachelor's and master's degree in 5 years, without having to take the GRE. Students will be introduced to cosmetic science classes after their first year while continuing to study basic chemistry and eventually will move onto a full year of cosmetic science during the 5th year. They will have two co-op opportunities, one each during the third and fourth year. Once in graduate school, students' coursework will include skin care science, hair care science, formulation science, and color cosmetics in order to be well-prepared to enter this rapid-growth job market.

Special Programs

Faculty within the Department of Biological Sciences are actively engaged in research in a variety of areas. Undergraduates have the opportunity to participate in this research and can earn academic credit that can be applied toward their upper-level biology course requirements. Research can also be done in nearby biology laboratories outside of the department, such as at the UC Medical school, Cincinnati Children's Hospital Medical Center, or the Environmental Protection Agency. Outstanding undergraduates (with a GPA of at least 3.3 overall) may apply for admission to the honors program in biology as early as the spring semester of their sophomore year.

Teaching laboratories within the department are well-equipped and devoted to undergraduate education. Faculty are involved and dedicated to employing new teaching methods and technology that enrich students' educational experiences.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Technical & Community College
- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has a cumulative 2.0 GPA.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Attain a 2.0 grade point average for all courses within the biology major.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college, including at least 12 credits from the A&S Biology Department that count toward major requirements.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the college core requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemistry

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Chemistry explores how the molecular structure of matter interacts, combines or changes over time. At UC College of Arts and Sciences, you'll work alongside internationally renowned experts to conduct experiments and publish your results in respected journals. UC is recognized nationally as a top research university by the Carnegie Foundation. Here, your research matters. That's why you'll have the opportunity to dedicate yourself full time to pursuing your research interests as part of your undergraduate degree.

UC's chemistry labs boast millions of dollars in the latest equipment, giving you the resources to follow your passion in a department that promises you personal attention. You will be able to help UC's expert faculty investigate solutions to real-world problems such as lead poisoning or collaborate with researchers in UC's many other fields. Do you have an entrepreneurial spirit? UC's chemistry department is at the forefront of new patents for everything from biosensors to drug-delivery methods. And in UC's Chemistry Department, you will get a chance to contribute to meaningful work with the UC Genome Research Institute, the UC College of Medicine, Children's Hospital and UC's College of Engineering and Applied Science on projects that suit your interests and passions. UC also partners with some of the biggest names in chemistry by offering you internships or co-ops at Fortune 500 research partners such as P&G and government institutions such as the U.S. Food and Drug Administration.

Success

The UC College of Arts and Sciences (A&S) BS program in chemistry is well suited for students with a background and interest in science. The calculus and physics requirements for the BS program are matched to those required for medical, dental and pharmacy schools, allowing students in this major to pursue a range of professional school options smoothly. The program provides for extensive laboratory work; therefore, the enjoyment of hands-on laboratory work is important. Chemistry majors also learn to observe critically and record what happens in the laboratory; they analyze data and apply chemical knowledge learned in the classroom to draw conclusions about their observations.

Career

Graduates of this major are employed as:

- Chemists in the manufacturing industry and state, local or federal governments, including production, quality control and research
- Chemistry teachers and professors
- Industrial research and development scientists
- Forensic scientists
- Physicians and health care professionals
- Pharmacists

Chemistry BS (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years.

Special Programs

The BS program in chemistry is a rigorous course of study that prepares graduates to be successful in a wide range of careers. Important experiential opportunities are available to students in this program, including undergraduate research and academic internships. Undergraduate research is strongly encouraged, and many undergraduates co-author journal articles from the research they conduct in the department. The optional academic internship program in chemistry allows students in the program to have industrial lab experience along with their formal course of study.

During your sophomore year, this major will allow you to choose a co-op rotation track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate your experience within your undergraduate degree. Engaging in several meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and provides you with a competitive edge as you enter the workforce after graduation.

Admission Requirements

First year applicants, please review the admission requirements.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Chemistry

BS

Chemistry BS (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENGL1001	English Composition (C- min)	3
MATH1044	Applied Calculus I	3
BoK: SCE	Foreign Language	3

Spring Semester Year 1

Course	Title/Desc	Credit
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
MATH1045	Applied Calculus II	3
PD1170	Career Readiness for the Liberal Arts	1
	A&S First-Year Seminar List provided each semester by advising office	3
BoK: SCE	Foreign Language	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete ONE of the following courses in Fall Semester of Year 2:

Course	Title/Desc	Credit
CHEM2080	Sophomore Seminar for Chemistry Majors	1
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
CHEM2040	Organic Chemistry I	4
CHEM2040L	Organic Chemistry Laboratory I	1
PHYS1051	General Physics I (Algebra-based)	4
PHYS1051L	General Physics Lab I (Algebra-based)	1
	CHEM2080 or PD2066	1 - 3
	Foreign Language or Free Elective	3

Spring Semester Year 2

Course	Title/Desc	Credit
CHEM2041	Organic Chemistry II	4
CHEM2050	Analytical Chemistry	3
PHYS1052	General Physics II (Algebra-based)	4
PHYS1052L	General Physics Lab II (Algebra-based)	1
BoK: SS	Social Sciences	3
	Foreign Language or Free Elective	3

Optional Co-op Plan

Experience 1

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
CHEM3010	Survey of Physical Chemistry	3
ENGL2089	Intermediate Composition	3
BoK: FA,HU	Fine Arts or Humanities	3
BoK: SS	Social Sciences	3
Free Electives	Free Elective	3

Spring Semester Year 3

Course	Title/Desc	Credit
CHEM3040	Introduction to Biochemistry	3
BoK: HP	Historical Perspectives (HIST)	3
BoK: HU	Humanities	3
BoK: SCE	Society, Culture, & Ethics	3
	Experiential Learning/Elective	3

Optional Co-op Plan

Experience 2

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Fall Semester Year 4

Course	Title/Desc	Credit

Spring Semester Year 4

Select one

Course	Title/Desc	Credit
CHEM4020	Inorganic Chemistry	3
CHEM5080	Senior Seminar for Chemistry Majors	1
CHEM	Chemistry Lecture from list below	3
BoK: HP	Historical Perspectives	3
Free Electives	Free Elective	3

Course	Title/Desc	Credit
CHEM5021	Literature Research Project in Chemistry	1 - 4
CHEM5030	Undergraduate Research in Chemistry	1 - 6

Course	Title/Desc	Credit
CHEM	Chemistry Lab from list below	2 - 3
Free Electives	Free Elective	3
Free Electives	Free Elective	1
Free Electives	Free Elective	3
Free Electives	Free Elective	0 - 1

Optional Co-op Plan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4000	COOP for ARTS & SCIENCES - Part time (Experience 3)	1 - 12
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0
	Any course with an Experiential Learning attribute and advisor approval	0

Chemistry Lecture Courses

Students are required to complete 1 course from the following list, for a minimum of 3 credit hours of coursework:

Course	Title/Desc	Credit
CHEM3021	Physical Chemistry II: Quantum Chemistry and Molecular Spectroscopy	3
CHEM3030	Instrumental Analysis	3
CHEM4040	Intermediate Biochemistry: Synthesizing the Molecules of Life	3
CHEM4041	Intermediate Biochemistry: Transducing and StoringEnergy in Biological Systems	3
CHEM4054	Polymers and Soft Materials: An Introduction	3

Chemistry Lab Courses

Students are required to complete 2 courses from the following list, for a minimum of 3 credit hours of coursework

Course	Title/Desc	Credit
CHEM2041L	Organic ChemistryLaboratory II	1
CHEM3021L	Physical Chemistry Laboratory	2
CHEM3030L	Instrumental Analysis Laboratory	2
CHEM3045L	Characterization and Analysis of Biological Molecules	2
CHEM3046L	Characterization and Analysis of Biomolecular Interactions	2
CHEM4020L	Inorganic Chemistry Laboratory	2

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemistry-ACS

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Chemistry explores how the molecular structure of matter interacts, combines or changes over time.

At UC College of Arts and Sciences, you can challenge yourself in a rigorous program certified by the American Chemical Society that will launch your career in this rewarding field. This program is designed for students who are strong in science and math with calculus and physics requirements that set it apart from UC's Chemistry BS program. Chemistry-ACS gives you time to pursue your research interests in UC's cutting-edge laboratories, where you'll have access to the latest instrumentation to conduct experiments and publish your results.

Success

The UC College of Arts and Sciences (A&S) BS-ACS program in chemistry is well suited for students with a background and interest in science. Since the calculus and physics requirements for the BS-ACS program are more extensive than for the BS program, the BS-ACS program is most appropriate for students with strengths in both science and mathematics. The program provides for extensive laboratory work; therefore, the enjoyment of hands-on laboratory work is important. Chemistry majors also learn to observe critically and record what happens in the laboratory; they analyze data and apply chemical knowledge learned in the classroom to draw conclusions about their observations.

Career

Graduates of this major are employed as:

- Chemists in the manufacturing industry and state, local or federal governments, including production, quality control and research
- Chemistry teachers and professors
- Industrial research and development scientists
- Forensic scientists
- Physicians and health care professionals

Many of the students in the BS-ACS program go on to graduate schools, primarily into doctoral programs. Others go to professional schools, including medicine, pharmacy and dentistry.

Minoring

Click here to declare the program online

Chemistry Minor

The minor is designed for students who want a strong background in chemistry to complement their major area of study. Students who are enrolled in pre-professional programs may also find a minor in chemistry to be helpful to their professional preparation. To obtain a minor in chemistry, a minimum of 26 credits must be successfully completed, with the following distribution:

- General Chemistry and Lab: CHEM 1040-1041, 1040L-1041L (10 credits)
- Organic Chemistry and Lab: CHEM 2040-2041, 2040L – 2041L (10 credits)
- At least six credits from any additional chemistry courses numbered 2050 or higher [except 2080, 4080, 5020, 5030 and 5080].

Certificate Program

There is no certificate program in chemistry for students currently enrolled in a major at the University of Cincinnati. Rather, the minor in chemistry described above is available. Students not currently enrolled in a major may earn a certificate in chemistry (but not a minor in chemistry) by completing the same set of requirements needed for the minor.

Individuals not yet enrolled as UC students may declare the certificate after establishing non-matriculated status.

Students interested in pursuing a minor in chemistry should see the undergraduate program director to plan a program.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies, and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

4+1 Cosmetic Science Master's Degree

Chemistry majors interested in a career as a Cosmetic Scientist can now complete their bachelor's and master's degree in 5 years, without having to take the GRE. Students will be introduced to cosmetic science classes after their first year while continuing to study basic chemistry and eventually will move onto a full year of cosmetic science during the 5th year. They will have two co-op opportunities, one each during the third and fourth year. Once in graduate school, students' coursework will include skin care science, hair care science, formulation science, and color cosmetics in order to be well-prepared to enter this rapid-growth job market.

Special Programs

The BS-ACS program in chemistry is a rigorous course of study that prepares graduates to be successful in a wide range of careers. The BS-ACS degree is certified by the American Chemical Society. Important experiential opportunities are available to students in this program, including undergraduate research and academic internships. Undergraduate research is required, and many undergraduates co-author journal articles from the research they conduct in the department. The optional academic internship program in chemistry allows students in the program to have industrial lab experience along with their formal course of study.

Admission Requirements

- Information for Freshmen Students
- Information for International Students

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.

- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

This program is accredited by the American Chemical Society (ACS).

Environmental Studies

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Toxic algae, air pollution, declining biodiversity. UC's College of Arts and Sciences prepares you to take on these challenges with an interdisciplinary program that reaches into the natural sciences like biology and chemistry, policy and social sciences, and writing, ethics, and other humanities.

Environmental Studies investigates the natural world and the interaction of humans and the environment. UC will give you the interdisciplinary training and knowledge to address the complex and changing environmental problems we face.

At UC, you will get a strong foundation in sciences such as biology, chemistry and geology; social sciences such as communication and public policy; all framed within humanities like history, ethics, and scientific writing. And you will take what you learn into the field using the latest research technology and UC's state-of-the-art labs, which give UC distinction as a top research institution as ranked by the Carnegie Foundation.

UC leads the way in environmental studies and you will, too. Environmental problems require creative solutions, imagination and talent. If you have strong critical-thinking skills and a passion for the environment, UC is the place for you. Environmental studies graduates have pursued diverse careers as consultants, lab analysts, ecologists, land managers and park naturalists. We also enjoy a close relationship with the nearby Cincinnati Zoo and Environmental Protection Agency (EPA), where students can enhance their coursework with research experience and/or internships.

During your sophomore year, this major will allow you to opt into a co-op track. The optional co-op track provides an opportunity for you to engage in compensated, career-oriented experiences and reflect upon and integrate those experiences as a part of your undergraduate degree. Engaging in multiple meaningful career-related experiences prior to graduation provides you with an opportunity to develop transferable skills and gain a competitive edge as you prepare for life after graduation. Please see the curriculum map linked below for more information.

Success

The keys to success in environmental studies are both a curiosity about and a passion for the natural world. The complex nature of environmental issues and solutions also requires creativity in problem-solving, flexibility, imagination and a talent for both written and oral communication. Successful students have strong analytical and critical thinking skills and an interest in the sciences that form the foundation of UC's approach to environmental studies.

Career

Graduates of environmental studies may choose to pursue professional careers after the BS or to continue their studies in either graduate schools (MAs or PhDs in fields such as biology, ecology or environmental science/studies) or professional schools (e.g., law school, education, or medicine). Career opportunities include positions in federal, state and local agencies, corporations, nonprofit organizations, consulting firms and academic institutions. Examples of potential careers include:

- Air or water pollution analyst
- Aquatic ecologist
- Resource, land or lake management
- Ecologist or biological researcher
- Environmental agency or nonprofit official
- Environmental consultant
- Environmental risk assessor
- Environmental attorney
- Environmental compliance analyst
- Hydrologist/limnologist
- Park naturalist or ranger
- Environmental mediator/negotiator
- Hazardous waste manager
- Satellite remote sensing
- Geographic information systems specialist
- Conservation biologist
- Natural resource specialist
- Environmental protection specialist
- Wetlands/grasslands restoration specialist

- Zoologist/wildlife biologist
- Waterway restoration specialist
- Policy analyst

Environmental Studies BS (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Co-op Option

Students in this program can participate in the optional co-op track and gain valuable work experience while they are still in school. To fulfill the requirements of this track, students are prepared to participate in a competitive search process to complete at least two co-op experiences. Participation in the co-op track will be noted on students' transcripts.

University of Cincinnati 3 + 3 Law School Admissions

This major welcomes eligible students who would like to earn a bachelor's degree and a UC law degree in just six years, saving a year of tuition and time over the traditional path to becoming a lawyer. Students will receive careful advising to complete their major and A&S core degree requirements in 3 years. More information is available here.

Special Programs

The University of Cincinnati and its Center for Environmental Studies present an ideal physical and intellectual location in which to study, producing broadly trained, interdisciplinary environmental professionals. Cincinnati is an urban area surrounded by rural communities; this urban-to-wild land gradient provides an array of diverse ecosystems for academic study and research. As such, the local environment is challenged by both the municipal and industrial needs of a city, and the broad impact of activities such as farming and land management. UC is home to a diverse faculty and a rich curriculum that actively address environmental issues and problems. Faculty in the center have many interests and are drawn from several departments of the UC College of Arts and Sciences (e.g., biological sciences, geography, geology, economics and communication), the UC College of Engineering and Applied Science and the UC College of Design, Architecture, Art, and Planning, as well as from professional scientists of the U.S. Environmental Protection Agency.

The expertise within the university is supplemented by the presence of three major research divisions of the EPA: the National Center for Environmental Assessment, the National Environmental Research Laboratory and the National Risk Management Research Laboratory. The close proximity (across the street!) of the EPA facility markedly expands the resources available to environmental research and education, and many UC students have held positions and internships at the EPA. Additional opportunities include affiliated student environmental groups such as LEAP (Leaders for Environmental Awareness and Protection), undergraduate research opportunities, and internships with local or national agencies and organizations.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has 2.0 GPA cum and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

For more information, Pathways Advising and Student Success

Transfer students should apply using our transfer student online application

Changing Majors Within UC

Admission to A&S is generally available for any on-campus student who was admissible directly from high school and has 2.0 GPA cum.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 GPA cum

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Environmental Studies

BS

Environmental Studies BS (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
EVST1011	Introduction to Environmental Studies I (C- min)	3
PD1015	Next Bearcat Lives Here	3
BoK: SCE	Foreign Language	3
	A&S First-Year Seminar Course list provided each semester by advising office	3

Quantitative Reasoning (select sequence & complete first course)
(MATH1044 & 1045); (MATH1061 & 1062); (STAT1031 or 1034 & MATH1044 or 1061)

Course	Title/Desc	Credit
MATH1044	Applied Calculus I	3
MATH1061	Calculus I	4
STAT1031	Introduction to Statistics	3
STAT1034	Elementary Statistics I	3

Spring Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
EVST1012	Introduction to Environmental Studies 2 (C- min)	3
BoK: SCE	Foreign Language	3
Free Electives	Minor or Elective	3

Quantitative Reasoning (select second course in sequence)
(If MATH1044 was taken, complete 1045); (If MATH1061 was taken, complete 1062); (If STAT1031 or 1034 was taken, complete MATH1044 or 1061)

Course	Title/Desc	Credit
MATH1045	Applied Calculus II	3
MATH1062	Calculus II	4
MATH1044	Applied Calculus I	3
MATH1061	Calculus I	4

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2170	Professionalism for the Major	2

Students will complete 2 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
EVST2000	Research and Careers (C- min)	2
EVST2084C	Ecology and Evolution (C- min)	4
PD2170	Professionalism for the Major	2
HIST BoK: HP	Historical Perspectives (HIST)	3

Spring Semester Year 2

Course	Title/Desc	Credit
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
ENGL2089	Intermediate Composition	3
EVST2XXX	Any 2000-level Core course from list below	3
BoK: HU	Humanities	3

Optional Co-op Plan

Experience 1
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
EVST2XXX	Any 2000-level Core course from list below	3
EVST3XXX+	Any 3000+ level Advanced course from list below	3
BoK: HP	Historical Perspectives	3
Free Electives	Minor or Elective	3
Free Electives	Minor or Elective	3

Spring Semester Year 3

Course	Title/Desc	Credit
EVST3XXX+	Any 3000+ level Advanced course from list below	3
EVST4XXX	Any 4000-level Interdisciplinary Advanced course from list below	3
BoK: FA,HU	Fine Arts or Humanities	3
Free Electives	Minor or Elective	3

Optional Co-op Plan

Experience 2
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Course	Title/Desc	Credit

Course	Title/Desc	Credit
Free Electives	Minor or Elective	3

Course	Title/Desc	Credit
EVST3014	On the River...Experiencing the Brazilian Amazon	3
EVST3160	Environmental Perspectives and Challenges in China	3
EVST4056C	Ecology and Paleoecology of the Canary Islands	3
EVST5025	Research in Environmental Studies	1 - 4

Fall Semester Year 4

Course	Title/Desc	Credit
EVST3XXX+	Any 3000+ level Advanced course from list below	3
EVST4XXX	Any 4000-level Interdisciplinary Advanced course from list below	3
BoK: SS	Social Sciences	3
BoK: SCE	Society, Culture, & Ethics	3
Free Electives	Minor or Elective	3

Spring Semester Year 4

Course	Title/Desc	Credit
BoK: SS	Social Sciences	3
Free Electives	Minor or Elective	3
Free Electives	Minor or Elective	3
Free Electives	Minor or Elective	3

Capstone (select one)

Course	Title/Desc	Credit
ENGL4093	Environmental Writing	3
EVST5011	Fall Semester Environmental Capstone	3
EVST5012	Spring Semester Environmental Capstone	3

Advanced

Complete 3 courses at the 3000-level or higher.

