Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program. Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Graduation Requirements

In consultation with faculty advisers, fine arts students determine their own interests and elect creative work in one or more of the program's disciplines: art & technology, ceramics, drawing & painting, photography, printmaking, and sculpture.

In addition, students complete course work in art history and electives in humanities, sciences and social sciences from other colleges in the university. The curriculum is completed with a senior thesis colloquy, which emphasizes professionalism and culminates in an exhibition of the student's work. Seniors are required to participate in the annual DAAP senior show.

Students must obtain a minimum overall grade point average of 2.0 and, in addition, must have at least a 2.0 grade point average for the senior year to be eligible for graduation. In order to be eligible for graduation with honors, a student must have completed at least 60 semester hours in the college and have earned at least a 3.6 grade point average.

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Students who apply by November 1 also receive maximum scholarship consideration. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

All programs in the School of Art are accredited by the National Association of Schools of Art and Design (NASAD).

Fine Arts - Art

BFA

Bachelor of Fine Arts

Duration: 5 Years
Minimum Credits: 120 Credits

Year 1 Fall Semester

Course	Title/Desc	Credit
ARTH1001	History of Art I	3
FAA1001	Drawing Studio	3
FAA1005	Studio Modules	3
FAA1080	Introduction to Contemporary Art and Visual Culture	3
BoK: QR	Quantitative Reasoning	3

Year 1 Spring Semester

Course	Title/Desc	Credit
ARTH1002	History of Art II: Renaissance to Contemporary Art	3
ENGL1001	English Composition	3
FAA1085	Current Arts Forum	3
FAA	FAA109X Thematic Studio	3
FAA	FAA109X Thematic Studio	3

Foundations Review

The Foundations Review will occur in the first half of exam week at the end of the spring semester. Students continuing in Fine Arts after Foundations, including Transfer and Transition students, must participate in the review. Fine Arts minors and students of other majors do not need to participate. All physical and digital work and documentation from Foundations year (and work from transferred credit that is applicable to Fine Arts Foundations studios) should be collected and shown. Students will complete a digital portfolio of this work in advance of a 30-minute in-person review with reviewers from the School of Art, who will also view any physical work from the year. This review is helpful to plan for Intro-level courses and selecting a three-course track.

Undergraduate Review

The Undergraduate Review will occur in the fall semester of year three for traditional cohort students. Transfer and Transition students may be on a slightly different schedule depending on

credits earned. In general terms, any BFA student who has completed their three-course studio track sequence should participate in the review. Students will be scheduled for a 30-minute review with a team of faculty. A selection of physical and digital work and documentation of artwork made after the Foundations year will be shown. This review is helpful to assess growth and discoveries made in Introductory-level classes, to prepare for engagement with Co-op, and to begin to lay the groundwork for thesis work.

Games and Animation

Duration: 4 Years Total Credits: 120 Award: BFA

Overview

Formal games have a 5,000-year history, and recorded animation, if we take cave paintings found at Lascaux into account, dates back 17,000 years or more. These media are not new, but the design renaissance of the past century –– from Elizabeth Magie and Winsor McCay, to Respawn Entertainment and PIXAR –– is ever-evolving. Games and animation permeate every aspect of our culture. Games implement and model systems; animation models movement in space. Animation can be found in games, film, and television, but also marketing, motion graphics, virtual reality (VR), and augmented reality (AR). Games can be found everywhere there is a way to implement rules and set a goal, from education to corporate salesrooms. Being able to animate or create games in a production environment is not only necessary, but invaluable. Games and animation now have festivals, major awards, and galleries around the world devoted to them, as well as career paths and lifelong, fulfilling job prospects.

Taught by industry veterans in games and animation, this program straddles between the production side of media creation and the expressive “auteur” models. Games and Animation (henceforth GAA) students will learn what it takes to be in the production of a television series or feature film, or how to produce their own work for galleries or film festivals. Students can try out many different digital tools of animation and game design as well as long-tested analog techniques, all implemented through cycles of development reliant on playtesting and iteration.

In the University of Cincinnati BFA in Games and Animation, there is no artificial separation between theory and practice, between art and industry, between conception and production.

The goals of the BFA-GAA Program at the University are to provide an opportunity for students wanting to pursue a career in Animation, Video Game Designer, or related fields to have a competitive program in Ohio. The curricular structures are separated into four years, and programmatic student learning outcomes (SLOs) are listed following the summaries.

Success

People who are successful in the fine arts tend to have visual and kinesthetic/tactile learning styles. Fine artists are creative, imaginative and visionary, and possess good hand-motor skills. They learn by doing and relish integrating various elements into a cohesive whole. Fine artists are open-minded and interrogative — questioning everything. They have a passion for creating their art and a heightened intellectual and visual perception. Fine artists provide original views and interpretations of the world and its inhabitants, giving us a greater appreciation of the character and values of society and culture. A sense of humor often enhances their work.

- Game Writer
- Motion Capture Animator
- Motion Capture Director

Curriculum

Year One:

During the foundation year students learn the basics of drawing, systems design, the industry, and the software used in the profession. Students will learn how historical and identity dimensions shape their production of games and animation, and how their works contribute to broader cultural discourse. By the end of this first year, students will select the animation or games track.

Year Two:

The second, 'apprenticeship' year is when the student dives headfirst into the craft and contextual histories of the discipline. GAA students learn the basics of animation and game design respectively. They see how team production of games and animation works, and will do playtesting, cleanups, programming, and revisions for senior capstone projects. AGD students learn how to create high-quality designs through drafting, playtesting, and iteration, as well as the arts of character and worldbuilding. By the end of the second year, students will have adjusted to the standards of team coordination and production required of animation and games work.

Year Three:

This is the industrious year in which students begin to focus on their interest while also continuing to acquire generalized knowledge of the field. GAA students can learn more about acting, experimental games, different forms of animation, or advanced scripting tools. All students will be able to assist on senior capstone projects as well, while also continuing more intermediate and advanced work in animation, gameplay, and design. With the fundamentals now under their belt, advanced games students will become more conversant in both the industry and global arts game scenes.

Year Four:

The capstone year is where the student becomes a leader for a more ambitious project. This could be as a systems designer, writer, director, or producer but also as a lead animator, digital storytelling artist, auteur or project director. Their creativity and experience will be on display for the finished project. Students at the end of their degree will be able to see a project from its ideation stages to its exhibition, demonstrating knowledge of fundamental principles, genres, techniques, and systems in animation and game design.

Advising

Prospective students are encouraged to explore the information on our website and contact DAAP Student Affairs at 513-556-1376 or daap-admissions@uc.edu with questions.

Special Programs

Computer Requirements: All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer

prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Computers & Supplies

Admission Requirements

Information for Freshman Students.

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students of varied and diverse backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to students from different backgrounds, geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP, because the size and quality of the applicant pool varies each year.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application. Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

Graduation Requirements

Students must obtain a minimum overall grade point average of 2.0 and, in addition, must have at least a 2.0 grade point average for the senior year to be eligible for graduation. In order to be eligible for graduation with honors, a student must have completed at least 60 semester hours in the college and have earned at least a 3.6 grade point average.

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Students who apply by November 1 also receive maximum scholarship consideration. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Horticulture

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

The study of horticulture covers the growth, distribution and utilization of ornamental plants, fruits and vegetables. In courses offered by UC's College of Design, Architecture, Art, and Planning (DAAP), students learn the relationship between horticulture and ecological processes and develop a forward-looking approach toward the environment. The horticulture curriculum has been choreographed to support the traditional foundation in plant science, landscape design, and landscape management, with a commitment to advance contemporary and sustainable approaches to all facets of horticulture. Most classes are held in the late afternoon and evening on UC's uptown campus as well as several off-campus locations.

Success

Successful horticulture students have a love of the outdoors and a deep commitment to all things that grow. Typically, they enjoy working with their hands and have the patience to wait for results that often take a year or more to unfold. Many are entrepreneurial and study business as well as horticulture.

Career

Employment opportunities in the green industry include landscape management, commercial greenhouses, public and private parks management, and garden design, construction, and management.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

A minor in horticulture is available, as are five certificate programs. The minor and certificates are available to individuals who desire to upgrade skills, enhance the marketability of a current degree, or to prepare for a career change. A certificate is awarded for successful completion of set courses in horticulture and landscape design ranging from 21 to 27 credit hours. All course work completed for the certificate applies toward the bachelor's degree, should a student decide to pursue it. Students must meet the minimum requirements for admission to the Horticulture program in order to pursue a minor or certificate.

Interested students should submit the application form to the DAAP Student Affairs Office, Aronoff 5470.

Available minor and certificates:

- The certificate and minor in horticulture introduces students to the various fields associated with horticultural science, including plant identification, growth, health, and reproduction.
- The certificate in green roofs addresses contemporary issues in living architecture, particularly in the vegetated urban roof, which supports environmental, economic, and social components of sustainable urban design.
- The certificate in sustainable landscape design expands basic knowledge of building design and landscape design to include a sustainable, integrated approach to the design of the built environment.
- The certificate in urban agriculture responds to contemporary issues in horticulture, urban design, livability and quality of life, food security, and sustainability.
- The certificate in urban landscapes expands basic knowledge of building and landscape design to address the role of plant life in the sustainable urban environment.

Advising

Prospective students are encouraged to explore the information on our website and contact DAAP Student Affairs at 513-556-1376 or daap-admissions@uc.edu with questions.

The Transfer and Transition Advising Center is available to assist prospective transfer and transition students. Current DAAP students are assigned an academic advisor based on their major/program. For more information on DAAP advising, please visit the DAAP Undergraduate Advising webpage.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Community College

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include study abroad and minor and certificate programs within the college and the university. Students are encouraged to share their interests in these opportunities with their academic advisor.
- The Robert A. Deshon and Karl J. Schlachter Library for Design, Architecture, Art, and Planning has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students.

Special Programs

DAAP students learn creative and technical skills in the classroom, taught by a passionate faculty who interact with their students. The goal is to guide students as they grow both intellectually and professionally. This, along with a broad liberal arts background, prepares DAAP students for success in their fields.

Computer Requirements: All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students of varied and diverse backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to students from different backgrounds, geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP, because the size and quality of the applicant pool varies each year.

Please visit the Admissions Office's website for more information, including application materials, requirements, deadlines, and timelines.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application. Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op.

For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Cincinnati State Community College

Changing Majors Within UC

Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program. Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op.

For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Graduation Requirements

Students must obtain a minimum overall grade point average of 2.0 and, in addition, must have at least a 2.0 grade point average for the senior year to be eligible for graduation. In order to be eligible for graduation with honors, a student must have completed at least 60 semester hours in the college and have earned at least a 3.6 grade point average.

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

MKTG	Marketing	0 - 6
OATN	Office Administration Technology	0 - 6
OM	Operations Management	0 - 6
RE	Real Estate	0 - 6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Urban Studies

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

The urban studies program in UC's College of Design, Architecture, Art, and Planning (DAAP) provides a flexible but organized curriculum for students who have a passion for contributing to contemporary urban life. This baccalaureate degree prepares students for employment in metropolitan areas and organizations in fields such as community development, human services, housing and personnel work, as well as for graduate work in urban studies, law, management, community planning, public administration and the social sciences.

Success

People who are successful in the urban studies program typically have verbal learning styles. Urban studies students possess a heightened social consciousness. They are self-motivated students who seek an individually designed program within a broad liberal arts curriculum. This curriculum provides a pre-professional course of study for students who anticipate going on into graduate work in law, management or public administration.

Career

The urban studies program serves as excellent preparation for a career in law and public administration. Graduates find employment opportunities in community development, human services, housing and personnel work. Many also choose to pursue advanced degrees.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

While there is not a minor in urban studies, students may choose to earn a certificate in one of the following programs: urban planning, urban design, or historic preservation. Students interested in applying to a certificate program must submit a completed application to the DAAP Student Affairs Office, 5470 Aronoff.

The certificate in planning gives students skills in the planning way of thinking, essential in business, industry, public service and the arts. Students are given specific skills that are grounded in specific theories. A proficiency in basic statistics is required at the time of admission or shortly thereafter.

The certificate of historic preservation is open to degree candidates in the College of Design, Architecture, Art, and Planning and the College of Arts and Sciences. This program is designed to develop an appreciation for and a working knowledge of the issues and techniques involved in historic preservation.

Advising

Prospective students are encouraged to explore the information on our website and contact DAAP Student Affairs at 513-556-1376 or daap-admissions@uc.edu with questions. The Transfer and Transition Advising Center is available to assist prospective transfer and transition students. Current DAAP students are assigned an academic advisor based on their major/program. For more information on DAAP advising, please visit the DAAP Undergraduate Advising webpage.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in urban studies. It offers the energy and assets of a larger city located in a major metropolitan area, along with vibrant neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum, and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected programs is housed in a unique and educationally stimulating architectural setting.

Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include study abroad and minor and certificate programs within the college and the university. Students are encouraged to share their interests in these opportunities with their academic advisor.
- The Robert A. Deshon and Karl J. Schlachter Library for Design, Architecture, Art, and Planning has an outstanding collection of books, periodicals, and visual resources supporting architecture, planning, design, art history, and related subjects. Access to library holdings is provided by an automated online catalog, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students.

Special Programs

- The urban studies program is part of the UC College of Design, Architecture, Art, and Planning (DAAP), one of the most comprehensive and well-respected colleges of art and design in the country. Enrollment in DAAP gives students the chance to benefit and learn from other disciplines in the college. Urban studies students regularly study with urban planning students, and they may also enroll periodically in interdisciplinary courses, affording the opportunity to share an area of expertise with students from different disciplines.
- Additional learning opportunities include a summer quarter abroad and exchange programs with universities in the Netherlands and Turkey. Through the university's many certificate programs (similar to a minor area of study), urban studies students can add a specialization in areas such as real estate, area studies, a foreign language, planning and historic preservation.
- **Computer Requirements:** All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students from different backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to students from different geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP, because the size and quality of the applicant pool varies each year.

Please visit the Admissions Office's website for more information, including application materials, requirements, deadlines, and timelines.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application. Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

Changing Majors Within UC

Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program. Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Urban Studies

BS

Urban Studies

Duration: 4 Years
Minimum Credits: 120 Credits

Fall Semester Year 1

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
HIST2026	Cities in American History	3
URBN1001	Introduction to Urban Studies	3
HIST BoK: HP	Historical Perspectives (HIST)	3
	Foreign Language Choose any foreign language, must have two semesters of same language	3
Free Electives	Free Elective	3

Spring Semester Year 1

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
ENGL1001	English Composition	3
PD2070	Professionalism and Purpose	3
URBN1061	Understanding Urban Communities	3
URBN2045	Statistics for Urban Settings	3
	Foreign Language Choose any foreign language, must have two semesters of same language	3

Urban and International Focus Electives

Students should consult with their Urban Studies Advisor when selecting Urban Focus and International Focus electives.

Fall Semester Year 2

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
CLAS2012	Pompeii: The Life and Death of an Ancient City	3
PLAN2002	Foundations for Planning Urban Economies	3
	Urban Focus Elective	3
BoK: FA	Fine Arts	3
BoK: NS	Natural Sciences	3

Spring Semester Year 2

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
SOC3045	Urban Society	3
URBN2054	Introduction to Geographic Information Systems	3
	Urban Focus Elective	3
	American Civic Literacy HIST1001, HIST1100, POL1010, or POL1045	3

Fall Semester Year 3

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
POL3025	Law and Inequality in the City	3
Free Electives	Free Elective	3
	Urban Focus Elective	3
	Urban Focus Elective	3
	International Focus Elective	3

Spring Semester Year 3

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
GEOG3045	Urban Geography and Environmental Equity	3
URBN3045	Methods of Research	3
URBN3051	Urban Spatial Structures	3
URBN5135	Environmental Systems, Issues and Policies	3
	Urban Focus Elective	3

Fall Semester Year 4

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
URBN5150	Housing Systems	3
	International Focus Elective	3

Spring Semester Year 4

Students will complete 15 credit hours of coursework.

Course	Title/Desc	Credit
URBN4099	Senior Capstone: Urban Futures, innovation and the Public Good	3

Course	Title/Desc	Credit
	Urban Focus Elective	3
Free Electives	Free Elective	3
Free Electives	Free Elective	3

Course	Title/Desc	Credit
URBN5179	Social Justice and the City	3
	Urban Focus Elective	3
	Urban Focus Elective	3
Free Electives	Free Elective	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Architecture

Duration: **4 Years** Total Credits: **120** Award: **BSARCH**

Overview

Four-Year Pre-Professional Degree

The Bachelor of Science in Architecture (BS-Arch) degree is composed of seven academic semesters and three cooperative (co-op) semesters within four years of undergraduate education. Students are educated in design, construction technologies, digital arts, the humanities, social sciences, and aesthetic expression. Architecture is the culturally responsible design and production of buildings that are useful, durable, meaningful, inspiring, and responsive to their physical and social contexts. Architecture is an art, a technical craft and an ethical practice. Students reinforce their skills in the field through several co-op semesters that offer students the opportunity to work full-time in an architecture firm either locally, nationally, or internationally.

The pre-professional BS Arch degree creates the foundation in the field of architecture as preparation for continued education in a NAAB accredited degree program.

Success

People who are successful in architecture tend to have visual and kinesthetic/tactile learning styles. The design of a building involves the synthesis of a variety of diverse requirements and values into a coherent creation. Among such requirements and values are functional suitability, aesthetics, technical performance, economic resources and constraints, social and cultural issues, environmental concerns and human comfort.

Architects must be intrigued by the design of buildings, enjoy putting things together, and not be intimidated by the need to generate alternate solutions to complex problems. They must possess strong communication skills and be comfortable in meeting with many different types of people, as well as being attentive listeners. Architects must have excellent time- and project-management skills, and understand business planning. They need to know how to create informative and persuasive proposals and maintain good client relationships.

Career

The pre-professional BS-Arch degree creates the foundation in the field of architecture as preparation for continued education in a NAAB accredited degree program. Students are also prepared for entry-level employment in architecture and in fields related to architecture, such as construction management, interior design, environmental design, theater set design, real estate development, and digital fabrication and animation.

Advising

Prospective students are encouraged to explore the information on our website and contact DAAP Student Affairs at 513-556-1376 or daap-admissions@uc.edu with questions. The Transfer and Transition Advising Center is available to assist prospective transfer and transition students. Current DAAP students are assigned an academic advisor based on their major/program. For more information on DAAP advising, please visit the DAAP Undergraduate Advising webpage.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.

- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include study abroad and minor and certificate programs within the college and the university. Students are encouraged to share their interests in these opportunities with their academic advisor
- The Robert A. Deshon and Karl J. Schlachter Library for Design, Architecture, Art, and Planning has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalog, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students.

Special Programs

- **Co-op Education:** Co-op (also called professional practice or cooperative education) gives special character to architectural education at the University of Cincinnati, which invented the concept of co-op 100 years ago. Salaried practical experience arranged from a roster of over 500 firms all over the U.S. and overseas complements students' growing academic understanding of the discipline. Our graduates' advanced professional experience and self-reliance make them singularly valuable to employers. Moreover, state licensing boards grant them substantial credit toward the three years of internship that are required to take the architectural registration examination.
- **Computer Requirements:** All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students of varied and diverse backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to students from different backgrounds, geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. In addition to the required application materials, students who apply to Architecture may submit an optional portfolio. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP because the size and quality of the applicant pool vary each year.

Special Course Requirements: Architecture and Interior Design require four years of high school math (including pre-calculus or calculus) and one year of physics. College-level course work is also acceptable. Students lacking one of these requirements may be offered conditional admission.

Effective for Fall 2025, first year students (i.e., those applying from high school) are no longer able to submit an optional portfolio as part of the undergraduate admissions process. Note: Transfer and transition applicants who include Architecture or Interior Design will be invited to submit an optional portfolio for admission consideration.

Please visit the Admissions Office's website for more information, including application materials, requirements, deadlines, and timelines.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application. Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

Changing Majors Within UC

Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program. Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Graduation Requirements

To earn a BS in architecture, students must complete 126 credit hours. They also must receive satisfactory evaluations for three semesters of professional practice (co-op). To be eligible for graduation they must achieve a minimum overall grade point average of 2.0 (C) and maintain at least a 2.0 grade point average in the final year. Graduation with honors requires a 3.6 grade point average. Courses in physical education, performance and ROTC are not accepted as elective credits toward degree requirements in architecture.

Application Deadlines

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The architecture program of the University of Cincinnati has been accredited by the National Architectural Accrediting Board (NAAB) continuously since 1948, and its courses satisfy requirements maintained by various state architectural registration boards.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The NAAB, which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the bachelor of architecture, the master of architecture, and the doctor of architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. Students with an undergraduate degree in disciplines other than architecture may also seek an accredited master's degree. The pre-professional undergraduate degree is not, by itself, recognized as an accredited degree.

Communication Design

Duration: **5 Years** Total Credits: **120** Award: **BSDES**

Overview

Communication Designers give visual form to information, ideas, and feelings. They inform, persuade, educate, and entertain using typography, photography, drawing, video/animation, audio, storytelling, interaction, and space. Communication designers increasingly collaborate with other fields to help meet human needs.

At the University of Cincinnati, Communication Design students receive a foundation in visual problem-solving. The core of the curriculum is a series of sequential design studios. These courses help students develop critical and visual thinking along with essential design processes. Students also have opportunities to further develop in specific areas of interest (including graphic design, interaction design, and motion design). Students reinforce their skills in the field through several co-ops.

Professional communication designers build careers wherever communication is important. Designers often work for design firms, internal design teams, or as independent freelancers. They have career opportunities in advertising, branding and corporate identity, digital product design, exhibit design, interface design, motion graphics and post-production design, package design, service design, user experience design, and web design. Today's designers may be found working in the healthcare system or for governments and NGOs impacting society. Established designers may create their own firms or pursue entrepreneurial activities. Regardless of their career, almost every designer works on behalf of an interested party (or client) and an audience, identifying specific problems and helping fulfill the needs of both groups.

Success

People who are successful in communication design tend to have visual and kinesthetic/tactile learning styles. Communication designers are creative, imaginative and artistic, and possess good hand-motor skills. They are methodical and process-oriented in approaching their work, exercising good time- and project-management skills. They critically analyze the things they see and contemplate. Communication designers have an enormous curiosity about learning different things. They must possess strong communication skills, and they need to know how to create informative and persuasive proposals while maintaining good client relationships.

Career

Communication Design career opportunities include the design of advertisements, exhibitions, publications, visual identity systems, packaging, posters, websites, branding systems, books, signs, magazines, environmental designs, and video messages. They may be identified as communications designers, visual designers or graphic designers; and they may work in art direction and design consultation. Students may find employment with a private or public organization or a design agency. Some choose to work on a freelance basis.

Students focusing on interaction or motion design are prepared to work in a variety of capacities. They are most likely to work for digital design firms to develop structural and functional information architecture for interactive and immersive environments. Students could design educational and/or game applications; develop networked communications design for the Internet; create 3-D animation, film effects and virtual reality applications, such as product walk-arounds and building fly-throughs; applications for smart phones or tablets; work independently or as members of a multidisciplinary team (which may include illustrators, designers, sound engineers, videographers, photographers, writers, filmmakers, management personnel, etc.).

Advising

Prospective students are encouraged to explore the information on our website and contact DAAP Student Affairs at 513-556-1376 or daap-admissions@uc.edu with questions. For assistance, prospective transfer students can contact the Transfer Center within UC Admissions and current UC students can contact the Transition Advising Center. Current DAAP students are assigned an academic advisor based on their major/program. For more information on DAAP advising, please visit the DAAP Undergraduate Advising webpage.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Apple computers, and peripherals such as scanners, plotters and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom. All computing equipment is linked by high-speed Ethernet to facilitate access across the campus.

Special Programs

- Communication Design co-op students work for both large and small design firms, in the areas of interactive multimedia, networked communication, 3-D design and animation, areas of corporate identity, environmental graphics, print, packaging, and new media. Students begin their co-op experiences in the second semester of their sophomore year and alternate semesters of full-time work and study on a year-round calendar until the final semester of the fifth year (there is no tuition for the semesters students work). They graduate with five semesters, or a year-and-a-half, of work experience in their field.

- DAAP students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally. Faculty are innovative in transforming the art and design disciplines by applying the newest technologies. They inspire students to take advantage of interdisciplinary studio projects and work within corporate partnerships. This prepares DAAP students to practice their art and design in both local and global markets.

- Computer Requirements: All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students from a wide range of backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to students from different backgrounds, geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. Effective for Fall 2025, first-year students (i.e. those applying from high school) are no longer able to submit an optional portfolio as part of the undergraduate admissions process. Only the required application materials will be necessary. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP, because the size and quality of the applicant pool varies each year.

Please visit the Admissions Office's website for more information, including application materials, requirements, deadlines, and timelines.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application. Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

Changing Majors Within UC

Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program. Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Graduation Requirements

Students must also complete five semesters of mandatory professional practice (co-op) and receive a satisfactory (S) for all required work semesters. Students must obtain a minimum overall grade point average of 2.0. In order to be eligible for graduation with honors, a student must have completed 60 semester hours in the college and have earned at least a 3.6 grade point average.

Application Deadlines

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

All programs in the School of Design are accredited by the National Association of Schools of Art and Design (NASAD).

Studio Courses Grade Requirement

If a student receives a D+ (or below) grade in two required design studio courses, the second studio in which a D+ (or below) grade is received must be repeated before the student can progress further in the School of Design.* The student may continue to take General Education Requirements and Electives in the interim.

If the student receives a second D+ (or below) grade in the repeated course(s), they will be suspended from the School of Design and must apply for readmission.**

* If the two D+ (or below) grades are received in the same term, the student is required to repeat both courses. It is highly recommended the student participate in a faculty consultation prior to making future enrollment decisions (The consultation is not an opportunity for the student to appeal their grades).

** Students are allowed to apply for readmission a maximum of two times.

See an academic advisor for the list of studios affected by the grading policy.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Fashion Design

Duration: **5 Years** Total Credits: **122** Award: **BSDES**

Overview

The Fashion Design provides a platform for discovery, experimentation, and specialization by way of a strong foundation in critical and cultural theory, experiential learning, craftsmanship, technological literacy, and sustainable stewardship with opportunities for students to author their individual curricular pathway through elective coursework.

The Fashion Design program prepares students with the creative and technical skills necessary to understand the design principles of aesthetic and function. Through foundational course work in fashion communication, drawing, technical pattern drafting, draping, and construction, students are equipped with skills and abilities to pursue personalized interests in fashion. Through elective coursework, students build upon this foundation in specialized areas of emphasis, including fashion theory, advanced craft, digital design and development, and sustainability.

Success

People who are successful in fashion design tend to have visual and kinesthetic/tactile learning styles. Fashion designers are creative, imaginative, and artistic. They are able to understand the design process as it relates to the three-dimensional form of the garment. Fashion designers are able to sketch, design, plan, and execute a garment at a high-quality level, paying attention to the function (movement, wear, draping) as well as the beauty of the garment. They love the challenge of a fast-paced, trend-driven business that merges creativity with marketplace opportunities.

People who work in this field must have good communication skills, have excellent time- and project-management skills, and understand business planning. They enjoy working in creative teams to understand the consumer's wants and needs and to develop that fashion product for wholesale and retail brands.

Career

The $2.5-3.0 trillion industry employs millions of people globally, presenting great opportunities to work in the world of fashion. Fashion designers operate in several unique segments of the industry, including womenswear, menswear, children's wear, knitwear, footwear, and accessories. Current employee listings for fashion designers (in addition to those listed above) include job titles such as technical designer, textile designer, design director, pattern maker, fabric/trim/print researcher and developer, materials and development coordinator, production coordinator, concept and trend manager, production manager, trend forecaster, and color developer, among others. Designers sometimes choose to work in the related fields of fashion styling, retail merchandising, and marketing, as well as in countless entrepreneurial endeavors.

Majoring

All design majors (Communication, Fashion, Industrial) complete a five-year program of study culminating with a Bachelor of Science Degree in Design. Students study for a total of eight semesters in the classroom and co-op in professional practice for five semesters. After the first year (Summer semester off) students either work or study year-round (Fall, Spring and Summer semesters). Fashion students graduate with 122 credit hours of classroom work that is design-studio focused but complemented with general education requirements, topical lecture courses in design and electives.

Minoring

The School of Design offers an 18-credit-hour Fashion Design Studies minor. A minor in fashion design studies provides the underpinning history and theories of fashion design as a progenitor of a social and material culture that is integrated within and reflective of the essence of time, place, and people. The contemporary and multi-media practice of the fashion design industry is introduced and explored.

Students must have a university cumulative GPA of at least 3.0. Admission to the minor is limited. Students can apply by filling out the DAAP Application for Admission form and submitting it to the DAAP Student Affairs Office, 5470 Aronoff.

Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Architecture students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include organized travel semesters, foreign study semesters.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Apple computers and peripherals such as scanners, plotters and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom. All computing equipment is linked by high-speed Ethernet to facilitate access across the campus.

Special Programs

- Fashion design co-op students work for both small design firms and large businesses across the country in the areas of design, technical design and product development. Students begin their co-op experiences in the second semester of their sophomore year and alternate semesters of full-time work and study on a year-round calendar until the final semester of the fifth year (there is no tuition for the semesters when students work). They graduate with five semesters, or a year and a half, of work experience in their field.

- DAAP students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally. Faculty are innovative in transforming the art and design disciplines by applying the newest technologies. They inspire students to take advantage of interdisciplinary studio projects and work within corporate partnerships. This, along with a broad liberal arts background, prepares DAAP students to practice their art and design in both local and global markets.

- Computer Requirements: All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students from a wide range of backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to students from different backgrounds, geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. Effective for Fall 2025, first-year students (i.e. those applying from high school) are no longer able to submit an optional

portfolio as part of the undergraduate admissions process. Only the required application materials will be necessary. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP, because the size and quality of the applicant pool varies each year.

Please visit the Admissions Office's website for more information, including application materials, requirements, deadlines, and timelines.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application.

Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

Changing Majors Within UC

Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program.

Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Graduation Requirements

All students accepted into the School of Design must take the first-year curriculum as outlined on the foundation studies curriculum guide. Fashion design students must complete a total of 126 credit hours for graduation. Students must also complete five semesters of mandatory professional practice (co-op) and receive a satisfactory (S) for all required work semesters. Students must obtain a minimum overall grade point average of 2.0. In order to be eligible for graduation with honors, a student must have earned at least a 3.6 grade point average and complete a set number of credits within the college.

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

All programs in the UC School of Design are accredited by the National Association of Schools of Art and Design (NASAD).

Studio Courses Grade Requirement

If a student receives a D+ (or below) grade in two required design studio courses, the second studio in which a D+ (or below) grade is received must be repeated before the student can progress further in the School of Design.* The student may continue to take General Education Requirements and Electives in the interim.

If the student receives a second D+ (or below) grade in the repeated courses(s), they will be suspended from the School of Design and must apply for readmission.**

*If the two D+ (or below) grades are received in the same term, the student is required to repeat both courses. It is highly recommended the student participate in a faculty consultation prior to making future enrollment decisions. (The consultation is not an opportunity for the student to appeal their grades.)

**Students are allowed to apply for readmission a maximum of two times.

See an academic advisor for the list of studios affected by the

grading policy.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Industrial Design

Duration: **5 Years** Total Credits: **122** Award: **BSDES**

Overview

Industrial design is concerned with the appearance and usefulness of manufactured goods. Industrial designers work on a wide array of products, from cars to shoes to medical equipment to toys. Product design involves the synthesis of a variety of requirements and values into a coherent creation. Among such requirements and values are functional suitability, aesthetics, technical performance, economic resources and constraints, social and cultural issues, environmental concerns and human comfort.

In UC's industrial design program, students learn to emphasize the humanistic qualities of products of mass production with special consideration for comfort, safety and visual satisfaction which they may bring to the users. In a curriculum balanced between academic and studio requirements, students are able to develop creativity, visual communication skills, hands-on experience with technology, and the ability to conduct design research in interdisciplinary collaboration. The program promotes critical thinking and innovative solutions for the future through strategic research with an emphasis and understanding of global impact, sustainability and collaborative partnerships. Industrial design students apply the highest standards of conceptual sophistication, aesthetics and craftsmanship at every level of study.

In the third year, students choose to focus on product design or mobility systems design.

The Bachelor of Science in Industrial Design program has the approved CIP code 11.0105: Human-Centered Technology Design, which makes the program a recognized STEM degree program. STEM designation makes our students eligible for STEM specific Scholarships, 24-month OPT extension for International Students, and expanded GI benefits for Student Veterans.

Success

People who are successful in industrial design have visual and kinesthetic/tactile learning styles. Industrial designers must be intrigued by how things work, enjoy putting things together and not be intimidated by the need to generate alternate solutions to complex problems. Product design involves the synthesis of a variety of requirements and values into a coherent creation. Among such requirements and values are functional suitability, aesthetics, technical performance, economic resources and constraints, social and cultural issues, environmental concerns and human comfort. They must be attentive listeners, possess strong communication skills and be comfortable interacting with many different types of people. Industrial designers must have excellent time- and project-management skills, and must understand business planning. They need to know how to create informative and persuasive proposals and maintain good client relationships.

Career

Industrial designers are employed where products are planned for mass production. Since many goods are mass produced, there is a wide range of opportunities. Jobs have traditionally been divided into fields: (1) as a consultant or (2) on the design staff of a corporation.

Furniture, appliances, housewares, electronic equipment, tools, toys and packaging are considered consumer products and nearly always require industrial design services while being developed for manufacturing and marketing. Other items not meant for the consumer market such as machine tools, medical equipment, business machines and displays are also designed by industrial designers.

Transportation design includes automobiles, hybrid vehicles, semitrailer trucks, trains, airplanes, water craft, and transportation systems. Special consideration is given to the exterior aesthetic, interior environment, comfort, functionality, safety and customer needs. Transportation industrial designers manage the creation of new concepts through the design process, which includes concept proposal, 3-D development and production release.

Advising

Prospective students are encouraged to explore the information on our website and contact DAAP Student Affairs at 513-556-1376 or daap-admissions@uc.edu with questions. Prospective transfer students can learn more from transfer in the Office of Admissions and current UC students interesting in changing majors can contact the Transition Advising Center. Current DAAP students are assigned an academic advisor based on their major/program. For more information on DAAP advising, please visit the DAAP Undergraduate Advising webpage.

UC Advantages And Special Opportunities

- The Bachelor of Science in Industrial Design program has the approved CIP code 11.0105: Human-Centered Technology Design, which makes the program a recognized STEM degree program. STEM designation makes our students eligible for STEM specific Scholarships, 24-month OPT extension for International Students, and expanded GI benefits for Student Veterans.
- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta, and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Architecture students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include organized travel semesters, foreign study semesters and student exchange programs in England, Germany and Denmark.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history, and related subjects. Access to library holdings is provided by an automated online catalog, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Apple computers and peripherals such as scanners, plotters, and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom. All computing equipment is linked by high-speed Ethernet to facilitate access across the campus.
- The college supports a Rapid Prototyping Center, which is the home of state-of-the-art equipment that allows students to create communication aids for their design projects. Using CAD (computer-aided design) models, students are able to create physical models using three basic methods: 3-D printing, large format laser-cutting, and CNC (computer numeric control) devices, including a Komo CNC Router. This facility is intended for all DAAP students to use in creating large-scale design.

Special Programs

- Industrial design students work for both small design firms and large businesses across the country in the areas of product and transportation design. Students begin their co-op experiences in the second semester of their sophomore year and alternate semesters of full-time work and study on a year-round calendar until the final semester of the fifth year (there is no tuition for the semesters when students work). They graduate with five semesters, or a year-and-a-half, of work experience in their field.
- DAAP students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally. Faculty are innovative in transforming the art and design disciplines by applying the newest technologies. They inspire students to take advantage of interdisciplinary studio projects and work within corporate partnerships. This, along with a broad liberal arts background, prepares DAAP students to practice their art and design in both local and global markets.

- Computer Requirements: All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students from a wide range of backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to

students from different backgrounds, geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. Effective for Fall 2025, first-year students (i.e. those applying from high school) are no longer able to submit an optional portfolio as part of the undergraduate admissions process. Only the required application materials will be necessary. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP, because the size and quality of the applicant pool varies each year..

Please visit the Admissions Office's website for more information, including application materials, requirements, deadlines, and timelines.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application. Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

Changing Majors Within UC

Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program. Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Graduation Requirements

All students accepted into the School of Design must take the first-year curriculum as outlined on the foundation studies curriculum guide. Industrial design students must complete a total of 126 credit hours for graduation. Students must also complete five semesters of mandatory professional practice (co-op) and receive a satisfactory (S) for all required work semesters. Students must obtain a minimum overall grade point average of 2.0. In order to be eligible for graduation with honors, a student must have completed 60 semester hours in the college and have earned at least a 3.6 grade point average.

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Students who apply by November 1 also receive maximum scholarship consideration. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

All programs in UC's School of Design are accredited by the National Association of Schools of Art and Design (NASAD).

Studio Courses Grade Requirement

If a student receives a D+ (or below) grade in two required design studio courses, the second studio in which a D+ (or below) grade is received must be repeated before the student can progress further in the School of Design.*

If the student receives a second D+ (or below) grade in the repeated course(s), they will be suspended from the School of Design and must apply for readmission.**

* If the two D+ (or below) grades are received in the same term, the student is required to repeat both courses. It is highly recommended the student participate in a Program Coordinator consultation prior to making future enrollment decisions.

** Students are allowed to apply for readmission a maximum of two times.

See an academic advisor for the list of studios affected by the grading policy.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Interior Design

Duration: **5 Years** Total Credits: **126** Award: **BSID**

Overview

Interior Design practice creates useful, meaningful and inspiring spaces within buildings. It provides for the physical and cultural needs and aspirations of people at work and leisure. The Bachelor of Science in Interior Design program prepares graduates for a critical engagement with practice through an academic and professional grounding in problem-solving, formal design skills and pertinent historical and technical knowledge. The program forms strong links with our Architecture program at DAAP, starting with a common curriculum in the first three semesters.

Interior designers execute projects for the whole spectrum of human activities. Examples include business and commercial establishments (offices and shops), places for recreation and hospitality (hotels, restaurants, resorts), health and cultural institutions (hospitals, schools, theaters, museums, places of worship), and residential interiors.

Success

People who are successful in the interior design field typically have visual and kinesthetic/tactile learning styles. Interior designers are creative, imaginative and artistic, as well as disciplined and highly organized. They enjoy putting things together. Combining technical knowledge (involving structural requirements, materials and products) with aesthetic vision, interior designers work with clients and other design professionals to develop design solutions that are safe, functional, attractive and meet the needs of the people using the space.

Successful interior designers must possess strong communication skills and be comfortable in meeting with many different types of people, as well as being attentive listeners. Interior designers must have excellent time- and project-management skills, and must understand business planning. They need to know how to create informative and persuasive proposals and maintain good client relationships.

Career

The term *interior design* is often confused with *interior decoration*. The latter term refers to the selection of finishes and furniture; it is concerned with surface treatments. UC graduates enter the practice of interior design, which addresses interior space planning and experiential space sequences in addition to designing and specifying materials, lighting and furnishings. Most graduates work in interior design and/or architecture firms, which often employ other design professionals as well.

While the great majority of these offices have fewer than 10 employees who typically assume a wide range of responsibilities, interior designers in large firms may focus on more specialized roles such as design, technical support, business management and marketing, facility programming or historic preservation. An interior design degree can also lead to a career as a facility programmer, computer software designer, facility manager or university teacher.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

Interior design is not offered as a minor.

Advising

Prospective students are encouraged to explore the information on our website and contact DAAP Student Affairs at 513-556-1376 or daap-admissions@uc.edu with questions. The Transfer and Transition Advising Center is available to assist prospective transfer and transition students. Current DAAP students are assigned an academic advisor based on their major/program. For more information on DAAP advising, please visit the DAAP Undergraduate Advising webpage.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch

symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include study abroad and minor and certificate programs within the college and the university. Students are encouraged to share their interests in these opportunities with their academic advisor.
- The Robert A. Deshon and Karl J. Schlachter Library for Design, Architecture, Art, and Planning has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students.

Special Programs

- Co-op (also called professional practice or cooperative education) gives special character to interior design education at the University of Cincinnati, which invented the concept of co-op 100 years ago. Salaried practical experience arranged from a roster of over 500 firms all over the U.S. and overseas complement students' growing academic understanding of the discipline. UC interior design graduates' advanced professional experience and self-reliance makes them singularly valuable to employers. Interior design students integrate five semesters of work experience in their five-year curriculum in cities all over the country and overseas. Most are employed by interior design and/or architecture firms, but they also work in other design-related offices, public agencies and commercial companies.

- Computer Requirements: All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

The College of Design, Architecture, Art, and Planning at the University of Cincinnati seeks to attract, enroll, and graduate academically talented students of varied and diverse backgrounds. Success in our programs is largely dependent upon sound academic preparation. In multidisciplinary programs like those in DAAP, students' insight and perspective are greatly enhanced by exposure to students from different backgrounds, geographies, and co-curricular interests. DAAP has an admissions review process to support these goals. In addition to the required application materials, students who apply to Interior Design may submit an optional portfolio. Please note that it's impossible to predict – or guarantee – what credentials a student will need to gain admission into DAAP, because the size and quality of the applicant pool vary each year.

Special Course Requirements: Architecture and Interior Design require four years of high school math (including pre-calculus or calculus) and one year of physics. College-level coursework is also acceptable. Students lacking one of these requirements may be offered conditional admission

Effective for Fall 2025, first year students (i.e., those applying from high school) are no longer able to submit an optional portfolio as part of the undergraduate admissions process. Note: Transfer and transition applicants who include Architecture or Interior Design will be invited to submit an optional portfolio for admission consideration.

Please visit the Admissions Office's website for more information, including application materials, requirements, deadlines, and timelines.

Transferring To UC

Students seeking to transfer from another regionally accredited university or college must be in good standing to be considered for admission. Students wishing to transfer into a DAAP program should submit a Transfer Application. Transfer students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

Changing Majors Within UC

Students seeking to transfer from other colleges and programs at UC must be in good standing to be considered for admission. Students wishing to transition into a DAAP program should submit an Application for Change in College and Program. Transition students are generally admitted to the first year of our studio-based, co-op programs due to the sequence of studios and co-op. For further information such as minimum grade point average and application deadlines, please refer to the DAAP Transfer and Transition webpage.

International Student Requirements

Please visit the university's Office of Admissions website for general admissions information and application requirements for international students.

Graduation Requirements

Students must complete lecture hours and studio hours for a total of 130 credit hours for graduation. Students must also complete five semesters of mandatory professional practice (co-op) and receive a satisfactory (S) for all required work semesters. Students must obtain a minimum overall grade point average of 2.0 and, in addition, must have at least a 2.0 grade point average for the senior year to be eligible for graduation. In order to be eligible for graduation with honors, a student must have completed 60 semester hours in the college and have earned at least a 3.6 grade point average. Courses in physical education, performance, and ROTC are not accepted as elective credits toward degree requirements in interior design.

Application Deadlines

Application Deadlines

High school applicants who submit a complete application by the November 1 Early Action deadline will be pooled and reviewed for selection. Early Action applicants can expect to learn their admission decision on Cincinnati Decision Day. This date varies by year and is shared on the university's Office of Admissions website. Applications received after November 1 may be considered on a space-available basis.

Students seeking to transfer from other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The interior design program leading to the Bachelor of Science in Interior Design is accredited by the Council for Interior Design Accreditation, www.accredit-id.org, 206 Cesar E. Chavez Ave SW, Suite 350, Grand Rapids, MI 49503.

The CIDA-accredited program prepares students for entry-level interior design practice, for advanced study, and to apply for membership in professional interior design organizations. The Bachelor of Science in Interior Design granted by the College of Design, Architecture, Art, and Planning at the University of Cincinnati meets the educational requirement for eligibility to sit for the National Council for Interior Design Qualification Examination (NCIDQ Exam). For more information about NCIDQ Exam eligibility visit: https://www.cidq.org/eligibility-requirements.

The Bachelor of Science in Interior Design program is accredited by the National Association of Schools of Art and Design (NASAD).

ARCH INTD	Professional Elective To develop greater understanding of chosen/related discipline. Any non-studio course in INTD or ARCH and selected School of Planning courses; such courses may require permission of the instructor.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Urban Planning

Duration: **5 Years** Total Credits: **120** Award: **BUP**

Overview

Urban planning and management are key municipal functions in the United States and Western Europe. In the rapidly growing developing world, urban expansion has far outstripped the capacity of city governments to cope with the bewildering array of problems this mass movement and spatial reorganization of the population generates. Huge, difficult-to-manage, multi-centered megacities continue to emerge worldwide, along with the proliferation of thousands of other smaller cities. Nevertheless, the attraction of urban life has never been greater. With more than 50 percent of the world's population living in cities at the turn of the century, the 21st century will be the world's first truly urban era.

The challenge this urbanized world poses is the substance of the planning profession. Planners are dedicated to developing innovative approaches to managing cities and planning their development. The constructive management of change is at the heart of the profession. Planners often work in local governments and communities, but their concerns are issues that affect the world — land use, social policy, historic preservation, transportation, housing, economic development, policy planning, environmental protection, urban design and international development. Planners are visionaries working for a better future through improvements in the quality of life in one or more of these areas.

Success

People who are successful in urban planning typically have visual and kinesthetic/tactile learning. They possess an interest in design combined with a heightened social consciousness. Urban planners are people-oriented. They possess strong communication skills and are comfortable in meeting with many different types of people, as well as being attentive listeners. Urban planners are interested in multidisciplinary issues and enjoy working collaboratively. Many seek international opportunities.

Career

Urban planners develop solutions for many of society's most pressing problems, providing a variety of services to cities, towns, states, regions and private clients interested in changing their physical, economic or social structures. A planner may generate plans to house the poor, create jobs, design public parks, preserve historic buildings or resolve traffic congestion and environmental problems.

The future is bright in the field of planning. Graduates go on to both private- and public-sector jobs. Opportunities continue to grow, and salaries remain competitive. Additionally, planning graduates are often given significant professional responsibility and challenges quite early in their careers.

Additional career options are listed on the Center for Exploratory Studies website.

Minoring

While there is not a minor in urban planning, students may choose to earn a certificate in one of the following programs: urban planning, urban design, or historic preservation.

Students interested in applying to a certificate program must submit a completed application to the DAAP Student Affairs Office, 5470 Aronoff.

The certificate in planning gives students skills in the planning way of thinking, essential in business, industry, public service and the arts. Students are given specific skills that are grounded in specific theories. A proficiency in basic statistics is required at the time of admission or shortly thereafter.

The certificate of historic preservation is open to degree candidates in the College of Design, Architecture, Art, and Planning and the College of Arts and Sciences. This program is designed to develop an appreciation for and a working knowledge of the issues and techniques involved in historic preservation.

- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students.

Special Programs

- The University of Cincinnati's School of Planning is the only urban planning program in the country which requires a cooperative education experience. Urban planning students work for both small and large businesses across the country. Students begin their co-op experiences during their sophomore year, and alternate semesters of full-time work and study on a year-round calendar until the final semester of the fifth year (there is no tuition for the semesters students work). They graduate with five semesters, or a year and a half, of work experience in their field.
- The School of Planning offers several alternative educational experiences available to its students. One is an exchange program wherein students may enroll for one semester in another academic institution either here or abroad. Formal programs exist in the Netherlands and in Turkey.
- **Computer Requirements:** All undergraduate students in this program are required to purchase a personal laptop computer. Each discipline has its own specific recommendations for hardware and software. Please note that these recommendations may be slightly altered as equipment evolves. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many of our programs have additional technology requirements for students in the later years of study.

Admission Requirements

Art Education

Duration: 2 Years Total Credits: 75 Award: MA

Overview

The Master of Arts in Art Education is a bold summer intensive graduate degree designed to advance the professional careers of artists and educators who are committed to democratizing access to high-quality arts education in various settings that include schools, museums, and galleries, as well as community and cultural organizations.

Leveraging the expertise in creative thought and action at the College of Design, Architecture, Art, and Planning (DAAP), the Master of Arts in Art Education prepares today's teachers and future educators to address ongoing educational challenges.

The program is designed to be completed in four semesters, encompassing two intensive 4-week on-campus summer sessions that are complemented by online courses. Seeking to accommodate the schedule of teaching professionals, this summer intensive format enables deep engagement with studies during the months when educators are typically not teaching.

The curriculum and related experiences promote student engagement with three core aspects of the program:

- MAKING is foundational in art education research and practice. It's a process that involves conceptualizing ideas, creating meaningful art, designing learning experiences, and establishing transformative relationships. Students will have many opportunities to practice making in this program, from creating visual reflections of their own learning experiences, and investigating contemporary and traditional approaches to art-making in studio courses, to connecting artistic and research practices through *arts-based research* (ABR). These experiences are intended to model current, rich, and in-depth ways to learn about and through the arts.
- CONNECTING refers to *creating knowledge* and establishing *strategic partnerships*. One of the goals of the program is to enhance students' understanding of the possibilities of art education today by expanding knowledge about art opportunities and resources in our community. Students will be encouraged to create new links among ideas, concepts, and art experiences, as well as between organizations and individuals. This process can energize professional practice and have the impact of transforming future art educator careers.
- LEADING is the intended outcome of completing this program. The transformational learning, *mentorship*, and *professional community* students will experience in this program seek to prepare discerning, strategic, and visionary art educators who will shape future art learning. Leading with creativity and imagination, our graduates are uniquely prepared to harness the power of art to address current issues and promote change.

The 30 credit hour MA degree capitalizes on synergistic relationships among teaching, arts-based research (ABR), and partnerships with community, school, and industry collaborators. A customizable curriculum allows students to tailor their studies to pursue specific interests such as museum studies, creative pedagogy, international arts education, arts writing, and more. Connecting art and education theory with experiential learning, the program prepares individuals to be effective teachers, lifelong learners, flexible thinkers, and creative problem-solvers.

Notable features of the Master of Arts in Art Education program include:

1. Dedicated making and learning space for graduate student cohort DAAP Annex;
2. Innovative course schedule and summer intensive format conducive to teachers and other professionals' work commitments.
3. Graduate students are part of a cohort and mentored by distinguished art education faculty;
4. Advantageous location within the College of DAAP, situated within Research I University with world-class faculty and state of the art facilities;
5. Experiential learning emphasis includes connections with our regions' rich arts organizations and UC's powerful cooperative education platform.

Ohio Licensure Option

The Master of Arts in Art Education degree may be integrated with the 42 credit-hour Ohio Visual Arts Licensure Program. Some graduate-level licensure courses may be applied toward the requirements for the MA in Art Education degree.

Success

Graduates of the Master of Arts in Art Education Program will be able to:

Institute *Innovative Pedagogy* to develop creative ways to teach, not just art content, but integrated visual arts techniques into other fields including the STEM disciplines, and technology.

Demonstrate ***Teaching and Research Skills*** that don't just translate, but *transform* the world via arts-based research, collaboration, and reflective practices to actively solve problems and implement real-world solutions.

Establish the ***Practice of Agency*** to be critically reflective and responsive educators, designers, artists, directors, innovators, entrepreneurs, and developers.

Exemplify a ***Collaborative Ethos*** to create an 'open-thinking' mindset to teach and work with varied stakeholders across disciplinary lines, forming innovation teams in industry settings and entrepreneurial situations.

Promote leadership in ***Creative Teaching and Inquiry***. Recognize and establish education and inquiry practices in multiple settings in industry and academia and become thought leaders for organizations.

Generate Spaces of ***Critical Education Play*** by creating teaching and learning spaces or 'laboratories' (innovation spaces, maker spaces, hackerspaces, etc.) that support the development of creative teaching and research.

Career

Master of Arts in Art Education graduates will emerge from the program as versatile, creative practitioners with the capacity to transform society as drivers and leaders of change (political, social, economic, and technological). Career opportunities include: teaching in public and private schools (PreK-12 - University); teaching in after-school art and design outreach programs; engaging in short- and long-term artist educator residencies; teaching in museums and community centers; leading community engagement and activism projects; teaching the use of cutting edge creative technology; overseeing community maker/hacker spaces as pedagogical and technological leaders; establishing creative community centers to engage in educational projects (e.g. Elementz, Leaves of Learning, Hive 13, etc.); teaching in creative healthcare and aging centers; conduct creative curriculum design for organizations and business; designing websites and online programs; developing and implementing public art projects and many others.

Over 16,000 DAAP graduates have entered the workforce as inventive thinkers and out-of-the-box creators who are making innovative contributions to their respective fields locally and around the world.

Curriculum

The 30 credit hour MA degree capitalizes on synergistic relationships among teaching, arts-based research (ABR), and partnerships with community, school and industry collaborators. A customizable curriculum allows students to tailor their studies to pursue specific interests such as museum studies, creative pedagogy, international arts education, arts writing, and more through 12 credit hour certificates in focal areas of study. Connecting art and education theory with experiential learning, the program prepares individuals to be effective teachers, lifelong learners, flexible thinkers and creative problem-solvers.

UC Advantages And Special Opportunities

Program Impact

- UC Art Education enhances art education in urban schools. Art education students teach urban students as part of their field experiences, with many choosing to teach in urban settings after graduation.

- UC Art Education collaborates with local museums. Art education students participate in a variety of museum programs and initiatives, expanding museum education opportunities in the community.

Special Programs

Strong community connections with local area schools, museums, and community organizations make community involvement a cornerstone of this program encompassing:

- Opportunities in classroom settings, and a variety of community sites, including local museums, arts organizations, and galleries.
- International community experiences to enhance students' understandings of their local communities, students can take advantage of international and exchange programs in Brazil, China, Germany, Austria, and Saudi Arabia.

Admission Requirements

The deadline for application to the Master of Arts in Art Education program and for scholarship consideration is **January 10th** of each year. The following application materials are required:

- UC Graduate Admissions Application
- Unofficial transcripts that indicate at least a bachelor's degree with a 3.0 in art, art education, and related subjects
- 3 letters of recommendation. Recommenders should be people familiar with your academic and professional abilities. The recommenders you list in your online application will receive information via email about submitting their recommendation letter online. Ask your recommenders to provide the following information:
  - who they are
  - their relationship to you
  - why they think you will succeed in the Graduate Art Education Program at the University of Cincinnati
- A current resume
- Statement of Intent. Include a statement (up to 500 words) describing the long-term goal to be met by graduate study. Include the following:
  - a general introduction to your goals for graduate study
  - introduction to the work in the portfolio
  - discussion of previous art education experiences
  - explanation of how you would like to creatively develop in graduate school
  - your professional and educational interests (e.g., arts-based research, teaching, galleries, leadership, community arts)
  - whether you are interested in teaching while in graduate school
  - What Art Education faculty do you want to work with and why?
    - Flavia Bastos
    - Vittoria Daiello
    - Kristopher Holland
- Portfolio in a single PDF file:
  - Twenty (20) images or a URL to your portfolio;
  - Portfolio Image List. Include the title of work, date of work, dimensions, and materials.
  - Samples of writing. May include poetry, prose, fiction, non-fiction, plays, graphic novels; professional writing, and other genres, including research reports, blogs, and art criticism.
- Proof of English Proficiency (International Students only)

*Applicants interested in receiving University Graduate Scholarships and Graduate Assistantships for their first year in the Master of Arts in Art Education program must also submit a letter that describes the applicant's qualifications and interest in available GA positions.

Graduation Requirements

- Successful completion of 30 semester hour credits
- Successful First-Year Review
- Successful completion of Master's Research Project or Experiential Learning Project.

Application Deadlines

Applications are open for the Summer term only. Completed applications should be received by **January 10th** for the following summer for scholarship and/or assistantship consideration. Applications are accepted through **May 1st**, but financial aid packages may not be available for late applicants. Confirmations for admission are due by March 1st.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

This program is accredited by the National Association of Schools of Art & Design (NASAD).

Architecture

Duration: 3 Years Total Credits: 64 - 99 Award: MARCH

Overview

Master of Architecture (M.Arch)

University of Cincinnati's School of Architecture and Interior Design (SAID) graduate degree in architecture is open to students who have already earned a pre-professional undergraduate degree in architecture (M-Arch II – comprised of 4 academic semesters and 1 semester of co-op experience) as well as those who received an undergraduate degree in a subject other than architecture (M-Arch I - comprised of 6 academic semesters and 2 semesters of co-op experiences).

University of Cincinnati's Master of Architecture is committed to the design and production of buildings that are useful, durable, meaningful, inspiring, and responsibly engaged with their physical, cultural, and social contexts. Architecture is a useful art, a technical craft, and an ethical practice. Cincinnati's professional, design-centered approach encompasses this range of issues, preparing graduates for licensing and a critical engagement with the world of practice. This critical spirit does not simply accept presumptions and practices at face value but examines their provenance and consequences with a wary eye and an open mind.

Co-op (also called professional practice or cooperative education) gives special character to the Master of Architecture program at University of Cincinnati. Students reinforce their skills in the field through several co-op experiences.

Success

People who are successful in architecture have visual and kinesthetic/tactile learning styles. The design of a building involves the synthesis of a variety of diverse requirements and values into a coherent creation. Among such requirements and values are functional suitability, aesthetics, technical performance, economic resources and constraints, social and cultural issues, environmental concerns, and human comfort.

Architects must be intrigued by the design of buildings, enjoy putting things together, and not be intimidated by the need to generate alternate solutions to complex problems. They must possess strong communication skills and be comfortable meeting with many different types of people, as well as being active listeners. Architects must have excellent time- and project-management skills, and understand business planning. They need to know how to create informative and persuasive proposals and maintain good client relationships.

Career

Most graduates work in architectural firms, which often employ other design professionals as well. While the great majority of architectural offices have fewer than 10 employees, who typically assume a wide range of responsibilities, architects in large firms may focus on more specialized roles such as design, technical support, business management and marketing, facility programming, or historic preservation. An architectural degree can also lead to a career in interior design, urban design and planning, engineering, construction, real estate development, or university teaching.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
MArch 1 2020
MArch 2 2020
MArch 1/MBA Dual Degree Program
MArch 2/MBA Dual Degree Program

Advising

The relatively small size of the program allows for consistent one-on-one advising with the faculty, particularly with one's studio critic. Students also meet on a regular basis with their professional practice advisor, a dedicated faculty member who facilitates students' placement into firms for their co-op assignments and who tracks their progress towards meeting the experience requirement for licensure as an architect.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch

symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum of Art, and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta, and New York City, allowing students to take advantage of the rich cultural resources of these cities as well.

- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Architecture students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include organized student exchange programs in England, Germany and Denmark. Many architecture students also pursue joint degrees and certificate programs within the college and the university.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history, and related subjects
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Macs, and peripherals such as scanners, plotters, and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom.
- The college supports a Rapid Prototyping Center, which is the home of state-of-the-art equipment that allows students to create communication aids for their design projects. Using CAD (computer-aided design) models, students are able to create physical models using three basic methods: 3-D printing, large format laser-cutting and CNC (computer numeric control) devices. This facility is intended for all DAAP students to use in creating large-scale design.

Special Programs

M-Arch/MBA Joint Degree

The joint degree for the Master of Architecture (MArch) and the Master in Business Administration (MBA) at the School of Architecture and Interior Design (SAID) and the Lindner College of Business at University of Cincinnati is intended to give students practical knowledge in each profession with an emphasis placed on skills in the logistics and design in the development fields. Students must be admitted separately to both programs. Students admitted to SAID in the three-year program may apply to the MBA in their second year in the architecture program and students in the two-year program may apply in their first year, prior to entering the final year of research and thesis.

The program seeks to promote leadership, collaboration, intellectual depth, flexibility, and innovation through design skills, technical training, and knowledge of the logistics of the economics of development. The purpose of the joint degree is to elevate professional value and develop meaningful, career-driven engagement for our graduates.

The Joint Degree for the MArch and the MBA requires admission into each degree program. Admission is open in the Fall, Spring and Summer terms.

The degree program requires the completion of 10 credit hours of Business Foundation Courses prior to enrolling in the MBA Core classes; core requirements are comprised of 12 courses for 26 credit hours.

- M-Arch Admission Requirments
- MBA Admission Requirements

Co-op Education

Co-op (also called professional practice or cooperative education) gives special character to architectural education at the University of Cincinnati, which invented the concept of co-op over 100 years ago. Salaried practical experience arranged from a roster of over 500 firms all over the U.S. and overseas complements students' growing academic understanding of the discipline. Our graduates' advanced professional experience and self-reliance make them singularly valuable to employers. Moreover, state licensing boards grant them substantial credit toward the two years of internship that are required to take the architectural registration examination. Three semesters of co-op are included in the Master of Architecture curriculum.

STEM Degree Program

The School of Architecture and Interior Design's Master of Architecture (M.Arch) has been officially designated as a STEM degree program. The STEM designation, which refers to the academic disciplines of science, technology, engineering and mathematics, will further benefit highly skilled international students who want to continue to gain work experience in their field of study in the United

States following graduation. This designation permits international students enrolled in the Master of Architecture program and studying on an F-1 visa to apply for the 24 month STEM OPT extension.

Under the OPT (Optional Practical Training) program, international students who graduate from colleges and universities in the United States can remain in the country and receive training through work experience for up to 12 months. Students who graduate from a designated STEM degree program can remain for an additional 24 months on the F-1 STEM OPT extension.

Admission Requirements

- A bachelors degree from an accredited college or university
- Unofficial transcript(s) from all colleges/universities attended
- A portfolio of creative work. The portfolio is an opportunity to demonstrate your imaginative and critical thinking talents. Creativity occurs in all fields so the content does not have to be architectural if your background is in another discipline. Written project statements to accompany visual work are usually very helpful to the committee. Portfolios are submitted through the online graduate admissions application. We do not accept hard copies of portfolios.
- Three letters of recommendation from persons who are in a position to evaluate your abilities and your potential for success as a graduate student
- A brief resume of your academic and professional experiences.
  Note: Your resume should indicate both educational and professional accomplishments.
- A two-page statement of your interest in graduate study in architecture. This should be a concise, articulate presentation of your academic and career goals, and any specific interests you have in architectural topics for graduate research and design. It should reflect your prior intellectual and professional engagement with these issues, and may also provide some additional perspective on the work illustrated in the portfolio.
- Writing sample of your best professional and/or academic writing

A student's dossier is evaluated first by a representative group of the faculty and ranked. Faculty make recommendations to the School Director and Program Director on whether students are eligible for advanced standing in the M2 two-year track or are a regular admit to the three-year M1 track.

The School Director and Program Director do an evaluation of all student submissions and make a final assessment as to which program students are admitted. A BSArch degree is required for advanced standing. All other degrees place students in the M1 track.

The following criteria are conditions for advanced standing:

- Number of credit hours for studio
- Degree of complexity of the studio problems
- Work experience
- High GPA
- Experience with digital tools
- Credit in introductory structures
- Credit in introductory building science
- Credit in introductory building construction
- Credit in a Modern Architecture History class

International Student Requirements

For applicants whose native language is not English, a TOEFL (Test of English as a Foreign Language) score of at least 100 iBT (600 paper) is common, although not a strict requirement. We also accept test results from the IELTS with scores of at least 7.0 overall band score.

Graduation Requirements

Students begin the MArch curriculum with or without advanced standing, based on their prior academic experience. These two curricular pathways are termed the M.Arch 1 and M.Arch 2 programs.

MArch 1: The complete three-year program is for students with an undergraduate degree in a discipline other than architecture. Students begin with an intensive accelerated foundation in professional skills and knowledge, coupled with a broadly interdisciplinary introduction to architecture and its role in the world. This program is three years in length.

MArch 2: Students with a B.S. in Architecture or an equivalent enter the program with one year's advanced standing and complete the degree in two years, which includes the one semester of co-op professional work experience.

Application Deadlines

Applications and all supplemental materials are due by **January 10** for the following fall. The application process begins with the online UC Graduate Admissions Application. Supplemental materials are to be submitted online through the application process. Applicants are typically notified in late March or early April, but the admissions process can extend into May and June.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

NAAB Conditions and Procedures

University of Cincinnati's Master of Architecture program is accredited by the National Architectural Accrediting Board (NAAB). NAAB Conditions and Procedures (2020 edition) are accessible to all students, faculty, and the public. Learn more about the current NAAB Conditions and Procedures for Accreditation.

Architecture Program Reports (APRs) and Related Documents

To promote transparency in the process of accreditation in architecture education the following documents are made available to all students, faculty, and the public.

Community Planning

Duration: **2 Years** Total Credits: **45** Award: **MCP**

Overview

The challenge this urbanized world poses is the substance of the planning profession. Planners are dedicated to developing innovative approaches to managing cities and planning their development. The constructive management of change is at the heart of the profession. Planning is growing in importance throughout the country, and the number of planners is rising rapidly.

Planners often work in local governments and communities, but their concerns are issues that affect the world - land use, social policy, historic preservation, transportation, housing, economic development, policy planning, environmental protection, urban design and international development. Planners are visionaries working for a better future through improvements in the quality of life in one or more of these areas.

Success

People who are successful in urban planning tend to have the following qualities or characteristics:

- visual and kinesthetic/tactile learning ability
- an interest in design combined with a heightened social consciousness
- people-oriented outlook
- strong communication skills and comfort in meeting with many different types of people
- understanding of the role of attentive listening in effective communication
- a concern for difficult multidisciplinary issues and dedication to working collaboratively to solve them
- an openness to international opportunities

Career

The MCP degree prepares students for the professional practice of planning at local, regional, state, federal, and international levels of government, as well as within the private sector with a planning consultant, land developer, law firm, economic development agency/corporation, non-profit organization, or other related business.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum

and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include study abroad and certificate programs within the college and the university. Students are encouraged to share their interests in these opportunities with their academic advisor.
- The Robert A. Deshon and Karl J. Schlachter Library for Design, Architecture, Art, and Planning has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history, and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students

Special Programs

Complementary Certificates

Master of Community Planning students may wish to complement their degree with a certificate.

- Geographic Information Science

This GIS Certificate Program is designed to meet the needs of both the novice, and experienced GIS professionals. Students who graduate from this program will have a solid understanding of the theoretical of GIS and rich hands-on experience with GIS software packages.

- Historic Preservation

This program is designed to develop an appreciation for and a working knowledge of the issues and techniques involved in historic preservation. The Certificate is awarded upon the successful completion of a minimum 18 semester credit hours, including a core curriculum of four required courses and an internship, and other courses, studios, or projects required by particular departments.

- Public Art & Placemaking

Public spaces are vital contributors to the physical design and the social fabric of urban areas. For centuries they have been platforms for public gatherings, both social and political, and for leisure activities. Sometimes artwork enhances or defines public space. Historically that art has typically commemorated events or people. More recently, temporary and quasi-permanent public art installations occupy public spaces. The process and the practice of art in public space is the focus of this graduate certificate program. All stakeholders in the process are considered: artists, community members, city planners, public and private sponsors, municipal government officials, and final users, amongst others. Physical, historical and socio-political context is also addressed.

- Real Estate

The Real Estate certificate is designed to provide students with a foundational knowledge of real estate financing and management while also allowing them to customize their course work based on their individual goals and interests, such as real estate valuations and/or real estate investing.

- Urban Design

The Urban Design Certificate will provide individuals with foundational knowledge about the art and science of cities through history to inform future visions for cities and places; introduce the skills and techniques to design livable, functional, and aesthetically appealing places in response to the current and future challenges of cities; and provide the ability to think critically, to encourage multidisciplinary solutions and appropriate sustainable design and management options that serve to promote harmony between the different facets of cities and places by considering them from a holistic perspective.

Admission Requirements

The application for the Master of Community Planning program requires:

- UC Graduate Admissions Application

- Two letters of recommendation (3 preferred)
- Professional résumé
- Unofficial Transcripts (to be uploaded with online application). Upon acceptance to the program, official transcripts, stating an undergraduate degree was conferred, must be submitted to complete the enrollment process. (For International Students: Official transcript evaluations from a NACES member organization are required.)
- Statement of purpose. This two-page paper should describe your broader goals within the field of planning, and why pursuing an MCP degree is the right path for you. Please also describe your significant academic experiences and touch on why you believe that you can successfully undertake graduate study.
- What Planning faculty members would you like to work with?
- Applicants interested in a graduate assistantship should upload a one-page description of relevant skills and knowledge (such as teaching experience, computer programming, design software, statistics, languages, drafting/design, and knowledge of research tools such as SPSS or SAS) that could be utilized as a graduate assistant. Be sure to include some qualitative judgment of your skills, and describe how you have used these skills in prior academic/work experiences.
- International Students also need: TOEFL (Minimum score: 87), IELTS (Minimum score: 6.5), ELS (Minimum Level: 112), or Duolingo (Minimum score: 110) scores.
- GRE not required.
- A portfolio is optional

Attention International Students: An important characteristic of the MCP program at the University of Cincinnati is that it is recognized as a STEM (Science, Technology, Engineering, and Mathematics) degree. Not all Master's degrees in planning have this designation. The importance of the STEM designation is that international students who graduate from a STEM program are given the opportunity to remain in the United States for 3 years of OPT (Optional Professional Training) if they obtain a planning position. Non-STEM programs only allow an international graduate one year of OPT.

Application Deadlines

All application materials should be received prior to January 10 to ensure first consideration for a financial award from the School of Planning. Assistantships and scholarships are merit-based and extremely competitive. However, the School of Planning will accept applications not requesting financial consideration up to June 30 of each year to begin studies at the end of that month.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Master of Community Planning program is fully accredited by the Planning Accreditation Board, an organization formed jointly with the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Design

Duration: **2 Years** Total Credits: **60** Award: **MDES**

Overview

The Master of Design (MDes) program exists within a multidisciplinary setting across the Communication Design, Fashion Design and Industrial Design programs housed in the Ullman School of Design at the University of Cincinnati's College of Design, Architecture, Art, and Planning (DAAP). The program is rooted in an evidence-based approach that emphasizes design research methods and strategies to address complex sociocultural, environmental, educational, and health challenges. MDes students materialize these challenges through writing, visualization, and prototyping techniques that result in published scholarship and exhibition. This is a research-driven curriculum, not one of making design artifacts.

MDes students design interventions through strategic investigation and rigorous research protocols. They engage in research methods during their first semester in partnership with faculty from the Ullman School of Design. A thesis topic is identified and developed throughout continued direction in theory, primary, secondary, and applied research, and chair-directed studies. Required courses expand student capability in design research methods and strategy, design discourse, and visual strategies for the dissemination of research.

The objectives of the MDes program are to:

- Focus on **Methods**: designing understanding
- Focus on **Strategy:** designing innovative paradigms
- Focus on **Systems Thinking**: designing dynamic structures to complex problems
- Focus on **Evidence**: designing applied solutions with measurable results
- Focus on **Empathy**: designing for social impact

Thesis project topics may focus on — or blur the lines between — *research for* Communication Design, Fashion Design, and/or Industrial Design. Graduate students work under the guidance of faculty to target domain-specific design applications in real contexts, such as design for aging populations, design for health and wellness, and design for education. The final thesis work is presented and defended visually and in writing. Thesis projects are also exhibited at the annual DAAPworks show. MDes students are expected to work with a high level of independence, motivation, and competence through their education. Students with undergraduate degrees from design-related fields and non-design-related fields are invited to apply to the two-year Master of Design program.

The Master of Design program has the approved CIP code 11.0105: Human-Centered Technology Design, which makes the program a recognized STEM degree program. STEM designation makes our students eligible for STEM specific Scholarships, 24-month OPT extension for International Students, and expanded GI benefits for Student Veterans.

Career

Most design graduates work in one of the three disciplines within the Master of Design Program — Communication Design, Fashion Design, Industrial Design. Design graduates frame inquiries at strategic levels and develop solutions to complex design problems through rigorous research protocols and utilize research methods for exploration and validation in the design process. Opportunities are found within large corporations with design departments. Design firms and design consultancies provide collaborate services in trans-disciplinary settings integrating research and design theories into practice. In addition, the Master of Design is considered a terminal degree and qualifies graduates for tenure track positions in academia.

UC Advantages And Special Opportunities

The Master of Design program has the approved CIP code 11.0105: Human-Centered Technology Design, which makes the program a recognized STEM degree program. STEM designation makes our students eligible for STEM specific Scholarships, 24-month OPT extension for International Students, and expanded GI benefits for Student Veterans.

Admission Requirements

- January 10th is the Fall application deadline to be considered for university funded scholarships and assistantships. Applications submitted after this date will be reviewed based on remaining available program seats.
- Click to begin the application process
  - A bachelor's degree in design from an accredited college or university, with at least a 3.0 undergraduate GPA (in a 4.0 grading system).
  - Unofficial transcript(s) from all colleges/universities attended
  - A resume or curriculum vitae summarizing accomplishments to date
  - At least two years of professional experience in design practice or teaching (Internships and sponsored projects may be applied towards this time).
  - A letter of intent that briefly answers the following:
    - Name at least one faculty member in the School of Design with whom you'd like to work and explain why. Note: The directory of faculty may be found here: https://daap.uc.edu/about/directory.
    - One of the benefits of studying in a Tier 1 research university is access to many other disciplines of research and study. What other departments at UC could you imagine making use of, either for study or collaboration?
    - If you secured a research grant, what problem would you focus on and what would you propose to do?
  - At least three letters of recommendation who can comment on your past performance and future potential in academic and professional contexts
  - A portfolio that includes 12–15 examples of your work as an indication of the skill level required to pursue graduate studies in design (including aesthetic sensitivity, objective knowledge of form, interest areas, and ability to solve problems). The examples should support your letter of intent. We no longer accept website links or hard copies of portfolios.
  - Applicants with English as a second language must have a score of 570 (paper-based) or 230 (computer-based) or 88 (Internet-based) on the Test of English as a second language (TOEFL). The International English Language Testing System (IELTS) is also accepted. For IELTS, an overall band score of 6.5 is needed.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Fine Arts - Art

Duration: 2 Years Total Credits: 75 Award: MFA

Overview

The Master of Fine Arts (MFA) in the School of Art is a two-year studio program that welcomes and supports all forms of contemporary art practice and research. While there are faculty with areas of specialization that include two-dimensional work (painting, drawing, printmaking), object-making (sculpture, installation, ceramic sculpture), and electronic media (photography, video, animation, web-based art), many of our faculty also have extensive experience in conceptual art, performance, sound, social practices, public art, and art writing.

Many of our MFA students use the university's resources to develop multi-disciplinary practices that take advantage of different equipment and expertise across campus. The primary goals of our MFA program includes developing studio work that is groundbreaking for each student, building innovative research frameworks for art practices, and advancing conceptual and technical skills. Additionally, our MFA students are presented with opportunities to learn how to teach effectively and are encouraged to develop lasting professional connections within the city and region.

The program is housed in exceptional facilities that include individual workspaces for graduate students in a dedicated building. There are studios for printmaking, ceramics, metal fabrication, metal casting, sculpture, woodworking, rapid prototyping (CNC milling, 3D printing, laser cutting/etching), digital photo printing, darkroom work, electronic art, sound, video, drawing, and painting.

In addition, the University's 1819 Innovation Hub Makerspace + Microfactory has an advanced array of equipment including high-performing 3D printers, laser cutters, a CNC router, and a waterjet cutter. The Digital Futures complex houses the Motion Capture Lab, the Strange Tools Lab, the Institute for Research Sensing, and the NFT Media Lab, amongst many other resources. Four galleries are connected to the school and college to showcase artwork by students, faculty, and visiting artists, and many students get involved with local galleries and artist-run spaces to exhibit, curate, and intern.

Scholarships, graduate assistantships, teaching assistantships, travel fellowships, and research grants are available. The School of Art sustains an active visiting artist program and offers additional programs/courses in critical theory, art history & museum studies, art education, public art & placemaking, and professional practice. Cincinnati's dynamic art community and institutions such as the Contemporary Arts Center, the Cincinnati Art Museum, and Wave Pool Gallery offer many other resources and opportunities for students.

Success

Our MFA offers the ideal opportunity to develop your studio practice to the advanced level expected of practicing artists by critics, curators, museums, and galleries. You have two years to focus on self-directed studio work, informed by courses in critical theory, and research methods, and bolstered by academic courses that you can select from across the University. The program culminates in a written thesis that contextualizes and provides a theoretical framework for situating your practice within contemporary art. This accumulating experience over two years of intensively making, writing, and discussing contemporary art adds depth and confidence to your identity as a practicing artist.

Career

The MFA is crucial for developing the kind of complex and mature studio practice likely to lead to successful gallery and museum exhibitions. It is also a way for you to build lifelong professional relationships with your fellow MFA students that will generate future opportunities. Many of our MFA alumni are successful exhibiting artists in the region as well as showing their work nationally and internationally.

The MFA instills the professionalism that leads to roles in art, arts administration, and enterprise. These skills are further enabled by our Professional Practices and Museum Studies courses which engage students with local arts communities and institutions. We have alumni working in many local art institutions, including the Contemporary Arts Center and the Cincinnati Art Museum. We also have MFA alumni who run the successful non-profit venture Wave Pool Gallery, direct FotoFocus Cincinnati Biennial, the Weston Art Gallery, Clay Street Press, and administer Visionaries + Voices.

The MFA is the terminal Fine Art degree in the United States and is therefore essential for teaching at the college level. Our alumni have gone on to university and college teaching jobs across the country.

Master of Fine Art effective Fall 2022
MAAE + MFA Dual Degree

Advising

Each 1st year MFA student will have 2 faculty mentors and one 2nd year graduate student. These mentors will help you make the most of the program's assets and use the resources of the whole campus.

Kate Bonansinga
Interim Director, MFA Program
bonanskn@ucmail.uc.edu

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include study abroad and certificate programs within the college and the university. Students are encouraged to share their interests in these opportunities with their academic advisor.
- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students.

Special Programs

Complimentary graduate certificates with the MFA include:

- Museum Studies
- Creative Placemaking
- Entrepreneurship

Admission Requirements

We offer admission only for the Fall semester.

- **Priority Deadline**: Submit your completed application by January 10 for best consideration for scholarships and assistantships.
- **Final Deadline**: Applications are accepted on a rolling basis through June 30.
- **Decision Timeline**: Applicants typically receive an admission decision within 30 days of application receipt (once the priority deadline has passed).

Application Requirements:

- UC Graduate Admissions Application
- Application Fee of $65 for domestic applicants / $70 for international applicants
  - The admission confirmation fee is $500 and will be credited to your tuition bill when you register for classes in your first semester of attendance. The confirmation deadline is **April 15th**.
- Unofficial transcript(s) from all colleges/universities attended

- Resume or CV
- 3 letters of recommendation. Recommenders should be people familiar with your academic and professional abilities and not those with whom you have a personal or family connection. The recommenders you list in your online application will receive information via email about submitting their recommendation letter online. Please ask them to provide the following information:
  - who they are and their relationship to you
  - why they think you will succeed in the graduate Fine Arts program at the University of Cincinnati
  - the reservations, if any, they may have about your application
  - the potential they see for you to teach within our program, and in what capacity (foundations, 2D, 3D, photo, or new media)
- Artist's Statement. Include a statement (up to 500 words) describing the long-term goal to be met by your graduate study. Include the following:
  - a general introduction to the work in your portfolio
  - how you would like to creatively develop in graduate school
  - your professional interests (e.g., exhibitions, teaching, writing, curating)
  - your media of choice
  - why you are interested in the Fine Arts program at the University of Cincinnati
  - the Fine Arts faculty you'd like to work with and why. Please name at least two. Please view our faculty directory.
- Portfolio: **Your portfolio should contain 20 works as a single pdf file.**
  - **Which images to submit:**
    - For **digital media** (animation, coding, digital imaging, game design, interactive, net.art, sound, video, or other new media art forms), submit a combination of 14 images as a pdf portfolio plus links to 3-6 online examples. Those online examples must comprise one file no longer than 10 minutes. Post your online examples to Vimeo or YouTube and provide the link in your pdf portfolio. Before submitting, test the links to make sure they are working.
    - For **all other art media** (ceramics, drawing, fibers, installation, painting, photography, sculpture, etc.), submit your 20 works as one pdf portfolio.
  - **How to size your images:**
    - Your images should be no more than 3 MB each, at 96 ppi
    - To downsize your images to less than 3 MB/96 ppi, make your images 96 ppi and no more than 1500 pixels on the shorter side.
    - Convert these resized images into a single pdf by first assembling them into one document using PowerPoint, Keynote, or MSWord and then exporting the file.
      Powerpoint—export to pdf
      Keynote—export to pdf
      MSWord—print—save as pdf
  - **How to label your images:**
    - Label your images in the pdf with the **title, date, materials, and dimensions**
    - In a separate pdf provide a **list of your images** with title, date, materials, and dimensions and a brief statement about each work.
  - If you have a **website** for your studio practice provide the URL in your image list and at the start of the pdf portfolio
  - **Only work in which the applicant has played a major role in the project should be submitted. With collaborative work, include an explanation of your role in making the piece.**

Graduation Requirements

Students must:

- Successfully complete 60 semester hour credits
- Successfully pass the first-year review
- Successfully complete their master's thesis exhibition and written thesis

Application Deadlines

We offer admission only for the Fall semester.

- **Priority Deadline**: Submit your completed application by January 10 for best consideration for scholarships and assistantships.
- **Final Deadline**: Applications are accepted on a rolling basis through June 30.
- **Decision Timeline**: Applicants typically receive an admission decision within 30 days of application receipt (once the priority deadline has passed).

The confirmation deadline is **April 15th**. The admission confirmation fee is $500 and will be credited to your tuition bill when you register for classes in your first semester of attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
As part of the College of Design, Architecture, Art, and Planning, the Art History program and Fine Arts program are accredited by the National Association of Schools of Arts and Design (NASAD).

Landscape Architecture

Duration: **2 Years** Total Credits: **72** Award: **MLA**

Overview

The Master of Landscape Architecture (MLA) program at the University of Cincinnati (UC) is founded on the contemporary practice of landscape architecture and its broad applications of regenerative planning, design, and stewardship, and the synthesis of art and science to balance human activity with natural systems.