Course	Title/Desc	Credit
ANTH	EVST / ANTH 3072: Culture, Environment & Globalization, 3076: This Land is Your Land: People and Public Lands; 3124: Origins of Agriculture	3
BIOL	EVST / BIOL: 3011: Environmental Field Techniques, 3014: Brazilion Amazon River (Honors), 3024: Aquatic Biology, 3090: Interdisciplinary Field Experiences, 4023: Conservation Biology, 4069C Plant & Animal Interactions, 4093C: Urban Ecosystem Research, 5142: Toxicology, 5160: Ecosystem Ecology, 5191C: Advanced Ecology	3

Interdisciplinary Advanced

Complete 2 courses for a minimum of 6 credit hours.

Course	Title/Desc	Credit
EVST4011	Advanced Topics in Environmental Studies: Water	3
EVST4012	Advanced Topics in Environmental Studies: Biodiversity	3
EVST4013	Advanced Topics in Environmental Studies: Atmosphere & Climate	3
EVST4014	Advanced Topics in Environmental Studies: Urbanization	3
EVST4015	Advanced Topics in Environmental Studies: Energy	3
EVST4016	Advanced Topics in Environmental Studies: Food	3
EVST4017	Advanced Topics in Environmental Studies: Waste & Recycling	3
EVST4050	Advanced Topics in EVST: Environmental Justice	3

Core

Complete 2 courses for a minimum of 6 credit hours.

Course	Title/Desc	Credit
	EVST/GEOG 2003: Cincinnati Regional Geography	3
	EVST/COMM 2004: Comm Health, Env & Science	3
	EVST/GEOL 2012: The Earth System	3
	EVST/GEOG 2020: Human Impact on Nat Env	3
	EVST/WGS 2021: Economics, Society, and Environment Career: Undergraduate	3
	EVST/HIST 2023: Environmental Activism	3
	EVST/HIST 2024: Global Env History	3
	EVST/WGS 2027: Gender & the Environment	3
	EVST/GEOL 2025: Hydrology & Biogeochemistry	3

Course	Title/Desc	Credit

RALL	EVST/RALL 3028: Employing the Environmental Humanties	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Geography

Environmental-Physical

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Geography focuses on the spatial dimensions of human activities and their interactions with physical landscapes. The interrelationships between humans and their environments uniquely allow geographers to link the social and physical sciences. Geographers analyze information represented on maps-- maps representing data produced in the traditional form (computer generated or drawn by hand) or images generated by satellites (remote sensing).

Students in the environmental BS track will learn to critically analyze and communicate environmental information underlying reports and policy documents, as well as to design and implement scientific experiments addressing environmental questions.

Success

Students are successful when they have an interest in learning about and understanding (1) world events, (2) local events within cities, (3) the urban, global, economic, and political processes underlying world and local events, (4) human impact on the physical environment and (5) the skills necessary to process, display and analyze geographic information.

Career

Geography provides a good educational background for students interested in a variety of careers in business, various government agencies (federal, state, county, city), non-profit agencies or careers as college and university professors. Geography provides strong preparation for professional and graduate schools (law, medicine, business, geography, or other physical or social sciences). Employment for students with strong geographic computer skills (GIS) is particularly strong. Examples of geography related jobs in various areas include:

- Agency of Internal Development
- Audobon Society
- Bureau of Land Management
- Bureau of the Census
- Cartographer
- Geographic software programming
- Housing and urban development
- Market research
- Sierra Club
- Teaching
- Travel industry

Minoring

Students minoring in geography choose a concentration in one of the following: human geography, urban and economic geography, environmental geography, regional geography or geographic information systems (GIS).

Students must pass all required geography courses with a C or better.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-extensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 faculty-student ratio, a nationally recognized Center for Exploratory Studies, and a highly successful First Year Experience Program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Geography majors often engage in study abroad opportunities or international field trips. Some students pursue professional internships arranged on an *ad hoc* basis.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Geography : Environmental-Physical

BS

Geography: Environmental-Physical BS (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C-min)	3
GEOG1001	Introduction to Physical Geography	3
GEOG1011L	Weather, Climate and the Biosphere: Laboratory	1
HIST BoK: HP	Historical Perspectives (HIST)	3
MATH STAT	Quantitative Reasoning sequence from list below (course 1)	3
	A&S First-Year Seminar List provided each semester by advising office	3

Spring Semester Year 1

Course	Title/Desc	Credit
GEOG1004	Introduction to Human Geography	3
GEOG	Regional course from list below	3
PD1170	Career Readiness for the Liberal Arts	1
BoK: FA,HU	Fine Arts or Humanities	3
MATH STAT	Quantitative Reasoning sequence from list below (course 2)	3
BoK: SS	Social Sciences	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Students may declare the co-op track after completing PD2066. They will work with their advisor to choose the appropriate semester and co-op course for each experience.

Course	Title/Desc	Credit
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 2 co-op experiences:

Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
GEOG	Environmental course from list below GEOG2020 recommended	3
GEOG	Environmental course from list below GEOG3031 recommended	3
PD2066	Professionalism and Purpose for Natural Science	3
BoK: SCE	Foreign Language	3

Spring Semester Year 2

Course	Title/Desc	Credit
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
GEOG	Environmental course from list below GEOG3033 recommended	3
GEOG	Environmental course from list below GEOG5154 recommended	3
BoK: SCE	Foreign Language	3

Optional Co-op

Experience 1

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
GEOG5171C	Introduction to Geographic Information Sciences	3
BIOL PHYS	Science Sequence from list below (course 1)	3 - 4

Spring Semester Year 3

Course	Title/Desc	Credit
GEOG5175C	Quantitative Geography and Spatial Statistics	3
GEOG	Spatial Technique course from list below	3
BIOL PHYS	Science Sequence from list below (course 2)	3 - 4
	Foreign Language or Free Elective	3

Optional Co-op Plan

Experience 2

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12

Course	Title/Desc	Credit
	Foreign Language or Free Elective	3
Free Electives	Free Elective	1

Course	Title/Desc	Credit
Free Electives	Free Elective	3

Course	Title/Desc	Credit
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Fall Semester Year 4

Course	Title/Desc	Credit
GEOG	Environmental course from list below GEOG5151 recommended	3
BoK: HP	Historical Perspectives	3
BoK: HU	Humanities	3
BoK: SCE	Society, Culture, & Ethics	3
Free Electives	Free Elective	0 - 1

Spring Semester Year 4

Course	Title/Desc	Credit
GEOG5000	Geography Capstone I	2 - 5
BoK: NS	Natural Sciences	3
BoK: SS	Social Sciences	3
Free Electives	Free Elective	0 - 3
Free Electives	Free Elective	1 - 3

Optional Co-op Subplan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4000	COOP for ARTS & SCIENCES - Part time (Experience 3)	1 - 12
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0
	Any course with an Experiential Learning attribute and advisor approval	0

Regional

Select one

Course	Title/Desc	Credit

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Geography

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Geography BS: Environmental-Physical

Coastal storms, drought, wildfires: with the tremendous financial, social and environmental impact of climate change, there is no better time to study physical and environmental geography. And with its state-of-the-art labs and global research reach, there is no better place to do it than UC's College of Arts and Sciences.

At UC, you will study land, water, soils, climate and vegetation and how they change over time. UC is recognized nationally as a top research university by the Carnegie Foundation. Here, your research matters. UC faculty are experts in climate, land use change, hydrology and soil science. They travel the world to understand the forces that shaped our Earth and the ongoing changes we experience today.

Geography allows you to study both social and physical sciences. In this program, you will learn to analyze environmental data crucial in shaping public policy. You will pursue your own research passions, design your own experiments and use UC's robust laboratories and the latest geographic techniques to analyze your results and get your findings published. UC's geography graduates apply their skills to make a difference in the world. After graduation, you'll have a foundation to pursue your choice of careers in government, nonprofit agencies or education.

Geography BS: Geographical Information Systems (GIS)

The first geographers were explorers. UC's College of Arts and Sciences upholds that tradition today. At UC, you will learn to harness powerful computer technology and your own passion for research to make a difference in the world.

For UC's BS-GIS, Geographic Information Systems in geography, you will use critical analysis, powerful technology tools and hands-on experience to understand the biggest societal challenges we face today. Geography is hugely important today in making sense of big data through maps, spatial analysis and other geospatial technology.

Since the department's founding in 1907, UC geographers have traveled the world, influencing global and local policy.

UC is recognized nationally as a top research university by the Carnegie Foundation. Here, your research matters. At UC, you will use geospatial technology such as satellites and drones to investigate the problems facing society. At UC your research will help people make the most informed decisions about urban planning, environmental science or industry.

After graduation, you'll have a foundation to pursue your choice of careers in government, nonprofit agencies or education. The U.S. Bureau of Labor Statistics predicts geography jobs will grow by 7 percent in the next decade, making now a great time to enter this exciting field.

Success

Students are successful when they have an interest in learning about and understanding (1) world events, (2) local events within cities, (3) the urban, global, economic, and political processes underlying world and local events, (4) human impact on the physical environment and (5) the skills necessary to process, display and analyze geographic information.

Career

Geography provides a good educational background for students interested in a variety of careers in business, various government agencies (federal, state, county, city), non-profit agencies or careers as college and university professors. Geography provides strong preparation for professional and graduate schools (law, medicine, business, geography, or other physical or social sciences). Employment for students with strong geographic computer skills (GIS) is particularly strong. Examples of geography related jobs in various areas include:

- Agency of Internal Development
- Audobon Society
- Bureau of Land Management
- Bureau of the Census
- Cartographer
- Geographic software programming
- Housing and urban development

- Market research
- Sierra Club
- Teaching
- Travel industry

Geography

Environmental-Physical

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Geography focuses on the spatial dimensions of human activities and their interactions with physical landscapes. The interrelationships between humans and their environments uniquely allow geographers to link the social and physical sciences. Geographers analyze information represented on maps-- maps representing data produced in the traditional form (computer generated or drawn by hand) or images generated by satellites (remote sensing).

Students in the environmental BS track will learn to critically analyze and communicate environmental information underlying reports and policy documents, as well as to design and implement scientific experiments addressing environmental questions.

Success

Students are successful when they have an interest in learning about and understanding (1) world events, (2) local events within cities, (3) the urban, global, economic, and political processes underlying world and local events, (4) human impact on the physical environment and (5) the skills necessary to process, display and analyze geographic information.

Career

Geography provides a good educational background for students interested in a variety of careers in business, various government agencies (federal, state, county, city), non-profit agencies or careers as college and university professors. Geography provides strong preparation for professional and graduate schools (law, medicine, business, geography, or other physical or social sciences). Employment for students with strong geographic computer skills (GIS) is particularly strong. Examples of geography related jobs in various areas include:

- Agency of Internal Development
- Audobon Society
- Bureau of Land Management
- Bureau of the Census
- Cartographer
- Geographic software programming
- Housing and urban development
- Market research
- Sierra Club
- Teaching
- Travel industry

Minoring

Students minoring in geography choose a concentration in one of the following: human geography, urban and economic geography, environmental geography, regional geography or geographic information systems (GIS).

Students must pass all required geography courses with a C or better.

Curriculum

Major Map Versions:
Geography: Environmental-Physical BS (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-extensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 faculty-student ratio, a nationally recognized Center for Exploratory Studies, and a highly successful First Year Experience Program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Geography majors often engage in study abroad opportunities or international field trips. Some students pursue professional internships arranged on an *ad hoc* basis.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Geology

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Geology has undergone a revolution in the past decade, becoming an interdisciplinary science that emphasizes the study of major Earth systems - the solid Earth, the Earth's surface, the hydrosphere, atmosphere, and cryosphere (ice!), and the ancient and modern biosphere. Geology majors learn how these systems work and how they are connected. Geology majors integrate knowledge of Earth materials, the processes that have shaped them and the deep chronology of Earth history to understand global change through time.

Success

Geology provides many opportunities for travel and fieldwork. Students who enjoy hiking and camping and can learn by examining samples of minerals, rocks, fossils, soils and other geologic materials will be ready to succeed in geology. Map reading and the ability to visualize in three dimensions help enormously in "seeing" landscapes and the geometry of rock formations. Geology includes quantitative analysis of a variety of data, and ability in mathematics can be indispensable. Geology integrates aspects of chemistry, physics and biology. Students attracted to science in general will succeed.

Career

Geoscientists are in high demand. Projections extending to 2029 show that employment in the geosciences will grow faster than the average occupation. The need for energy, environmental protection, and responsible land and resource management has spurred continued demand for geoscientists well into the future (US Department of Labor, Bureau of Labor Statistics: https://www.bls.gov/ooh/life-physical-and-social-science/geoscientists.htm).

Graduates of our geology program are scientifically informed citizens who can understand the complexities of the Earth's systems and the interdisciplinary challenges of modern society. Our majors pursue careers as geotechnical and environmental consultants, state and federal agency scientists and managers (US Geological Survey, Environmental Protection Agency, Bureau of Reclamation, National Park Service, National Forest Service, Bureau of Land Management, Department of Energy, etc.), climate policy advisers, energy industry geologists, museum staff scientists and curators, educators, and more. Our students are well-prepared for graduate study, which is required for some professional positions in geology. If a graduate of our program would like to pursue a career outside of the geosciences, they have gained technical and complex problem-solving skills that translate well to other job sectors.

Minoring

The Department of Geosciences welcomes students from all other disciplines to pursue a minor in geology. A minor in geology provides the background and skills to consider modern processes in the context of Earth's deep history. Our minor in Environmental Geology is popular among Environmental Studies students, and a wide variety of majors—from Design to Business—have found that a geology minor complements their primary studies. For example, a History major might consider the roles of plate tectonics and climate change in establishing inequities in the availability of food, water, and other resources around the globe, which have influenced trade and warfare throughout human history.

Curriculum

The Department of Geosciences offers coursework that stems from the wide array of expertise of departmental faculty with courses in variety of geoscience subdisciplines. Our undergraduate curriculum provides first- and second-year students with fundamentals of the geosciences in "core" courses, such as geomorphology, paleontology, structural geology, and mineralogy. Third- and fourth-year students explore interdisciplinary and specialized courses, such as glacial geology, groundwater modeling, geomechanics, stable isotope ecology, invertebrate and vertebrate paleontology, and applied geophysics. Our major has a noticeable progression from lower-level to upper-level courses. For example, a student will experience rigorous, quantitative laboratory exercises that emphasize interpretation of topographic data in the context of underlying physical processes in the core, 2000-level course, Geomorphology. The student will carry this knowledge to the upper-level, 4000-level course, Modeling Landscapes where they will program numerical and geostatistical models in Matlab, R, and Python. The structure of the major allows students to build on knowledge and skills as they progress from one academic year to the next as described below:

Capstone Experience: Each student in the College of Arts and Sciences is required to complete a "capstone experience" that involves a) hands-on integration of knowledge; b) analytical thinking and problem-solving; c) written and oral documentation; and d) demonstration of social relevance. The Department of Geosciences expects that its students will demonstrate their mastery of skills gained while in the program by participating in the co-op program, attending field camp, or completing a faculty advised research project. The student will be advised as to which experience fits best with their future career interests.

A student is not expected to progress through the major alone. Course and degree planning are readily available through advising appointments with the Academic Director. The Undergraduate Director and departmental faculty are excellent resources for course recommendations and research, graduate school, and career advice. The members of the Department of Geology pride ourselves on having an "open door" policy where we invite students to feel welcome to chat with geology faculty and staff on a regular basis.

Geology GS (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the University of Cincinnati's College of Arts & Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. The University of Cincinnati's urban, Tristate location offers exciting opportunities for global education, research, and service learning, while its student-centered focus includes an 11:1 student-faculty ratio and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Co-Op Program

Geology majors have the opportunity to particiate in a co-op program. Contact the Program Director, Krista Smilek (smilekka@uc.edu) for information.

Theis Environmental Monitoring and Measurement Site (TEMMS)

The Department of Geology maintains and operates the Theis Environmental Monitoring and Modeling Site (TEMMS), a unique facility in the Great Miami River Valley that collects a wide range of real-time environmental data in the river (stage), above the ground (vegetation activity and weather information), and in groundwater (geophysical imaging and geochemical sensing). Pairs of observation wells continuously monitor basic water quality parameters. TEMMS is a facility designed to help prepare students for hydrogeology-related STEM careers. TEMMS data are integrated into coursework and are available for student use in research projects related to hydrology, water quality, and environmental science.

Cincinnati Museum Center

The Cincinnati Museum Center is an excellent resource for the department and its students. Student research and training are supported by the CMC's world-class fossil collections spanning local, regional, and exotic flora and fauna from around the globe. Museum staff paleontologists are adjuncts of the department and offer courses and internships in museum curation and display, as well as field experiences in paleontology. Students translate these experiences to museum careers or as staff geologists and naturalists at state and federal surveys.

Undergraduate Research

The Department of Geology strongly encourages undergraduate students to develop their skills outside of the classroom through field and/or laboratory research experiences. Undergraduates may conduct research under the mentorship of one or more geology faculty and funds are often available to support research endeavors. Research projects are commonly used to fulfill the capstone requirement or as a senior thesis and can be designed around various field, laboratory, or quantitative approaches.

Admission Requirements

The Department of Geosciences follows the admissions requirements set by the University of Cincinnati and the College of Arts & Sciences. For admissions information for high school, international, and transfer students, visit https://admissions.uc.edu/apply.html

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While mid-year admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Geology

BS

Geology GS (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
GEOL1001C	First Year Seminar I: Geology and Paleontology (C- min)	3
Free Electives	Free Elective	3
BoK: HP	Historical Perspectives	3

Spring Semester Year 1

Course	Title/Desc	Credit
CHEM1041	General Chemistry II (C- min)	4
CHEM1041L	General Chemistry Laboratory II (C- min)	1
ENGL1001	English Composition	3
GEOL1002C	First Year Seminar II: Earth Surface Processes and Environmental Issues (C- min)	3
GEOL1003L	Physical Geology Laboratory (C- min)	1
PD1170	Career Readiness for the Liberal Arts	1
BoK: HU	Humanities	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following courses in Fall Semester of Year 2:

Students may declare the co-op track after completing the two courses below. They will work with their advisor to choose the appropriate semester and co-op course for each experience.

Course	Title/Desc	Credit
GEOL2100	Careers in the Geosciences	1
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 1 full-time Co-op or 2 part-time Co-ops and a sprint:

Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
GEOL2005C	Geomorphology and Surface Hazards (C- min)	3
GEOL2008C	Mineralogy (C- min)	3
GEOL2100	Careers in the Geosciences	1
Free Electives	Free Elective	0 - 2
BoK: SCE	Foreign Language	3 - 5

Quantitative Reasoning (select one)

Course	Title/Desc	Credit
MATH1044	Applied Calculus I (C- min)	3
MATH1061	Calculus I (C- min)	4

Spring Semester Year 2

Course	Title/Desc	Credit
GEOL2004C	Sedimentary Geology and Earth History (C- min)	3
GEOL2012	The Earth System (C- min)	3
Free Electives	Free Elective	0 - 3
BoK: SCE	Foreign Language	3 - 5

Quantitative Reasoning (select one)

Course	Title/Desc	Credit
MATH1045	Applied Calculus II (C- min)	3
MATH1062	Calculus II (C- min)	4
STAT1034	Elementary Statistics I (C- min)	3

Optional Co-op Plan

Experience 1 (Option 1): Full-time Co-op

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Experience 2 (option 2): 2 Part-time Coops and 1 sprint

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
	COOP2000 and 3000 and any course with an EL Attribute and advisor approval This option consists of 2 part-time Co-ops and 1 sprint	0

Fall Semester Year 3

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3

Select two GEOL3000-level courses

Course	Title/Desc	Credit
GEOL3000C	Paleontology & Geobiology (C- min)	3
GEOL3002	Geochemistry (C- min)	3
GEOL3005C	Fundamentals of Groundwater (C- min)	3

Select one lecture and the corresponding lab

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life (C- min)	3
BIOL1081L	Biology I Laboratory (C- min)	1
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based) (C- min)	1
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based) (C- min)	1

Spring Semester Year 3

Course	Title/Desc	Credit
HIST BoK: HP	Historical Perspectives (HIST)	3

Select two GEOL3000-level courses; GEOL3004C highly recommended as one of the courses

Course	Title/Desc	Credit
GEOL3003C	Petrology (C- min)	3
GEOL3004C	Structural Geology (C- min)	3
GEOL3006	Climate Change Over Time and Space (C- min)	3

Select one lecture and the corresponding lab

Course	Title/Desc	Credit
BIOL1082	Biology II: Evolution, Physiology, and Ecology (C- min)	3
BIOL1082L	Biology II Laboratory (C- min)	1
PHYS1052	General Physics II (Algebra-based) (C- min)	4
PHYS1052L	General Physics Lab II (Algebra-based) (C- min)	1
PHYS2002	College Physics II (Calculus-based) (C- min)	4
PHYS2002L	College Physics Lab II (Calculus-based) (C- min)	1

Summer Semester Year 3

Course	Title/Desc	Credit
GEOL	Capstone: Students are required to participate in a 4-6 credit hour field camp, or approved alternative (C- min)	4 - 6

Fall Semester Year 4

Course	Title/Desc	Credit
GEOL4XXX	Select two GEOL4000-level courses from list to the right Select Two from list (C- min)	6
BoK: SS	Social Sciences	3
BoK: SCE	Society, Culture, & Ethics	3
Free Electives	Free Elective	3

Spring Semester Year 4

Course	Title/Desc	Credit
GEOL4XXX	Select two GEOL4000-level courses from list to the right (C- min)	6
BoK: FA,HU	Fine Arts or Humanities	3
BoK: SS	Social Sciences	3
Free Electives	Free Elective	0 - 2

Geology 4000-level Courses

See Academic Director for Course Selection

Course	Title/Desc	Credit
GEOL4XXX	GEOL: 4001, 4002, 4003, 4004, 4007, 4010C, 4012C, 4013, 4018C, 4019, 4023, 4024, 4025C, 4028, 4029, 4032, 4033, 4036, 4037, 4038, 4040, 4042, 4044, 4048C, 4049C, 4050C, 4051C, 4053C, 4054C, 4056C (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Mathematics

Mathematics

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Mathematical sciences include the disciplines of pure mathematics, applied mathematics and statistics. Mathematicians and statisticians use representations of abstract ideas and relationships to solve problems, in order to arrive at a general understanding of how these representations work, as well as how they could be applied. Mathematical sciences majors learn complex analytical and problem-solving skills while exploring a range of mathematical topics and problems.

Success

The field of mathematical sciences is quite diverse, so success factors tend to vary. Certainly, good reasoning skills and logical thinking, together with the ability to communicate abstract concepts are important. Mathematicians enjoy challenging problems and find it difficult to stop working on a problem until they arrive at a satisfactory solution.

Career

Graduates with a BS in mathematical sciences are prepared for a variety of careers.

State and Federal Agencies

- statistician
- forecaster
- technical manager
- member of research and design team
- numerical analyst
- cryptographer
- signal processing analyst

Business and Industry

- financial analyst
- actuarial scientist
- marketing consultant
- systems analyst
- biomathematical researcher

Education

- secondary mathematics teacher
- university instructor or researcher

Minoring

The Department of Mathematical Sciences offers an undergraduate minor in mathematics for students majoring in another area. It is offered to students in any college at the University of Cincinnati. Advanced placement and calculus transfer credit can be counted toward the minor.

Total credit hours required: 24

Required Courses:

- MATH 1061, Calculus I (4 credits)
- MATH 1062, Calculus II (4 credits)
- MATH 2063, Multivariable Calculus (4 credits)
- MATH 2076, Linear Algebra (3 credits)

Students must complete an additional 9 credits (3 courses) of selected upper division mathematics and statistics courses, chosen in consultation with a departmental advisor.

Click here to declare the minor online

Mathematics (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Majors are strongly urged to learn a scientific programming language such as C++ or Java. Students who anticipate doing graduate work in mathematics should satisfy the A&S foreign language requirement with French, German or Russian.

Departmental Honors

Departmental honors in mathematics requires a 3.5 GPA in mathematics courses and the completion of four select advanced courses approved by the Honors Committee of the Department of Mathematical Sciences.

Departmental High Honors

Department high honors requires a 3.75 GPA in mathematics courses and the completion of six select advanced courses approved by the Honors Committee. The final decision concerning honors rests with the Honors Committee of the Department of Mathematical Sciences.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Mathematics : Statistics/Actuarial Sciences

BS

Mathematics: Statistics/Actuarial Sciences BS (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4
BoK: SCE	Foreign Language	3
	A&S First-Year Seminar List provided each semester by advising office	3
Free Electives	Elective or MATH2010	2

Spring Semester Year 1

Course	Title/Desc	Credit
MATH1062	Calculus II (C- min)	4
PD1170	Career Readiness for the Liberal Arts	1
BoK: NS	Natural Sciences	3
BoK: SS	Social Sciences	3
BoK: SCE	Foreign Language	3
Free Electives	Free Elective	1

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
MATH2063	Multivariable Calculus (C- min)	4
PD2066	Professionalism and Purpose for Natural Science	3
BoK: SS	Social Sciences	3
	Foreign Language or Free Elective	3

Select one

Course	Title/Desc	Credit
MATH2073	Ordinary Differential Equations (C- min)	3
MATH2074	Dynamical Systems (C- min)	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
MATH2076	Linear Algebra (C- min)	3
STAT2037	Probability and Statistics I (C- min)	3
BoK: FA,HU	Fine Arts or Humanities	3
	Foreign Language or Free Elective	3

Optional Co-op Plan

Experience 1
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
STAT4121	Mathematical Statistics I (C- min)	3
STAT4131	Regression Analysis and Statistical Learning (C- min)	3
	Scientific Discipline course from list below	3
HIST BoK: HP	Historical Perspectives (HIST)	3
BoK: SCE	Society, Culture, & Ethics	3

Spring Semester Year 3

Course	Title/Desc	Credit
MATH3001	Introduction to Abstract Math (C- min)	3
STAT3038	Probability and Statistics II (C- min)	3
	Scientific Discipline course from list below	3
BoK: HP	Historical Perspectives	3
	Experiential Learning/Elective	3

Optional Co-op Plan

Experience 2
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Course	Title/Desc	Credit

Fall Semester Year 4

Course	Title/Desc	Credit
MATH	Option SA or MT course from lists below (C- min)	3
MATH	Option SA course from list below (C- min)	3
MATH	Option SA course from list below (C- min)	3
BoK: NS	Natural Sciences	3
Free Electives	Elective or MATH4010	3

Spring Semester Year 4

Course	Title/Desc	Credit
PD4070	Professionalism & The Common Good	1
STAT5132	Design and Analysis of Experiments (C- min)	3
BoK: HU	Humanities	3
Free Electives	Free Elective	1
Free Electives	Free Elective	3

Capstone (select one)

Course	Title/Desc	Credit
MATH5001	Capstone Seminar in Mathematics (C- min)	3
MATH5002	Capstone Project in Mathematics (C- min)	3

Optional Co-op Plan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4000	COOP for ARTS & SCIENCES - Part time (Experience 3)	1 - 12
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0
	Any course with an EL Attribute and advisor approval	0

STAT5144	Nonparametric Statistics (C- min)	3
STAT5145	Statistical Computing (C- min)	3
STAT5171	Statistics and Machine Learning (C- min)	3

Option MT

Course	Title/Desc	Credit
MATH3002	Introduction to Analysis (C- min)	3
MATH3005	Introduction to Geometry (C- min)	3
MATH3004	Introduction to Abstract Algebra (C- min)	3
MATH3006	Mathematical Modeling (C- min)	3
MATH4XXX	MATH4XXX Any 4000-level MATH course (C- min)	3 - 4
MATH5XXX	MATH5XXX Any 5000-level MATH course (C- min)	3 - 4

Course	Title/Desc	Credit
PHYS2002	College Physics II (Calculus-based) (C-min)	4

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Neuroscience

Brain, Mind, Behavior

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Neuroscience, the study of the brain and nervous system, is one of the most exciting and rapidly growing areas of science. Exploring knowledge of the brain and behavior offers a window into understanding human nature and our society. It is explicitly interdisciplinary, spanning a wide range of research topics and methods aimed at understanding basic nervous system function and causes of brain and nervous system diseases.

Success

The successful neuroscience major has both a strong background in science and a strong interest in pursuing scientific research as a career. Those planning a future in academic education, medicine or law benefit from the development of foundational research skills, including statistical analysis of experimental results, experimental design and methodology, and basic laboratory techniques.

Career

Graduates with a BS in neuroscience from the UC College of Arts and Sciences (A&S) are prepared for a wide range of career options and unlimited opportunities for graduate study. They include:

- Medicine
- Academic research
- Pharmaceutical or biotech research
- Clinical psychology
- Psychology research
- Academic science education
- Developing therapeutics or prosthetics for the brain and nervous system
- Scientific writing
- Law, economics or business with a neuroscience perspective

Major Map Versions:
Neuroscience: Brain, Mind, Behavior (Optional Co-op Subplan)

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences (A&S) enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Undergraduate Research

Neuroscience is a major area of research strength and academic excellence at the University of Cincinnati. Many of our neuroscience faculty are world-recognized bench researchers in cognitive/computational neuroscience, developmental neurobiology, functional brain imaging, motivation and reward, neuroendocrinology, neuroplasticity and regeneration, sensory physiology, and sensation and perception. The neuroscience community at UC also includes leading clinical researchers working on neurological and psychiatric disorders such as stroke, Parkinson's disease, epilepsy, substance abuse, bipolar disorder and obesity. There is research strength, as well, in animal behavior and its physiological mechanisms.

Undergraduate neuroscience research opportunities will be enhanced by the contributions of faculty on two campuses: the medical campus and the west (main) campus. Students will be able to choose from more applied clinically-oriented research to more basic scientific research. This combination provides opportunities not available to neuroscience majors at smaller colleges and universities, and often not capitalized on at larger research universities.

Interdisciplinary Capstone Project

The interdisciplinary core capstone project required of each student is unique in that it requires a collaboration of at least two of the program curricular tracks. The capstone involves a research project under the mentorship of two of the program's faculty whose

research and teaching interests lie in different program tracks, or acceptable faculty and labs in other colleges or departments (e.g., the neuroscience graduate program, biomedical engineering). The program director and the laboratory and research experience coordinator will assist each student in finding appropriate mentors for his or her capstone project. The goal of the capstone experience for each student is a poster suitable for presentation at a scientific conference. Selected capstone posters will be posted around the neuroscience (or a related departmental) office.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Neuroscience

Brain, Mind, Behavior

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Neuroscience, the study of the brain and nervous system, is one of the most exciting and rapidly growing areas of science. Exploring knowledge of the brain and behavior offers a window into understanding human nature and our society. It is explicitly interdisciplinary, spanning a wide range of research topics and methods aimed at understanding basic nervous system function and causes of brain and nervous system diseases.

Success

The successful neuroscience major has both a strong background in science and a strong interest in pursuing scientific research as a career. Those planning a future in academic education, medicine or law benefit from the development of foundational research skills, including statistical analysis of experimental results, experimental design and methodology, and basic laboratory techniques.

Career

Graduates with a BS in neuroscience from the UC College of Arts and Sciences (A&S) are prepared for a wide range of career options and unlimited opportunities for graduate study. They include:

- Medicine
- Academic research
- Pharmaceutical or biotech research
- Clinical psychology
- Psychology research
- Academic science education
- Developing therapeutics or prosthetics for the brain and nervous system
- Scientific writing
- Law, economics or business with a neuroscience perspective

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences (A&S) enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Undergraduate Research

Neuroscience is a major area of research strength and academic excellence at the University of Cincinnati. Many of our neuroscience faculty are world-recognized bench researchers in cognitive/computational neuroscience, developmental neurobiology, functional brain imaging, motivation and reward, neuroendocrinology, neuroplasticity and regeneration, sensory physiology, and sensation and perception. The neuroscience community at UC also includes leading clinical researchers working on neurological and psychiatric disorders such as stroke, Parkinson's disease, epilepsy, substance abuse, bipolar disorder and obesity. There is research strength, as well, in animal behavior and its physiological mechanisms.

Undergraduate neuroscience research opportunities will be enhanced by the contributions of faculty on two campuses: the medical campus and the west (main) campus. Students will be able to choose from more applied clinically-oriented research to more basic scientific research. This combination provides opportunities not available to neuroscience majors at smaller colleges and universities, and often not capitalized on at larger research universities.

Interdisciplinary Capstone Project

The interdisciplinary core capstone project required of each student is unique in that it requires a collaboration of at least two of the program curricular tracks. The capstone involves a research project under the mentorship of two of the program's faculty whose

research and teaching interests lie in different program tracks, or acceptable faculty and labs in other colleges or departments (e.g., the neuroscience graduate program, biomedical engineering). The program director and the laboratory and research experience coordinator will assist each student in finding appropriate mentors for his or her capstone project. The goal of the capstone experience for each student is a poster suitable for presentation at a scientific conference. Selected capstone posters will be posted around the neuroscience (or a related departmental) office.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Students who were not admissible directly from high school must have:

- at least a 2.0 GPA in all college-level courses (both at UC and at other institutions)
- successfully completed one semester of English composition or its equivalent
- successfully completed one semester of math with a grade of C- or higher that minimally meets on of the following:
  - Mathematical Literacy (MATH 0029)
  - Intermediate Algebra (MATH 0034)
  - Algebra for College (MATH 0039)
  - Students may also take the UC Math Placement exam, but must score an MPT of 420 or higher

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the college.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). Neuroscience : Brain, Mind, Behavior

BS

Neuroscience: Brain, Mind, Behavior (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life	3
BIOL1081L	Biology I Laboratory	1
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
MATH1044	Applied Calculus I (C-min)	3
NS1055	The Life of the Brain	3

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL1082	Biology II: Evolution, Physiology, and Ecology	3
BIOL1082L	Biology II Laboratory	1
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
ENGL1001	English Composition (C-min)	3
PD1170	Career Readiness for the Liberal Arts	1

Philosophy
Select one course

Course	Title/Desc	Credit
PHIL1000	Introduction to Philosophy	3
PHIL1002	Mind and Will	3
PHIL1006	Introduction to Cognitive Studies	3
PHIL1032	How Science Works	3
PHIL1035	Love, Anger, Fear, and Other Emotions: Philosophical Perspective	3

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 2 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
BIOL2083	Genetics	3
PD2066	Professionalism and Purpose for Natural Science	3
NS2001	Introduction to Neuroscience I	3
PHIL PSYC	BMB Track Select one from list below	3
BoK: SCE	Foreign Language	3

Spring Semester Year 2

Course	Title/Desc	Credit

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences (A&S) enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

Undergraduate Research

Neuroscience is a major area of research strength and academic excellence at the University of Cincinnati. Many of our neuroscience faculty are world-recognized bench researchers in cognitive/computational neuroscience, developmental neurobiology, functional brain imaging, motivation and reward, neuroendocrinology, neuroplasticity and regeneration, sensory physiology, and sensation and perception. The neuroscience community at UC also includes leading clinical researchers working on neurological and psychiatric disorders such as stroke, Parkinson's disease, epilepsy, substance abuse, bipolar disorder and obesity. There is research strength, as well, in animal behavior and its physiological mechanisms.

Undergraduate neuroscience research opportunities will be enhanced by the contributions of faculty on two campuses: the medical campus and the west (main) campus. Students will be able to choose from more applied clinically-oriented research to more basic scientific research. This combination provides opportunities not available to neuroscience majors at smaller colleges and universities, and often not capitalized on at larger research universities.

Interdisciplinary Capstone Project

The interdisciplinary core capstone project required of each student is unique in that it requires a collaboration of at least two of the program curricular tracks. The capstone involves a research project under the mentorship of two of the program's faculty whose

research and teaching interests lie in different program tracks, or acceptable faculty and labs in other colleges or departments (e.g., the neuroscience graduate program, biomedical engineering). The program director and the laboratory and research experience coordinator will assist each student in finding appropriate mentors for his or her capstone project. The goal of the capstone experience for each student is a poster suitable for presentation at a scientific conference. Selected capstone posters will be posted around the neuroscience (or a related departmental) office.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Neuroscience : Neuropsychology

BS

Neuroscience: Neuropsychology (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life	3
BIOL1081L	Biology I Laboratory	1
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
MATH1044	Applied Calculus I (C-min)	3
NS1055	The Life of the Brain	3

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL1082	Biology II: Evolution, Physiology, and Ecology	3
BIOL1082L	Biology II Laboratory	1
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
ENGL1001	English Composition (C-min)	3
PD1170	Career Readiness for the Liberal Arts	1
PSYC1001	Introduction to Psychology	3

Optional Co-op Plan

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 2 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
BIOL2083	Genetics	3
NS2001	Introduction to Neuroscience I	3
PD2066	Professionalism and Purpose for Natural Science	3
PSYC2001C	Research Methods and Statistics in Psychology I	4
BoK: SCE	Foreign Language	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
NS2002	Fundamentals of Neuroscience II	3
PSYC2002C	Research Methods and Statistics in Psychology II	4
HIST BoK: HP	Historical Perspectives (HIST)	3
BoK: SCE	Foriegn Language	3

Optional Co-op Plan

Experience 1
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
	Neuropsychology Track Select one from list below	3
	Neuropsychology Track Select one from list below	3
BoK: HP	Historical Perspectives	3
BoK: HU	Humanities	3
	Foreign Language or Elective	3

Spring Semester Year 3

Course	Title/Desc	Credit
NS4010	Neurophysiology Laboratory	3
	Neuropsychology Track Select one from list below	3
BoK: FA,HU	Fine Arts or Humanities	3
BoK: SS	Social Sciences	3
	Foreign Language or Elective	3

Optional Co-op Plan

Experience 2
Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0
	Any course with an Experiential Learning attribute and advisor approval	0

Fall Semester Year 4

Course	Title/Desc	Credit

Spring Semester Year 4

Course	Title/Desc	Credit

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Physics

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Physics is the study of the physical laws of nature. Physicists apply these laws to draw conclusions about a wide range of phenomena, from the structures of subatomic particles to planetary motion. Physics majors develop strong analytical skills, learning to produce and examine critically exact quantitative evidence for theories about the workings of the universe.