The Master of Landscape Architecture program at the University of Cincinnati is distinguished by **Cooperative Education (Co-op).** Our MLA program is the only one in the nation to require a full semester of co-op study. The licensed profession of landscape architecture has led the way in sustainable landscape design for more than 100 years. Our alumni are leading projects to implement urban design and green infrastructure, reclaim exhausted and damaged lands, revitalize neighborhoods, enhance community development, and advance projects of local significance.

A uniqueness to our MLA program is that it can be completed in two-years through six-consecutive semesters that includes 5 semesters on campus and one semester co-op experience with these six consecutive semesters saving students an entire year cost of living expenses vs those 3-year programs.

Applications for Fall 2025 start are open.

Career

The profession of landscape architecture has led the way in sustainable design for more than 100 years. From residential gardens to regional plans, the practice of landscape architecture spans the spectrum of human intervention on the land and the stewardship of the earth's natural resources. Landscape architects are leading projects of global significance in private, public, and academic practice settings.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
MLA First Professional Degree 6 consecutive semesters
MLA Fall Start Major Map (beginning Fall 2025)

UC Advantages And Special Opportunities

The MLA at UC is the only advanced degree in landscape architecture with a cooperative education requirement. UC's unique cooperative education program combines academic semesters of study in landscape architecture with placement in professional work environments, thereby creating a program structure that balances academic inquiry with industry application to foster and develop robust professional knowledge and judgment. By graduation, an MLA student will have worked at least one full semester directly in the field of landscape architecture in North America or internationally, for a full-time employer gaining hands-on experience. This work experience is built directly into the MLA's curriculum, providing graduates with a significant advantage in the post-graduation job market and a head start on internship requirements for licensure. The UC approach to cooperative education is further described on UC's Career Education website.

Students gain proactive learning experiences and professional exposure from the co-op that accelerates their job searches and helps them define the area of practice for which they are best suited.

Special Programs

Location within the School of Planning and the College of Design, Architecture, Art, and Planning (DAAP)

DAAP programs in allied fields and disciplines are top-ranked and accessible to students in the MLA program. This includes Fine Arts, Industrial and Transportation Design, Architecture, Planning, and Urban Design. The MLA's home in the School of Planning in DAAP aligns the MLA with the contemporary practice of urban design.

Focus on the urban environment and the critical practice of Landscape Architecture

The MLA at DAAP focuses on the urban environment, the scene of habitation for the majority of the world's population, to provide maximum relevance and preparation for practice. MLA students have the opportunity to complete certificates, including graduate certificates at DAAP or in other Colleges.

Focus on Sustainability and Living Architecture

The MLA curriculum is closely linked to the Sustainable Sites Initiative (SITES®). Our students get training from GBCI, Inc. certified instructors to prepare them to become SITES Accredited Professionals (SITES AP). We are also affiliated with the SITES® Community Partners and the Biophilic Cities Network. The STEM CIP code for the MLA is 01.1103.

This STEM program is an immersive experience with a curriculum that promotes the synthesis of art and science to balance human activity with natural systems.

The MLA Program is associated with the Greater Ohio Living Architecture Center, which is one of three Regional Centers of Excellence in North America designated by the Green Infrastructure Foundation and Green Roofs for Healthy Cities. Our MLA students are trained by Accredited Green Roof Professionals (GRP) and have access to free and discounted resources with these organizations, including GRP training and the School of Planning's Green Roof Certificate.

Admission Requirements

Admission Requirements:

- Completion of the UC Graduate Admissions Application that requires a non-refundable $65 application fee ($70 for international applicants)
- 3.0 Grade Point Average (GPA) on a 4.0 scale at most recently attended academic institution
- Unofficial transcript(s) from all colleges/universities attended. **Note:** Official transcripts are not required during the admissions process, and only unofficial transcripts are required for the application.
- Applicants from outside the U.S. are required to have test scores higher than the following minimums for the Test of English as a Foreign Language (TOEFL): 84-85 (internet-based), 223 (computer-based), or 563 (paper-based). Other acceptable scores include above a 6.5 minimum on the International English Language Testing System (IELTS), or above a 54 on the Pearson (PTE). The Duolingo English Test is also accepted.
- Professional resume, which may also include a link to a digital portfolio. Resume should address unique areas of academic interests, leadership and/or responsibilities (academic history/work history), proclivity toward design, and critical thinking.
- Digital Portfolio. In addition to design work, a portfolio displays an expression of interests, travel, experiences, creative work, accomplishments, and prior education that demonstrates an affinity with landscape architecture. Applicants may upload an e-portfolio no larger than 2MB into the online University Application. Alternatively, applicants may upload a PDF that includes a link to portfolios larger than 2MB. We do not accept hard copies of portfolios. Applicants' portfolios will be reviewed separately by category – 1) those applicants with no or minimal design background (academically – majors in business, language, social sciences, natural sciences, engineering, etc.); and 2) those applicants with design backgrounds (majors in architecture, landscape architecture, graphic design, interior design, etc.). It is important that entering cohort groups emphasize breadth in academic backgrounds.
- Statement of Interest. This (800 words, maximum) should describe the applicant's broader goals within the professional discipline of landscape architecture, and why pursuing an MLA degree is the right path. The applicant should describe significant academic accomplishments and experiences. Applicants must address their plan to develop/expand creative expression through design.
- Submission of two letters of recommendation from persons familiar with your potential to complete professional graduate study. At least one recommendation should be from an academic reference who can address the applicant's academic performance. If the applicant is applying for graduate assistantship support, at least one recommendation should address the applicant's competence or potential abilities to contribute to research and/or teaching. These letters must be submitted by references online. The letter addressing the applicant's performance must address the applicant's critical thinking accomplishments. One of the letters must address the applicant's creative thinking approach to problem solving.
- Applicants interested in a graduate assistantship should upload a one-page (800 word, maximum) description of relevant skills and knowledge (such as teaching experience, computer programming, design software, languages, drafting/design, and knowledge of research tools) that could be utilized as a graduate assistant. The applicant should describe how these skills have been used in prior academic/work experiences.

A student's dossier (application materials) is evaluated first by a representative group of faculty to rank the applicant. Faculty make recommendations to the Program Director on whether students are eligible for advanced standing (those with design backgrounds) to allow waiving of some introductory coursework; however, if waived of a required course, those students must still replace them with credit hours to meet the 72 credit requirements for the MLA degree.

The faculty and Program Director do an evaluation of all student submissions and make a final assessment on advanced standing. The following criteria are conditions for advanced standing:

- Number of credit hours for studio
- Degree complexity of the studio problems

- Work experience
- GPA
- Experience with digital tools
- Credit in introductory digital communications

The faculty and Program Director do an evaluation of all student submissions and make a final assessment on admission to the MLA program. The following criteria are conditions for admission:

- Demonstration of academic success, work experience competency consistent with a professional path of growth – Resume, Letters of Reference
- Demonstration of creative and critical thinking, and problem-solving ability – Letters of Reference, Statement, Portfolio
- Demonstration of design competency (limited or non-design background) – Portfolio
- Demonstration of design competency at the professional level (design background) – Portfolio
- Work ethic and reliability is evidenced in the application materials – Resume, Letters of Reference, Statement

Graduation Requirements

MLA: 72 credits, First-Professional Degree for 6 consecutive semesters including one co-op experience.

Application Deadlines

We strongly suggest that application materials be received prior to **January 10** to assure first consideration for a financial award from the program. Our assistantships and financial awards are **merit-based** and extremely competitive.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
Our LAAB accredited Master of Landscape Architecture (MLA) program will help prepare you for leadership and interdisciplinary teamwork that will sustain the urban, regional, and global landscape in a prosperous and dynamic equilibrium. As a first-professional degree program, the MLA provides the body of knowledge common to the profession and promotes the acquisition of knowledge and skills necessary to enter the professional practice of landscape architecture.

The LAAB is the accrediting organization for landscape architectural programs. As such, the LAAB develops standards to objectively evaluate landscape architectural programs and judges whether a school's landscape architectural program is in compliance with the accreditation standards.

The LAAB is comprised of landscape architecture practitioners and academicians, representatives from landscape architecture collateral organizations and public representatives. The collateral organizations are the American Society of Landscape Architects (ASLA), Council of Landscape Architectural Registration Boards (CLARB) and Council of Educators in Landscape Architecture (CELA).

For more information about accreditation, please visit this website: https://www.asla.org/accreditationlaab.aspx.

Architecture

Duration: **3 Years** Total Credits: **42 - 48** Award: **MSARCH**

Overview

The field of Architecture encompasses both practice and theory as it applies to the design of buildings, landscapes, cities, and other environments. The University of Cincinnati's **Master of Science in Architecture Program** is a post-professional degree program of advanced theoretical studies in architecture with a focus on the acquisition of critical skills related to architectural production, both built and theoretical. Students enrolled in the program study architectural history and theories as these relate to practice. The program exposes students to a range of concepts in the field and fosters the ability to question and assess the built environment and the documents that relate to it.

Intended primarily for students already in possession of a graduate degree in architecture or a related field such as interior design, planning, or landscape architecture, the MS program has a common core consisting of two years of coursework in architectural theories and research methods.

Success

Applicants to the MS Program in Architecture must demonstrate a commitment to the critical study of architecture and related design fields, including interior design, urban design, and landscape architecture. Prior education or working experience in architecture or a related field is desirable. Excellent writing skills and an interest in theoretical research are essential. Students whose English writing or speaking skills are not adequate for the demands of the curriculum must enroll in advanced, graduate-level English as a Second Language coursework prior to and sometimes in tandem with program coursework.

Career

The program prepares researchers, educators, and practitioners for advanced scholarly, pedagogic, and professional work in architecture and related fields. Most graduates of the program become full-time professors or practitioners of architecture. Other career opportunities for graduates of the MS and Ph.D. in Architecture include historic preservation, public policy, curating, journalism, and institutional administration.

Majoring

The MS program in Architecture focus has traditionally been on architectural history, theories, and criticism as they relate to architectural practice. With the addition of faculty members with technical expertise in human and environmental factors, computation, parametric design, and robotics, the program can accommodate a range of student interests. While the program does not have separate tracks for students pursuing technical research, program faculty members assist students in identifying coursework and campus resources to develop the necessary competencies. All entering students have the opportunity to consult with multiple members of the Program faculty and with the Program Coordinator to determine appropriate elective coursework and thesis committee composition.

In addition to the MS common core, all MS students undertake research and produce a thesis in student's principal area of focus. Guided by professors with relevant expertise, the student will pursue coursework and independent research to achieve mastery of an aspect of the architectural discipline. Students have the option of pursuing approved graduate certificates offered by the university as a complement to their architectural studies. Popular options include Historic Preservation; Urban Design; Women's, Gender, and Sexuality Studies; and Data Analytics.

MS Arch Historic Preservation Track
MS Arch 2018

Advising

Because UC's Master of Science Program in Architecture has a small number of students, we are able to facilitate one-on-one student and faculty advising and collaboration. Students work with their faculty to develop their research and writing skills in publications and presentations in national and international conferences. Above all, students are encouraged to design their research interests by taking courses in different fields.

UC Advantages And Special Opportunities

The University of Cincinnati's MS Program in Architecture is part of the University's College of Design, Architecture, Art, and Planning (DAAP), which is home to top-ranked programs in a broad range of design and arts disciplines. Students have opportunities to interact with counterparts in other fields and take courses in those areas.

The undergraduate and graduate programs in the School of Architecture and Interior Design prepare students for critical engagement with the practice of designing buildings. The MS Program in Architecture is an extension of this mission. It aims to provide an enriched intellectual context in which students can strengthen their skills of critical reasoning, ethical judgment, and aesthetic appreciation of the practice of building. Students in the program are encouraged to develop their research and writing skills by participating in conferences and publishing their papers as a complement to coursework.

Eligible students accepted to the MS Program in Architecture may compete for a limited number of scholarships and assistantships. Students are eligible to work in campus jobs for up to 20 hours per week when classes are in session and 40 hours during vacations.

Special Programs

Students enrolled in the MS Program in Architecture can take advantage of opportunities for collaboration with peers and faculty members in a range of academic units across campus and with the university's institutional and industry partners. Coursework and research opportunities in related disciplines such as architectural engineering, fine arts, art history, industrial design, graphic design, landscape design, urban design, and urban planning are available to students in the MS Program in Architecture. UC's emphasis on interdisciplinary studies facilitates interaction with counterparts in other schools of the College of Design, Art, Architecture, and Planning as well as other colleges such as the Engineering, Arts and Sciences, Medicine, and the College Conservatory of Music. Such interdisciplinary studies should be planned in consultation with Program faculty members and approved by the Program coordinator.

Admission Requirements

The School of Architecture and Interior Design bases admission decisions on a balanced consideration of the following indications of scholarly potential:

- Students applying to the MS Program in Architecture should have completed a bachelor's degree prior to matriculation
- Unofficial transcript(s) from all colleges/universities attended are required. Official transcripts are not required during the admissions process, and only unofficial transcripts are required for the application. Applicants should not send official transcripts until they are offered admission and confirm enrollment. For complete transcript requirements, view our Transcript Submission Policy.
- A portfolio of design, art, or other graphic work is optional. The portfolio is an opportunity to demonstrate your design abilities, artistic talents, or other information you deem pertinent to your application. The content does not have to be architectural if your background is in another discipline. Written project statements to accompany visual work are helpful. Portfolios are submitted online. We do not accept hard copies of portfolios.
- Three letters of recommendation from persons who are in a position to evaluate your abilities and your potential for success as a graduate student are required. There is no standard form to fill out; instead, based on the information you provide in your application, recommenders will be emailed instructions on the process for submitting letters of recommendation.
- A résumé of academic and professional experiences is required
- A two-page statement of your interest in graduate study in architecture is required. This should be a concise, articulate presentation of your academic and career goals, and any specific interests you have in architectural topics for graduate research and design. It should reflect your prior intellectual and professional engagement with these issues, and may also provide some additional perspective on the work illustrated in the portfolio.
- Students applying to the MS Program must submit one or two writing samples demonstrating the ability to conduct scholarly research and examine theoretical concepts. The essays can expand on the areas of research interest or on any topic.

International Student Requirements

For applicants whose native language is not English a TOEFL (Test of English as a Foreign Language) score of at least 100 iBT (600 paper) or an IELTS score of at least 7.0 is common, and is typically our minimum. 80 on the TOEFL and 6.5 on the IELTS are graduate admissions minimum requirements. Applications with scores below the campus minimums will not reach the MS Architecture admissions committee for review. Students whose scores are above the campus minimum but below the Master of Science in Architecture Program standards, or students whose English writing or speaking ability does not meet program expectations, will be considered on a case-by-case basis, however, they must agree to take graduate-level ELS coursework and possibly other courses as a condition of acceptance.

Application Deadlines

All applicants must apply by **January 10th.**

The application process begins with the submission of the UC Graduate Admissions application. Supplemental materials are to be submitted online through the application process.

New students are admitted for the fall semester. We will notify successful candidates by April 15. An offer of admission may be withdrawn if a candidate does not accept within six weeks of our offer.

In general, the program offers neither deferrals nor admission in semesters other than fall, however, individual requests for admission deferrals and for spring semester admission may be considered on a case-by-case basis depending on the specific nature of the request and the ability of the program administration to accommodate it.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The architecture program of the University of Cincinnati has been accredited by the National Architectural Accrediting Board (NAAB) continuously since 1948, and its courses satisfy requirements maintained by various state architectural registration boards. The professional Master of Architecture degree is recognized as an accredited degree by the NAAB. **The Master of Science in Architecture Program is not an accredited professional degree**.

Landscape Architecture

Duration: **2 Years** Total Credits: **49** Award: **MSLA**

Overview

The Master of Science in Landscape Architecture (MSLA) program is for students with prior LAAB-accredited degrees or extensive practice experience in Landscape Architecture who seek post-professional design studies with a topical focus on issues related to professional practice and evidence-based design in the urban environment. Students will be able to uniquely contextualize complex problems that are defined by large-scale systems of landscape ecologies, urban forces, and social conditions. The program of study includes research methodology and continuous development of inquiry and applied research in its approach to disciplinary knowledge. All graduates will complete a thesis or thesis research project reflecting independent work in their final semester of study.

The curriculum of the post-professional MSLA assumes the applicant has a level of professional education or experience that informs their desire to pursue a particular area of interest related to Landscape Architecture within the interdisciplinary atmosphere of graduate education in DAAP. A BS Landscape Architecture-accredited applicant would be eligible for licensure based on their first LAAB-accredited degree, so the post-professional, non-accredited MSLA at DAAP should be sought to advance an area of specialization with an emphasis on the practice of landscape architecture. The MSLA allows for numerous directed elective courses and certifications that support the development of specialization. This curriculum is therefore a landscape-based, advanced investigation of topics of particular interest to the student that advances and supports research and investigation in the practice of landscape architecture. The MSLA curriculum's post-co-op coursework capitalizes on the co-op experience, to be followed by the final semester of individual accomplishment of a thesis or thesis project based on scholarly investigation of practice as experienced in cooperative education.

The MSLA degree requirement is 49 credits, and because of its emphasis on the practice of landscape architecture, it requires at least one semester of Cooperative Education (Co-op).

MSLA applicants will indicate their selection of one of two Tracks (49 credits each):

MSLA Track 1: Post-Professional Degree, Interdisciplinary Emphasis w/1 co-op

- Thesis or Thesis Project in collaboration with DAAP programs such as Fine Art, Industrial Design, Transportation Design, Planning, Architecture, or others
- 4 consecutive semesters including 1 co-op
- 25 core credits + 24 elective credits = 49 credits total
- Elective credits to support the thesis or thesis project

MSLA Track 2: Post-Professional Degree, Professional Practice Emphasis w/2 co-ops

- Thesis or Thesis Project on the critical practice of Landscape Architecture
- 5 consecutive semesters including 2 co-ops
- 25 core credits + 24 elective credits = 49 credits total.
- Elective credits to support the thesis or thesis project

Career

The profession of landscape architecture has led the way in sustainable design for more than 100 years. From residential gardens to regional plans, the practice of landscape architecture spans the spectrum of human intervention on the land and the stewardship of the earth's natural resources. Landscape architects are leading projects of global significance in private, public, and academic practice settings. Graduates of the MSLA program will be uniquely positioned to obtain employment in a variety of firms in public, private, or academic realms. The specialization confirmed by the graduate's successful completion of cooperative education and a thesis or thesis project will demonstrate in-depth knowledge and skill in contemporary and future-forward areas of practice. MSLA graduates will also be favorably positioned for additional study in PhD or DDes programs.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
MSLA Curriculum Map

Advising

The Academic Advisor for MSLA students is the MSLA Program Director in collaboration with their thesis Chair or thesis project faculty.

UC Advantages And Special Opportunities

The MSLA at UC is the only post professional degree in landscape architecture with a cooperative education requirement. UC's unique cooperative education program combines academic semesters of study in landscape architecture with placement in professional work environments, thereby creating a program structure that balances academic inquiry with industry application to foster and develop robust professional knowledge and judgment. By graduation, an MSLA student will have worked at least one full semester directly in the field of landscape architecture in North America or internationally, for a full-time employer gaining hands-on experience. This work experience is built directly into the MSLA's curriculum to develop thesis or thesis project topics that examine best practices in evidence-based design, providing graduates with a significant advantage in the post-graduation job market and a head start on internship requirements for licensure. The UC approach to cooperative education is further described here:

http://www.uc.edu/careereducation/experience-based-learning/co-op.html

Students gain proactive learning experiences and professional exposure from co-op that accelerate their job searches and help them define the area of practice for which they are best suited.

Special Programs

Location within the School of Planning and the College of Design, Architecture, Art, and Planning (DAAP)

DAAP programs in allied fields and disciplines are top-ranked and accessible to students in the MLA program. This includes Fine Arts, Industrial and Transportation Design, Architecture, and Planning. The MSLA's home in the School of Planning in DAAP aligns the MSLA with the contemporary practice of urban studies and planning.

Focus on the urban environment and the critical practice of Landscape Architecture

The MSLA at DAAP focuses on the urban environment, the scene of habitation for the majority of the world's population, to provide maximum relevance and preparation for practice. The MSLA curriculum allows for the "value added" option to pursue numerous certifications related to urban design and practice, including Graduate Certificates in Business such as Innovation, Entrepreneurship, Real Estate, and International Business. MSLA students have the opportunity to complete coursework in additional specialization topics such as living architecture, urban agriculture, or graduate certificates at DAAP or in other Colleges.

Focus on Sustainability and Living Architecture

The MSLA curriculum is closely linked to the Sustainable Sites Initiative (SITES®). Our students get training from GBCI, Inc. certified instructors to prepare them to become SITES Accredited Professionals (SITES AP). We are also affiliated with the SITES® Community Partners and the Biophilic Cities Network. The STEM CIP code for the MSLA is 01.1103.

The MSLA Program is associated with the international community of living architecture practitioners and researchers, including the Greater Ohio Living Architecture Center, which is one of three Regional Centers of Excellence in North America designated by the Green Infrastructure Foundation and Green Roofs for Healthy Cities. Our MSLA students are trained by Accredited Green Roof Professionals (GRP) and have access to free and discounted resources with these organizations, including GRP training and the School of Planning's Green Roof Certificate.

Admission Requirements

Application materials must be received prior to **January 10th** to assure first consideration for a financial award from the School of Planning. Our assistantships and financial awards are **merit-based** and extremely competitive. The School of Planning will accept applications not requesting financial consideration up to August 1 of each year to begin studies at the end of that month.

- Completion of the UC Graduate Admissions Application that requires a non-refundable $65 application fee ($70 for international applicants)
- 3.0 Grade Point Average (GPA) on a 4.0 scale at most recently attended academic institution
- Unofficial transcript(s) from all colleges/universities attended
- Applicants from outside the U.S. are required to have test scores higher than the following minimums for the Test of English as a Foreign Language (TOEFL): 84-85 (internet-based), 223 (computer-based), or 563 (paper-based). Other acceptable scores include above a 6.5 overall band score on the International English Language Testing System (IELTS), or above a 54 on the Pearson (PTE).
- All applicants are strongly encouraged to submit a video to the application website that responds to the question supplied in the video portal of the application
- A professional resumé, which may also include a link to a digital portfolio (see below). The resume should list education history, work experience descriptions and history, licensure or other professional credentials, skill levels in computer software, reliable

contact information, and unique or significant abilities and interests. The resume may also include a link to a digital portfolio but this must not be substituted for the separate submission of a digital portfolio (see below).
- Applicants are required to submit a digital portfolio which includes writing samples (see below) and design work. In addition to writing and design abilities, the portfolio should display an expression of interests, travel, experiences, creative work, accomplishments, and prior education that demonstrates an affinity with further study in landscape architecture and the MSLA curriculum. If possible, the applicant should provide material in the portfolio that indicates relevance to the applicant's MSLA Track 1 or MSLA Track 2 selection. Applicants may upload an e-portfolio no larger than 2 MB into the online University Application. Alternatively, applicants may upload a PDF that includes a link to portfolios larger than 2MB. We do not accept hard copies of portfolios.
- Writing Sample: Applicants should submit a single pdf of at least one complete paper prepared for an academic course requirement. The selected paper(s) should demonstrate high standards for scholarly writing that include abstract(s), logical frameworks and sequences of thought, credible and ethical documentation, the relevance of sources, critical assessment of data and sources, literature review, and conclusion. If possible, the applicant should provide a writing sample(s) that indicate relevance to the MSLA applicant's Track 1 or 2 selection.
- Interest Statement for the MSLA (1200 words total, maximum): The applicant should describe (in 1000 words, maximum) their broader goals within the professional discipline of landscape architecture, and why pursuing our Post Professional MSLA degree is the right path toward those goals. The applicant should describe significant academic accomplishments and experiences and their suitability for the curriculum of our MSLA program. In addition to this, the applicant should indicate (in 200 words, maximum) which MSLA Track they are applying for and their scholarship interests and goals relative to that Track. We welcome dialogue with applicants to help them select the appropriate Track. Please contact the MSLA program director to discuss the Track options before completing your application.
- Letter of Interest for Graduate Assistantship: Graduate Assistantships are awarded based on merit and availability of funds. MSLA Graduate Assistants will work with faculty on research and scholarly work for dissemination and course development. The Graduate Assistantship is considered an important learning experience as well as recognition and support for developing the applicant's skills and abilities. This letter of interest should describe the applicant's experience in scholarship and teaching.
- Three Letters of Recommendation: Letters on professional letterhead from persons familiar with your potential to complete professional graduate study are required. Because the MSLA degree requires the completion of a scholarly, evidence-based design and a thesis or thesis project, the letters must convey the applicant's capacity for inquiry, critical thinking, writing, and other aspects of scholarly work that are particular to the applicant's chosen Track and scholarly interest area. If the applicant is applying for Graduate Assistantship support, at least one recommendation should address the applicant's competence or potential abilities to contribute to research and teaching. Letters of recommendation must be submitted directly by references into the application online.

Graduation Requirements

Applicants must select one of two MSLA Tracks. The UC MSLA degree program Track options (49 credits each) are:

MSLA Track 1: Post-Professional Degree, Interdisciplinary Emphasis w/1 co-op

- Thesis or Thesis Project in collaboration with DAAP programs such as Fine Art, Industrial Design, Transportation Design, Planning, Architecture, or others
- 4 consecutive semesters including 1 co-op
- 25 core credits + 24 elective credits = 49 credits total
- Elective credits to support the thesis or thesis project

MSLA Track 2: Post-Professional Degree, Professional Practice Emphasis w/2 co-ops

- Thesis or Thesis Project on the critical practice of Landscape Architecture
- 5 consecutive semesters including 2 co-ops
- 25 core credits + 24 elective credits = 49 credits total.
- Elective credits to support the thesis or thesis project

A total of 24 Elective credits are required to complete either Track of the MSLA degree. Electives support the topic of the thesis or thesis project. Electives for Track 1 will support the study of interdisciplinary public, private, or academic practice of Landscape Architecture, including courses in other DAAP programs, organizational development, or contemporary approaches to sustainability and collaboration. Electives for Track 2 will support the study of the critical practice of Landscape Architecture and may include courses in business, law, related disciplines such as architecture or planning, or other areas of expertise in Landscape Architecture related to public, private, or academic practice.

As a Post-Professional degree, the MSLA curriculum includes the requirement for a thesis or thesis project which concludes with research capstone courses (a 3 credit studio with a companion 3 credit seminar). The thesis or thesis project requires original research with the guidance of a thesis or thesis project committee chaired by a Landscape Architecture faculty member with Graduate Faculty status. The MSLA thesis is the traditional research document prepared according to the UC Graduate School's rigorous guidelines and requirements. The thesis project is an individual capstone project with expectations for rigorous original research.

Application Deadlines

Application materials must be received prior to **January 10th** to assure first consideration for a financial award from the School of Planning. Our assistantships and financial awards are **merit-based** and extremely competitive. The School of Planning will accept applications not requesting financial consideration up to August 1 of each year to begin studies at the end of that month.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The MSLA is a post-professional degree and as such, it is not required to be accredited. Applicants seeking an accredited degree in Landscape Architecture may consider our Master of Landscape Architecture (MLA) program. The MLA degree program has been designed to meet the standards of the Landscape Architecture Accreditation Board. Our MLA program was reviewed by the Landscape Architecture Accreditation Board in April 2021. We were granted Candidacy Status, which is the first of two reviews required for full accreditation. The program will have an Initial Accreditation Review in Spring 2023. For more information about accreditation, please visit this website: https://www.asla.org/accreditationlaab.aspx.

Landscape Architecture

MSLA

MSLA Curriculum Map

Duration: 2 Years

★Minimum Credits: 49 Credits

Fall Semester - Year 1

Required Courses

Course	Title/Desc	Credit
LAND7045	Sustainable Sites III Studio (C min)	6
LAND7046	Sustainable Sites III Seminar (C min)	3
LAND7061	Landscape Architecture Colloquium I (C min)	1
PD7041	Professional Development for Master of Landscape Architecture (C min)	1

Spring Semester - Year 1

Track 1: Post-Professional Degree, Interdisciplinary Emphasis w/1 co-op

Course	Title/Desc	Credit
LAND7063	Thesis Research and Development in Landscape Architecture (C min)	2
LAND7065	Special Topics in Landscape Architecture (C min)	6

Track 2: Post-Professional Degree, Professional Practice Emphasis w/2 co-ops

Course	Title/Desc	Credit
COOP7042	First Co-op for Master of Landscape Architecture	0

Summer Semester - Year 1

Track 1: Post-Professional Degree, Interdisciplinary Emphasis w/1 co-op

Course	Title/Desc	Credit
COOP7041	Practicum for Master of Landscape Architecture (C min)	0

Track 2: Post-Professional Degree, Professional Practice Emphasis w/2 co-ops

Course	Title/Desc	Credit
LAND7063	Thesis Research and Development in Landscape Architecture (C min)	2

Fall Semester - Year 2

Track 1: Post-Professional Degree, Interdisciplinary Emphasis w/1 co-op

Course	Title/Desc	Credit
LAND7012	MSLA Thesis / Project Studio (C min)	3
LAND7XXX	Thesis Option Students must elect either a thesis by registering for LAND7008 (3 credits) or a thesis project by registering for LAND7011 (3 credits). (C min)	3

Track 2: Post-Professional Degree, Professional Practice Emphasis w/2 co-ops

Course	Title/Desc	Credit
COOP7043	Second Co-op for Master of Landscape Architecture (C min)	0

Spring Semester - Year 2

Track 2: Post-Professional Degree, Professional Practice Emphasis w/2 co-ops

Course	Title/Desc	Credit
LAND7012	MSLA Thesis / Project Studio (C min)	3
LAND7065	Special Topics in Landscape Architecture (C min)	6
LAND7XXX	Thesis Option Students must elect either a thesis by registering for LAND7008 (3 credits) or a thesis project by registering for LAND7011 (3 credits). (C min)	3

Electives

A minimum of 24 credits in Electives is required for each Track. When and where you take them is at the student's discretion.

Course	Title/Desc	Credit
6XXX+	MSLA TRACK 2 ELECTIVES A total of 24 Elective credits are required to complete the MSLA degree. Electives support the topic of the thesis or thesis project. Electives for Track 2 will support the study of the critical practice of Landscape Architecture and may include courses in business, law, related disciplines such as architecture or planning, or other areas of expertise in Landscape Architecture related to public, private, or academic practice. (C min)	24

Course	Title/Desc	Credit
6XXX+	MSLA TRACK 1 ELECTIVES A total of 24 Elective credits are required to complete the MSLA degree. Electives support the topic of the thesis or thesis project. Electives for Track 1 will support the study of interdisciplinary public, private, or academic practice of Landscape Architecture, including courses in other DAAP programs, organizational development, or contemporary approaches to sustainability and collaboration. (C min)	24

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Urban Design

Duration: **1 Year** Total Credits: **36** Award: **MUD**

Overview

The Master of Urban Design degree will provide individuals with foundational knowledge about the art and science of cities through history to inform future visions for cities and places; introduce the skills and techniques to design livable, functional, and aesthetically appealing places in response to the current and future challenges of cities; and provide the ability to think critically, to encourage multidisciplinary solutions and appropriate sustainable design and management options that serve to promote harmony between the different facets of cities and places by considering them from a holistic perspective.

Career

The Master of Urban Design degree prepares students for the professional practice of urban design within the private sector with urban design, architectural, planning, and landscape architecture firms.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include study abroad and certificate programs within the college and the university. Students are encouraged to share their interests in these opportunities with their academic advisor.
- The Robert A. Deshon and Karl J. Schlachter Library for Design, Architecture, Art, and Planning has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history, and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- DAAP's multiple labs, centers and initiatives support our programs and the creative work and research of our faculty, staff, and students

Special Programs

Complementary Certificates

Master of Urban Design students may wish to complement their degree with a certificate.

- Geographic Information Science

This GIS Certificate Program is designed to meet the needs of both the novice, and experienced GIS professionals. Students who graduate from this program will have a solid understanding of the theoretical of GIS and rich hands-on experience with GIS software packages.

- Historic Preservation

This program is designed to develop an appreciation for and a working knowledge of the issues and techniques involved in historic preservation. The Certificate is awarded upon the successful completion of a minimum 18 semester credit hours, including a core curriculum of four required courses and an internship, and other courses, studios, or projects required by particular departments.

- Public Art & Placemaking

Public spaces are vital contributors to the physical design and the social fabric of urban areas. For centuries they have been platforms for public gatherings, both social and political, and for leisure activities. Sometimes artwork enhances or defines public space. Historically that art has typically commemorated events or people. More recently, temporary and quasi-permanent public art installations occupy public spaces. The process and the practice of art in public space is the focus of this graduate certificate program. All stakeholders in the process are considered: artists, community members, city planners, public and private sponsors, municipal government officials, and final users, amongst others. Physical, historical and socio-political context is also addressed.

- Real Estate

The Real Estate certificate is designed to provide students with a foundational knowledge of real estate financing and management while also allowing them to customize their course work based on their individual goals and interests, such as real estate valuations and/or real estate investing.

Admission Requirements

The application for the Master Program requires:

- UC Graduate Admissions Application
- An undergraduate or graduate professional degree in architecture, landscape architecture, urban planning, or other similiar fields of study
- 3.0 GPA (minimum)
- Two letters of recommendation
- Professional résumé
- A portfolio of past and current works is required. It must include examples of urban design, urban planning, architectural works (or a combination of those) within a previous degree or professional realm. The candidates must clarify their role in the examples provided, particularly for activities developed by teams.
- Unofficial Transcripts (to be uploaded with online application). Upon acceptance to the program, official transcripts, stating an undergraduate degree was conferred, must be submitted to complete the enrollment process. (For International Students: Official transcript evaluations from a NACES member organization are required.)
- Statement of purpose. This two-page paper should describe your broader goals within the field of urban design, and why pursuing an MUD degree is the right path for you. Please also describe your significant academic experiences and touch on why you believe that you can successfully undertake graduate study.
- International Students also need: TOEFL (Minimum score: 87), IELTS (Minimum score: 6.5), ELS (Minimum Level: 112), or Duolingo (Minimum score: 110) scores.
- GRE not required.
- The Master of Urban Design (MUD) has been officially designated as a STEM degree program. The STEM designation, which refers to the academic disciplines of Science, Technology, Engineering, and Mathematics, will further benefit highly skilled international students who want to continue to gain work experience in their field of study in the United States following graduation. This designation permits international students enrolled in the Master of Urban Design program and studying on an F-1 visa to apply for the 24-month STEM OPT extension.

Application Deadlines

All application materials should be received prior to **January 10** to ensure first consideration for a financial award from the School of Planning. Assistantships and scholarships are merit-based and extremely competitive. However, the School of Planning will accept applications not requesting financial consideration up to **March 1** of each year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Architecture

Duration: **3 Years** Award: **PHD**

Overview

University of Cincinnati's **Ph.D. Program in Architecture** is a post-professional degree program of advanced theoretical studies in architecture with a focus on the acquisition of critical skills related to architectural production, both built and theoretical. It is intended primarily for students already in possession of a graduate degree in architecture or a related field such as interior design, planning, or landscape architecture. The Ph.D. program is an outgrowth of the university's longstanding MS Program in Architecture, whose focus has traditionally been on architectural history, theories, and criticism as they relate to architectural practice. The program exposes students to a range of concepts in the field and fosters the ability to question and assess the built environment and the documents that relate to it.

In addition to a common core consisting of coursework in architectural theories and research methods, students complete courses in a minor field, demonstrate mastery of a major with the qualifying exam, and successfully defend a dissertation proposal in the third year, qualifying for candidacy and achieving ABD ("all but dissertation") status. Students research, write and defend the dissertation in the final years of the program. With faculty members with technical expertise in human and environmental factors, computation, parametric design, and robotics in addition to the program's traditional strengths in history, theory, and criticism, the program can accommodate a range of student interests. The major exam is a multi-day written examination based on a reading list agreed upon among the committee members.

To fulfill the minor requirement, students may propose an individual course of study, supervised by a professor other than the dissertation chair, or they may choose from among a number of approved graduate certificates offered by the university. Popular options include Historic Preservation; Urban Design; Women's, Gender, and Sexuality Studies; and Data Analytics.

Success

Applicants to the Ph.D. Program in Architecture must demonstrate a commitment to the critical study of architecture and related design fields, including interior design, urban design, and landscape architecture. Prior education or working experience in architecture or a related field is desirable. Excellent writing skills and an interest in theoretical research are essential. Students whose English writing or speaking skills are not adequate for the demands of the curriculum must enroll in advanced, graduate-level English as a Second Language coursework prior to, and sometimes in tandem, with program coursework.

Career

The Ph.D. Program in Architecture prepares researchers, educators, and practitioners for advanced scholarly, pedagogic, and professional work in architecture and related fields. Most graduates of the program become full-time professors or practitioners of architecture. Other career opportunities include historic preservation, public policy, curating, journalism, and institutional administration.

Curriculum Guide Versions:
Ph.D.2024
Ph.D 2019

Advising

Because UC's Ph.D. Program in Architecture has a small number of students, we are able to facilitate one-on-one student and faculty advising and collaboration. Students work with their faculty to develop their research and writing skills and they publish and present their work in national and international venues. While the program does not have separate tracks for students pursuing technical research, program faculty members assist students in identifying coursework and campus resources to develop the necessary competencies. All entering students have the opportunity to consult with multiple members of the Ph.D. Program faculty and with the program coordinator to determine appropriate elective coursework and dissertation committee composition.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system

among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.

- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Architecture students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- UC's emphasis on interdisciplinary studies facilitates interaction with counterparts in other schools of the College of Design, Art, Architecture, and Planning as well as other colleges such as the Engineering, Arts and Sciences, Medicine, and the College Conservatory of Music. Such interdisciplinary studies should be planned in consultation with PhD Program faculty members and approved by the Ph.D. Program coordinator.
- Eligible students accepted to the Ph.D. Program in Architecture may compete for a limited number of scholarships and assistantships. All students are required to participate in a teaching practicum as part of the program, and many are chosen for paid teaching assistantships in the latter years of the program. Students are also eligible to work in campus jobs for up to 20 hours per week when classes are in session and 40 hours during vacations.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalog, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Macs, and peripherals such as scanners, plotters and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom.
- The college supports a Rapid Prototyping Center, which is the home of state-of-the-art equipment that allows students to create communication aids for their work. Using CAD (computer-aided design) models, students are able to create physical models using three basic methods: 3-D printing, large format laser-cutting and CNC (computer numeric control) devices.

Admission Requirements

Students applying to the Ph.D. Program in Architecture should have completed a Master's degree in architecture or a related field prior to matriculation. Students with an undergraduate degree or with an unrelated graduate degree must instead apply for the MS Program in Architecture. Some students enter the Ph.D. program directly from the MS program. These students retain their credits from their MS studies and enter the Ph.D. program at an advanced phase commensurate with their completed studies.

Unofficial transcript(s) from all colleges/universities attended are required. Official transcripts are not required during the admissions process, and only unofficial transcripts are required for the application. Applicants should not send official transcripts until they are offered admission and confirm enrollment to the university. For complete transcript requirements, please view the Transcript Submission Policy webpage.

A portfolio of design, art, or other graphic work is optional. The portfolio is an opportunity to demonstrate your design abilities, artistic talents, or other information you deem pertinent to your application. The content does not have to be architectural if your background is in another discipline. Written project statements to accompany visual work are helpful. Portfolios are submitted online. **We do not accept hard copies of portfolios.**

Three letters of recommendation from persons who are in a position to evaluate your abilities and your potential for success as a graduate student are required. There is no standard form to fill out; instead, based on the information you provide in your application, recommenders will be emailed instructions on the process for submitting letters of recommendation.

A summary of your academic and professional experiences is required.

A two-page statement of your interest in graduate study in architecture is required. This should be a concise, articulate presentation of your academic and career goals, and any specific interests you have in architectural topics for graduate research and design. It should reflect your prior intellectual and professional engagement with these issues, and may also provide some additional perspective on the work illustrated in the portfolio.

Students applying to the Ph.D. program must submit one or two writing samples demonstrating the ability to conduct scholarly research and examine theoretical concepts. The essays can expand on the areas of research interest or on any topic.

International Student Requirements

For applicants whose native language is not English, a TOEFL (Test of English as a Foreign Language) score of at least 100 iBT (600 paper) or an IELTS score of at least 7.0 is common and is typically our minimum. The university requires minimum scores of 80 on the TOEFL and 6.5 on the IELTS. Applicants with scores below the campus minimums will not reach the Ph.D. in Architecture admissions committee for review. Students whose scores are above the campus minimum but below the Ph.D. in Architecture Program standards, or students whose English writing or speaking ability does not meet program expectations, will be considered on a case-by-case basis, however, they must agree to take graduate-level ELS coursework and possibly other courses as a condition of acceptance.

Application Deadlines

ALL applicants must apply by January 10th.

The application process begins with an online UC Graduate Application. Supplemental materials are to be submitted online through the application process.

New students are admitted for the fall semester. We will notify successful candidates by April 15. An offer of admission may be withdrawn if a candidate does not accept within six weeks of our offer.

In general, the program offers neither deferrals nor admission in semesters other than fall, however individual requests for admission deferrals and for spring semester admission may be considered on a case-by-case basis depending on the specific nature of the request and the ability of the program administration to accommodate it.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The architecture program of the University of Cincinnati has been accredited by the National Architectural Accrediting Board (NAAB) continuously since 1948, and its courses satisfy requirements maintained by various state architectural registration boards.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The NAAB, which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the bachelor of architecture, the master of architecture, and the doctor of architecture. A program may be granted a 8-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.University of Cincinnati's Ph.D. program in Architecture is not an accredited professional degree.

Regional Development Planning

Duration: **4 Years** Award: **PHD**

Overview

The Ph.D. program in Regional Development Planning provides rigorous academic training for research in planning theory, urban and regional theories, advanced research, and planning practice. The purpose of the doctoral program is to educate and train the next generation of practitioners, policymakers, and scholars who will bring new research ideas and knowledge to the teaching and practice of urban and regional planning. The program is served by the School of Planning's faculty members with wide ranges of expertise. This program stresses the interdisciplinary analysis and solutions to the regional development problems from inner cities to mega-cities transcending geographic boundaries and requiring spatially-based systems thinking.

All of our current Ph.D. students have completed a Master's degree in planning or a related discipline. As part of the application process, potential students need to identify a research topic of interest (part of the essay). Full-time students take approximately four courses per semester during their first two years in the program. The School of Planning requires all doctoral students to take nine required courses, including courses in planning and spatial theory, quantitative and qualitative research methods, research design, and dissertation-research-related courses. After passing their comprehensive exam, students typically spend two to four more years completing their individual doctoral research. The School of Planning provides all admitted students with a financial package consisting of tuition scholarships during their two years of coursework. The School of Planning also provides a four-year paid graduate assistantship at the school or assistantships at academic or external research centers. As part of their training, Ph.D. students are also required to teach a course under the supervision of a School of Planning faculty member.

Career

Most graduates of the School of Planning (SOP) Regional Development Planning (RDP) Ph.D. program find work in academia as an assistant professor in either research or teaching colleges and universities. Recent graduates of the SOP RDP Ph.D. program are teaching in the United States, China, Sweden, and South Africa. Outside of academia, our graduates work in Think Tanks, nongovernmental organizations, and government institutions.

Regional Development Planning PhD

Admission Requirements

Please note that applications will not be reviewed prior to the application deadline.

- UC Graduate Admissions Application and $65 application fee for domestic applicants / $70 USD application fee for international applicants
- Unofficial transcript(s) from all colleges/universities attended showing cumulative GPA that also includes diploma and translation showing completion of a U.S. four-year bachelor's degree (or what is equivalent to a U.S. four-year bachelor's degree) and diploma and translation of master's degree if applicable. Note: Official transcripts are not required during the application process; only unofficial transcripts are required for the application. Applicants should not send official transcripts unless they are admitted and confirm enrollment. For complete requirements please visit UC's Official Transcript Submission Policy page.
- Official Graduate Record Examination (GRE) scores, taken in the past five years. Note: The school normally expects successful applicants to exceed the median test scores on the GRE. The GRE requirement cannot be waived.
- Official TOEFL, IELTS, Duolingo, or PTE scores (international students only)
- Three reference letters (to be submitted online).
  - At least two reference letters should be academic recommendations.
- Resume or CV
- Portfolio (optional)
- Sample of written work (e.g., master's thesis or published article).
  - Select a piece relevant to admission to the program.
- Statement of purpose; should include the following:
  - Summary of your career goals and reasons for pursuing doctoral education.
  - Discussion of how your undergraduate/graduate studies have prepared you for doctoral study in regional development.
  - Why do you want to do your doctoral research at the University of Cincinnati.
- Statement of research:
  - Proposed area of concentration (e.g., transportation planning, urban design, economic development, environmental planning, community development, etc.). What might be the subject of your doctoral research? Describe in one-two

paragraphs your research interests.
- Potential advisor for doctoral studies. To which School of Planning faculty member's work is your research interested related? Explain how your research interest relates to the research activities of the professor.

International Student Requirements

Full admissions requirements can be found on the Graduate Admissions webpage.

The Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is not English—including those with F-1 visas or J-1 visas already in the US unless you qualify for an approved English waiver (for automatic waiver of English language testing, see: https://grad.uc.edu/admissions/criteria/english.html). The minimum acceptable TOEFL score for School of Planning applicants is 550 (paper-based), 213 (computer-based), or 80 (internet-based). Please note that the TOEFL is not a pass-fail test. While a score of 80 is the minimum score to be accepted into the School of Planning Ph.D. program, a score of 90 or above is preferred.

The Oral English Proficiency Test (OEPT) tests the language skills of non-native speakers of English who are awarded teaching assistantships at the University of Cincinnati. The required score is 3.0. Students who pass are certified for oral English proficiency and may assume the full range of duties associated with their teaching assistantship. Those who do not pass are recommended for an English as a Second Language (ESL) class appropriate to their needs. Students whose oral English proficiency has not been officially certified may not assume instructional responsibilities. Students who score 26 or above on the speaking section of TOEFL iBT or students with a score of 50 or above on the Test of Spoken English are exempt from OEPT. Each student is permitted to take the OEPT twice without charge during an academic year. The OEPT must be taken prior to teaching, preferably not later than in year two of study.

Application Deadlines

The deadline is **January 10th** for those who wish to be considered for financial support.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Cannabis Studies

Duration: **2 Years** Total Credits: **15** Award: **Certificate**

Overview

There is an increasing need for knowledgeable graduates familiar with cannabis as the industry becomes more mainstream. The new Cannabis Studies Certificate offers students a multi-disciplinary foundation for understanding the cannabis plant and the cannabis industry, enabling them to more readily gain employment in one of its many subfields.

Career

Employment in the cannabis industry revolves around cultivation, processing, testing laboratories, dispensaries and physicians. Ancillary positions include those in product design, manufacturing and distribution; marketing, sales and end user support; accountants, attorneys, social media consultants, security, quality control and more. Employees in all of these areas could benefit from a Cannabis Studies Certificate.

Students will graduate with a bachelor's degree in their chosen field, with special expertise in cannabis demonstrated by achieving the Cannabis Studies Certificate. This will make them more qualified than the average graduate for a number of different employment opportunities related to cannabis.

Curriculum

The Cannabis Studies Certificate consists of five 3-credit courses (15 credits). All students will take the survey course HORT 4081/6081, Introduction to Hemp and Medical Cannabis, and the hands-on HORT 4082, Hops and Hemp Field Experience. The remaining three classes will be chosen from a menu of possible classes based on the student's interest or job preference.

For example, a student who is interested in cultivation will focus on the horticulture and biology classes. One who would work at a dispensary will be most interested in the classes related to public health, substance abuse, and public policy. A student interested in cannabis processing would be likely to choose plant chemistry classes as well as those dealing with the effects of cannabis on the body. All students would benefit from classes in the history and cultural uses of cannabis.

HORT 4084 Hops and Hemp Field Experience is offered at the UC Center for Field Studies during the summer semester. The remaining are offered as conventional courses during the academic school year.

Advising

Students interested in this certificate should work with their major advisors to confirm the compatibility with their major's requirements and course schedules. Questions about the certificate should contact DAAP Admissions at daap-admissions@uc.edu or 513-556-1376.

Admission Requirements

Students already pursuing a degree in any college at UC can add the certificate to their program. To apply, students should submit the DAAP Undergraduate Application for Certificates and Minor online.

In addition, you are invited to meet with the program director so that they are aware that you are pursuing the certificate and can advise you appropriately. Do this early enough to avoid delay in obtaining your certificate.

Students not currently pursuing a degree may declare the certificate after establishing non-matriculated status.

Graduation Requirements

Make sure that you have declared the certificate program online. Next, make sure that the certificate program director is aware of when you are finishing the program. If you are pursuing another bachelor's degree, then your certificate will be reviewed at the time that you submit your separate degree application.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Critical Visions

Duration: **2 Years** Total Credits: **22** Award: **Certificate**

Overview

The Critical Visions certificate program is jointly administered by the College of Arts and Sciences and College of Design, Architecture, Art, and Planning. The program has two primary goals: (1) Increase students' understanding of what is at stake in how we see, including the social and political ramifications of advertising, art, media, science, and popular culture, among other dominant and subversive visual forms and visualizing practices. (2) Develop new artistic, media or design forms and practices that intervene in dominant ways of seeing and explaining the world. Students in the program's capstone publish a biennial peer-reviewed critical theory/art journal, *CVSN*.

Career

Students interested in this certificate may wish to be a professional artist, designer, editor, author, or writer.

Advising

Students interested in this certificate should work with their major advisors to confirm the compatibility with their major's requirements and course schedules. Questions about the certificate should contact DAAP Admissions at daap-admissions@uc.edu or 513-556-1376.

Admission Requirements

Students seeking admission to this certificate must have at least a 2.5 cumulative grade point average in at least 12 credit hours of previous college work. To apply, students should fill out the Declare a Certificate application.

Students not currently pursuing a degree at the University of Cincinnati may declare this certificate after establishing non-matriculated status. Once you have established non-matriculated status, please reach out to daap-admissions@uc.edu for next steps.

Graduation Requirements

Make sure that you have declared the certificate program online. Next, make sure that the certificate program director is aware of when you are finishing the program. If you are pursuing another bachelor's degree, then your certificate will be reviewed at the time that you submit your separate degree application.

Critical Visions

Certificate

Critical Visions Certificate

Duration: 2 Years
Minimum Credits: 22 Credits

Required Core Courses

Ten hours are required. Students must complete FAA1080 and ANTH3074 and can complete either ANTH5075 or FAA5075.

Course	Title/Desc	Credit
ANTH3074	Forms of Seeing	3
ANTH5075	Critical Visions	4
FAA1080	Introduction to Contemporary Art and Visual Culture	3
FAA5075	Critical Visions	4

Studio

Students will take at least one studio and/or media production course at or above the 2000-level from the approved list below. While enrollment in the certificate program will provide access for A&S students to DAAP studios in Fine Arts, they will still need to seek instructor approval for logistical reasons. Intermediate and advanced courses, however, may still require prerequisites. This is a provisional list of approved studio courses open to A&S certificate students that will fulfill the studio requirement. Students may petition the co-directors of the certificate to substitute alternative studios, pending space and instructor approval. DAAP students may use any studio at or above the 2000-level from across the college to fulfill this requirement. As CCM is not a formal partner in this certificate, its studios are subject to space and instructor approval for certificate students.

Course	Title/Desc	Credit
DMC2000	Digital Storytelling I	3
DMC2001	Digital Storytelling II	3
DMC2130	Introduction to Filmmaking	3
DMC3035	Feature Film Writing	3
DMC3166	Documentary Production	3

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Green Roofs

Duration: **2 Years** Total Credits: **15** Award: **Certificate**

Overview

This certificate imparts knowledge and skill in the planning, design, installation, and maintenance of green roofs. Green roofs, also known as vegetated roofs, are landscapes over structure, requiring expertise that combines several fields of study: landscape architecture, architecture, horticulture, and landscape design and maintenance. The roof is the final frontier of urban spatial design, and the vegetated urban roof supports environmental, economic, and social components of sustainable urban design. This certificate addresses contemporary issues in living architecture, particularly in this emerging area of expertise.

Upon completion of this certificate, students will be able to

- Exhibit basic proficiency in the advocacy, planning, design, construction, and maintenance of vegetated roofs.
- Apply critical thinking skills to the analysis of existing and proposed vegetated roof systems.
- Describe the benefits and public health, safety, and welfare issues associated with vegetated roofs.
- Describe applicable policies, codes, regulations, and incentive programs related to vegetated roof implementation.
- Describe the role of vegetated roofs in sustainable site and building design.
- Prepare basic feasibility and precedent studies that support the implementation of appropriate vegetated roof systems.

The certificate in green roofs is one of the first in North America, and its faculty are practicing experts in their fields of horticulture and landscape architecture. Students who pursue this certificate may also be interested in becoming Accredited Green Roof Professionals (GRP) with the organization Green Roofs for Healthy Cities.

Success

Students with an interest in landscape, the environment, sustainability, plant health and maintenance, design, and team work will excel in this certificate program. This area of expertise requires the coordination of several areas of expertise to plan, design, install, and maintain these unique landscape environments.

Career

This certificate will supplement the fundamental knowledge and skills offered by undergraduate training in:

- landscape architecture
- planning
- architecture
- horticulture
- engineering
- design
- construction management
- environmental studies

Additional career options are listed on the Center for Exploratory Studies website.

Advising

Students interested in this certificate should work with their major advisors to confirm the compatibility with their major's requirements and course schedules. Questions about the certificate should contact DAAP Admissions at daap-admissions@uc.edu or 513-556-1376.

UC Advantages And Special Opportunities

- The certificate in green roofs is one of the first in North America, and its faculty are practicing experts in their fields of horticulture and landscape architecture. Students who pursue this certificate may also be interested in becoming Accredited Green Roof Professionals (GRP) with the organization Green Roofs for Healthy Cities.

Admission Requirements

Students seeking admission to this certificate must have at least a 2.5 cumulative grade point average in at least 12 credit hours of previous college work. To apply, students should fill out the Declare a Certificate application.

Students not currently pursuing a degree at the University of Cincinnati may declare this certificate after establishing non-matriculated status. Once you have established non-matriculated status, please reach out to daap-admissions@uc.edu for next steps.

Accreditation

Green Roofs

Certificate

Green Roofs 2020

Duration: 2 Years
★Minimum Credits: 15 Credits

Core Requirements
Students must take each of these classes.

Course	Title/Desc	Credit
HORT1010	Horticulture Science I	3
HORT2040	Sustainable Landscape Design I	3
HORT3010	Soil Science and Plant Nutrition	3
HORT3044	Urban Landscape IV: Roofs and Facades	3

Green Roof elective
Students must choose one of these classes for a total of 3 credit hours.

Course	Title/Desc	Credit
HORT3040	Urban Landscape I: Forestry	3
HORT3042	Urban Landscape II: Agriculture	3
HORT3045	Urban Landscape V: Interiors	3
HORT4093	Study Abroad in Horticulture	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Historic Preservation

Duration: **1 Year** Total Credits: **18 - 21** Award: **Certificate**

Overview

Historical preservation is concerned with the maintenance and repair of historic objects. This program is designed to develop an appreciation for and a working knowledge of the issues and techniques involved in historic preservation.

The College of Design, Architecture, Art, and Planning and the College of Arts and Sciences collaborate in offering this special program of studies in historic preservation. The program is open to degree candidates in any program in either college. The certificate is awarded concurrently with a bachelor's degree.

Success

Students should have an interest in history, an eye for design, and the ability to multi-task and work with people.

Career

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Historic Preservation Undergraduate Certificate 2024

Advising

Students interested in this certificate should work with their program advisors to confirm the compatibility with their major's requirements and course schedules. Students enrolled in the School of Architecture and Interior Design or School of Planning will work with the faculty coordinators in those schools to learn more about certificate requirements and course selection.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Other educational opportunities include organized travel semesters, foreign study semesters and student exchange programs in England, Germany and Denmark. Many architecture students also pursue joint degrees and certificate programs within the college and the university.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Apple computers and peripherals such as scanners, plotters and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom.
- The college supports a Rapid Prototyping Center, which is the home of state-of-the-art equipment that allows students to create communication aids for their design projects. Using CAD (computer-aided design) models, students are able to create physical models using three basic methods: 3-D printing, large format laser-cutting and CNC (computer numeric control) devices. This facility is intended for all DAAP students to use in creating large-scale design.

Admission Requirements

Students seeking admission to this certificate must have at least a 3.0 cumulative grade point average in at least 12 credit hours of previous college work. To apply, students should fill out the Declare a Certificate application.

Students not currently pursuing a degree at the University of Cincinnati may declare this certificate after establishing non-matriculated status. Once you have established non-matriculated status, please reach out to daap-admissions@uc.edu for next steps.

Transferring To UC

Most students enrolling in the certificate program are already matriculated into one of the University of Cincinnati's undergraduate or graduate degree programs. To apply, students should turn in the application to the DAAP Student Affairs Office, 5470 Aronoff.

Graduation Requirements

Students seeking certification must complete a minimum of 18 credits in required courses in historic preservation and closely related topics offered by various programs in the two sponsoring colleges. This includes completion of an approved internship. Students enrolled in the professional practice program will coordinate internship with one professional practice semester.

In addition, candidates for the bachelor of science in architecture and bachelor of science in interior design degree must take at least one appropriate studio in historic preservation. Candidates for the bachelor of urban planning degree must take Historic Preservation in Planning.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Historic Preservation

Certificate

Historic Preservation Undergraduate Certificate 2024

Duration: 1 Year

★Minimum Credits: 18 - 21 Credits

Required Courses

Students must complete the following courses:

Course	Title/Desc	Credit
ARCH5125	Introduction to Historic Preservation (C- min)	3
ARCH5128	Historic Resource Documentation (C- min)	3
ARCH5129	Historic Building Rehabilitation (C- min)	3

Urban History & Structure Elective

Students must complete one course from the following:

Course	Title/Desc	Credit
ARCH4051	History and Theory of Cities (C- min)	3
GEOG3060	Cities (C- min)	3
HIST2026	Cities in American History (C- min)	3
HIST3021	History of Cincinnati (C- min)	3
HIST5126	The Unsustainable City (C- min)	3
PLAN3051	Urban Spatial Structures (C- min)	3
PLAN3091	Observing the City in Brazil and the United States (C- min)	3
PLAN5140	History of Urban Form (C- min)	3

Internship Requirement

Course	Title/Desc	Credit
Internship	Work experience with an entity engaged in some aspect of historic preservation. Minimum of 90 hours if unpaid with a not-for-profit; 200 hours if paid at or near minimum wage; or 400 hours if fully paid co-op. Letter from direct supervisor to certificate adviser describing the work done and its relevance to historic preservation required.	0

Architectural History Elective

Students must complete one course from the following:

Course	Title/Desc	Credit
ARCH3027	History of American Architecture (C- min)	3
SAID1021	Modernism and Form: History of Architecture 1750 to Present (C- min)	3
SAID1023	Introduction to Modern Architecture and Design (C- min)	3

Track Elective

Students must complete one course in their chosen track:

Course	Title/Desc	Credit
AE5130	Building Energy Modeling (C- min)	3
ANTH3016	Public Archaeology (C- min)	3
ARTH3014	Approaches to Art History (C- min)	3
CVE5158	Design of Wood Structures (C- min)	2
HIST3028	American Material Culture (C- min)	3
HIST3046	Museums and Collecting (C- min)	3
PLAN2012	Planning Design Studio: Neighborhood/District (C- min)	3
ARCH4001	Architecture Studio 4 (C- min)	6
INTD4001	Interior Design Studio 4 (C- min)	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Horticulture

Duration: **2 Years** Total Credits: **18** Award: **Certificate**

Overview

The certificate in horticulture introduces students to the various fields associated with horticultural science, including plant identification, growth, health, and reproduction. Students who pursue the minor or certificate in horticulture must submit the online application that will be sent to the DAAP Student Affairs Office in Aronoff 5470.

Upon completion of the certificate in horticulture, students will be able to

- Perform the fundamental practice and methods of horticultural science.
- Demonstrate basic knowledge of the roles of soil and nutrition in plant health.
- Demonstrate the basic knowledge and skills to identify favorable conditions for native and cultivated plants.

Success

Students with interests in the environment, the natural world, science and ecology, and landscapes will excel in this certificate program.

Career

This certificate will supplement the fundamental knowledge and skills offered by undergraduate training in:

- horticulture
- botany
- biology
- environmental studies

Additional career options are listed on the Center for Exploratory Studies website.

Museum Studies

Duration: **2 Years** Total Credits: **12** Award: **Certificate**

Overview

What is Museum Studies?

Museum Studies or Museology is the study of Museums. It explains the history of museums and their role in society, as well as the activities they engage in, including curating, preservation, public programming, and education.

What types of courses can I take?

Students can take courses in history, public history, anthropology, art history, art education, and sciences. We are actively reviewing courses for consideration and adding additional course options on an ongoing basis.

What types of subjects will be addressed?

This program is currently focused on three main areas of museum studies:

- Exhibitions: Curation of physical and digital, exhibitions, design and planning of exhibitions, and the use of art in the public space.
- Collections: Curation of collections, conservation, preservation, data management and tracking assets.
- Education: Public programs within a museum, community putreach, and artist-led initiatives.

Success

Who is accepted into the program?

The world of collections and exhibitions can be greatly rewarding for many personalities with varied interests. Museums and galleries provide opportunities for learning in dynamic settings. The conservation and handling of objects within collections can provide exciting opportunities to engage with history and its preservation. The process of making exhibitions can be a challenging yet rewarding way to collaborate with scholars and specialists in all fields to present and inform the public about a vast spectrum of knowledge, from art to science to history to nature.

If you are interested in some of the many areas mentioned above and meet the requirements listed below, we would welcome your application! We are accepting applicants on an ongoing basis and are happy to answer any questions you may have when deciding if this is the program for you.

Career

What can a Museum Studies Certificate provide to you?

- If you are interested in working in museums, galleries, historic homes, libraries, archives, or zoos and aquariums, a Museum Studies Certificate can provide insight into the structure and processes within a organization, the theories applied, knowledge, and hands on skills needed to perform specialized duties within a museum environment.
- If you currently work in a museum, you can increase your knowledge and demonstrate your continued dedication to that field through continuing your education.
- If you are studying or work in a field doing research or teaching, you can learn the skills and techniques that will allow you to exhibit and present your research in a manner that communicates to your peers and also to the general public in a variety of settings.
- This certificate explores fundamental aspects of museum work. It can provide you with the skills and knowledge that are the basis for many aspects of museum work, including: museum management, collection care and maintenance, and exhibition and educational program development. It is an integrated program of study combining classroom instruction with an internship opportunity for direct on-the-job experiences

Curriculum

The curriculum of this multidisciplinary certificate program is designed to supply students with a balance of the practical and theoretical information needed to work in the museum world.

It consists of four classes: one (1) internship + any three (3) courses from the available electives.

Planning

Duration: **1.5 Years** Total Credits: **18** Award: **Certificate**

Overview

Urban planning and management are key municipal functions in the United States and Western Europe. In the rapidly growing developing world, urban expansion has far outstripped the capacity of city governments to cope with the bewildering array of problems this mass movement and spatial reorganization of the population generates. Huge, difficult-to-manage, multi-centered megacities continue to emerge worldwide, along with the proliferation of thousands of other smaller cities. Nevertheless, the attraction of urban life has never been greater. With more than 50 percent of the world's population living in cities at the turn of the century, the 21st century will be the world's first truly urban era.

The challenge this urbanized world poses is the substance of the planning profession. Planners are dedicated to developing innovative approaches to managing cities and planning their development. The constructive management of change is at the heart of the profession. Planners often work in local governments and communities, but their concerns are issues that affect the world — land use, social policy, historic preservation, transportation, housing, economic development, policy planning, environmental protection, urban design and international development. Planners are visionaries working for a better future through improvements in the quality of life in one or more of these areas.

Success

Those who work successfully in the field of urban planning possess a heightened social consciousness. They possess strong communication skills, are people-oriented and are comfortable in meeting with many different types of people, as well as being attentive listeners. Urban planners are interested in multidisciplinary issues and enjoy working collaboratively.

Career

Those in the field of urban planning develop solutions for many of society's most pressing problems, providing a variety of services to cities, towns, states, regions and private clients interested in changing their physical, economic or social structures. As cities become increasingly important, the field of planning grows.

Pre-Art Therapy

Duration: **2 Years** Total Credits: **33** Award: **Certificate**

Overview

According to the American Art Therapy Association (2017) "Art therapy is an integrative mental health and human services profession that enriches the lives of individuals, families, and communities through active art-making, creative process, applied psychological theory, and human experience within a psychotherapeutic relationship."

"Art therapy, facilitated by a professional art therapist, effectively supports personal and relational treatment goals as well as community concerns. Art therapy is used to improve cognitive and sensorimotor functions, foster self-esteem and self-awareness, cultivate emotional resilience, promote insight, enhance social skills, reduce and resolve conflicts and distress, and advance societal and ecological change."

A certificate in Pre-Art Therapy seeks to achieve two primary goals:

- To increase students' understanding and knowledge about the field of art therapy
- Prepare students to apply to art therapy graduate programs since a graduate-level art therapy degree is required in order to practice art therapy professionally.

Career

The Pre-Art Therapy Certificate helps students to meet the prerequisites for most master's programs in art therapy. A career in art therapy requires a master's degree. Approved master degree programs in art therapy are listed with the American Art Therapy Association.

Majoring

Students who pursue a certificate in art therapy tend to major in psychology or fine arts; however the certificate may complement any major.

Curriculum

The undergraduate Pre-Art Therapy Certificate is a collaborative program among Clermont College, the College of Arts and Sciences (A&S), and the College of Design, Architecture, Art, and Planning. The certificate combines knowledge and skills from the fields of psychology, fine arts, and art therapy.

Pre-Art Therapy

Certificate

Fall 2018 Pre-Art Therapy Certificate Checklist

Duration: 2 Years

★Minimum Credits: 33 Credits

Drawing Requirement

Please select 1 course (minimum 3 credit hours) from the list below:

Course	Title/Desc	Credit
FAA1001	Drawing Studio	3
FAA1010	Drawing Fundamentals I	3
FAA1022	Basic Rendering the Figure from Life for non-DAAP majors	3
FAA1025	Basic Drawing for non-DAAP Majors	3
FAA5121	Comics, Graphic Novels & Sequential Art I - The Basics. Black & White	3
FAA	FAA----- Aproved Course Approval of advisor needed if course is not listed. Must be a studio course where students learn fundamentals of drawing.	3

Introductory Course in Art therapy

Please select 1 course (minimum 3 credit hours) from the list below:

Course	Title/Desc	Credit
PSYC2008	Introduction to Art Therapy	3

Painting Requirement

Please select 1 course (3 credit hours minimum) from the courses below:

Course	Title/Desc	Credit
FAA1020	Painting Fundamentals I	3
FAA1032	Introduction to Watercolor Painting	3
FAA1040	Basic Painting for non-DAAP majors	3
FAA2041	Introduction to Painting	3
FAA	FAA----- Aproved Course Approval of advisor needed if course is not listed. Must be a studio course where students learn the fundamentals of painting.	3

Psychology Requirements

Four courses required (minimum 12 credits hours).

Course	Title/Desc	Credit
PSYC1001	Introduction to Psychology	3
PSYC2040	Developmental Psychology	3
PSYC2051	Fundamentals of Psychopathology	3
PSYC2053	Personality	3

Ceramics Requirement

Please select one course (minimum 3 credit hours) from the list below:

Course	Title/Desc	Credit
FAA1029	Basic Wheel Throwing for non-DAAP majors	3
FAA1034	Basic Ceramic Handbuilding for non-DAAP majors	3
FAA2011	Introduction to Ceramic Handbuilding	3
FAA2012	Introduction to Wheel Throwing	3
FAA2017	Fundamentals of Ceramics I	3
FAA	FAA----- Aproved Course Approval of advisor needed if course is not listed. Must be a studio course where students learn the fundamentals of working with 3 dimensional material.	3

Fine Arts Studio Electives

Choose (3) FAA---- studios offered by the university (includes drawing, painting, ceramics, photography, video, etc.) Consult with art therapy graduate program to ensure you meet fine arts course requirements (https://arttherapy.org/art-therapy-masters-education/).

Course	Title/Desc	Credit

Course	Title/Desc	Credit
FAA	FAA----- Studio Elective Studio course can include drawing, painting, ceramics, photography, video, etc.	3
FAA	FAA----- Studio Elective Studio course can include drawing, painting, ceramics, video, etc.	3
FAA	FAA----- Studio Elective Studio course can include drawing, painting, ceramics, video, photography, etc.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Sustainable Landscape Design

Duration: **2 Years** Total Credits: **15** Award: **Certificate**

Overview

According to the American Society of Landscape Architects, "Sustainable landscapes are responsive to the environment, re-generative, and can actively contribute to the development of healthy communities. Sustainable landscapes sequester carbon, clean the air and water, increase energy efficiency, restore habitats, and create value through significant economic, social and, environmental benefits."

The metropolitan area of the University of Cincinnati provides a diverse selection of interesting urban issues for study, including the preservation and revitalization of its historic neighborhoods and sustainable development in the suburban areas, the challenges facing one of the oldest park systems in North America, the assets and challenges of a major city in the climate and economy of the Ohio River Valley, and the role of plant life in the ecology, economy, and culture of the city.

Success

Those interested in sustainable landscape design think thoughtfully about the impact that plants can have on our lives. They enjoy learning about the natural world and the adjustments people can make to nurture the environment in a sustainable way.

Career

This certificate will supplement the fundamental knowledge and skills offered by undergraduate training in

- landscape architecture
- planning
- architecture
- horticulture
- engineering

Curriculum

Upon completion of this certificate, students will be able to:

- Demonstrate basic knowledge of sustainable landscape design and construction best practices.
- Apply basic knowledge of landscape design and construction best practices to design projects of various functions and sizes.
- Apply basic planting design principles to the effective use of native plant materials.

Sustainable Landscape Design

Certificate

Sustainable Landscape Design 2020

Duration: 2 Years
★Minimum Credits: 15 Credits

Core Requirements
Students must take each of these classes

Course	Title/Desc	Credit
HORT1010	Horticulture Science I	3
HORT2040	Sustainable Landscape Design I	3
HORT2041	Sustainable Landscape Design II	3
DAAP5061	Permaculture I	3

Electives
Students must choose one of these classes for a total of 3 credit hours.

Course	Title/Desc	Credit
HORT3044	Urban Landscape IV: Roofs and Facades	3
DAAP5062	Permaculture II	3
HORT3045	Urban Landscape V: Interiors	3
HORT4093	Study Abroad in Horticulture	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Urban Agriculture

Duration: **2 Years** Total Credits: **18** Award: **Certificate**

Overview

The certificate in urban agriculture responds to contemporary issues in horticulture, urban design, livability and quality of life, food security, and sustainability.

Upon completion of this certificate, students will be able to:

- Describe the global social, economic, and ecological issues of providing food for the urban population.
- Identify the favorable site and political conditions for the development of urban agriculture.
- Plan the critical path for the approval, design, and implementation process for urban agriculture.
- Prepare a design plan for an urban agriculture project that accounts for soil conditions, plant selection, construction, maintenance, funding, and staffing.
- Provide precedent and feasibility studies based on current literature and resources regarding urban agriculture.

This program is designed to work with local advocates and organizations who support urban agriculture in the metropolitan region of the University of Cincinnati. Students will work with regional experts to gain first-hand experience of the challenges and rewards of bringing fresh, safe, and healthy food to the city.

Success

Students interested in economic, social, and environmental equity will excel in this certificate program. Students who enjoy field experience, working with people and plants, and landscape design, installation, or maintenance will appreciate the hands-on nature of the certificates course requirements.

Career

This certificate will supplement the fundamental knowledge and skills offered by undergraduate training in:

- landscape architecture
- planning
- architecture
- horticulture
- engineering
- design
- construction management
- environmental studies

Additional career options are listed on the Center for Exploratory Studies website.

Urban Design

Duration: **2 Years** Total Credits: **15** Award: **Certificate**

Overview

The Urban Design Certificate will provide individuals with foundational knowledge about the art and science of cities through history to inform future visions for cities; introduce the skills and techniques to design livable, functional, and aesthetically appealing places in response to the current and future challenges of cities; and provide the ability to think critically, to encourage multidisciplinary solutions and appropriate sustainable design and management options that serve to promote harmony between the different facets of cities by considering them from a holistic perspective.

Success

Students should have a keen interest in cities, places and people. Students should be interested in learning about design, planning and policies to create better places for people.

Career

There is a growing demand for professionals who can inform efforts to design places to shape and accommodate the growth and livability of urban areas, promote functional spaces, and conserve the natural environment. These professionals are expected to help design new communities, public places, streets, commercial business districts, corporate and academic campuses, parks, as well as play a role in the renovation of neighborhoods, parts of towns, cities, or metropolitan regions. Such professionals are expected to examine the form, space, movement, time, activity patterns, and setting of cities. The field of Urban Design offers the necessary design frameworks, tools, techniques, and skills to shape the built urban environment through holistic, systematic and sustainable thinking and to confront the current challenges of cities in this 21st century.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Urban Landscapes

Duration: **2 Years** Total Credits: **15** Award: **Certificate**

Overview

The certificate in urban landscapes curriculum expands basic knowledge of building and landscape design to address the role of plant life in the sustainable urban environment.

Upon completion of this certificate, students will be able to:

- Recognize the urban systems that support life and current issues in their sustainable development.
- Recognize the favorable conditions for urban landscape restoration and improved quality of life.
- Describe the role of plant life in the urban landscape's social, economic, and ecological functions.
- Apply the basic principles of sustainable landscape design and construction to the development of an urban site.

The metropolitan area of the University of Cincinnati provides a diverse selection of interesting urban issues for study, including the preservation and revitalization of its historic neighborhoods and sustainable development in the suburban areas, the challenges facing one of the oldest park systems in North America, the assets and challenges of a major city in the climate and economy of the Ohio River Valley, and the role of plant life in the ecology, economy, and culture of the city.

Success

Students who are interested in the sustainable development of the city and its region will excel in this certificate program. This program gives students a new way to see the life of the city through studies of forestry, agriculture, living architecture, and infrastructure.

Career

This certificate will supplement the fundamental knowledge and skills offered by undergraduate training in:

- landscape architecture
- planning
- architecture
- horticulture
- engineering
- design
- construction management
- environmental studies

Design Strategy

Online

Duration: 1 Year Total Credits: 6 Award: MC

Overview

The “Design Strategy” micro-credential will focus on providing research and strategic tools for elevating practice as it relates to envisioning more usable, inclusive, desirable, and meaningful products, services and systems. The micro credential is offered for active professionals in the design and related fields as well as enrolled students in graduate programs (business, engineering, etc.).

Career

Insights on Career Opportunities:

Design Leadership: Gain qualifications for roles such as Design Strategist, Product Manager, or Innovation Consultant, driving user-centered and business-aligned outcomes.

Interdisciplinary Collaboration: Enhance the ability to work seamlessly with teams across disciplines, opening doors to strategic roles in cross-functional environments.

Market Differentiation: Develop expertise in user-centered research, critical for innovative industries.

Upskilling for Professionals: Active professionals can leverage this credential to advance in their current roles or pivot into strategic design positions, broadening their career trajectory.

Preparation for Graduate Students: For students in complementary graduate programs, the micro-credential adds a competitive edge by integrating design strategy into their academic and professional toolkit.

Architectural Studies

Duration: **2 Years** Total Credits: **18** Award: **Minor**

Overview

The study of architecture is, broadly speaking, the culturally responsible design and production of the built environment that is useful, durable, meaningful, inspiring, and responsive to its physical and social contexts. Architects can specialize in the design of a particular scale of the built environment, as urban designers, building architects, or interior designers, or specialize in a particular building type, such as residences, shopping facilities, hospitals, schools, houses of worship or office buildings. Architectural studies allows students to study the context, theory, and principles involved in the design of structures and cities at all these scales.

Success

The design of the built environment involves the synthesis of a variety of diverse requirements and values into a coherent creation. Among such requirements and values are functional suitability, aesthetics, technical performance, economic resources and constraints, social and cultural issues, environmental concerns and human comfort.

The successful architectural studies student will have an appreciation for these factors and seek a deeper understanding of the role of the built environment in human culture and experience.

Career

The professional practice of architecture and/or interior design requires a professional degree in the discipline. The Architectural Studies minor allows students to study the fundimental principles and values of the disciplines. Upon taking the minor, some students might choose to pursue further study and become an architect, an interior designer, or a practioner of a related field. This further study may include enrolling in SAID's Master of Architecture degree program, or in the School's Bachelor of Science in Interior Design degree program.

Minoring

A minor in architectural studies provides the underpinning history of significant architectural works, with buildings reflecting the social, cultural, political and technological circumstances of their culture. Sustainability in all its dimensions will be explored and understood as an important contemporary influence in forming the built environment. The professional practices of urban design, architecture, and interior design, and the multiples roles design professionals assume in realizing their designs are introduced and explored. Students can choose to focus their elective courses on history, theory and criticism, urbanism, real estate development, or building technology.

Students complete courses in environmental design principles, architecture history, and sustainable building science, and can choose electives from such areas as urban planning, architecture theory, and/or design thinking and problem solving.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue study in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.

- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating

architectural setting. Architecture students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.

- Students learn creative and technical skills in the classroom environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Apple computers and peripherals such as scanners, plotters and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom.
- The college supports a Rapid Prototyping Center, which is the home of state-of-the-art equipment that allows students to create communication aids for their design projects. Using CAD (computer-aided design) models, students are able to create physical models using three basic methods: 3-D printing, large format laser-cutting and CNC (computer numeric control) devices. This facility is intended for all DAAP students to use in creating large-scale design.

Admission Requirements

Students seeking admission to this minor must have at least a 2.7 cumulative grade point average in at least 12 credit hours of previous college work. To apply, students should fill out the Declare a Minor application.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Art History

Duration: **2 Years** Total Credits: **18** Award: **Minor**

Overview

Art History involves the historical interpretation and visual analysis of painting, sculpture, architecture, and other forms of visual art. Works of art are examined as primary sources that reveal much about the human experience past and present. Art historians are experts on the lives of artists as well as the forms, traditions, meanings, and cultural and theoretical context of the visual arts.

This 18 credit hour minor in art history will complement many fields of study, including but not limited to archaeology, anthropology, education, business, fashion design, and others.

Success

People who are successful in the art history program tend to have both visual and verbal learning styles. Art history is important to students who are passionate about art, enjoy learning, and believe in the value of a broad humanistic education. They study the lives and works of artists and designers and deal with questions about the forms, traditions, meanings, and cultural context of works of art, architecture, and design of both present and past.

Career

Art history students can prepare for employment as teachers, museum curators, commercial art gallery proprietors or staff, art conservators, art librarians, photographers, journalists, advertising professionals, television and film producers, and many other art-related occupations. Many art history students enter graduate school immediately after graduation, while others enroll after some work experience has led to specialization in a particular area.

Minoring

Art history students in UC's College of Design, Architecture, Art, and Planning (DAAP) may focus on different cultures, various periods of time, and particular forms of art, such as painting, sculpture, printmaking, architecture, design or the decorative arts. Courses are offered in many areas including Renaissance, Baroque, Asian, Modern, African-American, and American art history and museum studies. Courses in ancient art and architecture are taught by members of the UC Classics Department. Many additional courses in the history of design, architecture, and cities are offered in other programs of the college.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Fashion Studies

Duration: **2.5 Years** Total Credits: **18** Award: **Minor**

Overview

The Fashion Studies Minor provides the underpinning theories of fashion as a social and material culture, integrated within and reflective of the essence of time, place and people. Fashion history, design, and business are introduced and explored as composite facets of a global phenomenon through required and elective coursework. The Fashion Studies Minor prepares students to engage fashion from varied perspectives through exposure to the multitude of career pathways within fashion.

Success

The fashion industry requires strong communication skills, time- and project-management skills, and an understanding of fashion business practices. Those who work in the fashion industry are passionate, creative, forward-thinking, and innovative. This fast-paced, trend-driven business thrives at the intersection of creativity and market place innovation.

Career

The fashion industry spans multiple fields of expertise including design, product development, merchandising, planning and buying, and business. The Fashion Studies Minor exposes students to contemporoary business practices in the fashion industry and offers experience with creative, product deveopment practices through elective coursework.

Advising

Contact DAAP Advising to learn more.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Architecture students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Students learn creative and technical skills in the studio environment, taught by a passionate faculty who interact with their students on a daily basis. The goal is to guide students as they grow both intellectually and professionally.
- Other educational opportunities include organized travel semesters, foreign study semesters and student exchange programs in England, Germany and Denmark. Many architecture students also pursue joint degrees and certificate programs within the college and the university.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Apple computers and peripherals such as scanners, plotters and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom. All computing equipment is linked by high-speed Ethernet to facilitate access across the campus.
- The college supports a Rapid Prototyping Center, which is the home of state-of-the-art equipment that allows students to create communication aids for their design projects. Using CAD (computer-aided design) models, students are able to create physical models using three basic methods: 3-D printing, large format laser-cutting and CNC (computer numeric control) devices, including a Komo CNC Router. This facility is intended for all DAAP students to use in creating large-scale design.

Admission Requirements

Students seeking admission to this minor must have at least a 3.0 cumulative grade point average in previous college work. To apply, students should turn in the application to the DAAP Student Affairs Office, 5470 Aronoff.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
All degree programs in the UC School of Design are accredited by the National Association of Schools of Art and Design.