Success

The successful physics student must possess strong skills in mathematics, analytical thinking and writing, and problem solving. The student should be imaginative and welcome challenges. For greatest success, the student should function well both individually and as part of a group.

Career

The study of physics provides excellent training in quantitative and analytic approaches to solving problems, as well as experience with computers and laboratory equipment. Physics graduates are highly sought for graduate and professional programs in engineering, computer science, law, economics, medicine, neuroscience, business and teaching, in addition to physics. Physics graduates are also highly valued in the workplace, particularly in the high-tech industries, but also in other areas where analytic abilities and out-of-the-box thinking are assets.

The emphasis on modeling and problem-solving skills as an intrinsic part of a physics education means that graduates of this major can and do pursue many different careers. In addition to continuing on to graduate schools in physics and other professional schools like law, medicine and business, opportunities of our recent graduates include:

- Science teacher
- Banking and finance
- Military officer
- Accelerator operator
- Research technician
- Computer engineer
- Software development
- Aerospace industry
- Actuary
- Medical physics

Graduate study in physics includes additional course work and an original research project, culminating in the PhD thesis or dissertation. PhDs in physics are qualified to teach at colleges and universities, as well as to lead independent research at universities, government facilities or in an industrial setting.

Minoring

The undergraduate minor in physics is designed to provide students with a sound introduction to both classical and modern physics. It is offered to students in any college at the University of Cincinnati; however, the required physics courses must be taken in UC College of Arts and Sciences (A&S).

Course Requirements (32 total credit hours):

Required Courses (22 hours):

PHYS 2005-2006, 2005L-2006L, College Physics I & II with Labs (10 hours)

MATH 1061-1062, Calculus I & II (8 hours)

MATH 2063, Multivariable Calculus (4 hours)

Core Elective (choose one of the following three courses) (3-5 hours):

PHYS 2076, Semiconductor Physics for Engineers (3 hours)

PHYS 3001C, Intermediate Physics I, (5 hours)

PHYS 3002C, Intermediate Physics II, (5 hours)

Physics Electives (5-8 hours):

Take additional PHYS courses beyond the required and core courses, to reach a total of at least 20 credit hours of physics. At least 6 credits from the Core or Physics Electives must come from 3000 level or higher physics courses.

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top 25 public research universities. UC's urban, Tristate location offers exciting opportunities for global education, research and service learning, while its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized Center for Exploratory Studies and a highly successful First Year Experience program that teaches critical skills for first-year students and provides connections with important campus resources.

Special Programs

The physics faculty members engage in forefront research in the major areas in physics. Opportunities are available for students to be involved in such research, often leading to publications. Our relatively small class size allows for significant personal attention to each student. Our curriculum is designed to be flexible to allow for different career goals. Our majors have access to excellent computer facilities, and computation is incorporated intrinsically into our courses. The department recently began offering an optional co-op experience in the summer before the junior or senior year for qualifying students. UC is one of only a few physics departments in the country to offer such an opportunity.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.

- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Physics Astrophysics

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Astrophysics is the study of the structure and evolution of the universe, from the big bang to the evolution of stars and the creation of galaxies.

If you have a passion for astronomy, UC's College of Arts and Sciences is the place for you. Planets have been named after UC professors, while UC graduates have discovered new ones. Cincinnati is the birthplace of American astronomy and its observatory is home to one of the oldest functioning telescopes.

The curriculum is similar to the physics BA and physics BS programs and includes mechanics, electricity and magnetism, thermal physics and quantum physics. In addition, you will take courses in astronomy and astrophysics and conduct research.

Success

The successful student in astrophysics will need to have strong math and writing skills, imagination, the ability to engage in analytic thinking and problem-solving, as well as a keen interest in understanding how the universe works.

Career

The study of astrophysics provides excellent training in quantitative and analytical approaches to solving problems. Astrophysics graduates are highly sought for graduate and professional programs in engineering, computer science, law, economics, medicine, business and teaching. The emphasis on modeling and problem-solving, along with the rigorous mathematical background needed for the major, means graduates of this major pursue many different careers.

Graduates have found careers as:

- Physician
- Professor/teacher
- Planetarium operator
- Researcher
- Telescope operator
- Museum curator

Additional careers are possible in space industry, science writing, patent industry, programming, military and biomedical industry.

Minoring

The undergraduate minor in physics (concentration in astrophysics) is designed to provide students with a sound introduction to astronomy and astrophysics. It is offered to students in any college at the University of Cincinnati.

Course Requirements (32 total credit hours):

Required Courses (22 hours):

- PHYS 2005-2006, 2005L-2006L, College Physics I & II with Labs, (10 hours)
- MATH 1061-1062, Calculus I & II, (8 hours)
- MATH 2063, Multivariable Calculus, (4 hours)

Astrophysics Core (6 hours):

- PHYS 3041, Advanced Topics in Astronomy, (3 hours)
- PHYS 4025, Introduction to Astrophysics I, (3 hours)

Astrophysics Electives (4 hours):

Additional PHYS course(s) totaling 4 or more credits. PHYS 3041 may be used in the core and repeated as an elective.

Click here to declare the minor online

Special Programs

The UC faculty consists of researchers in observational astrophysics, theoretical particle astrophysics and general relativity, and experimental particle physics closely related to astrophysics. The observational astrophysics group has regular access to world-class telescope facilities, such as 3-to-8 meter telescopes in Hawaii and Chile, the Hubble space telescope and the Spitzer space telescope. Undergraduate students are encouraged to work with faculty on research projects with the potential to lead to published papers.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Psychology

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Psychology is the scientific study of the behavior of animals and humans. Psychology majors develop strong research and analytical skills while exploring all phases of human life. They study behavior of individuals and groups, both the well-adjusted and the dysfunctional. Students of psychology are interested in conducting research to discover patterns of human behavior, as well as in applying psychological principles and techniques to solving social and individual problems.

Success

Psychology is a very broad discipline involving research and application in every aspect of living beings (human and animal). Skills that make for excellence in some aspect of psychology include: developing and carrying out empirical research (both applied and theoretical), interpreting results, communicating to others, listening, engaging, involving, showing an interest in others, observing and many more.

Career

A BS in psychology can be a pre-professional degree, leading to graduate study in psychology or other fields. The master's degree is generally the minimum professional degree for licensing or certification of psychologists who work in education, business, hospitals, clinics, prisons and private practice.

The strong critical thinking skills, along with the abilities to research, write and understand human behavior, developed in the bachelor of science degree are highly valued in a wide range of positions in industry, business, law and social services.

Career possibilities (some of which will require completion of graduate programs) include:

- Human resources
- Program evaluation
- Marketing research
- Data analysis
- Casework
- Clinical, research or school psychology
- College or university professor
- Mental health work
- Research psychology

Minoring

The minor in psychology requires a total of 18 credit hours. Students must complete the sequence of Introduction to Psychology, PSYC1001, for 3 credits. In addition, students must complete 15 credits of coursework in psychology at the 2000 level or above.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Sinclair Community College

Changing Majors Within UC

Admission to A&S is generally available for University of Cincinnati students enrolled in other colleges if they were admissible directly from high school, have a cumulative 2.0 GPA and a 2.0 in their most recent UC college.

Graduation Requirements

To graduate from the UC College of Arts and Sciences, students must:

- Earn at least 120 credits. *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least 120.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the residency requirement by earning at least 30 credits after matriculating into the university.
- Complete all of the requirements of at least one major (see major requirements above).
- Complete the College Core Requirements.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

While midyear admission is possible, fall semester is generally the best time to enter the college, since many course sequences begin in that semester. Applicants to the UC College of Arts and Sciences who are enrolled or who were previously enrolled as degree-seeking students in A&S or in other UC colleges should apply for admission directly to A&S (in French West, 2nd Floor). All other applicants who wish to earn an undergraduate degree from A&S should apply through the Office of Admissions (3rd Floor, University Pavilion).

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Psychology

BS

Psychology BS (Optional Co-op Subplan)

Duration: 4 Years

Minimum Credits: 120 Credits

Fall Semester Year 1

Minimum Grade Requirement for Psychology Courses

Course	Title/Desc	Credit
MATH1008	Foundations of Quantitative Reasoning	3
PD1015	Next Bearcat Lives Here	3
PSYC1001	Introduction to Psychology (C- min)	3
PSYC1001L	Introduction to Psychology Laboratory (C- min)	1
BoK: FA,HU	Fine Arts or Humanities	3
	A&S First-Year Seminar List provided each year by advising office	3

Spring Semester Year 1

All psychology (PSYC) courses taken to satisfy major requirements must be passed with a C- or higher

Course	Title/Desc	Credit
ENGL1001	English Composition	3
PSYC1010	Introduction to the Psychology Major (C- min)	1
PSYC2001C	Research Methods and Statistics in Psychology I (C- min)	4
PSYC2XXX	Any Core course from list below (C- min)	3
PSYC2XXX	Any Core course from list below (C- min)	3

Optional Co-op Plan

Students who choose to participate in the optional co-op track must satisfy the following requirements.

Professionalism and Careers

Co-op students must first complete the following course.

Course	Title/Desc	Credit
PD2077	Professionalism and Pathways for Psychology Majors	2

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
PD2077	Professionalism and Pathways for Psychology Majors	2
PSYC2XXX	Any Core course from list below (C- min)	3
PSYC2XXX	Any Core course from list below (C- min)	3
BoK: SCE	Foreign Language	3

Select one

Course	Title/Desc	Credit
PSYC2002C	Research Methods and Statistics in Psychology II (C- min)	4
ORGL2004C	Research Methods & Stats II for I/O Psychology (C- min)	4

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
PSYC2XXX	Any Core course from list below (C- min)	3
	Any General Science/Social Science course from list below, or course toward certificate/minor/double major (C- min)	3
BoK: NS	Natural Sciences within A&S	3
BoK: SCE	Foreign Language	3

Optional Co-op Plan

Experience 1

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
ENGL3062	Scientific Writing in the Behavioral Sciences (C- min)	3
PSYC2XXX+	Any PSYC2000+ level course (C- min)	3

Spring Semester Year 3

Course	Title/Desc	Credit
PSYC3XXX+	Any PSYC3000+ level course (C- min)	3
PSYC	Any Skills course from list below (C- min)	3

Optional Co-op Plan

Experience 2

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit

Course	Title/Desc	Credit
PSYC	Any Skills course from list below (C- min)	3
	Any General Science/Social Science course from list below, or course toward certificate/minor/double major (C- min)	3
	Foreign Language or Free Elective	3

Course	Title/Desc	Credit
	Any General Science/Social Science course from list below, or course toward certificate/minor/double major (C- min)	3
BoK: NS	Natural Sciences	3
	Foreign Language or Free Elective	3

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0

Fall Semester Year 4

Course	Title/Desc	Credit
PSYC3XXX+	Any PSYC3000+ level course (C- min)	3
	Any General Science/Social Science course from list below, or course toward certificate/minor/double major (C- min)	3
HIST BoK: HP	Historical Perspectives (HIST)	3
BoK: HU	Humanities	3
BoK: SCE	Society, Culture, & Ethics	3

Spring Semester Year 4

Course	Title/Desc	Credit
PSYC4050	Psychology Proficiency	0
PSYC5XXX+	Any Research Capstone course from list below (C- min)	3
	Any General Science/Social Science course from list below, or course toward certificate/minor/double major	3
BoK: HP	Historical Perspectives	3
BoK: SS	Social Sciences	3
Free Electives	Free Elective	3

Optional Co-op Plan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4000	COOP for ARTS & SCIENCES - Part time (Experience 3)	1 - 12
INT3001	Academic Internships for Multidisciplines - Semester 1	1 - 12
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0
	Any Experiential Learning Course (noted by S,P,R,I,N,T Attribute)	3

Core

Select five courses. BS students encouraged to take PSYC2020 and PSYC2030 to fulfill pre-requisites for BS Skills courses.

Course	Title/Desc	Credit
PSYC2015	Social Psychology	3
PSYC2020	Introduction to Cognitive Psychology	3
PSYC2030	Sensation and Perception	3
PSYC2040	Developmental Psychology	3
PSYC2051	Fundamentals of Psychopathology	3
PSYC2053	Personality	3
PSYC2070	Psychobiology	3

Skills

Course	Title/Desc	Credit
PSYC3010	Programming for behavioral scientists	3
PSYC3023	Psychological Measurement & Testing	3
PSYC3040	Choice and Decision Making	3
PSYC3043	Human Performance	3
PSYC3048	History and Systems of Psychology	3
PSYC3057	Community Involvement	3
PSYC4038	Senior Thesis	1 - 6

Research Capstones

Select one course

Course	Title/Desc	Credit
PSYC5050	Research Capstone: Child Health and Mental Health	3
PSYC5051	Research Capstone: Community Research	3
PSYC5052	Research Capstone: Stress and Health	3
PSYC5053	Research Capstone: Children's Learning	3
PSYC5054	Research Capstone: Personality and Clinical Psychology	3
PSYC5055	Research Capstone: Perception and Action	3
PSYC5056	Research Capstone: Social Psychology	3
PSYC5057	Research Capstone: Cognitive Psychology	3
PSYC5058	Research Capstone: Applied Psychology	3
PSYC5059	Research Capstone: Neuropsychology	3

Course	Title/Desc	Credit
PSYC5060	Research Capstone: Human Factors	3
PSYC5061	Research Capstone: Human and Animal Cognition	3
PSYC5062	Research Capstone: Evaluation of Educational Programs	3

General Science/Social Science

Select 15 credit hours from General Science/Social Science lists if not completing a double major/minor/certificate option

Course	Title/Desc	Credit
ANTH	ANTH: 1003, 1004, 2050, 2079	3
BIOL	BIOL: 1021, 1022, 1053, 1081, 1081L, 1082, 1082L, 2001C, 2002C, 2031C, 2083	3
CHEM	CHEM: 1010, 1011, 1020, 1020L, 1030, 1030L, 1031, 1031L, 1040, 1040L, 1041, 1041L,	3
COMM	COMM: 2004, 2021, 4012	3
CLRS4002	Clinical Research Ethics	2
CS	CS: 1021C, 1022C, 2011	3
EMED	EMED: 1011, 1015	3
ENED	ENED: 1090, 1091	3

Double Major/Minor/Certificate Options:

Students are required to satisfy one of the following: declare one of the approved Minor/Certificate options OR complete 15 credit hours of coursework from the list of BS General Science/Social Science courses. A double major in one of the areas below will also fulfill this requirement.

Course	Title/Desc	Credit

General Science/Social Science (continued)

Course	Title/Desc	Credit
HLSC	HLSC: 2011, 3014	3
HPE	HPE: 1002, 1005, 2002	3
IT	IT: 1040C, 1050, 1051C, 1090C, 2021, 2040C, 2045C	3
MATH	MATH: 1021, 1026, 1044, 1045, 1061, 1062, 1071, 2073, 2074, 2076	3
NS	NS: 2001, 2002	3
PH4050	Evidence-Based Public Health	3
PHIL	PHIL: 1000, 1006, 1010, 2032, 2041, 3033	3
PHYS	PHYS: 1017, 1033, 1051, 1051L, 1052, 1052L, 2001, 2001L, 2002, 2002L	3
SOC	SOC: 1001, 1002, 2030, 3090	3

Developmental Science (DS) Track

The application process for the Developmental Science (DS) track requires an interview with one of the core faculty members. Typically, this interview takes place when students interview for one of the experiential learning credits (i.e., research practicum, service learning, fieldwork practicum). Interested students are asked to contact one of the core faculty members. To be eligible for the track, students have to complete all required course work with a minimum grade of A-. Additional courses may qualify, pending permission from core faculty. Courses are not guaranteed to be offered in any given semester. Students are encouraged to consult with their academic advisor when determining their plan for meeting track requirements.

2000-Level Foundational Course (3 credit hours)

Pre-requisite: PSYC 1001 with a minimum grade of A-

Course	Title/Desc	Credit
PSYC2040	Developmental Psychology (A- min)	3

3000-Level Electives in area of Developmental Science

Minimum of 6 credit hours; more credit hours are recommended

Course	Title/Desc	Credit
PSYC3020	Cognitive Neuropsychology (A- min)	3
PSYC3022	Lifespan Brain Development (A- min)	3
PSYC3033	Developmental Issues in Health Psychology (A- min)	3
PSYC3044	Cognitive Development (A- min)	3

4000-Level Experiential Learning (3+ credit hours)

Instructor permission required. Students have to complete an interview with one core faculty member before they sign for credit.

Course	Title/Desc	Credit
PSYC4041	Research Practicum in Developmental Science (A- min)	3 - 6

Course	Title/Desc	Credit
PSYC	PSYC: Anthropology, Bioethics, Biology, Business Analytics, Chemistry, Computational Science, Economics, Environmental Studies, Global Health Studies, Information Technology, Information Systems, Marketing, Math, Minority Health, Networking, Nutrition, Philosophy, Physics, Political Science, Pre-Medicine, Sociology, Software Development, Web Development	15 - 34

Course	Title/Desc	Credit
PSYC4042	Service Learning in Developmental Science (A- min)	3 - 6
PSYC4043	Fieldwork Practicum in Developmental Science (A- min)	3 - 6

5000-Level Capstone (3 credit hours)

Pre-requisite: PSYC 2002C/ORGL 2004C with a minimum grade of A-

Course	Title/Desc	Credit
PSYC5050	Research Capstone: Child Health and Mental Health (A- min)	3
PSYC5053	Research Capstone: Children's Learning (A- min)	3
PSYC5059	Research Capstone: Neuropsychology (A- min)	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Statistics

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Statistics is one of the fastest-growing disciplines and is ranked among the top six professions by the US News and World Report. Statistician jobs are projected to grow 35 percent between 2020 and 2030, according to the Bureau of Labor Statistics.

Statistics is used in almost all disciplines, including science, medicine, business, finance, social science, banking, and sports. A career in statistics will offer excellent job satisfaction, stability, career development, and life-long learning opportunities in a field of one's interest. Statisticians are in significant demand in almost all employment sectors in private, government, and academia: providing a wide range of job opportunities of interest to build a career. Even in economic downturns, employment in statistics-related position remains in high demand.

Statistics is about solving real-world problems using data. It involves using data and analytical tools to make estimates and forecasts, assess their accuracy, and help in decision making. Students will learn data collection; data summarization and visualization; modeling for various types of data; making inferences and predictions; quantifying uncertainty; and facilitating decision-making.

The Division of Statistics and Data Sciences in the Department of Mathematical Sciences offers cutting-edge courses and training in statistics and data science that will prepare students for lucrative employments in Cincinnati and across the nation.

Success

To succeed in statistics major, students need to have good mathematical and analytical skills and interest in data exploration and analysis to solve problems. Good computational and communication skills will increase the chance of success.

Career

Employments for statistics majors are available in numerous industries, government, and academia. A partial list of careers for graduates of statistics major is below.

- Statistician in industries, medical or health care sectors, or government
- Data scientist
- Research statistician in natural or social science disciplines
- Biostatistician
- Marketing research analyst
- Financial analyst
- Insurance actuary
- Risk analyst
- Sports analyst
- Professor and educator in colleges or universities

Minoring

The Division of Statistics and Data Science in the Department of Mathematical Sciences offers an undergraduate minor in statistics for students majoring in another area. It is offered to students in any college at the University of Cincinnati. Advanced placement and calculus transfer credit can be counted toward the minor.

The minor in statistics program will provide students from various fields with essential statistics knowledge and data analysis skills they can use in their own specific fields. Upon the completion of the minor program, the students will be able to conduct statistical analysis using modern computational tools, understand basic theories which are the foundation for various statistical methodologies, read research articles and news that use statistics, and interpret the findings and conclusions.

A minimum of 24 credit hours, including 14 credit hours from the core courses, is required for completion of the minor requirement.

Core courses for Minor in Statistics (14 credit hours)

- MATH1061, Calculus I
- MATH1062, Calculus II
- STAT2037, Probability & Statistics I
- STAT3038, Probability & Statistics II

Minimum of 10 credit hours from the following minor elective courses:

- MATH2063, Multivariate Calculus
- MATH2076, Linear Algebra
- STAT3041, Introduction to Data Science
- STAT4041, Bayesian Data Science
- STAT4131, Applied Regression Analysis

UC Advantages And Special Opportunities

Students in the UC College of Arts and Sciences enjoy many benefits afforded through study at a research-intensive institution ranked among the nation's top urban public research universities. UC's urban, tristate location offers exciting opportunities for global education, research, and learning. At the same time, its student-centered focus includes an 11:1 student-faculty ratio, a nationally recognized center for exploratory studies, and a successful first year experience program that teaches critical skills to first-year students and provides connections with important campus resources.

Special Programs

The statistics faculty members are engaged in research at the forefront of major areas in statistics as well as interdisciplinary research. Opportunities are available for students to be involved in research under the mentorship of faculty as part of the Capstone Project, the UPRISE or the Taft program in the summer of junior year, or independently. Students will also have internship opportunities during the regular semester in the senior year or in the summer before. Our program is one of only a few to offer such an opportunity. Our majors will have access to excellent computer facilities, and computation is incorporated intrinsically into our courses.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to A&S is generally available for any off-campus student who was admissible directly from high school and has a cumulative 2.0 GPA and a 2.0 in the most recent institution.

Students who were not admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a cumulative 2.0 GPA and a 2.0 at the most recent institution

Transfer students should apply using our transfer student online application

University transfer scholarships are available to those who meet specific requirements, and ANY admitted A&S transfer student might qualify for an A&S transfer scholarship. Deadlines and eligibility criteria are online via the previous links.

For any inquiries, please contact us at artsci@ucmail.uc.edu

Changing Majors Within UC

Statistics

BS

Statistics (Optional Co-op Subplan)

Duration: 4 Years

★Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
MATH1061	Calculus I (C- min)	4
BoK: SCE	Foreign Language	3
	A&S First-Year Seminar List provided each semester by advising office	3
Free Electives	Elective or MATH2010	2

Spring Semester Year 1

Course	Title/Desc	Credit
MATH1062	Calculus II (C- min)	4
PD1170	Career Readiness for the Liberal Arts	1
BoK: NS	Natural Sciences	3
BoK: SS	Social Sciences	3
BoK: SCE	Foreign Language	3
Free Electives	Free Elective	1

Optional Co-op Plan

Students choosing to complete the optional co-op plan must satisfy the following requirements. Students not starting the co-op plan in the Fall Semester Year 2 should consult with their advisor.

All co-op students must first complete the following course in Fall Semester of Year 2:

Course	Title/Desc	Credit
PD2066	Professionalism and Purpose for Natural Science	3

Students will complete 3 co-op experiences:
Students will work with their advisor to choose the appropriate semester and co-op course for each experience.

Fall Semester Year 2

Course	Title/Desc	Credit
MATH2063	Multivariable Calculus (C- min)	4
MATH2076	Linear Algebra (C- min)	3
PD2066	Professionalism and Purpose for Natural Science	3
STAT2037	Probability and Statistics I (C- min)	3
	Foreign Language or Free Elective	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
STAT3038	Probability and Statistics II (C- min)	3
STAT3041	Data Science and Statistics (C- min)	3
BoK: FA,HU	Fine Arts or Humanities	3
	Foreign Language or Free Elective	3

Optional Co-op Plan

Experience 1

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP2000	COOP for ARTS & SCIENCES - Part time (Experience 1)	1 - 12
COOP2051	COOP for ARTS & SCIENCES (First Experience)	0

Fall Semester Year 3

Course	Title/Desc	Credit
STAT4121	Mathematical Statistics I (C- min)	3
STAT4131	Regression Analysis and Statistical Learning (C- min)	3
BoK: NS	Natural Sciences	3
	Experiential Learning/Elective	2
Free Electives	Free Elective	3

Spring Semester Year 3

Course	Title/Desc	Credit
STAT4041	Bayesian Data Science (C- min)	3
STAT5132	Design and Analysis of Experiments (C- min)	3
	Statistics Elective course from list below (C- min)	3
BoK: HP	Historical Perspectives	3
BoK: SCE	Society, Culture, & Ethics	3

Optional Co-op Plan

Experience 2

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP3000	Co-op for Arts & Sciences: Part time (Experience 2)	1 - 12
COOP3051	COOP for ARTS & SCIENCES (Second Experience)	0
	Any course with an EL Attribute with advisor approval	0

Fall Semester Year 4

Spring Semester Year 4

Course	Title/Desc	Credit
	Statistics Elective course from list below (C- min)	3
	Scientific Discipline 1: Complete 6 hrs in 1 discipline. See list below.	3
HIST BoK: HP	Historical Perspectives (HIST)	3
BoK: SS	Social Sciences	3
Free Electives	Elective or MATH4010	3

Course	Title/Desc	Credit
	Statistics Elective from list below (C- min)	3
	Scientific Discpline 2: Complete 6 hrs in 1 discipline. See list below.	3
PD4070	Professionalism & The Common Good	1
BoK: HU	Humanities	3
Free Electives	Free Elective	2

Optional Co-Op Plan

Experience 3

Co-op students must complete one of the following courses. Consult advisor for substitution options.

Course	Title/Desc	Credit
COOP4000	COOP for ARTS & SCIENCES - Part time (Experience 3)	1 - 12
COOP4051	COOP for ARTS & SCIENCES (Third Experience)	0

Capstone (select one)

Course	Title/Desc	Credit
MATH5001	Capstone Seminar in Mathematics (C- min)	3
MATH5002	Capstone Project in Mathematics (C- min)	3

(STAT-BS) Scientific Discpline

MATH5108	Applied Probability and Stochastic Processes (C- min)	3
STAT4021	Special Topics in Statistics (C- min)	3
STAT5122	Mathematical Statistics II (C- min)	3
STAT5141	Time Series (C- min)	3
STAT5142	Survival Analysis and Logistic Regression (C- min)	3
STAT5143	Applied Bayesian Analysis (C- min)	3
STAT5144	Nonparametric Statistics (C- min)	3
STAT5145	Statistical Computing (C- min)	3
STAT5151	Statistical Consulting (C- min)	3
STAT5171	Statistics and Machine Learning (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Anthropology

Duration: **2 Years** Total Credits: **30** Award: **MA**

Overview

The University of Cincinnati offers a comprehensive Master of Arts degree in Anthropology, which includes preparation in archaeology, cultural anthropology, and biological anthropology. The Department of Anthropology has a strong tradition of graduate training at the Master's level with diverse opportunities for graduate student involvement in research in and near Cincinnati, and abroad.

The MA is a professional program that provides graduate training in the concepts, research skills, and knowledge base of anthropology. An MA degree provides preparation for application to a PhD program in Anthropology (not offered at UC). The PhD is required for a career in academic research and four-year college teaching, and for many nonacademic positions at the professional level. The MA degree in anthropology may also be appropriate preparation for further study or careers in such fields as law, medicine, or business, where the student expects to work in a multicultural or international environment.

In addition to our thesis-based MA, we also offer two **non-thesis options** in our Anthropology MA program:

- An internship-based Applied MA

- An Interdisciplinary MA for students desiring to work or study at the interface between anthropology and practice or between anthropology and other disciplines

Career

Students who have completed their education at the MA level have found employment in cultural resource management (archaeology), museums, education, and related public service fields.

Admission Requirements

To see Admission requirements, visit the Admission Criteria website.

For information about application requirements specific to the Anthropology MA program, please visit our departmental website.

International Student Requirements

Proof of English proficiency is required of all applicants who are not U.S. citizens or permanent residents, and who were educated in a country where the official national language is not English. Applicants can demonstrate English proficiency via standardized test score or by meeting the requirements for one of our accepted waivers. Please view our full requirements, including minimum scores, on our English Language Proficiency Requirements page.

Application Deadlines

The deadline for applications is January 15th if students would like to be considered for departmental funding opportunities, such as graduate assistantships. Otherwise, the deadline for applications is March 1st. Note that all supporting documentation should arrive prior to the application deadline.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Location

West Campus

Anthropology

MA

M.A. Degree in Anthropology

Duration: 2 Years

★Minimum Credits: 30 Credits

Archaeology Subfield

This container includes coursework for students in the Archaeology Subfield.

Theory Requirement

Students must take the following course:

Course	Title/Desc	Credit
ANTH6025	Archaeological Theory (B min)	3

Methods Requirement

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6039C	Zooarchaeology (B min)	4
ANTH8019	Archaeological Formation Processes (B min)	3
ANTH8020	Assemblage Analysis (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8036	Advanced Field Research European Archaeology (B min)	3
ANTH8038	Advanced Field Course in Archaeology: Mesoamerica (B min)	3 - 6
ANTH8039	Advanced Field Methods in Archaeology Midwest (B min)	6 - 12

Core Course Requirement--Archaeology

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6026	Water Management (B min)	4
ANTH6028	Spatial Archaeology (B min)	3
ANTH6029	Stable Isotope Ecology (B min)	4
ANTH6039C	Zooarchaeology (B min)	4
ANTH6048C	Zooarchaeology (B min)	4
ANTH7015	Curation Methods in Archaeology Seminar (B min)	3
ANTH7016	Cultural Resource Management Seminar (B min)	3
ANTH7017	Advanced Archaeology of Africa, Europe, and Asia (B min)	4

Biological Subfield

This container includes coursework for students in the Biological Anthropology Subfield.

Theory Requirement

Students must take the following course, or an alternative appropriate course approved by the DGS and their advisor:

Course	Title/Desc	Credit
ANTH6049	Evolutionary Theory (B min)	3

Methods Requirement

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6039C	Zooarchaeology (B min)	4
ANTH7043	Human Osteology (B min)	3
ANTH6093	Anthropological Statistics (B min)	4
ANTH8093	Applied Anthropological Statistics (B min)	3
ANTH8040C	Human Evolution: Past, Present & Future (B min)	3

Core course requirement: Archaeology

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6025	Archaeological Theory (B min)	3
ANTH6026	Water Management (B min)	4
ANTH6028	Spatial Archaeology (B min)	3
ANTH6039C	Zooarchaeology (B min)	4
ANTH7015	Curation Methods in Archaeology Seminar (B min)	3
ANTH7016	Cultural Resource Management Seminar (B min)	3
ANTH7017	Advanced Archaeology of Africa, Europe, and Asia (B min)	4
ANTH7018	Archaeology of the Americas Seminar (B min)	4
ANTH7019	Archaeology of Europe (B min)	3
ANTH7023	Ohio Valley Archaeology Seminar (B min)	3

Sociocultural Subfield

This container includes coursework for students pursuing a thesis in Sociocultural Anthropology

Theory Requirement

Students should choose one of the following courses:

Course	Title/Desc	Credit
ANTH6080	History and Theory of Anthropology (B min)	3
ANTH6085	Contemporary Anthropological Theory (B min)	3

Methods Requirement

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH8071	Ethnographic Methods (B min)	3

Core course requirement: Archaeology

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6025	Archaeological Theory (B min)	3
ANTH6026	Water Management (B min)	4
ANTH6028	Spatial Archaeology (B min)	3
ANTH6039C	Zooarchaeology (B min)	4
ANTH7015	Curation Methods in Archaeology Seminar (B min)	3
ANTH7016	Cultural Resource Management Seminar (B min)	3
ANTH7017	Advanced Archaeology of Africa, Europe, and Asia (B min)	4
ANTH7018	Archaeology of the Americas Seminar (B min)	4
ANTH7019	Archaeology of Europe (B min)	3
ANTH7023	Ohio Valley Archaeology Seminar (B min)	3
ANTH7024	Agricultural Analysis (B min)	4
ANTH7026	Analysis of Civilization (B min)	3
ANTH7027	Archaeology of Identity (B min)	3

Course	Title/Desc	Credit
ANTH7018	Archaeology of the Americas Seminar (B min)	4
ANTH7019	Archaeology of Europe (B min)	3
ANTH7020	Maya Archaeology (B min)	3
ANTH7021	Aztec Archaeology (B min)	4
ANTH7022	Southwest Archaeology (B min)	4
ANTH7023	Ohio Valley Archaeology Seminar (B min)	3
ANTH7024	Agricultural Analysis (B min)	4
ANTH7026	Analysis of Civilization (B min)	3
ANTH7027	Archaeology of Identity (B min)	3
ANTH7035	Advanced Historical Archaeology (B min)	4
ANTH7037	Archaeology of Slavery, Colonialism, and Freedom (B min)	4
ANTH7041	Advanced Topics: Archaeological Internship (B min)	3
ANTH8021	People and Wetlands: Anthropological and Archaeological Perspectives (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8028	Spatial Archaeology (B min)	3
ANTH8030	Nobility of the Ancient New World (B min)	3
ANTH8032	Advanced Reading Maya Texts: Critical Approaches to Primary Sources (B min)	4

Core course requirement--Biological
Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6039C	Zooarchaeology (B min)	4
ANTH6049	Evolutionary Theory (B min)	3
ANTH6052	Biocultural Anthropology (B min)	3
ANTH6055	Evolutionary Medicine and Health (B min)	3
ANTH6093	Anthropological Statistics (B min)	4
ANTH7043	Human Osteology (B min)	3
ANTH7049	Ethical Issues in Human Biology (B min)	3

Course	Title/Desc	Credit
ANTH7024	Agricultural Analysis (B min)	4
ANTH7026	Analysis of Civilization (B min)	3
ANTH7027	Archaeology of Identity (B min)	3
ANTH7029	North American Indian Ethnography (B min)	3
ANTH7035	Advanced Historical Archaeology (B min)	4
ANTH7037	Archaeology of Slavery, Colonialism, and Freedom (B min)	4
ANTH7041	Advanced Topics: Archaeological Internship (B min)	3
ANTH8019	Archaeological Formation Processes (B min)	3
ANTH8020	Assemblage Analysis (B min)	3
ANTH8021	People and Wetlands: Anthropological and Archaeological Perspectives (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8028	Spatial Archaeology (B min)	3
ANTH8030	Nobility of the Ancient New World (B min)	3
ANTH8032	Advanced Reading Maya Texts: Critical Approaches to Primary Sources (B min)	4
ANTH8036	Advanced Field Research European Archaeology (B min)	3
ANTH8038	Advanced Field Course in Archaeology: Mesoamerica (B min)	3 - 6
ANTH8039	Advanced Field Methods in Archaeology Midwest (B min)	6 - 12

Core course requirement--Biological
Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6052	Biocultural Anthropology (B min)	3
ANTH6055	Evolutionary Medicine and Health (B min)	3
ANTH6093	Anthropological Statistics (B min)	4
ANTH7043	Human Osteology (B min)	3
ANTH7049	Ethical Issues in Human Biology (B min)	3

Course	Title/Desc	Credit
ANTH7029	North American Indian Ethnography (B min)	3
ANTH7035	Advanced Historical Archaeology (B min)	4
ANTH7037	Archaeology of Slavery, Colonialism, and Freedom (B min)	4
ANTH7041	Advanced Topics: Archaeological Internship (B min)	3
ANTH8019	Archaeological Formation Processes (B min)	3
ANTH8020	Assemblage Analysis (B min)	3
ANTH8021	People and Wetlands: Anthropological and Archaeological Perspectives (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8028	Spatial Archaeology (B min)	3
ANTH8030	Nobility of the Ancient New World (B min)	3
ANTH8032	Advanced Reading Maya Texts: Critical Approaches to Primary Sources (B min)	4
ANTH8036	Advanced Field Research European Archaeology (B min)	3
ANTH8038	Advanced Field Course in Archaeology: Mesoamerica (B min)	3 - 6
ANTH8039	Advanced Field Methods in Archaeology Midwest (B min)	6 - 12

Core course requirement--Biological.
Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6052	Biocultural Anthropology (B min)	3
ANTH6055	Evolutionary Medicine and Health (B min)	3
ANTH6093	Anthropological Statistics (B min)	4
ANTH7043	Human Osteology (B- min)	3
ANTH7049	Ethical Issues in Human Biology (B min)	3
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4
ANTH8052	Biocultural Anthropology (B min)	3

Course	Title/Desc	Credit
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4
ANTH8052	Biocultural Anthropology (B min)	3
ANTH8055	Evolutionary Medicine and Health (B min)	3
ANTH8058	Advanced Human Structure (B min)	3
ANTH8059	Approaches to Human Adaptation (B min)	4
ANTH8046	Advanced Human Evolutionary Genetics and Genomics (B min)	3
ANTH8040C	Human Evolution: Past, Present & Future (B min)	3

Course	Title/Desc	Credit
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4
ANTH8052	Biocultural Anthropology (B min)	3
ANTH8055	Evolutionary Medicine and Health (B min)	3
ANTH8058	Advanced Human Structure (B min)	3
ANTH8059	Approaches to Human Adaptation (B min)	4
ANTH8040C	Human Evolution: Past, Present & Future (B min)	3
ANTH8046	Advanced Human Evolutionary Genetics and Genomics (B min)	3

Course	Title/Desc	Credit
ANTH8055	Evolutionary Medicine and Health (B min)	3
ANTH8058	Advanced Human Structure (B min)	3
ANTH8059	Approaches to Human Adaptation (B min)	4
ANTH8040C	Human Evolution: Past, Present & Future (B min)	3
ANTH8046	Advanced Human Evolutionary Genetics and Genomics (B min)	3

Core course requirement--Sociocultural
Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6032	Critical Perspectives in Political Ecology: Culture, Power, Nature (B min)	3
ANTH6071	Ethnographic Methods (B min)	3
ANTH6080	History and Theory of Anthropology (B min)	3
ANTH6085	Contemporary Anthropological Theory (B min)	3
ANTH7007	Advanced Topics in Linguistic Anthropology (B min)	4
ANTH7031	Seminar in Anthropological Film (B min)	4
ANTH7053	Seminar on Ecological Anthropology (B min)	3
ANTH7058	Seminar: Food Research in Anthropology (B min)	4
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4
ANTH7065	Global Trends in International Migration (B min)	3
ANTH7066	Advanced Anthropology of Global Problems (B min)	4
ANTH7067	Applied Demographic Anthropology (B min)	3
ANTH7068	Anthropology of Religion (B min)	4
ANTH7069	Psychological Anthropology: Ethnology of Altered States, Mind and Bodies (B min)	3