Fine Arts - Art

Duration: **1.5 Years** Total Credits: **24** Award: **Minor**

Overview

The Fine Arts Program provides students with strong technical and critical thinking skills. Studios are taught by artist-teachers who are active professionals in one or more visual arts disciplines. Faculty provide a dynamic mixture of media, craft, and aesthetic viewpoints that expose students to a lively variety of ideas and attitudes about art. In this context, art students are encouraged to develop their own innovative philosophies and approaches to art, as well as a unique visual language. Studio practice is complemented by art historical and visual studies courses in survey and seminar formats, and by a series of theory-based courses that cover avant-garde forms of expression from Modernism to the present.

Success

People who are successful in fine arts typically have visual and kinesthetic/tactile learning styles. Fine artists are creative, imaginative and visionary, and possess good hand-motor skills. They learn by doing and relish integrating various elements into a cohesive whole. Fine artists are open-minded and interrogative — questioning everything. They have a passion for creating their art and a heightened intellectual and visual perception. Fine artists provide original views and interpretations of the world and its inhabitants, giving us a greater appreciation of the character and values of society and culture. A sense of humor often enhances their work.

Career

Fine artists express themselves visually using one or several different art forms. For example, they may find employment as photographers, ceramists, model builders, or video animators. If students choose to take the teaching licensure option offered within the School of Art, they can teach elementary and/or secondary school art. With advanced study, they may become college teachers, art restorers, art administrators, or curators for galleries, museums, or exhibition centers.

Minoring

The School of Art offers a 24-credit-hour fine arts minor for students interested in studying fine arts and developing their artistic expression and abilities. The curriculum includes foundation studio coursework in drawing, 2D, 3D, and 4D. Students must also choose introductory and advanced studio work in various fine arts disciplines including art & technology, ceramics, drawing & painting, photography, printmaking, and sculpture.

Horticulture

Duration: **2 Years** Total Credits: **18** Award: **Minor**

Overview

The minor in horticulture introduces students to the various fields associated with horticultural science, including plant identification, growth, health, and reproduction.

Upon completion of the minor in Horticulture, students will be able to:

- Perform the fundamental practice and methods of horticultural science.
- Demonstrate basic knowledge of the roles of soil and nutrition in plant health.
- Demonstrate the basic knowledge and skills to identify favorable conditions for native and cultivated plants.

Success

Students with interests in the environment, the natural world, science and ecology, and landscapes will excel in this minor program.

Career

This minor will supplement the fundamental knowledge and skills offered by undergraduate training in:

- horticulture
- botany
- biology
- environmental studies

Additional career options are listed on the Center for Exploratory Studies website.

Creative Placemaking

Duration: **2 Years** Total Credits: **12** Award: **Graduate Certificate**

Overview

Public spaces are vital contributors to an urban area's physical design and social fabric. For centuries, they have been platforms for public gatherings, both social and political, and leisure activities. Sometimes, artwork enhances or defines public space. Historically, art has typically commemorated events or people. More recently, the contribution of artists, community members, city officials, and stakeholders addresses the role of temporary and quasi-permanent public art installations to improve public spaces while contributing to economic development. This phenomenon is known as creative placemaking. According to the National Endowment for the Arts, creative placemaking "Integrates arts, culture, and design activities into efforts that strengthen communities. Creative placemaking requires partnership across sectors, deeply engages the community, involves artists, designers, and culture bearers, and helps to advance local economic, physical, and/or social change, ultimately laying the groundwork for systems change."? The process and the practice of creative placemaking are the foci of this graduate certificate program. All stakeholders in the process are considered: artists, community members, city planners, public and private sponsors, municipal government officials, and final users, amongst others. The physical, historical, and socio-political contexts are also addressed.

College of DAAP is the home for the study of both art and planning and this certificate program bridges both.

Career

For planners, creative placemaking involves revitalizing cities through public art. For artists, understanding the public realm as a locus of expression is important.

Creative placemaking is an industry sector with a growing number of employment opportunities.

Historic Preservation

Duration: **2 Years** Total Credits: **18 - 20** Award: **Graduate Certificate**

Overview

Historical preservation is concerned with the maintenance and repair of historic objects. This program is designed to develop an appreciation for and a working knowledge of the issues and techniques involved in historic preservation.

The College of Design, Architecture, Art, and Planning and the College of Arts and Sciences collaborate in offering this special program of studies in historic preservation. The program is open to degree candidates in any program in either college. The certificate is awarded concurrently with a master's degree

Success

Students should have an interest in history, an eye for design, and the ability to multi-task and work with people.

Career

Curriculum

Curriculum Guide Versions:
Historic Preservation Graduate Certificate 2024

Advising

Students interested in this certificate should work with their major advisors to confirm the compatibility with their program's requirements and course schedules. Students enrolled in the School of Architecture and Interior Design or School of Planning will work with the faculty coordinators in those schools to learn more about certificate requirements and course selection.

UC Advantages And Special Opportunities

- The city of Cincinnati, once called the "Queen City of the West" by Henry Wadsworth Longfellow, provides an excellent array of cultural resources for students who intend to pursue a degree in the visual arts. It offers the energy and assets of a larger city, along with quiet neighborhoods steeped in rich traditions. Cincinnati offers live music venues that range from top-notch symphony and opera companies to a growing pop and rock community. Home to the Cincinnati Art Museum, the Taft Museum and the Contemporary Arts Center, the city also enjoys the presence of numerous art galleries and a strong support system among practicing artists. Cincinnati is situated within driving distance of Chicago, Pittsburgh, Atlanta and New York City, allowing DAAP students to take advantage of the rich cultural resources of these cities as well.
- UC's College of Design, Architecture, Art, and Planning (DAAP) is one of the most comprehensive colleges of its type in the country. A collection of nationally respected design and art programs is housed in a unique and educationally stimulating architectural setting. Students have opportunities to enroll in courses in a range of related disciplines and to participate in interdisciplinary studios or special projects.
- Other educational opportunities include organized travel semesters, foreign study semesters and student exchange programs in England, Germany and Denmark. Many architecture students also pursue joint degrees and certificate programs within the college and the university.
- The DAAP college library has an outstanding collection of books, periodicals and visual resources supporting architecture, planning, design, art history and related subjects. Access to library holdings is provided by an automated online catalogue, UCLID, which provides access to the University of Cincinnati Library information database, and through OhioLINK, the holdings of other academic libraries throughout Ohio.
- The Computer Graphics Center is a state-of-the-art university facility with hardware that includes PCs, Apple computers and peripherals such as scanners, plotters and digital video-editing suites. Students have access to sophisticated graphics equipment and receive hands-on instruction to augment the use of laptops in the classroom.
- The college supports a Rapid Prototyping Center, which is the home of state-of-the-art equipment that allows students to create communication aids for their design projects. Using CAD (computer-aided design) models, students are able to create physical models using three basic methods: 3-D printing, large format laser-cutting and CNC (computer numeric control) devices, including a Kuomo CNC Router. This facility is intended for all DAAP students to use in creating large-scale design.

Admission Requirements

Most students applying to this program are already matriculated into one of the University's graduate programs. Individuals who wish to apply as a non-matriculated student will need to submit a certified transcript demonstrating their achievement of a baccalaureate degree with a GPA of at least 3.0 and submit one letter of recommendation that discusses the applicant's potential to succeed in a historic preservation program.

Graduation Requirements

Students seeking certification must complete a minimum of 18 credits in required courses in historic preservation and closely related topics offered by various programs in the two sponsoring colleges. This includes completion of an approved internship. Students enrolled in the professional practice program will coordinate internship with one professional practice semester.

Application Deadlines

The program has rolling admissions. Those already matriculated into a graduate program at UC can apply as late as the beginning of any given semester. Those enrolling as a non-matriculated student should apply at least six weeks before the beginning of the semester in which they wish to begin course work.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Post-Baccalaureate Certificate Program is accredited by the National Council for Preservation Education, NCPE.

Course	Title/Desc	Credit
Internship	Work experience with an entity engaged in some aspect of historic preservation. Minimum of 90 hours if unpaid with a not-for-profit; 200 hours if paid at or near minimum wage; or 400 hours if fully paid co-op. Letter from direct supervisor to certificate	0

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Museum Studies

Duration: **2 Years** Total Credits: **12** Award: **Graduate Certificate**

Overview

What is Museum Studies?

Museum Studies or Museology is the study of museums. It explains the history of museums and their role in society, as well as the activities they engage in, including curating, preservation, public programming, and education.

What types of courses can I take?

History, Public History, Anthropology, Art History, Art Education, and Sciences at this point. We are actively reviewing courses for consideration and adding additional course options on an ongoing basis.

What types of subjects will be addressed?

This Program is currently focused on three main areas of Museum Studies:

- Exhibitions: Curation of Physical and Digital, Exhibitions, Design and Planning of exhibitions, and the use of Art in the public space.
- Collections: Curation of Collections, Conservation, Preservation, data management and tracking assets.
- Education: Public Programs within a museum, Community Outreach, and artist lead initiatives.

What can a Museum Studies Certificate provide to you?

- If you are interested in working in museums, galleries, historic homes, libraries, archives, or zoos and aquariums, a Museum Studies Certificate can provide insight into the structure and processes within a organization, the theories applied, knowledge and hands on skills needed to perform specialized duties within a museum environment.
- If you currently work in a museum, you can increase your knowledge and demonstrate your continued dedication to that field through continuing your education.
- If you are studying or work in a field doing research or teaching, you can learn the skills and techniques that will allow you to exhibit and present your research in a manner that communicates to your peers and also to the general public in a variety of settings.
- This certificate explores fundamental aspects of museum work. It can provide you with the skills and knowledge that are the basis for many aspects of museum work, including: museum management, collection care and maintenance, and exhibition and educational program development. It is an integrated program of study combining classroom instruction with an internship opportunity for direct on-the-job experiences

Who is accepted into the program?

The world of collections and exhibitions can be greatly rewarding for many personalities with varied interests. Museums and galleries provide opportunities for learning in dynamic settings. The conservation and handling of objects within collections can provide exciting opportunities to engage with history and its preservation. The process of making exhibitions can be a challenging yet rewarding way to collaborate with scholars and specialists in all fields to present and inform the public about a vast spectrum of knowledge, from art to science to history to nature.

If you are interested in some of the many areas mentioned above and meet the requirements listed below, we would welcome your application! We are accepting applicants on an ongoing basis and are happy to answer any questions you may have when deciding if this is the program for you.

Career

Curriculum

The Museum Studies certificate is an integrated, multidisciplinary program of study combining classroom instruction with an internship opportunity for direct on-the-job experiences. Twelve credit hours of study are required. The curriculum is designed to supply students with a balance of the practical and theoretical information needed to work in the museum world. It consists of four classes: one (1) internship + any three (3) courses from the available electives.

Visit the Musuem Studies Certificate page for more information.

Urban Design

Duration: **2 Years** Total Credits: **15** Award: **Graduate Certificate**

Overview

The graduate Urban Design Certificate will provide individuals with:

- foundational knowledge about the art and science of cities through history to inform future visions for cities;
- introduce the skills and techniques to design livable, functional, and aesthetically appealing places in response to the current and future challenges of cities;
- and provide the ability to think critically, to encourage multidisciplinary solutions and appropriate sustainable design and management options that serve to promote harmony between the different facets of cities by considering them from a holistic perspective.

Success

Students should have a keen interest in cities, places and people. Students should be interested in learning about design, planning and policies to create better places for people.

Career

There is a growing demand for professionals who can inform efforts to design places to shape and accommodate the growth and livability of urban areas, promote functional spaces, and conserve the natural environment. These professionals are expected to help design new communities, public places, streets, commercial business districts, corporate and academic campuses, parks, as well as play a role in the renovation of neighborhoods, parts of towns, cities, or metropolitan regions. Such professionals are expected to examine the form, space, movement, time, activity patterns, and setting of cities. The field of Urban Design offers the necessary design frameworks, tools, techniques, and skills to shape the built urban environment through holistic, systematic and sustainable thinking and to confront the current challenges of cities in this 21st century.

Urban Design Graduate Certificate

Advising

Students interested in the Urban Design certificate should work with the program coordinator to confirm the compatibility with their program's requirements and course schedules.

Admission Requirements

The Graduate Urban Design Certificate is open to professionals and graduate matriculated and non-matriculated students. Students can start the program in any semester but are strongly encouraged to contact an advisor and apply early in the process.

- Online application
- $20 application fee domestic, $25 international.
- Transcripts that indicate receipt of a least a bachelor's degree with a 3.0 GPA.

Students with no previous design education and background will be required to complete PLAN6072 Introduction to Planning Graphics course. Please check with the Urban Design Certificate coordinator regarding the course offerings.

Graduation Requirements

To obtain the Urban Design Certificate, a graduate student or professional must complete four core courses in theory, analysis, implementation, and two electives totaling 18 credits. The student or professional enrolled in the program must pass each course with a minimum grade of C. Graduate students will be expected to produce outcomes with a high level of performance and to prove an advanced knowledge of the topics through written documents, presentations, and/or other materials required by the faculty in charge of the courses.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Early Childhood Care and Education

Administration

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

The University of Cincinnati Online's Early Childhood Education associate degree program prepares graduates to design and implement developmentally appropriate learning environments for children Birth – Age 5. The ECE online associate degree program provides students the opportunity to specialize in Administration of Early Childhood programs. Students in the administration concentration will explore high quality programming to meet the needs of the community; analyzing potential business opportunities, evaluating appropriate use of space; implementing policy and legal responsibilities, and applying professionalism in the field.

The Early Childhood Education Online associate degree is perfect for anyone seeking to learn in-demand skills and further their career as an administrator in an Early Childhood Learning Center, Preschool, Head Start Program, Child Care Center, or Family Child Care Environment. Students thrive in our online learning environment designed to be highly supportive and convenient for working professionals. The Early Childhood Education Online program provides the flexibility and accessibility you need to complete your associate degree online. Graduates will learn the latest practices in Early Childhood Education Administration.

***The online associate degree does not lead to Ohio's Pre-Kindergarten - Grade 5 teaching licensure.**

Success

Students who are successful demonstrate a passion for the field of early childhood education. Students must pass a background check, if not already required by their employer. Early childhood professionals must respect diverse children and families and be able to communicate effectively with children, parents, co-workers and supervisors. **Computer skills are essential.**

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

UC Advantages And Special Opportunities

This educational opportunity is 100% online. The AAS in Early Childhood Care & Education is consistently ranked as a Top 15 Best Online Associate in Early Childhood Education by TheBestSchools.org.

The online nature of this program requires an individualized approach to student support. After a student decides to enroll, an Academic Advisor leads each student through a program and a technology orientation, so students learn about our learning management system before they begin online courses. Each student is assigned an Academic Advisor who is available via e-mail, phone, and text for admission and registration advice and consultation.

All students in the Early Childhood Care & Education Associate program will receive a scholarship in the amount of 24% off instructional fees only.

Admission Requirements

This program is open to all students with a high school diploma or GED, with the desire to succeed in college. Students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati (UC) students enrolled in other colleges at UC, if they were admissible directly from high school and have a 2.0 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services via email or 513-556-6308.

International Student Requirements

International students should contact UC's International Office of Admissions via email or 513-556-1100 for details.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- Submit formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Semester

Freshmen and Transfer:

- Application Deadline: July 1
- Confirmation Deadline: Aug 1

Spring Semester

Early Childhood Care and Education

Nature-Based Early Learning

Duration: **2 Years** Total Credits: **60** Award: **AAS**

Overview

The University of Cincinnati Online's Early Childhood Education associate degree program prepares graduates to design and implement developmentally appropriate learning environments for children Birth – Age 5. The ECE online degree program provides students the opportunity to specialize in Nature-Based Early Learning. Students will study how to design and implement curriculum to enhance children's learning and development through the exposure to nature and nature-based activities.

UC's Nature-Based Early Childhood Education program is perfect for anyone seeking to learn in-demand skills and to strengthen professionals' ability to provide high-quality experiences in Nature-Based programs. Whether you are interested in working as an outdoor educator at a Preschool, Nature Center, Children's Museum, Science Center, or Forest School, our Online Early Childhood Education program provides the flexibility and accessibility you need. Graduates will learn the latest instructional techniques in Nature-Based learning that promote the implementation of progressive and interdisciplinary curricula in natural settings in ways that view children as capable, able to problem-solve, and make decisions that affect their own lives.

***The online associate degree does not lead to Ohio's Pre-Kindergarten - Grade 5 teaching licensure.**

Early Childhood Care and Education

Online

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

According to the National Association for the Education of Young Children (NAEYC), "The demand for early childhood care and education programs continues to increase, not only in response to the growing demand for out-of-home child care, but also in recognition of the critical importance of educational experiences during the early years." This associate degree program in early childhood education prepares professionals who can provide high-quality educational experiences for their community's youngest children. Students are usually practitioners working in preschools and other child-care and educational settings.

Graduates will be able to implement developmentally appropriate integrated activities and materials across the domains, including visual arts, music, movement, science and math, and early language development. The program also emphasizes working with young children and their families from a variety of cultural and ethnic backgrounds.

Success

Students who are successful demonstrate a passion for the field of early childhood education and a desire to master new challenges. Students must pass a background check, if not already required by their employer. Early childhood professionals must respect diverse children and families and be able to communicate effectively with children, parents, co-workers and supervisors. Computer skills are essential.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

There is no minor in this program.

UC Advantages And Special Opportunities

This educational opportunity is only available online. The Early Childhood Education Online (ECE Online) program supports over 600 students from every U.S. state and several foreign countries.

ECE Online has become a worldwide model for online education in the field of early childhood; conferences sponsored by national organizations like the National Association for the Education of Young Children (NAEYC) have featured ECE Online as a model for effective online practices. In addition, several articles have been written and published about the student support system and the student teaching experience.

The online nature of this program has required an individualized approach to student support. Each student receives toll-free phone assistance prior to enrollment. Each student is assigned an advisor who is available via e-mail and phone for admission and registration advice and consultation.

Special Programs

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practices and the opportunity to attend conventions and conferences.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

** All students in the Early Childhood Care & Education Associate program will receive a scholarship in the amount of 24% off instructional fees only.**

Transferring To UC

All transfer students must have a 2.0 cumulative grade point average.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the admission criteria for transfer students. Please contact an academic advisor for details.

International Student Requirements

International students should contact the University's Office of Admission for details at 513-556-1100.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- Submit formal application for the degree by the posted semester of graduation deadline.

Early Childhood Care and Education

Pre-K

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

The University of Cincinnati Online's Early Childhood Education associate degree program prepares graduates to design and implement developmentally appropriate learning environments for children ages 3-5. Our early childhood education program provides students the opportunity to specialize in preschool education where students will study the comprehensive development of young children, with a focus on understanding best instructional practices for preschool learning environments.

The Early Childhood Education Online associates degree is perfect for anyone seeking to learn in-demand skills and further their career as a teacher in an Early Childhood Learning Center, Preschool, Head Start Program, Child Care Center, or Family Child Care Environment. Students thrive in our online learning environment designed to be highly supportive and convenient for working professionals. The Early Childhood Education Online program provides the flexibility and accessibility you need to complete your associate degree online. Graduates will learn the latest developmentally appropriate practices that promote cognitive, social, emotional, physical, and creative growth in preschool children.

***The online associate degree does not lead to Ohio's Pre-Kindergarten - Grade 5 teaching licensure.**

Success

Students who are successful demonstrate a passion for the field of early childhood education. Students must pass a background check, if not already required by their employer. Early childhood professionals must respect diverse children and families and be able to communicate effectively with children, parents, co-workers and supervisors. **Computer skills are essential.**

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

There is no minor associated with this program.

UC Advantages And Special Opportunities

This educational opportunity is 100% online. The AAS in Early Childhood Care & Education is consistently ranked as a Top 15 Best Online Associate in Early Childhood Education by TheBestSchools.org.

The online nature of this program requires an individualized approach to student support. After a student decides to enroll, an Academic Advisor leads each student through a program and a technology orientation, so students learn about our learning management system before they begin online courses. Each student is assigned an Academic Advisor who is available via e-mail, phone, and text for admission and registration advice and consultation.

All students in the Early Childhood Care & Education Associate program will receive a scholarship in the amount of 24% off instructional fees only.

Admission Requirements

This program is open to all students with a high school diploma or GED, with the desire to succeed in college. Students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati (UC) students enrolled in other colleges at UC, if they were admissible directly from high school and have a 2.0 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services via email or 513-556-6308.

International Student Requirements

International students should contact UC's International Office of Admissions via email or 513-556-1100 for details.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- Submit formal application for the degree by the posted semester of graduation deadline.

Criminal Justice

Online

Duration: 4 Years Total Credits: 120 Award: BS

Overview

The study of criminal justice is designed to provide students with an understanding of criminal offending and the criminal justice process. As society continues to grow, so does the need for this career and the understanding of how and why such behavior occurs. This online program stresses an interdisciplinary study of criminal justice in America. Those interested in careers in criminal justice, crime prevention, child behavioral problems, adolescent delinquency or effective intervention will find this online degree extremely valuable.

Success

Students pursuing the online degree in criminal justice have a wide variety of academic interests and talents. Many students select courses that will enhance a specific area, as well as courses they enjoy. Many of our students want to combine their interest in anthropology, literature, psychology, sociology and women's studies. However, students who choose extensive courses in accounting, biology, business, chemistry or a foreign language seem to have greater career/job opportunities.

All students pursuing an undergraduate degree in criminal justice must complete field placement. The field placement allows seniors to expand upon their education by gaining practical field experience. This unpaid internship is in a criminal-justice related agency of the student's choice. Many students are successful in obtaining full-time positions after graduation, due to experience from their field placement.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. Many of our students continue to further their education choosing to attend graduate school or law school.

UC Advantages And Special Opportunities

Deciding to major in criminal justice at the University of Cincinnati provides students countless opportunities. Students are allowed to choose various courses across the university in many disciplines for a richer collegiate experience. Many students find that studying abroad or doing an internship still allows them to graduate in four years.

The UC College of Education, Criminal Justice, and Human Services is committed in every way to student success. Each year, the college has a scholarship application process encouraging students to apply. In past years, the college has been able to award scholarships to many students.

The Student Services Center in CECH is a focal point in the college, offering academic advising to students in undergraduate programs. Our well-educated and trained staff comprises full-time academic advisors, support staff and graduate assistants, who work with students to help decide course offerings, change of major and to answer academic program questions.

For further information on the bachelor of science criminal justice program, please visit the program website.

Special Programs

There are countless ways for students to be involved within criminal justice and the College of Education, Criminal Justice, and Human Services. Our students take part in various organizations that promote awareness and continued research in the field.

Criminal Justice Society

The Criminal Justice Society is a student-sponsored organization designed to enhance the educational experience of those interested in criminal justice and criminal behavior. Criminal Justice Society promotes the study of crime and justice and sponsors activities for interested students. Activities include prison tours, speaker events and an annual career fair.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

Student Ambassador Program

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH Student Ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Overview

Why pursue a Bachelor of Science in Criminal Justice?

The University of Cincinnati's Bachelor of Science in Criminal Justice program is designed to provide students with an understanding of criminal offending and the criminal justice process. Our bachelor's program allows students to explore the criminal law system as it relates to crime prevention, child behavioral problems, adolescent delinquency, and information technology. Our students are encouraged to complete a minor, certificate or focus area in a subject matter of their choice that will complement their career goals.

The University of Cincinnati's widely respected School of Criminal Justice graduate studies is ranked 3rd in the country U.S. News & World Report (2020). Our online Master's in Criminal Justice program is ranked 12th best in the country by U.S. News & World Report (2020).

Success

Students pursuing a degree in criminal justice have a wide variety of academic interests and talents. Many students select courses that will enhance a specific area, as well as courses they enjoy. Many of our students want to combine their interest in anthropology, literature, psychology, sociology and women's studies. Criminal Justice : Online

BS

Criminal Justice Online - Fall 2025

Duration: 4 Years
★Minimum Credits: 120 Credits

General Education Requirements
Students will complete the listed General Education Requirements.

Course	Title/Desc	Credit
ENGL1001	English Composition (C min)	3
ENGL2089	Intermediate Composition	3
Free Electives	Students will complete 13 hours of Free Elective courses.	13
BoK: HP	Historical Perspectives Select two 3 credit hour courses with HP designation	6
BoK: HU	Humanities and Literature Select any one 3 credit course with HU designation	3
BoK: SCE,TI	Society, Culture, & Ethics, or Technology & Innovation Select any 3 credit course with a BoK of SCE, or TI	3
BoK: SS	Social Sciences Select any two 3-credit courses with SS designation	6
MATH1XXX+ BoK: QR	Math Students must select any 3-credit college level mathematics course	3
BoK: NS	Natural Sciences Select any two 3 credit courses with NS designation	6
PRFS1001	First Year Exp in the College of Education, Criminal Justice, and Human Services	1

Course	Title/Desc	Credit
	Focus Area/Minor/Certificate Students may select 6 courses from an approved discipline to satisfy this requirement. 2 courses must be at the 3000 level or higher. Students may also select an approved MINOR or CERTIFICATE to satisfy this requirement.	18

Criminal Justice: Online Major Requirement
This represents the courses required for the Criminal Justice: Online program.

Course	Title/Desc	Credit
CJ1001	Introduction to Criminal Justice	3
CJ1002	Introduction to Criminology	3
CJ3021	Criminal Justice Research Methods	3
CJ4020	Criminal Procedure	3
CJ4023	Criminal Justice Statistics	3
CJ2030	Corrections in America	3
CJ2050	Policing in America	3
CJ4097	Criminal Justice Senior Seminar	3
CNSL3002	Preparing for Career Success	1

Course	Title/Desc	Credit
CJ3XXX+	Criminal Justice Upper Level Electives	18
CJ	Criminal Justice Electives	12

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Cybersecurity

Online

Duration: 5 Years Total Credits: 120 Award: BS

Overview

The Bachelor of Science in Cybersecurity online program at the University of Cincinnati prepares students to be qualified candidates in one of the fastest growing and rewarding careers in the Information Technology industry. This program provides applied theories and the hands-on experience to investigate and secure against potential cyber-attacks carried out by threat actors. Led by faculty who have experience in the field, our graduates will obtain the ability to solve real-world issues and design security policies and systems to mitigate risks and threats to today's IT infrastructure.

The Cybersecurity program curriculum focuses on practical skills that are necessary for professional cybersecurity roles such as:

- Cybersecurity Analyst
- Information Security
- Security Operations Center
- Digital Forensics and incident response
- Cyber Threat Detection
- Cyber Risk

*This program is offered on campus and online. Please check the curriculum maps to determine when courses are offered. Please contact the CECH Office of Recruitment to explore which modality works best for you!

Success

Successful professionals in cybersecurity are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. Cybersecurity professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions that meet holistic needs of the security architecture.

Due to the quickly changing nature of technology and the critical importance of cybersecurity in today's threat landscape, it is important to be a lifelong learner and keep up-to-date on advances in the field. Cybersecurity professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

A minor in information technology (IT) provides solid knowledge and skills for students who are non-IT majors. The minor program requires the completion of 18 semester hours of IT courses that includes IT1050, Fundamentals of Information Technology. The remaining courses are to be selected by the student and approved by the academic advisor. This flexibility enables students to focus the minor in IT on their personal interests and career goals. All courses must be taken through the School of Information Technology in CECH.

UC Advantages And Special Opportunities

The School of Information Technology's was the first Bachelor of Science in Information Technology program in Ohio, and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The School of Information Technology houses the Ohio Cyber Range Institute, and received the National Security Agency/Department of Homeland Security designation as a Center for Academic Excellence in Cyber Defense Education.

The cybersecurity program is uniquely designed to provide hands-on experience in the core foundation of information technology and cybersecurity. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the cybersecurity program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The fulltime paid co-op working experience positions cybersecurity graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national and international placement opportunities.

The cybersecurity program emphasizes problem solving, communication, hands-on skills, innovation and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through course work and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the School of Information Technology at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

PLEASE NOTE: If a potential student is interested in this major and does not meet these minimum standards, please contact the CECH Office of Recruitment to discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the CECH Student Services Center at (513) 556-2336 or email.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Cybersecurity : Online

BS

Cybersecurity Bachelors: Online 2025-2026

Duration: 5 Years

★Minimum Credits: 120 Credits

Semester 1

Courses offered in the Fall semester only

Course	Title/Desc	Credit
IT1050	Fundamentals of Information Technology (C- min)	3
IT1080C	Computer Networking (C- min)	3
IT1090C	Computer Programming I (C- min)	3
IT2040C	Fundamentals of Web Development (C- min)	3
COMM1076	Introduction to Interpersonal Communication (C- min)	3
IT	IT1003 FIRST YEAR EXPERIENCE IN THE SCHOOL OF INFORMATION TECHNOLOGY NOTE: Transfer and transition students will take a 1 credit hour IT elective in place of the FYE in IT course (C- min)	1
PD	PD1010 Professional Development for BSIT NOTE: Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester. (C- min)	1

Semester 2

Courses offered in the Spring semester only

Course	Title/Desc	Credit
IT1081C	System Administration (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3
IT2060C	Database Management I (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH	MATH1021 COLLEGE ALGEBRA Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective. (C- min)	3

Co-op Experience

Students must work with their BSIT academic and co-op advisors to select their co-op rotation

Course	Title/Desc	Credit
COOP	COOP2041 COOP for CECH (First Semester Experience) This COOP must be completed in the first summer of the online program. Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester.	0
COOP2042	Co-op for CECH (Second Semester Experience)	0
COOP3041	Co-op for CECH (Third Semester Experience)	0
COOP4041	Co-op for CECH (Fourth Semester Experience)	0
COOP4042	Co-op for CECH (Fifth Semester Experience)	0

Semester 3

Courses are offered in the Fall semester only

Course	Title/Desc	Credit
IT1051C	Fundamentals of Digital Media	3
IT2020	Implications of Information Technology	3
IT2035C	Network Infrastructure Management (C- min)	3
IT3060C	Database Management II	3
MATH	MATH1022 TRIGONOMETRY Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.	3

Semester 4

Courses are offered in the Summer semester only

Course	Title/Desc	Credit
IT2021	Human Computer Interaction	3
IT3071C	Network Security (C- min)	3
ENGL2089	Intermediate Composition	3
COMM	COMMUNICATION ELECTIVE Communication elective can be either from the Oral Communication group (COMM1071, COMM2021, COMM2081) or the Media and Society group (COMM2025, COMM2089, COMM3026). Some of the courses count towards the Professional Communication certificate or the Digital Engagement Certificate.	3

Course	Title/Desc	Credit
	HPE2071 Applied Statistics NOTE: Students may take BANA2081. BANA2081 is preferred for accelerated MBA students.	3

Semester 5

Courses are offered in the Spring semester only

Course	Title/Desc	Credit
IT3020	System Analysis & Design	3
IT3072C	Computer and Network Forensics (C- min)	3
IT3075C	Network Monitoring and Intrusion Prevention Systems (C- min)	3
MATH1071	Introduction to Discrete Mathematics	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Chemistry, Geology, or Physics course.	3

Semester 6

Courses are offered in the Fall semester only

Course	Title/Desc	Credit
IT4020	Management in Information Technology (C- min)	3
IT4033	Senior Design Preparation (C- min)	1
IT4076C	Penetration Testing (C- min)	3
IT4077C	Special Topics in Cybersecurity (C- min)	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Geology, Chemistry, Physics course.	3
ENGL	WRITING ELECTIVE Student may select from ENGL4091 Business Writing or ENGL4092 Technical and Scientific Writing.	3

Semester 7

Courses are offered in the Fall semester only

Course	Title/Desc	Credit
IT5003C	Senior Capstone Project I (C- min)	3
POL2035	Cybersecurity: National and International Strategy and Policy	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3

Semester 8

Courses are offered in the Spring semester only

Course	Title/Desc	Credit
IT5004C	Senior Capstone Project II	3
CJ3075	Cybercrime	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	GEN ED ELECTIVE Students must select a 3 credit hour Social & Behavioral Sciences course. Students graduating after Spring 2030 must complete an approved American Civic Literacy course.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Cybersecurity

Duration: **5 Years** Total Credits: **120** Award: **BS**

Overview

The Bachelor of Science in Cybersecurity program at the University of Cincinnati, prepares students to be qualified candidates in one of the fastest growing and rewarding careers in the Information and Cyber Security industry. Students will attain the knowledge by exploring, both, applied theories and the hands-on skillsets of software and hardware security tools to design secure systems and protect enterprise information and network assets. Furthermore, they will gain expertise in investigating computer related crimes and identifying the resources exploited by cybercriminals and terrorists. The curriculum will teach students to apply standards, models and best practices to solve real-world issues and draft security policies to resolve risks and threats of today's IT infrastructure.

The Cybersecurity program curriculum focuses on practical skills that are necessary for professional cybersecurity opportunities such as:

- Cybersecurity Analyst
- Information Security Personnel
- Security Operations Center
- Digital Forensics and incident response
- Cyber Threat Detection
- Cyber Risk

**This program is offered on campus and online. Course offerings in the online version of the program are different than the on campus; please check the curriculum maps for when courses are offered.*

Success

Successful professionals in cybersecurity are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. Cybersecurity professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions that meet holistic needs of the security architecture.

Cybersecurity

Online

Duration: 5 Years Total Credits: 120 Award: BS

Overview

The Bachelor of Science in Cybersecurity online program at the University of Cincinnati prepares students to be qualified candidates in one of the fastest growing and rewarding careers in the Information Technology industry. This program provides applied theories and the hands-on experience to investigate and secure against potential cyber-attacks carried out by threat actors. Led by faculty who have experience in the field, our graduates will obtain the ability to solve real-world issues and design security policies and systems to mitigate risks and threats to today's IT infrastructure.

The Cybersecurity program curriculum focuses on practical skills that are necessary for professional cybersecurity roles such as:

- Cybersecurity Analyst
- Information Security
- Security Operations Center
- Digital Forensics and incident response
- Cyber Threat Detection
- Cyber Risk

*This program is offered on campus and online. Please check the curriculum maps to determine when courses are offered. Please contact the CECH Office of Recruitment to explore which modality works best for you!

Success

Successful professionals in cybersecurity are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. Cybersecurity professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions that meet holistic needs of the security architecture.

Due to the quickly changing nature of technology and the critical importance of cybersecurity in today's threat landscape, it is important to be a lifelong learner and keep up-to-date on advances in the field. Cybersecurity professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

A minor in information technology (IT) provides solid knowledge and skills for students who are non-IT majors. The minor program requires the completion of 18 semester hours of IT courses that includes IT1050, Fundamentals of Information Technology. The remaining courses are to be selected by the student and approved by the academic advisor. This flexibility enables students to focus the minor in IT on their personal interests and career goals. All courses must be taken through the School of Information Technology in CECH.

UC Advantages And Special Opportunities

The School of Information Technology's was the first Bachelor of Science in Information Technology program in Ohio, and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The School of Information Technology houses the Ohio Cyber Range Institute, and received the National Security Agency/Department of Homeland Security designation as a Center for Academic Excellence in Cyber Defense Education.

The cybersecurity program is uniquely designed to provide hands-on experience in the core foundation of information technology and cybersecurity. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the cybersecurity program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The fulltime paid co-op working experience positions cybersecurity graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national and international placement opportunities.

The cybersecurity program emphasizes problem solving, communication, hands-on skills, innovation and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through course work and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the School of Information Technology at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

PLEASE NOTE: If a potential student is interested in this major and does not meet these minimum standards, please contact the CECH Office of Recruitment to discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the CECH Student Services Center at (513) 556-2336 or email.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Freshmen:

- Application Deadline:
  - Early Action: December 1*
  - Final: March 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for scholarships and the Honors Program.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Cybersecurity : Online

BS

Cybersecurity Bachelors: Online 2025-2026

Duration: 5 Years

★Minimum Credits: 120 Credits

Semester 1

Courses offered in the Fall semester only

Course	Title/Desc	Credit
IT1050	Fundamentals of Information Technology (C- min)	3
IT1080C	Computer Networking (C- min)	3
IT1090C	Computer Programming I (C- min)	3
IT2040C	Fundamentals of Web Development (C- min)	3
COMM1076	Introduction to Interpersonal Communication (C- min)	3
IT	IT1003 FIRST YEAR EXPERIENCE IN THE SCHOOL OF INFORMATION TECHNOLOGY NOTE: Transfer and transition students will take a 1 credit hour IT elective in place of the FYE in IT course (C- min)	1
PD	PD1010 Professional Development for BSIT NOTE: Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester. (C- min)	1

Semester 2

Courses offered in the Spring semester only

Course	Title/Desc	Credit
IT1081C	System Administration (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3
IT2060C	Database Management I (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH	MATH1021 COLLEGE ALGEBRA Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective. (C- min)	3

Co-op Experience

Students must work with their BSIT academic and co-op advisors to select their co-op rotation

Course	Title/Desc	Credit
COOP	COOP2041 COOP for CECH (First Semester Experience) This COOP must be completed in the first summer of the online program. Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester.	0
COOP2042	Co-op for CECH (Second Semester Experience)	0
COOP3041	Co-op for CECH (Third Semester Experience)	0
COOP4041	Co-op for CECH (Fourth Semester Experience)	0
COOP4042	Co-op for CECH (Fifth Semester Experience)	0

Semester 3

Courses are offered in the Fall semester only

Course	Title/Desc	Credit
IT1051C	Fundamentals of Digital Media	3
IT2020	Implications of Information Technology	3
IT2035C	Network Infrastructure Management (C- min)	3
IT3060C	Database Management II	3
MATH	MATH1022 TRIGONOMETRY Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.	3

Semester 4

Courses are offered in the Summer semester only

Course	Title/Desc	Credit
IT2021	Human Computer Interaction	3
IT3071C	Network Security (C- min)	3
ENGL2089	Intermediate Composition	3
COMM	COMMUNICATION ELECTIVE Communication elective can be either from the Oral Communication group (COMM1071, COMM2021, COMM2081) or the Media and Society group (COMM2025, COMM2089, COMM3026). Some of the courses count towards the Professional Communication certificate or the Digital Engagement Certificate.	3

Course	Title/Desc	Credit
	HPE2071 Applied Statistics NOTE: Students may take BANA2081. BANA2081 is preferred for accelerated MBA students.	3

Semester 5

Courses are offered in the Spring semester only

Course	Title/Desc	Credit
IT3020	System Analysis & Design	3
IT3072C	Computer and Network Forensics (C- min)	3
IT3075C	Network Monitoring and Intrusion Prevention Systems (C- min)	3
MATH1071	Introduction to Discrete Mathematics	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Chemistry, Geology, or Physics course.	3

Semester 6

Courses are offered in the Fall semester only

Course	Title/Desc	Credit
IT4020	Management in Information Technology (C- min)	3
IT4033	Senior Design Preparation (C- min)	1
IT4076C	Penetration Testing (C- min)	3
IT4077C	Special Topics in Cybersecurity (C- min)	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Geology, Chemistry, Physics course.	3
ENGL	WRITING ELECTIVE Student may select from ENGL4091 Business Writing or ENGL4092 Technical and Scientific Writing.	3

Semester 7

Courses are offered in the Fall semester only

Course	Title/Desc	Credit
IT5003C	Senior Capstone Project I (C- min)	3
POL2035	Cybersecurity: National and International Strategy and Policy	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3

Semester 8

Courses are offered in the Spring semester only

Course	Title/Desc	Credit
IT5004C	Senior Capstone Project II	3
CJ3075	Cybercrime	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	GEN ED ELECTIVE Students must select a 3 credit hour Social & Behavioral Sciences course. Students graduating after Spring 2030 must complete an approved American Civic Literacy course.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Exercise Science

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

Our Bachelor of Science in Exercise Science degree is designed to prepare future exercise professionals with the knowledge and skills to meet the diverse health and wellness needs of our community. Students are equipped to take entry level positions in the exercise field, or pursue graduate and professional degrees, as they complete comprehensive coursework in anatomy, kinesiology, exercise physiology, exercise testing and prescription, fitness program administration, and more!

Advantages of working in this field is the variety of places our graduates work. Throughout the program, students are exposed to, complete internships in, and often go on to work in positions and settings such as:

- Fitness Managers or Directors (commercial, private, university, and community settings)
- Exercise Physiologists (hospitals, clinics)
- Strength and Conditioning Coaches (youth, high school, college, and professional levels)
- Health Coaches
- Employee Wellness Managers
- Personal Trainers and Group Fitness Instructors

This program is unique in that it allows students to become credentialed in several professional certifications at the completion of the program. Upon graduation, students are qualified to sit for the American College of Sports Medicine Exercise Physiologist certification (ACSM-EP®). Additionally, many students choose to pursue the Certified Strength and Conditioning Specialist (CSCS®) through the National Strength and Conditioning Association (NSCA). Students may also opt to pursue a nationally-accredited personal training or group fitness instructor certification while in the program, as we offer various preparation courses within the curriculum.

Success

Exercise and fitness professionals must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Further, those majoring in exercise science are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for exercise and fitness professionals, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Both the behavioral and biological sciences form the foundation for exercise science. Course work is required in such areas as human anatomy and physiology, exercise physiology, kinesiology, statistics, and more.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

Below are options for students to minor in that is associated with Exercise Science:

- Public Health
- Sport Administration
- Sport Coaching

UC Advantages And Special Opportunities

The Exercise Science program, at the University of Cincinnati, is one of the premier programs in the country. This program has 10 full-time faculty serving students in the program. UC's faculty members are well-known in the profession and are recognized leaders at the local, state and national levels. For example, UC's faculty have served as presidents of national associations, served on boards of directors of national associations, participated in accreditation visits and site reviews of other health promotion programs, served on numerous professional committees, acted as editors of national journals and continue to receive some of the highest student evaluations for their teaching and mentoring in the college.

UC faculty regularly present papers at professional meetings, publish in professional journals and write textbooks that are used throughout the profession. As a result of their involvement, UC faculty members are well connected with other health educators in the profession, which helps students effectively network, enter graduate school and obtain employment in the field.

Opportunities for internships are outstanding in the Greater Cincinnati area. Our students have interned with Proctor & Gamble, YMCA of Greater Cincinnati, GE Aircraft Engines, St. Elizabeth Healthcare, TriHealth Corporate Health and TriHealth Fitness and Health Pavilion, the American Heart Association, UC Athletics, the Cincinnati Reds, locally-owned personal training and group fitness facilities, and many other outstanding companies and agencies. Another advantage to studying at UC is the fact that the program offers bachelor's, master's and doctoral degrees. This provides students with the opportunity to obtain advanced degrees and to interact with graduate-level health promotion and education students.

Students that complete this degree program also have the opportunity to obtain additional professional credentials including:

American College of Sports Medicine (ACSM) Certified Exercise Physiologist (ACSM-EP®)

The ACSM-EP® credential is available to fitness professionals with a minimum of a bachelor's degree in exercise science. Individuals with this credential are qualified to pursue careers in university, corporate, commercial, hospital, and community settings. ACSM-EP's are trained to conduct and interpret physical assessments to prescribe appropriate, personalized exercise programs for people who are healthy or have medically controlled diseases. Candidates are eligible to take the examination in the last semester of their degree program, and possess an Adult CPR/AED certification.

National Strength and Conditioning Association Certified Strength and Conditioning Specialist (NSCA-CSCS®)

Certified Strength and Conditioning Specialists® (CSCS®) are professionals who apply scientific knowledge to train athletes for the primary goal of improving athletic performance. They conduct sport-specific testing sessions, design and implement safe and effective strength training and conditioning programs and provide guidance regarding nutrition and injury prevention. Candidates must have at least a bachelor's degree or currently be enrolled as a college senior and have a current Adult CPR/AED certification to sit for this exam.

During the program or upon graduation, students may also choose to pursue other credentials such as Certified Personal Trainer or Certified Group Fitness Instructor from organizations such as:

- National Academy of Sport Medicine (NASM)
- American Council on Exercise (ACE)
- American College of Sport Medicine (ACSM)
- National Strength and Conditioning Association (NSCA)

Special Programs

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH Student Ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH Student Ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education, and criminal justice.

CECH Tribunal

The purpose of the CECH Tribunal is to ensure that the interests of CECH students are voiced and to provide student representation on behalf of all undergraduate students in CECH. Also, the tribunal organizes programs and social events for students of the college.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the CECH Student Services Center at (513) 556-2336 or via email.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admissions for details at 513-556-1100 or email.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain a grade of C- or better for all health education/exercise science courses.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted deadline.

Application Deadlines

Exercise Science

BS

Exercise Science: Clinical Exercise Physiology

Duration: 4 Years
Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I (C- min)	4
EXSC1011	Quantitative Foundations in Exercise Science (C- min)	1
EXSC1030	Introduction to Exercise Science (C- min)	3
HPE2002	Culture, Equity, and Health (C- min)	3
PRFS1001	First Year Exp in the College of Education, Criminal Justice, and Human Services	1
	Clinical Exercise Physiology Concentration course from list below	3

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL2002C	Anatomy and Physiology II (C- min)	4
COMM1071	Introduction to Effective Speaking (C- min)	3
ENGL1001	English Composition (C- min)	3
EXSC1012	Practical Skills in Exercise Instruction (C- min)	1
HLSC2012	Medical Terminology (C- min)	2
PSYC1001	Introduction to Psychology (C- min)	3

Fall Semester Year 2

Course	Title/Desc	Credit
EXSC1007C	Emergency Response and Planning (C- min)	1
EXSC2000	Physical Activity Across the Lifespan (C- min)	3
EXSC2091	Individualized Fitness Programming (C- min)	3
EXSC3030L	Fitness Testing Lab I (C- min)	1
EXSC3031	Exercise Physiology (C- min)	3
	Clinical Exercise Physiology Concentration course from list below	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition (C- min)	3
EXSC2071	Research and Statistics in Exercise Science (C- min)	3
EXSC2085	Exercise Psychology (C- min)	3
EXSC3032L	Fitness Testing Lab II (C- min)	1
EXSC4130	Kinesiology (C- min)	3
	Clinical Exercise Physiology Concentration course from list below	3

Fall Semester Year 3

Course	Title/Desc	Credit
EXSC2081	Nutrition for Fitness and Performance (C- min)	3
EXSC3051	Exercise Testing and Prescription (C- min)	3
EXSC3084	Strength and Conditioning (C- min)	3
	Clinical Exercise Physiology Concentration course from list below	3
	Clinical Exercise Physiology Concentration course from list below	3

Spring Semester Year 3

Course	Title/Desc	Credit
EXSC3052L	Exercise Testing and Prescription Lab (C- min)	1
EXSC4050	Clinical Exercise Physiology (C- min)	3
EXSC4060	Adapting Exercise for Special Populations (C- min)	3
EXSC4091	Professional Development in Exercise Science (C- min)	3

	Clinical Exercise Physiology Concentration course from list below	3

Course	Title/Desc	Credit

Clinical Exercise Physiology Concentration Courses

Students should carefully select concentration courses based on their intended post-graduation pathway (e.g., graduate school, research, clinical exercise physiology careers). Students who are fulfilling pre-requisite requirements for certain graduate programs may need to complete greater than 120 credit hours before applying to specific graduate programs.

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life (C- min)	3
BIOL1081L	Biology I Laboratory (C- min)	1
BIOL1082	Biology II: Evolution, Physiology, and Ecology (C- min)	3
BIOL1082L	Biology II Laboratory (C- min)	1
BIOL2083	Genetics (C- min)	3
CHEM1040	General Chemistry I (C- min)	4
CHEM1040L	General Chemistry Laboratory I (C- min)	1
CHEM1041	General Chemistry II (C- min)	4
CHEM1041L	General Chemistry Laboratory II (C- min)	1
CJ3056	Advanced Skills in Research and Evaluation (C- min)	3
ENGL3062	Scientific Writing in the Behavioral Sciences (C- min)	3
EXSC3033	Practicum in Exercise Science (C- min)	1 - 6
EXSC3034C	Workshop in Exercise Science (C- min)	1
MATH1021	College Algebra (C- min)	3
PHYS1051	General Physics I (Algebra-based) (C- min)	4
PHYS1051L	General Physics Lab I (Algebra-based) (C- min)	1
PHYS1052	General Physics II (Algebra-based) (C- min)	4
PHYS1052L	General Physics Lab II (Algebra-based) (C- min)	1
HLSC4020	Motor Learning and Movement Control (C- min)	3
PSYC2040	Developmental Psychology (C- min)	3
PSYC2051	Fundamentals of Psychopathology (C- min)	3
PSYC3011	Health Psychology (C- min)	3
CJ3055	Introduction to Research and Evaluation (C- min)	3
ENGL4092	Technical and Scientific Writing (C- min)	3
MEDS3110	Introduction to Clinical and Translational Science (C- min)	3
STAT2XXX+	Any STAT2000+ level course (C- min)	3
ANTH SOC	Choose 1: SOC1001: Intro to Sociology or ANTH1001: Cultural Anthropology (C- min)	3
BIOL	Choose 1: BIOL2031C: Microbiology for Health Professionals or BIOL4011: Microbiology (C- min)	3
CHEM	Choose 1: CHEM2040: Organic Chemistry or CHEM3040: Intro to Biochemistry (C- min)	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Human Development & Community Engagement

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

The Human Development and Community Engagement Degree is a four-year Bachelor of Science program offered through the College of Education, Criminal Justice, Human Services, and Information Technology. Students are afforded opportunities to collaborate with programs and non-profit agencies in urban city centers that initiate social change and diversity actions for communities, families, and individuals.

The program provides strong theoretical foundations as well as practical experience that gives students the applicable skills needed to serve under-represented and need-based populations mostly in non-profit and/or in governmental agencies. Additionally, students gain valuable knowledge in areas of cognitive, socioeconomic, and social emotional growth that will serve populations ranging from birth through adulthood.

Our program requirements offer students a variety of interventions to affect community and individual change. In doing so, this program covers subjects such as communication, curriculum and training design, human development, program evaluation and understanding urban communities.

Success

What does success look like within this program?

- Serving as an advocate for undeserved populations
- Developing flexibility and transferability skills
- Being provided an embedded minor that focuses on your area of interest
- Experiencing authentic real-world and classroom experiences in field placements.

Characteristics that will help you become a successful candidate within the Human Development and Community Engagement program include: flexibility, the ability to multitask, empathy and a desire to recognize needs, a strong passion for learning, and a special interest in community-based intervention.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Majoring

The Bachelor of Science in Human Development and Community Engagement is a four year degree that offers an introductory series of human development courses in addition to research methodology coursework, courses in areas of psychology and sociology, finance and grant writing, family and child dynamics, environmental and justice related courses, as well as individualized placement in real-world experiential settings. The goal of this program is to prepare students for facilitating leadership roles in agencies, non-profit organizations, and governmental programs that serve under-represented and community-based populations in need.

Minoring

The HDCE program offers majors the opportunity to delcare a minor or certificate of your choice. The elective hours for the minor/certificate are embedded in the 4-year curriculum.

Special Programs

We are excited to offer this innovative and individually designed program in Human Development and Community Engagement. This is the perfect choice for students who yearn to work with children and families, but do not desire the confines of a traditional education or social work career. This program offers flexibility in almost every facet, allowing students to pursue an embedded minor in an area of their choice from any department on our campus, further preparing and supporting the student's personal career goals and aspirations. Our flexible curriculum is especially appealing to transfer students, exploratory students, and students wishing to switch majors.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

Student Ambassador Program

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH Student Ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.0 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.0 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at 513-556-2336.

International Student Requirements

Please contact the Office of Admissions at 513-556-1100.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements
- Obtain at least a 2.0 university grade point average
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension
- Meet the college's residency requirement of 30 semester credit hours
- File formal application for the degree by the posted semester of graduation deadline

Law and Paralegal Studies

Online

Duration: 4 Years Total Credits: 120 Award: BS

Overview

Why pursue a Bachelor's degree in Law & Paralegal Studies?

The undergraduate law and paralegal studies program, at the University of Cincinnati, is designed to prepare paralegals to improve legal services' efficiency, economy, and availability. A paralegal performs substantive legal work under the direct supervision of an attorney and will acquire the knowledge and understanding of various legal concepts.

Career opportunities:

Many employers are looking for Paralegals or Legal Assistants to fill roles in a variety of fields that include, but are not limited to:

- civil litigation
- criminal law
- corporations
- contracts
- estates and probate
- family law
- immigration
- personal injury
- real estate

We have students employed within corporations/businesses as in-house paralegals, government agencies or local courts, and private firms – both large and small.

Interested in Law School?

Prospective students should be aware that paralegal education is not the equivalent of a law school education; however, our program is a great stepping stone for law school because it focuses on practical skills where law school promotes theory-based learning -- the two skills combined make for an excellent attorney.

Our students will have practice in legal research and writing which is taught in the first year of law school as well as basic topics such as torts, contracts, real estate, family law, ethics, civil procedure etc. It makes students highly marketable as law clerks during their time as law students as they will have practice with legal drafting, research and beyond.

Graduates of paralegal programs are not qualified or eligible to take the bar examination. Academic credit for paralegal courses is not transferable for advanced standing in law school. Paralegals may not provide legal services directly to the public, except as permitted by law.

UC's paralegal studies program was established in 1980 and is approved by the American Bar Association (ABA) -- the first program in the Tristate area to gain such approval.

Success

Paralegals are expected to write clearly and communicate effectively, both orally and in writing. Paralegals must possess a high degree of motivation and analytical reasoning capability. They need to pay attention to detail. Candidates should also be responsible, well-organized, mature individuals who are sincerely interested in pursuing a career as a paralegal. They must be trustworthy and discreet. Paralegals, like attorneys, are required to hold a position of trust with their client. As a paralegal, you must respect attorney-client confidentiality. Paralegals must possess good "people skills" and be able to work as part of the legal team. Computer skills are essential.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

We offer a minor in Paralegal Studies.

UC Advantages And Special Opportunities

In choosing a paralegal program, there are many variables to consider. It is particularly important to consider the program's reputation, accreditation/approval, services provided by the program -- including career counseling and job placement -- the program's ties to the legal community, the curriculum and the program's administration and faculty.

UC's law and paralegal studies program was established in 1980 and is approved by the American Bar Association (ABA) -- the first program in the Tristate area to gain such approval. More than 1,000 paralegal programs exist in the United States alone, but only around 240 have met the requirements to be approved by the ABA. ABA approval has served as a benchmark for many employers who hire paralegals. The ABA requires thorough self-studies and periodic site visits to the program, which ensures quality in faculty, curriculum, advisory boards, student services, library holdings and resources.

Our program enjoys an excellent reputation and has meaningful ties to the legal community. Its advisory board is made up of experienced attorneys, paralegals, paralegal managers, educators and other legal professionals who provide valuable insight into what is expected in the workforce. Graduates are highly sought after by law firms, corporations and government agencies in the Tristate area. Placement rates continue to be excellent. The program coordinator, along with UC's Career Development Center, is available to assist students in resumé writing, interviewing skills and placement. In addition to the Career Development Center, assistance for paralegal students is offered in the following areas: orientation, tutoring, academic counseling and financial aid.

Our program also prepares graduates at two levels: bachelor's degree or professional certificate. The certificate is available to those students who already hold a bachelor's degree OR students who are already matriculated in another bachelor's degree program. UC paralegal students benefit from an on-campus law library, faculty who are practicing attorneys and small class size.

UC's law and paralegal program requires students to complete a internship as a part of the curriculum. The practicum enables a student to utilize skills acquired in the program and to gain practical on-the-job experience. Internships are available in a variety of settings, including private law firms, offices of a public defender or attorney general, banks, corporate legal departments, legal aid organizations and many government agencies. Students must attain at least a grade of "C" in all legal specialty coursework and the permission of the program coordinator to participate in the internship.

The faculty of paralegal classes consists of experienced attorneys. Instructors of legal classes are selected on the basis of their knowledge and expertise in the area of law taught, as well as their demonstrated commitment to the education and role of paralegal students.

Special Programs

CECH Tribunal

The purpose of the CECH Tribunal is to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the Tribunal organizes programs and social events for students of the college.

CECH Student Ambassador Program

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education, and criminal justice.

Criminal Justice Society

The Criminal Justice Society is a student-sponsored organization designed to enhance the educational experience of those interested in criminal justice and criminal behavior. Criminal Justice Society promotes the study of crime and justice and sponsors activities for interested students. Activities include prison tours, speaker events and an annual career fair.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.5 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.5 cumulative GPA (all prior institutions combined)

UNIVERSITY OF CINCINNATI PARALEGAL STUDIES PROGRAM LEGAL SPECIALTY TRANFER POLICY

A student may obtain advanced standing for legal specialty courses through the transfer of credits from other academic institutions if that program is ABA-approved or insubstantial compliance, regionally accredited and otherwise meets the standards established by the University of Cincinnati. However, a minimum of fifteen semester credit hours of legal specialty courses must be completed in the University of Cincinnati Law & Paralegal Studies program, before a bachelor degree will be issued. None of the 30 semester credit hours may be transferred for the post-baccalaureate certificate unless approval is received from the Law & Paralegal Studies Program Director. Students bear the burden of proving whether coursework completed at other institutions are online course or offered through traditional delivery methods. If the student is unable or unwilling to prove the method of delivery, it will be assumed that the course is offered in an online format. The University of Cincinnati's Law & Paralegal program restricts the number of hours that may be completed in an online format.

The Law and Paralegal Studies program will not accept paralegal coursework older than 10 years. This policy ensures that students are equipped with up-to-date knowledge and skills relevant to the contemporary legal landscape.

UC CECH PARALEGAL STUDENTS ATTENDING OTHER INSTITUTIONS

Students may take legal specialty classes at another ABA-approved program at an accredited college or university while simultaneously enrolled at UC, and the academic credits earned may be transferred. However, only those credits that conform to UC's standards and requirements will be accepted. Official transcripts for such course work must be filed with UC's Registrar at the completion of the teem of enrollment. Students are responsible for requesting these transcripts and for paying all related charges. Students planning to take courses at other institutions must secure in advance the approval of UC's Law & Paralegal Studies Program Director.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.5 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.5 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at 513-556-2336.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admission for details at 513-556-1100 or visit UC International's website.

Graduation Requirements

To graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a university 2.0 grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted deadline.

Software Application Development

Online

Duration: 5 Years Total Credits: 120 Award: BS

Overview

The **Bachelor of Science in Software Application Development** online program focuses on the design and development of software that are essential to creating applications and systems to streamline technological efforts in businesses and personal productivity. In this program, students will learn how to create software using various platforms, frameworks, and languages.

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

The Software Application Development program focuses on practical skills necessary for careers such as:

- Software developers
- Computer programmers
- Software quality assurance analysts and testers
- Web developers
- Web and digital interface designers

Success

Successful professionals in software application development are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. Software application development professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions.

Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. Software application development professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed. All opportunities may not be listed.

Minoring

Students interested in pursuing a minor in software application development are advised to pursue a minor in information technology, a certificate in software development, or a certificate in web development. They can work with their academic advisor to select appropriate software courses that build on their background.

UC Advantages And Special Opportunities

The School of Information Technology is home to the first Bachelor of Science in Information Technology program in Ohio, and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The School of Information Technology houses the Information Technology Solutions Center, Information Technology Analytics Center, and Applied Machine Learning and Intelligence Lab.

The software application development program is uniquely designed to provide hands-on experience in the core foundation of software application development and information technology. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the software application development program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The full time paid co-op working experience positions software application development graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national and international placement opportunities.

The software application development program emphasizes problem solving, communication, hands-on skills, innovation and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through course work and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the School of Information Technology at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

PLEASE NOTE: If a potential student is interested in this major and does not meet these minimum standards, please contact the CECH Office of Recruitment to discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the CECH Student Services Center at (513) 556-2336 or email.

International Student Requirements

The School of Information Technology welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Freshmen:

- Application Deadline:
  - Early Action: December 1*****
  - Final: March 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

GE Codes: SBS	SOCIAL AND BEHAVIORAL SCIENCES ELECTIVE Student must select one 3 credit hour course in Social & Behavioral Sciences.	3

Course	Title/Desc	Credit
	ADVISOR APPROVED ELECTIVE Student must work with their Academic Advisor to select an Advisor Approved Elective. If more than 3 credit hours were used for the natural science to accommodate the lab, students may take less credit hours in this elective to maintain 120 credits in their degree program.	1 - 3
GE Codes: CD,SBS	GENERAL EDUCATION ELECTIVE Students must select a 3 credit hour Social & Behavioral Sciences course. Students graduating after Spring 2030 must complete an approved American Civic Literacy course.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Software Application Development

Duration: **5 Years** Total Credits: **120** Award: **BS**

Overview

The **Bachelor of Science in Software Application Development** on-campus program at the University of Cincinnati emphasizes the design and development of software applications and systems that enhance business operations and personal productivity. Students in this program will engage in hands-on learning and face-to-face instruction while developing software using a variety of platforms, frameworks, and programming languages essential in today's technology landscape.

Throughout the curriculum, students will gain practical experience and apply their skills by developing a real-world IT solution in their senior year. They will also benefit from co-op experiences, working alongside current professionals in the software and IT fields.

Career Paths for Graduates

The Software Application Development program equips students with the practical skills needed for a variety of high-demand careers, such as:

- Software Developer
- Computer Programmer
- Software Quality Assurance Analyst and Tester
- Web Developer
- Web and Digital Interface Designer

Success

Successful professionals in software application development are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. Software application development professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions.

Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. Software application development professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Software Application Development

Online

Duration: 5 Years Total Credits: 120 Award: BS

Overview

The **Bachelor of Science in Software Application Development** online program focuses on the design and development of software that are essential to creating applications and systems to streamline technological efforts in businesses and personal productivity. In this program, students will learn how to create software using various platforms, frameworks, and languages.

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

The Software Application Development program focuses on practical skills necessary for careers such as:

- Software developers
- Computer programmers
- Software quality assurance analysts and testers
- Web developers
- Web and digital interface designers

Success

Successful professionals in software application development are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. Software application development professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions.

Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. Software application development professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed. All opportunities may not be listed.

Minoring

Students interested in pursuing a minor in software application development are advised to pursue a minor in information technology, a certificate in software development, or a certificate in web development. They can work with their academic advisor to select appropriate software courses that build on their background.

The software application development program is uniquely designed to provide hands-on experience in the core foundation of software application development and information technology. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the software application development program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The full time paid co-op working experience positions software application development graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national and international placement opportunities.

The software application development program emphasizes problem solving, communication, hands-on skills, innovation and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through course work and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the School of Information Technology at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

PLEASE NOTE: If a potential student is interested in this major and does not meet these minimum standards, please contact the CECH Office of Recruitment to discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the CECH Student Services Center at (513) 556-2336 or email.

International Student Requirements

The School of Information Technology welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Freshmen:

- Application Deadline:
  - Early Action: December 1*****
  - Final: March 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Software Application Development : Online

BS

Software Application Development Bachelors: Online 2025-2026

Duration: 5 Years

Minimum Credits: 120 Credits

Semester 1

Courses offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT1050	Fundamentals of Information Technology (C- min)	3
IT1080C	Computer Networking (C- min)	3
IT1090C	Computer Programming I (C- min)	3
IT2040C	Fundamentals of Web Development (C- min)	3
COMM1076	Introduction to Interpersonal Communication (C- min)	3
PD	PD1010 Professional Development NOTE: Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester. (C- min)	1
IT	IT1003 FIRST YEAR EXPERIENCE IN THE SCHOOL OF INFORMATION TECHNOLOGY NOTE: Transfer and transition students will take a 1 credit hour IT elective in place of the FYE in IT course (C- min)	1

Semester 2

Courses offered in the Spring and Fall semesters

Course	Title/Desc	Credit
IT2060C	Database Management I (C- min)	3
IT1081C	System Administration (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH	MATH1021 COLLEGE ALGEBRA Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective. (C- min)	3

Co-op Experience

Students must work with their academic and co-op advisors to select their co-op rotation

Course	Title/Desc	Credit
COOP2041	Co-op for CECH (First Semester Experience)	0
COOP2042	Co-op for CECH (Second Semester Experience)	0
COOP3041	Co-op for CECH (Third Semester Experience)	0
COOP4041	Co-op for CECH (Fourth Semester Experience)	0
COOP4042	Co-op for CECH (Fifth Semester Experience)	0

Semester 3

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT1051C	Fundamentals of Digital Media	3
IT2020	Implications of Information Technology	3
IT2045C	Computer Programming II (C- min)	3
IT3060C	Database Management II	3
MATH	MATH1022 TRIGONOMETRY Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.	3

Semester 4

Courses are offered in the Summer and Fall semesters

Course	Title/Desc	Credit
IT2021	Human Computer Interaction	3
IT3045C	Contemporary Programming (C- min)	3
ENGL2089	Intermediate Composition	3

Course	Title/Desc	Credit
COMM	COMMUNICATION ELECTIVE Communication elective can be either from the Oral Communication group (COMM1071, COMM2021, COMM2081) or the Media and Society group (COMM2025, COMM2089, COMM3026). Some of the courses count towards the Professional Communication certificate or the Digital Engagement Certificate.	3
	HPE2071 Applied Statistics Students may also take STAT1034.	3

Semester 5

Courses are offered in the Spring and Summer semesters

Course	Title/Desc	Credit
IT3020	System Analysis & Design	3
IT3048C	Mobile Device Programming (C- min)	3
IT3049C	Web Game Development (C- min)	3
MATH1071	Introduction to Discrete Mathematics	3
	NATURAL SCIENCE ELECTIVE Student must select one 3 credit hour course in Astronomy, Biology, Chemistry, Environmental Science, Geology, Physical Geography, or Physics.	3

Semester 6

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT3047C	Web Server Application Development (C- min)	3
IT4020	Management in Information Technology (C- min)	3
IT4033	Senior Design Preparation (C- min)	1
IT4045C	Enterprise Application Development (C- min)	3
	NATURAL SCIENCE ELECTIVE WITH LAB Student must select one 3 credit hour course WITH LAB in Astronomy, Biology, Chemistry, Environmental Science, Geology, Physical Geography, or Physics.	3
ENGL	WRITING ELECTIVE Student may select from ENGL4091 Business Writing or ENGL4092 Technical and Scientific Writing.	3

Semester 7

Senior Capstone courses are offered in the Fall semester only.

Course	Title/Desc	Credit
IT5003C	Senior Capstone Project I (C- min)	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	3
GE Codes: AH	ARTS AND HUMANITIES ELECTIVE Student must select one 3 credit hour course in Arts and Humanities.	3
GE Codes: AH	ARTS AND HUMANITIES ELECTIVE - DIFFERENT SUBJECT Student must select one 3 credit hour course in Arts and Humanities that is a different subject than the first Arts and Humanities elective.	3

Semester 8

Senior Capstone courses are offered in the Spring semester only.

Course	Title/Desc	Credit
IT5004C	Senior Capstone Project II	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	3

Course	Title/Desc	Credit
GE Codes: SBS	SOCIAL AND BEHAVIORAL SCIENCES ELECTIVE Student must select one 3 credit hour course in Social & Behavioral Sciences.	3

Course	Title/Desc	Credit
	ADVISOR APPROVED ELECTIVE Student must work with their Academic Advisor to select an Advisor Approved Elective. If more than 3 credit hours were used for the natural science to accommodate the lab, students may take less credit hours in this elective to maintain 120 credits in their degree program.	1 - 3
GE Codes: CD,SBS	GENERAL EDUCATION ELECTIVE Students must select a 3 credit hour Social & Behavioral Sciences course. Students graduating after Spring 2030 must complete an approved American Civic Literacy course.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Sport Administration

Duration: **4 Years** Total Credits: **120** Award: **BS**

Overview

The Bachelor of Science in Sport Administration has a curriculum that focuses on the business side of the sport industry, and was developed to meet the standards of the Sport Management Program Review Council. The University of Cincinnati's Sport Administration program provides graduates with a strong technical foundation and the sport business skills necessary to successfully enter the field of sport management and/or athletics. Students in our Sport Administration degree program will have an opportunity to earn a career-oriented degree with employment opportunities in a growing industry.

Success

Successful sport administration graduates must have technical sport business skills as well as conceptual skills to see the big picture. Additionally, a successful sport manager must have a high level of interpersonal skills to build and maintain positive relationships with an array of constituents. Sport administrators also require excellent communication skills and the ability to lead and motivate others.

Sport management success depends upon critical thinking and creative problem solving with an emphasis on teamwork. However, the most important factor to success is a love of sports.

Career

There are approximately five million people working in sport-related occupations. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

UC Advantages And Special Opportunities

Honors Program

The University of Cincinnati Honors Scholars Program offers small, interactive classes that allow you to receive personalized instruction and to learn more effectively. Certificate programs allow you to explore topics such as global studies and leadership in greater depth. The Honors Scholars Program enriches the educational experience of top students through coursework and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning.

Study Abroad Opportunities

Students can study abroad anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic advisor and bring back a transcript with passing grades from an accredited institution. There are four types of study abroad experiences: UC programs, exchange programs, program providers, and direct enrollment.

Special Programs

The sport administration program includes a significant number of "free electives" to provide the student with the flexibility to pursue a business minor, learn a foreign language, or study an area of interest.

Students will have the advantage of sport coursework taught by faculty who have engaged in significant research in the field of sport and also by faculty who are currently working within the sport industry.

Practicum is part-time experience involving observing and providing assistance to a sport management professional. This experience provides students the opportunity to make contacts within the sport industry and begin building a resume. The internship is full-time work experience in which sport management practices are applied and students demonstrate proficiency in critical thinking, effective communication, knowledge integration, and social responsibility. The practicum and internship experience will significantly increase employment opportunities for students.

The sport administration student group, Society of Sport Leaders, provides students with the opportunity to get involved and associate with fellow students interested in sport.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.25 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.25 cumulative GPA (all prior institutions combined)

For more information, visit the Transfer and Transition Advising Center.

Transfer students should apply using our transfer student online application.

Transfer Articulation Agreements & Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

The following institutions have Transfer Degree Maps for this major:

- Sinclair Community College

Changing Majors Within UC

Admission to this program is generally available for the University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.25 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.25 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at 513-556-2336.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admission for details. 513-556-1100

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Substance Abuse Counseling

Online

Duration: 4 Years Total Credits: 120 Award: BS

Overview

The online bachelor's degree program in substance abuse counseling is designed for students who are interested in careers in the chemical dependency treatment areas of counseling and prevention. Students are prepared through a program grounded in current research and proven practice in the field of substance abuse to be qualified clinicians. Substance abuse counseling instructors represent a broad range of experience, skills and knowledge in the field including faculty with research and training expertise as well as experienced practitioners in drug and alcohol treatment across many demographic groups.

Success

Students who have an interest in working in the community to provide assistance to others are great candidates for the degree in substance abuse counseling. Students in the substance abuse counseling program may enhance their education by choosing an area of study within the degree requirements that can include child abuse recognition or another human service-related area.

Students who excel in the substance abuse counseling program often have very strong interpersonal skills and work well with others. Excellent written and verbal communications skills are also a plus.

Career

The Bachelor of Science in Substance Abuse Counseling (Program) is a cutting-edge, research-oriented program that provides students with essential knowledge, competencies, and skills to kickstart careers in substance use disorder (SUD) counseling.

The Program meets the Ohio Chemical Dependency Professionals Board requirements for becoming a Chemical Dependency Counselor Assistant (CDCA), as well as the requirements for corresponding certifications in many other states.

The Program also meets three of the four (the degree, education hour, and Core Function experience (220 hours)) requirements for becoming a Licensed Chemical Dependency Counselor III (LCDC III) in Ohio, as well as some of the requirements for corresponding certifications and licenses in many other states.

In Ohio, students pursuing the LCDC III must also meet a fourth requirement— document 2,000 hours (approximately one year) of supervised SUD related field work experience before sitting for the Alcohol and Drug Counselor Exam. This additional field work experience is not provided as part of, nor a requirement of, the Program.

Because the number of required work field experience hours necessary for obtaining bachelor's degree level licensure varies by state, students are advised early in the Program to determine how many are required for licensure goals in the state(s) where they will practice.

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Early Childhood Education

Nature-Based Early Learning

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The University of Cincinnati Online's Early Childhood Education bachelor degree program prepares graduates to design and implement developmentally appropriate learning environments for children Birth – Age 5. The ECE online degree program provides students the opportunity to specialize in Nature-Based Early Learning. Students will study how to design and implement curriculum to enhance children's learning and development through the exposure to nature and nature-based activities.

UC's Nature-Based Early Childhood Education program builds on associate degree competencies in order to strengthen professionals' ability to provide high-quality experiences in Nature-Based programs. Whether you are interested in working as an outdoor educator at a Preschool, Nature Center, Children's Museum, Science Center, or Forest School, our Online Early Childhood Education program provides the flexibility and accessibility you need. Graduates will learn the latest instructional techniques in Nature-Based learning that promote the implemention of progressive and interdisciplinary curricula in natural settings in ways that view children as capable, able to problem-solve, and make decisions that affect their own lives.

***The online bachelor degree does not lead to Ohio's Pre-Kindergarten - Grade 5 teaching licensure.**

Success

Students who are successful demonstrate a passion for the field of early childhood education and a desire to master new challenges. Students must pass a background check, if not already required by their employer. Early childhood professionals must respect diverse children and families and be able to communicate effectively with children, parents, co-workers and supervisors. **Computer skills are essential.**

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

UC Advantages And Special Opportunities

This educational opportunity is only available online. The Early Childhood Learning Community (ECLC) supports over 600 students from every U.S. state and several foreign countries.

The Early Childhood Care & Education is consistently ranked as a Top 15 Best Online Bachelors in Early Childhood Education by TheBestSchools.org.

ECLC has become a worldwide model for online education in the field of early childhood; conferences sponsored by national organizations like the National Association for the Education of Young Children (NAEYC) have featured ECLC as a model for effective online practices. In addition, several articles have been published about the student support system and the student teaching

experience.

The online nature of this program requires an individualized approach to student support. After a student decides to enroll, an Academic Advisor leads each student through a program and a technology orientation, so students learn about our learning management system before they begin online courses. Each student is also assigned an Academic Advisor who is available via e-mail, phone, and text for admission and registration advice and consultation.

Admission Requirements

For freshmen interested in the bachelor's program, please email us for details on the requirements and process.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.5 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.5 cumulative GPA (all prior institutions combined)

Please email our recruitment team if your previous transripts are below these admissions requirements. We work with all students on a case-by-case basis.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati (UC) students enrolled in other colleges at UC, if they were admissible directly from high school and have a 2.5 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.5 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services via email or 513-556-6308.

International Student Requirements

International students should contact UC's International Office of Admissions via email or 513-556-1100 for details.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.5 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Semester

Freshmen and Transfer:

- Application Deadline: July 1
- Confirmation Deadline: Aug 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov 15
- Confirmation Deadline: Dec 15

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 15
- Confirmation Deadline: April 15

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Early Childhood Education

Online

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

According to the National Association for the Education of Young Children (NAEYC), the demand for early childhood care and education programs continues to increase, not only in response to the growing demand for out-of-home child care, but also in recognition of the critical importance of educational experiences during the early years" (naeyc.org/). The bachelor of science degree program in early childhood education prepares professionals to provide high-quality educational experiences for their community's youngest children.

The Early Childhood Education Birth to Age 5 (ECE) program is designed to build on associate degree competencies to enhance professionals' ability to design and implement developmentally appropriate learning environments for children ages birth-five years. Students are usually practitioners working in preschools and other child-care and educational settings.

Graduates will be able to facilitate positive transitions of children with disabilities and special needs, to nurture early language development and early reading and writing growth in other domains, and build early resiliency and self-regulation and to develop as early childhood stakeholder leaders.

The ECE online degree program provides students the opportunity to specialize in Nature-Based Early Learning. Students will study how to design and implement curriculum to enhance children's learning and development through the exposure to nature and nature-based activities. Students interested in this specialization may declare it at the time of admission - or in consultation with an academic advisor.

This program does not lead to Ohio's Pre-Kindergarten - Grade 5 teaching licensure.

Success

Students who are successful demonstrate a passion for the field of early childhood education and a desire to master new challenges. Students must pass a background check, if not already required by their employer. Early childhood professionals must respect diverse children and families and be able to communicate effectively with children, parents, co-workers and supervisors. **Computer skills are essential.**

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

UC Advantages And Special Opportunities

This educational opportunity is only available online. The Early Childhood Education Birth - Age 5 (ECEB5) program supports over 600 students from every U.S. state and several foreign countries.

The ECEB5 program is consistently ranked as a Top 15 Best Online Bachelors in Early Childhood Education by TheBestSchools.org.

ECEB5 has become a worldwide model for online education in the field of early childhood; conferences sponsored by national organizations like the National Association for the Education of Young Children (NAEYC) have featured the program as a model for effective online practices. In addition, several articles have been published about the student support system and the student teaching experience.

The online nature of this program requires an individualized approach to student support. After a student decides to enroll, an Academic Advisor leads each student through a program and a technology orientation, so students learn about our learning management system before they begin online courses. Each student is also assigned an Academic Advisor who is available via e-mail, phone, and text for admission and registration advice and consultation.

Elementary Education

Duration: **4 Years** Total Credits: **120** Award: **BSED**

Overview

Why study Elementary Education?

The University of Cincinnati's Bachelor of Science in Elementary Education (ELEM) program prepares graduates to earn an Ohio Primary License. Graduates will be prepared to teach pre-kindergarten to grade five. Our graduates are able to teach in preschool facilities, Head Start programs, child-care centers, and kindergarten through 5th grade classrooms. Our faculty is committed to creating an early education curriculum that prepares our students to be committed, caring and competent educators who support each individual child's learning and development abilities.

During the second, third and fourth years of the program, each candidate will receive hands-on experience within preschool, kindergarten, and grade school classrooms. In order to receive a teaching license, candidates must pass the Ohio Assessments for Educators exams. This program values diversity and aims at implementing inclusion, equity, and individual construction of knowledge within the curriculum.

During their learning experiences, students seeking licensure must be available full-time for ELEM classes and field experiences between the hours of 8a - 4p. They must also expect late afternoon/evening classes and evening teacher hours.

Success

Successful candidates are those who:

- understand how young children develop intellectually, emotionally, physically and socially
- demonstrate pedagogical and philosophical knowledge of and commitment to early childhood education concepts, principles and values
- manage the social and physical environment of diverse learning atmospheres
- use and develop materials appropriate for young children
- collaborate effectively with others
- use technology to support their practice
- use assessment to inform classroom practices
- exhibit responsible, caring, fair and honest behavior
- demonstrate leadership through family and community involvement
- address issues of diversity with equity
- commit to social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Minoring

The early childhood education and development minor offers students the opportunity to develop an understanding of how children develop from birth to age five. Students will get an introductory experience with early child care and infant and toddler care.

This minor provides students with knowledge about developmental concerns with young children and how to best work with the families of children. Student will be introduced to the concept of play as an important part of a child's early learning and development. Students will also learn about the basics of developing creative instructional environments for young children. The required courses provide students with a beginning overview of child development and components of early learning environments.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- a 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams

In addition, this program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Minority Association of Future Educators

The purpose of this organization is to provide minority students with a space where they can speak about the challenges they face in and out of the classroom, as well work to motivate and inspire them to be successful and outstanding teachers and role models.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities, gifted children, and typically developing students. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practices and the opportunity to attend conventions and conferences.

Students for the Education of Young Children (SEYC)

SEYC helps students prepare to enter the teaching profession as early childhood educators. It provides opportunities to network with other professionals and members of the Cincinnati Association for the Education of Young Children (CAEYC) and its state and national affiliated groups. Students provide outreach to centers/schools (preschool through grade three), participate in service projects, and contribute to CAEYC activities such as Week of the Young Child, annual conference, and community lecture series. Students have presented at the NAEYC conference in Washington, DC. Past members welcome and mentor all new students.

CECH Tribunal
The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes

programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Admission into the Elementary Education licensure program is a two-tiered process. After being accepted into the ELEM program, students apply in the fall semester of their sophomore year to ELEM Teacher Candidacy.

Elementary Education Program Admissions:

Freshmen applicants, please visit the Admission Requirements page for more information.

Elementary Teacher Candidacy Admission:

1) ELEM students must apply for admission to ELEM Teacher Candidacy during fall semester sophomore year.

2) Minimum GPA of a 3.0 required.

3) ACT 22 or SAT 1080 (math and verbal combined) recommended.

4) If no ACT or SAT is submitted or the recommended minimum test score is not met, students must take and submit their score for the official UC Math Placement Assessment. Minimum score of 30 required for admission to Teacher Candidacy.

5) Grade of "C" or better in all education courses.

6) Complete all required pre-requisite Teacher Candidacy course work and program requirements.

7) In good academic standing; that is, not on academic or disciplinary probation or suspension.

8) Provide clean BCI/FBI background checks.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a minimum 3.0 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 3.0 cumulative GPA (all prior institutions combined)

All transfer students must apply and be admitted to the ELEM program and, separately, to ELEM Teacher Candidacy.

- All transfer students must meet the cumulative GPA requirement of 3.0.
- Students who do not meet the recommended ACT 22 or SAT 1080 scores (math and verbal combined), must take and pass the UC Math Placement Assessment with a minimum score of 30.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers. Please meet with an academic advisor in the CECH Student Services Center for details.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admissions for details regarding admission requirements.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.

- Obtain at least a 3.0 university grade point average.
- Submit EdTPA.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted deadline.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline (non-binding): Dec 1*
- Rolling Deadline March 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfer:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfer:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Transfer:

- There is no summer admission for transfer students. Please apply to fall or spring terms only.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP). This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio Content Area Standards.

Middle Childhood Education

Language Arts & Mathematics

Duration: **4 Years** Total Credits: **120** Award: **BSED**

Overview

The Bachelor of Science in Middle Childhood Education degree, at the University of Cincinnati, prepares students for teaching in grades 4-9, in two subjects, and also for working as special education intervention specialists in mild to moderate K-12 settings. This dual-licensure program is dedicated to preparing teachers for meeting the needs of all students in diverse settings.

Our Middle Childhood Education program with a concentration in Language Arts and Mathematics prepares our graduates to create and implement research-informed and engaging curriculum, manage productive learning environments, and support the academic, social, and emotional needs of learners. Math covers number sense, algebraic thinking, geometry, measurement, probability, and statistics. Language Arts cover reading literature and informational texts, listening and speaking, and writing. Students with a middle childhood education degree in these concentrations will be comfortable and confident in their abilities to teach students in these areas.

Success

Successful candidates are those who:

- know how young adolescents learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- collaborate effectively with others to develop their own professional competence
- demonstrate leadership through family and community involvement
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their classroom practices
- demonstrate pedagogical and philosophical knowledge of the middle school concept
- embrace the intent of the program through learning situations within an urban environment
- exhibit responsible, caring, fair and honest behavior
- commit to the endeavor of social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. There are additional endorsements that allow teachers to teach in either or both of the additional licensure areas for grades four through six. Graduates of the middle childhood program usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- a 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams

In addition, the middle childhood education program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practices and the opportunity to attend conventions and conferences.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Students for the Education of Young Children (SEYC)

SEYC helps students prepare to enter the teaching profession as early childhood educators. It provides opportunities to network with other professionals and members of the Cincinnati Association for the Education of Young Children (CAEYC) and its state and national affiliated groups. Students provide outreach to centers/schools (preschool through grade three), participate in service projects, and contribute to CAEYC activities such as Week of the Young Child, annual conference, and community lecture series. Students presented at the 2005 NAEYC conference in Washington, DC. Past members welcome and mentor all new students.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at 513-556-2336.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admission for details at 513-556-1100.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.8 cumulative grade point average, with a 2.6 GPA in both content areas.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP). In addition, the middle childhood education program is accredited by the following associations:

- The National Middle School Association
- The National Council for Teachers of English
- The National Council for the Social Studies
- The National Science Teachers Association
- The National Council for Teachers of Mathematics.

This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- a 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams

In addition, the middle childhood education program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practices and the opportunity to attend conventions and conferences.

Students for the Education of Young Children (SEYC)

SEYC helps students prepare to enter the teaching profession as early childhood educators. It provides opportunities to network with other professionals and members of the Cincinnati Association for the Education of Young Children (CAEYC) and its state and national affiliated groups. Students provide outreach to centers/schools (preschool through grade three), participate in service projects, and contribute to CAEYC activities such as Week of the Young Child, annual conference, and community lecture series. Students presented at the 2005 NAEYC conference in Washington, DC. Past members welcome and mentor all new students.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the UC College of Education, Criminal Justice, and Human Services at 513-556-2336.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admission for details at 513-556-1100.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements
- Attain at least a 2.8 cumulative grade point average, with a 2.6 GPA in both content areas
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension
- Meet the college's residency requirement of 30 semester credit hours
- File formal application for the degree by the posted semester of graduation deadline

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP). In addition, the middle childhood education program is accredited by the following associations:

- The National Middle School Association
- The National Council for Teachers of English
- The National Council for the Social Studies
- The National Science Teachers Association
- The National Council for Teachers of Mathematics.

This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

Course	Title/Desc	Credit
MDL4003	Middle School Social Studies Methods I (C min)	3

Course	Title/Desc	Credit
MDL4015	Middle Childhood Education Assessment and Evaluation (C min)	3

Fall Semester Year 4

Course	Title/Desc	Credit
SPED2001	Overview and Special Education Law (C min)	3
SPED3020	Literacy Assessment, Instruction, and Intervention (C min)	3
MDL4005	Middle School Language Arts Methods (C min)	3
MDL4010	Middle Childhood Education Field Practicum II (C min)	1 - 9
	Sociology/Anthropology Elective Recommended: ANTH 1001, SOC 1001, SOC 1002, or SOC 2043. (C min)	3

Spring Semester Year 4

(Students must be full-time during the final semester of student-teaching)

Course	Title/Desc	Credit
MDL4002	Classroom Management: Middle Childhood (C min)	3
MDL4110	Middle Childhood Education Student Teaching (C min)	8 - 9
Free Electives	Student will select a 3 credit hour free elective.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Middle Childhood Education

Math & Natural Science

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The Bachelor of Science in Middle Childhood Education degree, at the University of Cincinnati, prepares students for teaching in grades 4-9, in two subjects, and also for working as special education intervention specialists in mild to moderate K-12 settings. This dual-licensure program is dedicated to preparing teachers for meeting the needs of all students in diverse settings.

Our Middle Childhood Education program with a concentration in Mathematics and Natural Science prepares our graduates to create and implement research-informed and engaging curriculum, manage productive learning environments, and support the academic, social, and emotional needs of learners. Math covers number sense, algebraic thinking, geometry, measurement, probability, and statistics. Natural Science includes earth and space science, life science, and physical science. Students with a middle childhood education degree in these concentrations will be comfortable and confident in their abilities to teach students in these areas.

Success

Successful candidates are those who:

- know how young adolescents learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- collaborate effectively with others to develop their own professional competence
- demonstrate leadership through family and community involvement
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their classroom practices
- demonstrate pedagogical and philosophical knowledge of the middle school concept
- embrace the intent of the program through learning situations within an urban environment
- exhibit responsible, caring, fair and honest behavior
- commit to the endeavor of social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. There are additional endorsements that allow teachers to teach in either or both of the additional licensure areas for grades four through six. Graduates of the middle childhood program usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Middle Childhood Education

Social Studies & Math

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The Bachelor of Science in Middle Childhood Education degree, at the University of Cincinnati, prepares students for teaching in grades 4-9, in two subjects, and also for working as special education intervention specialists in mild to moderate K-12 settings. This dual-licensure program is dedicated to preparing teachers for meeting the needs of all students in diverse settings.

Our Middle Childhood Education program with a concentration in Social Studies and Mathematics prepares our graduates to create and implement research-informed and engaging curriculum, manage productive learning environments, and support the academic, social, and emotional needs of learners. Social Studies is an interdisciplinary subject that addresses civic engagement through the study of history, politics, economics, and geography. Math covers number sense, algebraic thinking, geometry, measurement, probability, and statistics. Students with a middle childhood education degree in these concentration will be comfortable and confident in their abilities to teach students in these areas.

Success

Successful candidates are those who:

- know how young adolescents learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- collaborate effectively with others to develop their own professional competence
- demonstrate leadership through family and community involvement
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their classroom practices
- demonstrate pedagogical and philosophical knowledge of the middle school concept
- embrace the intent of the program through learning situations within an urban environment
- exhibit responsible, caring, fair and honest behavior
- are committed to social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. There are additional endorsements that allow teachers to teach in either or both of the additional licensure areas for grades four through six. Graduates of the middle childhood program usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

- Obtain at least a 2.8 cumulative grade point average, with a 2.6 GPA in both content areas.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP). In addition, the middle childhood education program is accredited by the following associations:

- The National Middle School Association
- The National Council for Teachers of English
- The National Council for the Social Studies
- The National Science Teachers Association
- The National Council for Teachers of Mathematics.

This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Middle Childhood Education

Social Studies & Natural Science

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The Bachelor of Science in Middle Childhood Education degree, at the University of Cincinnati, prepares students for teaching in grades 4-9, in two subjects, and also for working as special education intervention specialists in mild to moderate K-12 settings. This dual-licensure program is dedicated to preparing teachers for meeting the needs of all students in diverse settings.

Our Middle Childhood Education program with a concentration in Social Studies and Natural Science prepares our graduates to create and implement research-informed and engaging curriculum, manage productive learning environments, and support the academic, social, and emotional needs of learners. Social Studies is an interdisciplinary subject that addresses civic engagement through the study of history, politics, economics, and geography. Natural Science includes earth and space science, life science, and physical science. Students with a middle childhood education degree in these concentrations will be comfortable and confident in their abilities to teach students in these areas.

Success

Successful candidates are those who:

- know how young adolescents learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- collaborate effectively with others to develop their own professional competence
- demonstrate leadership through family and community involvement
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their classroom practices
- demonstrate pedagogical and philosophical knowledge of the middle school concept
- embrace the intent of the program through learning situations within an urban environment
- exhibit responsible, caring, fair and honest behavior
- are committed to social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. There are additional endorsements that allow teachers to teach in either or both of the additional licensure areas for grades four through six. Graduates of the middle childhood program usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- a 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams

In addition, the middle childhood education program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practices and the opportunity to attend conventions and conferences.

Students for the Education of Young Children (SEYC)

SEYC helps students prepare to enter the teaching profession as early childhood educators. It provides opportunities to network with other professionals and members of the Cincinnati Association for the Education of Young Children (CAEYC) and its state and national affiliated groups. Students provide outreach to centers/schools (preschool through grade three), participate in service projects, and contribute to CAEYC activities such as Week of the Young Child, annual conference, and community lecture series. Students presented at the 2005 NAEYC conference in Washington, DC. Past members welcome and mentor all new students

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at 513-556-2336.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admission for details at 513-556-1100.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.8 cumulative grade point average, with a 2.6 GPA in both content areas.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Semester

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Secondary Education

Chemistry

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The Bachelor of Science in Secondary Education, at the University of Cincinnati, prepares graduates to become licensed and highly qualified teachers for learners at the junior and senior high school levels, grades 7-12. Students in our program gain experience teaching in urban and diverse school settings and using research-based teaching practices to meet the needs of all learners in their classes. At the secondary level, graduates specialize in one core disciplinary subject: Integrated English/Language Arts, Integrated Mathematics, Integrated Social Studies, Integrated Science, or Physics.

An Integrated science license prepares students to teach all science subject areas in grades 7 -12 in Ohio schools. Students select one science disciplinary as their primary teaching area:

- Chemistry
- Earth and Space Science
- Life Science/ Biology

An integrated science license with an emphasis in Chemistry prepares students to teach all science subject areas in grades 7 -12 in Ohio schools. Students who select a chemistry emphasis will take courses in general and organic chemistry and select either a semester of physical or biochemical chemistry to develop expertise in teaching modern concepts of chemistry and laboratory work as well as address contemporary issues in science such as climate change and ocean acidification. Chemistry emphasis students are prepared to plan and lead instruction that builds learners' understanding of foundational science concepts, engages learners in problem-solving and laboratory experiences, and develops collaborative teamwork to solve engineering and design projects.

Success

Candidates who succeed as teachers of adolescents and young adults:

- know how individuals learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- effectively collaborate with others
- demonstrate leadership
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their efforts
- demonstrate pedagogical knowledge
- are responsible, caring, and fair

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. Secondary education physics graduates usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Secondary Education

Earth Science

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The Bachelor of Science in Secondary Education, at the University of Cincinnati, prepares graduates to become licensed and highly qualified teachers for learners at the junior and senior high school levels, grades 7-12. Students in our program gain experience teaching in urban and diverse school settings and using research-based teaching practices to meet the needs of all learners in their classes. At the secondary level, graduates specialize in one core disciplinary subject: Integrated English/Language Arts, Integrated Mathematics, Integrated Social Studies, Integrated Science, or Physics.

An Integrated science license prepares students to teach all science subject areas in grades 7 -12 in Ohio schools. Students select one science disciplinary as their primary teaching area:

- Chemistry
- Earth and Space Science
- Life Science/Biology

An integrated science license with an emphasis in Earth and Space Sciences prepares students to teach all science subject areas in grades 7 -12 in Ohio schools. Students who select an Earth and Space Science emphasis to take courses in geology, astronomy, metrology, and oceanography to develop expertise in teaching modern theories about the origin of the earth and universe, as well as address contemporary issues such as climate change and ocean acidification. Earth and Space Science students are prepared to plan and lead instruction that builds learners' understanding of foundational science concepts; engages learners in problem-solving and laboratory experiences, and develops collaborative teamwork to solve engineering and design projects.

Success

Candidates who succeed as teachers of adolescents and young adults:

- know how individuals learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- effectively collaborate with others
- demonstrate leadership
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their efforts
- demonstrate pedagogical knowledge
- are responsible, caring, fair and honest
- are committed to social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. Secondary education physics graduates usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- a 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams

The secondary education program is committed to the continuous improvement of its programs and operations and is nationally recognized for specific licenses by the National Council for Teachers of English, the National Council for Teachers of Mathematics, the National Council for the Social Studies and the National Science Teachers Association. This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

In addition, the secondary education program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practice and the opportunity to attend conventions and conferences.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at 513-556-2336.

International Student Requirements

Please contact the University of Cincinnati's Office of International Admissions for details at (513) 556-1100.

Graduation Requirements

To graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.8 university grade point average and a 2.8 GPA in content area.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov 1
- Confirmation Deadline: Dec 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP). In addition, the secondary education program is accredited by the following associations:

- the National Council for Teachers of English
- the National Council for Teachers of Mathematics
- the National Council for the Social Studies
- the National Science Teachers Association.

This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

Secondary Education

English Language Arts

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The Bachelor of Science in Secondary Education at the University of Cincinnati prepares graduates to become licensed and highly qualified teachers for learners at the junior and senior high school levels, grades 7-12. Students in our program gain experience teaching in urban and diverse school settings and using research-based teaching practices to meet the needs of all learners in their classes. At the secondary level, graduates specialize in one core disciplinary subject: Integrated English/Language Arts, Integrated Mathematics, Integrated Social Studies, Integrated Science, or Physics.

An Integrated English/Language Arts license prepares students to teach all subject areas related to English language arts in grades 7-12 in Ohio schools. Students will complete course work that substantively engages in topics related to critical literacies, reading comprehension, composition, canonical and young adult literature, and the production and consumption of digital texts. All students will be prepared to plan and lead literacy instruction that is culturally sustaining and critically engaged in contemporary issues.

Success

Candidates who succeed as teachers of adolescents and young adults:

- know how individuals learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- effectively collaborate with others
- demonstrate leadership
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their efforts
- demonstrate pedagogical knowledge
- are responsible, caring, fair and honest
- are committed to social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. Secondary education physics graduates usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at (513) 556-2336.

International Student Requirements

International students should contact the University of Cincinnati's Office of Admission for details at (513) 556-1100.

Graduation Requirements

To graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.8 university grade point average and a 2.8 GPA in content area.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov 1
- Confirmation Deadline: Dec 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP). In addition, the secondary education program is accredited by the following associations:

- the National Council for Teachers of English
- the National Council for Teachers of Mathematics
- the National Council for the Social Studies
- the National Science Teachers Association.

This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

Secondary Education

Mathematics

Duration: 4 Years Total Credits: 120 Award: BSED

Overview

The Bachelor of Science in Secondary Education at the University of Cincinnati prepares graduates to become licensed and highly qualified teachers for learners at the junior and senior high school levels, grades 7-12. Students in our program gain experience teaching in urban and diverse school settings and using research-based teaching practices to meet the needs of all learners in their classes. At the secondary level, graduates specialize in one core disciplinary subject: Integrated English/Language Arts, Integrated Mathematics, Integrated Social Studies, Integrated Science, or Physics.

An Integrated Mathematics license prepares students to teach all math subject areas in grades 7-12 in Ohio schools, including Algebra, Geometry, Statistics, Pre-Calculus, and—with appropriate training—AP Calculus. Students who pursue an integrated mathematics license take the equivalent of a math major as well as coursework to learn about adolescent psychology and development, instructional technology, and mathematics teaching practices. Students are prepared to teach math in a way that promotes conceptual understanding in addition to procedural skills. Students learn to plan and implement problem-based instruction, facilitate groupwork, and promote mathematical reasoning.

Success

Candidates who succeed as teachers of adolescents and young adults:

- know how individuals learn and develop
- can articulate the central concepts, tools of inquiry and the structures of their discipline
- effectively collaborate with others
- demonstrate leadership
- address issues of diversity with equity
- use technology to support their practice
- use assessment to inform their efforts
- demonstrate pedagogical knowledge
- are responsible, caring, fair and honest
- are committed to social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. Secondary education physics graduates usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the UC College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams -- 100 percent pass rate on the Praxis II licensure tests

The secondary education program is committed to the continuous improvement of its programs and operations and is nationally recognized for specific licenses by the National Council for Teachers of English, the National Council for Teachers of Mathematics, the National Council for the Social Studies and the National Science Teachers Association. This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

In addition, the secondary education program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practice and the opportunity to attend conventions and conferences.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

The Bachelor of Science in Secondary Education, at the University of Cincinnati, prepares graduates to become licensed and highly qualified teachers for learners at the junior and senior high school levels, grades 7-12. Students in our program gain experience teaching in urban and diverse school settings and using research-based teaching practices to meet the needs of all learners in their classes. At the secondary level, graduates specialize in one core disciplinary subject: Integrated English/Language Arts, Integrated Mathematics, Integrated Social Studies, Integrated Science or Physics.

An Integrated Social Studies license prepares students to teach all social studies subject areas in grades 7-12 in Ohio schools. Students will complete course work across all social studies areas including U.S. History, World History, Political Science, Economics, Geography, and electives such as Sociology and Psychology. All students will be prepared to plan and lead instruction that centers inquiry at the heart of social studies, engages learners in critical thinking, and develops collaborative and deliberative discourse across the social studies to prepare learners to become active and informed citizens.

Success

Candidates who succeed as teachers of adolescents and young adults:

- Know how individuals learn and develop
- Can articulate the central concepts, tools of inquiry and the structures of their discipline
- Effectively collaborate with others
- Demonstrate leadership
- Address issues of diversity with equity
- Use technology to support their practice
- Use assessment to inform their efforts
- Demonstrate pedagogical knowledge
- Are responsible, caring, fair and honest
- Are committed to social justice

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. Secondary education physics graduates usually elect to teach in Ohio but graduates teach across the nation.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- a 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams

The secondary education program is committed to the continuous improvement of its programs and operations and is nationally recognized for specific licenses by the National Council for Teachers of English, the National Council for Teachers of Mathematics, the National Council for the Social Studies and the National Science Teachers Association. This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

In addition, the secondary education program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practice and the opportunity to attend conventions and conferences.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

International Student Requirements

International students should contact the University of Cincinnati's Office of Admission for details at (513) 556-1100.

Graduation Requirements

To graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.8 university grade point average and a 2.8 GPA in content area.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted deadline.

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for scholarships and the Honors Program.

Freshmen and Transfers:

- Application Deadline: Nov 1
- Confirmation Deadline: Dec 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP). In addition, the secondary education program is accredited by the following associations:

- the National Council for Teachers of English
- the National Council for Teachers of Mathematics
- the National Council for the Social Studies

- the National Science Teachers Association.

This program has been determined to meet the Ohio reading mandate and is aligned with the Ohio content area standards.

Secondary Education : Social Studies - History

BSED

Secondary Education: Integrated Social Studies (History) Fall 2023

Duration: 4 Years
Minimum Credits: 120 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
HIST1001	United States History I (C min)	3
HIST1003	World History I (C min)	3
HDCE2003	Pre-Adolescent through Adolescent Development (C min)	3
EDST1001	Historical Foundations in Education (C min)	3
CI2001	Digital Communication for Modern Learning (C min)	3
PRFS1001	First Year Exp in the College of Education, Criminal Justice, and Human Services	1

Spring Semester Year 1

Course	Title/Desc	Credit
EDST1002	Educational Psychology (C min)	3
SPED1001	Individuals with Exceptionalities (C min)	3
ECED2003	Microeconomic Principles for Teachers (C min)	3
HIST1002	United States History II (C min)	3
CI1001	Educational Technology (C min)	3

Fall Semester Year 2

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
	Anthropology or Religion Elective Student may select ANTH1001, ANTH1002, or RELG1001. (C min)	3
GEOG1004	Introduction to Human Geography (C min)	3
BoK: QR	College Level Quantitative Reasoning Elective	3
POL	Political Science Elective Student may select from POL1060 or POL1080. (C min)	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
POL1010	Introduction to American Politics (C min)	3
HIST1004	World History II (C min)	3
CI3003	Teaching and Learning in Diverse Classrooms (C min)	3
POL1040	Introduction to Political Theory (C min)	3
PSYC1001	Introduction to Psychology (C min)	3

Fall Semester Year 3

Course	Title/Desc	Credit
ECON1002	Introduction to Macroeconomics (C min)	3
GEOG1001	Introduction to Physical Geography (C min)	3
HIST3000	Introduction to Historical Thought and Methods (C min)	3
HIST2XXX+	History Elective Students will select a History course at the 2000-level or higher. (C min)	3
HIST3XXX+	Non-US/European History Elective Student will select a History course that is Non-US/European at the 3000-level or higher. (C min)	3

Spring Semester Year 3

(First semester of professional cohort)

Course	Title/Desc	Credit
SEC4019	Introductory Methods Secondary: Social Studies (C min)	3
SEC4025	Secondary Practicum Experience I (C min)	3
HIST3089	Technology in World History (C min)	3
HIST3XXX+	Pre-1800 History Elective Student will select a History course that is Pre-1800 at the 3000-level or higher. (C min)	3
POL3XXX+	Student may select a Political Science course at the 3000-level or higher. (C min)	3

Fall Semester Year 4

Course	Title/Desc	Credit

Spring Semester Year 4

Course	Title/Desc	Credit

Course	Title/Desc	Credit
SEC5024	Intermediate Methods Secondary: Social Studies (C min)	3
SEC5026	Secondary Practicum Experience II (C min)	5
LSLS4014	Disciplinary Literacy in the Secondary School (C min)	3
HIST4XXX+	Student may select a History elective at the 4000-level or higher. (C min)	3

Course	Title/Desc	Credit
SEC5134	Advanced Methods Secondary: Social Studies (C min)	3
SEC5191	Secondary Student Teaching II (C min)	9

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Special Education

Language Arts & Mathematics

Duration: **4 Years** Total Credits: **120** Award: **BSED**

Overview

The Bachelor of Science in Special Education at the University of Cincinnati provides direct and indirect services for individuals with disabilities. Some services provided by people in the field of special education include K-12 education, rehabilitation for occupational development and daily independence, community-based case management, disability advocacy, school and individualized consultation services and various other services related to individuals with disabilities and their families. Through education, community awareness and ecologically based service delivery, the focus of special education is to enhance and better the lives of all individuals with disabilities.

In our Special Education undergraduate program, we offer two subject concentrations:

- Language Arts & Math
- Language Arts & Science

In the Language Arts and Math concertation, our students will be able to communicate the principles of basic grammar, verb usage, essay writing, and comprehensive literacy instruction for students with significant cognitive disabilities. In addition, our students are able to teach the basic arithmetic through algebra by creating a curriculum based on the foundation of theory and best classroom practices.

Success

Candidates who succeed in special education demonstrate:

- a history of academic success
- the ability to collaborate with others, including those from diverse populations
- leadership characteristics
- responsible, caring, fair, honest and ethical behavior
- a commitment to social justice and a diverse society
- a history of good critical thinking and problem solving
- enthusiasm for working with children and adults with disabilities
- a commitment to equity and the betterment of individuals with disabilities

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). Special Education

Duration: **4 Years** Total Credits: **120** Award: **BSED**

Overview

The Bachelor of Science in Special Education at the University of Cincinnati provides direct and indirect services for individuals with disabilities. Some services provided by people in the field of special education include K-12 education, rehabilitation for occupational development and daily independence, community-based case management, disability advocacy, school and individualized consultation services and various other services related to individuals with disabilities and their families. Through education, community awareness and ecologically based service delivery, the focus of special education is to enhance and better the lives of all individuals with disabilities.

Success

Candidates who succeed in special education demonstrate:

- a history of academic success
- the ability to collaborate with others, including those from diverse populations
- leadership characteristics
- responsible, caring, fair, honest and ethical behavior
- a commitment to social justice and a diverse society
- a history of good critical thinking and problem solving
- enthusiasm for working with children and adults with disabilities
- a commitment to equity and the betterment of individuals with disabilities

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

UC Advantages And Special Opportunities

Formed as the Teachers College in 1905, the College of Education, Criminal Justice, and Human Services continually merits local, state and national recognition. Recent commendations include:

- accreditation from the Council for the Accreditation of Educator Preparation (CAEP), the organization responsible for professional accreditation of teacher education
- a 65th ranking in U.S. News & World Report
- the Best Practice Award from the American Association of Colleges for Teacher Education (AACTE)
- consistently high scores by candidates on state mandated licensure exams

In addition, the special education program provides small classes, talented faculty in each discipline and extensive field clinical experiences in urban and suburban schools.

Special Programs

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Minority Association of Future Educators

The purpose of this organization is to provide minority students with a space where they can speak about the challenges they face in and out of the classroom, as well work to motivate and inspire them to be successful and outstanding teachers and role models.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practices and the opportunity to attend conventions and conferences.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the tribunal organizes programs and social events for students of the college.

CECH Student Ambassadors

The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH student ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH student ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

Prospective applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (all prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the UC College of Education, Criminal Justice, and Human Services at (513) 556-2336.

Graduation Requirements

In order to graduate from UC's College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Attain at least a 2.8 cumulative grade point average, with a 2.5 GPA in both content areas.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted deadline.

Duration: **4 Years** Total Credits: **120** Award: **BSED**

Overview

The Bachelor of Science in Special Education at the University of Cincinnati provides direct and indirect services for individuals with disabilities. Some services provided by people in the field of special education include K-12 education, rehabilitation for occupational development and daily independence, community-based case management, disability advocacy, school and individualized consultation services and various other services related to individuals with disabilities and their families. Through education, community awareness and ecologically based service delivery, the focus of special education is to enhance and better the lives of all individuals with disabilities.

In our Special Education undergraduate program, we offer two subject concentrations:

- Language Arts & Math
- Language Arts & Science

In the Language Arts and Math concertation, our students will be able to communicate the principles of basic grammar, verb usage, essay writing, and comprehensive literacy instruction for students with significant cognitive disabilities. In addition, our students are able to teach the basic arithmetic through algebra by creating a curriculum based on the foundation of theory and best classroom practices.

Success

Candidates who succeed in special education demonstrate:

- a history of academic success
- the ability to collaborate with others, including those from diverse populations
- leadership characteristics
- responsible, caring, fair, honest and ethical behavior
- a commitment to social justice and a diverse society

- at least a 2.8 cumulative GPA (all prior institutions combined)

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.8 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.8 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the UC College of Education, Criminal Justice, and Human Services at (513) 556-2336.

Graduation Requirements

In order to graduate from UC's College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Attain at least a 2.8 cumulative grade point average, with a 2.5 GPA in both content areas.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted deadline.

Application Deadlines

Fall Semester

Freshmen:

- Application Deadline: Dec 1*
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for scholarships and the Honors Program.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP).

Special Education : Language Art & Natural Science

BSED

Special Education - Language Arts & Natural Science (2023-2024)

Duration: 4 Years
Minimum Credits: 120 Credits

Fall Semester- Year 1

Course	Title/Desc	Credit
ASL1001	Beginning American Sign Language I (C min)	3
EDST1001	Historical Foundations in Education (C min)	3
ENGL1001	English Composition (C min)	3
ENGL2026	Intro to Disability Literature (C min)	3
PHYS1020	Astronomy: The Solar System (C min)	3
PRFS1001	First Year Exp in the College of Education, Criminal Justice, and Human Services	1

Spring Semester- Year 1

Course	Title/Desc	Credit
BIOL1022	Introductory Biology II: Life on Earth, Organism to Ecosystem (C min)	3
CI1001	Educational Technology (C min)	3
EDST1002	Educational Psychology (C min)	3
SPED1001	Individuals with Exceptionalities (C min)	3
MATH STAT BoK: QR	College Level Math: Select College Level Math or STAT	3

Fall Semester- Year 2

Course	Title/Desc	Credit
CHEM1010	Chemistry in Today's Society I (C min)	3
CHEM1010L	Chemistry in Todays Society Lab I (C min)	1
CI3003	Teaching and Learning in Diverse Classrooms (C min)	3
STAT1034	Elementary Statistics I (C min)	3
LSLS2XXX	Literacy Elective: Select LSLS2045 or LSLS2047 (C min)	3

Spring Semester- Year 2

Course	Title/Desc	Credit
CHEM1011	Chemistry in Today's Society II (C min)	3
ENGL2089	Intermediate Composition (C min)	3
ENGL2184	Comics & Graphic Novels (C min)	3
GEOL1023C	Introduction to Geoscience Education (C min)	4
SPED2001	Overview and Special Education Law (C min)	3

Fall Semester- Year 3

Professional Cohort Courses

Course	Title/Desc	Credit
LSLS3012	Foundations of Reading and Writing for Intervention Specialists (C min)	3
SPED3004	Vocabulary, Comprehension, and Writing Instruction in the Content Areas (C min)	3
SPED3006	Assessment & Intervention (C min)	3
SPED3007	Promoting Positive Behaviors (C min)	3
SPED3009	Assessment and Curriculum Planning: Moderate to Intense (C min)	3

Spring Semester- Year 3

Professional Cohort Courses

Course	Title/Desc	Credit
LSLS2006	Phonological Awareness and Phonics in Middle and Special Education (C min)	3
MDL4001	Middle School Natural Science Methods I (C min)	3
SPED3008	Curriculum Planning & Instructional Strategies: Mild to Moderate (C min)	3
SPED3010	Instructional Strategies: Moderate to Intense (C min)	3
SPED3012	Language and Foundations of Literacy (C min)	3
SPED4013	Universal Design for Learning and Assistive Technology in Special Education (C min)	3

Fall Semester- Year 4

Professional Cohort Courses

Course	Title/Desc	Credit

Spring Semester- Year 4

Professional Cohort Courses

Course	Title/Desc	Credit

Course	Title/Desc	Credit
SPED4014	Critical Issues: Serving Students with Intense Disabilities (C min)	3
SPED4015	Student Teaching Students with Mild to Moderate Educational Needs (C min)	9
SPED4016	Seminar: Teaching Students with Mild to Moderate Educational Needs (C min)	3

Course	Title/Desc	Credit
SPED4017	Student Teaching Students with Moderate to Intense Educational Needs (C min)	9
SPED4018	Seminar: Teaching Students with Moderate to Intense Educational Needs (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Information Technology

Online

Duration: 5 Years Total Credits: 120 Award: BSIT

Overview

The University of Cincinnati offers a Bachelor of Science in Information Technology online degree that provides a broad program of study encompassing all aspects of computing technology. Information technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration, and administration of computing technologies.

Our online Information Technology program offers four concentrations that provide an opportunity for our students to gain in-depth knowledge and skills in a specific career field in IT. Those concentrations are as follows:

- Data Technologies
- Game Development and Simulation
- Networking and Systems
- Software Application Development

Previously, the BSIT program did offer Cybersecurity as a concentration, which is now its own undergraduate degree as the Bachelor of Science in Cybersecurity, which is also offered online.

By selecting a concentration, you will obtain a deeper knowledge within your desired concentration and become more prepared for specific career titles in the industry such as Database Administrator, DevOps Engineer, Video Game Designer, and Software Developer. These are professional positions that our students have landed co-op and entry-level opportunities with companies such as Worldpay from FIS, General Electric, Kroger Company, Insight, to name a few.

As our students learn and apply the knowledge from the program, in their senior year, they will apply their understanding of curriculum and co-op experiences in a senior project in our annual IT Expo in front of faculty, staff, employers, and their peers.

Note:

Information technology is a discipline distinct from computer engineering, computer science, and management information systems.

Success

Successful professionals in the information technology field are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies, and organizations. IT professionals must be flexible and innovative in meeting new challenges and be persistent in finding solutions. Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. IT professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

A minor in information technology (IT) provides solid knowledge and skills for students who are non-IT majors. The minor program requires the completion of 18 semester hours of IT courses that include IT1050, Fundamentals of Information Technology. The remaining courses are to be selected by the student and approved by the academic advisor. This flexibility enables students to focus the minor in IT on their personal interests and career goals. All courses must be taken through the School of Information Technology in CECH.

UC Advantages And Special Opportunities

The Bachelor of Science in Information Technology was the first BSIT program in Ohio and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The program is uniquely designed to provide hands-on experience in the core foundation of information technology. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the IT program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The full-time paid co-op working experience positions IT graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national, and international placement opportunities.

The IT program emphasizes problem-solving, communication, hands-on skills, innovation, and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through coursework and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers, and direct enrollment.

Cooperative Education (co-op)—The five semesters full-time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional, and international companies in all types of industries and of all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the IT program at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate complex technical solution and their impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

Please note: If a potential student is interested in this major and does not meet these minimum standards, they are strongly encouraged to meet with a CECH Academic Advisor to develop an academic plan and discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at (513) 556-2336.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Information Technology

Data Technologies

Duration: 5 Years Total Credits: 120 Award: BSIT

Overview

The **Bachelor of Science in Information Technology** program explores all aspects of computing technology. As an academic discipline, Information Technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration and administration of computing technologies.

The BSIT program at the University of Cincinnati offers the following concentrations:

- Data Technologies
- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

What is Data Technologies?

The Bachelor of Science in Information Technology offers a concentration in Data Technologies, which provides a solid foundation in data administration, management, analysis, programming, visualization, as well as the implementation and administration of enterprise data technologies systems. Data technologies professionals will prepare, extract and transform data using a variety of data analytic tools. They will use these tools to analyze, report and manage data storage and security.

**This program is offered on campus and online. Please check the curriculum maps for when courses are offered. Speak to our Undergraduate Admissions Professional to explore which modality works best for you!*

Success

Successful professionals in the information technology field are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. IT professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions. Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. IT professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the IT program at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

Please note: If a potential student is interested in this major and does not meet these minimum standards, they are strongly encouraged to meet with a CECH Academic Advisor to develop an academic plan and discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at (513) 556-2336.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Information Technology

Game Development and Simulation

Duration: 5 Years Total Credits: 120 Award: BSIT

Overview

The **Bachelor of Science in Information Technology** program explores all aspects of computing technology. As an academic discipline, Information Technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration and administration of computing technologies.

The BSIT program at the University of Cincinnati offers the following concentrations:

- Data Technologies
- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

What is Game Development and Simulation?

The Bachelor of Science in Information Technology offers a concentration in Game Development and Simulation, which is a study that explores game programming, development, and production. In this program, students will gain an understanding of game engines, programming, and entertainment concepts such as imagination, storytelling, visualization, and sociability factors. Students will learn to test and debug, publish, and distribute game content. In addition, students will gain the knowledge to develop simulated environments for training, testing, and exploration based on real-world applications. Overall, graduates from this program will be able to establish a career that involves designing, developing, implementing, evaluating or interacting with computer-based gaming systems.

**This program is offered on campus and online. Please check the curriculum maps for when courses are offered. Speak to our Undergraduate Admissions Professional to explore which modality works best for you!*

Success

Successful professionals in the information technology field are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. IT professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions. Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. IT professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

A minor in information technology (IT) provides solid knowledge and skills for students who are non-IT majors. The minor program requires the completion of 18 semester hours of IT courses that includes IT1050, Fundamentals of Information Technology. The remaining courses are to be selected by the student and approved by the academic advisor. This flexibility enables students to focus the minor in IT on their personal interests and career goals. All courses must be taken through the School of Information Technology in CECH.

UC Advantages And Special Opportunities

Our Bachelor of Science in Information Technology degree was the first BSIT program in Ohio and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The program is uniquely designed to provide hands-on experience in the core foundation of information technology. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the IT program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The fulltime paid co-op working experience positions IT graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national and international placement opportunities.

The IT program emphasizes problem solving, communication, hands-on skills, innovation and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through course work and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the IT program at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Information Technology

Networking/Systems

Duration: 5 Years Total Credits: 120 Award: BSIT

Overview

The Bachelor of Science in Information Technology program explores all aspects of computing technology. As an academic discipline, Information Technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration and administration of computing technologies.

The BSIT program at the University of Cincinnati offers the following concentrations:

- Data Technologies
- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

What is Networking and Systems Administration?

The Bachelor of Science in Information Technology offers a concentration in Networking and Systems Administration, which supports smooth operation, administration, integration, and security of computing resources. Computer networking involves designing, implementing, securing, and managing data pathways through configurations of routers, switches, firewalls, intrusion prevention systems, wireless access points, and other network devices. Systems administration is the management of operating systems such as Windows and Linux servers; Windows, Mac OS, and Linux desktops; and Android and iOS smartphones and tablets.

Information Technology

Duration: **5 Years** Total Credits: **120** Award: **BSIT**

Overview

Our **Bachelor of Science in Information Technology** program prepares students to build their expertise by focusing on important IT concepts that are needed to thrive in the IT industry. Our program allows our students to take courses where they will learn how to create innovative solutions using cutting-edge technology; assist in creating cybersecurity solutions to prevent cybercrime; analyze data for forward thinking decision making; create applications that use the latest programming languages and technologies; and develop games and simulations that are both engaging and visually stimulating to consumers.

In our Information Technology undergraduate degree program, our students will learn to create technological solutions using the technology that is often used by consumers and professionals. Our program also enhances one's ability to create and identify efficient processes for this effort. There are four concentrations we offer our students within the IT program:

- Data Technologies
- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

Success

Successful professionals in the information technology field are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. IT professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions. UC Advantages And Special Opportunities

The Bachelor of Science in Information Technology was the first BSIT program in Ohio and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The program is uniquely designed to provide hands-on experience in the core foundation of information technology. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the IT program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The fulltime paid co-op working experience positions IT graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national and international placement opportunities.

The IT program emphasizes problem solving, communication, hands-on skills, innovation and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through course work and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the IT program at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

Please note: If a potential student is interested in this major and does not meet these minimum standards, they are strongly encouraged to meet with a CECH Academic Advisor to develop an academic plan and discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at (513) 556-2336.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Information Technology is accredited by the Computing Accreditation Commission (CAC) of ABET.

Information Technology

BSIT

Information Technology Bachelors: On Campus 2025-2026

Duration: 5 Years

★Minimum Credits: 120 Credits

Semester 1

Courses offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT1050	Fundamentals of Information Technology (C- min)	3
IT1080C	Computer Networking (C- min)	3
IT1090C	Computer Programming I (C- min)	3
IT2040C	Fundamentals of Web Development (C- min)	3
COMM1076	Introduction to Interpersonal Communication (C- min)	3
IT	IT1003 FIRST YEAR EXPERIENCE IN THE SCHOOL OF INFORMATION TECHNOLOGY NOTE: Transfer and transition students will take a 1 credit hour IT elective in place of the FYE in IT course (C- min)	1
PD	PD1010 Professional Development for BSIT NOTE: Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester. (C- min)	1

Semester 2

Courses offered in the Spring and Fall semesters

Course	Title/Desc	Credit
IT1081C	System Administration (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3
IT2060C	Database Management I (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH	MATH1021 COLLEGE ALGEBRA Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective. (C- min)	3

Co-op Experience

Students must work with their BSIT academic and co-op advisors to select their co-op rotation

Course	Title/Desc	Credit
COOP2041	Co-op for CECH (First Semester Experience)	0
COOP2042	Co-op for CECH (Second Semester Experience)	0
COOP3041	Co-op for CECH (Third Semester Experience)	0
COOP4041	Co-op for CECH (Fourth Semester Experience)	0
COOP4042	Co-op for CECH (Fifth Semester Experience)	0

Semester 3

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT1051C	Fundamentals of Digital Media	3
IT2020	Implications of Information Technology	3
IT3060C	Database Management II	3
IT	TRACK COURSE 1 (C- min)	3
MATH	MATH1022 TRIGONOMETRY Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.	3

Semester 4

Courses are offered in the Summer and Fall semesters

Course	Title/Desc	Credit
IT2021	Human Computer Interaction	3
IT	TRACK COURSE 2 (C- min)	3
ENGL2089	Intermediate Composition	3

Course	Title/Desc	Credit
COMM	COMMUNICATION ELECTIVE Communication elective can be either from the Oral Communication group (COMM1071, COMM2021, COMM2081) or the Media and Society group (COMM2025, COMM2089, COMM3026). Some of the courses count towards the Professional Communication certificate or the Digital Engagement Certificate.	3
	HPE2071 Applied Statistics NOTE: Students may take BANA2081. BANA2081 is preferred for accelerated MBA students.	3

Semester 5

Courses are offered in the Spring and Summer semesters

Course	Title/Desc	Credit
IT3020	System Analysis & Design	3
IT	TRACK COURSE 3 (C- min)	3
IT	TRACK COURSE 4 (C- min)	3
MATH1071	Introduction to Discrete Mathematics	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Chemistry, Geology, or Physics course.	3

Semester 6

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT4020	Management in Information Technology (C- min)	3
IT4033	Senior Design Preparation (C- min)	1
IT	TRACK COURSE 5 (C- min)	3
IT	TRACK COURSE 6 (C- min)	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Geology, Chemistry, Physics course.	3
ENGL	WRITING ELECTIVE Student may select from ENGL4091 Business Writing or ENGL4092 Technical and Scientific Writing.	3

Semester 7

Senior Capstone courses are offered in the Fall semester only.

Course	Title/Desc	Credit
IT5003C	Senior Capstone Project I (C- min)	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective. NOTE: Game Development & Simulation students should work with their advisor to select DMC Electives (one creative, one writing) for 2 of their Advisor Approved Electives.	3

Semester 8

Senior Capstone courses are offered in the Spring semester only.

Course	Title/Desc	Credit
IT5004C	Senior Capstone Project II	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3

Course	Title/Desc	Credit
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective. NOTE: Game Development & Simulation students should work with their advisor to select DMC Electives (one creative, one writing) for 2 of their Advisor Approved Electives.	3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3

Course	Title/Desc	Credit
	GEN ED ELECTIVE Students must select a 3 credit hour Social & Behavioral Sciences course. Students graduating after Spring 2030 must complete an approved American Civic Literacy course.	3

Networking/Systems Major

Students will need to meet with their BSIT Academic Advisor to select their technical track

Course	Title/Desc	Credit
IT2035C	Network Infrastructure Management (C- min)	3
IT3036C	Enterprise Systems Administration (C- min)	3
IT3037C	Cloud Computing (C- min)	3
IT3071C	Network Security (C- min)	3
IT3038C	Scripting Language (C- min)	3
IT4037C	Special Topics in Networking/Systems (C- min)	3

Software Application Development Major

Student will need to meet with their BSIT Academic Advisor to select their technical track

Course	Title/Desc	Credit
IT2045C	Computer Programming II (C- min)	3
IT3045C	Contemporary Programming (C- min)	3
IT3049C	Web Game Development (C- min)	3
IT3048C	Mobile Device Programming (C- min)	3
IT3047C	Web Server Application Development (C- min)	3
IT4045C	Enterprise Application Development (C- min)	3

Game Development & Simulation Major

Students must meet with their BSIT Academic Advisor to select their technical track

Course	Title/Desc	Credit
IT2050C	Game design and society (C- min)	3
IT3045C	Contemporary Programming (C- min)	3
IT3049C	Web Game Development (C- min)	3
IT3080C	Game Engine Lab I (C- min)	3
IT3081C	Game Engine Lab II (C- min)	3
IT4080C	Network Game Development (C- min)	3

Data Technologies Major

Students must meet with their BSIT Academic Advisor to select their technical track

Course	Title/Desc	Credit
IT1055C	Data Technologies Essentials (C- min)	3
IT2053C	Data Technologies Programming (C- min)	3
IT2055C	Contemporary Database Systems (C- min)	3
IT4015C	Applied Business Intelligence (C- min)	3
IT4063C	Data Technologies Analytics (C- min)	3
IT4065C	Data Technologies Administration (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Information Technology

Information Technology

BSIT

Information Technology Bachelors: On Campus Software Application Development (2025-2026)

Duration: 5 Years

★Minimum Credits: 120 Credits

Semester 1

Courses offered in the Fall and Spring semesters

Course	Title/Desc	Credit
COMM1076	Introduction to Interpersonal Communication (C- min)	3
IT1050	Fundamentals of Information Technology (C- min)	3
IT1080C	Computer Networking (C- min)	3
IT1090C	Computer Programming I (C- min)	3
IT2040C	Fundamentals of Web Development (C- min)	3

Transfer and transition students will take a 1 credit hour IT elective in place of the FYE in IT course.

Course	Title/Desc	Credit
IT1003	First Year Experience in the School of Information Technology (C- min)	1

Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester.

Course	Title/Desc	Credit
PD1010	Professional Development for CECH (C- min)	1

Semester 2

Courses offered in the Spring and Fall semesters

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
IT1081C	System Administration (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3
IT2060C	Database Management I (C- min)	3

Students can take MATH1026 Pre-Calculus instead of MATH1021 College Algebra & MATH1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.

Course	Title/Desc	Credit
MATH1021	College Algebra (C- min)	3

Co-op Experience

Students must work with their BSIT academic and co-op advisors to select their co-op rotation.

Course	Title/Desc	Credit
COOP2041	Co-op for CECH (First Semester Experience)	0
COOP2042	Co-op for CECH (Second Semester Experience)	0
COOP3041	Co-op for CECH (Third Semester Experience)	0
COOP4041	Co-op for CECH (Fourth Semester Experience)	0
COOP4042	Co-op for CECH (Fifth Semester Experience)	0

Semester 3

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT1051C	Fundamentals of Digital Media	3
IT2020	Implications of Information Technology	3
IT2045C	Computer Programming II (C- min)	3
IT3060C	Database Management II	3

Students can take MATH1026 Pre-Calculus instead of MATH1021 College Algebra & MATH1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.

Course	Title/Desc	Credit
MATH1022	Trigonometry	3

Semester 4

Courses are offered in the Summer and Fall semesters

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
IT2021	Human Computer Interaction	3
IT3045C	Contemporary Programming (C- min)	3

Communication Elective (select one)

Some of the courses count towards the Professional Communication certificate or the Digital Engagement Certificate.

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
COMM2021	Communication in Problem-Solving Groups	3

Course	Title/Desc	Credit
COMM2025	Introduction to Media Literacy	3
COMM2081	Business Communication	3
COMM2089	The Internet and Everyday Life	3
COMM3026	Media Impact	3

Students may also take BANA2081 (preferred for accelerated MBA students).

Course	Title/Desc	Credit
HPE2071	Applied Statistics for Human Services I	3

Semester 5

Courses are offered in the Spring and Summer semesters

Course	Title/Desc	Credit
IT3020	System Analysis & Design	3
IT3048C	Mobile Device Programming (C- min)	3
IT3049C	Web Game Development (C- min)	3
MATH1071	Introduction to Discrete Mathematics	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Chemistry, Geology, or Physics course.	3

Semester 6

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT3047C	Web Server Application Development (C- min)	3
IT4020	Management in Information Technology (C- min)	3
IT4033	Senior Design Preparation (C- min)	1
IT4045C	Enterprise Application Development (C- min)	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Geology, Chemistry, Physics course.	3

Writing Elective (select one)

Course	Title/Desc	Credit
ENGL4091	Writing for Business	3
ENGL4092	Technical and Scientific Writing	3

Semester 7

Senior Capstone courses are offered in the Fall semester only.

Course	Title/Desc	Credit
IT5003C	Senior Capstone Project I (C- min)	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3

Semester 8

Senior Capstone courses are offered in the Spring semester only.

Course	Title/Desc	Credit
IT5004C	Senior Capstone Project II	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	GEN ED ELECTIVE Students must select a 3 credit hour Social & Behavioral Sciences course. Students graduating after Spring 2030 must complete an approved American Civic Literacy course.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Information Technology

BSIT

Information Technology Bachelors: On Campus Networking/Systems (2025-2026)

Duration: 5 Years

★Minimum Credits: 120 Credits

Semester 1

Courses offered in the Fall and Spring semesters

Course	Title/Desc	Credit
COMM1076	Introduction to Interpersonal Communication (C- min)	3
IT1050	Fundamentals of Information Technology (C- min)	3
IT1080C	Computer Networking (C- min)	3
IT1090C	Computer Programming I (C- min)	3
IT2040C	Fundamentals of Web Development (C- min)	3

Transfer and transition students will take a 1 credit hour IT elective in place of the FYE in IT course.

Course	Title/Desc	Credit
IT1003	First Year Experience in the School of Information Technology (C- min)	1

Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester.

Course	Title/Desc	Credit
PD1010	Professional Development for CECH (C- min)	1

Semester 2

Courses offered in the Spring and Fall semesters

Course	Title/Desc	Credit
ENGL1001	English Composition (C- min)	3
IT1081C	System Administration (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3
IT2060C	Database Management I (C- min)	3

Students can take MATH1026 Pre-Calculus instead of MATH1021 College Algebra & MATH1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.

Course	Title/Desc	Credit
MATH1021	College Algebra (C- min)	3

Co-op Experience

Students must work with their BSIT academic and co-op advisors to select their co-op rotation

Course	Title/Desc	Credit
COOP2041	Co-op for CECH (First Semester Experience)	0
COOP2042	Co-op for CECH (Second Semester Experience)	0
COOP3041	Co-op for CECH (Third Semester Experience)	0
COOP4041	Co-op for CECH (Fourth Semester Experience)	0
COOP4042	Co-op for CECH (Fifth Semester Experience)	0

Semester 3

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT2035C	Network Infrastructure Management (C- min)	3
IT3060C	Database Management II	3
IT2020	Implications of Information Technology	3
IT1051C	Fundamentals of Digital Media	3

Students can take MATH1026 Pre-Calculus instead of MATH1021 College Algebra & MATH1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.

Course	Title/Desc	Credit
MATH1022	Trigonometry	3

Semester 4

Courses are offered in the Summer and Fall semesters

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
IT2021	Human Computer Interaction	3
IT3036C	Enterprise Systems Administration (C- min)	3

Communication Elective (select one)

Some of the courses count towards the Professional Communication certificate or the Digital Engagement Certificate.

Course	Title/Desc	Credit
COMM1071	Introduction to Effective Speaking	3
COMM2025	Introduction to Media Literacy	3

Course	Title/Desc	Credit
COMM2021	Communication in Problem-Solving Groups	3
COMM2081	Business Communication	3
COMM2089	The Internet and Everyday Life	3
COMM3026	Media Impact	3

Students may also take BANA2081 (preferred for accelerated MBA students).

Course	Title/Desc	Credit
HPE2071	Applied Statistics for Human Services I	3

Semester 5

Courses are offered in the Spring and Summer semesters

Course	Title/Desc	Credit
IT3020	System Analysis & Design	3
IT3037C	Cloud Computing (C- min)	3
IT3071C	Network Security (C- min)	3
MATH1071	Introduction to Discrete Mathematics	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Chemistry, Geology, or Physics course.	3

Semester 6

Courses are offered in the Fall and Spring semesters

Course	Title/Desc	Credit
IT3038C	Scripting Language (C- min)	3
IT4020	Management in Information Technology (C- min)	3
IT4033	Senior Design Preparation (C- min)	1
IT4037C	Special Topics in Networking/Systems (C- min)	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Chemistry, Geology, or Physics course.	3

Writing Elective (select one)

Course	Title/Desc	Credit
ENGL4091	Writing for Business	3
ENGL4092	Technical and Scientific Writing	3

Semester 7

Senior Capstone courses are offered in the Fall semester only.

Course	Title/Desc	Credit
IT5003C	Senior Capstone Project I (C- min)	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3

Semester 8

Senior Capstone courses are offered in the Spring semester only.

Course	Title/Desc	Credit
IT5004C	Senior Capstone Project II	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3
	ADVISOR APPROVED ELECTIVE Student must work with their BSIT Academic Advisor to select an Advisor Approved Elective.	3
	GEN ED ELECTIVE Students must select a 3 credit hour Social & Behavioral Sciences course. Students graduating after Spring 2030 must complete an approved American Civic Literacy course.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Information Technology

Data Technologies

Duration: 5 Years Total Credits: 120 Award: BSIT

Overview

The **Bachelor of Science in Information Technology** program explores all aspects of computing technology. As an academic discipline, Information Technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration and administration of computing technologies.

The BSIT program at the University of Cincinnati offers the following concentrations:

- Data Technologies
- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

What is Data Technologies?

The Bachelor of Science in Information Technology offers a concentration in Data Technologies, which provides a solid foundation in data administration, management, analysis, programming, visualization, as well as the implementation and administration of enterprise data technologies systems. Data technologies professionals will prepare, extract and transform data using a variety of data analytic tools. They will use these tools to analyze, report and manage data storage and security.

**This program is offered on campus and online. Please check the curriculum maps for when courses are offered. Speak to our Undergraduate Admissions Professional to explore which modality works best for you!*

Success

Successful professionals in the information technology field are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. IT professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions. Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. IT professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

A minor in information technology (IT) provides solid knowledge and skills for students who are non-IT majors. The minor program requires the completion of 18 semester hours of IT courses that includes IT1050, Fundamentals of Information Technology. The remaining courses are to be selected by the student and approved by the academic advisor. This flexibility enables students to focus the minor in IT on their personal interests and career goals. All courses must be taken through the School of Information Technology in CECH.

Curriculum

Please see the appropriate BSIT curriculum page below and select the major map for Data Technologies.

UC Advantages And Special Opportunities

The Bachelor of Science in Information Technology was the first BSIT program in Ohio and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The program is uniquely designed to provide hands-on experience in the core foundation of information technology. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the IT program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The fulltime paid co-op working experience positions IT graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national and international placement opportunities.

The IT program emphasizes problem solving, communication, hands-on skills, innovation and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through course work and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers and direct enrollment.

Cooperative Education (co-op)—The five semesters full time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional and international companies in all types of industries and all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the IT program at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate the complex technical solution and its impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

Please note: If a potential student is interested in this major and does not meet these minimum standards, they are strongly encouraged to meet with a CECH Academic Advisor to develop an academic plan and discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were **NOT** admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at (513) 556-2336.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Spring Semester

Freshmen and Transfers:

- Application Deadline: Nov. 1
- Confirmation Deadline: Dec. 1

Summer Semester

Freshmen and Transfers:

- Application Deadline: March 1
- Confirmation Deadline: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Bachelor of Science in Information Technology is accredited by the Computing Accreditation Commission (CAC) of ABET.

Information Technology

Game Development and Simulation

Duration: **5 Years** Total Credits: **120** Award: **BSIT**

Overview

The **Bachelor of Science in Information Technology** program explores all aspects of computing technology. As an academic discipline, Information Technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration and administration of computing technologies.

The BSIT program at the University of Cincinnati offers the following concentrations:

- Data Technologies
- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

What is Game Development and Simulation?

The Bachelor of Science in Information Technology offers a concentration in Game Development and Simulation, which is a study that explores game programming, development, and production. In this program, students will gain an understanding of game engines, programming, and entertainment concepts such as imagination, storytelling, visualization, and sociability factors. Students will learn to test and debug, publish, and distribute game content. In addition, students will gain the knowledge to develop simulated environments for training, testing, and exploration based on real-world applications. Overall, graduates from this program will be able to establish a career that involves designing, developing, implementing, evaluating or interacting with computer-based gaming systems.

**This program is offered on campus and online. Please check the curriculum maps for when courses are offered. Speak to our Undergraduate Admissions Professional to explore which modality works best for you!*

- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

What is Networking and Systems Administration?

The Bachelor of Science in Information Technology offers a concentration in Networking and Systems Administration, which supports smooth operation, administration, integration, and security of computing resources. Computer networking involves designing, implementing, securing, and managing data pathways through configurations of routers, switches, firewalls, intrusion prevention systems, wireless access points, and other network devices. Systems administration is the management of operating systems such as Windows and Linux servers; Windows, Mac OS, and Linux desktops; and Android and iOS smartphones and tablets.

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at (513) 556-2336.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain the required university grade point average for the program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted graduation deadline for the semester

Application Deadlines

Fall Semester

Freshmen:

- Early Action Deadline: Dec 1*****
- Rolling Deadline: Mar 1
- Confirmation Deadline: May 1

* Your application must be complete by this date in order to be considered for **scholarships** and the **Honors Program**.

Transfers:

- Application Deadline: July 1
- Confirmation Deadline: Aug. 1

Information Technology

Online

Duration: 5 Years Total Credits: 120 Award: BSIT

Overview

The University of Cincinnati offers a Bachelor of Science in Information Technology online degree that provides a broad program of study encompassing all aspects of computing technology. Information technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration, and administration of computing technologies.

Our online Information Technology program offers four concentrations that provide an opportunity for our students to gain in-depth knowledge and skills in a specific career field in IT. Those concentrations are as follows:

- Data Technologies
- Game Development and Simulation
- Networking and Systems
- Software Application Development

Previously, the BSIT program did offer Cybersecurity as a concentration, which is now its own undergraduate degree as the Bachelor of Science in Cybersecurity, which is also offered online.

By selecting a concentration, you will obtain a deeper knowledge within your desired concentration and become more prepared for specific career titles in the industry such as Database Administrator, DevOps Engineer, Video Game Designer, and Software Developer. These are professional positions that our students have landed co-op and entry-level opportunities with companies such as Worldpay from FIS, General Electric, Kroger Company, Insight, to name a few.

As our students learn and apply the knowledge from the program, in their senior year, they will apply their understanding of curriculum and co-op experiences in a senior project in our annual IT Expo in front of faculty, staff, employers, and their peers.

Note:

Information technology is a discipline distinct from computer engineering, computer science, and management information systems.

Success

Successful professionals in the information technology field are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies, and organizations. IT professionals must be flexible and innovative in meeting new challenges and be persistent in finding solutions. Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. IT professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

A minor in information technology (IT) provides solid knowledge and skills for students who are non-IT majors. The minor program requires the completion of 18 semester hours of IT courses that include IT1050, Fundamentals of Information Technology. The remaining courses are to be selected by the student and approved by the academic advisor. This flexibility enables students to focus the minor in IT on their personal interests and career goals. All courses must be taken through the School of Information Technology in CECH.

UC Advantages And Special Opportunities

The Bachelor of Science in Information Technology was the first BSIT program in Ohio and one of the first ten in the nation to receive accreditation from the Accreditation Board of Engineering and Technology. The program is uniquely designed to provide hands-on experience in the core foundation of information technology. Almost all major courses are hands-on, requiring projects and lab experience. Students participate and complete a two-semester senior design experience, in which they develop a real-life IT solution and present it to the community in the annual IT Expo.

In addition to the unique hands-on experience in the classroom, the IT program requires five semesters of cooperative education (co-op). Beginning their sophomore year, students alternate semesters of paid work in the IT industry with semesters of classroom instruction. The full-time paid co-op working experience positions IT graduates to have over one year of work experience at the time of their graduation, making them highly competitive for career opportunities. The UC co-op program provides local, national, and international placement opportunities.

The IT program emphasizes problem-solving, communication, hands-on skills, innovation, and integration in which the technology serves the mission and interest of the users and the organization.

Special Programs

Honors Program—The University of Cincinnati honors program offers small, interactive classes that allow students to receive personalized instruction and to learn more effectively. The honors program enriches the educational experience of top students through coursework and out-of-class experiences. Special topics courses allow honors students to broaden their intellectual horizons regardless of the discipline in which they are majoring. Students may also earn honors credit through experiential learning. Incoming freshmen are eligible to be invited to participate.

Student Organizations—To develop professionally and showcase leadership talents, many professional and social organizations exist in the college. In the School of Information Technology, there are two organizations: the Information Technology Student Association (ITSA) and Women in Information Technology (WIT).

Study Abroad—Study-abroad opportunities exist through the UC International Programs office. Students can study anywhere in the world on any type of program as long as they work with UC International Programs, get approval from their academic adviser and bring back a transcript with passing grades from an accredited institution. There are four different types of study-abroad experiences: UC programs, exchange programs, program providers, and direct enrollment.

Cooperative Education (co-op)—The five semesters full-time paid co-op working experience provides students with unique technical and interpersonal skills that highly prepare them for career opportunities of their choice. Local, regional, and international companies in all types of industries and of all sizes participate in this program, offering IT students unique opportunities. The income received helps many students graduate debt-free.

Information Technology Expo (IT Expo)—This annual community event is a unique tradition of the IT program at UC. Senior students present the IT solution they developed in their senior project to the community in an expo-like environment. Students learn how to communicate complex technical solution and their impact and value to the public. Faculty, students, and invited guests also present research at the symposium. Projects are judged by local industry and each year, multiple awards are presented.

Admission Requirements

Freshmen applicants, please visit the Admission Requirements page for more information.

Transferring To UC

Admission to this program is generally available for students transferring to the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (all prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (all prior institutions combined)

Please note: If a potential student is interested in this major and does not meet these minimum standards, they are strongly encouraged to meet with a CECH Academic Advisor to develop an academic plan and discuss a more holistic approach to the admission process.

Changing Majors Within UC

Admission to this program is generally available for University of Cincinnati students enrolled in other colleges of the University of Cincinnati if they were admissible directly from high school and have a 2.75 cumulative GPA (UC and any prior institutions combined).

Students who were NOT admissible directly from high school must have:

- 24 semester (36 quarter) hours earned
- at least a 2.75 cumulative GPA (UC and any prior institutions combined)

Current UC students wishing to transfer into the program should contact the College of Education, Criminal Justice, and Human Services at (513) 556-2336.

International Student Requirements

The information technology program welcomes international students. Admission requirements are the same as university admission requirements for international students and the equivalent of the freshmen and transfer requirements of the program.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

BSIT

Information Technology Bachelors: Online Networking/Systems 2025-2026

Duration: 5 Years

★Minimum Credits: 120 Credits

Semester 1

Courses offered in the Fall semester only

Course	Title/Desc	Credit
IT1050	Fundamentals of Information Technology (C- min)	3
IT1080C	Computer Networking (C- min)	3
IT1090C	Computer Programming I (C- min)	3
COMM1076	Introduction to Interpersonal Communication (C- min)	3
IT2040C	Fundamentals of Web Development (C- min)	3
PD	PD1010 Professional Development for BSIT NOTE: Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester. (C- min)	1
IT	IT1003 FIRST YEAR EXPERIENCE IN THE SCHOOL OF INFORMATION TECHNOLOGY NOTE: Transfer and transition students will take a 1 credit hour IT elective in place of the FYE in IT course (C- min)	1

Semester 2

Courses offered in the Spring semester only

Course	Title/Desc	Credit
IT2060C	Database Management I (C- min)	3
IT1081C	System Administration (C- min)	3
ENGL1001	English Composition (C- min)	3
MATH	MATH1021 COLLEGE ALGEBRA Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective. (C- min)	3
IT2030C	Information Security and Assurance (C- min)	3

Co-op Experience

Students must work with their BSIT academic and co-op advisors to select their co-op rotation

Course	Title/Desc	Credit
COOP	COOP2041 COOP for CECH (First Semester Experience) This co-op must be completed in the first summer of the online program. Students must meet with their co-op adviser within the first three weeks of the semester that precedes their first planned co-op semester.	0
COOP2042	Co-op for CECH (Second Semester Experience)	0
COOP3041	Co-op for CECH (Third Semester Experience)	0
COOP4041	Co-op for CECH (Fourth Semester Experience)	0
COOP4042	Co-op for CECH (Fifth Semester Experience)	0

Semester 3

Courses offered in the Fall semester only

Course	Title/Desc	Credit
IT2035C	Network Infrastructure Management (C- min)	3
IT3060C	Database Management II	3
IT2020	Implications of Information Technology	3
IT1051C	Fundamentals of Digital Media	3
MATH	MATH1022 TRIGONOMETRY Students can take Math1026 PreCalculus instead of Math1021 College Algebra & Math 1022 Trigonometry. If they select this option, they must also take a 1 credit hour IT elective.	3

Semester 4

Courses offered in the Summer semester only

Course	Title/Desc	Credit
IT3036C	Enterprise Systems Administration (C- min)	3
COMM	COMMUNICATION ELECTIVE Communication elective can be either from the Oral Communication group (COMM1071, COMM2021, COMM2081) or the Media and Society group (COMM2025, COMM2089, COMM3026). Some of the courses count towards the Professional Communication certificate or the Digital Engagement Certificate.	3
IT2021	Human Computer Interaction	3

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
	HPE2071 Applied Statistics NOTE: Students may take BANA2081. BANA2081 is preferred for accelerated MBA students.	3

Semester 5

Courses offered in the Spring semester only

Course	Title/Desc	Credit
IT3037C	Cloud Computing (C- min)	3
IT3071C	Network Security (C- min)	3
IT3020	System Analysis & Design	3
MATH1071	Introduction to Discrete Mathematics	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Chemistry, Geology, or Physics course.	3

Semester 6

Courses offered in the Fall semester only

Course	Title/Desc	Credit
IT3038C	Scripting Language (C- min)	3
IT4037C	Special Topics in Networking/Systems (C- min)	3
BIOL CHEM GEOL PHYS	SCIENCE ELECTIVE Student must select one 3 credit hour Biology, Geology, Chemistry, Physics course.	3
ENGL	WRITING ELECTIVE Student may select from ENGL4091 Business Writing or ENGL4092 Technical and Scientific Writing.	3
IT4033	Senior Design Preparation (C- min)	1
IT4020	Management in Information Technology (C- min)	3

Semester 7

Courses offered in the Fall semester only

Course	Title/Desc	Credit
IT5003C	Senior Capstone Project I (C- min)	3
IT	IT FOCUS COURSE IT focus courses are special offerings to enhance learning in an advanced IT topic related to students' track or as an additional area of focus.	1 - 3

Information Technology

Software Application Development

Duration: 5 Years Total Credits: 120 Award: BSIT

Overview

The Bachelor of Science in Information Technology program explores all aspects of computing technology. As an academic discipline, Information Technology focuses on meeting the needs of users within organizational and societal contexts through the selection, creation, application, integration and administration of computing technologies.

The BSIT program at the University of Cincinnati offers the following concentrations:

- Data Technologies
- Game Development and Simulation
- Networking and Systems Administration
- Software Application Development

Our students will have ample opportunity to apply their knowledge through the development and creation of an IT solution by their senior year and learn from current professionals through their co-op experiences.

What is Software Application Development?

The Bachelor of Science in Information Technology offers a concentration in Software Application Development, which focuses on the design and development of software applications that are essential to creating applications and systems to streamline technological efforts in businesses and personal productivity. In this program, students will learn how to create software using various platforms such as Windows, Mac, Android, IOS and Linux, and use development platforms such as Java Enterprise Edition and Microsoft .NET framework.

**This program is offered on campus and online. Please check the curriculum maps for when courses are offered. Speak to our Undergraduate Admissions Professional to explore which modality works best for you!*

Success

Successful professionals in the information technology field are those who are passionate about using computer technology to provide solutions to issues facing individuals, societies and organizations. IT professionals must be flexible and innovative in meeting new challenges, and be persistent in finding solutions. Due to the quickly changing nature of technology, it is important to be a lifelong learner and keep up-to-date on advances in the field. IT professionals must develop strong problem-solving, communication, and hands-on skills that they can apply to various career settings.

School Psychology

Duration: **2 Years** Total Credits: **45** Award: **EDS**

Overview

The University of Cincinnati's Educational Specialist (EdS) in School Psychology program is dedicated to preparing highly competent school psychologists utilizing a scientist-practitioner model. Graduates are prepared to make significant contributions to educational systems that improve important outcomes for children and families through up-to-date and research-based professional practice. Specialist-level graduates are prepared to obtain licensure as a school psychologist to support children and families in schools.

Our School Psychology graduate program operates from an ecological-behavioral orientation. Students are prepared with a strong behavioral orientation that utilizes the theories and research of applied behavior analysis. The program emphasizes the delivery of school psychological services from a consultative, collaborative problem-solving framework to improve outcomes for children and families.

The program consists of 3-years of full-time study. The first two years include coursework and field experiences. Students earn an MEd in Foundations in Behavior Analysis after the first year of the program. Students complete a full-year school-based internship during the third year of the program.

Career

Career opportunities that graduates of the EdS program pursue consist of:

- School psychologists working primarily in school settings
- Board Certified Behavior Analyst (BCBA)

We have a verified course sequence for the BCBA where students may pursue BCBA positions after obtaining supervised hours and securing the credential.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Advising

Students are assigned a faculty advisor upon admission to the program. The advisor is one of the core faculty members in the School Psychology program. Students meet at least once per semester with their advisor in formal meetings, although all faculty are available for ongoing support.

UC Advantages And Special Opportunities

Why choose our EdS in School Psychology program?

- Students obtain a Master of Education (MEd) in Foundations in Behavior Analysis after year one as part of the program.
- This program has a strong ecological-behavioral orientation.
- Students are involved in field experiences starting their first semester.
- Experiences are available across urban, suburban, and rural sites.
- Opportunities to be engaged with research (i.e. presentations, publications, etc).
- All students receive some level of financial support.

Admission Requirements

1. Bachelor's degree from an accredited institution
2. Transcripts and a minimum overall undergraduate GPA of 3.0
3. CV or Resume

4. Goal Statement
5. One (1) Letter of Recommendation (3 is strongly recommended)
6. 18 credit hours in the following psychological foundations area is suggested, but not required.
    - History and Systems of Psychology
    - Research and Statistics
    - Child Development
    - Social Psychology
    - Biological Bases
    - Learning Theory

Transferring To UC

- Students may be asked to provide syllabi for courses to demonstrate course equivalency
- The Program Coordinator and Program Faculty review students' requests and submit the potential transfer credits to the Graduate College for final approval

Graduation Requirements

Graduation Application for MEd and EdS

Upon meeting all requirements for the MEd and EdS degrees, students must apply for graduation online. According to University policy, before a student can graduate, they must meet the following requirements (a) be registered for at least one graduate credit in their program in an academic year, after having met minimum degree course/candidacy requirements to be considered a graduate student throughout the academic year, (b) complete requirements for any grades of NG, N, I, UP, SP, and F before the Program can certify graduation, (c) receive satisfactory grades for the graduation semester, and (d) complete all Program requirements. Each student must apply individually for graduation, and the Program certifies that candidates meet all Program requirements. Deadlines for graduation are strictly adhered to. Students are required to be aware of these dates which are posted on the Graduate College Website. **It is the student's responsibility to apply and ensure that all requirements are met and the web-based application is submitted**.

Application Deadlines

Students are admitted once a year for a Fall semester start. The application deadline for the Fall semester is December 1. To apply, go to the Graduate College admissions website.

Learn more about our EdS program and program expectations by visiting our website.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
UC's EdS Program in School Psychology is:

- Fully approved by National Association of School Psychologists (NASP)
- Verified Course Sequence by the Behavior Analyst Certification Board (BACB)
- The College of Education, Criminal Justice, and Human Services (CECH) is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Educational Studies

Duration: **1 Year** Total Credits: **30** Award: **MA**

Overview

The Master of Arts in Educational Studies is a multi-disciplinary graduate degree program designed to provide students with greater understanding of the foundations of education, learning, development, and research in education and social change. Our program allows student to focus on one area that is essential to the educational industry. By honing in on a specific concentration, our students will become experts in their desired specialty and become better advocates for education.

Students are able to choose from one of the following concentrations:

• **Higher Education Administration**: Students will focus on content that higher education leaders and college and university administrators are required to be knowledgeable in, as well as, provide students with foundational knowledge and innovative solutions that build stronger academic and postsecondary institutions.

• **Educational Psychology and Child Study**: Students will gain expertise in developmental learning sciences (human learning and development; cognitive and developmental psychology) and the developmental study of children.

• **Applied Research Methods**: This concentration prepares students to learn the application and development of quantitative methodologies and/or mixed research as tools to gather evidence in the field of education and other social and behavioral sciences.

• **Research for Social Change**: Students will gain expertise in research-to-action and educational approaches toward social justice and strengthening of communities.

Success

The program requires that applicants have strong skills in verbal and mathematical reasoning and technical writing. Successful participants will have a passion for education, learning and research.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Curriculum Guide Versions:
Educational Studies Master's Program - Higher Education Administration (updated Fall 2023)
Educational Studies Master's Program - Applied Research Methods (updated Fall 2023)
Educational Studies Master's Program - Educational Psychology & Child Studies (updated Fall 2023)
Educational Studies Master's Program - Research for Social Change (updated Fall 2023)

Advising

Students in this program will have two sources of advising:

1. A general program advisor who provides initial coursework and timeline advising for students early in their programs, and
2. A faculty advisor who works with individual students to complete master's projects and thesis options.

Special Programs

The Master of Arts in Educational Studies is a unique multidisciplinary program that allows participants to gain advance knowledge in the study of education and learning and educational research and tailor program content to their areas of interest and professional goals. Participants may be teachers, administrators, community-based professionals working with children and families, or individuals working in institutions of higher education.

Admission Requirements

1. **Transcripts:** Official transcripts documenting completion of a Baccalaureate Degree from an accredited college or university.
2. **GPA:** A preferred minimum undergraduate grade point average of 3.0 [on a 4.0 scale]. Note: uGPA's below 3.0 require a waiver from the Graduate School.
3. **TOEFL:** The Test of English as a Foreign Language (TOEFL), or successful completion of ELS Level 112, is required of all applicants whose native language is not English. A minimum TOEFL score of 550 (paper test), 213 (computer--based test), or 79--80

(internet--based test); or a minimum score on the Test of Written English (TWE) of 4.5; or a minimum score of 50 on the Test of Spoken English.
4. **Letters of Recommendation:** Applicants must submit two letters of recommendation if applying for fall of 2021 or later. Applicants applying for summer of 2021 are required to submit three letters of recommendation.
5. **Goal Statement:** A goal statement describing academic credentials and professional experiences relevant to a degree in Educational Studies; interests and experiences that match expertise available among Educational Studies faculty; and a commitment to education, and diversity.
6. **GRE:** This exam is optional.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants

with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese
- English

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

Changing Majors Within UC

A) A maximum of 50% of semester credit hours taken as a matriculated candidate in another UC college may be transferred into a candidate's program. Candidates must have earned a grade of B or higher in these courses. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university. Applicability of transfer credits is subject to program review and approval.

B) A maximum of 1/3 of semester credit hours taken as a matriculated candidate at another university may be applied toward a candidate's program. Candidates must have earned a grade of B or higher in these courses. Requests for this credit require the completion of the Recommendation for Advanced Standing Form, which is subject to program, Graduate Program Director and Graduate School approval. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.

C) A maximum of 12 semester credit hours taken as a non-matriculated candidate at UC may be applied toward the degree. Candidates must have earned a grade of B or higher in these courses. Requests for this credit require the completion of the Recommendation for Advanced Standing Form, which is subject to program, Graduate Program Director and Graduate School approval. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. The Test of English as a Foreign Language (TOEFL), or successful completion of ELS Level 112, is required of all applicants whose native language is not English. Expectations for TOEFL scores are a minimum of 550 (paper test), 213 (computer--based test), or 79--80 (internet--based test); a minimum score on the Test of Written English (TWE) of 4.5; and a minimum score of 50 on the Test of Spoken English. The TOEFL must have been taken within the two--year period preceding admission. The University of Cincinnati maintains UC International, which serves international students attending the University.

For questions regarding international student information, contact the UC International at (513) 556-4278.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

1. Have a minimum graduate GPA of 3.0
2. Be registered for at least one credit in his or her program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
3. Have all NG, N, I, UP, SP and F grades removed for degree courses.
4. Post satisfactory grades for the semester of graduation.

5. Satisfactory completion of all applicable College and program requirements approved by the major advisor through the Checklist for Completion of College/Departmental Requirements for Graduation and sent to the Graduate Program Director.
6. Completion of 30 graduate semester credit hours.
7. Completion of the on-line graduation application (through the Graduate School's website) prior to the posted deadline.

Application Deadlines

Applications open one year in advance of commencement of the term to which one applies and will be reviewed per the following timeline:

Fall Admission Deadline: July 1st

Spring Admission Deadline: October 17th

Summer Admission Deadline: April 2nd

*International students are encouraged to apply for fall admissions.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Mental Health Counseling

Duration: **2 Years** Total Credits: **60** Award: **MA**

Overview

Mental Health Counseling is a career choice that is widely popular and has remained in high demand during both challenging and prosperous economic times. The University of Cincinnati's Mental Health Counseling graduate degree is designed to train counselors for employment in community agencies and private practice settings. The overarching goal of the program is to train counselors to function appropriately as wellness-oriented mental health professionals, working within communities to improve the lives of individuals and families.

Graduates of this counseling degree program meet the training requirements established by the Ohio Counselor, Social Worker, and Marriage and Family Therapist Board for licensure as a Licensed Professional Counselor (LPC) and will be prepared for the National Counselor Examination (NCE).

Career

Common career paths for our graduates include working with children, adolescents, and adults of all ages; career counseling; working with individuals experiencing severe mental illlness or homelessness; and providing counseling in a wide variety of mental health settings.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is in-person, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Mental Health Counseling (2023-2024)

Advising

Students are assigned a faculty advisor at Orientation.

UC Advantages And Special Opportunities

Gaining hands-on experience through internship training is an advantage of training in this program! Students also have opportunities to participate in research, which may be beneficial if a goal is to apply for additional study at the doctoral level. Chi Sigma Iota, a national counseling honor society, maintains an active chapter affiliated with the program.

Admission Requirements

- Undergraduate transcript(s)
- Letters of Recommendation (3 strongly preferred, minimum of 1 required)
- Goal statement
- CV/Resume

Application Process:

Prospective students should complete the online application by January 15th for Fall enrollment. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted by the deadline. Incomplete applications will not be processed or reviewed.

Unofficial Transcripts:

At the time of application, please upload unofficial transcripts from all colleges and universities attended.

International Student Requirements

For international admissions requirements, please visit our website.

Application Deadlines

The application deadline for Fall Semester admission to the Mental Health Counseling program is January 15th.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
This program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Mental Health Counseling

MA

Mental Health Counseling (2023-2024)

Duration: 2 Years
★Minimum Credits: 60 Credits

Fall Semester Year 1

Students accepted into the Thesis Option will complete related coursework (CNSL8073) in lieu of Faculty Advisor approved electives. See Handbook for more details.

Course	Title/Desc	Credit
CNSL7021	Counseling Techniques (B- min)	3
CNSL7023	Counseling Theories (B- min)	3
CNSL7025	Group Work in Ecological Counseling - Theory, Research, and Practice (B- min)	3
CNSL8030	Introduction to Clinical Mental Health Counseling (B- min)	3

Spring Semester Year 1

Course	Title/Desc	Credit
CNSL7001	Legal, Ethical, and Professional Issues in Counseling (B- min)	3
CNSL7005	Multicultural Counseling (B- min)	3
CNSL7050	Field Practicum in Counseling (B- min)	3
CNSL8038	Diagnosis and Abnormal Behavior from an Ecological Perspective (B- min)	3

Summer Semester Year 1

Course	Title/Desc	Credit
CNSL7031	Assessment in Counseling (B- min)	3
CNSL7060	Masters Internship in Counseling (B- min)	3
CNSL7008	Research and Program Evaluation in Ecological Counseling (B- min)	3
CNSL7011	Ecological Counseling Across the Lifespan (B- min)	3

Fall Semester Year 2

Course	Title/Desc	Credit
CNSL7015	Career Development and Counseling (B- min)	3
CNSL7060	Masters Internship in Counseling (B- min)	3
CNSL8061	Psychopharmacology for Helping Professionals (B- min)	3
	Faculty Advisor Approved Electives: Student will consult with a Faculty Advisor to select a course. (C min)	3

Spring Semester Year 2

Course	Title/Desc	Credit
CNSL EDST	Measurement & Assessment Students must complete EDST 8034 OR CNSL 8034 (B- min)	3
CNSL8046	Chemical Dependency Counseling (B- min)	3
CNSL8048	Ecological Counseling for Couples and Families (B- min)	3
	Faculty Advisor Approved Electives: Student will consult with a Faculty Advisor to select a course. (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Special Education

Online

Duration: 1 Year Total Credits: 33 Award: MATCH

Overview

The online Master of Arts in Teaching in Special Education prepares our students to provide direct and indirect services for individuals with disabilities. Our graduates become leaders by working with a variety of populations, including K-12 educators, rehabilitation for occupational development and daily independence, community-based case management, disability advocacy, school and individualized consultation services, and various other services related to individuals with disabilities and their families. Our special education degree is 100% online and prepares our students to have a sense of community awareness to enhance and better the lives of all individuals with disabilities.

The Master of Arts in Teaching in Special Education program prepares students who hold bachelor's degree in areas outside of teaching for initial licensure as an intervention specialist.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Special Education - Master of Arts in Teaching Updated Fall 2024

Advising

All academic advising is conducted by program representatives who work with each individual student to develop an appropriate academic plan according to the student's interests. Students have the option to complete this program in a part-time or full-time format.

UC Advantages And Special Opportunities

Our Master of Arts in Teaching in Special Education program pairs with the following graduate certificates and/or endorsements:

- PreK-12 Reading Instruction Endorsement
- Autism Spectrum Disorders Graduate Certificate
- Special Education Leadership Graduate Certificate
- Transition to Work Endorsement

All students must complete a separate admission application and complete all necessary coursework to have the certificate or endorsement added to their official transcript.

Admission Requirements

- A bachelor's degree from a regionally accredited college or university
- Complete application, including University of Cincinnati Graduate Admissions application
- Statement of academic and professional goals, with a cover letter
- Resume of professional skills, educational background, and relevant work experience
- Three letters of recommendation
- Official transcripts of all undergraduate and graduate work
- GRE is not required; however, GRE can be useful if undergraduate GPA is below 3.0 (4.0 scale)

GRE scores – all three sections of the General Test taken within the last 5 years

Desired scores: 470 Verbal; 540 Quantitative, and 4.5 Writing (old scale) OR 151 Verbal; 147 Quantitative, and 4.5 Writing (new scale)

- Undergraduate GPA of 3.0 (4.0 scale)

Application Deadline and Procedures

Prospective students will complete the online application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted by the application date as well. Incomplete applications will not be processed or reviewed.

Transcripts

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process. For admitted students, please view our official transcript submission policy.

Transferring To UC

On a case-by-case basis, a student may petition to have graduate credit from an accredited college or university counted as the equivalent of another course in the curriculum and accepted as transfer credit. In such cases, a student will have to supply a course syllabus to ensure that the content in the course taken at another university is equivalent to the content of the course in the MAT curriculum. A course with a similar name or the same name as a course offered at the University of Cincinnati does not necessarily mean that the content of the course is similar enough to accept it as transfer credit to our program.