Core course requirement--Sociocultural
Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6071	Ethnographic Methods (B min)	3
ANTH6080	History and Theory of Anthropology (B min)	3
ANTH6085	Contemporary Anthropological Theory (B min)	3
ANTH7007	Advanced Topics in Linguistic Anthropology (B min)	4
ANTH7031	Seminar in Anthropological Film (B min)	4
ANTH7053	Seminar on Ecological Anthropology (B min)	3
ANTH6032	Critical Perspectives in Political Ecology: Culture, Power, Nature (B min)	3
ANTH7058	Seminar: Food Research in Anthropology (B min)	4
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4
ANTH7065	Global Trends in International Migration (B min)	3
ANTH7066	Advanced Anthropology of Global Problems (B min)	4
ANTH7067	Applied Demographic Anthropology (B min)	3
ANTH7068	Anthropology of Religion (B min)	4
ANTH7069	Psychological Anthropology: Ethnology of Altered States, Mind and Bodies (B min)	3

Core course requirement--Sociocultural
Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6080	History and Theory of Anthropology (B min)	3
ANTH6085	Contemporary Anthropological Theory (B min)	3
ANTH7007	Advanced Topics in Linguistic Anthropology (B min)	4
ANTH7031	Seminar in Anthropological Film (B min)	4
ANTH7058	Seminar: Food Research in Anthropology (B min)	4
ANTH7053	Seminar on Ecological Anthropology (B min)	3
ANTH6032	Critical Perspectives in Political Ecology: Culture, Power, Nature (B min)	3
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4
ANTH7065	Global Trends in International Migration (B min)	3
ANTH7066	Advanced Anthropology of Global Problems (B min)	4
ANTH7067	Applied Demographic Anthropology (B min)	3
ANTH7068	Anthropology of Religion (B min)	4
ANTH7069	Psychological Anthropology: Ethnology of Altered States, Mind and Bodies (B min)	3
ANTH7072	Advanced Topics: Anthropology of Media (B min)	4
ANTH7074	Advanced Topics: Seeing as Social Practice (B min)	3

Course	Title/Desc	Credit
ANTH7072	Advanced Topics: Anthropology of Media (B min)	4
ANTH7074	Advanced Topics: Seeing as Social Practice (B min)	3
ANTH7075	Anthropology in Cross-Cultural Perspective (B min)	4
ANTH7078	Advanced Topics: Beauty, Race, Gender, and Power (B min)	4
ANTH7079	Advanced Medical Anthropology Seminar (B min)	4
ANTH8061	Quantitative Analysis for Social Sciences (B min)	3
ANTH8066	Advanced Applied Anthropology (B min)	3
ANTH8070	Advanced Economic Anthropology (B min)	3
ANTH8071	Ethnographic Methods (B min)	3
ANTH8074	Anthropology and Development (B min)	3
ANTH8075	Anthropology in Cross-Cultural Perspective (B min)	3
ANTH8078	Advanced Topics: Beauty, Race, Gender, and Power (B min)	3
ANTH8079	Medical Anthropology II: Subjectivity, Experience and Mental Illness (B min)	3
ANTH7076	People and Public Lands (B min)	3

Course	Title/Desc	Credit
ANTH7072	Advanced Topics: Anthropology of Media (B min)	4
ANTH7074	Advanced Topics: Seeing as Social Practice (B min)	3
ANTH7075	Anthropology in Cross-Cultural Perspective (B min)	4
ANTH7078	Advanced Topics: Beauty, Race, Gender, and Power (B min)	4
ANTH7079	Advanced Medical Anthropology Seminar (B min)	4
ANTH8066	Advanced Applied Anthropology (B min)	3
ANTH8077	DESIGN & ANTHROPOLOGY (B min)	3
ANTH8070	Advanced Economic Anthropology (B min)	3
ANTH8071	Ethnographic Methods (B min)	3
ANTH8074	Anthropology and Development (B min)	3
ANTH8075	Anthropology in Cross-Cultural Perspective (B min)	3
ANTH8078	Advanced Topics: Beauty, Race, Gender, and Power (B min)	3
ANTH8079	Medical Anthropology II: Subjectivity, Experience and Mental Illness (B min)	3
ANTH7076	People and Public Lands (B min)	3

Course	Title/Desc	Credit
ANTH7075	Anthropology in Cross-Cultural Perspective (B min)	4
ANTH7076	People and Public Lands (B min)	3
ANTH7078	Advanced Topics: Beauty, Race, Gender, and Power (B min)	4
ANTH7079	Advanced Medical Anthropology Seminar (B min)	4
ANTH8066	Advanced Applied Anthropology (B min)	3
ANTH8077	DESIGN & ANTHROPOLOGY (B min)	3
ANTH8078	Advanced Topics: Beauty, Race, Gender, and Power (B min)	3
ANTH8079	Medical Anthropology II: Subjectivity, Experience and Mental Illness (B min)	3

Course Requirements for all students, regardless of subfield

This container contains requirements for elective, professionalization coursework and additional research credits for all subfields.

Professionalization Coursework

All students (regardless of subfield speciality) must complete both of the following courses:

Course	Title/Desc	Credit
ANTH7008	Graduate Professionalization Workshop (B min)	1
ANTH7009	Fieldwork Proseminar (B min)	2

Additional Research Credits. Additional research credits. Students may choose among these to bring their total credit hours up to 30, but must take 24 credits of formal course work (e.g., if a student has a total of 30 credits, no more than 6 should come

Course	Title/Desc	Credit
ANTH7093	Individual Work in Anthropology (B min)	1 - 15
ANTH7094	Individual Work in Anthropology (B min)	1 - 15
ANTH7095	Individual Work in Anthropology (B min)	1 - 15
ANTH7097	MA Thesis Research (B min)	1 - 15
ANTH7098	MA Thesis Research (B min)	1 - 15
ANTH7099	MA Thesis Research (B min)	1 - 15

Free electives

Students must choose up to 6 credits in free electives, in consultation with the DGS and their advisor.

Course	Title/Desc	Credit
Free Electives	Free electives are chosen in consultation with the DGS and the student's advisor. When appropriate these courses may be offered outside the of the Anthropology Department.	6

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Anthropology

MA

M.A. Degree in Anthropology -- Interdisciplinary Certificate

Duration: 2 Years

★Minimum Credits:

Archaeology Subfield

This container includes coursework for students in the Archaeology Subfield.

Theory Requirement

Students must take the following course:

Course	Title/Desc	Credit
ANTH6025	Archaeological Theory (B min)	3

Methods Requirement

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6039C	Zooarchaeology (B min)	4
ANTH8019	Archaeological Formation Processes (B min)	3
ANTH8020	Assemblage Analysis (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8036	Advanced Field Research European Archaeology (B min)	3
ANTH8038	Advanced Field Course in Archaeology: Mesoamerica (B min)	3 - 6
ANTH8039	Advanced Field Methods in Archaeology Midwest (B min)	6 - 12
ANTH8028	Spatial Archaeology (B min)	3
ANTH8061	Quantitative Analysis for Social Sciences (B min)	3

Core Course Requirement--Archaeology

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6026	Water Management (B min)	4
ANTH6028	Spatial Archaeology (B min)	3
ANTH6029	Stable Isotope Ecology (B min)	4
ANTH6039C	Zooarchaeology (B min)	4
ANTH6048C	Zooarchaeology (B min)	4
ANTH7015	Curation Methods in Archaeology Seminar (B min)	3

Biological Subfield

This container includes coursework for students in the Biological Anthropology Subfield.

Theory Requirement

Students must take the following course, or an alternative appropriate course approved by the DGS and their advisor:

Course	Title/Desc	Credit
ANTH6049	Evolutionary Theory (B min)	3

Methods Requirement

Students should select 3 credits from the list below, OR a course jointly approved by the DGS and their advisor:

Course	Title/Desc	Credit
ANTH6039C	Zooarchaeology (B min)	4
ANTH7043	Human Osteology (B min)	3
ANTH6093	Anthropological Statistics (B min)	4
ANTH8093	Applied Anthropological Statistics (B min)	3
ANTH8040C	Human Evolution: Past, Present & Future (B min)	3

Core course requirement: Archaeology

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6025	Archaeological Theory (B min)	3
ANTH6026	Water Management (B min)	4
ANTH6028	Spatial Archaeology (B min)	3
ANTH6039C	Zooarchaeology (B min)	4
ANTH7015	Curation Methods in Archaeology Seminar (B min)	3
ANTH7016	Cultural Resource Management Seminar (B min)	3
ANTH7017	Advanced Archaeology of Africa, Europe, and Asia (B min)	4
ANTH7018	Archaeology of the Americas Seminar (B min)	4
ANTH7019	Archaeology of Europe (B min)	3

Sociocultural Subfield

This container includes coursework for students in the Sociocultural Subfield.

Theory Requirement

Students should choose one of the following courses:

Course	Title/Desc	Credit
ANTH6080	History and Theory of Anthropology (B min)	3
ANTH6085	Contemporary Anthropological Theory (B min)	3

Methods Requirement

Students must take the following course:

Course	Title/Desc	Credit
ANTH8071	Ethnographic Methods (B min)	3

Core course requirement: Archaeology

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6025	Archaeological Theory (B min)	3
ANTH6026	Water Management (B min)	4
ANTH6028	Spatial Archaeology (B min)	3
ANTH6039C	Zooarchaeology (B min)	4
ANTH7015	Curation Methods in Archaeology Seminar (B min)	3
ANTH7016	Cultural Resource Management Seminar (B min)	3
ANTH7017	Advanced Archaeology of Africa, Europe, and Asia (B min)	4
ANTH7018	Archaeology of the Americas Seminar (B min)	4
ANTH7019	Archaeology of Europe (B min)	3
ANTH7023	Ohio Valley Archaeology Seminar (B min)	3
ANTH7024	Agricultural Analysis (B min)	4
ANTH7026	Analysis of Civilization (B min)	3
ANTH7027	Archaeology of Identity (B min)	3

Course	Title/Desc	Credit
ANTH7016	Cultural Resource Management Seminar (B min)	3
ANTH7017	Advanced Archaeology of Africa, Europe, and Asia (B min)	4
ANTH7018	Archaeology of the Americas Seminar (B min)	4
ANTH7019	Archaeology of Europe (B min)	3
ANTH7020	Maya Archaeology (B min)	3
ANTH7021	Aztec Archaeology (B min)	4
ANTH7022	Southwest Archaeology (B min)	4
ANTH7023	Ohio Valley Archaeology Seminar (B min)	3
ANTH7024	Agricultural Analysis (B min)	4
ANTH7026	Analysis of Civilization (B min)	3
ANTH7027	Archaeology of Identity (B min)	3
ANTH7035	Advanced Historical Archaeology (B min)	4
ANTH7037	Archaeology of Slavery, Colonialism, and Freedom (B min)	4
ANTH7041	Advanced Topics: Archaeological Internship (B min)	3
ANTH8021	People and Wetlands: Anthropological and Archaeological Perspectives (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8028	Spatial Archaeology (B min)	3
ANTH8030	Nobility of the Ancient New World (B min)	3
ANTH8032	Advanced Reading Maya Texts: Critical Approaches to Primary Sources (B min)	4
ANTH8061	Quantitative Analysis for Social Sciences (B min)	3

Core course requirement--Biological

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6039C	Zooarchaeology (B min)	4
ANTH6049	Evolutionary Theory (B min)	3

Course	Title/Desc	Credit
ANTH7023	Ohio Valley Archaeology Seminar (B min)	3
ANTH7024	Agricultural Analysis (B min)	4
ANTH7026	Analysis of Civilization (B min)	3
ANTH7027	Archaeology of Identity (B min)	3
ANTH7029	North American Indian Ethnography (B min)	3
ANTH7035	Advanced Historical Archaeology (B min)	4
ANTH7037	Archaeology of Slavery, Colonialism, and Freedom (B min)	4
ANTH7041	Advanced Topics: Archaeological Internship (B min)	3
ANTH8019	Archaeological Formation Processes (B min)	3
ANTH8020	Assemblage Analysis (B min)	3
ANTH8021	People and Wetlands: Anthropological and Archaeological Perspectives (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8028	Spatial Archaeology (B min)	3
ANTH8030	Nobility of the Ancient New World (B min)	3
ANTH8032	Advanced Reading Maya Texts: Critical Approaches to Primary Sources (B min)	4
ANTH8036	Advanced Field Research European Archaeology (B min)	3
ANTH8038	Advanced Field Course in Archaeology: Mesoamerica (B min)	3 - 6
ANTH8039	Advanced Field Methods in Archaeology Midwest (B min)	6 - 12
ANTH8061	Quantitative Analysis for Social Sciences (B min)	3

Core course requirement--Biological

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6052	Biocultural Anthropology (B min)	3
ANTH6055	Evolutionary Medicine and Health (B min)	3

Course	Title/Desc	Credit
ANTH7029	North American Indian Ethnography (B min)	3
ANTH7035	Advanced Historical Archaeology (B min)	4
ANTH7037	Archaeology of Slavery, Colonialism, and Freedom (B min)	4
ANTH7041	Advanced Topics: Archaeological Internship (B min)	3
ANTH8019	Archaeological Formation Processes (B min)	3
ANTH8020	Assemblage Analysis (B min)	3
ANTH8021	People and Wetlands: Anthropological and Archaeological Perspectives (B min)	3
ANTH8022	Archaeological Analysis of Plant Remains (B min)	3
ANTH8028	Spatial Archaeology (B min)	3
ANTH8030	Nobility of the Ancient New World (B min)	3
ANTH8032	Advanced Reading Maya Texts: Critical Approaches to Primary Sources (B min)	4
ANTH8036	Advanced Field Research European Archaeology (B min)	3
ANTH8038	Advanced Field Course in Archaeology: Mesoamerica (B min)	3 - 6
ANTH8039	Advanced Field Methods in Archaeology Midwest (B min)	6 - 12
ANTH8061	Quantitative Analysis for Social Sciences (B min)	3

Core course requirement--Biological

Students must choose 3 credits from the following list of courses:

Course	Title/Desc	Credit
ANTH6052	Biocultural Anthropology (B min)	3
ANTH6055	Evolutionary Medicine and Health (B min)	3
ANTH6093	Anthropological Statistics (B min)	4
ANTH7043	Human Osteology (B- min)	3
ANTH7049	Ethical Issues in Human Biology (B min)	3
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4

Course	Title/Desc	Credit
ANTH6052	Biocultural Anthropology (B min)	3
ANTH6055	Evolutionary Medicine and Health (B min)	3
ANTH6093	Anthropological Statistics (B min)	4
ANTH7043	Human Osteology (B min)	3
ANTH7049	Ethical Issues in Human Biology (B min)	3
ANTH7060	Advanced Topics: Anthropology of Race (B min)	4
ANTH8052	Biocultural Anthropology (B min)	3
ANTH8055	Evolutionary Medicine and Health (B min)	3

Course Requirements for all students, regardless of subfield

This container contains requirements for elective, professionalization coursework and graduate certificate coursework.

Professionalization Coursework

All students (regardless of subfield speciality) must complete both of the following courses:

Course	Title/Desc	Credit
ANTH7008	Graduate Professionalization Workshop (B min)	1
ANTH7011	Certificate Review and Proposal (B min)	1

Course	Title/Desc	Credit

Certificate Capstone

Course	Title/Desc	Credit
ANTH7013	Internship or Certificate Capstone (B min)	1

Graduate Certificate -- students must complete a graduate certificate (typically 12-15 credits)

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Classics

Duration: 2 Years Total Credits: 32 Award: MA

Overview

The Department of Classics offers courses of study leading to the degree of Master of Arts in Classics, with opportunities for specialization in Greek and Latin language and literature, classical and pre-classical archaeology, and Greek and Roman history. The individual classical disciplines are interdependent. Students are, therefore, required to complete a reasonable amount of work in every major field.

The course offerings are extensive. Normally a minimum of eight courses are given each semester. Topics range from Bronze Age Greece to late Roman history, from Homer to later Latin literature. There is also the opportunity to work in other disciplines. Students interested in history or philosophy can take additional courses offered by the History and Philosophy Departments. Students in archaeology are encouraged to take special courses in the Anthropology Department and those in philology may also take courses in Romance or Germanic languages or in the English Department. In addition, students can take courses in Near Eastern studies offered by Hebrew Union College.

Communication

Duration: 2 Years Total Credits: 33 Award: MA

Overview

The field of communication promotes the effective and ethical practice of human communication. The discipline is interested in how audiences interpret symbolic meaning and the social, cultural, political, and economic dimensions of speech and language in context. Communication studies draw from humanistic, social scientific, and aesthetic inquiry to investigate how people use messages to generate meanings within and across various contexts, cultures, channels, and media.

As represented by the National Communication Association (NCA), the discipline is "Dedicated to fostering and promoting free and ethical communication." NCA "promotes the widespread appreciation of the importance of communication in public and private life, the application of competent communication to improve the quality of human life and relationships, and the use of knowledge about communication to solve human problems"

Teachers and scholars in the Department of Communication at University of Cincinnati focus on media, rhetoric, public communication, interpersonal, public relations, and organizational communication. Topics include media effects, health and environmental communication, risk and science, leadership and advocacy, social and personal identity, new media, politics, and more.

Career

- Non-profit management
- Corporate Communication Specialist
- Training and Employee Development
- Recruiter
- Higher Education – Student Affairs, Study Abroad
- Public Affairs/Public Relations Officer
- Market Research Manager/Focus Group Moderator
- Development Officer (Non-profit fundraising)
- Events Planning
- Community Outreach Associate
- Environmental Campaign Manager
- Health Educator
- Pharmaceutical Sales
- Scientific and Technical Writing
- Science Journalism
- Environmental Mediator/Negotiator
- Crisis Management
- Political Advocacy
- Political Campaigns

MA Communications 2024

UC Advantages And Special Opportunities

Why UC?

1. Small program means strong faculty/student relationships
2. Top scholar faculty in organizational, political, environmental, media, and health communication
3. Graduates are placed in top doctoral programs and exciting professional positions
4. Graduate Assistantships are available in teaching or research

Our two- year program includes:

- 24 credit hours of course work, plus 9 credit hours of thesis/praxis project
- 4 required courses in communication theory and research
- Multiple options for electives that allow you to customize the program
- The Master's Thesis allows you to design and execute independent research

- The Praxis Project allows you to apply classroom learning to professional experience
- Strong mentorship through faculty advising

Special Programs

The Department of Communication at University of Cincinnati promotes knowledge of human communication through research, teaching, and service. We are located in an urban center within a large research university, which provides a dynamic context for connecting theory and practice.

Our award-winning faculty members share a distinctive focus on contemporary social problems. Research centers on understanding issues of voice, identity, public participation, and advocacy/leadership across communication contexts including interpersonal, organizational, political, organizational, rhetorical, environmental, health, and mediated communication.

Admission Requirements

- Unofficial transcripts
- Goal Statement: These are generally, 3-6 double spaced pages. This statement is very important. We want to ensure that your educational and professional background and goals are a good fit for our program. Your letter should discuss how your academic and professional background prepares you to do well in the program, the specific reasons you are interested in joining our program and studying communication (including the topics and sub-areas of interest), and how your time in the program will help you to meet your professional and academic goals. In addition to assessing your fit with the program, this statement is a way for us to assess your writing abilities.
- Writing Sample: Include a sample that demonstrates your writing skills. Academic writing is preferred, but professional writing is also acceptable. You may wish to include two samples if the writing is relatively short.
- Three letters of recommendation

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Overview

The University of Cincinnati, home of *The Cincinnati Review*, offers a Master of Arts degree with tracks in literary and cultural studies, creative writing, and professional writing and editing. All master's coursework is seminar- or workshop- style, and all classes are supervised by our most active researchers and publishing writers. The curriculum is enhanced by the annual Ropes Lecture series, speakers from the Taft Center for the Humanities, and a superlative array of visiting creative writers.