Students may transfer up to 9 hours of graduate credit in Education courses from an accredited college or university. Graduate courses outside of education will not be accepted. Courses taken outside an accredited college or university—such as non-credit professional development—will not be accepted. Only courses with grades of B or higher will be considered for transfer. No credit is given for previous work history. Courses taken more than 7 years prior to a student's entrance into the program will not be accepted as transfer credit.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

- Be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
- Posting of satisfactory grades for the term of graduation.
- Satisfactory completion of all applicable college and program requirements is provided by the major advisor filling out the Checklist for Completion of College/Departmental Requirements for Graduation and sending it to the Graduate College.
- Complete the EdTPA assessment.

Application Deadlines

Admission Term	Application Deadline	Notification By
Fall	7/1	8/1
Spring	11/15	12/15
Summer	4/1	4/15

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

MATCH

Special Education - Master of Arts in Teaching Updated Fall 2024

Duration: 1 Year

★Minimum Credits: 33 Credits

Core Requirements (18 credit hours)

All students will complete the courses below:

Course	Title/Desc	Credit
SPED7001	Overview of Special Education Law	3
LSLS7006	Phonological Awareness and Phonics in Middle and Special Education	3
SPED7004	Vocabulary, Comprehension, and Writing Instruction in the Content Areas	3
SPED7007	Promoting Positive Behaviors	3
SPED7052	Universal Design for Learning	3
LSLS7012	Foundations of Reading and Writing for Intervention Specialists	3

Track Options (15 credit hours)

Students will select one track: Mild to Moderate Needs OR Moderate to Intense Needs

Students who select the Mild to Moderate track will complete the courses below:

Course	Title/Desc	Credit
SPED7006	Assessment & Intervention	3
SPED7008	Curriculum Planning & Instructional Strategies: Mild to Moderate	3
SPED7017	Student Teaching: Initial Licensure	3
SPED7018	Special Education Seminar: Initial Licensure	3
SPED7020	Literacy Assessment, Instruction, and Intervention	3

Students who select the Moderate to Intense track will complete the courses below:

Course	Title/Desc	Credit
SPED7009	Assessment and Curriculum Planning: Moderate to Intense	3
SPED7010	Instructional Strategies: Moderate to Intense	3
SPED7012	Language and Foundations of Literacy	3
SPED7017	Student Teaching: Initial Licensure	3
SPED7018	Special Education Seminar: Initial Licensure	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Curriculum & Instruction

Online

Duration: 1 Year Total Credits: 30 - 33 Award: MED

Overview

The relationship between Curriculum and Instruction (C&I) is obviously a very close one. Curriculum is essentially a design, or roadmap for learning, and as such focuses on knowledge and skills that are judged important to learn. Instruction is the means by which that learning will be achieved. To meet the needs of the 21st century learner and achieve successful student outcomes, the C&I program blends thinking and innovation skills; content, life and career skills with research-proven teaching strategies to provide students with a quality education. We focus on trying to find answers to questions such as "why to teach," "what to teach," "how to teach," and "how to evaluate" in instructional process.

The mission of the graduate programs in Curriculum and Instruction is to develop educational leaders for a variety of settings. The program prepares educators to generate, use, and critically examine research in learning and teaching in order to enhance educational practices for learners in formal and informal educational settings across the age span.

Goals

1. To create scholars and educators who are engaged in intellectual discussions that lead individuals to refine and redefine their working assumptions, values, and guiding theories of practice in an ongoing process in order to better meet the needs of their learners.
2. To develop scholars and educators who are able to interpret, respond to, and contribute to current research in curriculum and instruction by participating in and assuming leadership in professional organizations.
3. Prepare scholars, educators, curriculum developers, and researchers who can serve as professional educators within schools, universities, and the community.
4. Reflect the diverse nature of curriculum and instruction through courses, program, research, and the recruitment of faculty and students.

Teaching and Learning School Subjects

The Teaching and Learning School Subjects concentration is designed for in service educators who are interested in focusing on a specific content area. Candidates develop their knowledge in teaching, learning, and educational research in their content domain. The curriculum in each of these areas is highly specialized and candidates have a great deal of latitude to design a program that fits their goals. This concentration is campus-based, though some of the courses can be taken online.

Middle Childhood Education

Candidates who already have earned a bachelor's degree may apply for admission to a joint program which includes both an initial Ohio Middle Level teaching license in grades 4-9, and a Master's degree in Education in C&I. Some courses satisfy requirements for both the middle childhood and C&I programs. Candidates who successfully complete the C&I masters plus licensure are eligible to apply for an Ohio initial teaching license in Middle Childhood Education. These programs are accredited by CAEP and meet state requirements for licensure. Licensure in Middle Childhood Education (grades 4-9) requires selecting two of four subject areas (Language Arts, Social Studies, Science, Mathematics). The length of the program depends upon many factors, especially the undergraduate coursework that the student has previously completed and the two chosen content areas. The minimum length for completion is two academic years (four semesters.) It is highly recommended that a potential student meet with an advisor prior to submitting an application to this program. The program is full time and requires candidates to be engaged in school-based experiences, including a semester of full time student teaching, arranged by the program field coordinators. While some courses are taught online, the majority of courses are taught on UC's Clifton campus in face-to-face sessions. There is more information about the Middle Childhood Education program at the Middle Childood Education website.

Secondary Education

The Secondary Education concentration plus Licensure is an initial licensing strand of the campus-based Curriculum and Instruction masters degree (C&I M.Ed.). Candidates who successfully complete the C&I masters plus licensure are eligible to apply for an initial Ohio Adolescent and Young Adult (AYA) teacher license. Teachers who are currently licensed in grades 7-12 should not apply for this C&I masters strand but consider one of our other offerings. The C&I secondary masters plus licensure is a cohort-based program, as such candidates must meet the admissions requirements of the CI masters program and the specific requirements of licensure programs in the state of Ohio. These requirements include meeting the specific disciplinary content requirements of the license sought and satisfactory findings on Federal and State background checks, TB tests and a statement of good moral conduct. There is more information about the Secondary Education program at the Secondary Education website.

Success

The Master of Education in Curriculum and Instruction is designed for those who like analyzing data, developing and implementing curriculum, researching best practices for designing and developing curriculum.

Career

The Master of Education in Curriculum and Instruction is designed for in service educators who are interested in planning developing implementing and evaluating their educational programs in school and non-school settings. There are three areas of concentration in the CI master's program: STEM Education, Gifted Education, and Teaching & Learning: General Studies.

STEM Education

The STEM specialization allows teachers to further develop their understanding of STEM (Science Technology Engineering and Math) education. Each course helps teachers tie together science math technology and engineering concepts and helps them better understand how to integrate these content areas. It makes our students stronger teachers for whichever STEM field they are in. Our students participate in problem based and project based learning activities mathematics and science investigation based learning tasks and using technology to gain and display information. Our students design a technology based learning environment and conduct an evaluation of the embedded theories in an existing environment of their choice such as digital media games or other innovative technologies.

Gifted Education

The gifted education specialization is designed for licensed teachers who are interested in becoming specialized in teaching gifted students preschool through grade 12 (PK-12). Our students have the opportunity to apply constructs learned in class to their field experience. Our students also develop use and publish lesson plans. Our students apply theories and methods in the teaching of gifted talented or creative students in a classroom setting by engaging in teaching and action research activities. During the gifted assessment course students will develop the talent to analyze and understand a variety of assessment tools selecting the appropriate strategy for a designated purpose. Also within the assessment course our students discuss contextual elements such as cultural ethnic and linguistic diversity and disposition that influence assessment.

Teaching and Learning: General Studies

The teaching and learning: general studies concentration is designed for in service educators who are interested in focusing on a more overall aspect of curriculum and instruction. Candidates develop their knowledge in teaching learning and educational research within an area agreed upon with his/her advisor. Candidates have a great deal of latitude to design a program that fits their goals. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Curriculum Guide Versions:
Curriculum & Instruction Online (updated Fall 2023)

Advising

Once a decision has been made to admit a Master's candidate, the candidate is assigned an official advisor. The assignment of an advisor is based primarily on the personal and professional goals shared in the Personal Goal Statement submitted with the application materials and on the track option being pursued. The program tries to match candidates with faculty who share similar interests and have the expertise to guide candidates in their programs of study.

Candidates should initiate contact with their assigned advisor as soon as possible once the admission's letter is received. During that meeting the advisor will answer any questions and begin working with the candidate on the process of planning the program of study using the "Plan of Study" form for Master's Candidates. This initial advising meeting must occur prior to the end of the semester in which the candidate begins graduate study.

During the course of the program, the candidate should meet, either face-to-face or in a formal online/phone session, with the advisor regularly. The advisor is a good source of information about the various opportunities that exist for the candidate to become involved in C&I and College activities. Candidates must meet with their assigned advisor at least once during each year in the program, preferably in the autumn of the year.

It is the candidate's responsibility to confer regularly with his/her advisor and make sure the advisor has approved the course choices throughout the graduate program. Although candidates are responsible for his/her own education and conferring with friends and other candidates can be helpful, be careful not to rely totally on self-advisement or the advisement of other candidates. In addition to

providing guidance throughout the program, it is the advisor who is ultimately responsible for officially determining completion of the candidates program of study at graduation.

Admission Requirements

The following are requirements for admission:

1. Prerequisite Degree - The applicant must possess a baccalaureate degree from an accredited college or university.
2. Minimum GPA - The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the Bachelor degree. An applicant who possesses a Master's degree or has undertaken any graduate level work before applying must have an average of at least 3.0 in their graduate work. All calculations are based on a 4.0 scale.
3. GRE Requirements - The Curriculum & Instruction Program has specific GRE guidelines that determine whether or not an applicant is required to submit GRE scores. If the applicant is applying for the first masters degree program – no GRE is required of applicants with at least a 3.0 overall in undergraduate degree program. If the applicant is applying for a second or additional master's degree program – no GRE Is required with at least a 3.2 GPA in their previous graduate degree program.
4. Candidates who graduated from a non-accredited college or university or who do not meet the minimum grade point averages requirement for admission may be admitted by a committee of faculty members from the program to which the candidate applied based upon an evaluation of evidence submitted by the candidate. As a minimum, the evidence must address mastery of the knowledge prerequisite to the courses required by the program, acceptable writing skills, the ability to engage in critical thinking, and a personal commitment to completing the program. The evidence must convincingly demonstrate the candidate's potential for success in graduate level work.
5. Admission decisions may not be made on the basis of race, age, sex, color, religion, sexual orientation or handicap.
6. Candidates who are not accepted for admission into a Master's Degree program may not apply to the same program for at least one academic semester. During that period, such applicants may be encouraged by the program to enroll in appropriate course work to develop the knowledge, skills, and values deemed necessary for admission into the program, or to demonstrate that the applicant already possesses such qualifications. Whether such course work may apply to the degree program is left to the discretion of the program. Completion of this course work does not guarantee admission into the program.
7. Advanced standing for a limited amount of course work taken prior to admittance to the program is possible. Graduate course work completed 5 or more years prior to admission will not be applied to the requirements.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester. Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*

Graduate School
University of Cincinnati
110 Van Wormer Hall
P.O. Box 210627

Graduate School
University of Cincinnati
2614 University Circle
110 Van Wormer Hall
Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines “unofficial” transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese: http://cqv.chinadegrees.cn/cn/
- English: http://www.chinadegrees.cn/en/

Verification reports are due to the Graduate School one week prior to the start of the student’s first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:

Transferring To UC

Acceptance of Transfer Credits

- A maximum of 50% of semester credit hours taken as a matriculated candidate in another UC college may be transferred into a candidate’s program. Candidates must have earned a grade of B or higher in these courses. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.
- A maximum of 12 semester credit hours taken as a non-matriculated candidate may be applied toward the degree. Candidates must have earned a grade of B or higher in these courses. Requests for this credit require the completion of the Recommendation for Advanced Standing Form, which is forwarded to the Graduate Division of Research and Advanced Studies. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. The Test of English as a Foreign Language (TOEFL), or successful completion of ELS Level 112, is required of all applicants whose native language is not English. Expectations for TOEFL scores are a minimum of 550 (paper test), 213 (computer-based test), or 79-80 (internet-based test); a minimum score on the Test of Written English (TWE) of 4.5; and a minimum score of 50 on the Test of Spoken English. The TOEFL must have been taken within the two-year period preceding admission. The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office at (513) 556-4278, https://admissions.uc.edu/information/international.html.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

1. Be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
2. Have all NG, N, I, UP, SP and F grades removed for degree courses.
3. Posting of satisfactory grades for the semester of graduation.
4. Satisfactory completion of all applicable College and program requirements is provided by the major advisor filling out the Checklist for Completion of College/Departmental Requirements for Graduation and sending it to the Graduate School.

Application Deadlines

Admission Term	Application Deadline	Notification By
Fall	7/1	8/1
Spring	11/15	12/15
Summer	4/1	4/15

A complete application to C&I requires:

A statement of the applicant's academic and professional goals. Specific directions detailing what is to be included in this statement are located on the UC Graduate School admission website. This goal statement serves two purposes. It will be used as a sample of your writing quality and to insure your goals match with the program. The applicant should explain specifically what areas she or he would like to study so that an appropriate advisor may be assigned to the applicant if admitted into the program.

A résumé relevant to academic and professional data. The submission should include the applicant's name; address; phone; email; colleges attended with degrees, dates conferred, and grade point average; employment history; professional experience; present employer; and names of references.

At least two letters of recommendation from people familiar with the applicant's academic and professional abilities. If possible, at least one letter should be from a faculty member in higher education.

Official transcripts showing all undergraduate and graduate course work completed, including degrees granted and dates of degrees. Applicants whose previous degrees were earned at the University of Cincinnati may substitute "on-campus" transcripts.

Graduate Record Examination (GRE) Scores (if required see above). Information on the procedures for taking the Graduate Record Examination can be obtained from the Student Services Center in the College of Education, Criminal Justice, and Human Services or by visiting http://www.ets.org. International applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. The Test of English as a Foreign Language (TOEFL), or successful completion of ELS Level 112, is required of all applicants whose native language is not English. Expectations for TOEFL scores are a minimum of 550 (paper test), 213 (computer-based test), or 79--80 (internet-based test); a minimum score on the Test of Written English (TWE) of 4.5; and a minimum score of 50 on the Test of Spoken English. The TOEFL must have been taken within the two--year period preceding admission. The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office at (513) 556-4278, https://www.uc.edu/international/services.html.

Curriculum & Instruction : Online

MED

Curriculum & Instruction Online (updated Fall 2023)

Duration: 1 Year

Minimum Credits: 30 - 33 Credits

Curriculum & Instruction Core

Students will complete the core curriculum and a concentration.

Curriculum and Instruction Core Curriculum (9 credits)

Course	Title/Desc	Credit
CI7002	Curriculum and Instruction: Theories and Trends	3
CI7003	Teaching and Learning in Diverse Classrooms	3
CI7004	The Role of Teachers in a Democratic Society	3

Capstone (6 credits)

These courses should be taken in sequence the last two semesters of the CI program.

Course	Title/Desc	Credit
CI7001	Educational Research for Masters Students	3
CI7090	Master's Project: Curriculum and Instruction	3

Curriculum & Instruction Concentrations

Students will complete one concentration: Gifted Education, General Studies, or STEM and Sustainability Education

Gifted Education Concentration (18 credits)

Course	Title/Desc	Credit
CI6060	Gifted: Overview of Teaching Children and Youth who are Gifted, Creative or Talented	3
CI6061	Gifted: Creating Learning Environments for Children and Youth who are Gifted, Creative or Talented	3
CI6062	Gifted: Assessment of Children and Youth who are Gifted, Creative or Talented	3
CI6063	Gifted: Collaboration on Behalf of Children and Youth who are Gifted, Creative or Talented	3
CI6064	Gifted: Practicum	6

General Studies Concentration Required classes (6 credits)

Course	Title/Desc	Credit
CI7010	Improving Instructional Effectiveness: Clinical Experience	3
CI8002	Attitude Formation and Change in the Classroom	3

General Studies Concentration Electives (9 credits)

Students will choose three elective courses below that focus on specific career interests and goals.

Course	Title/Desc	Credit
CI6060	Gifted: Overview of Teaching Children and Youth who are Gifted, Creative or Talented	3
CI6061	Gifted: Creating Learning Environments for Children and Youth who are Gifted, Creative or Talented	3
CI6062	Gifted: Assessment of Children and Youth who are Gifted, Creative or Talented	3

STEM and Sustainability Education Concentration Required Courses (9 credit hours)

Course	Title/Desc	Credit
CI6005	Integrating STEM into Practice	3
CI6007	STEM Education and Sustainability	3
CI7010	Improving Instructional Effectiveness: Clinical Experience	3

STEM and Sustainability Education Concentration Electives (6 credit hours)

Students will choose two elective courses from the options below:

Course	Title/Desc	Credit
CI7037	Applications of Interdisciplinary Learning in STEM Settings	3
CI7040	Mathematics as Problem Solving	3
CI8007	Movements in STEM Equity	3
IDT7130	Applications and Issues of Teaching with Technology	3

Course	Title/Desc	Credit
CI6063	Gifted: Collaboration on Behalf of Children and Youth who are Gifted, Creative or Talented	3
CI7010	Improving Instructional Effectiveness: Clinical Experience	3
CI6005	Integrating STEM into Practice	3
CI6082	Accessibility and Differentiation in Online and Blended Environments	3
CI7006	Global Education: Immigrant Children and Their Families	3
CI7032	Science Learning in Laboratory and Inquiry Settings	3
CI7040	Mathematics as Problem Solving	3
CI7042	Math as an Interdisciplinary Topic	3
EDST6060	Human Learning	3
EDLD8034	School Finance	3
EDST7001	Politics of Education	3
EDST7032	Human Development: Adolescence	3
EDST7046	Critical Pedagogy	3
EDST8037	Cognitive Development	3
EDST8036	Brain Development, Cognition and Learning	3
IDT7130	Applications and Issues of Teaching with Technology	3
IDT7100	Designing Online Assessments for Data-Driven Decisions	3
IDT7110	Universal Design for Learning in Blended and Online Contexts	3

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Curriculum & Instruction

Duration: 1 Year Total Credits: 30 - 33 Award: MED

Overview

The University of Cincinnati's Master of Education in Curriculum and Instruction + Licensure graduate program develops educational leaders for a variety of settings. The program prepares educators to generate, use, and critically examine research in teaching and learning in order to enhance educational practices for learners in formal and informal educational settings across the age span.

There are two concentrations our students can choose from in this program:

Middle Childhood Education

Candidates who already have earned a bachelor's degree may apply for admission to a joint program which includes both an initial Ohio Middle-Level teaching license in grades 4-9, and a Master's degree in Education in C&I. Some courses satisfy requirements for both the middle childhood and C&I programs. Candidates who successfully complete the C&I masters plus licensure are eligible to apply for an Ohio initial teaching license in Middle Childhood Education. These programs are accredited by CAEP and meet state requirements for licensure.

Licensure in Middle Childhood Education (grades 4-9) requires selecting two of four subject areas (Language Arts, Social Studies, Science, Mathematics). The length of the program depends upon many factors, especially the undergraduate coursework that the student has previously completed and the two chosen content areas. The minimum length for completion is two academic years (four semesters).

Potential students must meet with the Middle Childhood Program Coordinator prior to submitting an application.

The master's with middle childhood licensure program is hybrid. The licensure component requires participation in a cohort that requires four semesters of full-time, in-person, coursework, and field experiences. Students must begin cohort in the Fall.

During the licensure cohort, students will complete up to 18 hours of coursework that also counts toward the master's degree. The remaining 12 hours of the master's degree are completed 100% online.

The program is full-time and requires candidates to be engaged in school-based experiences, including a semester of full-time student teaching, arranged by the program field coordinators. While some courses are taught online, the majority of courses are taught on UC's Clifton campus in face-to-face sessions.

There is more information about the Middle Childhood Education program on our website.

Secondary Education

The Secondary Education concentration plus Licensure is an initial licensing strand of the campus-based Curriculum and Instruction Master degree (C&I M.Ed.). Candidates who successfully complete the C&I masters plus licensure are eligible to apply for an initial Ohio Adolescent and Young Adult (AYA) teacher license. Teachers who are currently licensed in grades 7-12 should not apply for this C&I masters strand but consider one of our other offerings.

The C&I secondary masters plus licensure is a cohort-based program, as such candidates must meet the admissions requirements of the CI masters program and the specific requirements of licensure programs in the state of Ohio. These requirements include meeting the specific disciplinary content requirements of the license sought and satisfactory findings on Federal and State background checks, TB tests, and a statement of good moral conduct.

There is more information about the Secondary Education program on our website.

Career

The Master of Education in Curriculum and Instruction is designed for in-service educators who are interested in planning developing implementing and evaluating their educational programs in school and non-school settings. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Curriculum & Instruction 2019-2020

Advising

If an applicant is admitted to the Masters of Education in Curriculum and Instruction-On Campus (C&I), they will be assigned a faculty advisor who will provide guidance and expertise throughout their program of study. The applicant will receive information about their faculty advisor in their admission letter that will be uploaded to the UC application portal. Applicants should contact their faculty advisor via email as soon as possible. The faculty advisor will create a plan of study during the applicants first meeting and will go over information regarding registration and enrollment.

During the course of the program, the student should meet, either face-to-face or in a formal online session. The advisor is a good source of information about the various opportunities that exist for the student to become involved in C&I and other on-campus opportunities. Student must meet with their assigned advisor at least once during each year in the program, preferably in the fall semester of the year. Important to note, the advisor also will guide you through the graduation application process so it is imperative that students meet and discuss this process in their final semester.

Admission Requirements

The following are requirements for admission:

1. Prerequisite Degree -- The applicant must possess a Baccalaureate degree from an accredited college or university.
2. Minimum GPA -- The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the Bachelor Degree. An applicant who possesses a Masters Degree or has undertaken any graduate-level work before applying must have an average of at least 3.0 in their graduate work. All calculations are based on a 4.0 scale.
3. Transcripts -- All applicants are required to upload their unofficial transcripts during the application process, showing all undergraduate and graduate course work completed, including degrees granted and dates of degrees. The university defines “unofficial” transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.
    - Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.
4. No Graduate Record Examination (GRE) score required
5. A statement of the applicant's academic and professional goals. Specific directions detailing what is to be included in this statement are located on the UC Graduate School admission website. This goal statement serves two purposes. It will be used as a sample of your writing quality and to ensure your goals match with the program. The applicant should explain specifically what areas she or he would like to study so that an appropriate advisor may be assigned to the applicant if admitted into the program.
6. A résumé relevant to academic and professional data -- The submission should include the applicant's name; address; phone; email; colleges attended with degrees, dates conferred, and grade point average; employment history; professional experience; present employer; and names of references.
7. At least two letters of recommendation from people familiar with the applicant’s academic and professional abilities. If possible, at least one letter should be from a faculty member in higher education.
8. Candidates who graduated from a non--accredited college or university or who do not meet the minimum grade point averages required for admission may be admitted by a committee of faculty members from the program to which the candidate applied based upon an evaluation of evidence submitted by the candidate. As a minimum, the evidence must address mastery of the knowledge prerequisite to the courses required by the program, acceptable writing skills, the ability to engage in critical thinking, and a personal commitment to completing the program. The evidence must convincingly demonstrate the candidate's potential for success in graduate-level work.
9. Candidates who are not accepted for admission into a Master’s Degree program may not apply to the same program for at least one academic semester. During that period, such applicants may be encouraged by the program to enroll in appropriate course work to develop the knowledge, skills, and values deemed necessary for admission into the program, or to demonstrate that the applicant already possesses such qualifications. Whether such coursework may apply to the degree program is left to the discretion of the program. Completion of this coursework does not guarantee admission into the program.
10. Advanced standing for a limited amount of coursework taken prior to admittance to the program is possible. Graduate course work completed 5 or more years prior to admission will not be applied to the requirements.
11. Providing academic records after admission -- Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines “official” transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. The absolute final deadline for submission of official transcripts is one week before the start of the student’s first semester. Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy

later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

1. Regularly U.S. Postal Mail:
   - Graduate School
     University of Cincinnati
     110 Van Wormer Hall
     P.O. Box 210627
     2614 University Circle
     Cincinnati, Ohio 45221-0627
2. Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):
   - Graduate School
     University of Cincinnati
     2614 University Circle
     110 Van Wormer Hall
     Cincinnati, Ohio 45221-0627

Transferring To UC

Acceptance of Transfer Credits

- A maximum of 15 semester credit hours taken as a matriculated candidate in another UC college may be transferred into a candidate's program. Candidates must have earned a grade of B or higher in these courses. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.
- A maximum of 12 semester credit hours taken as a non-matriculated candidate may be applied toward the degree. Candidates must have earned a grade of B or higher in these courses. Requests for this credit require the completion of the Recommendation for Advanced Standing Form, which is forwarded to the Graduate Division of Research and Advanced Studies. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.

International Student Requirements

For international admissions requirements, please visit our website.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

1. Be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
2. Have all NG, N, I, UP, SP, and F grades removed for degree courses.
3. Posting of satisfactory grades for the semester of graduation.
4. Satisfactory completion of all applicable College and program requirements is provided by the major advisor filling out the Checklist for Completion of College/Department requirements for Graduation and sending it to the Graduate School.

Application Deadlines

PLEASE NOTE: Applications declaring Middle Childhood initial licensure **will be considered for the fall semester only.**

Fall Semester:

- Application Deadline: July 1
- Confirmation Deadline: August 1

Spring Semester:

- Application Deadline: December 1
- Confirmation Deadline: December 20

Summer Semester:

- Application Deadline: April 1
- Confirmation Deadline: April 15

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The educator preparation programs at the University of Cincinnati are accredited by the Council for the Accreditation of Educator Preparation (CAEP).

Curriculum & Instruction

MED

Curriculum & Instruction 2019-2020

Duration: 1 Year

★Minimum Credits: 30 Credits

Curriculum and Instruction Core Curriculum

Students will complete the Core Curriculum as well as a concentration area.

Required Courses

Course	Title/Desc	Credit
CI7001	Educational Research for Masters Students	3
CI7002	Curriculum and Instruction: Theories and Trends	3
CI7003	Teaching and Learning in Diverse Classrooms	3
CI7090	Master's Project: Curriculum and Instruction	3

Technical Electives

Select 3 hours from the following:

Course	Title/Desc	Credit
IDT7100	Designing Online Assessments for Data-Driven Decisions	3
IDT7010	Ethical Use of Digital Information and Technology in Education	3
IDT7120	Tools for Online Learning Creation and Assessment	3
IDT7150	Educational Game Design	3
IDT7160	Multimedia Studio	3
IDT7170	Mobile Learning	3
IDT8030	Design of Blended and Online Learning Environments	3

General Studies

Students will complete 15 credit hours with two required classes (6 credit hours) and three electives classes (9 credit hours) that focus on specific career interests and goals.

Course	Title/Desc	Credit
CI7010	Improving Instructional Effectiveness: Clinical Experience (C min)	3
CI8002	Attitude Formation and Change in the Classroom (C min)	3
Free Electives	Select 9 hours of electives that focus on specific career interests and goals.	9
Free Electives	Students will select a course in collaboration with a faculty advisor.	3

Secondary Education

Students will complete the courses listed for this concentration.Please note: These courses do not meet all the requirements for an Adolescents and Young Adult (AYA) Ohio license, these are only the courses that can be credited to the master's degree. Additional content area methods and field experiences are required.

Course	Title/Desc	Credit
EDST6060	Human Learning	3
EDST7032	Human Development: Adolescence	3
CI7004	The Role of Teachers in a Democratic Society	3
SPED6001	Individuals with Exceptionalities	3

Middle Childhood Education

These courses do not meet all the requirements for middle childhood licensure in the state of Ohio. Additional coursework in content area methods and field experiences are required. Consult with a Faculty Adviser prior to enrollment.

Course	Title/Desc	Credit
CI7031	Research in Science Learning (C min)	3
CI7015	Assess Student Growth and Understanding (C min)	3
CI7004	The Role of Teachers in a Democratic Society (C min)	3
Free Electives	Students will select an additional 6 credit hours in collaboration with a faculty advisor	6

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Curriculum & Instruction

Online

Duration: 1 Year Total Credits: 30 - 33 Award: MED

Overview

The relationship between Curriculum and Instruction (C&I) is obviously a very close one. Curriculum is essentially a design, or roadmap for learning, and as such focuses on knowledge and skills that are judged important to learn. Instruction is the means by which that learning will be achieved. To meet the needs of the 21st century learner and achieve successful student outcomes, the C&I program blends thinking and innovation skills; content, life and career skills with research-proven teaching strategies to provide students with a quality education. We focus on trying to find answers to questions such as "why to teach," "what to teach," "how to teach," and "how to evaluate" in instructional process.

The mission of the graduate programs in Curriculum and Instruction is to develop educational leaders for a variety of settings. The program prepares educators to generate, use, and critically examine research in learning and teaching in order to enhance educational practices for learners in formal and informal educational settings across the age span.

Goals

1. To create scholars and educators who are engaged in intellectual discussions that lead individuals to refine and redefine their working assumptions, values, and guiding theories of practice in an ongoing process in order to better meet the needs of their learners.
2. To develop scholars and educators who are able to interpret, respond to, and contribute to current research in curriculum and instruction by participating in and assuming leadership in professional organizations.
3. Prepare scholars, educators, curriculum developers, and researchers who can serve as professional educators within schools, universities, and the community.
4. Reflect the diverse nature of curriculum and instruction through courses, program, research, and the recruitment of faculty and students.

Teaching and Learning School Subjects

The Teaching and Learning School Subjects concentration is designed for in service educators who are interested in focusing on a specific content area. Candidates develop their knowledge in teaching, learning, and educational research in their content domain. The curriculum in each of these areas is highly specialized and candidates have a great deal of latitude to design a program that fits their goals. This concentration is campus-based, though some of the courses can be taken online.

Middle Childhood Education

Candidates who already have earned a bachelor's degree may apply for admission to a joint program which includes both an initial Ohio Middle Level teaching license in grades 4-9, and a Master's degree in Education in C&I. Some courses satisfy requirements for both the middle childhood and C&I programs. Candidates who successfully complete the C&I masters plus licensure are eligible to apply for an Ohio initial teaching license in Middle Childhood Education. These programs are accredited by CAEP and meet state requirements for licensure. Licensure in Middle Childhood Education (grades 4-9) requires selecting two of four subject areas (Language Arts, Social Studies, Science, Mathematics). The length of the program depends upon many factors, especially the undergraduate coursework that the student has previously completed and the two chosen content areas. The minimum length for completion is two academic years (four semesters.) It is highly recommended that a potential student meet with an advisor prior to submitting an application to this program. The program is full time and requires candidates to be engaged in school-based experiences, including a semester of full time student teaching, arranged by the program field coordinators. While some courses are taught online, the majority of courses are taught on UC's Clifton campus in face-to-face sessions. There is more information about the Middle Childhood Education program at the Middle Childood Education website.

Secondary Education

The Secondary Education concentration plus Licensure is an initial licensing strand of the campus-based Curriculum and Instruction masters degree (C&I M.Ed.). Candidates who successfully complete the C&I masters plus licensure are eligible to apply for an initial Ohio Adolescent and Young Adult (AYA) teacher license. Teachers who are currently licensed in grades 7-12 should not apply for this C&I masters strand but consider one of our other offerings. The C&I secondary masters plus licensure is a cohort-based program, as such candidates must meet the admissions requirements of the CI masters program and the specific requirements of licensure programs in the state of Ohio. These requirements include meeting the specific disciplinary content requirements of the license sought and satisfactory findings on Federal and State background checks, TB tests and a statement of good moral conduct. There is more information about the Secondary Education program at the Secondary Education website.

Success

The Master of Education in Curriculum and Instruction is designed for those who like analyzing data, developing and implementing curriculum, researching best practices for designing and developing curriculum.

Career

The Master of Education in Curriculum and Instruction is designed for in service educators who are interested in planning developing implementing and evaluating their educational programs in school and non-school settings. There are three areas of concentration in the CI master's program: STEM Education, Gifted Education, and Teaching & Learning: General Studies.

STEM Education

The STEM specialization allows teachers to further develop their understanding of STEM (Science Technology Engineering and Math) education. Each course helps teachers tie together science math technology and engineering concepts and helps them better understand how to integrate these content areas. It makes our students stronger teachers for whichever STEM field they are in. Our students participate in problem based and project based learning activities mathematics and science investigation based learning tasks and using technology to gain and display information. Our students design a technology based learning environment and conduct an evaluation of the embedded theories in an existing environment of their choice such as digital media games or other innovative technologies.

Gifted Education

The gifted education specialization is designed for licensed teachers who are interested in becoming specialized in teaching gifted students preschool through grade 12 (PK-12). Our students have the opportunity to apply constructs learned in class to their field experience. Our students also develop use and publish lesson plans. Our students apply theories and methods in the teaching of gifted talented or creative students in a classroom setting by engaging in teaching and action research activities. During the gifted assessment course students will develop the talent to analyze and understand a variety of assessment tools selecting the appropriate strategy for a designated purpose. Also within the assessment course our students discuss contextual elements such as cultural ethnic and linguistic diversity and disposition that influence assessment.

Teaching and Learning: General Studies

The teaching and learning: general studies concentration is designed for in service educators who are interested in focusing on a more overall aspect of curriculum and instruction. Candidates develop their knowledge in teaching learning and educational research within an area agreed upon with his/her advisor. Candidates have a great deal of latitude to design a program that fits their goals. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Curriculum & Instruction Online (updated Fall 2023)

Advising

Once a decision has been made to admit a Master's candidate, the candidate is assigned an official advisor. The assignment of an advisor is based primarily on the personal and professional goals shared in the Personal Goal Statement submitted with the application materials and on the track option being pursued. The program tries to match candidates with faculty who share similar interests and have the expertise to guide candidates in their programs of study.

Candidates should initiate contact with their assigned advisor as soon as possible once the admission's letter is received. During that meeting the advisor will answer any questions and begin working with the candidate on the process of planning the program of study using the "Plan of Study" form for Master's Candidates. This initial advising meeting must occur prior to the end of the semester in which the candidate begins graduate study.

During the course of the program, the candidate should meet, either face-to-face or in a formal online/phone session, with the advisor regularly. The advisor is a good source of information about the various opportunities that exist for the candidate to become involved in C&I and College activities. Candidates must meet with their assigned advisor at least once during each year in the program, preferably in the autumn of the year.

It is the candidate's responsibility to confer regularly with his/her advisor and make sure the advisor has approved the course choices throughout the graduate program. Although candidates are responsible for his/her own education and conferring with friends and other candidates can be helpful, be careful not to rely totally on self-advisement or the advisement of other candidates. In addition to

providing guidance throughout the program, it is the advisor who is ultimately responsible for officially determining completion of the candidates program of study at graduation.

Admission Requirements

The following are requirements for admission:

1. **Prerequisite Degree -** The applicant must possess a baccalaureate degree from an accredited college or university.
2. **Minimum GPA -** The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the Bachelor degree. An applicant who possesses a Master's degree or has undertaken any graduate level work before applying must have an average of at least 3.0 in their graduate work. All calculations are based on a 4.0 scale.
3. **GRE Requirements -** The Curriculum & Instruction Program has specific GRE guidelines that determine whether or not an applicant is required to submit GRE scores. If the applicant is applying for the first masters degree program – no GRE is required of applicants with at least a 3.0 overall in undergraduate degree program. If the applicant is applying for a second or additional master's degree program – no GRE Is required with at least a 3.2 GPA in their previous graduate degree program.
4. Candidates who graduated from a non-accredited college or university or who do not meet the minimum grade point averages requirement for admission may be admitted by a committee of faculty members from the program to which the candidate applied based upon an evaluation of evidence submitted by the candidate. As a minimum, the evidence must address mastery of the knowledge prerequisite to the courses required by the program, acceptable writing skills, the ability to engage in critical thinking, and a personal commitment to completing the program. The evidence must convincingly demonstrate the candidate's potential for success in graduate level work.
5. Admission decisions may not be made on the basis of race, age, sex, color, religion, sexual orientation or handicap.
6. Candidates who are not accepted for admission into a Master's Degree program **may not apply** to the same program for at least one academic semester. During that period, such applicants may be encouraged by the program to enroll in appropriate course work to develop the knowledge, skills, and values deemed necessary for admission into the program, or to demonstrate that the applicant already possesses such qualifications. Whether such course work may apply to the degree program is left to the discretion of the program. Completion of this course work does not guarantee admission into the program.
7. Advanced standing for a limited amount of course work taken prior to admittance to the program is possible. Graduate course work completed 5 or more years prior to admission will not be applied to the requirements.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*

Graduate School
University of Cincinnati
110 Van Wormer Hall
P.O. Box 210627
2614 University Circle
Cincinnati, Ohio 45221-0627

Graduate School
University of Cincinnati
2614 University Circle
110 Van Wormer Hall
Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines “unofficial” transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese: http://cqv.chinadegrees.cn/cn/
- English: http://www.chinadegrees.cn/en/

Verification reports are due to the Graduate School one week prior to the start of the student’s first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:

Graduate School
University of Cincinnati
110 Van Wormer Hall
P.O. Box 210627
2614 University Circle
Cincinnati, Ohio 45221-0627

Cincinnati, Ohio 45221-0627

Transferring To UC

Acceptance of Transfer Credits

- A maximum of 50% of semester credit hours taken as a matriculated candidate in another UC college may be transferred into a candidate’s program. Candidates must have earned a grade of B or higher in these courses. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.
- A maximum of 12 semester credit hours taken as a non-matriculated candidate may be applied toward the degree. Candidates must have earned a grade of B or higher in these courses. Requests for this credit require the completion of the Recommendation for Advanced Standing Form, which is forwarded to the Graduate Division of Research and Advanced Studies. In no case can the Culminating Experience requirement be fulfilled by transfer of credit from another college or university.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. The Test of English as a Foreign Language (TOEFL), or successful completion of ELS Level 112, is required of all applicants whose native language is not English. Expectations for TOEFL scores are a minimum of 550 (paper test), 213 (computer-based test), or 79-80 (internet-based test); a minimum score on the Test of Written English (TWE) of 4.5; and a minimum score of 50 on the Test of Spoken English. The TOEFL must have been taken within the two-year period preceding admission. The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office at (513) 556-4278, https://admissions.uc.edu/information/international.html.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

1. Be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
2. Have all NG, N, I, UP, SP and F grades removed for degree courses.
3. Posting of satisfactory grades for the semester of graduation.
4. Satisfactory completion of all applicable College and program requirements is provided by the major advisor filling out the Checklist for Completion of College/Departmental Requirements for Graduation and sending it to the Graduate School.

Application Deadlines

Admission Term	Application Deadline	Notification By
Fall	7/1	8/1
Spring	11/15	12/15
Summer	4/1	4/15

A complete application to C&I requires:

A statement of the applicant's academic and professional goals. Specific directions detailing what is to be included in this statement are located on the UC Graduate School admission website. This goal statement serves two purposes. It will be used as a sample of your writing quality and to insure your goals match with the program. The applicant should explain specifically what areas she or he would like to study so that an appropriate advisor may be assigned to the applicant if admitted into the program.

A résumé relevant to academic and professional data. The submission should include the applicant's name; address; phone; email; colleges attended with degrees, dates conferred, and grade point average; employment history; professional experience; present employer; and names of references.

At least two letters of recommendation from people familiar with the applicant's academic and professional abilities. If possible, at least one letter should be from a faculty member in higher education.

Official transcripts showing all undergraduate and graduate course work completed, including degrees granted and dates of degrees. Applicants whose previous degrees were earned at the University of Cincinnati may substitute "on-campus" transcripts.

Graduate Record Examination (GRE) Scores (if required see above). Information on the procedures for taking the Graduate Record Examination can be obtained from the Student Services Center in the College of Education, Criminal Justice, and Human Services or by visiting http://www.ets.org. International applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. The Test of English as a Foreign Language (TOEFL), or successful completion of ELS Level 112, is required of all applicants whose native language is not English. Expectations for TOEFL scores are a minimum of 550 (paper test), 213 (computer-based test), or 79--80 (internet-based test); a minimum score on the Test of Written English (TWE) of 4.5; and a minimum score of 50 on the Test of Spoken English. The TOEFL must have been taken within the two--year period preceding admission. The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office at (513) 556-4278, https://www.uc.edu/international/services.html.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Curriculum & Instruction : Online

MED

Curriculum & Instruction Online (updated Fall 2023)

Duration: 1 Year

Minimum Credits: 30 - 33 Credits

Curriculum & Instruction Core

Students will complete the core curriculum and a concentration.

Curriculum and Instruction Core Curriculum (9 credits)

Course	Title/Desc	Credit
CI7002	Curriculum and Instruction: Theories and Trends	3
CI7003	Teaching and Learning in Diverse Classrooms	3
CI7004	The Role of Teachers in a Democratic Society	3

Capstone (6 credits)

These courses should be taken in sequence the last two semesters of the CI program.

Course	Title/Desc	Credit
CI7001	Educational Research for Masters Students	3
CI7090	Master's Project: Curriculum and Instruction	3

Curriculum & Instruction Concentrations

Students will complete one concentration: Gifted Education, General Studies, or STEM and Sustainability Education

Gifted Education Concentration (18 credits)

Course	Title/Desc	Credit
CI6060	Gifted: Overview of Teaching Children and Youth who are Gifted, Creative or Talented	3
CI6061	Gifted: Creating Learning Environments for Children and Youth who are Gifted, Creative or Talented	3
CI6062	Gifted: Assessment of Children and Youth who are Gifted, Creative or Talented	3
CI6063	Gifted: Collaboration on Behalf of Children and Youth who are Gifted, Creative or Talented	3
CI6064	Gifted: Practicum	6

General Studies Concentration Required classes (6 credits)

Course	Title/Desc	Credit
CI7010	Improving Instructional Effectiveness: Clinical Experience	3
CI8002	Attitude Formation and Change in the Classroom	3

General Studies Concentration Electives (9 credits)

Students will choose three elective courses below that focus on specific career interests and goals.

Course	Title/Desc	Credit
CI6060	Gifted: Overview of Teaching Children and Youth who are Gifted, Creative or Talented	3
CI6061	Gifted: Creating Learning Environments for Children and Youth who are Gifted, Creative or Talented	3
CI6062	Gifted: Assessment of Children and Youth who are Gifted, Creative or Talented	3

STEM and Sustainability Education Concentration Required Courses (9 credit hours)

Course	Title/Desc	Credit
CI6005	Integrating STEM into Practice	3
CI6007	STEM Education and Sustainability	3
CI7010	Improving Instructional Effectiveness: Clinical Experience	3

STEM and Sustainability Education Concentration Electives (6 credit hours)

Students will choose two elective courses from the options below:

Course	Title/Desc	Credit
CI7037	Applications of Interdisciplinary Learning in STEM Settings	3
CI7040	Mathematics as Problem Solving	3
CI8007	Movements in STEM Equity	3
IDT7130	Applications and Issues of Teaching with Technology	3

Course	Title/Desc	Credit
CI6063	Gifted: Collaboration on Behalf of Children and Youth who are Gifted, Creative or Talented	3
CI7010	Improving Instructional Effectiveness: Clinical Experience	3
CI6005	Integrating STEM into Practice	3
CI6082	Accessibility and Differentiation in Online and Blended Environments	3
CI7006	Global Education: Immigrant Children and Their Families	3
CI7032	Science Learning in Laboratory and Inquiry Settings	3
CI7040	Mathematics as Problem Solving	3
CI7042	Math as an Interdisciplinary Topic	3
EDST6060	Human Learning	3
EDLD8034	School Finance	3
EDST7001	Politics of Education	3
EDST7032	Human Development: Adolescence	3
EDST7046	Critical Pedagogy	3
EDST8037	Cognitive Development	3
EDST8036	Brain Development, Cognition and Learning	3
IDT7130	Applications and Issues of Teaching with Technology	3
IDT7100	Designing Online Assessments for Data-Driven Decisions	3
IDT7110	Universal Design for Learning in Blended and Online Contexts	3
IDT8030	Design of Blended and Online Learning Environments	3
IDT8020	Learning Sciences and Technology	3
LSLS7014	Disciplinary Literacy in the Secondary School	3
LSLS7015	Reading, Writing & Critical Literacies in Secondary Schools	3
LSLS7016	Adolescent Literature, Media & Popular Culture	3
LSLS7026	Foundations of Language and Literacy Acquisition for Diverse Readers	3
LSLS7054	Literacy as a Linguistic and Cultural Tool	3
MDL7008	Middle School Natural Science Methods II	3

Course	Title/Desc	Credit
MDL7004	Middle School Organization and Practice	3
MDL7009	Middle School Social Studies Methods II	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Educational Leadership

Online

Duration: 2 Years Total Credits: 30 Award: MED

Overview

Why Pursue a Masters in Educational Leadership Online? The University of Cincinnati offers an online program where students can receive a Masters in Educational Leadership through the College of Education, Criminal Justice, Human Services, and Information Technology. Our program strives to prepare candidates for their future as leaders amongst students in grades PK-12. By pursuing an Educational Leadership degree, students will learn how to best implement diversity, inclusion, and fairness into their teaching curriculum. This program is fully accredited by the Ohio Department of Education and the Council for the Accreditation of Educator Preparation (CAEP) and meets the standards of the University Council for Education Administration.

Our online Master of Education in Educational Leadership program offers three concentrations:

Non-licensure: Students have the opportunity to study Educational Leadership with or without an educational/professional background through our non-licensure track.

Principal Leadership (Licensure): You will focus on traditional school leadership while exploring social justice issues as well as administration strategies and theories.

Principal Licensure in Ohio: The Educational Leadership program meets the requirements for principal licensure in the State of Ohio, while also satisfying program requirements for a master's degree. Applicants who have already earned a master's degree, but have a desire to obtain principal licensure in the State of Ohio are suggested to apply here.

Principal Licensure in states other than Ohio: Each state has its own requirements for licensure. A student from a state other than Ohio should check with their state Department of Education to ensure this degree will meet the requirements for principal licensure/certification for that state.

Special Education Leadership: Promote equal, inclusive and progressive education within special education administrations.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Educational Leadership Curriculum 2022-2023

Admission Requirements

Candidates who wish to apply to the EDLD Master's program must meet the following requirements:

1. **Prerequisite Degree -** The applicant must possess a Baccalaureate degree from an accredited college or university if applying for a Master's Degree.
2. **Minimum GPA -** The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the Bachelor Degree. An applicant who possesses a Master's Degree or has undertaken any graduate level work before applying must have an average of at least 3.0 in their graduate work. All calculations are based on a 4.0 scale.
3. **Letters of Recommendation -** All applicants must submit three letters of recommendation. One of the three letters must be from an immediate supervisor that can address the applicant's formal teaching evaluations.
4. **Goal Statement -** Goal statement indicating career goals and area of concentration of interest.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese
- English

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*

Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

Application Deadlines

Educational Leadership : Online

MED

Educational Leadership Curriculum 2022-2023

Duration: 2 Years

★Minimum Credits: 30 Credits

Core Curriculum: Principal Leadership or Special Education Leadership

Students will complete the core curriculum along with one concentration area: Principal Leadership or Special Education Leadership

Course	Title/Desc	Credit
EDLD7035	Educational Leadership Theory	3
EDLD8034	School Finance	3
EDLD8035	School Law	3
EDLD8036	Curriculum Development and Data Analysis	3
EDLD8038	Instructional Supervision	3
EDLD7050	Principal Clinical Internship I	1
EDLD7051	Principal Clinical Internship II	2

Special Education Leadership

Students will complete courses listed as well as 6 credit hours of faculty approved electives.

Course	Title/Desc	Credit
SPED7001	Overview of Special Education Law	3
SPED7056	Foundations, Trends, and Issues in Special Education Leadership	3
Free Electives	Students will complete 6 credit hours from the faculty approved elective courses list.	6

Principal Leadership

Students will choose one course from the following along with 9 credit hours of faculty approved electives:

Course	Title/Desc	Credit
SPED7001	Overview of Special Education Law	3
EDLD8032	Human Resources Administration in Education	3
EDLD7038	Leadership for Social Justice	3
Free Electives	Students will complete 9 credit hours of faculty approved elective courses from the list below.	9

Faculty Approved Elective Courses:

Course	Title/Desc	Credit
EDLD7038	Leadership for Social Justice	3
EDLD7060	Overview of the American Community College	3
EDLD7088	Leadership and Administration in Online Education	3
EDLD8032	Human Resources Administration in Education	3
EDLD8033	Democracy, Communities, and Ethical Leadership	3
EDLD8037	School and Community Partnerships	3
EDLD8050	Seminar in Higher Education	3
EDLD8062	Educational Equity and Diversity in Higher Education	3
EDLD8064	Legal Issues and Law in Higher Education	3
EDST7000	Introduction to Research Methodology	3
EDST7010	Statistical Data Analysis I	3
SPED6002	Engaging and Supporting Families with Members withDisabilities	3
SPED6004	Autism Spectrum Disorders	3

Core Curriculum: General Administration & Policy (Non-Licensure)

Students must complete 15 credit hours from the list of courses below. Students will need to enroll in EDLD 8034 Section 002 and EDLD 8035 Sec 002

Course	Title/Desc	Credit
EDLD9052	Educational Leadership	3
EDLD8034	School Finance	3
EDLD8035	School Law	3
EDLD7052	Educational Leadership Internship	3
	Please choose one of the following 3 credit hour courses: EDLD 7038, EDLD 8033 or EDLD 8037	3

General Administration & Policy (Non-Licensure)

Students must complete 15 credit hours and 9 credit hours must be EDLD courses. All electives must be approved by the student's advisor

Course	Title/Desc	Credit
Free Electives	Leadership Elective	3
Free Electives	Policy Elective	3
Free Electives	Research Methods, Data and Analysis Elective	3
Free Electives	Six additional credit hours based on students' professional and academic interests.	6

Course	Title/Desc	Credit
SPED7007	Promoting Positive Behaviors	3
SPED7013	Universal Design for Learning and Assistive Technology in Special Education	3
SPED7040	Transition to Work Endorsement: Legal and Ethical Foundations	3
SPED7042	Transition to Work Endorsement: Collaboration and Teaming	3
SPED7051	Partnerships and Collaboration	3
SPED7053	Transition Strategies for Individuals with Disabilities	3
SPED7055	Autism Spectrum Disorders: Theory to Practice	3
SPED7056	Foundations, Trends, and Issues in Special Education Leadership	3
CI6060	Gifted: Overview of Teaching Children and Youth who are Gifted, Creative or Talented	3
CI7002	Curriculum and Instruction: Theories and Trends	3
CI7003	Teaching and Learning in Diverse Classrooms	3

Foundations in Behavior Analysis

Online

Duration: 2 Years Total Credits: 30 Award: MED

Overview

The online master's in Foundations in Behavior Analysis is focused on providing students with foundations in applied behavior analysis. Behavior Analysis applies the basic principles of behaviorism to examine human behavior and develop and implement effective plans to change behavior. Professionals with training in behavior analysis work in a variety of educational and clinical settings to help individuals with behavior and learning problems.

To learn more about UC's online master's in Foundations in Behavior Analysis degree program, please visit our program website.

Success

Individuals who wish to make a difference and advance professionally in an educational or clinical setting would most benefit from the online master's program in Foundations in Behavior Analysis. This program will help professionals working with individuals with behavior or learning problems.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Foundations in Behavior Analysis 2023-2024 Online

Advising

Students enrolled in the online master's degree program in Foundations in Behavior Analysis receive support from the very first moment they inquire about the program through graduation. An Enrollment Advisor is available to answer questions and guide future students through the application process. Once a student is accepted into the program, a Program Manager works directly with the student to register for courses, acquire the appropriate course materials & textbooks, and keep students informed about graduation and other topics relevant to the program.

UC Advantages And Special Opportunities

- The program is grounded in the ethical and best practices recommended by the Behavior Analyst Certification Board and is designed to expand students' skills in the core competencies of applied behavior analysis.
- The program addresses a wide array of behaviors associated with a variety of disability categories in both educational and clinical settings.
- The program addresses the specific and comprehensive use of learning principles, such as operant and respondent learning. It also has an emphasis on prevention and early intervention.
- Courses highlight the Individuals with Disabilities Education Act and the provision of assessment and intervention services.
- Coursework will provide students with the required knowledge in core areas of behavior analysis including:
  - Behavioral assessment
  - Functional behavior assessment/analysis
  - Intervention for academic and behavior problems
  - Data-based decision making and single-case design research methodology
  - Ethical standards for practice

Admission Requirements

- Bachelor's degree from a regionally accredited institution in areas related to Applied Behavior Analysis, Education, Psychology, or other related degrees
- Undergraduate GPA of at least 3.0 or 3.0 in the last 60 semester hours (or 90 quarter hours)
- Preference is given to individuals who currently work in an environment where skills in behavior analysis are used
- No GRE is required

For more information on admission requirements, contact an Enrollment Advisor.

International Student Requirements

International students must prove English proficiency prior to being admitted. English proficiency can be documented in several ways. The most common way is by providing a Test of English as a Foreign Language (TOEFL) score. The TOEFL score must meet University, College, and Departmental requirements prior to being admitted including minimum scores of 580 (paper test), 237 (computer test), and 92 (internet test).

English proficiency can also be documented with a 6.5 overall band score on the International English Language Testing System (IELTS) test. English proficiency can further be demonstrated with a 54 on the PEARSON Test of English (PTE) or a 110 on the Duolingo English Test (DET). Finally, English proficiency can be demonstrated by completing a bachelor's degree at an English-speaking college/university or by completing Level 112 of English instruction at ELS Language Centers.

Graduation Requirements

In order to complete the online master's degree program, a student must:

- Complete all required coursework and program requirements
- Obtain at least a 3.0 university grade point average (on a 4.0 scale)
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension
- Pass a master's comprehensive exam

Application Deadlines

The program accepts applications three times each year — Fall, Spring, and Summer. Please visit our website for specific application deadlines.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
Association for Behavior Analysis International (ABAI) verified course sequence – meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst (BCBA) examination.

Instructional Design and Technology

Online

Duration: 2 Years Total Credits: 30 Award: MED

Overview

The Instructional Design and Technology (IDT) offers an online graduate program with a specialization in teaching in blended and online environments. Our program teaches students specific instructional design skill sets, combining facilitation, collaboration, management, learning design, and assessment. Teaching and facilitating courses in blended and online learning environments requires understanding of the nature of learner experiences in those environments, how they differ from traditional classrooms, and how to overcome the challenges and leverage the benefits.

Led by educators with proven success in the field, students will examine current and projected trends, experience authentic online classrooms, and complete hands-on practice with eLearning tools. By completing project-based assignments, students will develop the skills needed to design, manage, and lead their online and blended classrooms.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

The curriculum consists of a minimum of 30 semester credit hours of graduate study, which can be completed over 1 academic year for full-time students or over a longer period of time for students who wish to attend part-time. Classes are offered in a fully online format. Students have the option to apply directly to the online Master's program or apply to the 15-credit Graduate Certificate in Blended Online Learning and Teaching and then later apply to the Master's, and transfer those graduate certificate credits into the Master's program, if admitted. A teaching background is not a prerequisite for the program. This degree does not lead to a teaching license.

The curriculum includes 9 hours of core courses, 3 hours of electives, 15 hours of specialization requirements, and 3 hours of capstone experience. The core courses provide students with the foundation of instructional design, the learning sciences, and basic research skills needed for the field. These core courses emphasize the theoretical basis of Instructional and learning design. The electives are courses that provide the student with interdisciplinary knowledge and experience. Students can also take a professional field experience as an option for an elective. The teaching specialization focuses on facilitating learning in blended and online environments, creating technology-based assessments, gaining strategies for building in accessibility and differentiation, and learning new technology tools. For the capstone experience, students complete a project that builds upon their specialization track.

At the end of the program, the student will be able to:

- Apply learning theories and sound pedagogical practices to the instructional design and development process.
- Apply a systematic process to design instructional strategies that meet identified learning contexts and needs.
- Create authentic, technology-mediated learning experiences.
- Evaluate learning technologies and strategies using a variety of methods.
- Analyze current research and emerging trends in the area of learning technologies.
- Develop strategies to encourage active learning, application, interaction, participation, and collaboration in online and blended environments.
- Facilitate effective learning in online and blended learning environments.
- Demonstrate mastery of contemporary learning technologies.
- Explain the instructional delivery continuum, including associated strengths and affordances.
- Remain cognizant of the diversity of student academic needs and make appropriate accommodations.
- Provide students with multiple and varied formative and summative assessments aligned with content and technology standards.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Instructional Design and Technology: Teaching (Updated Fall 2025)

Advising

All incoming Master's students will be assigned an academic advisor who is a tenure-track faculty member. Students will be mentored by their advisor on their plans of study.

In addition to formal mentorship, students will build community through events such as the annual student showcase, which gives students the opportunity to demonstrate the projects and research that they have completed during the program and network with each other, alumni, professors from outside the IDT program, and others in the community.

Special Programs

Our program is applicable to a wide range of educational environments including public, non-profit, higher education, and corporate training. Professors are leaders in the field, and course materials and activities incorporate the overarching methodology and latest trends in online teaching and learning. Students will experience online learning firsthand and practice the skills needed to succeed in the online teaching and learning in every stage of their coursework.

Scholarships in the form of Graduate Incentive Scholarship Awards (GIA) are available to incoming and returning students based on merit. If awarded, students can use GIA funding to cover part of their tuition. Application forms for GIA support scholarships will be sent to students after they have been officially accepted into a program. GIA funding is an annual award. A new application must be submitted each year.

Admission Requirements

The application materials consist of the following:

- *Video Essay.* The video essay is **optional** and should be **informal**. It is a great way to let the committee know a little bit about you and to personalize your application.
- *Statement of the applicant's academic and professional goals*. For your goal statement, please answer the following questions and upload it as an attached document in the online application. Your response should be no more than one page in length.
    - What are your professional goals? How will the program help you meet these goals?
    - Describe your technology skills, e.g., skills in computer-based multimedia, web, or productivity tools, video, etc. You may wish to include a link to a sample technology project to demonstrate your proficiency in the use of technologies.
- *Writing sample.* Discuss your position on an issue in the field of instructional technology and how you hope to address that issue during your studies. Your essays should be between 750 and 1000 words and have at least three references.
- *Resume*
- *Unofficial transcripts*
- *At least one letter of recommendation (preferably academic)*

Note: The purpose of the recommendation letter(s) is to give the committee an additional data point to assess your academic and professional background. Hence, it is highly recommended to include both an academic and professional recommendation as part of your application. Applicants do not upload the recommendation letters. An email is sent directly to the recommenders from the application system. It is advisable to ask more recommenders than required because applications that do not include the required number of recommendation letters cannot be reviewed by the committee.

- *Applicant must hold a bachelors degree from a college or university regarded as standard by a regional or general accrediting agency*
- *Applicant must have at least a B average (3.0/4.0 system or equivalent) in relevant undergraduate coursework or otherwise give evidence of promise that is judged satisfactory by the admitting program*

Application Procedures

Prospective students will complete the online application. After logging in and/or creating a user account, select "**Instructional Design and Technology, Online, Master of Education"** program by the application deadline posted below. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. Incomplete applications will not be processed or reviewed.

Changing Majors Within UC

All transfer credits must adhere to following Graduate School policies and are subject to approval:

Transfer of External Credit from Programs Outside UC

Transfer of Internal Credit from UC

Application Deadlines

Applications are reviewed three times a year in December, April, and July for any upcoming semester. Applicants are encouraged to submit applications for Fall in April.

Domestic deadlines:

- Fall - July 15
- Spring - December 1
- Summer - April 15

Note: students with international student visas should apply to the IDT Master's on-campus program.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Instructional Design and Technology

Duration: 2 Years Total Credits: 30 Award: MED

Overview

Our Master of Instructional Design and Technology can lead to a number of career opportunities, in a rapidly growing field, with an increasing need for highly trained graduates who can design, develop, implement, and evaluate multimedia instructional materials.

This campus-based program offers a combination of in-person, blended, and online classes. Students complete a professional field experience that provides an opportunity to actively apply what they are learning and conduct evaluations and assessments within real-world settings. Our students are also educated on how to design mobile apps, games and simulations, interactive video, and other industry-standard e-Learning applications.

This program includes a Design and Development specialization that prepares students to design learning environments through the use of technology and multimedia. This focus is perfect for those who aspire to learn more about the technological advances of creative learning solutions.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Students complete a minimum of 30 semester credit hours of graduate study, which can be completed over 1 academic year for full-time students or over a longer period of time for students who wish to attend part-time. Classes are offered in a variety of formats (face-to-face, blended, and fully online), providing a blend of online and on-campus experiences. A teaching background is not a prerequisite for the program. This degree does not lead to a teaching license.

The curriculum includes 9 hours of core courses, 3 hours of electives, 15 hours of specialization requirements, and 3 hours of capstone experience. The core courses provide students with the foundation of instructional design, the learning sciences, and basic research skills needed for the field. These core courses emphasize the theoretical basis of instructional and learning design. The electives are courses that provide the student with interdisciplinary knowledge and experience. The design and development specialization courses focus on instructional design for a wide range of technologies, such as multimedia, games, and mobile learning. Students are required to take a professional field experience to apply what they have learned to a real-world setting. For the capstone experience, students complete a project that builds upon their specialization track.

At the end of the program, the student will be able to:

- Apply learning theories and sound pedagogical practices to the instructional design and development process.
- Apply a systematic process to design instructional strategies that meet identified learning contexts and needs.
- Create authentic, technology-mediated learning experiences.
- Evaluate learning technologies and strategies using a variety of methods.
- Analyze current research and emerging trends in the area of learning technologies.
- Create an educational game prototype using instructional design principles.
- Create instructional plans for mobile learning using instructional design principles.
- Develop multimedia products using multimedia design principles.
- Design blended and fully online learning environments based on theory and best practices.
- Integrate theory and practice through field experiences.

Instructional Design and Technology: Design & Development (updated Fall 2025)

Advising

All incoming master's students will be assigned an academic advisor who is a tenure-track faculty member. These advisors will mentor students on their plans of study. Students also receive mentorship throughout their internship experience from both the full-time faculty member coordinating the course as well as from their field supervisor in their placement. Past field supervisors have included leaders in the field of faculty training and development, corporate training, and classroom technology integration and management.

In addition to formal mentorship, students will build community through events such as the annual student showcase, which gives students the opportunity to demonstrate the projects and research that they have completed during the program and network with each other, alumni, professors from outside the IDT program, and others in the community.

Special Programs

The goal of the IDT MEd at the University of Cincinnati is to ready students to compete in a dynamic, growing field that demands talented, well-informed professionals. Our curriculum is especially designed to meet this growing demand. Students learn from award winning faculty in state-of-the art facilities with access to cutting edge technologies, labs, apps, and software.

With the advantage of being one of the few schools situated in a large, metropolitan city, our program is distinguished by its urban location. This location provides our students with advantageous experiential learning opportunities, such as working in urban education, corporate, and healthcare organizations, allowing them to gain firsthand experiences in the challenges of working in these different settings. As Cincinnati is home to many large companies and technology focused startups, a plethora of internship opportunities are also available to the student body. Finally, students get to learn from leaders in the field of instructional design and technology.

Scholarships in the form of Graduate Incentive Scholarship Awards (GIA) are available to incoming and returning students based on merit. If awarded, students can use GIA funding to cover part of their tuition. Application forms for GIA support scholarships will be sent to students after they have been officially accepted into a program. GIA funding is an annual award. A new application must be submitted each year. For more information on GIA scholarships, please see the Graduate School website.

Admission Requirements

Application Materials

The application materials consist of the following:

- *Video Essay.* The video essay is **optional** and should be **informal**. It is a great way to let the committee know a little bit about you and to personalize your application.
- *Statement of the applicant's academic and professional goals.* For your goal statement, please answer the following questions and upload it as an attached document in the online application. Your response should be no more than one page in length.
  - What are your professional goals? How will the program help you meet these goals?
  - Describe your technology skills, e.g., skills in computer-based multimedia, web, or productivity tools, video, etc. You may wish to include a link to a sample technology project to demonstrate your proficiency in the use of technologies.
- *Writing sample.* Discuss your position on an issue in the field of instructional technology and how you hope to address that issue during your studies. Your essays should be between 750 and 1000 words and have at least three references.
- *Resume*
- *Unofficial transcripts*
- *At least one letter of recommendation (preferably academic).*

Note: The purpose of the recommendation letter(s) is to give the committee an additional data point to assess your academic and professional background. Hence, it is highly recommended to include both an academic and professional recommendation as part of your application. Applicants do not upload the recommendation letters. An email is sent directly to the recommenders from the application system. It is advisable to ask more recommenders than required because applications that do not include the required number of recommendation letters cannot be reviewed by the committee.

- *Applicant must hold a bachelors degree from a college or university regarded as standard by a regional or general accrediting agency*
- *Applicant must have at least a B average (3.0/4.0 system or equivalent) in relevant undergraduate coursework or otherwise give evidence of promise that is judged satisfactory by the admitting program*

Application Procedures

Prospective students will complete the online application. After logging in and/or creating a user account, select "**Instructional Design and Technology, Master of Education"** program by the application deadline posted below. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. Incomplete applications will not be processed or reviewed.

Changing Majors Within UC

All transfer credits must adhere to following Graduate School policies and are subject to approval:

Transfer of External Credit from Programs Outside UC

Transfer of Internal Credit from UC

International Student Requirements

The IDT program with the Design and Development specialization meets all requirements for students with F and J visas and is also classified as a STEM program for international students (13.0501). This designation allows international students to apply for up to 3 years of Optional Practical Training work authorization after graduation. Students with F and J visas can apply either to Fall or Spring semester but are encouraged to apply for Fall to be part of a cohort.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

1. Be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
2. Have all NG, N, I, UP, SP and F grades resolved for degree courses.
3. Posting of satisfactory grades for the semester of graduation.
4. Obtain a minimum of a 3.0 GPA
5. Satisfactory completion of all applicable College and program requirements as provided by the major advisor filling out the Checklist for Completion of College/Department requirements for Graduation and sending it to the Graduate School.
6. Successful defense of a Master's project

Application Deadlines

Instructional Design and Technology campus-based program only admit once per year. Please apply by the deadline to begin your program at the start of the fall semester.

- Deadline: July 15

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Instructional Design and Technology

MED

Instructional Design and Technology: Design & Development (updated Fall 2025)

Duration: 2 Years

★Minimum Credits: 30 Credits

Core Courses (9 credits)

Students will complete all of the following core courses.

Course	Title/Desc	Credit
IDT8010	Instructional Design	3
IDT8020	Learning Sciences and Technology	3
Free Electives	Student may select 3 semester hours from any other IDT courses, or faculty recommended courses.	3

Master's Project (6 credits)

Course	Title/Desc	Credit
IDT8130	Master's Project: Instructional Design and Technology	3
IDT7095	Trends and Issues in Learning Technology Evaluation	3

Design and Development Concentration (15 credits)

Students will complete five (5) of the following concentration courses.

Course	Title/Desc	Credit
IDT7120	Tools for Online Learning Creation and Assessment	3
IDT7150	Educational Game Design	3
IDT7170	Mobile Learning	3
IDT7180	Learning Technology Professional Experience	3
IDT8030	Design of Blended and Online Learning Environments	3
Free Electives	Student may select 3 semester hours from any other IDT courses, or faculty recommended courses.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Instructional Design and Technology

Online

Duration: 2 Years Total Credits: 30 Award: MED

Overview

The Instructional Design and Technology (IDT) offers an online graduate program with a specialization in teaching in blended and online environments. Our program teaches students specific instructional design skill sets, combining facilitation, collaboration, management, learning design, and assessment. Teaching and facilitating courses in blended and online learning environments requires understanding of the nature of learner experiences in those environments, how they differ from traditional classrooms, and how to overcome the challenges and leverage the benefits.

Led by educators with proven success in the field, students will examine current and projected trends, experience authentic online classrooms, and complete hands-on practice with eLearning tools. By completing project-based assignments, students will develop the skills needed to design, manage, and lead their online and blended classrooms.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

The curriculum consists of a minimum of 30 semester credit hours of graduate study, which can be completed over 1 academic year for full-time students or over a longer period of time for students who wish to attend part-time. Classes are offered in a fully online format. Students have the option to apply directly to the online Master's program or apply to the 15-credit Graduate Certificate in Blended Online Learning and Teaching and then later apply to the Master's, and transfer those graduate certificate credits into the Master's program, if admitted. A teaching background is not a prerequisite for the program. This degree does not lead to a teaching license.

The curriculum includes 9 hours of core courses, 3 hours of electives, 15 hours of specialization requirements, and 3 hours of capstone experience. The core courses provide students with the foundation of instructional design, the learning sciences, and basic research skills needed for the field. These core courses emphasize the theoretical basis of Instructional and learning design. The electives are courses that provide the student with interdisciplinary knowledge and experience. Students can also take a professional field experience as an option for an elective. The teaching specialization focuses on facilitating learning in blended and online environments, creating technology-based assessments, gaining strategies for building in accessibility and differentiation, and learning new technology tools. For the capstone experience, students complete a project that builds upon their specialization track.

At the end of the program, the student will be able to:

- Apply learning theories and sound pedagogical practices to the instructional design and development process.
- Apply a systematic process to design instructional strategies that meet identified learning contexts and needs.
- Create authentic, technology-mediated learning experiences.
- Evaluate learning technologies and strategies using a variety of methods.
- Analyze current research and emerging trends in the area of learning technologies.
- Develop strategies to encourage active learning, application, interaction, participation, and collaboration in online and blended environments.
- Facilitate effective learning in online and blended learning environments.
- Demonstrate mastery of contemporary learning technologies.
- Explain the instructional delivery continuum, including associated strengths and affordances.
- Remain cognizant of the diversity of student academic needs and make appropriate accommodations.
- Provide students with multiple and varied formative and summative assessments aligned with content and technology standards.

Instructional Design and Technology: Teaching (Updated Fall 2025)

Advising

All incoming Master's students will be assigned an academic advisor who is a tenure-track faculty member. Students will be mentored by their advisor on their plans of study.

In addition to formal mentorship, students will build community through events such as the annual student showcase, which gives students the opportunity to demonstrate the projects and research that they have completed during the program and network with each other, alumni, professors from outside the IDT program, and others in the community.

Special Programs

Our program is applicable to a wide range of educational environments including public, non-profit, higher education, and corporate training. Professors are leaders in the field, and course materials and activities incorporate the overarching methodology and latest trends in online teaching and learning. Students will experience online learning firsthand and practice the skills needed to succeed in the online teaching and learning in every stage of their coursework.

Scholarships in the form of Graduate Incentive Scholarship Awards (GIA) are available to incoming and returning students based on merit. If awarded, students can use GIA funding to cover part of their tuition. Application forms for GIA support scholarships will be sent to students after they have been officially accepted into a program. GIA funding is an annual award. A new application must be submitted each year.

Admission Requirements

The application materials consist of the following:

- *Video Essay.* The video essay is **optional** and should be **informal**. It is a great way to let the committee know a little bit about you and to personalize your application.
- *Statement of the applicant's academic and professional goals*. For your goal statement, please answer the following questions and upload it as an attached document in the online application. Your response should be no more than one page in length.
  - What are your professional goals? How will the program help you meet these goals?
  - Describe your technology skills, e.g., skills in computer-based multimedia, web, or productivity tools, video, etc. You may wish to include a link to a sample technology project to demonstrate your proficiency in the use of technologies.
- *Writing sample.* Discuss your position on an issue in the field of instructional technology and how you hope to address that issue during your studies. Your essays should be between 750 and 1000 words and have at least three references.
- *Resume*
- *Unofficial transcripts*
- *At least one letter of recommendation (preferably academic)*

Note: The purpose of the recommendation letter(s) is to give the committee an additional data point to assess your academic and professional background. Hence, it is highly recommended to include both an academic and professional recommendation as part of your application. Applicants do not upload the recommendation letters. An email is sent directly to the recommenders from the application system. It is advisable to ask more recommenders than required because applications that do not include the required number of recommendation letters cannot be reviewed by the committee.

- *Applicant must hold a bachelors degree from a college or university regarded as standard by a regional or general accrediting agency*
- *Applicant must have at least a B average (3.0/4.0 system or equivalent) in relevant undergraduate coursework or otherwise give evidence of promise that is judged satisfactory by the admitting program*

Application Procedures

Prospective students will complete the online application. After logging in and/or creating a user account, select "**Instructional Design and Technology, Online, Master of Education"** program by the application deadline posted below. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. Incomplete applications will not be processed or reviewed.

Changing Majors Within UC

All transfer credits must adhere to following Graduate School policies and are subject to approval:

Transfer of External Credit from Programs Outside UC

Transfer of Internal Credit from UC

Application Deadlines

Applications are reviewed three times a year in December, April, and July for any upcoming semester. Applicants are encouraged to submit applications for Fall in April.

Domestic deadlines:

- Fall - July 15
- Spring - December 1
- Summer - April 15

Note: students with international student visas should apply to the IDT Master's on-campus program.

Accreditation

Literacy & Second Language Studies

Online

Duration: 2 Years Total Credits: 30 Award: MED

Overview

The Literacy and Second Language Studies graduate degree program, at the University of Cincinnati, is an online program that is designed to encourage professional educators to broaden and deepen their understanding of the social, cultural, linguistic, and institutional factors that contribute to a person's ability to communicate in a first or second language. The master's program offers a comprehensive study for students interested in exploring literacy and language processes.

Our area of emphasis includes:

- The effective design and implementation of literacy curricula.
- The assessment and evaluation of literacy difficulties.
- Practice with a variety of instructional methods to foster the literacy learning of diverse student populations.
- Strategies for critically analyzing foundational and current research in the field of literacy and second language studies.

Our literacy graduate program offers two general concentrations:

- PreK-16 Literacy and Learning Instruction
- PreK-12 Teaching English as a Second Language (TESOL) Focus

Additional courses of study include Postsecondary Literacy Instruction and International/ Adult TESL. Concentration-specific courses, practica experiences, and a culminating activity in the form of either a master's project or a master's thesis are also required to complete the degree.

Success

Successful applicants:

- Hold a Baccalaureate Degree from an accredited college or university
- Have a GPA of at least 3.0 on a 4.0 scale for undergraduate coursework*
- Have basic familiarity with computers and the Internet

*International University credits must be converted to U.S. 4.0 grading scale.

Career

The PreK-16 Literacy Learning and Instruction concentration meets the International Literacy Association's 2010 Standards for Reading Professionals. Students who hold a valid teaching certificate or license are eligible for the Ohio Reading Endorsement upon completion of the degree requirements. Career possibilities include: PreK-16 Reading Specialist Reading Curriculum Coordinator or Literacy Educator. The PreK-12 Teaching English as a Second Language (TESOL) concentration meets the international TESOL standards and is geared toward individuals who are licensed in a single or multiple subject areas and are interested in teaching English as a Second Language (ESL). Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Literacy & Second Language Studies, MEd Revised Fall 2025

Advising

Students will be assigned individual academic advisors upon admission into the Master's degree program. Inquiries about the program should be directed to Dr. Hye Pae.

UC Advantages And Special Opportunities

The Master's degree program in Literacy and Second Language Studies importantly offers students flexibility in selecting the disciplinary concentration that applies most directly to his/her individual educational and professional goals. Additionally, the program's fully online format enables students to complete all degree requirements without having to relocate to the greater Cincinnati metropolitan area. All Literacy and Second Language Studies faculty are well-trained in distance learning pedagogies in accordance with the Quality Matters (QM) standards. Specialized practica further provide students with critical hands-on instructional experiences necessary to be competitive in the job market.

Admission Requirements

The following are requirements for admission:

1. The applicant must possess a Baccalaureate degree from an accredited college or university.
2. The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the Bachelor Degree. The applicant who possesses a master's degree prior to admission must have a graduate grade point average of at least 3.0 in any graduate level work undertaken before admission. All calculations are based on a 4.0 scale.
3. In rare instances, candidates who graduated from a non-accredited college or university or who do not meet the minimum grade point averages requirement for admission may be admitted based upon an evaluation of evidence submitted by the candidate. As a minimum, the evidence must address mastery of the knowledge prerequisite to the courses required by the program, acceptable writing skills, the ability to engage in critical thinking, and a personal commitment to completing the program. The evidence, very often including Graduate Record Examination (GRE) scores, must convincingly demonstrate the candidate's potential for success in graduate level work.
4. GRE scores are optional for admission to the Master's degree program, but are highly recommended to strengthen applications that may be weak in other areas. For example, applicants wtihout a minimum undergraduate GPA of 3.0 should include GRE scores with their application.

Please note: Applicants who are not accepted for admission may reapply once they have addressed the weaknesses identified during their initial application review. During that period, such applicants may be encouraged by the program to enroll in appropriate course work to develop the knowledge, skills, and values deemed necessary for admission into the program, or to demonstrate that the applicant already possesses such qualifications. Whether such course work may apply to the degree program is left to the discretion of the program. Applicants may also be encouraged to take or re-take the GRE. However, completion of recommended course work or the GRE does not guarantee admission into the program.

Please note: It is highly recommended that students applying to the PreK-16 Literacy Learning and Instruction have at least 2 years of teaching experience.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester. Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese
- English

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

Transferring To UC

Courses taken prior to admission into the master's degree program in Literacy and Second Language Studies may be eligible for transfer into the program, if taken within 5 years prior to admission. All transferred courses must have approval of the program faculty. Official paperwork is required to complete the transfer of courses; forms are available from the Director of Graduate Studies. Upon approval, students may transfer up to 10 graduate semester credit hours into their degree program course of study.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. For a list of translation/evaluation agencies accepted by the University of Cincinnati, please contact UC International online or by phone at (513)-556-4278.

The Test of English as a Foreign Language (TOEFL), IELTS or PTE is required of all applicants whose native language is not English, and must have been taken within the 2-year period of time preceding admission. The following minimum scores must be obtained:

- TOEFL Internet-Based Test (iBT): 80
- TOEFL Paper-Based Test (PBT): 550
- TOEFL Computer-Based Test (CBT): 213
- IELTS: 6.5
- PTE: 53

The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact UC International online or by phone at (513) 556-4278.

The University of Cincinnati accepts documentation of successful, recent completion of ELS Level 112 as evidence of English language proficiency. Such evidence may be submitted in lieu of TOEFL, IELTS, or PTE scores.

Graduation Requirements

Students may graduate at the end of any semester if they meet the necessary degree requirements and all program and University deadlines. Students should confer closely with their advisors regarding graduation as they approach the completion of their degree requirements. The initial step in the graduation process consists of a formal application for graduation. This must be done by the announced deadline (usually during the semester prior to the semester of anticipated graduation) and is completed online.

A complete list of important deadlines and responsibilities that must be met prior to graduation, as well as further instructions and guidelines for completing the application for graduation can be found at the Graduate School website

The student must be registered for at least one graduate credit in their program in an academic year, after having met minimum degree/candidacy requirements in order to be considered a graduate student throughout the academic year. Further, students must be registered for at least one graduate credit during the academic year in which they will graduate.

Before graduation for all students, submission of Notification of Removal of all NG, N, I, UP, SP, and F grades must be sent as well as posting of all satisfactory grades for the graduation semester.

Satisfactory completion of all applicable College and program requirements is provided by the student's advisor filling out the Checklist for Completion of College/Departmental Requirements for Graduation and sending it to the Graduate School. Students completing a thesis must deposit a copy of the thesis with the Graduate School according to the most current detailed instructions on the Graduate School website.

Application Deadlines

Application deadlines are as follows:

- Fall Semester - July 1
- Spring Semester - November 15
- Summer Semester - July 17

Your application is not considered complete, and so cannot be reviewed, until the Graduate School has received all of the following:

1. A cover letter clearly stating to which degree concentration the application is being made (e.g., PreK-16 Literacy Learning and Instruction, Postsecondary Literacy Instruction, PreK-12 TESOL, or Adult/International TESL).
2. A statement of the applicant's academic and professional goals, approximately two pages long. This writing sample will be used as one of the criteria for evaluating the application. The applicant should explain specifically what areas s/he would like to study so that an appropriate advisor can be assigned to the applicant if admitted into the program.
3. A resume relevant to academic and professional data. It should include the applicant's name, address, phone, email, colleges attended with degrees, dates conferred, and grade point average, employment history, professional experience, present employer, and names of references.
4. Two letters of recommendation (3 recommended) from people familiar with the applicant's academic and professional abilities. If possible, at least one letter should be from a faculty member in higher education. Those writing letters should explain who they are, their relationship to the applicant, and what they know of the applicant's academic and professional abilities. The applicant should be prepared to provide the recommenders e-mail addresses in the electronic application. Since recommenders are not prompted to submit their letters until the electronic application has been submitted, and application fee paid, it is wise to encourage recommenders to prepare their letters in advance so that they can upload them immediately upon receipt of the prompt.
5. Transcripts showing all undergraduate and graduate course work completed, including degrees granted and dates of degrees. Applicants whose previous degrees were earned at the University of Cincinnati may substitute "on-campus" transcripts.
6. OPTIONAL: Graduate Record Examination (GRE) Scores. Provide an original copy of scores taken within five years of the date the application. To ensure we receive the scores, both the university and the program to which scores are sent should be indicated on the order form. The code for University of Cincinnati is 1833.

Please note: If you are seeking an endorsement as part of your program, you must include a copy of your current Ohio teaching license.

Notification: The program reviews the applicant's materials and informs the applicant of its decision after completing the review. If the applicant is accepted, applicants must notify the program in writing of their intent to enroll. An academic advisor will be assigned, and it will be the applicant's responsibility to set up an appointment with his/her advisor prior to registering for courses. If the applicant is not accepted, the program will notify the applicant by letter of this decision.

Please note: Application materials will not be returned to the applicant.

MED

Literacy & Second Language Studies, MEd Revised Fall 2025

Duration: 2 Years

★Minimum Credits: 30 Credits

Literacy & Second Language Studies Core Curriculum

Students will complete the Core Curriculum as well as a concentration area.

Course	Title/Desc	Credit
LSLS7053	Foundations of First and Second Language Learning	3
LSLS7054	Literacy as a Linguistic and Cultural Tool	3
LSLS7057	Master's Culminating Experience: Literacy and Second Language Studies	3

Electives

See required number of elective hours (if any) under each Concentration. Electives should be chosen in collaboration with the faculty advisor.

Course	Title/Desc	Credit
LSLS7016	Adolescent Literature, Media & Popular Culture	3
LSLS7032	Teaching Literature of Ethnic American Populations	3
LSLS7033	Seminar: Literature for Children and Adolescents	3
LSLS7051	Seminar in Literacy and Second Language Studies	3
LSLS7060	Applied Linguistics	3
LSLS7068	Sociolinguistics and Bilingual Education	3
LSLS7069	PreK-12 Methods of TESOL	3
LSLS7070	Evaluation and Assessment for K-12 TESOL	3
LSLS8032	Language and Emergent Literacy	3
LSLS8036	Adolescent Literacy	3
CI7001	Educational Research for Masters Students	3
CI7003	Teaching and Learning in Diverse Classrooms	3
CI7006	Global Education: Immigrant Children and Their Families	3
CI7050	Using Literature in Social Studies	3
SPED6001	Individuals with Exceptionalities	3
SPED6002	Engaging and Supporting Families with Members withDisabilities	3
SPED7042	Transition to Work Endorsement: Collaboration and Teaming	3
SPED7052	Universal Design for Learning	3

Concentration Coursework

Student will select a concentration and complete coursework associated with their selection. (21 credit hours)

PreK-16 Literacy Learning and Instruction Concentration

Course	Title/Desc	Credit
LSLS7026	Foundations of Language and Literacy Acquisition for Diverse Readers	3
LSLS7028	Advanced Literacy Assessments in Practicum	3
LSLS7029	Advanced Literacy and Writing Instruction in Practicum	3
LSLS7031	Advanced Literacy Research and MTSS	3
LSLS8040	Survey of Research in Reading and Writing	3
	Faculty Advisor Approved Electives Student may select 6 additional credit hours in collaboration with a faculty advisor.	6

PreK-16 Teaching English as a Second Language Concentration

Course	Title/Desc	Credit
CI7006	Global Education: Immigrant Children and Their Families	3
LSLS7060	Applied Linguistics	3
LSLS7068	Sociolinguistics and Bilingual Education	3
LSLS7069	PreK-12 Methods of TESOL	3
LSLS7070	Evaluation and Assessment for K-12 TESOL	3
LSLS7078L	Practicum in Teaching English as a Second Language	3
LSLS8060	Content-Based Second Language Education	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Medical Education (Curriculum & Instruction)

Online

Duration: 1 Year Total Credits: 30 Award: MED

Overview

Medical education is typically the advanced education of medical/dental/osteopathic students, residents, fellows, nurses, technicians, research staff, and others within a hospital or other healthcare or medical facility. In a broader sense, it also includes the education of patients and their families within those same facilities. While it can also refer in some circumstances to the education of the public regarding specific health conditions or on health and healthy behaviors in general, it is not the same as the field of Public Health (and this degree does not address those needs as well as an MPH would).

This master's program is designed to provide advanced training in teaching & learning and educational research skills to faculty, staff, and allied health professionals who are involved in precepting or teaching activities and/or medical education research so that they may improve their curricula and teaching methodologies as well as further the knowledge of the field.

The program is offered through a joint partnership of Cincinnati Children's Hospital Medical Center and the University of Cincinnati College of Education, Criminal Justice and Human Services (CECH). The faculty at Cincinnati Children's Hopsital Medical Center comprise the entirety of the University of Cincinnati College of Medicine's Department of Pediatrics. It is open to all fields and specialties.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Robert Harper, Jr., Co-director
(513) 636-7258
robert.harper@cchmc.org or harperre@ucmail.uc.edu

Admission Requirements

Admission is non-competitive. Eligibility criteria include

- Undergrad GPA of 3.0 or higher or prior master's or doctoral GPA of 3.2 or higher
- Current involvement in medical education or just starting career track in medical education
- Current CV or resume
- An admission essay that addresses your involvement and interest in medical education and scholarship and your future goals within the field
- Two (2) professional letters of recommendation:
  - *Generic recommendations, recommendations for admission to fellowship or residency programs, or recommendations for employment are not suitable. Personal recommendations are not appropriate.*
    - One recommendation should be from your division director, chief, fellowship director, or other supervisor and should address the reasons for his or her support for your application. If you are moving into a new position, the recommendation should be from your new director or supervisor.
    - The second recommendation may be from a colleague, former director or supervisor, former attending or preceptor, or other professional of your choosing who can speak to your involvement/interest/skills/etc. within the medical education field.
- Official transcripts of undergraduate, medical, and/or prior graduate work. Please reference transcript instructions on our website.

- TOEFL or IELTS scores if your native language is not English and you are living and working in a non-English speaking country. Please see the Graduate School Handbook for more information and a list of exempt countries. If you are currently living and working in an English-speaking country, this requirement can be waived.

International Student Requirements

English Proficiency Requirement:

Standardized tests scores are required if your native language is not English and you are living and working in a non-English speaking country. Please visit our international website for more information on specific exam score minimums, and a list of exempt countries.

MED

Medical Education MEd

Duration: 1 Year

★Minimum Credits: 30 Credits

Required Courses

All 10 courses (30 credit hours) are required.

Teaching and Learning courses

Courses can be taken in any order

Course	Title/Desc	Credit
CI7080	Curriculum Development & Evaluation in Medical Education	3
CI7081	Attitude Formation and Change in Medical Education	3
CI7082	Human and Adult Learning in Medical Education	3
CI7083	Application of Instructional Design and Technology in Medical Education	3

Research courses

Courses other than CI7001 can be taken in any order. CI7001, ideally, will be taken last.

Course	Title/Desc	Credit
EDST7010	Statistical Data Analysis I	3
EDST8051	Qualitative Research Methods I	3
EDST8034	Measurement and Assessment	3
CI7001	Educational Research for Masters Students	3

Culminating courses

CI6075 can be taken anytime after completion of the Teaching and Learning courses. CI7090 can be taken anytime after completion of CI7001.

Course	Title/Desc	Credit
CI6075	Field Experiences Practicum	3
CI7090	Master's Project: Curriculum and Instruction	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

School Counseling

Duration: 2 Years Total Credits: 60 Award: MED

Overview

At the University of Cincinnati, our goal is to prepare licensed professional school counselors to support students' social, emotional, and career development in various PreK-12 school settings, including both public and private schools. The purpose of the School Counseling graduate degree program is to develop professional school counselors who have the knowledge and ability to lead Comprehensive School Counseling Programs (CSCPs) guided by the American School Counselor Association (ASCA) National Model. Graduates are equipped with the skills to support students on their educational journey and provide students with the necessary college and career readiness skills.

Our CACREP-accredited program centers around our core counseling curriculum, aligned with current national accreditation standards for master's programs in counseling, state licensing requirements for counselors, and university requirements for graduate programs. In addition, the program requires specialized coursework, field-based practice, and internship training under the supervision of a licensed, practicing school counselor in the PreK-12 school setting. Further, an assigned faculty advisor assists students in choosing elective coursework and in planning their field-based practice and internship experiences. Graduates of this program meet training requirements established by the Ohio Board of Education for licensure as a school counselor. **Although requirements for licensure vary from state to state, our faculty is dedicated to providing support through one-on-one faculty advising so students are prepared for licensure in the state where they are seeking employment.**

Success

This area of study is best suited for individuals who enjoy working in schools with children and/or adolescents. Those who choose school counseling as a career need to be self-driven, independent, creative, and persistent as well as have the capacity to work collaboratively with others in order to achieve common school and community goals. School counselors serve as advocates for K-12 students and the counseling program. In this capacity, they are required to engage in individual and group counseling, classroom guidance, crisis management, program development and management, and the evaluation of data. Further, good verbal and written communication skills are a must for successful school counselors.

Career

Career possibilities center on working with children and adolescents in K-12 school settings, however the degree may provide students with foundational skills needed to work in other areas of counseling beyond the K-12 school setting. Opportunities to become a counselor at the elementary middle and high school levels are available to students and afford a variety of career experiences.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Curriculum

Students benefit from participating in an array of courses that allow them to gain experience and knowledge about career counseling, counseling children and adolescents as well as learning about interventions that are effective with different populations.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
School Counseling 2020-2021

Advising

Students will be assigned a faculty advisor at Orientation.

UC Advantages And Special Opportunities

Internships offer a unique experience to tailor the educational experience to the needs of the student.

Special Programs

Chi Sigma Iota is a national honor's society in Counseling and UC has an active chapter that works closely with the Counseling Program. There are opportunities to work on research projects through a competitive thesis option or independent study with faculty and doctoral students, which affords opportunities to prepare for doctoral level training or other research-practitioner positions in the field.

Admission Requirements

- Undergraduate transcript(s)
- Letters of Recommendation (3 strongly preferred, minimum of 1 required)
- Goal statement
- CV/Resume

Application Procedures:

Prospective students should complete the online application by January 15th for Fall enrollment. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted by the deadline. Incomplete applications will not be processed or reviewed.

Unofficial Transcripts:

At the time of application, please upload unofficial transcripts from all colleges and universities attended to the application.

International Student Requirements

For international admissions requirements, please visit our website.

Application Deadlines

The application deadline for Fall Semester admission to the School Counseling program is January 15th.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
This master's degree program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) and is designed around a set of core classes selected to be consistent with national accreditation standards for master's programs in school counseling, with state licensing requirements for counselors, and with university requirements for graduate programs.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Special Education

Online

Duration: 1 Year Total Credits: 30 - 38 Award: MED

Overview

Why pursue a Master of Education in Special Education?

Our online Master of Education in Special Education prepares our students to provide direct and indirect services for individuals with disabilities. Our graduates become leaders by working with many populations, which include K-12 education, rehabilitation for occupational development and daily independence, community-based case management, disability advocacy, school and individualized consultation services and various other services related to individuals with disabilities and their families. Our special education degree is 100% online, and prepares our students to have a sense of community awareness and ecologically-based service delivery to enhance and better the lives of all individuals with disabilities.

Success

Candidates who succeed in special education demonstrate:

- a history of academic success
- the ability to collaborate with others, including those from diverse populations
- leadership characteristics
- responsible, caring, fair, honest and ethical behavior
- a commitment to social justice and a diverse society
- a history of good critical thinking and problem solving
- enthusiasm for working with children and adults with disabilities
- a commitment to equity and the betterment of individuals with disabilities

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Special Education Online 2021-2022

Advising

All academic advising is conducted by program representatives that will work with each individual student to develop an appropriate academic plan according the students interests. Students have the option to complete this program in a part time or full time format.

UC Advantages And Special Opportunities

Our SPED-MED program pairs with the following graduate certificates and/or endorsements:

- PreK-12 Reading Instruction Endorsement
- Autism Spectrum Disorders Graduate Certificate
- Special Education Leadership Graduate Certificate
- Transition to Work Endorsement

All students must complete a separate admission application and complete all necessary coursework to have the certificate or endorsement added to their official transcript.

Admission Requirements

- A baccalaureate degree from a regionally accredited college or university
- Complete application package including University of Cincinnati online graduate school application.
- Statement of academic and professional goals, with a cover letter
- Resume of professional skills, educational background, and relevant work experience
- Three Letters of Recommendation
- Official transcripts of all undergraduate and graduate work
- GRE is not required; however GRE can be usedul if undergraduate GPA is below 3.0 (4.0 scale)
    - GRE scores – all three sections of the General Test taken within the last 5 years

    - Desired scores: 470 Verbal; 540 Quantitative, and 4.5 Writing (old scale) OR 151 Verbal; 147 Quantitative, and 4.5 Writing (new scale)
- Undergraduate GPA of 3.0 (4.0 scale)

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester. Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. No other verification will be accepted. Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese
- English

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

Transferring To UC

On a case-by-case basis, a student may petition to have graduate credit from an accredited college or university counted as the equivalent of another course in the curriculum and accepted as transfer credit. In such cases, a student will have to supply a course syllabus to ensure that the content in the course taken at another university is equivalent to the content of the course in the M.Ed. curriculum. A course with a similar name or the same name as a course offered at the University of Cincinnati does not necessarily mean that the content of the course is similar enough to accept it as transfer credit to our program.

Students may transfer up to *9 hours* of graduate credit in *Education* courses from an accredited college or university. Graduate courses outside of education will not be accepted. Courses taken outside an accredited college or university—such as non-credit professional development—will not be accepted. Only courses with grades of B or higher will be considered for transfer. No credit is given for previous work history. Courses taken more than 7 years prior to a student's entrance into the program will not be accepted as transfer credit.

International Student Requirements

International students are required to submit official TOEFL, TSE, and TWE scores for tests taken within the last seven years, prior to the application deadline for the term of the application. These scores must be submitted directly to the program office.

More information about these tests can be found here.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

1. Be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
2. Posting of satisfactory grades for the term of graduation.
3. Satisfactory completion of all applicable College and program requirements is provided by the major advisor filling out the Checklist for Completion of College/Departmental Requirements for Graduation and sending it to the Graduate School.
4. The final requirement for graduation is the completion of a master's research project. Specifically, the Candidate must complete a final research project as the culminating experience for the master's program. The project is completed as part of the Master's Project Guidance course. Below is a description of the master's project and the project guidance courses.

Master's Project Guidance is an online seminar course completed during a Candidate's final year of the program. These courses facilitate participants' development of skills related to critical self-reflection as individuals and as professional educators. The purpose is to support candidates in generating the first portion of a research validated (evidence-based) project that supports the academic, life-skill, occupational, and/or social/emotional development of students. The design and implementation of the master's project is one of the main outcomes of the course, including a well organized literature review reporting on the current status of literature-based knowledge about a topic. Candidates implement and collect data on the evidence-based practices in a classroom or a service-delivery context. Candidates build the necessary skills to conduct an applied evidence-based Master's project.

Health Education/Health Promotion

Duration: **2 Years** Total Credits: **42** Award: **MPH**

Overview

The Master of Public Health (MPH) program at the University of Cincinnati's (UC) is one of the largest programs of Public Health in the tri-state region. Our public health program is designed to educate students on how to promote health, prevent disease, and protect the environment of our communities, locally and beyond, through evidence-based interdisciplinary approaches in education, research, practice, and community engagement.

The MPH program offers concentrations in the following subjects:

- Biostatistics
- Epidemiology
- Environmental public health
- Health education and promotion
- Health services management
- Occupational public health

Our program offers robust training in the classroom and the field and gives students experience in policy and research opportunities.

In our master's degree, the skills gained in the UC MPH Program are recognized as being directly applicable to careers in public health worldwide. Our graduate program teaches competencies such as analyzing policies, preventing and controlling environmental hazards, and risk management, to name a few, to prepare well developed and knowledgeable graduates for a thriving career in public health.

This Health Education/Health Promotion concentration is housed in the College of Education, Criminal Justice, Human Services and Information Technolgy, and is in partnership with UC's College of Medicine and Cincinnati Children's Hospital Medical Center. Thus, providing a relevant curriculum to today's public health needs and crisis from professionals and academics in the field.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Graduates of this program are eligible to sit for the Certified Health Education Specialist (CHES) exam offered by the National Commission for Health Education Credentialing (NCHEC).

Curriculum Guide Versions:
MPH Health Education/ Health Promotion Effective Fall 2025

UC Advantages And Special Opportunities

This program offers opportunities to interact with our internationally recognized faculty and leading public health professionals in the Cincinnati Children's Hospital Medical Center, UC Health network, Environmental Protection Agency (EPA), the National Institute for Occupational Safety and Health (NIOSH), regional and local health departments, and more. Additionally, the UC MPH program offers a robust training in the field. You will gain experience in policy and research and be prepared to evaluate, preserve, and improve different aspects of the public's health. The learning environment is experiential so that students are immersed in the realities of public health practice. In the classroom, students are taught the principles of the five disciplines comprising public health by active public health faculty researchers and practitioners. Enhancing and supporting this classroom work are both a practicum and a culminating experience at a public health associated agency. These required experiences can be completed at either a health department or associated public health related organization directly addressing the health of the public.

Admission Requirements

In making admissions decisions, the admissions committee takes into account many different factors and qualities presented by each applicant.

Other specific requirements include:

- GPA of 3.0 or higher

- Bachelor's degree from an accredited institution
- Official GRE, GMAT, or MCAT scores in the 50th percentile or higher

MPH Admissions Process

When applying, please note:

First, submit your SOPHAS application. After your SOPHAS application is complete and verified, you will receive an email from University of Cincinnati Graduate Admissions with further instructions to complete the application process.

Step 1: Apply to SOPHAS

Apply to SOPHAS for admission to the University of Cincinnati MPH Program. You will need to select your concentration area of interest and pay the SOPHAS application fee. **[Required]**

You will need the following to complete your SOPHAS application:

- CV or resume
- Statement of Purpose and Objectives
- Unofficial transcripts for ALL higher education institutions attended; *International transcripts must be evaluated by WES
- Three Letters of Recommendation
- GRE, GMAT, and/or MCAT scores

You must send the following documents directly to SOPHAS for verification:

- Three Letters of Recommendation
- GRE, GMAT, and/or MCAT scores (**UC SOPHAS CODE: 7479**)
  - MCAT scores can be sent directly to SOPHAS by choosing SOPHAS.
- For international students, official TOEFL or IELTS scores (**SOPHAS CODE: 5688**)

Step 2: Pay the UC Application Fee [Required]

After your SOPHAS Application is submitted, you will receive an email from UC Graduate Admissions with instructions on how to complete the application process and pay your UC application fee (*required*).

Health Education/Health Promotion

MPH

MPH Health Education/ Health Promotion Effective Fall 2025

Duration: 2 Years

★Minimum Credits: 42 Credits

Required Master of Public Health Courses

Courses listed below are required for all MPH students. (19 credit hours)

MPH Core Courses

Course	Title/Desc	Credit
PH7010	Biostatistics for Public Health (B- min)	3
PH7012	Introduction to Qualitative Methods (B- min)	1
PH7020	Environmental Public Health (B- min)	3
PH7030	Epidemiology for Public Health (B- min)	3
PH7060	Health Systems & Policy (B- min)	3
PH7070	Leadership, Communication, and Systems Thinking in Public Health Management (B- min)	3
HPE7040	Social and Behavioral Foundations of Public Health (B- min)	3

Applied Practice Experience

The typical Applied Practice Experience will occur at a public health agency, healthcare related agency, or associated health and human services agency with the student supervised on-site by a qualified preceptor. The site will be selected by the student from a listing of available, approved sites within their concentration of choice and must be approved by the course director. A total of 120 supervised hours under the direction of an approved preceptor are required to fulfill the MPH Applied Practice Experience.

Course	Title/Desc	Credit
PH9010	Applied Practice Experience (B- min)	2

Integrated Learning Experience

Students must choose between a Capstone or Thesis option to fulfill this requirement.

Course	Title/Desc	Credit
PH9020	Integrated Learning Experience (B- min)	3

Required Master of Public Health Education/Health Promotion Concentration Courses

Courses listed below are required for all MPH - Health Education/Health Promotion students. (15 credit hours)

Concentration Courses

Course	Title/Desc	Credit
HPE7011	Foundations of Health Promotion and Education (B- min)	3
HPE7012	Health Promotion and Education Program Planning (B- min)	3
HPE7013	Health Promotion and Education Measurement and Evaluation (B- min)	3
HPE7014	Grant Writing and Resource Development (B- min)	3
HPE7015	Community Organization and Program Management (B- min)	3

Master of Public Health Health Education/Health Promotion Elective Courses

MPH - Health Education/Health Promotion students should select a minimum of 3 credit hours from the following:

Master of Public Health Health Education/Health Promotion Elective Courses

Course	Title/Desc	Credit
HPE6XXX+ PH6XXX+	Master of Public Health Health Education/Health Promotion Elective Courses	3

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Behavior Analysis

Online

Duration: 2 Years Total Credits: 36 Award: MS

Overview

The online Master of Science in Behavior Analysis program focuses on providing students with the core knowledge and skills to serve individuals with behavioral and learning challenges across multiple settings including clinics, schools, residential facilities, and in-home. An emphasis is placed on ethical and professional behavior, data collection and analysis, use of valid and reliable assessment tools, and selection and implementation of empirically supported, evidence-based interventions.

Students earning their M.S. in Behavior Analysis will develop and enhance skills that allow them to most effectively assist clients with behavioral and cognitive challenges so they may have greater independence and access to more activities and opportunities. An emphasis will be placed on collaboration with caregivers and other professionals who work with these clients to develop plans that allow for the most benefit.

The program is designed for individuals who currently or intend to work in the field of behavior analysis or a closely related field where behavior-analytic principles are frequently applied and are seeking coursework that makes them eligibile for Board Certified Behavior Analyst (BCBA) certification. Students in the program will need to have supervision from a BCBA and be accruing the necessary hours of supervised field experience required to sit for the BCBA examination.

Prospective students who are not seeking BCBA certification should enroll in the 30 credit M.Ed. in Foundations in Behavior Analysis program.

Career

The field of behavioral analysis is experiencing significant growth, creating a wealth of new and exciting career opportunities. The job outlook is highly favorable for those with a master's degree in applied behavior analysis (ABA) due to an ongoing shortage of qualified behavior analysts.

The BACB's Employment Demand Report shows that the nationwide demand for individuals with BCBA or BCBA-D certification has risen consistently each year since 2010, with a 14% increase from 2022 to 2023. The Master of Science in Behavior Analysis program is designed for those looking to obtain advanced knowledge and skills in behavior analysis and advance professionally.

Graduates may apply their skills and knowledge across a diverse range of career fields, including those listed below. Note that some positions may require additional degrees and/or certification/licensure in specific fields beyond behavior analysis.

· Board Certified Behavior Analyst

· Mental Health

· Social Work

· Speech Pathology

· Substance Abuse

· Research

· Education

· Criminal Justice

· Human Resources

· Business

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn

whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Curriculum Guide Versions:
MS, Behavior Analysis - Updated 2025

Advising

Students enrolled in the online master's degree program receive support from the very first moment they inquire about the program through graduation. An Enrollment Advisor is available to answer questions and guide future students through the application process. Once a student is accepted into the program, a Student Success Coordinator works directly with the student to register for courses, acquire the appropriate course materials & textbooks, and keep students informed about graduation and other topics relevant to the program.

UC Advantages And Special Opportunities

The program is grounded in the ethical and best practices recommended by the Behavior Analyst Certification Board and is designed to expand students' skills in the core competencies of applied behavior analysis.

- The program addresses a wide array of behaviors associated with a variety of disability categories in both educational and clinical settings.
- The program addresses the specific and comprehensive use of learning principles, such as operant and respondent learning. It also has an emphasis on prevention and early intervention.
- Coursework will provide students with the required knowledge in core areas of behavior analysis including:

- Behavioral assessment

- Functional behavior assessment/analysis

- Intervention for academic and behavior problems

- Data-based decision making and single-case design research methodology

- Ethical standards for practice

Admission Requirements

- Bachelor's degree in a related field from an accredited university
- 3.0 GPA (on a 4.0 scale) or higher from all previous undergraduate and graduate coursework
- Resume or CV
- Academic Transcripts
- Goal Statement - Applicants will need to detail their interest in the program and how it may match future professional goals. Applicants are encouraged to discuss any relevant experience with applied behavior analysis or related fields such as education and psychology.
- Two letters of recommendation - at least one letter should speak to the applicant's previous academic achievement and potential for success with graduate work
- Agreement from BCBA credentialed supervisor who will provide on-site supervision for the program required field experience

International Student Requirements

International students must prove English proficiency prior to being admitted. English proficiency can be documented in several ways. The most common way is by providing a Test of English as a Foreign Language (TOEFL) score. The TOEFL score must meet University, College, and Departmental requirements prior to being admitted including minimum scores of 580 (paper test), 237 (computer test), and 92 (internet test).

English proficiency can also be documented with a 6.5 overall band score on the International English Language Testing System (IELTS) test. English proficiency can further be demonstrated with a 54 on the PEARSON Test of English (PTE) or a 110 on the Duolingo English Test (DET). Finally, English proficiency can be demonstrated by completing a bachelor's degree at an English-speaking college/university or by completing Level 112 of English instruction at ELS Language Centers.

Graduation Requirements

In order to complete the online master's degree program, a student must:

· Complete all required coursework and program requirements.

· Obtain at least a 3.0 university grade point average (on a 4.0 scale).

· Be in good academic standing; that is, not on academic or disciplinary probation or suspension.

· Complete the master's portfolio project.

Application Deadlines

Fall - August 1

Criminal Justice

Online

Duration: 1 Year Total Credits: 30 Award: MS

Overview

Why pursue a Master of Science in Criminal Justice online?

The online Master's program in Criminal Justice involves a comprehensive 10 course curriculum. This curriculum is designed for Criminal Justice professionals seeking to advance their career to the next level. This program was created for graduate students to aid them in identifying current trends in corrections, policing, criminology, and law enforcement administration.

The University of Cincinnati's online Master's in Criminal Justice program is ranked 13th best in the country, and our School of Criminal Justice is consistently ranked among the top 15 Best Criminal Justice Schools by U.S. News & World Report.

Our program offers four distinct concentrations so that you can focus your master's degree in an area of criminal justice that is most relevant to you:

Administration and Leadership

The Administration and Leadership concentration is specifically designed to support individuals who serve in leadership roles or wish to be elevated to those roles. The program offers a series of courses related to data driven criminal justice policy, effective organizational management, and offers elective options related to leadership and grant writing, among others.

Analysis of Criminal Behavior

The Analysis of Criminal Behavior concentration focuses on the various types of criminal offenders and methods of criminal offending. Designed for students who want to deepen their understanding of the bio-social factors that differentiate serious criminal offenders from other people, this concentration also provides students with an in-depth grasp of specialized forms of criminal behavior.

Corrections and Offender Rehabilitation

The Corrections and Offender Rehabilitation concentration is ideal for individuals looking to start or enhance their career in corrections and make a positive change in the lives of convicted men and women, and adjudicated juveniles. The program offers a series of courses that focus primarily on rehabilitating and treating criminal offenders; the comprehensive curriculum covers the theoretical and philosophical frameworks of corrections, as well as the theory and practice of community corrections and latest developments in offender rehabilitation. The material within this concentration also addresses the pressing matter of dealing with special populations such as youths, the addicted, and the mentally ill.

Law Enforcement & Crime Prevention

The Law Enforcement & Crime Prevention concentration is specifically designed to supply individuals with a strengthened knowledge of the intricacies and fundamentals of law enforcement and crime prevention. The curriculum provides students access to a diverse set of core courses dealing with basic theories and practices, while additional elective courses give students the opportunity to focus on other topics of interest, such as applied crime prevention and police effectiveness.

Success

Master's degree students in criminal justice will leave the program with a broad understanding of crime as well as the different parts of the justice system. Students should become adept at understanding research-based knowledge and how it might apply to real-world situations. Although students follow a variety of career paths. The skills learned in the program will help students in information processing and problem solving regardless of the path that they use.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

This curriculum information is intended as a general information guide for students considering enrollment in this program. These online tools are designed to assist you, but are not a substitute for planning with an academic or faculty advisor.

Advising

For all advising questions, please contact Luahna Winningham Carter.

UC Advantages And Special Opportunities

- Ten total courses (30 semester hours): Graduate in as few as two years of dedicated part-time study or one year of full-time study
- Take only one course at a time in the part-time program (two courses in the full-time program)
- Access courses and assignments any time, 24 hours a day, from any computer in the world
- Curriculum that combines cutting-edge theory with real-world application
- Three enrollment periods each year: fall, spring, and summer
- Receive the same degree on-campus students receive
- All courses taught by full-time University of Cincinnati faculty from the School of Criminal Justice

Admission Requirements

Admission into the University of Cincinnati's Master of Science in Criminal Justice online program is selective and based on meeting the requirements outlined below. A background in criminal justice is not required for this program.

- Bachelor's Degree (in any field of study) from an accredited university
- An overall 3.0 GPA (on a 4.0 scale) or higher from all previous undergraduate coursework. An overall 2.75 GPA will be considered for acceptance with at least one of the following:
  - Five years of criminal justice work experience (does not include social work)
  - Nine hours of graduate coursework with a 3.0 GPA or higher from an accredited college or university
  - A minimum combined score of 300 on the verbal and quantitative parts of the Graduate Record Exam (GRE), taken within five years of your application.
- At least two professional or academic letters of recommendation from individuals you have known for a minimum of one year

Application Deadlines

Applications are accepted continuously throughout the year, with three deadlines depending on the term in which you wish to begin enrollment:

- Fall Semester - August 1
- Spring Semester - December 6
- Summer Semester - April 28

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Criminal Justice

Duration: **1 Year** Total Credits: **30** Award: **MS**

Overview

Why pursue a Master of Science in Criminal Justice?

For many career paths in criminal justice, a graduate degree is becoming a standard requirement. Whether you currently work in or strive to enter law enforcement, crime prevention, corrections, or criminal justice, the Master of Science in Criminal Justice graduate program at the University of Cincinnati can help you advance. You will gain research-based knowledge from an interdisciplinary perspective, drawing insights from sociology, law, public administration and criminal justice fields. The program emphasizes the role of research in policy-making and practice as well as theoretical and research skills. Graduates leave the program with a broad understanding of crime as well as different parts of the justice system.

The University of Cincinnati's Master of Science in Criminal Justice curriculum is structured to meet four objectives:

- Provide students with the conceptual and research skills needed to undertake advanced analyses of the criminal justice system.
- Furnish law enforcement, corrections, and court practitioners with knowledge of justice administration, social science perspectives of human behavior, policy analysis, and criminal justice theory.
- Train those who will become leaders in the criminal justice system by providing the skills needed to upgrade levels of professional practice, improve supervisory standards, initiate fresh perspectives, and act as agents of social change.
- Prepare social scientists to pursue careers in university and research settings.

Success

Master's degree students in Criminal Justice will leave the program with a broad understanding of crime as well as the different parts of the justice system. Students will become adept at understanding research-based knowledge and how it applies to real-world situations. Although students follow a variety of career paths, the skills learned in the program will help them in information processing and problem-solving regardless of their chosen career.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

The Master of Science curriculum requires 30 total credit hours and is divided into four main areas. First, the four courses in the Core are aimed at establishing the conceptual basis for understanding crime and criminal justice, and provide grounding in research methods and statistics. Second, students select a concentration in one of three areas: *Corrections; Crime, Law and Justice; or Law Enforcement/Crime Prevention*. Third, flexibility in the program is allowed through elective coursework. Finally, as the Culminating Experience in the program, students have the choice of completing either a Demonstration Project or taking a Comprehensive Examination.

Advising

For advising questions, please contact Betsy Yeakle at betsy.yeakle@uc.edu.

UC Advantages And Special Opportunities

Students admitted to the on-campus Master's program are eligible to receive Graduate Scholarships that fund tuition up to 100 percent.

Admission Requirements

Prospective students will complete the UC Graduate School online application for admission. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Full-time students are generally admitted only for Fall Semester. We accept part-time students on a limited basis for both Fall and Spring Semester.

Admission requirements include:

- A baccalaureate degree (any major) from an accredited institution
- A minimum undergraduate grade point average of 3.0 (on a 4.0 scale)
- At least two (2) letters of recommendation
- A personal statement describing relevant qualifications, goals, and program fit

Additional requirements for International applicants:

- Fulfillment of the English proficiency requirement
- Submission of a NACES member transcript evaluation at the time of application

Application Deadlines

The application deadline for Fall Semester admission to the on-campus master's program is July 1.

Review of completed applications typically begins in early February. For best consideration, please apply by February 1.

Criminal Justice

Online

Duration: 1 Year Total Credits: 30 Award: MS

Overview

Why pursue a Master of Science in Criminal Justice online?

The online Master's program in Criminal Justice involves a comprehensive 10 course curriculum. This curriculum is designed for Criminal Justice professionals seeking to advance their career to the next level. This program was created for graduate students to aid them in identifying current trends in corrections, policing, criminology, and law enforcement administration.

The University of Cincinnati's online Master's in Criminal Justice program is ranked 13th best in the country, and our School of Criminal Justice is consistently ranked among the top 15 Best Criminal Justice Schools by U.S. News & World Report.

Our program offers four distinct concentrations so that you can focus your master's degree in an area of criminal justice that is most relevant to you:

Administration and Leadership

The Administration and Leadership concentration is specifically designed to support individuals who serve in leadership roles or wish to be elevated to those roles. The program offers a series of courses related to data driven criminal justice policy, effective organizational management, and offers elective options related to leadership and grant writing, among others.

Analysis of Criminal Behavior

The Analysis of Criminal Behavior concentration focuses on the various types of criminal offenders and methods of criminal offending. Designed for students who want to deepen their understanding of the bio-social factors that differentiate serious criminal offenders from other people, this concentration also provides students with an in-depth grasp of specialized forms of criminal behavior.

Corrections and Offender Rehabilitation

The Corrections and Offender Rehabilitation concentration is ideal for individuals looking to start or enhance their career in corrections and make a positive change in the lives of convicted men and women, and adjudicated juveniles. The program offers a series of courses that focus primarily on rehabilitating and treating criminal offenders; the comprehensive curriculum covers the theoretical and philosophical frameworks of corrections, as well as the theory and practice of community corrections and latest developments in offender rehabilitation. The material within this concentration also addresses the pressing matter of dealing with special populations such as youths, the addicted, and the mentally ill.

Law Enforcement & Crime Prevention

The Law Enforcement & Crime Prevention concentration is specifically designed to supply individuals with a strengthened knowledge of the intricacies and fundamentals of law enforcement and crime prevention. The curriculum provides students access to a diverse set of core courses dealing with basic theories and practices, while additional elective courses give students the opportunity to focus on other topics of interest, such as applied crime prevention and police effectiveness.

Success

Master's degree students in criminal justice will leave the program with a broad understanding of crime as well as the different parts of the justice system. Students should become adept at understanding research-based knowledge and how it might apply to real-world situations. Although students follow a variety of career paths. The skills learned in the program will help students in information processing and problem solving regardless of the path that they use.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

This curriculum information is intended as a general information guide for students considering enrollment in this program. These online tools are designed to assist you, but are not a substitute for planning with an academic or faculty advisor.

Advising

For all advising questions, please contact Luahna Winningham Carter.

UC Advantages And Special Opportunities

- Ten total courses (30 semester hours): Graduate in as few as two years of dedicated part-time study or one year of full-time study
- Take only one course at a time in the part-time program (two courses in the full-time program)
- Access courses and assignments any time, 24 hours a day, from any computer in the world
- Curriculum that combines cutting-edge theory with real-world application
- Three enrollment periods each year: fall, spring, and summer
- Receive the same degree on-campus students receive
- All courses taught by full-time University of Cincinnati faculty from the School of Criminal Justice

Admission Requirements

Admission into the University of Cincinnati's Master of Science in Criminal Justice online program is selective and based on meeting the requirements outlined below. A background in criminal justice is not required for this program.

- Bachelor's Degree (in any field of study) from an accredited university
- An overall 3.0 GPA (on a 4.0 scale) or higher from all previous undergraduate coursework. An overall 2.75 GPA will be considered for acceptance with at least one of the following:
  - Five years of criminal justice work experience (does not include social work)
  - Nine hours of graduate coursework with a 3.0 GPA or higher from an accredited college or university
  - A minimum combined score of 300 on the verbal and quantitative parts of the Graduate Record Exam (GRE), taken within five years of your application.
- At least two professional or academic letters of recommendation from individuals you have known for a minimum of one year

Application Deadlines

Applications are accepted continuously throughout the year, with three deadlines depending on the term in which you wish to begin enrollment:

- Fall Semester - August 1
- Spring Semester - December 6
- Summer Semester - April 28

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Exercise and Sport Science

Online

Duration: 1 Year Total Credits: 30 Award: MS

Overview

The Online Master of Science in Exercise and Sport Science (MSESS) from the School of Human Services at the University of Cincinnati is designed for health and human performance professionals, offering a flexible, 1- and 2-year completion timeline, perfect for those balancing education with a career.

Our curriculum emphasizes current research and advancements in exercise and sport science, offering specialized coursework for an in-depth understanding of human performance and pathophysiology. This immersive learning experience equips practitioners and industry professionals with the latest insights to advance in their fields.

Graduates gain advanced skills and knowledge, positioning them for top certifications such as:

- National Strength & Conditioning Association (NSCA) Certified Strength and Conditioning Specialist (CSCS)
- NSCA Certified Performance and Sport Scientist (CPSS)
- American College of Sports Medicine Exercise (ACSM) Exercise Physiologist (ACSM-EP)
- ACSM Clinical Exercise Physiologist (ACSM-CEP)

Elevate your career in health and human performance with our MSESS program. Apply now to expand your expertise and impact in the field.

Success

Successfully completing the MSESS degree equips students with advanced knowledge and skills, enhancing their ability to progress in or enter the fields of strength and conditioning, sports science, exercise and health. Leveraging Cincinnati's extensive network of health and fitness professionals, graduates gain access to a diverse range of career opportunities, from clinical roles in hospitals to positions in strength and conditioning.

The program's online format provides the flexibility needed for professionals to continue working while advancing their education, accommodating varied work-life schedules. Targeted primarily at UC exercise science graduates, strength and conditioning coaches, military personnel, performance coaches, fitness specialists, and health professionals like nurses, the MSESS degree serves as a critical steppingstone for those seeking to deepen their expertise or launch their careers in exercise-related settings.

Career

Graduates of the MSESS program can pursue a wide array of careers within the expansive network of health and fitness professionals in the Cincinnati area and beyond. Moreover, the MSESS degree provides a strong foundation for those interested in pursuing research careers, either in clinical settings or within the private sector, contributing to the advancement of exercise science and health promotion.

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

MS Exercise & Sport Science - Updated Fall 2025

Advising

Students enrolled in the online Master of Science in Exercise and Sport Science (MSESS) degree will benefit from a comprehensive advisory and mentorship framework, guided by the experienced members of UC Online and our dedicated faculty. Throughout the curriculum in the MSESS program, students have the option to work with a faculty mentor who specializes in their area of interest, ensuring personalized mentorship that aligns with their professional goals and academic needs.

This mentorship will be supplemented by the support from UC Online advisors, who will assist with navigating the online learning environment, managing course selections, and optimizing the overall educational experience. Our commitment to individualized attention and expert guidance underscores our dedication to fostering the success and growth of each student within the MSESS program.

UC Advantages And Special Opportunities

The UC Advantage for the Master of Science in Exercise and Sport Science program is significantly enhanced by its faculty's extensive expertise in sports science, exercise physiology, and blood flow and vascular research, along with robust collaborations with UC athletics, UC Health, and the broader community. This interdisciplinary approach ensures that students receive a rich and diversified learning experience, reflecting the latest advancements and practices in the field.

While the program's online delivery model provides flexibility and accessibility, eliminating the need for physical attendance or specialized equipment, MSESS students also have the unique opportunity to access two advanced human performance laboratories located within the Teachers-Dyer Complex. This access fosters a hands-on learning environment, allowing students to apply theoretical knowledge in practical settings and engage in transdisciplinary research, further enhancing the UC Advantage.

Admission Requirements

1. Bachelor's Degree in a related field (with a cumulative GPA of a 3.00 or higher). If a student has a bachelor's degree in an unrelated field, they must show evidence that the following courses were taken and passed: Anatomy and Physiology and Exercise Physiology.

2. Unofficial transcripts

3. Resume/CV

4. One (1) letter of recommendation

International Student Requirements

For international admissions requirements, please visit our website.

Graduation Requirements

Students must maintain a minimum 3.0 GPA throughout their graduate coursework to graduate. The program consists of 30 credits, including 21 core curriculum credits and 9 elective credits from approved UC online courses.

For the culminating experience in their final semester, students will undertake a 3-credit Applied Experience in Exercise and Sport Science, choosing between an internship or a capstone research project. Internship participants must complete at least 100 hours at an approved site, along with a portfolio and presentation showcasing their mastery of key competencies. Capstone project students will apply research skills to design or enhance a program for a specific population, demonstrating practical application of the program's core concepts.

Health and Wellness Management

Online

Duration: 1 Year Total Credits: 30 Award: MS

Overview

The Master of Science in Health and Wellness Management program at the University of Cincinnati provides graduates with the skills and knowledge needed to advance in various health wellness careers upon graduation. The program offers a robust core along with a wide range of interdisciplinary elective options, designed to allow each student to select classes that meet their personal and professional goals in health promotion and wellness career opportunities.

Our online health and wellness master's degree focuses on integrating leadership and innovation concepts, health and wellness research, and coaching skills to prepare students for a role in directing wellness programs, coaching in an individual or group setting, and more. This degree will prepare students to pursue the Certified Wellness Practitioner (CWP) credential through the National Wellness Institute (NWI).

Admitted students can complete the program in one year if the student is enrolled full-time. Part-time options are also available.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum Guide Versions:
Master of Science (M.S.) in Health and Wellness Management - Updated Spring 2025

Admission Requirements

Admission Criteria:

1. Earned bachelor's degree from a regionally accredited college/university in Exercise Science, Public Health, Health Science, or related field, or show evidence of undergraduate coursework in areas such as health promotion/disease prevention, wellness, or anatomy and physiology. Applicants with relevant work experience or nationally-accredited health/fitness certifications are also encouraged to apply, and should list this information in their CV/Resume.

2. 3.0 undergraduate GPA or foreign equivalent.

3. Proof of English proficiency if English is not the applicant's native language.

In addition to these minimum requirements, applicants will need to submit:

1. Application
   - Application for Admission: Choose "Online, Master in Science Health and Wellness Management" on the application
2. Letters of Recommendation
   - Two letters of recommendation. At least one should be a professional contact, and the other can be academic. Please note that the name and email address of each recommender is required.
3. Goal Statement
   - Please prepare a statement-of-purpose essay explaining in less than 500 words how the MS Health and Wellness Management program will further your career goals.
4. Resume
   - Current resume or CV
5. Transcripts
   - Unofficial school transcripts are required for the application, including University of Cincinnati transcripts.
     *Once accepted, applicants will need to send official transcripts to grad.info@uc.edu OR the following physical address:
     Graduate School at the University of Cincinnati
     110 Van Wormer Hall
     P.O. Box 210627
     Cincinnati, OH 45221-0627
6. International Student Requirements

- An official TOEFL/IELTS is required for all international applicants. International applicants must also submit foreign transcripts for evaluation to an agency recognized by the National Association of the Credential Evaluating Services (NACES: www.naces.org).

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 3.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

The online M.S. in Health and Wellness Management program offers three start dates, providing flexibility to students year-round.

Fall Semester

- Application Deadline: August 1
- Confirmation Deadline: August 15

Spring Semester

- Application Deadline: December 10
- Confirmation Deadline: January 1

Summer Semester

- Application Deadline: April 15
- Confirmation Deadline: May 1

Information Technology

Online

Duration: 2 Years Total Credits: 30 Award: MS

Overview

Information Technology (IT) is one of the fastest growing disciplines in graduate education today. The reason is simple - every industry needs IT. We live in a networked, electronic world and rely on always available, secure systems to live, work, and play. We have electronic classrooms, health records, manufacturing, etc. The field of IT is responsible for building, managing, and securing these global systems. There is no other field of study that cuts through so many domains and has such an impact on the world.

UC's online Master of Science in Information Technology gives you the hands-on skills to immediately solve problems in all of these industries. Mobile and social applications and security are the top industry concerns today. With our world increasingly becoming electronic, we must work within mobile and social networks and secure all of the information transferred and stored every day. The online MSIT program offers coursework in cybersecurity, IT infrastructure, mobile development, and human computer interatction to prepare students to secure software applications, networks, and systems or transform our digital lives. These skills are a vital part of every organization.

A campus-based master's program in Information Technology is also available. For more information about the campus-based Master's in Information Technology click here.

Success

We value work experience and hands-on learning as well as scholarly research so we offer the master's program as a thesis or capstone-based program. With the capstone-based program you can work with the award winning faculty to build an IT solution that will solve a fundamental issue and springboard your career or start you on your way to build a new business. With the thesis program, you can work with the award winning and attentive faculty to research and develop new ideas and solutions for the IT field and contribute to publications and national organizations. Either way, you will be recognized as an expert in the IT field. If you are the type of person who loves solving problems, thrives in fast paced learning environments, and wants to make a positive impact on the world, this is the degree for you.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Advising

Lauren Kirgis

CECH-Information Technology
Teachers Dyer Complex
Cincinnati OH 45219
Call: (513)558-4184
E-mail: kirgisle@ucmail.uc.edu

Admission Requirements

1. A baccalaureate degree from a college or university by a regional or general accrediting agency.
2. At least a B average (3.0/4.0 system) in undergraduate course work. If the applicant has a lower GPA, they must either give evidence of promise that is judged satisfactory by the admitting program and the Graduate School or complete 12 credit hours of specified IT bridge courses with a 3.0 GPA prior to admission into the program.
3. Transcripts of all college or university grades. Note: for the application you may upload unofficial transcripts; however, if admitted, you will need to submit your official transcripts.
4. Current resume or curriculum vitae
5. Three letters of reference from individuals who know you professionally or academically
6. A personal statement
7. GRE is waived for qualified applicants

Changing Majors Within UC

Transferring or waiving credit hours from other UC or outside graduate programs is highly unlikely. But students may waive the bridge or prerequisite courses with exceptional work experience in the IT fields. Please consult with the graduate director and coordinator for waiving courses and transfer of graduate credits.

International Student Requirements

1. A baccalaureate degree from a college or university by a regional or general accrediting agency.
2. At least a B average (3.0/4.0 system) in undergraduate course work. If the applicant has a lower GPA they must either give evidence of promise that is judged satisfactory by the admitting program and the Graduate School or complete 12 credit hours of specified IT bridge courses with a 3.0 GPA prior to admission into the program.
3. Transcripts of all college or university grades. Note: for the application you may upload unofficial transcripts; however, if admitted you will need to submit your official transcripts.
4. Current resume or curriculum vitae
5. Three letters of reference from individuals who know you professionally or academically
6. A personal statement
7. GRE is waived for qualified applicants
8. Most international students must submit an official English proficiency score: TOEFL minimum Paper-based 520, Computer-based 190, Internet-based 80 or IELTS minimum 6.5. To determine if the English proficiency test is required, please see here.

Graduation Requirements

To complete the program, the student must complete the required 30 graduate credit hour in consultation with a faculty advisor. All required courses must be completed within a three-year period from the date of acceptance into the program. Students who are conditionally admitted should also complete the bridge or prerequisite courses prior to taking the MSIT courses. Students need to maintain a GPA of 3.0 to stay and graduate from the MSIT program. Students will retake a course if he or she receives a grade below C. All required courses must be completed within a three-year period from the date of acceptance into the program.

Application Deadlines

Fall Enrollment- August 1

Information Technology Online 2024-2025

Duration: 2 Years

★Minimum Credits: 30 Credits

Bridge Classes

Prerequisite courses may be required for students with a low undergraduate GPA and/or no background in IT. Students should refer to their offer letter to determine if any bridge courses are required. These courses will not count as electives.

Course	Title/Desc	Credit
IT6035C	Information Security and Assurance (B min)	3
IT6060C	Database Management with SQL Server (B min)	3
IT6081C	System Administration (B min)	3
IT6090C	Computer Programming with Java (B min)	3

Core Classes

Students in their first semester are advised to take a maximum of 4 courses (12 credit hours). Priority courses in this first semester should be IT7001 (IT Seminar) and IT7010C (Information Technology Research Methods). IT7040C (Human Computer Interaction

Course	Title/Desc	Credit
IT7001	Information Technology Graduate Seminar	3
IT7010C	Information Technology Research Methods	3
IT7040C	Human Computer Interaction and Usability	3

Thesis Track

Students wishing to switch to thesis-track must identify a graduate faculty member to serve as an advisor for the thesis and then work with that faculty member to refine the thesis topic before completing and submitting Form A to the SoIT Grad Office 2-3 semesters before graduating. Starting the thesis often does not correspond with the timing of enrolling in thesis credit hours, as it typically takes 3 semesters or more to write a publication-quality thesis. 6 credit hours of IT8020 may be split between the final two semesters or all 6 credit hours may be taken in the final semester when the student will defend their thesis.

Electives

Students are encouraged to select coursework appropriate for their academic interests based on the topic they will write about in their capstone project or thesis. No more than 6 credit hours outside the IT discipline are applicable to the degree program. (15 credit hours)

Information Technology

Duration: **2 Years** Total Credits: **30** Award: **MS**

Overview

Are you ready to advance your career in one of the fastest-growing fields? The University of Cincinnati's School of Information Technology (SoIT) offers a Master of Science in Information Technology designed to equip you with the hands-on skills needed to tackle real-world challenges.

Why Choose UC's Master's Program in Information Technology?

- **Comprehensive Curriculum**: Our program covers essential areas such as cybersecurity, IT infrastructure, mobile development, and human-computer interaction.
- **Real-World Application**: Gain practical experience and develop solutions that connect people, information, and technology.
- **Career-Ready Skills**: Learn to secure software applications, networks, and systems, preparing you for a successful career in IT.
- **Masters-to-Tech-Industry Transition Program:** Receive specialized support in tailoring your resume to the IT industry, gain access to our extensive co-op database, and explore opportunities to partner with industry leaders on a capstone project.

Program Highlights

- **Cybersecurity**: Protect and secure digital assets.
- **IT Infrastructure**: Build and manage robust IT systems.
- **Mobile Development**: Create innovative mobile applications.
- **Human-Computer Interaction**: Enhance user experience and interface design.
- **Cloud Computing:** Develop and deploy scalable and reliable cloud-based solutions.

Success

The Master of Science in Information Technology (MSIT) program values work experience, hands-on learning, and scholarly research work. Students choose to complete a capstone or a thesis as part of their MSIT program requirements. With the capstone-based program, students have the opportunity to work with award-winning faculty to build an IT solution. With the thesis-based program, students can work with award-winning and attentive faculty to research and develop new ideas for the IT field.

An online master's program in Information Technology is also available.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Information Technology On Campus 2024-2025

Advising

SoIT Graduate Office

Contact Us

CECH-Information Technology

Suite 250, Teachers Dyer Complex

Cincinnati, OH 45219

Admission Requirements

The admission requirements are:

- A bachelor's degree from a college or university regarded as standard by a regional or general accrediting agency ***

    - Unofficial transcripts must be uploaded from all universities attended
    - *For international applicants:* Submission of a transcript evaluation by a NACES member is **highly recommended** in place of the unofficial transcript(s) to reflect both a converted GPA (on a 4.0 scale) as well as the US equivalence of the degree earned.
- At least a B average (3.0/4.0 scale) in undergraduate course work; if the cumulative GPA is below 3.0, a minimum GRE score of 300 is required
    - 3.0+ Analytical; Verbal and Quantitative scores must be 150+ each
- Current curriculum vitae (CV) or resume
- Three academic or professional letters of reference
    - References should be from credible sources who speak to relevant IT experience and/or work ethic; two or more reference letters should be on letterhead.
- Applicants will be required to craft a response [500 words or less] to three essay prompts addresing career goals and readiness and aptitude for IT coursework/ graduate-level study.

***If an applicant's prior degree is not in a computing discipline such as technology, engineering, and sciences, the applicant is required to demonstrate IT skills through work experience and relevant IT industry-related certificates. A holistic review will be conducted to determine if a student is prepared to be successful in the MS IT program. Applicants who do not have a computing background or relevant prior experience will be required to complete bridge coursework in one or more of the following areas: information security, database management, system administration, and/or programming.

Boost Your Application with Industry-Recognized Certifications:

Holding a recognized technical industry certification gives your application a significant advantage. These certifications are not merely attendance-based; they require passing rigorous exams that validate your expertise in specific IT skills and knowledge.

Examples of qualifying certifications:

- CompTIA A+ (general IT technical support)
- Cisco Certified Network Associate (CCNA) (networking)
- $(ISC)^2$ Certified Information Systems Security Professional (CISSP) (cybersecurity)
- Project Management Institute (PMI) Project Management Professional (PMP) or Certified Associate in Project Management (CAPM) (project management)
- Microsoft Certified: Azure Administrator Associate (cloud computing)

Transferring To UC

Transferring or waiving credit hours from other UC or outside graduate programs is highly unlikely. But students may have the bridge or prerequisite courses waived with exceptional work experience in the IT fields. Please consult with the graduate director and coordinator for waiving courses and transferring graduate credits.

International Student Requirements

The following exams and minimum scores are accepted as proof of English proficiency:

- TOEFL: minimum score of 80 iBT
- IELTS: minimum score of 6.5 overall band
- Duolingo (DET): minimum score of 110
- PTE: minimum score of 54

Note: If you are an international student, please include your converted GPA using the WES iGPA Calculator in addition to your non-converted GPA and class (if applicable), as well as the country where you received your degree.

Graduation Requirements

To complete the program, the student must complete 30 graduate credit hours in consultation with a faculty advisor. Students who are conditionally admitted should also complete the bridge or prerequisite courses prior to taking the MSIT courses. Students need to maintain a GPA of 3.0 to stay in and graduate from the MSIT program. Students will retake a course if he or she receives a grade below C. All required courses must be completed within a three-year period from the date of enrollment in the program.

Application Deadlines

Fall Application Deadlines:

- International applicants: March 3 at 11:59 pm US Eastern Time

- Domestic applicants: June 1 at 11:59 pm US Eastern Time
  - **Priority Application Deadline #1**: November 1st, 11:59 pm US Eastern Time (Decisions released in early December)
  - **Priority Application Deadline #2**: January 15th, 11:59 pm US Eastern Time (Decisions released in mid-February)
- Applicants who apply after both priority deadlines will receive admission decisions in early April (for international applicants) and mid-June (for domestic applicants).

Spring Application Deadlines:

- International applicants: September 1 at 11:59 pm US Eastern Time
- Domestic applicants: October 15 at 11:59 pm US Eastern Time
  - **Priority Application Deadline #1**: June 1st, 11:59 pm US Eastern Time (Decisions released in early July)
  - **Priority Application Deadline #2**: July 15th, 11:59 pm US Eastern Time (Decisions released in mid-August)
- Applicants who apply after both priority deadlines will receive admission decisions in early October (for international applicants) and mid-November (for domestic applicants).

Why Apply Early?

Submitting your application before the priority deadlines offers several advantages:

1. **Scholarship Consideration**: Applying early ensures that you receive priority consideration for scholarships. Submitting your application promptly increases your chances of receiving financial assistance.

2. **Early Admission Decision**: Applying early allows you to receive admission decisions sooner. You'll have more time to plan, explore housing options, and prepare for the next steps in your academic journey.

Remember that all application materials must be received by the deadline to avoid automatic rejection. Application fees are non-refundable if your application is incomplete by the stated deadline.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Information Technology

MS

Information Technology On Campus 2024-2025

Duration: 2 Years

Minimum Credits: 30 Credits

Bridge Courses

Prerequisite courses may be required for students with a low undergraduate GPA and/or no background in IT. Students should refer to their offer letter to determine if any bridge courses are required. These courses will not count as electives.

Course	Title/Desc	Credit
IT6035C	Information Security and Assurance (B min)	3
IT6060C	Database Management with SQL Server (B min)	3
IT6081C	System Administration (B min)	3
IT6090C	Computer Programming with Java (B min)	3

Core Classes

Students in their first semester are advised to take a maximum of 4 courses (12 credit hours). Priority courses in this first semester should be IT7001 (IT Seminar) and IT7010C (Information Technology Research Methods). IT7040C (Human Computer Interaction and Usability) may be taken in the first or second semester.

Course	Title/Desc	Credit
IT7001	Information Technology Graduate Seminar	3
IT7010C	Information Technology Research Methods	3
IT7040C	Human Computer Interaction and Usability	3

Thesis Track

Students wishing to switch to thesis-track must identify a graduate faculty member to serve as an advisor for the thesis and then work with that faculty member to refine the thesis topic before completing and submitting Form A to the SoIT Grad Office 2-3 semesters before graduating. Starting the thesis often does not correspond with the timing of enrolling in thesis credit hours, as it typically takes 3 semesters or more to write a publication-quality thesis. 6 credit hours of IT8020 may be split between the final two semesters or all 6 credit hours may be taken in the final semester when the student will defend their thesis.

Electives

Students are encouraged to select coursework appropriate for their academic interests based on the topic they will write about in their capstone project or thesis. No more than 6 credit hours outside the IT discipline are applicable to the degree program. (15 credit hours)

Information Technology

Online

Duration: 2 Years Total Credits: 30 Award: MS

Overview

Information Technology (IT) is one of the fastest growing disciplines in graduate education today. The reason is simple - every industry needs IT. We live in a networked, electronic world and rely on always available, secure systems to live, work, and play. We have electronic classrooms, health records, manufacturing, etc. The field of IT is responsible for building, managing, and securing these global systems. There is no other field of study that cuts through so many domains and has such an impact on the world.

UC's online Master of Science in Information Technology gives you the hands-on skills to immediately solve problems in all of these industries. Mobile and social applications and security are the top industry concerns today. With our world increasingly becoming electronic, we must work within mobile and social networks and secure all of the information transferred and stored every day. The online MSIT program offers coursework in cybersecurity, IT infrastructure, mobile development, and human computer interatction to prepare students to secure software applications, networks, and systems or transform our digital lives. These skills are a vital part of every organization.

A campus-based master's program in Information Technology is also available. For more information about the campus-based Master's in Information Technology click here.

Success

We value work experience and hands-on learning as well as scholarly research so we offer the master's program as a thesis or capstone-based program. With the capstone-based program you can work with the award winning faculty to build an IT solution that will solve a fundamental issue and springboard your career or start you on your way to build a new business. With the thesis program, you can work with the award winning and attentive faculty to research and develop new ideas and solutions for the IT field and contribute to publications and national organizations. Either way, you will be recognized as an expert in the IT field. If you are the type of person who loves solving problems, thrives in fast paced learning environments, and wants to make a positive impact on the world, this is the degree for you.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Advising

Lauren Kirgis

CECH-Information Technology
Teachers Dyer Complex
Cincinnati OH 45219
Call: (513)558-4184
E-mail: kirgisle@ucmail.uc.edu

Admission Requirements

1. A baccalaureate degree from a college or university by a regional or general accrediting agency.
2. At least a B average (3.0/4.0 system) in undergraduate course work. If the applicant has a lower GPA, they must either give evidence of promise that is judged satisfactory by the admitting program and the Graduate School or complete 12 credit hours of specified IT bridge courses with a 3.0 GPA prior to admission into the program.
3. Transcripts of all college or university grades. Note: for the application you may upload unofficial transcripts; however, if admitted, you will need to submit your official transcripts.
4. Current resume or curriculum vitae
5. Three letters of reference from individuals who know you professionally or academically
6. A personal statement
7. GRE is waived for qualified applicants

Changing Majors Within UC

Transferring or waiving credit hours from other UC or outside graduate programs is highly unlikely. But students may waive the bridge or prerequisite courses with exceptional work experience in the IT fields. Please consult with the graduate director and coordinator for waiving courses and transfer of graduate credits.

International Student Requirements

1. A baccalaureate degree from a college or university by a regional or general accrediting agency.
2. At least a B average (3.0/4.0 system) in undergraduate course work. If the applicant has a lower GPA they must either give evidence of promise that is judged satisfactory by the admitting program and the Graduate School or complete 12 credit hours of specified IT bridge courses with a 3.0 GPA prior to admission into the program.
3. Transcripts of all college or university grades. Note: for the application you may upload unofficial transcripts; however, if admitted you will need to submit your official transcripts.
4. Current resume or curriculum vitae
5. Three letters of reference from individuals who know you professionally or academically
6. A personal statement
7. GRE is waived for qualified applicants
8. Most international students must submit an official English proficiency score: TOEFL minimum Paper-based 520, Computer-based 190, Internet-based 80 or IELTS minimum 6.5. To determine if the English proficiency test is required, please see here.

Graduation Requirements

To complete the program, the student must complete the required 30 graduate credit hour in consultation with a faculty advisor. All required courses must be completed within a three-year period from the date of acceptance into the program. Students who are conditionally admitted should also complete the bridge or prerequisite courses prior to taking the MSIT courses. Students need to maintain a GPA of 3.0 to stay and graduate from the MSIT program. Students will retake a course if he or she receives a grade below C. All required courses must be completed within a three-year period from the date of acceptance into the program.

Sport Administration

Online

Duration: 1.5 Years Total Credits: 30 Award: MS

Overview

The Master of Science (M.S.) in Sport Administration program at the University of Cincinnati is designed for students seeking to advance their career in the sport industry. Our curriculum examines issues and challenges facing sport business professionals through the unique lens of interscholastic and intercollegiate athletic administrators. Within the sports industry, there is a need for skilled sport managers in the areas of sales, development, corporate partnerships, finance, public relations, marketing, facility and event operations, compliance, student-athlete support services, and more.

Our one-year program* is built around developing skills in these areas through real-world application of course content, industry partnerships, and research-based best practices. The master's program is available both on-campus and online.

* The program can be completed in one year if the student is enrolled full-time. Part-time options also available.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

UC Advantages And Special Opportunities

Why UC?

- For full-time students (12 credit hours per semester), the curriculum can be completed in one calendar year.
- The program partners with several college and high school athletic departments in the Greater Cincinnati area to provide opportunities for graduate students to gain valuable real-world experience through internship and/or graduate assistantship opportunities.
- The curriculum is tailored specifically for students seeking careers in interscholastic or intercollegiate athletic administration.
- The online master's program offers a high quality and autonomous learning experience.
- Sport Administration faculty members at the University of Cincinnati have accrued more than 40 years of combined experience working in high school and college athletics.
- Students have the opportunity to complete the National Interscholastic Athletic Administrators Association (NIAAA) Certification Program in conjunction with their coursework.
- Students can choose a master's thesis, project, or portfolio for their culminating graduate requirement.
- Dedicated faculty advisors to assist you through the program.

Admission Requirements

Admission Criteria:

1. Earned bachelor's degree from a regionally accredited college/university.
2. 3.0 undergraduate GPA or foreign equivalent. In cases where undergraduate GPA is below a 3.0, student must take the GRE and score 297 or higher.
3. Proof of English proficiency if English is not the applicant's native language.

In addition to these minimum requirements, applicants will need to submit:

1. Two written letters of recommendation (one professional, one academic)
2. Official transcripts for all undergraduate coursework
3. Personal statement of goals for graduate study
4. Resume including sport-related experience
5. For applicants with an undergraduate GPA below 3.0: A minimum combined score of 297 on the verbal and quantitative parts of the GRE revised general test

GRE Waiver:

- Applicants with an undergraduate GPA below 3.0 may be considered for a GRE waiver if the prospective student has three or more years of post-undergraduate sport industry work experience.
- To be considered for a GRE waiver, students must submit the following via email to Dr. Dave Kelley (david.kelley@uc.edu):
    - Proof of employment status
        - Names, job titles, and contact info (email and phone number) of direct supervisor for all positions held in the last three years.
    - Additional letter of reference from a direct supervisor in the last three years that speaks to:
        1. The quality of the sport industry experience you have obtained (i.e. what have been your main tasks/areas of responsibility?)
        2. Your professional preparedness for graduate school and a continued career in the sport industry.

Please submit GRE Waiver materials at the same time you submit your application materials to the Graduate School

Application Deadline and Procedures

Prospective students will complete the online application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester. Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 McMicken Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines “unofficial” transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese: http://cqv.chinadegrees.cn/cn/
- English: http://www.chinadegrees.cn/en/

Verification reports are due to the Graduate School one week prior to the start of the student’s first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 McMicken Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 3.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Fall Deadline: July 15th

Spring Deadline: December 1st

Summer Deadline: April 1st

SMGT7028	Managerial Strategies in Athletics (B min)	3
SMGT7032	Sport Facility Operations and Systems Management (B min)	3
SMGT7036	Applied Financial Management Strategies in Athletics (B min)	3
SMGT7040	Student-Athlete Development (B min)	3

Capstone Experience
Students must enroll in SMGT7090 in their last semester of study.

Course	Title/Desc	Credit
SMGT7090	Capstone in Athletic Administration (B min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Urban Educational Leadership

Online

Duration: 3 Years Award: EDD

Overview

The doctorate of education in Urban Educational Leadership at the University of Cincinnati is dedicated to developing educational leaders with the aptitude to think critically and reflectively to provide solutions to many of the issues in educational leadership and policy. Our curriculum will focus on these issues within educational institutions and the disparities at the local, state, and federal levels.

Our students will establish or extend their expertise in their areas of professional and academic interests through our EdD program. Our students can choose between two concentrations to centralize their research: K-12 Education or Higher Education. Our graduates will also develop deep expertise in best practices that support equity and diversity in all forms.

Program Benefits

- 100% Online
- 36-month program designed for full-time working professionals
- Hands-on and ongoing support from faculty throughout the program

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
2023-2023 Urban Educational Leadership

Advising

Upon admittance to the program, each student is assigned a mentor(s) with Graduate Faculty Status based on fit of research and professional interests. Candidates should initiate contact with their assigned mentor(s) as soon as possible once the admission letter is received. During the first semester of study, the student and mentor(s) will meet to begin working on the process of planning the program of study. It is the student's responsibility to confer regularly with his or her mentor(s) and make sure the mentor(s) has approved the course choices throughout the graduate program. During the first year of their study, students should actively get to know faculty members' research and teaching so as to select a committee to advise their studies.

Admission Requirements

- Application for Admission
- Advanced degree, with at least a 3.2 cumulative GPA, from an accredited college or university
- Current Professional Resume or Curriculum Vitae
- Three letters of recommendations
- Writing sample
- Personal Goal/Interest Statement

International Student English Proficiency Requirment:

- Most students fulfill the English requirement by taking the Test of English as a Foreign Language (TOEFL), the International English Testing System (IELTS), the Duolingo English Test, or the PEARSON Test of English (PTE).
- All tests are good for 2 years from the date the exam was first completed:
  - IELTS - an overall band score of 6.5 is sufficient.
  - Duolingo English Test (160-point scale) - a score of 105 is sufficient.
  - Pearson - a score of 47 is sufficient.
  - TOEFL - The minimum university requirement is:
    - 80 (internet-based test, iBT) or 520 (paper form)
    - a score of 20 or higher on each of the three components of the new "paper-delivered test" (this test does not have a single composite score).
- Unofficial Undergraduate and Graduate Transcripts
  - Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address

below.
- **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.**
- Official Transcripts should be sent to one of the following addresses:
  - *Regular U.S. postal mail:*

    Graduate School
    University of Cincinnati
    110 Van Wormer Hall
    P.O. Box 210627
    Cincinnati, Ohio 45221-0627

    Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):

    Graduate School
    University of Cincinnati
    2614 University Circle
    110 Van Wormer Hall
    Cincinnati, Ohio 45221-0627

Application Deadlines

This program has a Summer semester start only, and will accept applications every other year starting in 2022 (i.e. Summer 2024, Summer 2026 etc).

Application Deadline: December 1

Confirmation Deadline: March 15

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Counselor Education

Duration: **3 Years** Award: **PHD**

Overview

The PhD in Counselor Education at the University of Cincinnati is a CACREP accredited doctoral program that prepares its graduates to become skilled in research, teaching, and supervision from an ecological perspective. Doctoral graduates are committed to the development of their research and teaching potential, in addition to developing skills that enable them to provide service and leadership for diverse populations.

Candidates selected to enter the program typically possess clinical competence through their Master's program training. This allows the focus of their training to center upon development and enhancement of research, teaching, supervision, and leadership skills.

Success

Students with goals for research and teaching in higher education are well-aligned with program outcomes and the advanced mentoring provided through the program. Strong analytical and writing skills are beneficial to meeting learning goals within the program. In addition, those who demonstrate creativity and effective time management skills are positioned for success at UC and into their careers as counselor educators.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Counselor Education PhD 2021-2022

Advising

For all advising questions, please contact Dr. Mai Tang.

UC Advantages And Special Opportunities

Opportunities for independent study, research, and teaching internships allow students to develop a course of study that is tailored to their unique interests and career goals.

Admission Requirements

- Master's Degree in Counseling (required with a cumulative GPA of a 3.00 or higher from a regionally acredited institution)
  - Master's degree in a Psychology or Social Work related field (an a*dditional year of masters-level counseling coursework and additional clinical requirements are required during PhD program)*
- References (3 preferred, minimum of 1 required)
- Goal Statement
- Unofficial Transcripts, both undergraduate and graduate degree, from all colleges/universities attended
- Curriculum Vita (CV)
- Writing Sample

Application Procedures:

Prospective students must complete the online application by December 1 for the following Fall entry term. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted in time for the deadline as well. Incomplete applications will not be processed or reviewed.

Unofficial Transcripts:

At the time of application, please upload unofficial transcripts to the application from all colleges and universities attended.

Official Transcript Submission after Enrollment Confirmation:

Once an applicant has been extended an offer of admission to the University of Cincinnati and has accepted the offer, they must submit an official transcript showing conferral of a bachelor's degree or higher. Official final transcripts or transcript evaluations showing bachelor's degree conferral must be submitted by the start of a student's first term of enrollment at UC. A course registration

hold will be placed on the second term of enrollment for any student missing their official transcript/transcript evaluation showing bachelor's degree conferral.

For more information on where to submit official transcripts, please visit the Graduate College's website.

UC Alumni

Students who have received a degree from the University of Cincinnati do not need to submit official copies of their UC transcripts but do still need to submit unofficial copies as a part of the application process.

International Student Requirements

For international admissions requirements, please visit our website.

Application Deadlines

December 1 - All accepted students start in the following fall semester.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
This program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

CNSL8069	Administrative and Clinical Supervision in Substance Abuse Counseling	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Criminal Justice

Duration: **4 Years** Award: **PHD**

Overview

The Criminal Justice faculty has devoted considerable time to designing a curriculum that will firmly ground doctoral students in the core of the discipline of criminal justice/criminology. Our goal is to ensure that all University of Cincinnati graduates share a common, rigorous training that will prepare them for criminal justice and criminology research. At the same time, through electives and dissertation research, students have the flexibility to develop expertise consistent with their unique interests.

On completion of the Ph.D., doctoral students will be well-versed in criminal justice, criminology, and research methods. Doctoral students must complete course requirements in a Foundation Area of either Criminal Justice or Criminology and in a Substantive Specialization area in Corrections, Policing, or Crime Prevention. To enhance professional development, the curriculum also includes practicum courses on teaching effectiveness and the research process.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Doctoral coursework is organized into five areas: 1) Theory and Research in Criminal Justice, 2) Theory and Research on the Nature of Crime, 3) Research Methods and Statistics, 4) a Substantive Specialty, and 5) Professional Development (practicum).

The theoretical foundations include a sequence of coursework that focuses on Theory and Research on the Criminal Justice System and Theory and Research of the Nature of Crime. The research methods curriculum includes a two-course sequence in research design and data collection, a two-course statistics sequence, and 3 credit hours of coursework in research tools. Together these core requirements insure a solid theoretical and methodological foundation.

Required coursework outside of the theoretical foundations (core) mentioned above also include a nine-semester hour sequence each in one of the theoretical foundations and in a substantive specialty. The theoretical foundation areas are in Criminal Justice or Criminology. The substantive specialty areas are in Corrections, Crime Prevention, or Policing. The course offerings in the specialization areas provide students with an in-depth understanding of the theory and philosophy in the areas as well as the most current research regarding their central ideas.

The final element of coursework focuses on professional development. All doctoral students are required to complete one teaching practicum course and one research practicum course. During their doctoral program, all students are required to teach at least one criminal justice course.

Each doctoral student is required to complete a dissertation. The dissertation is the capstone graduate experience wherein the candidate conducts and presents original criminal justice research. The dissertation project is planned with the consent and guidance of a faculty committee.

Curriculum Guide Versions:
Criminal Justice Doctoral Program (Updated Fall 2025)

Admission Requirements

Prospective students will complete the UC Graduate Admissions Application. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted by the deadline. *Incomplete applications will not be processed or reviewed.*

The Doctoral program only admits for Fall semester start. Review of applications typically begins in early January.

Admission requirements include:

- A baccalaureate degree or higher from an accredited institution
  - Preferred minimum grade point average of 3.5 (on a 4.0 scale)
  - Applicants without a graduate degree may be admitted at the doctoral level or referred to the master's program (or denied admission)

- Graduate Record Examination (GRE) scores
  - Preferred scores in 50th percentile or above
- At least two (2) letters of recommendation (3 preferred)
- A personal statement describing relevant qualifications, goals, and program fit
- Recent writing sample
- Curriculum Vitae highlighting any prior research or teaching experience is recommended

Additional requirements for International applicants:

- Fulfillment of the English proficiency requirement
- Submission of a NACES member transcript evaluation at the time of application

Application Deadlines

The priority application deadline for Fall semester admissions is January 10. The final application deadline for Fall semester admission is April 1.

The review of completed admission applications begins in early January.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Criminal Justice

PHD

Criminal Justice Doctoral Program (Updated Fall 2025)

Duration: 4 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 60 Credits

Core Requirements

In addition to the Core Requirements, students must select two areas of concentration and complete the required coursework for each area.

Required Courses

Course	Title/Desc	Credit
CJ8020	Structural Theories of Crime	3
CJ8030	Criminal Justice Research Methods I	3
CJ8031	Criminal Justice Research Methods II	3
CJ8040	Criminal Justice Statistics I	3
CJ8041	Criminal Justice Statistics II	3
CJ9000	Criminal Justice Research Practicum	3
CJ9001	Criminal Justice Teaching Practicum	3

Research Tools

Students must complete at least one course from the following:

Course	Title/Desc	Credit
CJ8050	Qualitative Methods in Criminal Justice	3
CJ8054	Multi-level Modeling	3
CJ8055	Structural Equation Modeling	3
CJ8057	Longitudinal Data Analysis	3
CJ8092	Special Topics in Criminal Justice Research Methods	1 - 5
CJ8093	Special Topics in Criminal Justice Statistics	1 - 5

Dissertation Research

Students must complete at least 7 credit hours of dissertation research.

Course	Title/Desc	Credit
CJ9090	Doctoral Dissertation Research	1 - 12

Criminal Justice Electives

Students must complete 5-11 credit hours of CJ electives (the number of required credit hours will depend on which concentration areas are selected).

Criminal Justice Concentration Area (9 credit hours)

Required Courses

Course	Title/Desc	Credit
CJ8010	Seminar in Criminal Justice Theory	3
CJ8070	Seminar in Race/Ethnicity and Crime	3

Elective Courses

Students must complete at least one course (3 credit hours) from the following:

Course	Title/Desc	Credit
CJ7011	Seminar in Law and Social Control	3
CJ7060	Correctional Theory and Policy	3
CJ8011	Seminar in Criminal Justice Process	3
CJ8013	Seminar in Juvenile Justice	3

CJ8063	Seminar in Institutional Corrections	3
CJ8081	Seminar in Police Decision-Making	3
CJ8082	Seminar on Police Effectiveness	3
CJ8095	Special Topics in Criminal Justice	3

Criminology Concentration Area (12 credit hours)

Required Courses

Course	Title/Desc	Credit
CJ8021	Biological and Individual Theories of Crime	3
CJ8070	Seminar in Race/Ethnicity and Crime	3

Theory & Research on the Criminal Justice System

Students must complete one of the following courses:

Course	Title/Desc	Credit
CJ8010	Seminar in Criminal Justice Theory	3
CJ8011	Seminar in Criminal Justice Process	3

Elective Courses

Students must complete at least one course (3 credit hours) from the following:

Course	Title/Desc	Credit
CJ7085	The Criminal Offender	3
CJ8022	Life-Course Criminology	3
CJ8071	Community and Environmental Criminology	3
CJ8072	Seminar in White-Collar Crime	3
CJ8096	Special Topics in Criminology	3

Course	Title/Desc	Credit
CJ6XXX+	CJ Electives	5 - 11

Corrections Concentration Area (9 credit hours)

Required Courses

Course	Title/Desc	Credit
CJ7060	Correctional Theory and Policy	3
CJ8060	Seminar in Correctional Rehabilitation	3

Elective Courses

Students must complete at least one course (3 credit hours) from the following:

Course	Title/Desc	Credit
CJ8061	Applied Corrections	3
CJ8062	Seminar in Community Corrections	3
CJ8063	Seminar in Institutional Corrections	3

Crime Prevention Concentration Area (12 credit hours)

Required Courses

Students must complete at least two courses from the following:

Course	Title/Desc	Credit
CJ7070	Theory and Practice of Crime Prevention	3
CJ8071	Community and Environmental Criminology	3
CJ8073	Seminar in Victimology	3

Applied Research Skills

Students must complete at least one course from the following:

Course	Title/Desc	Credit
CJ8016	Seminar in Criminal Justice Program and Policy Evaluation	3
CJ8074	Applied Crime Prevention	3

Elective Courses

Students must complete one additional elective course (3 credit hours). This can be any additional course taken from the lists above or any of the courses below.

Course	Title/Desc	Credit
CJ7085	The Criminal Offender	3
CJ8013	Seminar in Juvenile Justice	3
CJ8022	Life-Course Criminology	3
CJ8060	Seminar in Correctional Rehabilitation	3
CJ8063	Seminar in Institutional Corrections	3
CJ8082	Seminar on Police Effectiveness	3
CJ8098	Special Topics in Crime Prevention	3
CJ8099	Special Topics in Policing	3

Policing Concentration Area (9 credit hours)

Required Courses

Students must complete at least two courses from the following:

Course	Title/Desc	Credit
CJ7080	Theory and Practice of Law Enforcement	3
CJ8081	Seminar in Police Decision-Making	3
CJ8082	Seminar on Police Effectiveness	3

Elective Courses

Students must complete one additional elective course (3 credit hours). This can be any additional course taken from the list above or any of the courses below.

Course	Title/Desc	Credit
CJ8071	Community and Environmental Criminology	3
CJ8074	Applied Crime Prevention	3
CJ8099	Special Topics in Policing	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Educational Studies

Duration: **4 Years** Total Credits: **90** Award: **PHD**

Overview

The Doctor of Philosophy (PhD) in Educational Studies at the University of Cincinnati is designed to equip students with the knowledge and skills needed to excel in the world of academia and education. Our doctoral degree is specifically tailored to cultivate highly skilled educators who are poised to make a lasting impact in one or more high-demand areas of specialization such as educational policy or instructional design and technology.

Our comprehensive PhD in Educational Studies places a strong emphasis on rigorous scholarship, preparing you to conduct and disseminate cutting-edge research or improve school policy and curriculum. The program's courses offer critical training, enabling you to pursue advanced knowledge in educational, social, and behavioral sciences.

Graduates will be prepared to research and make impactful change in whichever concentration they choose.

Areas of concentration include:

- Curriculum Studies and Teacher Education
- Developmental and Learning Sciences
- Educational and Community-Based Action Research
- Educational Policy and Higher Education
- Instructional Design and Technology
- Literacy
- Quantitative and Mixed Methods Research Methodologies
- Second Language Studies
- Special Education

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

EDST PhD coursework is designed to be completed in three to four years for students with relevant prior graduate work and in five to six years for students entering the program without prior graduate work, given a full-time schedule of 12 hours per semester.

Degree Summary:

- Minimum: 90 semester credit hours
- Transfer up to 30 credit hours of comparable graduate level coursework from another degree program within UC or from another institution. All transfer credit must be approved by the Doctoral Advisory Committee, must meet Graduate College requirements, and follow Graduate College policy for approval.

Residency:

Prior to admission to doctoral candidacy, all doctoral students must complete a residency requirement by enrolling in 10 graduate credit hours (12 graduate credit hours if funded by a Graduate Assistantship) per semester for two out of three consecutive semesters of study (Fall, Spring, Summer; i.e., residency in Fall and Spring or residency in Spring and Summer). Part-time students are not exempt from enrollment requirements to achieve residency.

Annual Review:

All doctoral students and doctoral candidates are required to complete a review of progress with their faculty advisor during the spring or summer semester of each academic year. A Doctoral Student Annual Review Form must be completed and signed. The purpose of the annual review is to ensure that doctoral students / candidates receive feedback on their progress toward degree completion and career goals.

Core Curriculum:

Common Required Core Courses (31-54 credits): A core set of courses is designed to provide a common set of experiences and is required of all students. The focus of core courses is scholarly activity (e.g., research, writing for publication, conference presentations, and grant writing).

- *Basic Research Methods* (2 courses; 6 credits).
- *Professional Induction* (1-2 courses and 1-2 research aprenticeships; 9 credits).
- *Advanced Research Methods* (1 two-semester sequence plus 1 additional course from a different sequence or with a different focus; 9 credits).
- *EDST 9073 Dissertation Guidance in Educational Studies* (7 credits minimum to 30 credits maximum).

Area of Concentration Requirements and Electives (24+ credits): Area of concentration requirements and electives focus on specialized content that supports students' interests, expands on current research and evidence-based practices in the field, and facilitates students' research. Requirements may include courses shared across programs, such as additional research methods and/or statistics courses. A secondary area of concentration, which is optional, should extend students' knowledge base by providing coursework in an area outside of, but complimentary to, students' primary area of concentration. A secondary area of concentration may include coursework in other concentrations as well as coursework outside the School of Education. Mentors within areas of concentration may require additional coursework.

- *Primary Area of Concentration* (18 hours minimum).
- *Optional Secondary Area of Concentration* (12 credits minimum). For example, a student in Literacy may be interested in a stronger background in Quantitative Research Methodologies or may complete the Assessment and Evaluation Certificate.
- *Additional Electives (5 credits)*: Students may select five elective credit hours. These courses might be from their concentration, additional courses from the core curriculum (such as research methodology or professional induction courses), Proseminar II, independent studies, additional credits of dissertation guidance (EDST 9073 to be completed after qualifying exam), or additional graduate courses that are aligned with the student's interests.