UC's MA in literature degree is a generalist program with courses ranging from Early Modern to Contemporary American. The literary and cultural studies curriculum introduces students to the ways theory frames literary issues, and presents a range of theory-based and literature electives. The creative writing workshop environment is both rigorous and supportive, and students are encouraged to feel part of a community of writers. Our track in professional writing and editing emphasizes a theoretical foundation adaptable to many fields, and guides students to professional-level internships. Masters students have outstanding publication histories and go on to prestigious PhD programs, as well as careers in writing and editing.

Departmental financial aid is available in the form of scholarships and assistantships. Students that are awarded graduate assistantships teach one course per quarter. They receive extensive theory and practice-based training in teaching composition, and additional pedagogical training and opportunities are available. Applicants interested in consideration for departmental financial aid must submit complete applications by priority funding deadline found on the department's webpage.

Curriculum Guide Versions:
ENGC-MA Creative Writing Track - for students admitted in or after Fall 2020
ENGC-MA Literary and Cultural Studies Track - for students admitted in or after Fall 2020

Admission Requirements

Step One: Online Application

You will be required to submit the following materials as part of the Online Application:

1. Letter of Intent: state academic goals and professional objectives (1-2 pages double spaced)
2. Curriculum Vitae
3. Writing samples (combine all samples into one document):
    - Literature Track Only
        - Critical writing sample - a literary analysis or research paper totaling 20 pages
    - Creative Writing Track Only:
        - Creative writing sample - a chapter of a novel, two short stories, pages of poetry, or an act of a play totaling 15 to 20 pages
        - Critical writing sample - a literary analysis or a research paper totaling 10-15 pages
    - Professional Writing and Editing Track:
        - Two substantial pieces of expository writing, 15 to 20 pages each (one of which is academic, if possible) or several shorter pieces (such as articles, reports, or instructions)
4. Unofficial transcripts from all universities and/or colleges attended are submitted in the Online Application system.

Step Two: Required Supplementary Materials

1. Three letters of recommendation (no form required): Recommenders will submit letters through the Online Application system.
2. GRE General Test Scores: Must be reported directly from GRE to the University of Cincinnati. Use CEEB code 1833.
3. Proof of English Proficiency is required of all applicants whose native language is not English.

All applications are given careful and individual review. In some cases, students who do not meet the required GPAs and GRE scores may be admitted.

- Bachelor's degree from an accredited university or college. BA in English is preferred, but not required.
- Minimum undergraduate GPA: 3.5

- Minimum GRE scores:
  - Verbal: 600
  - Analytical: 5.0

Application Deadlines

Deadlines for each year are found on the department's website.

French

Duration: **2 Years** Award: **MA**

Overview

The Department of Romance and Arabic Languages and Literatures offers an MA in French literatures with emphasis on French and Francophone poetry, narrative, and film; interdisciplinary studies, literary theory, and teaching. The expertise of faculty spans all the major periods of French and Francophone literature, and are active scholars at the national and international levels. Professors work closely with graduate students in their coursework, and many of our students are engaged in joint projects or research and teaching with faculty members. In addition to financial support, the teaching assistants receive helpful supervision, including a two-week teacher training seminar prior to classes and an ongoing teaching practicum during the school year. The graduate students are seen as an essential and vital part of the Department. The success our students have had in finding teaching positions attests to the effectiveness of this program. Students are expected to register for three 4-credit courses each semester and are expected to present for a comprehensive examination in the spring semester of their second year. The MA in French at UC is an ideal degree both for students wishing to teach at the high school or college level, as well as for students wishing to continue to the Ph.D. level.

Career

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Admission Requirements

- A baccalaureate degree or its equivalent, preferably in French or literature
- A minimum GPA of 3.00
- GRE not required
- Curriculum Vitae (CV, resume)
- Three letters of recommendation, preferably from recent language or literature professors submitted through the UC online recommendation system
- Official transcripts from all colleges and universities attended
- A 500 word statement of purpose, preferably in the target language
- A writing sample in the target language
- For non native English speakers:
  - TOEFL scores, the minimum: 520 (paper), 190 (computer), 80 (internet)
  - Oral English Proficiency Test administered by UC before being allowed to teach

Geography

Duration: **2.5 Years** Total Credits: **34 - 37** Award: **MA**

Overview

The Department of Geography has two MA degree options; an accelerated one-year, non-thesis program, and a two-year, thesis program. The MA non-thesis program has been structured primarily for students who have an undergraduate degree in geography and who desire to enter the job market upon completion of a masters program. The MA thesis program is recommended for students who wish to continue graduate work in a PhD program. The MA thesis program also may be appropriate for students who do not have an adequate background in geography and who wish to take additional course work over a longer time period (2 years). Candidates for the Masters of Arts degree are expected to show broad mastery of the field, with a focus on the areas of departmental strength, including economic, urban and historical-cultural geography. Also available is a concentration in physical geography, with slightly different requirements and options. Students are expected

1. to complete satisfactorily certain required courses and seminars,
2. to complete additional work in areas related to their special interests (either within or outside the department) and
3. to write a thesis and defend it successfully, or write a research paper and successfully conclude a field problem (non-thesis option).

changjoo.kim@uc.edu

Admission Requirements

To apply for our graduate programs, you must complete an on-line application through the UC Graduate School's Application website.

The application requires the following documents:

1. Unofficial transcripts are submitted online as part of the admission application process. Official transcripts of the student's academic record of all undergraduate and graduate studies are submitted directly to the department, to the attention of the Geography Graduate Program Director. Applicants must have a minimum grade-point average (GPA) of 3.00 or foreign equivalent.
2. Three letters of recommendation, commenting upon the student's aptitude and potential for graduate studies and research.
3. Official GRE scores (verbal ability, quantitative ability, and analytic ability), which need to be sent to the University of Cincinnati (institution code 1833) directly from ETS. **The Department of Geography requires minimum score of 300 (verbal + quantitative) or 1080 as regarding to prior scale.**
4. A short essay (no longer than 2 pages in length) that briefly and cogently describes your educational background, past research experience, anticipated research project and topic, and explains your reasons for pursuing a graduate degree in geography at the University of Cincinnati. Your statement of purpose should also name up to two potential mentors from the faculty members with whom you have already been in contact and/or with whom you share research interests.
5. Curriculum Vitae (CV)/Resume.
6. Academic/professional writing samples, which are encouraged but not mandatory.

International Student Requirements

International students who do not hold an undergraduate or graduate degree from a university in an English-speaking country must provide TOEFL (Test of English as a Foreign Language) or the International English Language Testing System (IELTS) scores. This requirement may be waived for a foreign student who has completed an academic program of two or more years at an accredited

American college or university. You must request ETS to electronically transmit your official TOEFL scores to University of Cincinnati at ETS code 1833.Unofficial TOEFL or IELTS scores may also be input during the online application process.

Application Deadlines

To be fully considered for financial support, applications should be submitted by **January 15**. The application deadline for admission is **April 15**.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Germanic Languages and Literatures

Duration: 2 Years Award: MA

Overview

The graduate program in German Studies enjoys a national and international reputation. The faculty members are active scholars and innovative, dedicated teachers. The annual presence of a Max Kade Distinguished Visiting Professor adds to the department's excellence.

The course offerings of the department span the entire spectrum of German literature with an emphasis on 20th and 21st-century literary culture and film. The department is strongly student-oriented, providing both theoretical and practical experience in the teaching of German language, literature, and culture.

Graduate students accepted into the program are eligible for teaching assistantships in addition to tuition remission. Most graduate students earn additional money by teaching summer school. In addition, students gain experience such as editorial work and event organization in the department.

History

Duration: 2 Years Total Credits: 32 Award: MA

Overview

The University of Cincinnati has an excellent mid-sized Department of History and a lively intellectual community. Our graduate program prepares our MA students for a successful career in and outside academia, e.g., secondary teaching, academic positions, public history, and positions in the areas of law and business.

Students enjoy the benefits of a varied curriculum combined with personal attention from faculty. The Master's program is designed to give students a strong grounding in a particular major field – United States, Europe, World, or Public History – while providing professional training in both teaching and researching history. Students select a concentration in United States, European, World, or Public History, but everyone receives broad training, taking courses in minor fields, languages, or in other graduate programs.

A special feature of our program is its Public History track, which trains students for professions in institutions such as museums, archives, libraries, as well as environmental and governmental facilities like the park service.

Career

Students graduating with an MA from our department have gone on to a variety of fruitful and interesting careers. Some have first continued their graduate and professional education through the pursuit of a History PhD, including at both competitive programs in the region like University of Cincinnati, Ohio State, and University of Kentucky, and at internationally elite programs that are further afield like Princeton, Columbia, Northwestern, and University of Pennsylvania. Some have advanced their training in history-adjacent fields like library and archival sciences before pursuing careers in those areas. Others have found careers in such areas as secondary education and digital and public history, with the latter working in museums, historical preservation, historical consultancy, and public-facing research. Still others among our MA alumni have put their historical knowledge and analytical and pedagogical skills to use in government and the private sector, including with jobs in public-policy consultancy, financial analysis, dispute resolution, and the marketing of historical artifacts.

Curriculum

Students in the Master's program develop basic professional skills in the discipline of history as well as competence in a major field. Our program emphasizes the acquisition of both historical knowledge and an understanding of diverse historical methodologies. Primary research and expository writing techniques are critical to this program. All our students are trained to work as historians and to apply the benefits of critical thinking, historical analysis, and succinct writing more broadly in their future profession inside and outside academia. Our program emphasizes original research based on primary documents, and it features courses in historical methodologies, public history, and pedagogy.

Most students take two years to complete the MA, although in exceptional cases it can be finished in three semesters. Students must take a minimum of 32 credit hours to earn a Master's degree. At least 8 of these credit hours must be in the area of concentration.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
History Master's Curriculum Guide, Effective Fall 2025

Advising

The Director of Graduate Studies advises all Master's students on matters of curriculum, graduation, and, when appropriate, applications to the doctoral program. While students may seek the advice and guidance of any faculty member, students should meet with the Director of Graduate Studies at least once per semester to discuss their progress and plan their curriculum.

UC Advantages And Special Opportunities

At the University of Cincinnati's Department of History, graduate students are connected directly with faculty, with interests in many areas. We also have conferences, symposia, colloquia, and many visiting speakers throughout the year to both inspire new ideas and give students a chance to show their work professonally. The majority of our graduate students are funded throughout their graduate career. The university and surrounding libraries have a multitude of collections to facilitate research. For more information, see our Graduate Program Page.

Admission Requirements

Each of the following play an important role in the Admission Committee's decisions:
• 3 Letters of recommendation
• Personal statement
• Writing sample
• Transcripts

International students may also need to submit TOEFL scores or English Proficiency documentation as described here: https://grad.uc.edu/admissions/criteria/international-students.html. Please contact the Director of the History Graduate Program for more detail.

Application Deadlines

If you would like to submit an electronic application for the MA Program please visit our Online Graduate School Application and complete the form. Please reference the MA Program website or contact the program directly for information about application requirements or to inquire about materials that need to be submitted when applying to this program.

The application deadline is typically January. Please contact the Director of Graduate Studies for the current admission period's deadline.

History

MA

History Master's Curriculum Guide, Effective Fall 2025

Duration: 2 Years

★Minimum Credits: 32 Credits

Core Requirements (20 credits)

All students are required to take these core courses.

Department Topics Seminar

This seminar is offered in the Fall term and focuses on a broad theme cutting across different fields. While the course overall is directed by a single History professor, each meeting of the class is taught by different faculty members of the Department based on the respective specializations of those faculty members and the readings they assign. The course requires regular reading but only light writing assignments.

Course	Title/Desc	Credit
HIST7001	Department Topics Seminar (B- min)	4

Practicum on Teaching & Professional Development

Typically offered once a year, either in the Fall or Spring term, this course is designed to give practical and theoretical training in teaching and other forms of professionalization, including with regards to leading discussions in survey classes and other matters relevant to teaching assistants and graduate students preparing for their careers past graduate school.

Course	Title/Desc	Credit
HIST8073	Graduate Teaching Practicum (B- min)	4

Methods Course

This course is offered in the Fall term and introduces first-year graduate students to fundamental questions and approaches related to the theory and practice of historical scholarship, including the nature of historical inquiry, argument, and narrative. Students explore historiographical scholarship as well as work in primary sources.

Course	Title/Desc	Credit
HIST7060	Historical Methodology Seminar (B- min)	4

Research Seminars

This two-course sequence is designed to guide students in identifying and developing an original research product based on the study of primary materials and scholarly interpretation and documentation. For students writing a Masters paper, the work should typically be 30 to 40 pages in length and of the quality expected of papers submitted for publication to a refereed scholarly journal.

Course	Title/Desc	Credit
HIST9040	Graduate Research Seminar I (B- min)	4
HIST9041	Graduate Research Seminar II (B- min)	4

Focus in Area of Specialty (12 credits)

Students who are focusing in Public History are encouraged to take Introduction to Public History (HIST6010), the Public History Practicum (HIST7064), and complete an internship (HIST7066) to fulfill these credit hours.

Readings Colloquia, Electives, or Foreign Languages

Students will use the remaining of their required credits to focus in on their area of specialty through readings colloquia, directed readings, or study in foreign languages or other specialized skills relevant to the student's goals.

Course	Title/Desc	Credit
HIST6XXX+	History Colloquia and Directed Readings (B- min)	4 - 12
ARAB6XXX+ ASL6XXX+ CHIN6XXX+ FREN6XXX+ GRK6XXX+ GRMN6XXX+ ITAL6XXX+ JAPN6XXX+ KOAN6XXX+ LATN6XXX+ PORT6XXX+ RUSS6XXX+ SPAN6XXX+ SWAH6XXX+	Foreign Languages (B- min)	0 - 8

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Philosophy

Duration: 2 Years Total Credits: 30 - 174 Award: MA

Overview

The Philosophy Department curriculum covers most areas in contemporary philosophical problems as well as most of the major periods in the history of philosophy. The department is especially strong in philosophy of mind and philosophy of the life sciences. Please consult the department webpage for information on the strengths of individual faculty. Students in the MA program do a year of coursework and write a thesis. The degree can usually be earned within one year (including summer quarter). Students in a terminal MA program are not normally eligible for financial aid awarded by the department.

History of Philosophy

Students must take at least one course in each of two of the following six sub-areas: (1) Ancient; (2) Medieval and Renaissance; (3) Modern; (4) 19th Century; (5) Early Analytic; (6) Pragmatism. Courses not on this list may satisfy the requirement with instructor and DGS approval.

Ancient

Course	Title/Desc	Credit
PHIL7001	Plato (B- min)	4
PHIL7002	Aristotle (B- min)	4
PHIL8010	Plato's Later Dialogues (B- min)	4
PHIL8011	Aristotle's Ethics & Politics (B- min)	4
PHIL8012	Topics in Ancient Philosophy (B- min)	4

Medieval & Renaissance

Course	Title/Desc	Credit
PHIL7003	Medieval Philosophy (B- min)	4

Modern

Course	Title/Desc	Credit
PHIL7004	Descartes (B- min)	4
PHIL7005	Locke (B- min)	4
PHIL7006	Berkeley (B- min)	4
PHIL7007	Hume (B- min)	4
PHIL7008	Kant (B- min)	4
PHIL7009	Hobbes (B- min)	4
PHIL8016	Kant's Metaphysics (B- min)	4
PHIL8017	Kant's Ethics (B- min)	4

19th Century

Course	Title/Desc	Credit
PHIL8019	Topics in the History of Philosophy (B- min)	4

Early Analytic

Course	Title/Desc	Credit
PHIL7021	History of Logical Empiricism (B- min)	4

Pragmatism

Course	Title/Desc	Credit
PHIL8025	Topics in Logic and Epistemology (B- min)	4

Core Problems

Students must take at least one course in each of two of the following four sub-areas: (1) Metaphysics; (2) Epistemology; (3) Language and Logic; (4) Mind. Courses not on this list may satisfy the requirement with instructor and DGS approval.

Metaphysics

Course	Title/Desc	Credit
PHIL7030	Metaphysics (B- min)	4
PHIL8023	Contemporary Analytic Philosophy (B- min)	4
PHIL8029	Philosophical Naturalism (B- min)	4
PHIL8030	Contemporary Metaphysics (B- min)	4
PHIL8031	Topics in Metaphysics (B- min)	4
PHIL8083	Persons (B- min)	4

Epistemology

Course	Title/Desc	Credit
PHIL7020	Epistemology (B- min)	4
PHIL7070	Philosophical Methodology (B- min)	4
PHIL8020	Contemporary Epistemology (B- min)	4
PHIL8021	Topics in Epistemology (B- min)	4
PHIL8024	Inductivism and Critical Rationalism (B- min)	4
PHIL8025	Topics in Logic and Epistemology (B- min)	4
PHIL8074	Philosophy and Big Data (B- min)	4
PHIL8069	Epistemology of Experiment (B- min)	4

Language and Logic

Course	Title/Desc	Credit
PHIL7040	Philosophy of Language (B- min)	4
PHIL8042	Philosophical Logic I (B- min)	4
PHIL8043	Philosophical Logic II (B- min)	4
PHIL8044	Topics in Semantics (B- min)	4
PHIL8045	Theories of Interpretation (B- min)	4

Mind

Course	Title/Desc	Credit

Value Theory

Students must take at least one course in each of two of the following three sub-areas: (1) Ethics, (2) Social and Political Philosophy, (3) Aesthetics

Ethics

Course	Title/Desc	Credit
PHIL7010	Feminist Philosophy (B- min)	4
PHIL7023	Theoretical Foundations of Bioethics (B- min)	4
PHIL7080	Contemporary Ethics (B- min)	4
PHIL7081	History of Ethics (B- min)	4
PHIL7082	Moral Psychology (B- min)	4
PHIL8017	Kant's Ethics (B- min)	4
PHIL8081	Metaethics (B- min)	4
PHIL8084	Topics in Moral Philosophy (B- min)	4
PHIL8085	Genomics, Race, and Ethics (B- min)	4

Social and Political Philosophy

Course	Title/Desc	Credit
PHIL7083	Environmental Philosophy (B- min)	4
PHIL7084	Political Philosophy (B- min)	4
PHIL7085	Cosmopolitanism (B- min)	4
PHIL8063	Philosophy of Technology (B- min)	4
PHIL8082	Justice (B- min)	4
PHIL8086	Social and Ethical Issues in Biomedicine (B- min)	4

Aesthetics

Course	Title/Desc	Credit
PHIL7090	Aesthetics (B- min)	4
PHIL8090	Aesthetics and the Philosophy of Mind (B- min)	4
PHIL8091	Approaches to Fiction (B- min)	4

Course	Title/Desc	Credit

Course	Title/Desc	Credit
PHIL7050	Philosophy of Mind (B- min)	4
PHIL7061	Philosophy and Cognitive Science (B- min)	4
PHIL7082	Moral Psychology (B- min)	4
PHIL8050	Topics in Philosophy of Mind (B- min)	4
PHIL8051	Contemporary Philosophy of Mind (B- min)	4
PHIL8052	Recent Philosophy of Mind (B- min)	4
PHIL8053	Representation (B- min)	4
PHIL8054	Philosophical Psychology (B- min)	4
PHIL8055	Topics in Philosophical Psychology (B- min)	4
PHIL8056	Concept of Emotion (B- min)	4
PHIL8064	Philosophy and Neuroscience (B- min)	4
PHIL8090	Aesthetics and the Philosophy of Mind (B- min)	4

Philosophy of Science

Students must take at least one course in the philosophy of science.