Educational Studies PhD Curriculum Fall 2024 (LTCY-Literacy)

Advising

Upon admittance to the program, each student is assigned a mentor with Graduate Faculty Status based on fit of research interests. Candidates should initiate contact with their assigned mentor as soon as possible once the admission letter is received. During the first semester of study, the student and mentor will meet to begin working on the process of planning the program of study. It is the student's responsibility to confer regularly with his or her mentor and make sure the mentor has approved the course choices throughout the graduate program. During the first year of their study, students should actively get to know faculty members' research and teaching so as to select a committee to advise their studies.

UC Advantages And Special Opportunities

Doctoral students may elect to add graduate certificates to their area of concentration. Options include:

- Adult/International TESL
- Assessment and Evaluation
- Autism Spectrum Disorders
- Developmental and Learning Sciences
- Jewish Education
- Post Secondary Literacy Instruction
- Teacher Leader
- TESOL (Teaching English to Speakers of Other Languages)

Other graduate certificates may be available. Please contact your Faculty Advisor.

Special Programs

Full and part-time graduate students in Educational Studies may apply for financial aid.

Admission Requirements

Minimum admission criteria for all areas of concentration are consistent; however, additional concentration level criteria may be applied. The program is selective. There will be limits on the number of students a faculty member can mentor at one time.

Degrees. Earned Bachelor's degree or Master's degree in areas of concentration or closely related area from an accredited college or university. Students with bachelor's or master's degrees in unrelated areas, but with clear evidence of experiences and/or credentials appropriate to the degree and a specific area of concentration may be accepted.

Minimum Grade Point Average (GPA). Successful applicants must have at least a cumulative GPA of 3.0 (on a 4.0 scale) from their undergraduate coursework and 3.2 (on a 4.0 scale) from previous graduate work.

Graduate Record Examination (GRE). Graduate Record Examination (GRE) is optional. It can be submitted as part of the holistic review of your application, but is not required.

Applicants: The program will be using the university's holistic review process for all areas of the PhD. The holistic review involves written responses to selected questions. The questions do not require specific content background or knowledge, but assess preparedness for the writing, analysis, and critical thinking required of a doctoral degree. An admissions committee reviews each application using pre-determined criteria. Applicants should expect a follow up interview with an admissions committee member to complete their application.

Speakers of English as Second Language. If an applicant's first language is not English, he or she must take the Test of English as a Foreign Language (TOEFL) or another comparable test unless he/she has previous degrees from higher education institutions in the United States. The recommended test scores are: 92-93 for Internet-based TOEFL; 237 for Computer-based TOEFL; 580 Paper-based TOEFL; 6.5 for IELTS; and 62-63 for PTE. The test must be taken within two years prior to application to the program.

Letters of Recommendation. Applicants must have a minimum of three current letters of recommendation that address their academic background and accomplishments submitted by college or university faculty, graduate advisors, or other individuals who can address applicants' accomplishments or potential as educational researchers.

Writing Sample Prompt. The purpose of the Writing Sample is to demonstrate the quality of your academic writing skills, your ability to think critically, your ability to construct an argument, and your ability to analyze educational issues and/or data. There are two ways that you may choose to do this:

1. Provide a prewritten sample, perhaps something you composed for a prior course, that is 2,000 words or less and contains at least three references (an excerpt of a longer paper is acceptable).

OR

2. Compose an essay where you discuss your position on an issue in your field of interest within education and how you hope to address that issue during your studies. Your essay should be 2,000 words or less and contain at least three references.

Goal Statement Prompt. The purpose of the Goal Statement is to determine how your research interests align with the Educational Studies program, your area of concentration, and the faculty within it. You are encouraged to consult the university website to learn more about the areas of focus for the program, concentrations, and faculty. This information will also help the program select the best faculty advisor aligned with your interests. In your Goal Statement of 1,500 words or less, you should describe:

a) your previous teaching or research experiences;

b) topics or issues that you hope to learn more about during your time in the program;

c) how your interests align with your intended area of concentration; and

d) your professional short-term and long-range aspirations.

Curriculum Vitae/Resume. A copy of a curriculum vitae or resume that indicates the applicant's name, address, phone number, e-mail address, colleges attended with degrees and dates, employment history, professional experiences, any publications, or conference presentations, and names of references who will be sending letters.

Application Deadlines

Prospective students should complete the online application for the EDST Ph.D. degree by **December 1st**, at which time they will select a concentration from among the options available. Please note that incomplete applications will not be processed or reviewed. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. Applicants will be notified of acceptance or rejection by **February 15th**.

Graduation Requirements

Minimum Required GPA: To be eligible for graduation, the student must maintain a minimum of 3.25 grade point average.

Maintaining Active Status: In order to maintain active status in the graduate program, the student must register for at least 1 graduate credit in any semester during every academic year. If a student fails to maintain active status, he or she must complete a Graduate College Petition for Reinstatement. This request must be received in the Office of Research and Advanced Studies no later than three weeks prior to graduation in order for the candidate to be certified for graduation in that semester. Students who have not been enrolled in classes for more than three years are not eligible for reinstatement and must reapply for readmission to the University. Reapplication does not change the candidate's original entry date. Time to degree will be calculated from his or her first entry date. To reapply, the candidate must submit a completed Application for Readmission to Graduate College Form.

Graduation: Students must formally apply for graduation in accordance with established Graduate College Graduation Deadlines. Complete information can be found at Graduate College Graduation. Students must maintain active status (i.e., enrolled for at least one credit hour) during the year they plan to graduate and all NG, N, I, UP, SP and F grades must be removed for degree courses.

Application Deadlines

Prospective students will complete the on-line application for the EDST Ph.D. degree by **December 1st**, at which time they will select a concentration from among the options available. Please note that incomplete applications will not be processed or reviewed. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. The Ph.D. Council will conduct an initial review of the applications in all concentrations; however, the interviews and final admission decisions will reside with the faculty for each area of concentration. A minimum of two faculty affiliated with a concentration must review each application. One round of admissions will be conducted in the Spring semester of each year for Fall semester entry into the program the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Educational Studies

PHD

Educational Studies PhD Curriculum Fall 2024 (ECAR-Edu & Comm Based Action Research)

Duration: 4 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 60 Credits

Educational Studies PhD Core Curriculum

Doctoral Level Survey of Research Methods
Students select one course from the following:

Course	Title/Desc	Credit
EDST8000	Paradigms of Inquiry	3
LSLS9021	Frameworks for Literacy Research	3

Statistical Data Analysis

Course	Title/Desc	Credit
EDST7011	Statistical Data Analysis II	3

Professional Seminar

Course	Title/Desc	Credit
EDST9001	Professional Seminar I in Educational Studies	3

Guided Research
Students will complete 6 hours of EDST8061 Guided Research or other pre-approved courses in collaboration with faculty advising.

Course	Title/Desc	Credit
EDST8061	Guided Research Experience	6

Educational and Community-Based Action Research Concentration

Community Based Participatory Research

Course	Title/Desc	Credit
EDST7045	Community-Based Participatory Research	3

Research Ethics Elective (3 credits)
Student may select one course from the following or another research course approved by a faculty advisor.

Course	Title/Desc	Credit
CI9003	Theory, Ethics, Application of Research in Teaching	3
EDST8001	Ethics in Education and Community Research	3

Theory Elective (3 credits)
Student may select one course from the following or another theory course approved by a faculty advisor.

Course	Title/Desc	Credit
EDST7040	Relational Context of Teaching and Learning	3
EDST7046	Critical Pedagogy	3

ECAR Electives (15 credits)
Student may select 5 (five) additional courses with faculty advisor approval.

Course	Title/Desc	Credit
EDST7040	Relational Context of Teaching and Learning	3
EDST7041	First-person Action Research	3
EDST7042	Appreciative Inquiry	3
EDST7044	Action Research and Feminist Theory	3
EDST7046	Critical Pedagogy	3
EDST7047	Arts-based Action Research	3
EDST7093	Learning, Working and Thriving in Groups	3
EDST8053	Feminist Qualitative Methodologies	3
EDST8117	Action Science in Organizational Learning and Change	3

Advanced Research (9 credits)

Advanced Research Required Courses

Course	Title/Desc	Credit
EDST7043	Practitioner Action Research	3
EDST8021	Action Research I	3

Course	Title/Desc	Credit

Additional Research Elective (3 credits)

With this elective, the student will be essentially be completing a research sequence as well as one additional research course. This is designed to provide the student with a varied educational experience that allows the student to explore different research methods. Faculty advising and guidance is always suggested in determining the most appropriate research courses and elective.

Course	Title/Desc	Credit
EDST8022	Action Research II	3
EDST7053	Practitioner Action Research 2	3

Dissertation

Dissertation Research

Students will complete 7-30 hours of dissertation research.

Course	Title/Desc	Credit
	Dissertation Research EDST 9073	7 - 30

Additional Electives

Electives (5 credits)

Course	Title/Desc	Credit
Free Electives	Students may select five elective credit hours in consultation with their faculty advisor.	5

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

LSLS9021	Frameworks for Literacy Research	3

Professional Seminar

Course	Title/Desc	Credit
EDST9001	Professional Seminar I in Educational Studies	3

Statistical Data Analysis

Course	Title/Desc	Credit
EDST7011	Statistical Data Analysis II	3

Guided Research

Students will complete 6 hours of EDST8061 Guided Research or other pre-approved courses in collaboration with faculty advising.

Course	Title/Desc	Credit
EDST8061	Guided Research Experience	6

Developmental Learning Sciences Concentration

Applied Research in Developmental & Learning Sciences

Course	Title/Desc	Credit
EDST6099	Applied Research in Developmental & Learning Sciences	3

Learning Science Requirement (3 credits)

Select one of the following:

Course	Title/Desc	Credit
EDST6060	Human Learning	3
EDST8035	Introduction to Cognitive and Learning Sciences	3

Concentration Electives

Human Development Elective (3 credits)

Students may select one of the following courses:

Course	Title/Desc	Credit
EDST7030	Childhood to Adolescent Development	3
EDST7031	Human Development: Early and Middle Childhood	3
EDST7032	Human Development: Adolescence	3
EDST7034	Human Development: Lifespan	3

Developmental Learning Sciences Faculty Approved Electives (15 credits)

Course	Title/Desc	Credit
IDT7100	Designing Online Assessments for Data-Driven Decisions	3
EDST7094	Self Concept and Achievement	3
EDST7095	Motivation and Cognition	3
EDST8036	Brain Development, Cognition and Learning	3
EDST8037	Cognitive Development	3
EDST8038	Cognition and Culture	3
EDST8039	Mathematics Cognition	3
EDST8040	Cognitive Science of Learning to Read	3
EDST9089	Seminar in Educational Studies	1 - 3
ECE7027	Partnerships/Families	3
ECE7031	Projects and Documentation in ECE	3
ECE7032	Environments as the Third Teacher	3
ECE7033	The Languages of Children: The Role of Graphic Arts in ECE	3
ECE7055	Early Intervention Internship/Field Experience	3
ECE7064	Romancing Nature with Young Children	3
ECE7066	Nature Playscapes: Designs for Play and Learning	3

Course	Title/Desc	Credit
ECE7067	Environmental Education and Young Children	3
ECE7086	Readings in Early Childhood Education	1 - 6
ECE7096	Constructivism in Education	3
ECE7097	Learning Through Inquiry	3
ECE9025	Seminar in Early Development and Education	3
CI8002	Attitude Formation and Change in the Classroom	3
IDT7110	Universal Design for Learning in Blended and Online Contexts	3
IDT7170	Mobile Learning	3
IDT8020	Learning Sciences and Technology	3
LSLS7033	Seminar: Literature for Children and Adolescents	3
LSLS8032	Language and Emergent Literacy	3
LSLS8036	Adolescent Literacy	3

Advanced Research (9 credits)

Students will complete a two-semester sequence in additional to an additional course from a different sequence or with a different focus. Please speak with a faculty advisor for assistance. Students may select from the following sequences:

Action Research

Course	Title/Desc	Credit
EDST8021	Action Research I	3
EDST8022	Action Research II	3
	Additional Advanced Research Course Select one course from a different advanced research sequence.	3

Practitioner Action Research

Course	Title/Desc	Credit
EDST7043	Practitioner Action Research	3
EDST7053	Practitioner Action Research 2	3
	Additional Advanced Research Course Select one course from a different advanced research sequence.	3

Mixed Methods

Course	Title/Desc	Credit
EDST8081	Mixed Methods Research I	3
EDST8082	Mixed Methods Research II	3
	Additional Advanced Research Course Select one course from a different advanced research sequence.	3

Qualitative Methods

Course	Title/Desc	Credit
EDST8051	Qualitative Research Methods I	3
EDST8052	Qualitative Research Methods II	3

Course	Title/Desc	Credit
	Additional Advanced Research Course Select one course from a different advanced research sequence.	3

Quantitative Methods

Complete EDST8044 Conducting Quantitative Research and one of the following: EDST8034 Measurement and Assessment, EDST8041 Multivariate Data Analysis, EDST8043 Reading Advanced Quantitative Research, EDST8086 Experimental and Quasi-Experimental Design, EDST8087 Multilevel Models for Educational Research, EDST8088 Item Response, Theory, or EDST8089 Structural Equation Modeling.

Course	Title/Desc	Credit
EDST8044	Conducting Quantitative Research	3
EDST8034	Measurement and Assessment	3
EDST8041	Multivariate Data Analysis	3
EDST8043	Reading Advanced Quantitative Research	3
EDST8086	Experimental and Quasi-Experimental Research	3
EDST8087	Multilevel Models for Educational Research	3
EDST8088	Item Response Theory	3
EDST8089	Structural Equation Modeling	3
	Additional Advanced Research Course Select one course from a different advanced research sequence	3

Dissertation

Dissertation Research

Students will complete 7-30 hours of dissertation research.

Course	Title/Desc	Credit
	Dissertation Research EDST 9073	7 - 30

Additional Electives

Electives (5 credits)

Course	Title/Desc	Credit
Free Electives	Students may select five elective credit hours in consultation with their faculty advisor.	5

★ This is the typical minimum number of credit hours students must complete.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Educational Studies PhD Curriculum Fall 2024 (EPHE- Ed Policy & Higher Ed)

Duration: 4 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 60 Credits

Educational Studies PhD Core Curriculum

Doctoral Level Survey of Research Methods (3 credits)
Students select one course from the following:

Course	Title/Desc	Credit
EDST8000	Paradigms of Inquiry	3
LSLS9021	Frameworks for Literacy Research	3

Statistical Data Analysis

Course	Title/Desc	Credit
EDST7011	Statistical Data Analysis II	3

Professional Seminar

Course	Title/Desc	Credit
EDST9001	Professional Seminar I in Educational Studies	3

Guided Research (6 credits)
Students will complete 6 hours of EDST8061 Guided Research or other pre-approved courses in collaboration with faculty advising.

Course	Title/Desc	Credit
EDST8061	Guided Research Experience	6

Educational Policy and Higher Education Concentration

Educational Policy and Higher Education Concentration Courses

Course	Title/Desc	Credit
CI9005	Policy Issues in Teaching and Learning	3
EDLD8016	Educational Policy Analysis	3
	Policy Elective Students will select a policy related course in collaboration with a faculty member. A law or finance course is strongly recommended.	3

K-12 Focus
Select 15 credit hours from the following courses:

Course	Title/Desc	Credit
CI7004	The Role of Teachers in a Democratic Society	3
CI9004	Curriculum Theory	3
CI9006	Teacher Education and Professional Development	3
EDLD7035	Educational Leadership Theory	3
EDLD8034	School Finance	3
EDLD8035	School Law	3
EDLD8036	Curriculum Development and Data Analysis	3
EDLD8038	Instructional Supervision	3
EDLD8037	School and Community Partnerships	3

Higher Education Focus
Students may select 15 credits from the following courses:

Course	Title/Desc	Credit
EDLD8061	Finance in Higher Education	3
EDLD8062	Educational Equity and Diversity in Higher Education	3
EDLD8063	Organization and Administration in Higher Education	3
EDLD8064	Legal Issues and Law in Higher Education	3
EDLD8065	Governance & Policymaking in Higher Education	3
EDST6060	Human Learning	3

General Policy Focus
Students may select 15 credits hours from the following courses:

Course	Title/Desc	Credit
EDLD7038	Leadership for Social Justice	3
EDST7001	Politics of Education	3
EDST7021	Philosophy of Education	3
EDST8014	Fundamentals of Evaluation Methods	3

Course	Title/Desc	Credit
CI8003	Critical Race Theory and Education	3
CI8092	Critical and Postmodern Theories on Educating for Democracy	3
CI9003	Theory, Ethics, Application of Research in Teaching	3

Advanced Research (9 credits)

Choose one of the research sequences listed below.

Action Research

Course	Title/Desc	Credit

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Health Education

Duration: 3 Years Total Credits: 90 Award: PHD

Overview

The PhD in Health Education is an ideal program for individuals interested in helping people and communities to adopt healthy behaviors and healthy lifestyles through leadership and research. This nationally recognized program has been specifically designed for those who want to work as faculty members/professors in academic settings, researchers in health or governmental agencies, or professionals interested in serving as leaders in community health settings, health departments, nonprofit agencies, wellness centers, hospitals, corporate wellness programs, and health organizations. The program offers courses in all the major areas of health promotion and health education.

Graduates of this program have primarily obtained faculty and academic positions throughout the US in health promotion and health education. This degree can also be beneficial for individuals who want to attain a PhD and build a vita of quality teaching and research. Students are prepared through a program grounded in current research and evidence-based practices in the field of health promotion and health education to become certified health educators.

The Health Education faculty possess a broad range of experience, skills, and knowledge in the field of health promotion and health education. Faculty members provide much research expertise in such health areas as substance abuse prevention, violence and suicide prevention, minority health, mental health promotion, women's health issues, nutrition, physical activity, sexual health, health program planning, implementation, evaluation, and various other health issues.

Students in the program attend classes both in the traditional face-to-face delivery method, as well as experience some classes delivered online. Graduates of the program have applauded the program's commitment to excellence in teaching and research.

Prior to this PhD program, students must have earned a master's degree. Students with master's degrees from a variety of health-related or social science-based disciplines are accepted into the program. Master's level students from non-health education-related disciplines may need to complete additional master's level coursework in addition to the PhD requirements. In some cases, it may be preferable to complete the MS as a second master's degree in route to the PhD. All decisions concerning the transfer of credit and remedial work will be decided by the student's program committee upon admission to the program. No more than 30 semester hours may be transferred into the PhD program from previous graduate work. For additional information, please contact Rebecca Vidourek via email.

Success

Individuals who are interested and committed toward research and service to the field of health education would benefit from this health education program. This program is ideal for students who wish to assist individuals, groups and communities to adopt healthy behaviors and healthy lifestyles through leadership and research. Students who excel in the program tend to have strong interpersonal skills and work well with others. In addition, possessing strong written and verbal skills will assist students in becoming successful health educators and quality academics in the field.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Health Education Doctoral Program Requirements 2018-2019

Advising

Upon acceptance into the program, each student is assigned an academic advisor who is a faculty member in Health Promotion and Education. The advisor will assist the student in establishing an academic advising committee and selecting courses as well as a cognate to complete during the doctoral program.

UC Advantages And Special Opportunities

This program is flexible and can be completed in three years if the student attends full-time. The Ph.D. program allows students to develop expertise in Health Promotion and Education as well as enhance their strength and understanding in a cognate area of personal interest. The GRE is not required for acceptance into the program. Classes are offered primarily in the evenings, which helps

meet the scheduling needs of students who work during the day. In addition, there are several courses offered online. However, please note that this program cannot be completed entirely online.

Admission Requirements

- Bachelor's and master's unofficial transcript(s) for all colleges and universities attended
- References (3 strongly preferred, minimum of 2 required)
- Two-Part Goal statement
- CV/Resume

Application Procedures:

Prospective students should complete the online application by February 1st for Fall enrollment. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted by the application deadline. Incomplete applications will not be processed or reviewed.

International Student Requirements

For international admissions requirements, please visit our website.

Graduation Requirements

In order to graduate, students must complete all coursework and doctoral program requirements, including comprehensive examinations, a doctoral dissertation, and dissertation defense.

Application Deadlines

The PhD in Health Education accepts applications for Fall Semester admission only. The application deadline is February 1.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Information Technology

Duration: **4 Years** Award: **PHD**

Overview

Elevate your career with our Doctor of Philosophy (Ph.D.) in Information Technology at the University of Cincinnati. Our program equips you with advanced skills in applied research, focusing on evidence-based, human-centered, and secure IT practices. You'll be prepared to educate the next generation of IT professionals at the K-12, undergraduate, and graduate levels.

Graduates from our Ph.D. program are not only ready to lead in academia but also to become influential leaders in organizations and enterprises, developing innovative IT solutions for both consumers and businesses.

Apply now to become a key player in the future of Information Technology!

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

The curriculum requires a total of 90 credit hours post Baccalaureate that are distributed among four areas:

1. Core area (33 semester credit hours) that includes:
    - 15 hours of Information Technology Foundations
    - 12 hours in an Area of Specialization
    - 6 hours of Research Preparation
2. Methodology (12 semester credit hours)
3. Electives (15 semester credit hours) distributed among analytical, quantificational, computational, social, and experiential themes
4. Dissertation (30 semester credit hours)

IT PhD 2019-2020 post-master's
IT PhD 2019-2020 post-baccalaureate

Advising

Nicole Cochran, Associate Director of Graduate Education

Admission Requirements

The following are the minimum requirements for applying to the information technology doctoral program. Meeting these minimum requirements does not guarantee admission, as the admissions committee conducts a holistic review of each application, considering academic achievements, research experience, professional background, and other relevant factors.

Academic Requirements:

Applicants **must** meet at least one of the following requirements:

1. **Have completed** a baccalaureate degree from an ABET-accredited Information Technology degree program with a GPA of 3.2 or higher.
2. **Have completed an undergraduate degree with a GPA of 3.2 or higher and either:**
    - **Have completed** a minimum of 18 graduate-level credits in Information Technology with a GPA of 3.2 or above, or
    - **Have completed** significant years of professional experience in information technology as determined by the graduate director.

Additional Requirements:

Applicants **must** fulfill the following requirements:

- **Submit** unofficial transcripts from all universities attended (official transcripts will be required upon admission).

- **Submit** three academic or professional letters of reference from credible sources who can speak to relevant IT experience and/or work ethic. Two or more reference letters should be on letterhead.
- **Submit** a current resume or curriculum vitae (CV) that includes any prior research or teaching experience, and a list of publications with full citations, if applicable.
- **Submit** responses to a series of 3 essay questions, discussing applicable research experience, academic accomplishment, professional experiences within the field of IT, and research interests/a possible dissertation topic.

Optional but Highly Recommended:

- While not required, applicants **may submit** Graduate Record Examination (GRE) scores to demonstrate their potential for success in the doctoral program. This is highly recommended for applicants who have not yet completed a Master's degree.

International Applicants:

- International applicants **must submit** a transcript evaluation by a NACES member in place of the unofficial transcript(s) to reflect both a converted GPA (on a 4.0 scale) as well as the US equivalence of the degree earned.
- International applicants **must submit** English Proficiency Scores (if applicable) to meet the following minimum requirements:

The Test of English as a Foreign Language (TOEFL):

- **590** (paper-based test) or
- **243** (computer-based test) or
- **97** or above (internet-based test)

Duolingo English Test:

- **120** or above

The International English Testing System (IELTS):

- Overall band score of **7.0** or above

The Pearson Test of English:

- A score of **75** or above

Additional Materials:

- Applicants **are encouraged to share** the following documents to further demonstrate aptitude for doctoral-level research and writing skills:
  - A copy of a Master's thesis and/or academic publication(s)
  - Industry-recognized certifications or evidence of awards
  - Personal Statement

International Student Requirements

International applicants must provide two documents during the application process:

- A transcript evaluation by a NACES member in place of the unofficial transcript(s) to reflect both a converted GPA (on a 4.0 scale) as well as the US equivalence of the degree earned.
- English Proficiency Scores (if applicable) to meet the following minimum requirements:

The Test of English as a Foreign Language (TOEFL):

- **590** (paper-based test) or
- **243** (computer-based test) or
- **97** or above (internet-based test)

Duolingo English Test:

- 120 or above

The International English Testing System (IELTS):

- Overall band score of 7.0 or above

The Pearson Test of English:

- A score of 75 or above

Application Deadlines

The application deadline is January 31 for the following fall semester start date.

Information Technology

PHD

IT PhD 2019-2020 post-master's

Duration: 4 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 60 Credits

Core

Students will take a minimum of 15 credit hours distributed between the IT Foundations, Methodology, and Research Preparation classes. Student's Master's degree will be evaluated to determine what courses to be required.

IT Foundations

Course	Title/Desc	Credit
IT7001	Information Technology Graduate Seminar	3
IT8002	History and Theories of Information Technology	3
IT8003	Evidence-based Information Technology Practice	3
IT8004	Foundations of Human-Centered Information Technology	3
IT8005	Secure Information Technology Practice	3

Methodology

Course	Title/Desc	Credit
IT7010C	Information Technology Research Methods	3
CJ7040	Applied Statistics in Criminal Justice	3
EDST8081	Mixed Methods Research I	3
IT8006	Research Methods for Human-Centered Information Technology	3

Research Preparation

Students will take two research seminars with special topics varied by the instructor.

Course	Title/Desc	Credit
IT8015	Research Seminar	3

Dissertation

Students will take a minimum of 30 credit hours

Course	Title/Desc	Credit
IT8030	Information Technology PhD Dissertation	1 - 12

Electives

Students will take a minimum of 15 credit hours of electives below. Up to 12 of these hours may count towards an area of specialization.

Area of Specialization

Students will take courses as an area of specialization. Upon the advisor's approval, the student can choose the specialized courses from the list of elective courses (see elective) They can also choose other graduate level courses upon the advisor's approval.

Analytical

Credits in approved courses focused on statistical learning, machine learning, data mining, or visual analytics.

Course	Title/Desc	Credit
IT7071C	Machine Learning and Data Mining for IT	3
CS6037	Machine Learning	3
CS6052	Intelligent Data Analysis	3
CS6034	Natural Language Processing	3
CS6056	Security Vulnerability Assessment	3
CS7052	Advanced Topics in Natural Language Processing	3
CS7051	Advanced Topics in Mining Spatial and Temporal Data	3
CS7038	Malware Analysis: Introduction to Reverse Engineering	3
BANA6037	Data Visualization	2
BANA7046	Data Mining I	2
BANA7047	Data Mining II	2
BANA7038	Data Analysis Methods	2
HI7072	Leveraging Analytics and Business Intelligence Tools for Healthcare	3
IT8007	Social Network Analysis: Visualization and Hypothesis Testing	3

Quantification

Credits in approved courses focused on statistical inference or quantitative social science methodology

Course	Title/Desc	Credit
BANA6043	Statistical Computing	2

Course	Title/Desc	Credit
POL7054	Pro-Seminar in Survey Methodology	4
EDST7010	Statistical Data Analysis I	3
EDST7011	Statistical Data Analysis II	3
CJ8040	Criminal Justice Statistics I	3
CJ8041	Criminal Justice Statistics II	3
POL7051	Statistics for Political Science 1	4
POL7052	Statistics for Political Science 2	4
POL7030	Public Policy Implementation and Evaluation	4
POL7053	Experimental Methods and Design	4

Computational/Informational

Credits in approved courses focused on computation, collection, management, processing, or interaction with electronic data, especially at scale

Course	Title/Desc	Credit
IT7020C	Principles of Cybersecurity	3
IT7021C	Enterprise Security and Forensics	3
IT7022C	Software Application Security	3
IT7023C	Technologies for Social Networking	3
IT7024C	Technologies for Mobile Applications	3
IT7025C	Usability for Mobile Applications	3
IT7030C	Games for Learning & Simulation	3
IT7031C	Advanced Technologies for Game Development	3
IT7032C	Advanced Multi-player Games	3
IT7027C	IT Infrastructure Sustainability	3
IT7028C	Advanced Storage Technologies	3
IT7029C	Advanced Systems Administration	3
CS6033	Artificial Intelligence	3
CS6054	Information Retrieval	3
HI7001	The Healthcare and Public Health Landscape	3
HI7010	Health Informatics, Information Systems and Technology	3
HI7071	Introduction to Healthcare Data Science	3
CI7088	Game Design	3

Course	Title/Desc	Credit

Social/Theoretical

Credits in approved courses focused on the nature of human interaction and or the analysis of data derived from human interaction and or the social context, ethics, or social consequences of social data analytics

Course	Title/Desc	Credit
CJ6012	Cybercrime	3
CJ8072	Seminar in White-Collar Crime	3
HI7040	Workflow Process Analysis, System Development, Human Factors and Usability	3
CODE8032	Interaction Design 4: Computational Physical Systems	3
COMM7003	Mediated Communication in Social Systems	3
COMM7004	Mediated Communication and Technology	3
CI8072	Learning Sciences and Technology	3
CI8073	Instructional Design	3
POL8080	Research Seminar in International Relations	4

Experiential

All students are required to enroll in at least one credit hour of internship or teaching practice based on industry or academic career roles. 3 credit hours total

Course	Title/Desc	Credit
IT8012	IT Co-op Internships	1 - 3
IT8014	IT Teaching Practice	1 - 3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

School Psychology

Duration: **5 Years** Award: **PHD**

Overview

The University of Cincinnati's Ph.D. in School Psychology program is dedicated to preparing highly competent school psychologists utilizing a scientist-practitioner model. Doctoral-level graduates are prepared to serve as psychologists in schools, clinics, hospitals, and other agencies, as well as for academic and research positions.

In addition to foundational competencies of school psychology practice, doctoral-level graduates are trained in research, supervision, and leadership. Both theoretical and empirical bases of professional practice are emphasized, and a diverse range of practical field experiences are provided throughout the preparation. Doctoral trainees receive advanced training in the psychological foundations of professional practice, as well as theoretical foundations of applied behavior analysis.

The Ph.D. program includes five years of full-time study. Years 1-4 include coursework, field experiences, and research. Students earn a M.Ed. in Foundations in Behavior Analysis after the first year in the program. Students complete a pre-dissertation research project in Year 1 and a dissertation in Year 4. Students participate in the APPI Match process to obtain a full-year internship for Year 5.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed. This program offers a verified course sequence for the Board Certified Behavior Analyst (BCBA) so students may pursue BCBA positions after obtaining supervised hours and securing the credential.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Curriculum Guide Versions:
School Psychology PhD Updated Fall 2025

Advising

Students are assigned a faculty advisor upon admission to the program. The advisor is one of the core faculty members in the School Psychology program. Students meet at least once per semester with their advisor in formal meetings, although all faculty are available for ongoing support.

The program uses a cohort model for doctoral admissions. As such, students are not admitted under a faculty member or assigned a research advisor at the beginning of the program. Students have the opportunity to work on research teams with various faculty. Students develop their research interests and the idea for their pre-dissertation, and a research advisor is selected at the end of the 2nd year.

UC Advantages And Special Opportunities

Why choose our Ph.D. in School Psychology program?

- The program is accredited by the American Psychological Association
- Students obtain a Master of Education (M.Ed.) in Foundations in Behavior Analysis after year one as part of the program
- Strong ecological-behavioral orientation
- Students are involved in field experiences starting their first semester
- Experiences are available across urban, suburban, and rural sites, as well as schools, clinics, and hospitals
- All students receive some level of financial support, and the program has a history of full funding for doctoral students
- Opportunities to collaborate with faculty and students on different research teams and develop students' own research interests

Admission Requirements

1. Bachelor's degree from an accredited institution
2. Unofficial Transcripts and a minimum overall undergraduate GPA of at least 3.0

3. CV or Resume
4. Goal Statement
5. A minimum of one Letter of Recommendation (three letters are strongly recommended)
6. 18 credit hours in psychological foundations is suggested, but not required. Here are the areas:
    - History and Systems of Psychology
    - Research and Statistics
    - Child Development
    - Social Psychology
    - Biological Bases
    - Learning Theory

Transferring To UC

The Program Coordinator and Program faculty review students' requests and submit potential transfer credits to the Graduate College for approval. We follow all Graduate College guidelines around transfer credits. Students may be asked to provide syllabi for courses to demonstrate course equivalency.

International Student Requirements

For international admissions requirements, please visit our website.

Application Deadlines

The program admits students once per year for the Fall semester. Applications are due December 1 for the following Fall.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
UC's PhD in School Psychology program is:

- Accredited by the American Psychological Association (APA)
- Fully approved by National Association of School Psychologists (NASP)
- Verified Course sequence by the Behavior Analyst Certification Board (BACB)
- The College of Education, Criminal Justice and Human Services (CECH) is accredited by the Council for the Accreditation of Educator Preparation (CAEP)

Sport Administration

Duration: **3 Years** Award: **PHD**

Overview

The Doctor of Philosophy (PhD) in Sport Administration program at University of Cincinnati is dedicated to preparing students for successful careers in the professoriate, higher education, and in the sports industry. Our program offers a flexible curriculum allowing students to customize their coursework and experiences to match their career and research goals. With our strategic location, distinguished faculty expertise, and university resources, we are the ideal hub for cultivating future leaders, scholars, and practitioners in sport administration. Join our program and become part of a vibrant community of scholars dedicated to advancing sport scholarship and practice!

Success

Our program supports student career goals that range from faculty, administrative, practitioner/athletics, and alt-academic careers. We provide resources in our seminar classes, particularly our SPAD 9040: Professional Development and Career Exploration course, that inform students of their options and resources across a wealth of career outlets.

We also have a dedicated Doctoral Sport Administration Group that houses regular meetings to discuss theory, teaching, research, service, career ideas, conferences, interviewing, negotiation, and other topics designed to help students be successful during and after they've completed our program.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Sport Administration PhD Curriculum

Advising

Please contact Dr. Matt Huml, sport administration doctoral program coordinator, for questions related to advising.

UC Advantages And Special Opportunities

Here at the University of Cincinnati, our program offers unique strengths that set it apart from other Sport Administration PhD programs. As one of the few programs located within a large metropolitan area, our students have access to a wealth of resources both on and off campus, including professional, intercollegiate, interscholastic, recreational, and leisure programs within proximity to UC. With a proven track record of prestigious research fellowships, best article awards, teaching accolades, and grant funding, our faculty provide invaluable mentorship and research opportunities to our students.

Admission Requirements

1. Master's Degree in Sport Administration or a related field (with a cumulative GPA of a 3.00 or higher)
2. Three (3) reference names
3. One (1) letter of recommendation
4. Writing sample:
    - Applicant should choose a research topic that aligns with their interests within the program. After researching that topic, applicant will write a 2-3 page paper (roughly 1,000 words), inclusive of 4-6 references. Be sure to include APA citations and a reference page.
5. Program interest statement:
    - Why UC? What are applicant's career goals related to completing this degree? Which faculty member are they wanting as an advisor?

International Student Requirements

For international admissions requirements, please visit our website.

Application Deadlines

December 1 - All accepted students start the following fall semester.

Duration: 2 Years Award: Certificate

Overview

The Certificate in Correctional Rehabilitation is a specialization within the UC School of Criminal Justice that provides a deeper and more comprehensive understanding of the risk, need and responsivity model of offender treatment.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Majoring

Students obtaining a certificate in correctional rehabilitation can take courses focusing on juvenile justice, women offenders, cognitive behavioral interventions, risk and need assessment, correctional program implementation, behavioral management systems, and other related topics. The three required courses will provide students with a foundation and framework for understanding the correctional system, both adult and juveniles, as well as a background in evidence-based interventions for these populations. The elective courses allow students to tailor their course work to better fit their specific interests.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Correctional Rehabilitation 2018-2019 Revised

Advising

The students will follow the outlined curriculum and will be advised by the academic advisors in the Student Services Center in the College of Education, Criminal Justice, and Human Services.

Special Programs

This certificate will highlight and provide a better understanding of correctional rehabilitation. This certificate is ideal for students majoring in criminal justice, substance abuse, psychology, or social work, or for any student or working professional wishing to gain a deeper understanding about correctional rehabilitation. A certificate in correctional rehabilitation equips students with the necessary theoretical, empirical, and practical foundation to work with, manage, and/or study offenders in correctional treatment settings.

Future Educators of America (FEA)

UC's FEA chapter is dedicated to fostering the love of teaching, examining the reality of teaching and promoting the rewards of teaching. FEA is open to all UC students; however, our main focus is to offer a path for teacher education students to stay connected to their college and to their future profession. Members have the opportunity to work with children and young adults in local schools and FEA chapters.

Kappa Delta Pi (KDP)

Kappa Delta Pi is a prestigious international honor society that recognizes scholarship and excellence in the field of education. Members must have a college GPA of at least 3.0 for undergraduate students or 3.25 for graduate students. KDP members work on several volunteer activities that focus on education. Some of the benefits of being a member of KDP include annual scholarships, professional development, a nationwide job database and access to the ideas, research, insights and expertise of internationally renowned educators.

Student Council for Exceptional Children (SCEC)

SCEC is the largest international professional organization dedicated to improving educational outcomes for individuals with exceptionalities, students with disabilities and gifted children, as well as those typically developing. If you are committed to children, focused on becoming the best educator and want to meet new people, then SCEC is for you! Membership dues permit you to receive professional development opportunities, journals and newsletters with new research and classroom practice and the opportunity to attend conventions and conferences.

CECH Tribunal

The purposes of the CECH Tribunal are to ensure that the interests of the students of the college are voiced and to provide student representation on behalf of all undergraduate students in CECH where representation is warranted. Also, the Tribunal organizes programs and social events for students of the college.

Student Ambassador Program The Student Ambassador program represents CECH at the University of Cincinnati by assisting with the recruitment and retention of students in the college. CECH Student Ambassadors provide a valuable service by representing the student perspective of university life to prospective and new students. Ambassadors also represent the college at numerous collegiate functions, professional events and key promotional events. Being selected as a CECH Student Ambassador is an honor that reflects academic rigor and a commitment to the fields of education, health promotion and education and criminal justice.

Admission Requirements

This program is open to students in good academic standing with a cumulative university grade point average of 2.0 and the desire to succeed. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Interested students should meet with a UC College of Education, Criminal Justice, and Human Services Student Services staff member for appropriate advising. Please note: In order to obtain this certificate, 50% or more of the required coursework must be taken from the College of Education, Criminal Justice, and Human Services.

Graduation Requirements

In order to complete this certificate, a student must:

- Complete all required course work and certificate requirements
- Obtain at least a 2.0 university grade point average
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

SACN3016	Abnormal Behavior	3
SACN2011	Drugs and Behavior	3
PSYC3070	Substance Use and Abuse	3
CJ3027	Drugs and Crime	3
PSYC2051	Fundamentals of Psychopathology	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Crime and Intelligence Analysis

Online

Duration: 1 Year Award: Certificate

Overview

The certificate in Crime and Intelligence Analysis within the College of Education, Criminal Justice, and Human Services School of Criminal Justice that provides students with the conceptual knowledge and technical, analytical skills required of crime and intelligence analysis professionals.

While data and information have always been used by law enforcement organizations, the development of new information technology, crime reduction and prevention strategies, and pressures to address challenging public safety issues means that law enforcement organizations have increasingly started to rely on crime and intelligence analysis more than ever before. However, effective crime and intelligence analysis requires specialized knowledge and skills that have not typically been systematically taught in criminal justice programs. Therefore, this certificate will enhance students' educational experience by offering a certificate that will teach them the knowledge and skills required of professionals working in the field of crime and intelligence analysis. Upon completion of the certificate, students will be prepared to begin work as crime and intelligence analysts in law enforcement organizations.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

UC Advantages And Special Opportunities

The courses required for this certificate are part of the bacheor's degree in information technology program offered at the University of Cincinnati. The courses are applied in nature and students will not only learn theoretical concepts but also hands-on computing skills. Feel free to contact the IT department head for details on the current specific technologies being taught in the courses.

Admission Requirements

This program is open to students holding a baccalaureate degree with a cumulative university grade point average of 2.0 and the desire to succeed. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Interested students should meet with a UC College of Education, Criminal Justice, and Human Services Student Services staff member for appropriate advising. Please note: In order to obtain this certificate, 100 percent of the required coursework must be taken from the College of Education, Criminal Justice, and Human Services. Application materials for the certificate program can be located at the Application Link.

International Student Requirements

Admission for this certificate program is limited to those that are currently in the United States, as this program is not available to pursue on a full time basis. No visa's can be provided for this educational opportunity. Additional admission information for international applicants.

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

Digital Learning Design

Duration: **1 Year** Total Credits: **15** Award: **Certificate**

Overview

The 15 credit hour Digital Learning Design (DLD) Certificate provides a range of highly marketable and transferable skills to be used in any profession involving teaching, training or development of personnel or customers/clients. Through a combination of hands-on, competency-based coursework and field experience, students will apply learning theory to the design, development, and implementation of digital learning experiences in a range of environments. In addition, students will develop a digital portfolio of work products they can use to demonstrate creativity and skill mastery to future employers.

Success

Successful candidates in Digital Learning Design should:

- Demonstrate academic program success
- Take risks in creativity and application of ideas
- Take ownership of learning goals
- Think outside of the box
- Commit to learner success in a variety of environments
- Collaborate with others in professional settings
- Focus on learner success and respect learner diversity

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Education for Environmental Sustainability

Duration: **1 Year** Total Credits: **15** Award: **Certificate**

Overview

Environmental education focuses on the exploration of environmental issues, problem solving, critical thinking, and taking action to improve the environment. Furthermore, education for sustainability is a transformative process that prepares individuals to lead an informed citizenry whereby responsible individual and collaborative actions result in an ecologically sound, economically prosperous, and equitable society for present and future generations. This certificate program combines salient features of each of these approaches to investigate interdisciplinary content and relationships that promote sustainable communities.

The rationale for this certificate, which is appropriate for students interested in both formal and non-formal education, is grounded in a UC core principle - educating students in ways that transform their lives so they are poised for "ongoing discovery and full engagement as they shape an evolving world." More specifically, the responsibility for making progress toward an ecologically sustainable future lies in the hands of today's students. As a forward thinking institution of higher education, UC offers this certificate to interested students so they can cultivate environmentally and civically responsible orientations. The certificate coursework will educate our students about environmental literacy and ecological sustainability, essential for 21st century global citizenship. It will foster critical and creative thinking skills within an eco-pedagogy that promotes learning and stimulates individual and collective action towards enhancing the human–earth relationship.

Success

Students who will be most interested in this certificate are those who are aware of, sensitive to, and concerned about environmental challenges, economics, social justice issues, and sustainable development.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

BIOL3011C	Environmental Field Techniques (C min)	4
BIOL3090	Interdisciplinary Field Experience (C min)	3
CI4108C	Experiential Learning in Environmental Research (C min)	3
CI4175	Field Experiences Practicum (C min)	3
ECE4075	Internship in Nature-Based Early Learning Programs (C min)	3
EVST3011C	Environmental Field Techniques (C min)	4
EVST4093C	Urban Ecosystem Research (C min)	4
EVST5025	Research in Environmental Studies (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Forensic Populations

Duration: **2 Years** Total Credits: **18** Award: **Certificate**

Overview

The certificate in forensic populations is a specialization within the UC School of Criminal Justice that provides deeper and more comprehensive understanding of specific types of offenders. Students obtaining the certificate in forensic populations can take courses focusing on drug offenders, women offenders, white collar offenders, gang-involved offenders, juvenile offenders, and mentally-disordered offenders. The two required courses will provide students with a theoretical framework for understanding criminal behavior and background in evidence-based interventions for these populations. This certificate is ideal for students majoring in criminal justice, psychology, or social work, or for any student wishing to gain a deeper understanding about forensic populations. A certificate in forensic populations equips students with the necessary theoretical, empirical, and practical foundation to work with, manage, and/or study offenders in general and specific offending populations.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Forensic Populations Certificate Curriculum 2018-2019

Admission Requirements

All UC students are eligible for this certifiate, including criminal justice students. This certificate is well-suited for students in criminal justice, psychology, social work, or other programs relevant to preparing students to work with or study forensic populations, specific groups of offenders, or individuals involved in the criminal justice system. A student must be in good academic standing to pursue this opportunity.

Graduation Requirements

This program is open to students in good academic standing with a cumulative university grade point average of 2.0 and the desire to succeed. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Interested students should meet with a UC College of Education, Criminal Justice, and Human Services Student Services staff member for appropriate advising. Please note: In order to obtain this certificate, 50 percent or more of the required coursework must be taken from the UC College of Education, Criminal Justice, and Human Services. Application materials for the certificate/minor program can be located at:

Foundations of Cybersecurity

Duration: **1 Year** Total Credits: **21** Award: **Certificate**

Overview

The foundations of cybersecurity certificate program is an interdisciplinary undergraduate certificate program provided by the School of Criminal Justice, Department of Information Technology, and the Department of Political Science that empowers students from multiple disciplines to define and understand the behavioral, technical, and policy challenges of securing cyberspace and digital life. This program is designed to address the growing needs by companies, governments and organizations of professionals of managing the challenges of security in the cyberspace.

Success

Success factors vary and can be customized to students' individual skills and interests.The primary factor is to ensure graduating students are cybersecurity literate and meet work force expectations in this field. Students specializing in information technologies can develop a variety of skills needed by public and private entities to analyze cyberspace security problems and develop response strategies. Students interested in research careers with think-tanks, or applying to graduate programs, can focus on research and writing on cyberspace security issues. For those who are interested in policy, law enforcement, and governmental services, the certificate will provide introduction to core technical skills combined with the analytical context of behavioral and policy studies related to cybersecurity.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Law and Paralegal Studies

Online

Duration: 1 Year Total Credits: 24 Award: Certificate

Overview

Why pursue a Certificate in Law & Paralegal Studies?

The Certificate in Law & Paralegal Studies at the University of Cincinnati is designed to prepare paralegals to improve legal services' efficiency, economy, and availability. A paralegal performs substantive legal work under the direct supervision of an attorney and will acquire the knowledge and understanding of various legal concepts. UC's paralegal studies program was established in 1980 and is approved by the American Bar Association (ABA) -- the first program in the Tristate area to gain such approval.

Prospective students should be aware that paralegal education is not the equivalent of a law school education. Graduates of our certificate program are not qualified or eligible to take the bar examination. Academic credit for paralegal courses is not transferable for advanced standing in law school. Paralegals may not provide legal services directly to the public, except as permitted by law.

Success

Paralegals are expected to write clearly and communicate effectively, both orally and in writing. Paralegals must possess a high degree of motivation and analytical reasoning capability. They need to pay attention to detail. Candidates should also be responsible, well-organized, mature individuals who are sincerely interested in pursuing a career as a paralegal. They must be trustworthy and discreet. Paralegals, like attorneys, are required to hold a position of trust with their client. As a paralegal, you must respect attorney-client confidentiality. Paralegals must possess good people skills and be able to work as part of the legal team. Computer skills are essential. Persons with felony convictions may not be eligible for some positions as Paralegals.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Cincinnati, OH 45221
cechssc@uc.edu

UC Advantages And Special Opportunities

In choosing a paralegal program, there are many variables to consider. It is particularly important to consider the program's reputation, accreditation/approval, services provided by the program -- including career counseling and job placement -- the program's ties to the legal community, the curriculum and the program's administration and faculty.

UC's law and paralegal studies program was established in 1980 and is approved by the American Bar Association (ABA) -- the first program in the Tristate area to gain such approval. More than 1,000 paralegal programs exist in the United States alone, but only around 240 have met the requirements to be approved by the ABA. ABA approval has served as a benchmark for many employers who hire paralegals. The ABA requires thorough self-studies and periodic site visits to the program, which ensures quality in faculty, curriculum, advisory boards, student services, library holdings and resources.

Our program enjoys an excellent reputation and has meaningful ties to the legal community. Its advisory board is made up of experienced attorneys, paralegals, paralegal managers, educators and other legal professionals who provide valuable insight into what is expected in the workforce. Graduates are highly sought after by law firms, corporations and government agencies in the Tristate

area. Placement rates continue to be excellent. The program coordinator, along with UC's Career Development Center, is available to assist students in resumé writing, interviewing skills and placement. In addition to the Career Development Center, assistance for paralegal students is offered in the following areas: orientation, tutoring, academic counseling and financial aid.

Our program also prepares graduates at two levels: bachelor's degree or professional certificate. The certificate is available to those students who already hold a bachelor's degree OR students who are already matriculated in another bachelor's degree program. UC paralegal students benefit from an on-campus law library, faculty who are practicing attorneys and small class size.

UC's law and paralegal program requires students to complete a internship as a part of the curriculum. The practicum enables a student to utilize skills acquired in the program and to gain practical on-the-job experience. Internships are available in a variety of settings, including private law firms, offices of a public defender or attorney general, banks, corporate legal departments, legal aid organizations and many government agencies. Students must attain at least a grade of "C" in all legal specialty coursework and the permission of the program coordinator to participate in the internship.

The faculty of paralegal classes consists of experienced attorneys. Instructors of legal classes are selected on the basis of their knowledge and expertise in the area of law taught, as well as their demonstrated commitment to the education and role of paralegal students.

Admission Requirements

This program is open to students that have:

- Completed a bachelor's degree (in any field of study) from a regionally accredited institution
- Minimum cumulative grade point average of 2.75

Complete the certficate application for admission.

Transferring To UC

Prerequisites:

- Bachelor's Degree (in any field of study) from a regionally accredited university
- Minimum cumulative grade point average of 2.75

Transfer Course Eligibility Based On:

1. Accreditation of the former institution

2. Comparability of the course including evaluation of practical assignments

3. Year the course was taken

4. Assurance that the student will have at least 9 semester credits of legal specialty courses through synchronous instruction

5. Documented proof that the grade received was a 'C' or above

6. Transferring credit from schools that are not regionally accredited is prohibited

Graduation Requirements

To graduate from the College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and certificate requirements
- Attain at least a 2.0 grade point average
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension

Application Deadlines

Application deadlines:

- Fall semester - July 1
- Spring semester - November 1
- Summer semester - March 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

UC's Law & Paralegal Studies program is approved by the American Bar Association (ABA).

UC Advantages And Special Opportunities

The courses required for this certificate are part of the bachelor's degree in information technology offered at the University of Cincinnati. The courses are applied in nature and students will not only learn theoretical concepts but also hands-on computing skills. Feel free to contact the IT department head for details on the current specific technologies being taught in the courses.

Admission Requirements

This program is open to students holding a baccalaureate degree with a cumulative university grade point average of 2.0 and the desire to succeed. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Interested students should meet with a UC College of Education, Criminal Justice, and Human Services Student Services staff member for appropriate advising. Please note: In order to obtain this certificate, 100 percent of the required coursework must be taken from the College of Education, Criminal Justice, and Human Services. Application materials for the certificate program can be located at the Application Link.

Application Deadlines

Application deadlines are as follows: fall semester - July 1; spring semester - November 1; summer semester - March 1.

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

Social Science Research

Duration: **1 Year** Total Credits: **15** Award: **Certificate**

Overview

The Social Science Research certificate in the School of Criminal Justice is for those who wish to gain advanced and applied training in social sciences research. The certificate provides undergraduate students with hands-on skills training across a variety of technical aspects of conducting research in the social sciences, applied research experiences and/or enhanced depth and breadth of knowledge on research-relevant topics.

Students from any discipline can learn the skills and apply them to their own research or employment work across a variety of sectors where research occurs. The certificate includes 3 required applied skills courses offered by the School of Criminal Justice (7 credits) and several additional electives (8 credits) that can be completed by taking a variety of other courses offered at UC.

Earn your Social Science Research certificate from the School of Criminal Justice! The certificate in social science research offers advanced and applied training in social sciences research. This certificate equips undergraduate students with hands-on skills across various technical aspects of social sciences research, providing both applied research experiences and in-depth knowledge on research-relevant topics.

Open to students from any discipline, this certificate allows you to apply these skills to your own research or employment across diverse sectors. The program includes 3 required applied skills courses (7 credits) offered by the School of Criminal Justice, along with several elective courses (8 credits) available through other departments at UC.

Career

Students who leave UC with a foundation in their respective disciplines and this certificate are going to be far more prepared and more appealing to organizations that are increasingly concerned with evidence-based practices, continuous quality improvement, and data-driven decision-making. As such, they are hiring people to facilitate these goals in-house.

Graduates with this certificate will be prepared for the careers listed below. All opportunities may not be listed.

Social Science Research

Certificate

Social Science Research Certificate

Duration: 1 Year

★Minimum Credits: 15 Credits

Core (7 credit hours)

Students must complete all courses below:

Course	Title/Desc	Credit
CJ3030	Mentoring and Leadership (C min)	1
CJ3055	Introduction to Research and Evaluation (C min)	3
CJ3056	Advanced Skills in Research and Evaluation (C min)	3

Research or Statistics/Methods Electives (8 credit hours)

Students will complete 8 credit hours from the list of research-relevant courses in the tables below:

Research Focused Electives

Course	Title/Desc	Credit
AFST2007	Blacks in Science and Technology	3
ALH4040	Research and Writing in the Health Professions	3
ALH4070	Applied Healthcare Research	3
CJ3002	Research Experience in Criminal Justice	2 - 5
CJ3057	Independent Research in Criminal Justice	3
CJ4096	Criminal Justice Research Field Placement	3 - 9
COMM4068	Communication of Technology and Science	3
ENGL2073	Writing for Justice	3
ENGL3062	Scientific Writing in the Behavioral Sciences	3
ENGL3080	Scientific Writing for Research	3
ENGL4092	Technical and Scientific Writing	3
HDCE4010	Experience and the Developing Brain	3
HDCE4040	Research Proposal and Community Engagement Advocacy	3
HPE2049	Introductory Undergraduate Research Experience	1 - 3
HUM4001	Public Engagement with Science Research & Discussion Group	1
PHIL1032	How Science Works	3
PHIL2032	Inquiry in Cognitive Science	3
PHIL3023	Science, Philosophy and Society	3
PHIL3099	Independent Study	3
POL2010	Public Opinion & American Politics	3
PSYC2097	Research Practicum	1 - 9
PSYC2098	Advanced Research Practicum	1 - 6
PSYC3023	Psychological Measurement & Testing	3
PSYC3053	Research Practicum	1 - 6
PSYC4041	Research Practicum in Developmental Science	1 - 6

Directed Study/Independent Study/Research Practicums

If individual units offer credit for independent research or research assistantships with faculty through some other generic course designation/code not listed here, it will count toward the certificate. If a student outside of Criminal Justice wishes to have research experience and their primary academic department does not offer a course credit option for this, students can register for CJ3002, with permission from the School of Criminal Justice.

Summer Research Experiences

Successful completion of an approved specialized formal summer research program at UC will count for 3 credit hours toward the certificate. Approved experiences include: Center for Criminal Justice Research (CCJR) Immersive Summer Research Experience; University Honors Discover; McNair; SURF; UPRISE; Protégé; Sociology Summer Research Program; and CRSP. Additionally, if a student participates in a federally-funded summer research program (NIJ, NSF, NIH, etc) at another institution, that would also count for 3 credit hours toward the certificate.

Capstone/Independent Research

Research-based capstone courses count toward this certificate. Because these courses are typically tied to specific curricula requirements within individual units, students will need to see if there is capacity and availability to take any capstone courses outside their home department. In Criminal Justice, students may take CJ 4096 for their capstone- this is a research field placement. They may take CJ3057, which is Independent Research in Criminal Justice.

Course	Title/Desc	Credit
SOC2088	Science, Technology and Society	3
SOC3100	Sociology Careers Workshop	1
SOC5092	Taft Undergraduate Research	3
WGS3070	Women in Science	3

Statistics or Methods Electives

Introductory statistics and methods courses required by the student's primary discipline/major do not count toward this certificate. However, advanced and other elective statistics and research methods courses inside and outside their major will count toward the certificate. If students take elective methods and stats courses outside their discipline, they will have to verify that (a) the other department can support enrollment and (b) the course does not have substantial overlap with a course they are required to take in their own major (e.g., basic research methods is likely to be quite similar across social science disciplines). Students should note that some of these courses may only be open to students within certain programs. Students should check course pre-requisites and whether the courses accept students outside of the discipline.

Course	Title/Desc	Credit
CJ3021	Criminal Justice Research Methods	3
EXSC2071	Research and Statistics in Exercise Science	3
PARA1011	Legal Research and Writing	3
PARA1012	Legal Research & Writing II	3
PARA4010	Advanced Legal Research	3
POL3001	Quantitative Research and Data Analysis	3
POL3001C	Quantitative Research and Data Analysis	3
SOC3019C	Statistics in Sociology	4
SOC3022	Methods in Social Research	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Software Development

Duration: **2 Years** Total Credits: **18** Award: **Certificate**

Overview

This Software Development certificate is designed to provide extensive experience in all facets of software development. This certificate is intended for programmers, program analysts, systems analysts and software engineers at all levels to accelerate their skill development. This certificate provides a strong foundation in software development with an emphasis on systems analysis and design, coding, testing and project management.

This certificate is designed for individuals wishing to gain additional knowledge and skills in the field of IT. Furthermore, professionals wishing to renew and/or acquire skills and knowledge that are current in IT can also use this learning path to enhance their career goals. The certificate is designed to help students apply as well as integrate current computing technologies to expand their fields of expertise and enhance career objectives.

As the modern society becoming more and more intertwined with technology, IT quickly turns into any productive individual's must-acquired skill. Regardless of an individual's career objectives, a concentrated study in IT in a relatively short period of time shall certainly enhance his/her skills in the work place, as well as widen the prospect of career choices.

Success

Successful students have appreciated the hands-on experience and the opportunity to develop exceptionsal communication and problem solving skills.

UC Advantages And Special Opportunities

The Department of Information Technology offers four professional certificate programs in information technology (IT). This certificate is designed for individuals wishing to gain additional knowledge and skills in the field of IT. Furthermore, professionals wishing to renew and/or acquire skills and knowledge that are current in IT can also use this learning path to enhance their career goals. The certificate is designed to help students apply, as well as integrate, current computing technologies to expand their fields of expertise and enhance career objectives.

As the modern society becomes more and more intertwined with technology, IT quickly turns into any productive individual's must-acquired skill. Regardless of an individual's career objectives, a concentrated study in IT, in a relatively short period of time, shall certainly enhance his/her skills in the work place, as well as widen the prospect of career choices.

Admission Requirements

This program is open to students holding a baccalaureate degree with a cumulative university grade point average of 2.0 and the desire to succeed. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Interested students should meet with a UC College of Education, Criminal Justice, and

Human Services Student Services staff member for appropriate advising. Please note: In order to obtain this certificate, 100 percent of the required coursework must be taken from the College of Education, Criminal Justice, and Human Services. Application materials for the certificate program can be located at the Application Link.

Graduation Requirements

To obtain the IT certificate, a student prior to graduation, must have successfully completed all program requirements.

A 2.0 average must be achieved in these courses to receive the certificate.

To receive the information technology certificate (suitable for framing), a written request must be submitted to the academic director within one year of program completion. All required courses must be completed within a two-year period from date of acceptance into the program.

Application Deadlines

Application deadlines for all students are as follows:

- Fall Semester: August 1
- Spring Semester: December 1
- Summer Semester: March 1

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

Sport Coaching

Duration: **2 Years** Total Credits: **18** Award: **Certificate**

Overview

Enroll in the Sport Coaching certificate at the University of Cincinnati to gain key knowledge and skills that coaching and organizing an effective sports program require. This program is designed to give coaches the tools to help athletes perform their best.

Our Sport Coaching certificate program provides a strong foundation of the theories and basics of coaching, and is designed for practical applications such as the administration of youth and adolescent sports programs, as well as young athlete development.

Here are a few highlights of this certificate:

- Athlete-centered approach to social-emotional skill-building and leadership development
- Relationship-building and creating a positive team culture
- Effective communication skills
- Physical training, planning for a season, and long-term athlete development
- High-quality instructional delivery and feedback

In addition, the certificate includes many of the required training components necessary for applying for the Ohio Department of Education Pupil Activity Permit, which is required to coach at a public school in Ohio.

Success

UC's Certificate in Sport Coaching offers a combination of courses in sport administration, health promotion, exercise science, athletic training, and human development. Coursework caters to sport administrators, educators, health and fitness professionals, strength coaches or anyone who has the desire to further skills in their profession. Students who have an interest in working in the community and developing young athletes are great candidates for the certificate in sport coaching.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Substance Abuse Counseling

Duration: **1 Year** Total Credits: **24** Award: **Certificate**

Overview

This professional certificate in substance abuse counseling at the University of Cincinnati's College of Education, Criminal Justice, and Human Services (CECH) is designed for students who already possess a baccalaureate degree or who are in the process of pursuing a baccalaureate degree in another discipline and who wish to obtain credentials in substance abuse counseling. The program provides students with a knowledge base to be used in counseling, corrections, administrative and prevention settings.

Success

Students who have an interest in working in the community providing assistance to others are great candidates for the certificate in substance abuse counseling.

Students who excel in the substance abuse counseling certificate program often have very strong interpersonal skills and work well with others. In addition, having excellent written and verbal communications skills will assist these students to excel in the workforce in a number of positions.

Career

The substance abuse counseling program was developed by a team of academic specialists and practitioners in the field to help students and career professionals gain the knowledge competencies and skills needed to work with the addicted population and those who have been affected by exposure to addictive behavior. Aspects of the program are well suited for those who come in contact with and may assist addicted persons and their families. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

UC Advantages And Special Opportunities

Students completing our online substance abuse counseling certificate and holding a behavioral science bachelor's degree will have met the academic requirements for licensure under Ohio Chemical Dependency Professionals Board guidelines. Additional field practice hours are required for eligibility to take the state OCDPB license examination as well as other application requirements. Students who reside outside of the state of Ohio should review their specific state requirements and guidelines for licensure of chemical dependency counselors.

This program offers the convenience of online courses taught by experienced faculty and practitioners in the substance abuse counseling field.

Special Programs

Offered by the School of Human Services, the substance abuse counseling certificate is situated among many prevention and systems-oriented programs such as health education, mental health counseling, school psychology, and school counseling. Nationally-recognized faculty and community-based instructors provide a key link between cutting edge research, and evidence-based practices as applied in real-life clinical settings. Student success is promoted through a team of advisors, instructors, and program leaders.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Simply apply for the certificate and register for the appropriate classes.

Program length: 9 months

Transferring To UC

To transfer to UC, you must be in good academic standing at the college or university you last attended.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as transfer students. It is recommended that students interested in this program meet wtih an academic advisor in the CECH Undergraduate Student Services Center. An appointment can be made by calling 513-556-2336.

Graduation Requirements

Students must obtain a cumulative 2.0 grade point average in the substance abuse counseling certificate coursework to obtain the certificate.

Application Deadlines

Application deadlines are as follows: fall semester - July 1;
spring semester - November 1; summer semester - March 1

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

Substance Abuse Prevention

Online

Duration: 1 Year Total Credits: 18 Award: Certificate

Overview

Substance abuse prevention is a young but growing career field. The substance abuse prevention certificate was developed as a new certificate for students who wish to become state and nationally certified substance abuse prevention specialists. Aligned with certification requirements in the State of Ohio and with the national certification board, the International Certification and Reciprocity Consortium (IC & RC), this certificate prepares educators, clinical practitioners, criminal justice majors and other service professionals to provide community-based interventions designed to reduce substance abuse and related problematic behaviors.

Courses are taught online by faculty in the School of Human Services and select adjuncts working in the field of substance abuse prevention. Several credits can also apply toward a master's degree in public health.

Success

UC's substance abuse prevention certificate offers a combination of courses in substance abuse counseling and health education, as well as courses specific to substance prevention. The online coursework caters to counselors, educators, military service personnel, and criminal justice professionals who desire to further skills in their profession. Students who have an interest in working in the community providing assistance to others are great candidates for the certificate in substance abuse prevention.

Career

The substance abuse prevention certificate was developed by a team of academic specialists and practitioners in the field to help students and career professionals gain the knowledge competencies and skills needed to work with the addicted population and those who have been affected by exposure to addictive behavior. Aspects of the program are well suited for those who come in contact with and may assist addicted persons and their families. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

UC Advantages And Special Opportunities

The substance abuse prevention undergraduate certificate program is designed to provide the education requirements for the highest level of national and state (Ohio) level certification. Applicants for state certification must also successfully pass the national certification exam and work in a prevention capacity for a prescribed amount of time, depending on the level of education already completed. There are no practicum or internship experiences associated with the substance abuse prevention certificate program.

Courses will be taught in an online format by human services faculty and selected adjuncts working in the field of prevention.

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

Teaching English to Speakers of Other Languages

Online

Duration: 2 Years Total Credits: 15 Award: Certificate

Overview

The certificate in Teaching English to Speakers of Other Languages (TESOL) is an online undergraduate approved program of study that can lead to an Ohio P-12 TESOL endorsement and a University of Cincinnati (UC) TESOL certificate. In response to the growing population of English language learners (ELLs) in U.S. classrooms locally and nationally, this certificate will prepare prospective teachers and other professionals to meet the unique instructional and communication needs of ELLs, thus increasing their marketability upon completion of undergraduate degrees at UC and elsewhere.

The certificate in TESOL will provide teacher education students with a deep and comprehensive understanding of effective methods of teaching and assessment for ELLs in K-12 settings. Coursework required for the certificate is aligned with requirements to obtain the Ohio P-12 TESOL endorsement. When added to a teaching license, this endorsement qualifies a teacher to work as an English as a second Language (ESL) Specialist within a school, thus expanding her/his job opportunities.

Success

Successful candidates in Teaching English to Speakers of Other Languages certificate should:

- Respect other languages and cultures
- Be interested in working with people
- Enjoy a multicultural life
- Take risks in creativity and application of ideas

Linguistic talents and previous language and learning experiences could be valuable assets but are not necessary.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

- This UG certificate consists of 15 semester hours (undergraduate credit). All credits must be earned at the University of Cincinnati; no credits can be transferred in from another university or program.
- LSLS 4078 Practicum in TESL is a course involving a practicum experience with second language learners. Students admitted and enrolled in the Teaching English to Speakers of Other Languages: Online must find their own practicum experience site, which must then be approved by the course instructor.
- Please note that completion of this undergraduate certificate does not lead to an Ohio teaching license. In addition, enrollment in this certificate program does not lead to eligibility for a visa and the program does not provide any financial support.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Teaching English to Speakers of Other Languages UG Certificate

Admission Requirements

This program is open to both education major students and non-education major students who are in good academic standing, with a cumulative university grade point average of 3.0 or higher and the desire to succeed. Simply apply for the certificate and register for the appropriate classes.

Although admission is open to any major, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Education majors may be admitted into a course in the UG TESOL certificate program in the spring semester of their sophomore year, but that does not guarantee that students will be admitted to the professional cohort.

Please note: In order to obtain this certificate, 50% or more of the required coursework must be taken from the College of Education, Criminal Justice, and Human Services. Application materials for the certificate program can be located here.

Applicants must submit:

- Proof of having graduated from a secondary education program either in the US or from your home country.

- Proof of one year of post-secondary experience (30 semester hours) or equivalent experience. A short explanation of the equivalent experience will be reviewed by the TESOL faculty.
- International students should have all of their university transcripts evaluated by a member of the National Association of Credit Evaluators, such as SpanTran or WES. Please have the evaluator send both the course-by-course evaluation and the original, official university transcripts.

All documents must also come with a professional, certified English translation, if needed. Notarized/certified copies of original documents are considered official.

International students should send TOEFL test scores to UC directly from the testing agency. The minimum TOEFL iBT total score is 66, with at least 15 points for each separate section. The IELTS overall score is 6 with a minimum of 5.5 for each section. Link for UC test codes: http://://admissions.uc.edu/information/international/requirements.html

Graduation Requirements

Students must complete program requirements with a grade of C or better in order to obtain the certificate. Students who already hold an initial Ohio teaching license who would like to add the K-12 TESOL endorsement must apply to the Ohio Department of Education.

Application Deadlines

Application deadlines:

- Fall semester - July 1

Transition and Access Pathway (TAP)

Duration: **4 Years** Award: **Certificate**

Overview

The Transition and Access Program has been recognized by the US Department of Education as a Comprehensive Transition and Postsecondary program (CTP). Comprehensive Transition Programs must be:

1. Offered by a college or career school and approved by the U.S. Department of Education;
2. Designed to support students with intellectual disabilities who are seeking to continue academic, career and technical, and independent living instruction to prepare for gainful employment.
3. Offers academic advising and a structured curriculum.

The Transition and Access Program provides a four-year college experience for adults with intellectual and/or developmental disabilities. Students enrolled in TAP live on campus, take at least one UC undergraduate course for credit or audit, and are enrolled in approximately four UC Transition and Access Program courses each semester. TAP courses are developmental and designed to support students in developing competencies related to vocational skills, self-determination (one's ability to see themself as the causal agent in their life and act accordingly), social competence, independence, and community living.

Success

Successful TAP graduates will be able to:

- Demonstrate self-determination skills like choice making, problem solving, decision-making, and goal setting to achieve their person-centered outcomes and function as independent adults.
- Recognize and express their personal preferences, interests, needs and strengths
- Independently utilize technologies to assist in daily living
- Exhibit ability to complete daily living skills such laundry; personal hygiene and grooming; making healthy lifestyle choices; basic prevention and treatment of common illnesses or injuries; community safety; and utilizing public transportation.
- Demonstrate ability to engage in appropriate behavioral choices, emotional regulation and conflict resolution, and deliberate the impact of choices and decisions to anticipate consequences .
- Demonstrate effective interview skills and appropriate work-related behaviors
- Identify specific employment opportunities and the vocational skill requirements in their field of interest .
- Create a resume and digital portfolio that highlight their strengths, skills, and vocational experiences.
- Apply the knowledge and skills they learned to gain competitive employment after completion of TAP.

Violence Prevention

Online

Duration: 1 Year Total Credits: 18 Award: Certificate

Overview

Violence prevention is an important competency for anyone working in the community. The violence prevention certificate offered through UC's College of Education, Criminal Justice, and Human Services (CECH) is designed to:

1. Explain the etiology and impact of family, community and school violence from biological, psychological, and socio-cultural perspectives.
2. Assess and develop a family, community, or school prevention plan by using theoretically-grounded, evidence-based violence prevention strategies.
3. Identify risk and protective factors for violence in the family, community, and school.
4. Identify and apply the key ethical considerations when implementing violence prevention strategies.
5. Deliver accurate, culturally competent violence prevention education to consumers and other professionals by developing appropriate materials and using appropriate techniques.
6. Organize family, community, and school violence prevention activities by identifying needs and resources, then engaging community and school partners to mobilize these efforts.
7. Advocate for public policy and environment change by identifying policy makers, planning initiatives, and implementing strategies.
8. Demonstrate professional growth and responsibility by utilizing current prevention theories and practicies, collaborating with other professionals, adhering to legal and professional standards, and advancing her or his own cultural competence.

Success

Students who have an interest in working in the community providing assistance to others are great candidates for the certificate in violence prevention.

Students who excel in the violence prevention certificate program often have very strong interpersonal skills and work well with others. In addition, having excellent written and verbal communications skills will assist these students to excel in the workforce in a number of positions.

Career

The violence prevention certificate was developed as a collaborative effort between the substance abuse counseling and health promotion and education programs and practitioners in the fields implementing violence prevention strategies. Aspects of the program are well suited for those who come in contact with and may assist addicted persons and their families. Graduates of this program will be prepared for the careers listed below. The violence prevention in families, schools and community undergraduate certificate program is a course of study preparing students to identify vulnerable individuals, families, and communities and to plan effective strategies to prevent the occurrence or recurrence of violence and abuse. There are no practicum or internship experiences associated with this certificate program. Courses will be taught

in an online format by School of Human Services faculty and selected adjuncts working in the field of children advocacy, family law, and general prevention. This program offers the convenience of online courses taught by experienced faculty and practitioners in the substance abuse counseling field.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Current University of Cincinnati students should maintain a minimum 2.0 GPA with UC before applying and continuing in the program. Simply apply for the certificate and register for the appropriate classes.

Graduation Requirements

In order to complete the online certificate in violence prevention from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 3.0 university grade point average (on a 4.0 scale).
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.

Application Deadlines

Application deadlines for all students are as follows:

- fall semester - July 1
- spring semester - November 1
- summer semester - March 1

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

Web Development

Duration: **1 Year** Total Credits: **18** Award: **Certificate**

Overview

This Web Development certificate is designed to provide core skills to become a proficient webmaster. This is a vendor neutral certificate program. The following courses are suggested as a template. Students can design their own learning path with the agreement of the department.

The Department of Information Technology offers four professional certificate programs in information technology (IT). This certificate is designed for individuals wishing to gain additional knowledge and skills in the field of IT. Furthermore, professionals, wishing to renew and/or acquire skills and knowledge that are current in IT, can also use this learning path to enhance their career goals. The certificate is designed to help students apply, as well as integrate, current computing technologies to expand their fields of expertise and enhance career objectives.

As the modern society becomes more and more intertwined with technology, IT quickly turns into any productive individual's must-acquired skill. Regardless of an individual's career objectives, a concentrated study in IT, in a relatively short period of time, shall certainly enhance his/her skills in the work place, as well as widen the prospect of career choices.

Success

This certificate is designed to provide core skills to become a proficient webmaster. This is a vendor neutral certificate program. The following courses are suggested as a template. Students can design their own learning path with the agreement of the department.

UC Advantages And Special Opportunities

The courses required for this certificate are part of the bacheor's degree in information technology offered at the University of Cincinnati. The courses are applied in nature and students will not only learn theoretical concepts but also hands-on computing skills. Feel free to contact the IT department head for details on the current specific technologies being taught in the courses.

Admission Requirements

This program is open to students holding a baccalaureate degree with a cumulative university grade point average of 2.0 and the desire to succeed. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. Interested students should meet with a UC College of Education, Criminal Justice, and Human Services Student Services staff member for appropriate advising. Please note: In order to obtain this certificate, 100 percent of the required coursework must be taken from the College of Education, Criminal Justice, and Human Services. Application materials for the certificate program can be located at the Application Link.

Graduation Requirements

To obtain the IT certificate, a student prior to graduation, must have successfully completed all program requirements.

A 2.0 average must be achieved in these courses to receive the certificate.

To receive the information technology certificate (suitable for framing), a written request must be submitted to the academic director within one year of program completion. All required courses must be completed within a two-year period from date of acceptance into the program.

Application Deadlines

Application deadlines for all students are as follows:

- Fall Semester: August 1
- Spring Semester: December 1
- Summer Semester: March 1

Yoga Studies

Duration: **2 Years** Total Credits: **18** Award: **Certificate**

Overview

Students in the Yoga Studies Certificate focus on the history, theory, philosophy, and practice of yoga and how it can benefit them in their everyday life. Additionally, the principles gained from the certificate will give an understanding to the benefits yoga can have when integrated into other professional settings, such as exercise science, physical or occupational therapy, social work, mental health counseling, psychology, education, and more. The Yoga Studies certificate is interdisciplinary in nature, consisting of coursework from CECH, the College of Medicine, and the College of Arts & Sciences. Students will complete 8 credits of core coursework, 4 credits of applied Yoga Studies coursework, and 6 credits of electives for a total of 18 credit hours.

Career

Students who complete the Yoga Studies Certificate will be able to: explain the foundational concepts of Yoga through in-depth study of the Eight Limbs of Yoga and the four Paths of Yoga; demonstrate simple and complex yoga postures through the incorporation of proper alignment and breathwork; apply various yogic practices in everyday life such as meditation mindfulness guided imagery and journaling; explain the mental physical and spiritual benefits of yoga practice and its applicability to the well-being of self and others. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Criminal Justice

Duration: **4 Years** Total Credits: **18** Award: **Minor**

Overview

The Criminal Justice Minor provides students with a basic framework of knowledge regarding the criminal justice system. The minor allows students with an interest in criminal justice to incorporate formal coursework into their existing major.

The study of criminal justice is designed to provide students with an understanding of criminal offending and the criminal justice process. As society continues to grow, so does the need for this career field and the understanding of how and why such behavior occurs. This program stresses an interdisciplinary study of criminal justice in America. Those interested in careers in criminal justice, crime prevention, child behavioral problems, adolescent delinquency, or effective intervention will find this minor extremely valuable.

Success

Students pursuing a minor in criminal justice have a wide variety of academic interests and talents. Many of our students want to combine their existing major in political science, psychology, sociology, or substance abuse counseling with a background in criminal justice. However, majors such as accounting, information technology, organizational leadership, or a foreign language seem to have greater career/job opportunities.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

This curriculum information is intended as a general information guide for students considering enrollment in this program. **These online tools are designed to assist you, but are not a substitute for planning with an academic advisor.**

If interested, you can apply online. If you are currently confirmed or enrolled, you can check your degree requirements online.

Early Childhood Education and Development

Duration: **1.5 Years** Total Credits: **18** Award: **Minor**

Overview

The Early Childhood Education and Development minor offers students the opportunity to develop an understanding of how children develop from birth to age five. Students will get an introductory experience with early child care and infant and toddler care. The minor provides students with knowledge about developmental concerns with young children and how to best work with the families of children. Students will be introduced to the concept of play as an important part of a child's early learning and development and also learn about the basics of developing creative instructional environments for young children. The required courses provide students with a beginning overview of child development and components of early learning environments.

Success

Successful students will have good time management skills. They will be capable of completing the required minor coursework online and on campus. Students interested in this minor have the desire to develop and broaden their knowledge about how children develop and learn in their early years.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

Students from any UC program who believe that this minor will benefit them in their learning and future career are eligible to take the courses required to complete this minor.

Health Education

Duration: 1 Year Total Credits: 18 Award: Minor

Overview

The health promotion and education minor provides students with a basic framework of knowledge and skills regarding the health promotion and education profession. The minor allows students with an interest in health promotion to incorporate formal coursework into their existing major.

Health educators work to improve the health of individuals or communities, depending on their work setting and job responsibilities. For example, health educators working in health departments often are concerned with the health of the community they serve and may develop programs to impact people living in the community. Health educators working in business/industry may be working one-on-one with individuals to help them modify and improve their diet, increase their physical activity, reduce their stress levels, stop smoking, etc.

The seven basic responsibilities of health educators include:

- assessing individual and community needs for health education
- planning health education strategies, interventions and programs
- implementing health education strategies, interventions and programs
- conducting evaluation and research related to health education
- administering health education strategies, interventions and programs
- serving as a health education resource person
- communicating and advocating for health and health education

Success

Students pursuing a minor in health promotion and education have a wide variety of academic interests and talents. Many of our students want to combine their existing major such as social work, psychology, dietetics, Africana studies, or organizational leadership with a background in health promotion and education. Having this additional knowledge base in health promotion theory and practice provides another avenue for students to put their passions and ideas into action and increase career opportunities.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Information Technology

Duration: 1 Year Total Credits: 18 Award: Minor

Overview

The information technology discipline meets the needs of users within an organizational and societal context through the selection, creation, application, integration and administration of computing technologies.

Success

Successful students in the minor in Information Technology are passionate about meeting the needs of people and organizations and about computing devices. Information technology is a hands-on, skill-based field and successful students are those who enjoy spending time learning and applying different solutions and practicing new techniques and technologies.

Career

The IT minor empowers students in non-IT majors to successfully use and apply computing technologies to their field. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

The IT minor is open to all undergraduate students at the University of Cincinnati with a GPA of 2.0 or above. In the current economy and state of our society, information technology plays an important role in the transformation of all types of organizations and individuals. Students from all disciplines will be highly empowered and prepared to enter their career field with this minor.

The IT minor requires 18 credit hours of information technology courses (six semester courses). Courses for the IT minor can be chosen to provide breadth of understanding or depth of knowledge and skills in one or more of the five areas of IT: networking/systems, software application development, digital media, databases and web developments. For example, a student interested in a breadth of knowledge may take 1000 or 2000 level courses covering the fundamentals of all these areas. However, a student desiring an-in-depth skill in one of the area may focus on 2000, 3000 or 4000 level classes in one or two of the areas.

Due to the broad nature of the disciplines in the university, the IT minor is designed to be customized to fit the knowledge and career goals of the student. One student may be interested in general understanding of IT, so they would take Implications of IT, Information Security & Privacy, Human Computer Interaction, System Analysis & Design and Management in IT. Another student may be interested in developing skills in mobile application development, so they would take Basic iPhone Development, Computer Programming I and II, Mobile Application Development and Database Management I. And a third student, interested in computer security, might take Computer Programming I, Info Security & Privacy, Implications of IT, Network Security and Computer Forensics. There are unlimited possibilities to customize the minor in information technology to build on a student's existing knowledge and support their career goals and interests.

UC Advantages And Special Opportunities

The Information Technology Minor requires small number of classes (6), but offers great value to students in all majors. Courses are hands-on and enable students to gain a great skill set that is in high demand. Courses are available during the day, evening, and online. Students can gain generalized skills in information technology or in-depth skills in one or more specific areas such as mobile application development (iPhone and Android), web application development, software application (Java, .NET), network security, computer forensics, network system administration, and cloud computing, among many others.

Admission Requirements

This program is open to students enrolled in a baccalaureate program, in good academic standing with a cumulative university grade point average of 2.0, and the desire to succeed. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. This expectation would include earning a C or higher in all minor coursework.

Graduation Requirements

Students should meet with a UC College of Education, Criminal Justice, and Human Services Student Services staff member for appropriate advising. Please note: In order to obtain this certificate, 100 percent of the required coursework must be 18IT courses, and the student must have, or be completing a baccalaureate at the University of Cincinnati. Application materials for the certificate/minor program are on the CECH minor application site.

Law and Paralegal Studies

Duration: 1 Year Total Credits: 18 Award: Minor

Overview

As defined by the American Bar Association, "A paralegal is a person qualified by education, training or work experience who is employed or retained by a lawyer, law office, corporation, governmental agency or other entity and who performs specifically delegated substantive legal work for which a lawyer is responsible."

The Paralegal Minor program at the University of Cincinnati is designed to expose students to the field of paralegal studies. This program does NOT prepare students to work as a Paralegal. The utilization of paralegals improves the efficiency, economy and availability of legal services. A paralegal performs substantive legal work under the direct supervision of an attorney. Paralegals must have knowledge and understanding of various legal concepts.

Responsibilities most often assigned to paralegals include maintaining client files, drafting correspondence, performing factual research and legal research, monitoring deadlines, maintaining conflicts-of-interest systems, drafting, investigating and analyzing documents, and acting as liaison with clients and others. Experienced paralegals often accompany counsel during trial and help with document management and organization, witness preparation, and research. These tasks may be performed in a variety of legal areas that include probate, real estate, family law, bankruptcy, corporate, litigation, and intellectual property.

Prospective students should be aware that paralegal education is not the equivalent of a law school education. Graduates of paralegal programs are not qualified or eligible to take the bar examination. Academic credit for paralegal courses is not transferable for advanced standing in law school.

Paralegals may not provide legal services directly to the public, except as permitted by law.

Success

Paralegals are expected to write clearly and communicate effectively, both orally and in writing. Paralegals must possess a high degree of motivation and analytical reasoning capability. They need to pay attention to detail. Candidates should also be responsible, well-organized, mature individuals who are sincerely interested in pursuing a career as a paralegal. They must be trustworthy and discreet. Paralegals, like attorneys, are required to hold a position of trust with their client. As a paralegal, you must respect attorney-client confidentiality. Paralegals must possess good "people skills" and be able to work as part of the legal team. Computer skills are essential.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Sport Administration

Duration: 1 Year Total Credits: 18 Award: Minor

Overview

The sport administration minor provides opportunities to students interested in a career in sport business who are not majoring in sport administration.

Sport is a $453 billion dollar industry. Given the economic magnitude and the pervasive nature of sport in society, the need has never been greater for education/trained sport managers. However, competition is fierce for entry level positions within sport. Those with the best education have the best opportunity to obtain a position and be successful. The sport administration minor has been designed to develop specific competencies within the field of sport management.

Success

Successful sport administration graduates must have technical sport business skills as well as conceptual skills to see the big picture. Additionally, a successful sport manager must have a high level of interpersonal skills to build and maintain positive relationships with an array of constituents. Sport administrators also require excellent communication skills and the ability to lead and motivate others.

Sport management success depends upon critical thinking and creative problem solving with an emphasis on teamwork. However, the most important factor to success is a love of sports.

Career

There are approximately five million people working in sport-related occupations. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Minoring

The sport administration minor is available to all matriculated baccalaureate students who are in good standing and have a minimum 2.0 GPA. Sport business competencies will be developed through the successful completion of the following courses: Introduction to Sport Administration, Ethical Issues in Sport, Sport Management, Sport Marketing and Sport Finance and Development as well as one senior level elective: Sport Facilities and Event Management, Sport Public Relations, Professional Selling in Sport or Sport Law and Governance.

Adult/International TESL

Online

Duration: 1 Year Award: Graduate Certificate

Overview

The Adult/International TESL Certificate is designed for those individuals who intend to teach English as a Second Language (ESL) or English as a Foreign Language (EFL) to adult learners, either domestically or abroad. The certificate is issued by the University of Cincinnati. Certificate graduates are qualified to work in international and domestic language schools or in community ESL/EFL programs for adults.

Success

Experience in working with diverse populations; interest in cultures, languages, and teaching; commitment to social justice and promoting diversity; love of travel.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Advising

Dr. Mary Benedetti
mary.benedetti@uc.edu

Special Programs

Annual study abroad opportunities. Practicum possibilities include international sites, community agencies, and language schools, both university and proprietary.

Admission Requirements

The applicant must possess a Baccalaureate degree from an accredited college or university.

The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the Bachelor Degree. The applicant who possesses a master's degree prior to admission must have a graduate grade point average of at least 3.0 in any graduate level work undertaken before admission. All calculations are based on a 4.0 scale.

In rare instances, candidates who graduated from a non-accredited college or university or who do not meet the minimum grade point averages requirement for admission may be admitted based upon an evaluation of evidence submitted by the candidate. As a minimum, the evidence must address mastery of the knowledge prerequisite to the courses required by the program, acceptable writing skills, the ability to engage in critical thinking, and a personal commitment to completing the program. The evidence, very often including Graduate Record Examination (GRE) scores, must convincingly demonstrate the candidate's potential for success in graduate level work.

Admission decisions are not be made on the basis of race, age, sex, color, religion, sexual orientation or disability.

Candidates who are not accepted for admission may reapply once they have addressed the weaknesses identified during their initial application review. During that period, such applicants may be encouraged by the program to enroll in appropriate course work to develop the knowledge, skills, and values deemed necessary for admission into the program, or to demonstrate that the applicant already possesses such qualifications. Whether such course work may apply to the degree program is left to the discretion of the program. Applicants may also be encouraged to take or re-take the GRE. Completion of recommended course work or the GRE does not guarantee admission into the program.

Advanced standing for a limited amount of course work taken prior to admittance to the program is possible. Course work completed 5 or more years prior to admission will not be applied to the requirements. To maintain active status in the program, students must register for at least 1 semester credit every academic year.

The application is not complete, and cannot be reviewed, until the School of Education has received all of the following:

1. A cover letter clearly stating to which degree and program strand (i.e., Adult/International or K-12 TESOL) the application is being made.
2. A statement of the applicant's academic and professional goals, approximately two pages long. This writing sample will be used as one of the criteria for evaluating the application. The applicant should explain specifically what areas s/he would like to study so that an appropriate advisor may be assigned to the applicant if admitted into the program.
3. A resume relevant to academic and professional data. It should include the applicant's name, address, phone, email, colleges attended with degrees, dates conferred, and grade point average, employment history, professional experience, present employer, and names of references.
4. Three letters of recommendation from people familiar with the applicant's academic and professional abilities. At least one letter should be from a faculty member in higher education. Those writing letters should explain who they are, their relationship to the applicant, and what they know of the applicant's academic and professional abilities. The applicant should be prepared to provide the recommenders e-mail addresses in the electronic application. Since recommenders are not prompted to submit their letters until the electronic application has been submitted, and application fee paid, it is wise to encourage recommenders to prepare their letters in advance so that they can upload them immediately upon receipt of the prompt.
5. Transcripts showing all undergraduate and graduate course work completed, including degrees granted and dates of degrees conferred. Applicants whose previous degrees were earned at the University of Cincinnati may substitute "on-campus" transcripts.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School	Graduate School
University of Cincinnati	University of Cincinnati
110 Van Wormer Hall	2614 University Circle
P.O. Box 210627	110 Van Wormer Hall
Cincinnati, Ohio 45221-0627	Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.**

Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese: http://cqv.chinadegrees.cn/cn/
- English: http://www.chinadegrees.cn/en/

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School	Graduate School
University of Cincinnati	University of Cincinnati
110 Van Wormer Hall	2614 University Circle
P.O. Box 210627	110 Van Wormer Hall
Cincinnati, Ohio 45221-0627	Cincinnati, Ohio 45221-0627

Changing Majors Within UC

Courses taken prior to admission into the program may be eligible for transfer into the program, if taken within 5 years prior to admission and if approved by the program faculty. Official paperwork is required and the appropriate forms may be obtained from the Director of Graduate Studies. To maintain active status in the program, students must register for at least one credit every academic year. Degree requirements must be completed within 5 years of date of admission.

Up to nine (9) semester credit hours can be transferred into the program upon approval of the department.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. For a list of translation/evaluation agencies accepted by the University of Cincinnati, please contact the International Students Services office: www.isso.uc.edu; 513-556-4278

The Test of English as a Foreign Language (TOEFL), IELTS, or PTE is required of all applicants whose native language is not English. The following minimum scores must be obtained:

- Internet-Based Test (iBT): 79-80 OR
- Paper-Based Test (PBT): 550
- IELTS: 6.5
- PTE:53

All exams must have been taken within the two-year period preceding admission. The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office at (513) 556-4278, www.isso.uc.edu

Graduation Requirements

- Students may graduate at the end of any semester provided they meet the necessary degree requirements and all Department and University deadlines. Students should confer closely with their advisors regarding graduation as they approach the completion of their degree requirements. The initial step in the graduation process consists of a formal application for

graduation. This must be done by the announced deadline (usually during the semester prior to the semester of anticipated graduation) and is completed online at http://grad.uc.edu/student-life/graduation.html.
- A complete list of important deadlines and responsibilities that must be met prior to graduation, as well as further instructions and guidelines for completing the application for graduation can be found at http://grad.uc.edu/student-life/graduation.html.
- The student must be registered for at least one graduate credit in their program in an academic year, after having met minimum degree/candidacy requirements to be considered a graduate student throughout the academic year. Further, students must be registered for at least one graduate credit during the academic year in which they will graduate.

Before graduation for all students, submission of Notification of Removal of all NG, N, I, UP, SP, and F grades must be sent as well as posting of all satisfactory grades for the graduation semester.

Analysis of Criminal Behavior

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The graduate certificate in Analysis of Criminal Behavior builds on the Crime, Law, and Justice specialization within the CECH School of Criminal Justice Master of Science program. Students are provided with the conceptual knowledge and analytical skills relevant to characterizing patterns of individual criminal behavior and responding to it.

This certificate enhances students' educational experiences by providing a better understanding of the origins and patterns of individual offending, focusing especially on emerging topics of importance like white collar crime and cybercrime. Crime analysis is an emerging subfield within corrections agencies that involves assessing individual behavior and offering empirically-based assessment as to the offender's risks and needs. This requires a degree of basic conceptual knowledge of criminal behavior as well as some understanding of measurement and data analysis.

Student learning outcomes for this program:

- Students will critically analyze the respective strengths and weaknesses of individual and aggregate criminological theories.
- Students will identify the distinguishing characteristics of certain crime types (cybercrime, white-collar crime), offenders (serious and life-course-persistent offenders), and victims.
- Students will analyze data on different types of criminal offending and make cogent presentations of those analyses.
- Students will evaluate efforts to prevent various types of criminal offending.
- Students will link theories of offending and profiles of offenders to intervention strategies.
- Students will analyze predictors and correlates of crime across diverse populations.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum Guide Versions:
Analysis of Criminal Behavior Curriculum Online Revised June 2018

Admission Requirements

Students already enrolled in the Criminal Justice Master of Science program must be in good academic standing according to the School of Criminal Justice and Graduate School Handbooks.

The requirements for non-matriculated students are:

- Resume or Curriculum Vitae
- Brief Statement of Purpose
- Letter of Recommendation
- Unofficial transcripts are used for admissions review. Official academic transcripts are required when offered admission.
- Baccalaureate Degree from an Accredited Academic Institution

These application materials will be systematically reviewed by the School of Criminal Justice graduate admissions committee to ensure that the student will be able to meet the standards in the certificate courses.

International Student Requirements

International students must submit TOEFL scores in alignment with the Graduate School requirements.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Applications are accepted continuously throughout the year, with three enrollment periods: fall, spring, and summer.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

CJ8013	Seminar in Juvenile Justice	3
CJ8072	Seminar in White-Collar Crime	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Analysis of Criminal Behavior

Duration: **1 Year** Total Credits: **12** Award: **Graduate Certificate**

Overview

The graduate certificate in Analysis of Criminal Behavior builds on the Crime, Law, and Justice specialization within the School of Criminal Justice Master of Science program. Students are provided with the conceptual knowledge and analytical skills relevant to characterizing patterns of individual criminal behavior and responding to it.

This certificate will enhance students' educational experiences by providing a better understanding of the origins and patterns of individual offending, focusing especially on emerging topics of importance like white collar crime and cybercrime. Crime analysis is an emerging subfield within corrections agencies that involves assessing individual behavior and offering empirically-based assessment as to the offender's risks and needs. This requires a degree of basic conceptual knowledge of criminal behavior as well as some understanding of measurement and data analysis.

Autism Spectrum Disorders

Online

Duration: 1 Year Total Credits: 15 Award: Graduate Certificate

Overview

The Autism Spectrum Disorders (ASD) graduate certificate plan of study program supports students in:

- understanding the characteristics of ASD,
- locating and linking evidence based instructional practices (e.g., structured learning environments, visual supports, systematic instruction) to the characteristics of ASD, and
- implementing interventions for individuals with ASD.

At the end of the program, students will be able to:

- Describe the components of a well structured learning environment for individuals with ASD.
- Locate and evaluate research related to ASD.
- Describe the characteristics of ASD and link these to evidence based interventions (including assessments) for individuals with ASD.
- Implement evidence based interventions with individuals with ASD.

Do I have to be a Special Education teacher?

No. The ASD certificate program is designed for professionals (special education teachers, general education teachers, school psychologists, speech language pathologists, paraeducators/class support staff) and family members of individuals with ASD who already hold a bachelor degrees in education related fields, this is not a requirement of the program.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Advising

For information on the application process for the ASD certificate program, please email Kate Doyle.

UC Advantages And Special Opportunities

With close connections to the community and Cincinnati Children's Hospital Medical Center, UC is uniqely positioned to offer the ASD certificate program.

Admission Requirements

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature.

Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese
- English

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

Application Deadlines

Admission Term	Application Deadline	Notification By
Fall	7/1	8/1

Spring	11/15	12/15
Summer	4/1	4/15

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Gainful Employment (GE) Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- At public and private not-for-profit institutions: Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- At for-profit institutions: All Title-IV eligible instructional programs, degree and non-degree.

Behavior Analysis

Online

Duration: 1.5 Years Total Credits: 21 Award: Graduate Certificate

Overview

Behavior Analysis applies the basic principles of behaviorism to examine human behavior and develop and implement effective plans to change behavior. Professionals with training in behavior analysis work in a variety of educational and clinical settings to help individuals with behavior and learning problems. To learn more about UC's online Graduate Certificate in Behavior Analysis, please visit behavioranalysis.uc.edu.

Success

Individuals who wish to make a difference and advance professionally in an educational or clinical setting would most benefit from the online Graduate Certificate in Behavior Analysis. This program will help professionals working with individuals with behavior or learning problems.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Behavior Analysis Certificate Curriculum 2020-2021

Advising

Students enrolled in the online Graduate Certificate in Behavior Analysis receive support from the very first moment they inquire about the program through graduation. An Enrollment Advisor is available to answer questions and guide future students through the application process. Once a student is accepted into the program, a Program Manager works directly with the student to register for courses, acquire the appropriate course materials & textbooks, and keep students informed about graduation and other topics relevant to the program.

Off-Site Admissions Center
877-398-3059

For more information, visit the Behavioral Analysis progrma page.

UC Advantages And Special Opportunities

- The program is grounded in the ethical and best practices recommended by the Behavior Analyst Certification Board and is designed to expand students' skills in the core competencies of applied behavior analysis.
- The program addresses a wide array of behaviors associated with a variety of disability categories in both educational and clinical settings.
- The program addresses the specific and comprehensive use of learning principles, such as operant and respondent learning. It also has an emphasis on prevention and early intervention.
- Courses highlight the Individuals with Disabilities Education Act and the provision of assessment and intervention services.
- Coursework will provide students with the required knowledge in core areas of behavior analysis including:
  - Behavioral assessment;
  - Functional behavior assessment/analysis;
  - Intervention for academic and behavior problems;
  - Data-based decision making and single-case design research methodology; and
  - Ethical standards for practice.

Admission Requirements

- Bachelor's degree from a regionally accredited institution in areas related to Applied Behavior Analysis, Education, Psychology, or other related degrees
- No GRE required for the certificate program
- Undergraduate GPA of at least 3.0 or 3.0 in the last 60 semester hours (or 90 quarter hours)
- Preference is given to individuals who currently work in an environment where skills in behavior analysis are used

For more information on admission requirements, contact an Enrollment Advisor by clicking here.

International Student Requirements

International students must prove English proficiency prior to being admitted. English proficiency can be documented in several ways. The most common way is by providing a Test of English as a Foreign Language (TOEFL) score. The TOEFL score must meet University, College, and Departmental requirements prior to being admitted including minimum scores of 580 (paper test), 237 (computer test), and 92 (internet test).

Any TOEFL score not meeting a departmental requirement must be waived by the Department Head or Graduate Program Director. However, any TOEFL score not meeting the University minimum requirement of 520 (paper test), 190 (computer test), or 68 (internet test) must be approved for a waiver from the Associate Dean of the Graduate School. Please be advised that some students may send computer based test scores, while others the traditional paper test or the new internet based test. English proficiency can also be documented with a 6.5 overall ban score on the International English Language Testing System (IELTS). English proficiency can further be demonstrated with a 47 on the PEARSON Test of English (PTE). Finally, English proficiency can be demonstrated by completing a bachelor's degree at an English speaking college/university or by completing Level 112 of English instruction at ELS Language Centers.

Graduation Requirements

In order to complete the online Graduate Certificate in Behavior Analysis from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 3.0 university grade point average (on a 4.0 scale).
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.

Application Deadlines

The online master's degree program in Foundations in Behavior Analysis accepts applications three times each year — Fall, Spring, and Summer. Please visit behavioranalysis.uc.edu for specific application deadlines.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Gainful Employment Disclosure

Blended Online Learning and Teaching

Online

Duration: 1 Year Total Credits: 15 Award: Graduate Certificate

Overview

The Blended and Online Learning Technology graduate certificate provides students the competencies and skillsets in both education and technology to integrate multimedia into blended and online learning settings. The UC BOLT program leverages a pedagogy for online and blended teaching and learning processes to help learners thrive in today's classrooms. The curriculum draws from fields of education, design, and information technology. Students will develop the skills in eLearning authoring tools to design, manage, and lead online classrooms. Our students are also able to obtain a professional certification in a variety of recommended industry tools such as Apple, Google, Microsoft, Adobe, and more!

Success

Instructors successful in the online and blended environment understand the challenges and benefits of developing, delivering and managing online and blended learning. They can successfully apply learning theory and sound pedagogical practices to the online environment and are focused on student success and delivering engaging, collaborative, active learning experiences. Educators in this field need to be able to collaborate with and accept feedback from colleagues in the field with the goal of continuous improvement of their courses. Willingness to learn new technology, flexibility, organization, and openness to new and innovative ideas are also key traits of successful educators in this field. Successful online educators should have a passion for creating e-learning opportunities learners can universally access and value and support a diverse group of learners.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

The Blended Online Learning and Teaching graduate certificate is offered by the School of Education in the College of Education, Criminal Justice and Human Services. The program is designed for students to take two courses in the fall and one or two courses in the spring and summer semesters to complete the certificate in one academic year.

At the end of the program, the student will be able to:

1. Apply learning theories and sound pedagogical practices to the instructional design and development process
2. Apply a systematic process to design instructional strategies that meet identified learning contexts and needs.
3. Create authentic, technology-mediated learning experiences.
4. Evaluate learning technologies and strategies using a variety of methods.
5. Analyze current research and emerging trends in the area of learning technologies.
6. Develop strategies to encourage active learning, application, interaction, participation, and collaboration in online and blended environments.
7. Facilitate effective learning in online and blended learning environments.
8. Demonstrate mastery of contemporary learning technologies.
9. Explain the instructional delivery continuum, including associated strengths and affordances.
10. Remain cognizant of the diversity of student academic needs and make appropriate accommodations.
11. Provide students with multiple and varied formative and summative assessments aligned with content and technology standards.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Blended and Online Learning and Teaching (updated 2023)

Special Programs

The Blended and Online Learning and Teaching graduate certificate is applicable to a wide range of educational environments including K-12, higher education, medical education, public education, and corporate training. Instructors in this certificate are current practitioners and leaders in the field, and course materials and activities incorporate the overarching methodology and latest trends in online teaching and learning. Students will experience online learning first hand and practice the skills needed to succeed in the online teaching and learning in every stage of their coursework.

K-12 educators can take courses in the BOLT Certificate program at a reduced tuition rate. See professional development information.

Admission Requirements

The University of Cincinnati welcomes graduate applications from students who:

- Hold a baccalaureate degree from a college or university regarded as standard by a regional or general accrediting agency and
- Have at least a B average (3.0/4.0 system) in relevant undergraduate coursework or otherwise give evidence of promise that is judged satisfactory by the admitting program and the Graduate School.
- Goal Statement: A typewritten statement about professional goals should be submitted that includes brief narratives about: a) previous professional experiences; b) immediate and long-range goals; and c) how the BOLT certificate will help you to meet your goals.
- One (1) Letter of Recommendation

Application Guidelines

The required documents for application are noted in the *Criteria for Admission*. Application to all graduate studies at the University of Cincinnati is fully online and all application materials. Please go to the Graduate School website to submit your application.

Transcripts:

Please refer to the policy provided by the Graduate School.

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

The Blended Online Teaching and Learning Gainful Employment Disclosure can be reviewed here.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency.

The Test of English as a Foreign Language (TOEFL), or successful completion of ELS Level 112, is required of all applicants whose native language is not English. The TOEFL must have been taken within the two--year period preceding admission.

Expectations for TOEFL scores are:

- a minimum of 550 (paper test), 213 (computer-based test), or 79--80 (internet-based test)
- a minimum score on the Test of Written English (TWE) of 4.5
- a minimum score of 50 on the Test of Spoken English.

The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office at (513) 556-4278.

Graduation Requirements

Graduating from this graduate certificate program requires:

1. That the student be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
2. Have all NG, N, I, UP, SP and F grades removed for degree courses.
3. Posting of satisfactory grades for the semester of graduation.
4. Obtain a minimum of a 3.0 GPA
5. Satisfactory completion of all applicable College and program requirements is provided by the major advisor filling out the Checklist for Completion of College/Department requirements for Graduation and sending it to the Graduate School.

Application Deadlines

Prospective students will complete the online application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. Incomplete applications will not be processed or reviewed. Application deadlines are as follows:

- Fall Semester: July 1
- Spring Semester: November 15
- Summer Semester: April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Blended Online Learning and Teaching : Online

Graduate Certificate

Blended and Online Learning and Teaching (updated 2023)

Duration: 1 Year

★Minimum Credits: 15 Credits

Course	Title/Desc	Credit
IDT7160	Multimedia Studio	3
IDT7130	Applications and Issues of Teaching with Technology	3
IDT8030	Design of Blended and Online Learning Environments	3
SPED7052	Universal Design for Learning	3
IDT7100	Designing Online Assessments for Data-Driven Decisions	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Technology Endorsement

Online

Duration: 1 Year Total Credits: 15 Award: Graduate Certificate

Overview

The Computer Technology Endorsement offers licensed educators, in the State of Ohio, the opportunity to gain insight into and practice the necessary skills to create meaningful, engaging, digital learning experiences current for today's classrooms. Having this computer technology teaching endorsement alongside one's teaching credential allows educators additional career opportunities where an understanding of and practice with educational technology integration is required.

This endorsement consists of 15-credit hours and takes one full academic year at a part-time status to complete. Some of the courses offered in this program are:

- Applications and Issues of Teaching with Technology
- Applications of Design in eLearning
- Innovation and Technology Integration

These courses are also offered in our Master of Education in Instructional Design and Technology graduate program and our Blended Online Learning and Teaching (BOLT) graduate certificate.

This certificate also consists of professional experience in the field. During course **IDT 7180: Learning Technology Professional Experience**, students work 7-8 hours per week in a school, non-profit organization, or corporation to gain real-world experience in the field of Instructional Design and Technology.

Career

This endorsement will help build your resume and up your game for taking leadership positions in a school related to technology integration. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Computer Technology Endorsement 2021-2022

Advising

Once admitted into the program, students are supported by a team who addresses questions related to class registration, the sequence of courses, licensure and applying to graduation.

UC Advantages And Special Opportunities

Our Computer Technology Endorsement at the University of Cincinnati will uniquely leverage established partnerships in our local, regional and state K-12 community, providing critical connections to expert practitioners, extending networking opportunities for our students, and expanding students' perspectives on the future of technology in K-12 education.

Admission Requirements

The admissions requirements are as follows:

- Goal Statement
- Resume
- Miniumum 3.0 undergraduate GPA from an accredited institution
- (1) Letter of Recommendation

Transferring To UC

Courses taken prior to admission into the Computer Technology Endorsement program may be eligible for transfer into the program, if taken within 5 years prior to admission. The determination of transfer eligibility is based on a review of transcripts and course syllabi. Practicum coursework cannot be transferred into the program. All transferred courses must have approval of the program faculty.

Graduation Requirements

Program completion can occur at the end of any semester provided all requirements have been met. This includes obtaining a minimum of a 3.00 GPA.

All graduating students MUST apply for graduation to receive their certificate.

Be sure to meet with your advisor first to ensure your eligibility for graduation. After you have met with your advisor, please complete the online application for graduation by the stated deadline.

Once required coursework has been satisfactorily completed, students may take the appropriate state required exam and then apply to the state of Ohio for the Computer Technology Endorsement.

Application Deadlines

Fall Semester – July 1

Spring Semester – Nov 1

Summer Semester – April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Choose three credits from the following:

Students can choose from the following courses for a total of 3 credit hours. IDT 7115 and IDT 7125 can be taken multiple times.

Course	Title/Desc	Credit
IDT7115	Innovation and Technology Integration	1
IDT7125	Professional Learning Certifications in Instructional Design and Technology	1
IDT7135	Applications of Design in eLearning	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Correctional Rehabilitation

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Graduate Certificate in Correctional Rehabilitation provides a better understanding of correctional rehabilitation, and more specifically the use of evidence based programs and practices designed to reduce recidivism. Students are given the opportunity to apply important skills in working with corrections populations. Upon completion of the certificate, students will be well-versed in many principles and practices used in correctional settings that provide rehabilitative services to offenders. These include probation and parole, prisons, jails, community based correctional facilities, halfway houses and group homes, day reporting centers, reentry programs and other correctional settings.

The Certificate in Correctional Rehabilitation is a specialization within the UC School of Criminal Justice that provides a deeper and more comprehensive understanding of the risk, need and responsivity model of offender treatment. Students obtaining a certificate in correctional rehabilitation can take a variety of courses focused on important aspects of the juvenile and adult correctional systems. The two required courses will provide students with a foundation and framework for understanding the correctional system as well as a background in evidence-based interventions for these populations.

Student Learning Outcomes for this program:

- Students will describe the nature of the rehabilitative ideal and how it shaped American corrections.
- Students will analyze the research evidence on competing theories of corrections and individual treatment of offenders.
- Students will apply methods for studying and evaluating alternatives to incarceration.
- Students will analyze components of effective correctional treatments, policies, and strategies.
- Students will apply various approaches to correctional assessment and effective intervention.
- Students will analyze the impact of correctional policy and treatment on various sub-populations, including racial and ethnic minority groups and offenders with substance use disorders and mental health needs

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Correctional Rehabilitation Online 2018-2019

Admission Requirements

Students already enrolled in the Criminal Justice Master of Science program must be in good academic standing according to the School of Criminal Justice and Graduate School Handbooks.

The requirements for non-matriculated students are:

- Resume or Curriculum Vitae
- Brief Statement of Purpose
- Letter of Recommendation
- Unofficial transcripts are used for admission review. Official academic transcripts are required when offered admission
- Baccalaureate Degree from an accredited Academic Institution

These application materials will be systematically reviewed by the School of Criminal Justice graduate admissions committee to ensure that the student will be able to meet the standards in the certificate courses.

International Student Requirements

International Students must submit TOEFL scores in alignment with the Graduate School requirements.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.

- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Applications are accepted continuously throughout the year, with three enrollment periods: fall, spring, and summer.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Crime Analysis and Prevention

Online

Duration: 1 Year Total Credits: 15 Award: Graduate Certificate

Overview

The Graduate Certificate in Crime Analysis and Prevention allows students the opportunity to learn about the development of new information technology, crime reduction and prevention strategies, and ways to address challenging public safety issues. Law enforcement organizations have increasingly started to rely on crime analysis and prevention more than ever before.

The certificate in Crime Analysis and Prevention is a specialization within the CECH School of Criminal Justice that provides students with the conceptual knowledge and technical, analytical skills required of crime analysis and prevention professionals. These skills are also valuable for police officers and managers who may be required to make decisions on the basis of information from analysis of crime patterns.

This certificate will enhance students' educational experiences by providing a better understanding of the field of crime analysis and prevention. Crime analysis and prevention is an emerging subfield within law enforcement that requires practitioners to have specialized knowledge and skills. Like many other fields, crime analysis and prevention has emerged as law enforcement organizations have realized that using data and information can improve their effectiveness. Effective crime analysis and prevention education requires a focus on both conceptual knowledge as well as the implementation of advanced analytical skills; often in nuanced computer programs.

Data-Driven Cybersecurity

Online

Duration: 1 Year Award: Graduate Certificate

Overview

Cybersecurity is a top priority for many businesses and organizations. The complexity of security threats can make it difficult to keep data safe. It's not enough to know how to write code and secure networks; you also need to understand what makes your organization vulnerable and how hackers attack it. To tackle this challenge, we need a new approach: Data-Driven Cybersecurity.

The Data-Driven Cybersecurity Graduate Certificate at the University of Cincinnati prepares a workforce that is capable of understanding the concepts of cybersecurity, analyzing cyber threats, responding to incidents, protecting data network, and maintaining IT infrastructure continuity. This online degree program emphasizes teaching cybersecurity and data analytics software tools that are broadly used by industry cybersecurity professionals.

Students in our online graduate program have the opportunity to practice hands-on skills from completing lab exercises and individual or team projects to creating solutions to cybersecurity challenges. The University of Cincinnati's online program will prepare students to apply data science and big data analytics techniques to cybersecurity problems. This program can be completed at a full-time or part-time pace.

Success

Students graduating from this certificate program will be able to merge cybersecurity concepts and data analytic solutions. Students will receive a dedicated graduate certificate upon successful completion of the program.

For students interested in IT: All twelve graduate credits earned in the certificate are transferable into the Master of Science in Information Technology (MSIT) and PhD in Information Technology degrees.

Career

Information Technology is a fast-evolving field as large technology companies such as Microsoft Amazon Google and Facebook gained bigger influences on world economy especially during and after the COVID-19 pandemic. Cybersecurity as a crucial function of IT already became a highly profitable and independent industry by itself serving the government private businesses and individual consumers. It is estimated that cybersecurity related business will continue to grow faster than the national industry average in the next decade. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Data-Driven Cybersecurity Graduate Certificate Online 2022-2023

Admission Requirements

Admission Criteria:

- A baccalaureate degree from a college or university regarded as standard by a regional or general accrediting agency ***
- At least a B average (3.0/4.0 scale) in undergraduate course work; if the cumulative GPA is below 3.0, a minimum GRE score of 300 is required
  - 3.0+ Analytical; Verbal and Quantitative scores must be 150+ each
- Current curriculum vitae (CV) or resume
- One academic or professional letter of reference
  - Reference should be from a credible source who speaks to relevant IT experience and/or work ethic
- A personal statement that should describe interest in the program and future professional goals in a way that demonstrates a strong record of accomplishments and aptitude for graduate studies.
  - If the undergraduate GPA is below 3.0, the personal statement must also address the low GPA and describe a plan to succeed in a program where a 3.0 GPA or above is required.
  - If your background is not in IT, please be sure to address the following questions in your personal statement:
    - How has your past experience prepared you to be successful in this program? For example, what types of courses (university or online), industry experience, or certificates have you completed to build skills in this area?

***If an applicant's prior degree is not in computing disciplines as in technology, engineering, and sciences, the applicant is required to demonstrate IT skills through work experience and relevant IT certificates. Since cybersecurity is a relatively new discipline, a holistic review will be conducted to determine if a student is prepared to be successful in completing the certificate. Applicants who do not have a computing background or relevant prior experience are advised to first complete the General IT Graduate Certificate which includes 4 prerequisite courses in information security, database management, system adminstration, and programming.

International Student Requirements

Proof of English proficiency is required of all applicants who were educated in a country where the official national language is not English.

- The following exams and minimum scores are accepted as proof of English proficiency:
    - TOEFL: minimum score of 80 (internet-based test)
    - IELTS: minimum score of 6.5 overall band
    - Duolingo (DET): minimum score of 110
    - PTE: minimum score of 54

For additional information regarding accepted waivers, please reference the English Language Proficiency Requirements.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 3.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File a formal graduation application for the certificate by the posted semester of graduation deadline.

Data-Driven Cybersecurity : Online

Graduate Certificate

Data-Driven Cybersecurity Graduate Certificate Online 2022-2023

Duration: 1 Year

★Minimum Credits:

Curriculum

Students must complete two core courses and two elective courses for a total of 12 credit hours.

Core Courses

Students are required to take the following core courses (6 credit hours).

Course	Title/Desc	Credit
IT7020C	Principles of Cybersecurity	3
IT7075C	Data Driven Cybersecurity	3

Faculty-Approved Electives

Students are required to take the following elective courses (6 credit hours).

Course	Title/Desc	Credit
IT7021C	Enterprise Security and Forensics	3
IT7071C	Machine Learning and Data Mining for IT	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Data-Driven Cybersecurity

Duration: **1 Year** Award: **Graduate Certificate**

Overview

Cybersecurity is a top priority for many businesses and organizations. The complexity of security threats can make it difficult to keep data safe. It's not enough to know how to write code and secure networks; you also need to understand what makes your organization vulnerable and how hackers attack it. To tackle this challenge, we need a new approach: Data-Driven Cybersecurity.

The Data-Driven Cybersecurity Graduate Certificate at the University of Cincinnati prepares a workforce that is capable of understanding the concepts of cybersecurity, analyzing cyber threats, responding to incidents, protecting data networks, and maintaining IT infrastructure continuity. The curriculum emphasizes teaching cybersecurity and data analytics software tools that are broadly used by industry cybersecurity professionals.

Students in our graduate program have the opportunity to practice hands-on skills from completing lab exercises and individual or team projects to creating solutions for cybersecurity challenges. The University of Cincinnati's on-campus program will prepare students to apply data science and big data analytics techniques to cybersecurity problems.

Success

Students graduating from this certificate program will be able to merge cybersecurity concepts and data analytic solutions. Students will receive a dedicated graduate certificate upon successful completion of the program.

For students interested in IT: All twelve graduate credits earned in the certificate are transferable into the Master of Science in Information Technology (MSIT) and PhD in Information Technology degrees.

Career

Information Technology is a fast-evolving field as large technology companies such as Microsoft Amazon Google and Facebook gained bigger influences on world economy especially during and after the COVID-19 pandemic. Cybersecurity as a crucial function of IT already became a highly profitable and independent industry by itself serving governments private businesses and individual consumers. It is estimated that cybersecurity-related businesses will continue to grow faster than the national industry average in the next decade. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Admission Requirements

Admission Criteria:

- A baccalaureate degree from a college or university regarded as standard by a regional or general accrediting agency ***
- At least a B average (3.0/4.0 scale) in undergraduate course work; if the cumulative GPA is below 3.0, a minimum GRE score of 300 is required
  - 3.0+ Analytical; Verbal and Quantitative scores must be 150+ each
- Current curriculum vitae (CV) or resume
- One academic or professional letter of reference
  - Reference should be from a credible source who speaks to relevant IT experience and/or work ethic

- A personal statement that should describe interest in the program and future professional goals in a way that demonstrates a strong record of accomplishments and aptitude for graduate studies.
    - If the undergraduate GPA is below 3.0, the personal statement must also address the low GPA and describe a plan to succeed in a program where a 3.0 GPA or above is required.
    - If your background is not in IT, please be sure to address the following questions in your personal statement:
        - How has your past experience prepared you to be successful in this program? For example, what types of courses (university or online), industry experience, or certificates have you completed to build skills in this area?

***If an applicant's prior degree is not in computing disciplines as in technology, engineering, and sciences, the applicant is required to demonstrate IT skills through work experience and relevant IT certificates. Since cybersecurity is a relatively new discipline, a holistic review will be conducted to determine if a student is prepared to be successful in completing the certificate. Applicants who do not have a computing background or relevant prior experience are advised to first complete the General IT Graduate Certificate which includes 4 prerequisite courses in information security, database management, system adminstration, and programming.

International Student Requirements

Proof of English proficiency is required of all applicants who were educated in a country where the official national language is not English.

- The following exams and minimum scores are accepted as proof of English proficiency:

    - TOEFL: minimum score of 80 (internet-based test)
    - IELTS: minimum score of 6.5 overall band
    - Duolingo (DET): minimum score of 110
    - PTE: minimum score of 54

For additional information regarding accepted waivers, please reference the English Language Proficiency Requirements.

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required coursework and program requirements

Gifted Education

Online

Duration: 1 Year Total Credits: 18 Award: Graduate Certificate

Overview

This Gifted Education certificate is designed for licensed K-12 teachers who want to enhance their ability to differentiate instruction and better serve the learning styles of their students. The research-to-practice model allows you to implement research-based practices into your classroom and immediately enhance the learning outcomes of your students.

Coursework is aligned with the Ohio Department of Education Gifted, Creative and Talented Endorsement for Ohio teachers who are interested in pursuing this additional credential. Through the School of Education, all teacher preparation programs are CAEP-approved.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Gifted Education Curriculum 2018-2019

Admission Requirements

- Undergraduate GPA of at least 3.0 on a 4.0 scale
- Current and active early childhood, middle childhood, adolescent/young adult, or multi-age teaching license
- Two satisfactory letters of reference
- Satisfactory Candidate Dispositions Progress Report, completed by a supervisor or principal
- Professional goals statement

Candidates who are pursuing an Ohio GCT Endorsement must also successfully complete each required course with at least a C grade and all performance assessments embedded in courses and practicum.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail: *Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*

Graduate School
University of Cincinnati

110 Van Wormer Hall
Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines “unofficial” transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese: http://cqv.chinadegrees.cn/cn/
- English: http://www.chinadegrees.cn/en/

Verification reports are due to the Graduate School one week prior to the start of the student’s first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:
Graduate School
University of Cincinnati

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

Higher Education Leadership

Duration: **1 Year** Total Credits: **12** Award: **Graduate Certificate**

Overview

The Graduate Certificate in Higher Education Leadership is offered through the College of Education, Criminal Justice and Human Services (CECH), Educational Leadership program. Educational Leadership (EDLD) is the primary discipline charged with providing foundational knowledge to educators, scholars, and future educational administrators as they pursue excellence in research, teaching, and service that addresses real world challenges and innovative solutions that build stronger academic institutions.

Decades of research and reform efforts in higher education have yielded one area of near-universal agreement-- *exceptional educational institutions have excellent leaders*. Effective educational leaders transform existing educational systems and the communities they serve, by which increasing the demand for effective and responsive professional practitioners in higher education. This graduate certificate is designed for graduate students, college and university administrators, school practitioners, and other working professionals with a related academic backgrounds in areas of education, organizational leadership, business and finance, educational law, public policy, and institutional research.

The graduate certificate centers on the nexus between theory and practice and explores critical issues facing higher education leaders, policymakers, and stakeholders today. Collaborations between and among faculty and students as well as linkages with practicing college and university administrators are important components of this graduate certificate.

Career

The Higher Education Leadership graduate certificate is designed to advance the careers leadership competencies and knowledge base of local regional and national college and university of administrators, academic, student affairs professionals, K-12 educational leaders, and for-profit academic administrators. Additionally individuals from other non-profit backgrounds seeking career advancement opportunities in the field of higher education or who are interested in matriculating into similar degree programs such as educational licensures will benefit from the Higher Education Leadership graduate certificate. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum Guide Versions:
Higher Education Leadership 2018-2019

Advising

Karley A. Riffe, PhD

Assistant Professor of Higher Education

Special Programs

The Higher Education Leadership Graduate Certificate is the only graduate certificate offered in Educational Leadership with a Higher Education focus in the State of Ohio. The certificate will prepare individuals for a variety of leadership and professional roles in higher education and postsecondary professional settings. The graduate certificate is the foundation and grounding for an eventual master's degree in Higher Education. The certificate will focus on new and midlevel professionals who have careers or career interests in student services, enrollment management, institutional research, academic affairs, and institutional advancement. With the opportunity to complete the certificate in only one year, students will be able to benefit from learning and networking with students, faculty, staff, and administrators from other two- and four-year institutions in the Greater Cincinnati and Southern Ohio area.

Admission Requirements

Successful applicants will:

- Hold a bachelors degree from a college or university regarded as standard by a regional or general accrediting agency and
- Have at least a B average (3.0/4.0 system) in relevant undergraduate course work or otherwise give evidence of promise that is judged satisfactory by the admitting program

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.

- Obtain at least a 3.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

- Fall: August 1st
- Spring: December 15th
- Summer: May 1st

Information Technology

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

About the Program

The increased prevalence of Information Technology in all sectors of our society is challenging the workforce in unique ways. Users of software applications are challenged by its increased sophistication, connectivity, vulnerability, and the serious implications of errors. The Information Technology Graduate Certificate provides solid foundations in essential Information Technology skills, which have become a must-have for any professional. The hands-on twelve-credit-hour certificate covers the foundations of software development, databases, networking, system administration, information security, and ethical values. The certificate is offered using the CECH virtual environment and can be completed in one summer.

Program Objectives

By completion, you will be able to:

· Identify and explain the specialty areas and concepts of Information Technology

· Demonstrate proficiency in network design, analysis, and security; database design and analysis; and software design and implementation

Graduate Certificate of Information Technology for the Early IT Program

The Graduate Certificate in Information Technology is designed to provide a solid foundation in essential Information Technology skills for teachers who instruct the SoIT's first-year IT courses in our Early IT program schools. Teachers completing the certificate as part of the Early IT program complete the required twelve credit hours and an additional six credit hours. While twelve credits are required to complete the certificate, eighteen hours are required in order to be eligible to teach through the Early IT program. The twelve required one-credit hour courses cover the foundations of software development, database management, networking, system administration, and information security. The additional six one-credit hour courses present content taught in freshman level courses and provide hands-on experience developing the syllabus, creating lectures, and grading assignments. This program is offered online in competency-based education format.

Objectives

By completion of the 18 credit hours, you will be able to:

- Identify and explain the specialty areas and concepts of Information Technology
- Demonstrate proficiency in network design, analysis and security; database design and analysis; and software design and implementation
- Teach the freshman level courses of the SoIT's bachelor's degree at the high school level
- Become adjunct eligible to teach freshman-level courses for the School of Information Technology

Computer Science Endorsement

The SoIT is offering a teaching endorsement licensing option for professional educators seeking additional credentials. The IT graduate certificate program for Early IT is aligned with the State of Ohio's Computer Science Endorsement. Upon completion of the program, students may earn a Graduate Certificate in Information Technology for the Early IT Program or choose to seek the Ohio Computer Science Endorsement. Students seeking the Ohio Computer Science Endorsement must pass a state-required exam and apply to the state for the endorsement after completion of program requirements. The Computer Science Endorsement is added to a teacher's current teaching certificate or license. Therefore, students must have a valid teaching certificate or teaching license (ex., early childhood, middle childhood, adolescence to young adult, multi-age) to be eligible for the Ohio Computer Science Endorsement.

Career

Jobs vary greatly depending on previous undergraduate education and experience. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Information Technology Graduate Certificate 2023-2024

Advising

Students are advised and mentored by the School of Information Technology staff and faculty throughout the program. The School of Information Technology graduate coordinator advises the students through the process of applying, scheduling classes, and receiving the certificate.

Special Programs

Information Technology is a part of nearly every industry. You have your degree and expertise in your job but you want to advance into this new digital age with Information Technology expertise. You can quickly get this information from UC Information Technology faculty by completing the Graduate Certificate in Information Technology. In a single semester, you can gain a foundation in and understanding of Information Technology history and current trends, software design and implementation, network security design and analysis, and database design and analysis.

This certificate educates professionals including teachers, doctors, nurses, and chemists to develop insight into how information technology works within their domain and how to make improvements. You can work within your current field and translate IT to domain experts, become a business analyst for your industry, become the IT expert in a K-12 school, or change positions completely to help develop applications for your industry using your area of expertise.

Admission Requirements

Transcripts will be collected via the admission application process to validate GPA and past degree.

Admission Criteria:

- A U.S. Bachelor's degree or foreign equivalent
- A minimum grade-point average (GPA) of 3.0 or foreign equivalent
- Completed admission application

This program is open to anyone who has a bachelor's degree and meets the admission criteria. The graduate director conducts a holistic review of applications.

International Student Requirements

Admission Criteria:

- A U.S. Bachelor's degree or foreign equivalent
- A minimum grade-point average (GPA) of 3.0 or foreign equivalent
- Completed admission application
- Most International Students must submit an official English proficiency score: TOEFL minimum Paper-based 520, Computer-based 190, Internet-based 80 or IELTS minimum 6.5. To determine if the English proficiency test is required, please see: International Student policy

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 3.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal graduation application for the certificate by the posted semester of graduation deadline.

Computer Science Endorsement

Once coursework and field experiences have been completed, the student may take the appropriate state required exam and then apply to the State of Ohio for the Computer Science Endorsement.

Application Deadlines

Admission to Summer Term only. May 1st – deadline to apply

Accreditation

Competency-Based Education Track

The competency-based education (CBE) track is the recommended option for high school teachers that will teach School of Information Technology core classes as part of the Early IT program. These courses are offered as a complete grouping that starts in the summer semester.

Core Courses

Students must complete the following 9 one-credit hour competency based courses. A minimum grade of 85% in each course is required to pass and receive credit.

Course	Title/Desc	Credit
IT6101C	Introduction to Information Technology	1
IT6102C	Computing Fundamentals: Hardware and Operating Systems	1
IT6103C	Foundations of Programming	1
IT6104C	Digital Media Creation and Publishing	1
IT6105C	Network Basics	1
IT6106C	System Administration Basics	1
IT6111C	Introduction to Database Management Systems	1
IT6112C	Cybersecurity Fundamentals	1
IT6113C	Application programming	1

Faculty Approved Electives

Students are required to complete 3 one-credit hour competency based courses listed below. Those who plan on teaching Early IT courses will need to successfully complete all 9 competencies. A minimum grade of 85% in each course is required to pass and receive credit.

Course	Title/Desc	Credit
IT6124C	Teaching Preparation: Web Development	1
IT6114C	IT Infrastructure and Services	1
IT6115C	Switching and Routing	1
IT6121C	Scripting for Network and Security	1
IT6126C	Teaching Preparation: Database Management I	1
IT6181C	Teaching Preparation: System Administration	1
IT6180C	Teaching Preparation: Computer Networking	1
IT6150C	Teaching Preparation: IT Fundamentals	1
IT6190C	Teaching Preparation: Computer Programming I	1

Bridge Course Track

This track is the recommended option for students transitioning from a non-computing background to a Master in Information Technology (MSIT) to gain prerequisite skills for MSIT core courses without pursuing a four-year undergraduate degree in computing. It is offered in four 3-credit hour courses that are available online and in-person and the courses are offered every semester with regular grading.

Core Courses

Students must complete the following 4 three-credit hour courses with a grade of "B" or higher.

Course	Title/Desc	Credit
IT6035C	Information Security and Assurance (B min)	3
IT6060C	Database Management with SQL Server (B min)	3
IT6081C	System Administration (B min)	3
IT6090C	Computer Programming with Java (B min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Jewish Education

Duration: **1 Year** Total Credits: **15** Award: **Graduate Certificate**

Overview

The University of Cincinnati Certificate in Jewish Education immerses students in the theory and practice of Jewish Education. Intended to support teachers and educational leaders from diverse settings, this certificate will assist participants in deepening their subject area expertise, developing their pedagogical stance, and building inquiry approaches to their teaching and learning. Course work will offer investigations of reflective practice and Jewish education content areas (curriculum, leadership, text study).

Rooted in an educational action research orientation, this course of study will encourage students to construct questions about their own practice, and design projects within their courses that support these questions.

The University of Cincinnati and the Mandel Teacher Educator Institute (MTEI) are pleased to partner to provide a unique educational experience that results in a Graduate Certificate in Jewish Education. All MTEI participants have the option to apply for the Certificate Program.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Admission Requirements

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Admission Requirements:

Individuals with a bachelor degree from an accredited four-year college or university are eligible to apply. It is not necessary to be admitted to a master's degree program to work toward and earn the Certificate, and acceptance to the Certificate does not imply acceptance to a master's degree program. For those who are currently enrolled in a master's degree program, good standing with their individual degree programs is required. Application requirements for admission to the Certificate include:

- a Baccalaureate Degree (Master's Degree is recommended but not required)
- a GPA of at least a 3.0 out of a 4.0 scale for undergraduate coursework

If Certificate courses are to be used as continuing education credits or to fulfill other specific employment requirements, it is the student's responsibility to ascertain their applicability toward those requirements.

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese: http://cqv.chinadegrees.cn/cn/
- English: http://www.chinadegrees.cn/en/

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School University of Cincinnati 110 Van Wormer Hall P.O. Box 210627 2614 University Circle Cincinnati, Ohio 45221-0627	Graduate School University of Cincinnati 2614 University Circle 110 Van Wormer Hall Cincinnati, Ohio 45221-0627

Medical Education (Curriculum & Instruct)

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

Medical education is typically the advanced education of medical/dental/osteopathic students, residents, fellows, nurses, technicians, research staff, and others within a hospital or other healthcare or medical facility. In a broader sense, it also includes the education of patients and their families within those same facilities. While it can also refer in some circumstances to the education of the public regarding specific health conditions or on health and healthy behaviors in general, it is not the same as the field of Public Health (and this degree does not address those needs as much as an MPH would).

This graduate certificate program is designed to provide advanced training in teaching & learning theory and practice to faculty, staff, and allied health professionals who are involved in precepting or teaching activities so that they may improve their curricula and teaching methodologies as well as further the knowledge of the field. It may be taken as a stand-alone certificate program, or prior to enrolling in the master's program. If subsequently enrolling in the medical education MEd program, all certificate courses are accepted as part of the MEd.

The program is offered through a joint partnership of Cincinnati Children's Hospital Medical Center and the University of Cincinnati College of Education, Criminal Justice and Human Services (CECH). The faculty at Cincinnati Children's Hopsital Medical Center comprise the entirety of the University of Cincinnati College of Medicine's Department of Pediatrics. It is open to all fields and specialties.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Pre K-12 Reading Instruction

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The University of Cincinnati offers an online certificate program in PreK-12 Reading Instruction. The certificate program is aligned with the State of Ohio's Reading Endorsement. Upon completion of the program, students may earn a Graduate Certificate in PreK-12 Reading Instruction or choose to seek the Ohio Reading Endorsement. Students seeking the Ohio Reading Endorsement must pass a state-required exam and apply to the state for the endorsement after completion of program requirements. The Reading Endorsement is added to a teacher's current teaching certificate or license. Therefore, students must have a valid teaching certificate or teaching license (ex., early childhood, middle childhood, adolescence to young adult, multi-age) to be eligible for the Graduate Certificate and Ohio Reading Endorsement.

Success

Successful applicants:

- Hold a baccalaureate degree from an accredited college or university
- Have a GPA of at least 3.0 on a 4.0 scale for undergraduate coursework*
- Have basic familiarity with computers and the Internet

*International University credits must be converted to U.S. 4.0 grading scale

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

PreK-12 Reading Instruction (Updated Fall 2024)

Advising

Once admitted into the program, students are supported by a team of advisors who address questions related to class registration, the sequence of courses, and the practica.

UC Advantages And Special Opportunities

Our reading/literacy faculty conducts research and works with teachers in the schools to explore a range of literacy concerns including: emergent literacy, interactive writing, interactive read-alouds, vocabulary instruction, disciplinary literacy, and adolescent literacy. The faculty are regular presenters at national conferences and their publications appears in major journals in the field including *The Reading Teacher and Language Arts*.

Admission Requirements

The following are requirements for admission:

1. The applicant must possess a baccalaureate degree from an accredited college or university.
2. The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the bachelor degree. The applicant who possesses a master's degree prior to admission must have a graduate grade point average of at least 3.0 in any graduate level work undertaken before admission. All calculations are based on a 4.0 scale.
3. In rare instances, candidates who graduated from a non-accredited college or university or who do not meet the minimum grade point averages requirement for admission may be admitted based upon an evaluation of evidence submitted by the candidate.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transferring To UC

Courses taken prior to admission into the Reading Endorsement program may be eligible for transfer into the program, if taken within 5 years prior to admission. The determination of transfer eligibility is based on a review of transcripts and course syllabi. Practicum coursework cannot be transferred into the program. All transferred courses must have approval of the program faculty.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. For a list of translation/evaluation agencies accepted by the University of Cincinnati, please contact the International Students Services office: www.isso.uc.edu; 513-556-4278.

The TOEFL must have been taken within the two-year period preceding admission. The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office here or at (513) 556-4278.

Graduation Requirements

Program completion can occur at the end of any semester provided all program requirements have been met. This includes obtaining a minimum grade of C in each course.

All graduating students MUST apply for graduation to receive their certificates.

Be sure to meet with your advisor first to ensure your eligibility for graduation. After you have met with your advisor, please complete the on-line application for graduation by the stated deadline.

Once required coursework has been satisfactorily completed, students may take the appropriate state required exam and then apply to the state of Ohio for the Reading Endorsement.

Application Deadlines

Admission Term	Application Deadline	Notification By
Fall	7/1	8/1
Spring	11/15	12/15
Summer	4/1	4/15

Your application is not considered complete, and so cannot be reviewed, until the School of Education has received all of the following:

1. A statement of the applicant's academic and professional goals, approximately one page long. This writing sample will be used as one of the criteria for evaluating the application.
2. A resume relevant to academic and professional data. It should include the applicant's name; address; phone; email; colleges attended with degrees, dates conferred, and grade point average; employment history; professional experience; present employer; and names of references.
3. Two letters of recommendation from people familiar with the applicant's academic and professional abilities. If possible, at least one letter should be from a faculty member in higher education. Those writing letters should explain who they are, their relationship to the applicant, and what they know of the applicant's academic and professional abilities. The applicant should be prepared to provide the recommenders e-mail addresses in the electronic application. Since recommenders are not prompted to submit their letters until the electronic application has been submitted, and application fee paid, it is wise to encourage recommenders to prepare their letters in advance so that they can upload them immediately upon receipt of the prompt.
4. An electronic and hard copy of your current Ohio teaching license. Send the hard copy directly to Ms. Laura Dell with a note that this accompanies your electronic application (laura.dell@uc.edu) FAX: 513-556-1001; U.S. mail address below).

Notification: The program reviews the applicant's materials and informs the applicant of its decision after completing the review.

Please note: Application materials will not be returned to the applicant.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
University of Cincinnati's online certificate program in PrekK-12 Reading Instruction is is aligned with the International Literacy Association's (2010) Standards for Reading Professionals, is approved by the Ohio Department of Higher Education, and is accredited by the Council for the Accreditation of Educator Preparation.

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- **At public and private not-for-profit institutions:** Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- **At for-profit institutions**: All Title-IV eligible instructional programs, degree and non-degree.

Principal Licensure

Online

Duration: 1 Year Total Credits: 21 Award: Graduate Certificate

Overview

According to the U.S. Bureau of Labor Statistics, employment of K-12 principals is expected to grow at a slower rate than most professions. Despite this limited job growth, it is estimated that in the next decade 40 percent of today's principals will retire (National Association of Secondary School Principals, n.d.). This shortage has created a two prong dilemma. The first is the perception that the shortages are driven by "demands for a new and different kind of school principal" (Roza, Celio, Harvey, & Wishon, 2003). The expectations of school leaders have taken a dramatic shift in recent years: Building principals are now expected to be instructional experts, who can improve student outcomes and turn failing schools around in short periods of time (Maxwell, 2014; Council of Chief State School Officers, 2015).

Obtaining the Graduate Certificate for Principal Licensure will allow individuals that have more experience and expertise expedite the process to become a licensed principal, thus being able to take on a leadership position.

Success

Successful candidates for this graduate certificate should possess the following attributes:

- Can work with people from across varying cultural, social, economic, and religious backgrounds
- Results oriented
- Collaborative
- Can focus on multiple tasks/projects at one time
- Experience with a wide range of technology
- Believes that all children can learn

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Majoring

The Principal Licensure graduate certificate is designed for a student to complete the program within one year (3 semesters). The program consists of seven (7) core courses. All courses are focused on completing the state of Ohio's requirements for principal licensure. These courses have assignments embedded that provide the student with experiences across all accreditation standards.

Curriculum

Curriculum Guide Versions:
Principal Licensure Graduate Certificate 2019-2020

Advising

All students are assigned a faculty advisor.

Admission Requirements

Candidates who wish to apply to the Principal Licensure graduate certificate program must meet the following requirements:

1. **Prerequisite Degree -** The applicant must possess a Master's degree from an accredited college or university.
2. **Minimum GPA -** The applicant must have a minimum cumulative grade point average of 3.0 in an approved Bachelor degree and Master's degree.
3. **Letters of Recommendation-**All applicants must submit three letters of recommendation. One of the three letters must be from an immediate supervisor that can address the applicant's formal teaching evaluations.
4. **Goal Statement-** Goal statement indicating career goals and area of concentration of interest.

Transferring To UC

On a case-by-case basis, a student may petition to have graduate credit from an accredited college or university counted as the equivalent of another course in the curriculum and accepted as transfer credit. In such cases, a student will have to supply a course syllabus to ensure that the content in the course taken at another university is equivalent to the content of the course in the Principal Licensure graduate certificate. A course with a similar name or the same name as a course offered at the University of Cincinnati does not necessarily mean that the content of the course is similar enough to accept it as transfer credit to our program.

Students may transfer up to *50%* of graduate credit from an accredited college or university. Courses taken outside an accredited college or university—such as non-credit professional development—will not be accepted. Only courses with grades of B or higher will be considered for transfer. No credit is given for previous work history. Courses taken more than 7 years prior to a student's entrance into the program will not be accepted as transfer credit.

International Student Requirements

Speakers of English as Second Language: If an applicant's first language is not English, he or she must take the Test of English as a Foreign Language (TOEFL) or another comparable test unless he/she has previous degrees from higher education institutions in the United States. The recommended test scores are: 92-93 for Internet-based TOEFL; 237 for Computer-based TOEFL; 580 Paper-based TOEFL; 6.5 for IELTS; and 62-63 for PTE. The test must be taken within two years prior to application to the program.

Graduation Requirements

Before a candidate can graduate, he or she must meet the following requirements:

1. Be registered for at least one credit in their program in the academic year, after having met minimum degree course requirements to be considered a graduate candidate throughout the academic year.
2. Have all NG, N, I, UP, SP and F grades removed for degree courses.
3. Posting of satisfactory grades for the semester of graduation.
4. Satisfactory completion of all applicable College and program requirements as provided by the major advisor, filling out the Checklist for Completion of College/Departmental Requirements for Graduation and sending it to the Graduate School.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Special Education Leadership

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Special Education Leadership graduate certificate provides current and future administrators with a skill set to lead inclusive schools and address the educational needs of students with disabilities. This certificate is a collaboration between Educational Leadership programs and Special Education programs, providing school administrators with foundational knowledge as they pursue excellence in research, teaching, and service that addresses real world challenges and opportunities that creates positive change in an inclusive environment for students with disabilities. The stand alone online graduate certificate plan of study was created to better address the needs of current and future administrators who are in need of additional training in special education administration.

Success

The Special Education Leadership Graduate Certificate provides students with a skill set to:

- Formulate a school-level leadership approach grounded in ethical standards and practices.
- Interpret and apply current laws, regulations, and policies as they apply to the administration of services to individuals with exceptionalities and their families.
- Utilize collaborative approaches for involving all stakeholders in educational planning, implementation, and evaluation.
- Apply leadership, organization, and systems change theory to the provision of services.
- Implement collaborative administrative procedures and strategies to facilitate communication among all stakeholders.
- Demonstrate the skills necessary to provide ongoing communication, education, and support for families.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Curriculum Guide Versions:
Special Education Leadership Graduate Certificate 2021-2022

Special Programs

Today, school administrators are required to lead an inclusive school that educates all students. According to the U.S. Department of Education, National Center for Educational Statistics during the 2011-2012 school year, approximately 13% of students in public school are students with disabilities. Educational leaders must have an understanding of current issues, programs, and legal aspects of working with special education programs. The courses are taught by nationally and internationally recognized University of Cincinnati faculty members. The coursework can also be applied to the MEd in Special Education or MEd in Educational Leadership.

Admission Requirements

- A baccalaureate degree from a college or university regarded as standard by a regional or general accrediting agency.
- At least a B average (3.0/4.0 system) in relevant undergraduate course work or otherwise give evidence of promise that is judged satisfactory by the admitting program and the Graduate School.
- 1 letter of recommendation

Application Deadline and Procedures

Prospective students will complete the online application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:

Graduate School
University of Cincinnati
110 Van Wormer Hall
P.O. Box 210627
Cincinnati, Ohio 45221-0627

Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):

Graduate School
University of Cincinnati
2614 University Circle
110 Van Wormer Hall
Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese
- English

Verification reports are due to the Graduate School one week prior to the start of the student's first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:

Graduate School
University of Cincinnati
110 Van Wormer Hall
P.O. Box 210627
Cincinnati, Ohio 45221-0627

Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):

Graduate School
University of Cincinnati
2614 University Circle
110 Van Wormer Hall
Cincinnati, Ohio 45221-0627

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.

- Obtain at least a 3.0 program grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Apply to graduate through the online portal on the Graduate School website by the posted graduation deadline.

STEM and Sustainability Education

Online

Duration: 1 Year Total Credits: 15 Award: Graduate Certificate

Overview

Incorporate STEM and sustainability seamlessly within classrooms and community learning spaces through enhanced educator integration. The STEM and Sustainability Education Graduate Certificate, at the University of Cincinnati, empowers educators to incorporate STEM and Sustainability learning opportunities into a range of settings, from formal classrooms to informal community spaces. With an emphasis on community-based “local-to-you” learning, the University of Cincinnati’s STEM Certificate program reflects our commitment to urban service while drawing from the expertise of our top-ranked online Master’s in Education (M.Ed) faculty.

Why Study STEM and Sustainability Education?

Our Online STEM Graduate Certificate program redefines education for the 21st century by merging Science, Technology, Engineering, Mathematics, and sustainability instruction. Tailored for K-12 educators, curriculum coaches, informal instructors, and administrators, this program is ideal for professionals seeking to foster real-world problem-solving, contextual comprehension, and ethical insights to tackle today's challenges head-on.

Unlocking Opportunities with STEM Education Programs

Experience an integrative curriculum featuring STEM education courses complemented by innovative sustainability and equity modules. Achieve fast-track completion in just one year and empower your students and communities with STEM and sustainability experiences that foster interdisciplinary learning.

Success

Student Learning Objectives:

- Craft or adopt integrated STEM/sustainability curricula and activities.
- Execute, oversee, and evaluate student learning during STEM/sustainability engagements.
- Develop curricula intersecting STEM education and sustainability.
- Create project-based, inquiry-based, and problem-solving activities.

Career

The STEM and Sustainability Education Graduate Certificate is designed to expand employment opportunities by growing participant's capacity for curricular design and instructional effectiveness in STEM and Sustainability courses and/or integration into other subject areas. The program is meant to support participants who either wish to enter the classroom are already there or support and engage in-service teachers. It can also bolster the employability of those who wish to enter informal education settings including museums nature centers libraries etc. Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Advising

Please contact Dr. Andrew Bernier, STEM and Sustainability Education program coordinator, for questions related to advising.

UC Advantages And Special Opportunities

Credits earned in the STEM certificate can contribute to our Master of Education in Curriculum and Instruction, both online and on-campus.

Admission Requirements

- Minimum of two years of teaching experience in either a school or informal education setting, or an active teaching license
- Minimum GPA of 3.0 in bachelor’s degree from an accredited institution as demonstrated by a transcript
- Goal statement explaining why the STEM and Sustainability Education certificate is of interest
- Two letters of reference (at least one of which discusses teaching experience)

Teaching English to Speakers of Other Languages

Online

Duration: 1 Year Total Credits: 15 Award: Graduate Certificate

Overview

The University of Cincinnati offers online opportunities for the TESOL (Teaching English to Speakers of Other Languages) Graduate Certificate/Endorsement in response to the growing population of English language learners in U.S. classrooms and the academic demand at national and international levels. The Graduate Certificate/Endorsement in PreK-12 TESOL is aligned with the TESOL International Association's standards and the State of Ohio's TESOL standards. In-service teachers who have a standard, current Ohio teaching license and teach within the State of Ohio may be able to get the Graduate Certificate and Endorsement upon successful completion of the program. Pre-service teachers in Ohio and those outside of the state are able to get the Graduate Certificate. Any pre-service and/or in-service teacher who wishes to teach English language learners can enroll in this graduate non-degree, professional development program.

Success

Experience in working with diverse populations of PreK -12 English Language Learners in school and community settings. Teaching of English language to native speakers of other languages.

Career

Graduates of this program will be prepared for the careers listed below. All opportunities may not be listed.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Teaching English to Speakers of Other Languages Graduate Certificate 2018-2019

Admission Requirements

The following are requirements for admission:

1. The applicant must possess a Baccalaureate degree from an accredited college or university.
2. The applicant must have a minimum cumulative grade point average of 3.0 at the undergraduate level leading to the Bachelor Degree. The applicant who possesses a master's degree prior to admission must have a graduate grade point average of at least 3.0 in any graduate level work undertaken before admission. All calculations are based on a 4.0 scale.
3. In rare instances, candidates who graduated from a non-accredited college or university or who do not meet the minimum grade point averages requirement for admission may be admitted based upon an evaluation of evidence submitted by the candidate. As a minimum, the evidence must address mastery of the knowledge prerequisite to the courses required by the program, acceptable writing skills, the ability to engage in critical thinking, and a personal commitment to completing the program. The evidence, very often including Graduate Record Examination (GRE) scores, must convincingly demonstrate the candidate's potential for success in graduate level work.
4. Admission decisions are not be made on the basis of race, age, sex, color, religion, sexual orientation or disability.
5. Candidates who are not accepted for admission may reapply once they have addressed the weaknesses identified during their initial application review. During that period, such applicants may be encouraged by the program to enroll in appropriate course work to develop the knowledge, skills, and values deemed necessary for admission into the program, or to demonstrate that the applicant already possesses such qualifications. Whether such course work may apply to the degree program is left to the discretion of the program. Applicants may also be encouraged to take or re-take the GRE. Completion of recommended course work or the GRE does not guarantee admission into the program.
6. Advanced standing for a limited amount of course work taken prior to admittance to the program is possible. Course work completed 5 or more years prior to admission will not be applied to the requirements. To maintain active status in the program, students must register for at least 1 semester credit every academic year.

The application is not complete, and cannot be reviewed, until the School of Education has received all of the following:

1. A cover letter clearly stating to which degree and program strand (i.e., K-12 TESOL or Adult/International) the application is being made.
2. A statement of the applicant's academic and professional goals, approximately two pages long. This writing sample will be used as one of the criteria for evaluating the application. The applicant should explain specifically what areas s/he would like to study so that an appropriate advisor may be assigned to the applicant if admitted into the program.

3. A resume relevant to academic and professional data. It should include the applicant's name, address, phone, email, colleges attended with degrees, dates conferred, and grade point average, employment history, professional experience, present employer, and names of references.
4. Three letters of recommendation from people familiar with the applicant's academic and professional abilities. At least one letter should be from a faculty member in higher education. Those writing letters should explain who they are, their relationship to the applicant, and what they know of the applicant's academic and professional abilities. The applicant should be prepared to provide the recommenders e-mail addresses in the electronic application. Since recommenders are not prompted to submit their letters until the electronic application has been submitted, and application fee paid, it is wise to encourage recommenders to prepare their letters in advance so that they can upload them immediately upon receipt of the prompt.
5. Transcripts showing all undergraduate and graduate course work completed, including degrees granted and dates of degrees. Applicants whose previous degrees were earned at the University of Cincinnati may substitute "on-campus" transcripts.

Application Deadline and Procedures

Prospective students will complete the on-line application for their requested program by the posted application deadline. It is the applicant's responsibility to ensure that all required materials and support documents are successfully submitted. *Incomplete applications will not be processed or reviewed.*

Transcripts:

Providing academic records during the application process. All applicants are required to upload their unofficial transcripts during the application process. The university defines "unofficial" transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Applicants should NOT send official transcripts as part of the application process.

Providing academic records after admission. Once an applicant has been extended an offer of admission to the University of Cincinnati *and* has accepted the offer, s/he must submit an official transcript showing conferral of a baccalaureate degree or higher as soon as possible to the address below. Graduate School
University of Cincinnati
2614 University Circle
110 Van Wormer Hall
Cincinnati, Ohio 45221-0627

Changing Majors Within UC

Courses taken prior to admission into the program may be eligible for transfer into the program, if taken within 5 years prior to admission and if approved by the program faculty. Official paperwork is required and the appropriate forms may be obtained from the Director of Graduate Studies. To maintain active status in the program, students must register for at least one credit every academic year. Degree requirements must be completed within 5 years of date of admission.

Up to (9) semester credit hours can be transferred into the program upon approval of the department.

International Student Requirements

International student applicants are required to provide specific information about their transcripts or degree programs to facilitate the applicant review process, including transcript translation and evaluation by a recognized translation/evaluation agency. For a list of translation/evaluation agencies accepted by the University of Cincinnati, please contact the International Students Services office here or at 513-556-4278

The Test of English as a Foreign Language (TOEFL), IELTS or PTE is required of all applicants whose native language is not English. The following minimum scores must be obtained:

- TOEFL: Paper-Based Test (PBT): 550
- TOEFL: Internet-Based Test (iBT): 79-80
- IELTS: 6.5
- PTE: 53

All English proficiency tests must have been taken within the two-year period preceding admission. The University of Cincinnati maintains an International Student Services Office (ISSO), which serves international students attending the University. For questions regarding international student information, contact the International Student Services Office at (513) 556-4278, www.isso.uc.edu

Graduation Requirements

Students may graduate at the end of any semester if they meet the necessary degree requirements and all program and University deadlines. Students should confer closely with their advisors regarding graduation as they approach the completion of their degree requirements. The initial step in the graduation process consists of a formal application for graduation. This must be done by the announced deadline (usually during the semester prior to the semester of anticipated graduation). A complete list of important deadlines and responsibilities that must be met prior to graduation, instructions and guidelines for completing the application for graduation, and the graduation application is found at: https://grad.uc.edu/student-life/graduation.html.

The student must be registered for at least one graduate credit in their program in an academic year, after having met minimum degree/candidacy requirements to be considered a graduate student throughout the academic year. Further, students must be registered for at least one graduate credit during the academic year in which they will graduate.

Before graduation for all students, submission of Notification of Removal of all NG, N, I, UP, SP, and F grades must be sent as well as posting of all satisfactory grades for the graduation semester.

Application Deadlines

Admission Term	Application Deadline	Notification By

Gainful Employment Disclosure

Effective July 1, 2011, federal regulations published in the Federal Register on October 29, 2010 [75 FR 66665 and FR 66832] by the U.S. Department of Education require postsecondary institutions that participate in the student financial assistance programs authorized under Title IV of the Higher Education Act of 1965 (HEA), as amended, to disclose to prospective students certain information about the institution's GE Programs.

Generally, GE Programs include:

- At public and private not-for-profit institutions: Title IV-eligible non-degree programs (e.g., certificate and diploma programs).
- At for-profit institutions: All Title-IV eligible instructional programs, degree and non-degree.

Transition to Work

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Special Education program is focused on providing pre- and in-service professionals with knowledge, skills and experience in special education in order to improve learning outcomes and quality of life for children with special needs. Transition planning is a critical component in special education, which involves a coordinated set of activities to identify post-school goals for students and provide transition services during schools. Due to the nature of the discipline, the proposed graduate certificate program will be housed in the Special Education program, which will focus on teaching specialized knowledge and skills to transition stakeholders in facilitating the transition from school to post-school life for students with disabilities. The Transition to Work Graduate Certificate program is designed to increase the transition-related knowledge and skills of the various individuals involved in the transition process, such as transition specialists, intervention specialists, special education administrators, service providers (e.g., counselors and occupational therapists), vocational rehabilitation counselors, parents, advocates, and or any individual who is interested in expanding his/her knowledge in the area of transition-focused special education. This graduate certificate program will equip candidates with specialized knowledge and skills in transition-related legislations and policies, transition procedures, best practices in transition, transition focused instruction and curriculum, and interagency collaboration, so they can become field leaders to facilitate transition planning and incorporate effective transition services as mandated by Individuals with Disabilities Education Improvement Act of 2004 (IDEA).

The university defines "official" transcripts as transcripts that have been received from a secure, authenticated issuing institution and bears validation (e.g., a seal, logo, or watermark), including a date, and an appropriate signature. Official transcripts MUST be sent forward in their original, sealed envelope. **The absolute final deadline for submission of official transcripts is one week before the start of the student's first semester.** Students will NOT be allowed to complete a full semester without providing verification of an earned baccalaureate degree or higher. Any discrepancy later found between student-provided unofficial transcripts and official transcripts will be grounds for dismissal. Official Transcripts should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*
Graduate School	Graduate School
University of Cincinnati	University of Cincinnati
110 Van Wormer Hall	2614 University Circle
P.O. Box 210627	110 Van Wormer Hall
Cincinnati, Ohio 45221-0627	Cincinnati, Ohio 45221-0627

UC Alumni

Students who have received degrees from the University of Cincinnati do not need to submit official paper copies of their UC transcripts.

Students with degrees received in China

Applicants who have received degrees in China will upload their unofficial transcripts during the application process. The university defines “unofficial” transcripts as transcripts that have been in the hands of students, are typically printed on plain paper, and do not have a college seal or registrar's signature. Unofficial transcripts do NOT need to be verified at this stage of the application process.

After being accepted to join a graduate program

Applicants who have earned a degree in China must submit an English-version verification report from the China Academic Degrees and Graduate Education Development Center (CDGDC) of their final transcripts and degree certificates. All verification reports must be sent to the University of Cincinnati directly by the CDGDC to be considered official. **No other verification will be accepted.** Applicants with Chinese transcripts must contact the CDGDC after their degree is completed and request that their degree verification report be submitted directly to the University of Cincinnati. Students who request a verification report prior to degree conferral will be required to submit a second report after conferral.

Verification reports can be ordered at the following websites:

- Chinese: http://cqv.chinadegrees.cn/cn/
- English: http://www.chinadegrees.cn/en/

Verification reports are due to the Graduate School one week prior to the start of the student’s first semester. Failure to submit verification reports on time will result in a student being placed in non-matriculated status and loss of his/her student visa status. Verification reports should be sent to one of the following addresses:

Regular U.S. postal mail:	*Delivery via parcel delivery service (FedEx, DHL, UPS, etc.):*

Graduation Requirements

In order to graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 3.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the graduate certificate by the posted semester of graduation deadline.

Application Deadlines

Fall Admission: 7/1

Spring Admission: 11/15

Summer Admission: 4/1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Transition to Work : Online

Graduate Certificate

Transition to Work Graduate Certificate 2021-2022

Duration: 1 Year

★Minimum Credits: 12 Credits

Transition to Work Required Courses

Course	Title/Desc	Credit
SPED7040	Transition to Work Endorsement: Legal and Ethical Foundations	3
SPED7041	Transition to Work Endorsement: Assessment and Planning Learning Environments and Supports	3
SPED7042	Transition to Work Endorsement: Collaboration and Teaming	3
SPED7043	Transition to Work Endorsement: Clinical Experience	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Architectural Engineering

Duration: **5 Years** Total Credits: **126 - 127** Award: **BSAE**

Overview

As a student in the Architectural Engineering B.S. program at the University of Cincinnati, you'll have the unique opportunity to split your curriculum between the engineering and architecture programs in two different colleges, applying engineering principles to the design, planning, and building of modern and sustainable societies.

Architectural engineers pay close attention to the design, construction, operation, maintenance, and renovation of buildings, impact on the surrounding environment, and ensure that systems fit into its overall architectural design

At UC College of Engineering and Applied Science (CEAS), it's all about you – we strive to help develop you into the person employers want to hire. Throughout your time with us, you will:

- Take courses that cover the theory, design, and technical aspects of critical busing designs, such as structural system, the heating, ventilating, and air conditioning systems, as well as electrical, lighting, plumbing, and fire protection systems through studio and lab experiences
- Customize your experience with more than 600 organizations, including Architectural Engineering Institute, the American Institute of Architects, American Concrete Institute and the Construction Competition Club
- Build an impressive resume and professional network through our nationally-recognized co-op program at companies such as GBBN Architects, BHDP Architecture, Al Neyer Inc., Messer Construction, Helix Electric, and DWG, Inc. Consulting Engineers

Career

Architectural Engineers work in fast-growing fields having to do with construction, design and planning. Possible career paths include:

- Technical architect
- HVAC systems specialist
- Plant or facilities engineer
- Electrical systems engineer
- Construction estimator
- Construction project manager
- Fire protection engineer
- Building inspector

UC Advantages And Special Opportunities

At the University of Cincinnati, we believe that learning is doing and doing is learning. That's why we invented the first ever Cooperative Education (Co-op) program in 1906. Today, it's the largest of its kind in the United States. The Co-op model—which places students in full-time employment in their field—supplements the classroom curriculum to make for an educational experience like no other.

Admission Requirements

Admission criteria for this program vary based on a comprehensive review of the relative strength of courses, academic performance, co-curricular activities, and supplemental information provided through the application.
First-year students applying to this program should also have completed the following college preparatory subjects:

- English (4 units)
- Mathematics, including algebra, geometry and either pre-calculus or calculus (4 units)
- Science, including Chemistry and Physics (3 units)
- Social sciences (3 units)

- Electives (5 units)

Transferring To UC

Transfer students in good standing from accredited colleges and universities will be considered for admission to the college at the first, second and third-year levels. The degree requirement of professional practice experience normally precludes acceptance beyond the third-year level. For further detailed information such as required grade point average, please refer to the Transfer Students page.

Changing Majors Within UC

Students changing majors from outside programs or colleges within UC, please visit the Transition Students page.

International Student Requirements

For additional information on international requirements, visit the UC International Admissions page.

Application Deadlines

First-year students must begin the program during fall semester. Applications are accepted on a rolling basis. High school students who wish to be considered for scholarships must apply by November 1 of their senior year in high school.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Bachelor of Science in Architectural Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the General Criteria and the Architectural and Similarly Named Engineering Programs Program Criteria.

Architectural Engineering

BSAE

Architectural Engineering (BS) Curriculum Class of 2030

Duration: 5 Years

★Minimum Credits: 126 - 127 Credits

Fall Semester 2025

Course	Title/Desc	Credit
AE1013	Architectural Engineering Skills 1 (C- min)	2
AE1013L	Architectural Engineering Skills 1 Lab (C- min)	2
AE1100	Introduction to Architectural Engineering	1
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENED1001C	Engineering Design Thinking I	1
ENED1021	Engineering Applications I	2
MATH1061	Calculus I (C- min)	4

Spring Semester 2026

Course	Title/Desc	Credit
AE1014	Architectural Engineering Skills 2 (C- min)	2
AE1014L	Architectural Engineering Skills 2 Lab (C- min)	2
ENGL1001	English Composition	3
MATH1062	Calculus II (C- min)	4
PD1011	Introduction to COOP for CEAS (C- min)	1
PHYS2001	College Physics I (Calculus-based) (C- min)	4
PHYS2001L	College Physics Lab I (Calculus-based)	1

Fall Semester 2026

Course	Title/Desc	Credit
AE2041	Principles of HVAC (C- min)	3
AE2043	Building Physics (C- min)	3
AE2046	Principles of Lighting and Electricity (C- min)	3
AE2062	Building Construction Science	3
CVE2033	Statics for CVE and AE (C- min)	3
MATH2074	Dynamical Systems	3

Spring Semester 2027

Course	Title/Desc	Credit
COOP2011	Co-op for CEAS (First Semester Experience)	0

Summer Semester 2027

Course	Title/Desc	Credit
CVE2003C	Construction Materials and Lab	3
CVE2005	Fluid Mechanics (C- min)	3
CVE2034	Basic Strength of Materials for CVE and AE (C- min)	3
ENGL2089	Intermediate Composition	3
MATH2076	Linear Algebra	3
STAT2037	Probability and Statistics I	3

Fall Semester 2027

Course	Title/Desc	Credit
COOP2012	Co-op for CEAS (Second Semester Experience)	0

Spring Semester 2028

Course	Title/Desc	Credit
AE3045	HVAC Systems 1 (C- min)	3
AE3046	Lighting Systems 1 (C- min)	3
ARCH3004	Architectural Studio 1 (C- min)	4
CVE3001	Structural Analysis (C- min)	3
SAID1021	Modernism and Form: History of Architecture 1750 to Present	3

Summer Semester 2028

Course	Title/Desc	Credit
COOP3011	Co-op for CEAS (Third Semester Experience)	0

Fall Semester 2028

Students applying the accelerated Master of Architecture program must meet their advisor for a plan of study.

Course	Title/Desc	Credit

Spring Semester 2029

Course	Title/Desc	Credit
COOP4011	COOP for CEAS (Fourth Semester Experience)	0

Summer Semester 2029

Course	Title/Desc	Credit
COOP4012	COOP for CEAS (Fifth Semester Experience)	0

Course	Title/Desc	Credit
AE4046	Power and Electrical Systems 1 (C- min)	3
AE4047	Hydronics and Plumbing Systems (C- min)	3
PD2050	Mid-Curricular Co-op Community for Engineering	1
	AE Technical Elective Students interested in pursuing the Master of Architecture degree should select ARCH4005.	3 - 4
	AE Technical Elective	3
	Math or Basic Science Elective	3

Fall Semester 2029

Course	Title/Desc	Credit
AE5001	Architectural Engineering Capstone I	3
	AE Technical Electives Six credit hours required.	6
BoK: SCE	Society, Culture, & Ethics (SCE) Elective	3

Spring Semester 2030

Course	Title/Desc	Credit
AE5002	Architectural Engineering Capstone II	3
	AE Technical Elective 3 credit hours required	3
	Free Elective Select any college-level course	3

American Civic Literacy - Select one course.

Course	Title/Desc	Credit
HIST1001	United States History I	3
HIST1100	Democracy and the American Tradition	3
POL1010	Introduction to American Politics	3
POL1045	American Political Thought	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.