Course	Title/Desc	Credit
PHIL7061	Philosophy and Cognitive Science (B- min)	4
PHIL7062	Philosophy of Biology (B- min)	4
PHIL7063	Philosophy of Ecology (B- min)	4
PHIL8029	Philosophical Naturalism (B- min)	4
PHIL8059	Topics in Contemporary Philosophy of Science (B- min)	4
PHIL8060	Topics in Philosophy of Science (B- min)	4
PHIL8061	Philosophy of Biology: Classics in Evolution and Ecology (B- min)	4
PHIL8062	Philosophy and Evolutionary Biology (B- min)	4
PHIL8064	Philosophy and Neuroscience (B- min)	4
PHIL8065	Feminist Philosophy of Science (B- min)	4
PHIL8066	French Traditions in Philosophy of Science (B- min)	4
PHIL8067	Scientific Confirmation (B- min)	4
PHIL8068	Scientific Theories (B- min)	4
PHIL8070	History and Philosophy of Biology (B- min)	4
PHIL8071	History and Philosophy of Science (B- min)	4
PHIL8074	Philosophy and Big Data (B- min)	4
PHIL8072	Philosophical Foundations of the Sociology of Knowledge (B- min)	4

Logic Requirement

Students must take one graduate course in logic. Students with a strong background in logic may place out of this requirement by examination (but they will still be required to take 15 graduate philosophy courses).

Graduate Courses in Logic

Course	Title/Desc	Credit
PHIL8042	Philosophical Logic I (B- min)	4
PHIL8043	Philosophical Logic II (B- min)	4

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Political Science

Duration: 2 Years Total Credits: 30 Award: MA

Overview

Students in the Master of Arts (M.A.) in political science program at the School of Public and International Affairs deepen their knowledge and research skills for careers in politics or policy and/or prepare to apply to doctoral programs in political science and related fields. The degree requires the completion of either a master's thesis or professional paper (an article-length research paper, suitable for submission to an academic journal). Most classes are on weekday afternoons in the fall and spring semesters. The M.A. degree can be done part-time or full-time.

Career

The Political Science M.A. program prepares students for careers in public policy, government, international organizations, or research firms. Graduates have gone on to Ph.D. programs, government careers, or employment as political campaign managers or consultants.

MA in Political Science

UC Advantages And Special Opportunities

The Taft Research Center at the University of Cincinnati provides graduate student travel grants for research or conference presentations and doctoral dissertation fellowships.

Our school has research strengths in several areas, with multiple professors working within each, including:

- Cybersecurity and Security Studies (Ohio Cyber Range Institute and the Ohio Cyber Range)
- Feminist Comparative and International Politics (FCIP PhD Concentration)
- Law and politics, constitutional law, international law, and human rights (PhD/JD with the UC College of Law, home of the Urban Morgan Center for Human Rights)
- Media and Politics
- Religion and Politics (US and International)
- Research Methods from quantitative to interpretive (and Graduate Certificate in Public Opinion and Survey Research)
- South and East Asian Politics (and Asian Studies Graduate Certificate)
- Sustainability and environmental politics

Special Programs

Students may choose to complete a Graduate Certificate in Public Opinion and Survey Research or a cross-disciplinary Graduate Certificate in Asian Studies. SPIA also offers a joint M.A./J.D. program with the College of Law at the University of Cincinnati.

Admission Requirements

- Transcripts from all undergraduate work and (if any) graduate work
- Three letters of recommendation
- A statement of purpose explaining why you have decided to pursue graduate education in political science and specifically addressing how your interests fit with those of the department faculty
- For students applying with only a bachelor's degree: GRE verbal, quantitative and analytical scores are required
- For students applying with a master's degree from a US university or an English-medium university outside the US: GRE scores are optional
- For students applying from countries where English is not an official language: TOEFL scores (or other standardized tests recognized by the UC Graduate School) are required unless you have a bachelor's or higher degree from an entirely English-instructing college or university
- Applicants should have at least a B average in undergraduate coursework or otherwise give evidence of academic promise
- The video essay is not required

Transferring To UC

Students entering the political science PhD program with an MA only need 60 credits to complete the PhD instead of 90.

Changing Majors Within UC

Students entering the political science PhD program with an MA only need 60 credits to complete the PhD instead of 90.

Application Deadlines

- January 15 for fall enrollment with consideration for graduate assistantship or tuition scholarships. Typically Ph.D. students are prioritized for assistantships, but excellent M.A. applicants are sometimes awarded funding.
- June 15 for fall enrollment if the applicant has a fellowship or other funding.

Submit an application for the Political Science program through the UC Graduate School.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Professional Writing

Duration: 2 Years Total Credits: 31 Award: MA

Overview

The Master of Arts in Professional Writing offers coursework in many forms of specialized writing, including technical, business, and health. Careers in writing are rapidly changing. Most writing jobs require the authoring of texts and graphics in multiple media, incorporating new technologies. In this program, students develop cross-genre skills in information and instructional design, web content development and design, project management, and user-testing. Students write and edit articles, promotional material, grant proposals, and reports; create digital and social media; interact with various specializations and research methods; and develop competencies in appropriate software.

The curriculum emphasizes the theory and practice of communication processes bridging disciplines and industries. An innovative approach to service-learning in the classes stresses students' roles as professional consultants and collaborative team-members. The internship requirement affords students the chance to put classroom work into practice. Individualized attention to students' interests and changes in related fields ensures students' success in a variety of careers.

The program is designed for full and part-time students, including

- recent graduates of BA or BS programs in English, communication, graphics, the sciences, and other fields,
- working professionals turning to part-time graduate study to enhance their careers, improve their chances for promotion, or become credentialed in a different field. (Students have included recent college graduates to recent retirees.)

Career

The program prepares graduates for an array of possible professional routes. Most program graduates have accepted nonacademic positions though some have gone on to doctoral work in composition, rhetoric, and technical communication. Job titles for recent graduates include

- distance learning coordinator
- health communicator
- proposal writer
- project manager
- technical writer
- editor
- content specialist
- instructional designer
- digital marketing specialist

Our recent graduates have accepted jobs in technical writing, medical writing, advertising, marketing/corporate communications, e-learning development, website design, and content management.

Advising

Contact:

Mary Beth Debs
Associate Professor
Director, MA in Professional Writing Program
mary.beth.debs@uc.edu
(513) 556-0940

UC Advantages And Special Opportunities

Courses are taught by award winning full-time faculty who have experience outside the classroom as well. Job placement of graduates typically reaches 100% within three months after graduation. Students are not expected to have extensive computer experience before entering the program, but may need to spend extra time to develop comptencies. Two computer labs with high-end software

for web authoring, document design, production of online tutorials, and other major professional-writing tasks are maintained by the college.

Application Deadlines

Individuals Seeking Admission and Departmental Financial Aid	January 15
Individuals *Not* Seeking Departmental Financial Aid	July 31 for Fall semester

Applications for the MA in Professional Writing will be considered throughout the year up to 6 weeks before the start of each semester. In some cases, departmental financial aid may be awarded to late applicants. Departmental aid is not available to part-time students.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Psychology

Duration: 2 Years Total Credits: 30 Award: MA

Overview

The Master of Arts in Psychology program includes:

- A combination of formal coursework with opportunities for “real world,” applied work as part of the Capstone project and other experiences
- 5 required courses in psychology and research
- Multiple options for electives that allow you to customize the program
- Guided opportunities for professional development and internship support through partnership with the Division of Experiential Learning and Community Engagement
- The Capstone allows you to apply classroom learning to professional experience
- Strong mentorship through formal and informal faculty advising

Career

Common career paths include:

- Organizational Consulting
- Organization Development and Planning
- I/O Psychology
- Human Resources (e.g, Staffing, Recruitment)
- Workforce (HR) Analytics
- Non-profit Management
- Training and Employee Development
- Community Outreach Organizations
- Health Educator
- Scientific and Technical Writing
- Policy Advocate

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Organizational & Community Psychology
Terminal MA Track (MAP Program) - Effective Fall 2025

UC Advantages And Special Opportunities

1. Small, cohort-based program means strong peer relationships and a focus on shared learning; strong faculty-student relationships; and greater assistance in obtaining placements in top doctoral programs and exciting professional positions.
2. Top scholar faculty in organizational and community psychology

Special Programs

The Department of Psychology at the University of Cincinnati promotes knowledge of psychology, including organizational and community psychology through research, teaching, and service. We are located in an urban center within a large research university, which provides a dynamic context for connecting theory and practice.

Admission Requirements

You will need the following items to complete the online application process:

1. A personal statement that describes why you want to pursue the MAP degree and anything else that you wish to call to the attention of the MAP Program Admission Committee;

2. Two (2) letters of recommendation from individuals who know you professionally or academically. At least one letter should be written by a faculty member who can speak to your academic qualifications and readiness for graduate work;

3. Transcripts of all current (and previous) college or university grades. [Note: for the application you may upload unofficial transcripts; however, if admitted to the MAP program you will be asked to submit official transcripts to complete the enrollment process.]; and

5. Your current resume or CV

Graduation Requirements

The program involves a one-year (full-time) year of study that includes the following elements:

1. Students are required to complete 30 credit hours of course work in order to graduate
2. To graduate, students must complete 3 required courses (Graduate Statistics I, Social Psychology, and Program Evaluation & Policy Assessment), 1 core specialty course (in I/O Psychology or Community Psychology), 1 Advanced QR Training course, 1 Capstone course, and 12 PSYC or ORGL (OLHR) elective hours.
3. The minimum number of hours for a full-time load for graduate students receiving assistantships and/or scholarships is 12 hours of graduate course work per semester
4. The program is designed to be cohort based, allowing students entering in the fall to take courses together
5. Students are encouraged to take advantage of other professional development opportunities provided through the Department, including guest lectures and grant writing workshops.
6. The MAP Program Director serves in an advisory role to each MAP student; however, students are responsible for identifying a faculty member in the Department who will serve as their praxis adviser.
7. A 4+1 program is in place for students pursuing an undergraduate degree at UC. Eligible students must complete at least 18 hours in Psychology and an approved stats-method sequence. Additionally, the program requires a major GPA of 3.2.

Application Deadlines

The application for Fall enrollment opens August 1. Applications for fall enrollment must be completed (including payment of application fee and submission of all materials) by January 15.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

EDST7045	Community-Based Participatory Research (B- min)	3
EDST7093	Learning, Working and Thriving in Groups (B- min)	3

Capstone Courses

Capstone Courses

A minimum of 3 credits is required. Courses needed are determined by the chosen Pathway (see MAP Handbook for requirements).

Course	Title/Desc	Credit
PD7023	Career Professionalism for Graduate Students (B- min)	1 - 2
PSYC7090	Non-Thesis Research (B- min)	1 - 3
ORGL9000	MAP Capstone (B- min)	1 - 3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Sociology

Duration: 1.5 Years Total Credits: 30 Award: MA

Overview

The Master of Arts in Sociology is primarily designed for students for whom the master's is the final degree, but it also serves students who are preparing for a doctoral program. Training and coursework reflects the department faculty's interests in social inequality, specifically in the areas of community and urban sociology, health and medicine, race and ethnicity, and gender and sexuality. The department is committed to diversity, and draws students from around the U.S. and internationally, and has a reputation for a friendly, collegial atmosphere.

The department offers a few different MA options:

- Students admitted to the Ph.D. program who do not already have an MA will earn one along the way. If you wish to receive a Ph.D. from UC eventually, you should apply to the Ph.D. program directly.
- Undergraduate students majoring in sociology at the University of Cincinnati can apply to the BA/MA (4+1) program, which will let them earn a Master's in Sociology with one additional year of study, without an MA thesis requirement.
- The department also offers a terminal one-year Master's in Sociology, also without an MA thesis requirement

Career

The MA program meets the needs of the State of Ohio and the tri-state region by training students for research positions in firms, hospitals, and government agencies, and preparing master's students for Ph.D. study. The department has an excellent placement record of graduates into appropriate employment or Ph.D. programs.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Sociology (A&S)

Admission Requirements

- Unofficial or official transcripts from all undergraduate work and from M.A. or M.S. degree program(s)
- Resume or curriculum vitae
- A statement of purpose explaining why you wish to pursue graduate education in sociology, specifically addressing how your interests fit with those of department faculty
- A sample of your best academic writing
- Three letters of recommendation
- Evidence of English language proficiency (TOEFL, IELTS, PTE, Duolingo) for all applicants who were educated in a country where the official national language is not English. Find more information on the Graduate Admissions English Language Requirements page. Please note that Sociology does not have higher minimum test scores then required by the University.

Application Deadlines

Completed application must be recieved by April 1st for that year's fall enrollment. The department does not offer any scholarship funding for the Master's program.

While filling out your application, you may wish to visit the Sociology Graduate Program website for information or to inquire about materials that need to be submitted when applying to this program.

Spanish

Duration: **2 Years** Award: **MA**

Overview

The Department of Romance Languages and Literatures offers an MA in Hispanic literatures with emphasis on Spanish and Spanish American poetry, narrative, theatre, and film; interdisciplinary studies, literary theory and creative writing, teaching and pedagogy. The areas of faculty expertise span all the major periods of Spanish and Spanish American literature, and are active scholars at the national and international levels. Professors work closely with graduate students in their course work, and many of our students are engaged in joint projects or research and teaching with faculty members. In addition to financial support, the teaching assistants receive helpful supervision, including a two-week teacher training seminar prior to classes and an ongoing teaching practicum during the school year.

The graduate students are an essential and vital part of the Department. The success our students have had in finding teaching positions attests to the effectiveness of this program. Students are expected to register for three 4-credit courses each quarter, and expected to present for comprehensive examination in the spring quarter of their second year. The MA in Spanish at UC is an ideal degree both for students wishing to teach at high school or college level, as well as for students wishing to continue to the Ph.D. level.

Women's, Gender and Sexuality Studies

Duration: **2 Years** Total Credits: **30 - 45** Award: **MA**

Overview

The MA program in Women's, Gender, and Sexuality Studies (WGSS), one of the oldest programs of its kind in the country, provides intensive academic training in feminist theory, women's and gender issues, and sexuality studies. The MA core curriculum focuses on foundational, intersectional, and transnational feminist theories. Students may also choose from a range of electives in areas such as literature, geography, history, sociology, politics, and art, as well as legal, development, cross-cultural and sexuality studies. In addition, students may opt to concentrate in one of the program's areas of specializations: either sexuality studies or transnational feminisms. Electives can be chosen from a range of courses offered by core and affiliate faculty, including internships and study abroad opportunities. We also offer a joint MA/JD degree program with UC's Law School, a program which is part of the Law School's Nathaniel R. Jones Center for Race, Gender, and Social Justice. Both the MA and MA/JD programs culminate in an original research or creative project supervised by a faculty committee.

Career

Possible careers include:

- Higher Education (Teaching, Research, or Administration)
- Non-Profit Management
- Advocacy
- Activism
- Social Justice

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Women's Gender and Sexuality Studies MA, updated 11/24
Joint WGS MA/JD degree

Admission Requirements

Your application should include the following information:

1. Personal essay (approx. 1-2 double-spaced pages), in which you demonstrate your personal and intellectual commitment to women's, gender, and sexuality studies, your potential to succeed in a research-oriented graduate program, and your professional goals consistent with advanced work in the field.
2. Three letters of recommendation from individuals who can address your work in women's, gender, and sexuality studies and/or your research-oriented work
3. Writing sample: In most cases, this will be an essay or research paper about women, gender, and/or sexuality-related issues written for a prior college course. Applicants returning to university after a period of absence should confer with the Graduate Director about the possibility of submitting another type of writing sample, such as a grant application, magazine article, or letter to the editor.
4. Unofficial transcript(s) of all undergraduate and, if applicable, graduate courses are required for the admission application.

Applications should be complete by January 15 if you wish to be considered for a Graduate Assistantship. Initial notification of admission and financial aid will be made by late February or early March. If space allows, we will consider complete applications for admission (without funding) up to March 31.

Mathematics

Duration: **2 Years** Total Credits: **30** Award: **MAT**

Overview

The Master of Arts for Teachers of Mathematics (MAT) degree is for licensed teachers of secondary mathematics.

The goal of the program is to provide our students with a deep understanding of the fundamental mathematical ideas of high school mathematics. To that end, our courses emphasize mathematical content rather than methods of teaching mathematics and provide an advanced perspective on the topics our students teach in their own classrooms.

This graduate degree program requires three consecutive summers to complete. Each summer we offer a two-course sequence covering a main topic of high school mathematics, a course that introduces and uses technology to support this main sequence, and an additional supporting course on a related high school topic. Through these courses, we focus on expanding your mathematical knowledge to help build your expertise.

All applicants for the MAT program are automatically reviewed for partial scholarship eligibility at the time of application.

Learn about admission requirements and application instructions at https://www.artsci.uc.edu/departments/math/grad/mat.html.

Public Administration

Duration: **2 Years** Total Credits: **38 - 41** Award: **MPA**

Overview

The **Master of Public Administration (MPA)** uses a social justice outlook to develop students to be transformative and ethical leaders in the public and non-profit sectors. Students are able to pursue their passion for public policy and social innovation, and prepare themselves to meet the increasing need for leaders in the public sector. In addition to the traditional core competencies, this program centers justice in all levels of government and nonprofit organizations. As a part of the School of Public and International Affairs, the MPA offers students the opportunity to: study with renowned faculty, gain skills necessary to become effective agents for change, learn through interdisciplinary curricula in areas including community psychology and the School of Information Technology. The program also offers students the unique opportunity to connect with a network of professionals currently at work in the fields of public and non-profit administration.

Mission Statement

The Master of Public Administration uses a social justice outlook to develop students to be transformative and ethical leaders in the public and non-profit sectors.

We achieve our mission by:

- Preparing future leaders to identify and overcome public service obstacles
- Translating knowledge into real-world strategies for action
- Partnering with communities to create a more just society through research and impact
- Training public administrators in rigorous and evidence informed decision-making

Success

In UC's MPA program, students are empowered to achieve a set of learning and professional outcomes that demonstrate that they are prepared to be transformative and ethical leaders in the public and non-profit sectors. These outcomes include rigorous academic goals and learning, professionalization and best practices, and a commitment to justice through analysis and tools of systemic and personal reflection. Based in cohorts of approximately 15 students per year (1:6 faculty ratio), 80% of entering students graduate within two years and 95% within four years.

Career

An MPA prepares students for a variety of exciting careers in the public sector. An MPA is a management degree leads to excellent first placement for our students coming directly from undergraduate programs and significant career enhancement for students already at work in public sector positions.
