Freshmen are admitted directly into the nursing program. Transfer students must submit an application for consideration to the sophomore year of the program. Admission to the sophomore year nursing program is competitive. Applications are required in the spring of the year in which you intend to begin the fall sophomore nursing curriculum. Applicants to the sophomore year nursing program must have completed all pre-nursing (freshman year) required courses, a pre-admissions essay, a pre-admissions exam, and carry a minimum 2.5 cumulative GPA by the application deadline.

Freshman Nursing Admission Guidelines

Applicants to the nursing program will be holistically reviewed using criteria such as high school GPA, essays, recommendations, extra-curricular activities and optional submission of ACT/SAT test scores. Some admission guidelines include:

- Graduation from an accredited high school of preparatory school
- Successful completion of 16 units of college-preparatory subjects: English (4 units); biology and chemistry (2 units); college-prep mathematics (3 units); social sciences (2 units); fine arts (1 unit); additional college preparatory subjects (4 units). *Recommended:* foreign language, anatomy and physiology or a third unit in social science with a grade of C or better in all required courses
- Recommended minimum high school GPA of 3.0
- Completed application and official high school or preparatory school transcripts

Transferring To UC

Students transferring from other colleges and universities will apply for admission to the sophomore year. Sophomore year admission criteria include:

- Admission to UC with a minimum cumulative grade point average of 3.0 on a 4.0 scale
- Submission of BSN application to the College of Nursing (applications open February 1- February 28)
- Submission of all final transcripts from outside institutions to UC's Office of Admissions by the posted deadline
- Completing the first-year Nursing curriculum, or be in the final term of those specific classes
- Completion of a pre-admissions essay
- Completion of a pre-admissions exam

Admission is very competitive, as we receive more applications than we have clinical spaces available, therefore admission is not guaranteed by meeting these criteria. The GPA from the first-year Nursing curriculum, pre-admissions essay score, and pre-admissions exam score will be considered, as well as other qualitative characteristics.

Changing Majors Within UC

Students transferring from other other majors at the University of Cincinnati will apply for admission to the sophomore year. Sophomore year admission criteria include:

- Admission to UC with a minimum cumulative grade point average of 3.0 on a 4.0 scale
- Submission of BSN application to the College of Nursing (applications open February 1- February 28)
- Completing the first-year Nursing curriculum, or be in the final term of those specific classes
- Completion of a pre-admissions essay
- Completion of a pre-admissions exam

Admission is very competitive, as we receive more applications than we have clinical spaces available, therefore admission is not guaranteed by meeting these criteria. The GPA from the first-year Nursing curriculum, pre-admissions essay score, and pre-admissions exam score will be considered, as well as other qualitative characteristics.

International Student Requirements

International students applying to the freshman year with the intention of entering the sophomore year of the BSN program must meet all requirements as listed for freshman and transfer students as well as meet University of Cincinnati minimum standards for TOEFL.

Graduation Requirements

The requirements for conferring the bachelor's degree in nursing are:

1. Successful completion within seven years from date of matriculation of (a) the required courses in the program of study of the College of Nursing and (b) specific degree requirements
2. A minimum of a 2.0 current and cumulative grade point average
3. Filing of the appropriate degree application forms with the University of Cincinnati by the defined deadline

4. Payment of all delinquent university/college obligations
5. Recommendation by the faculty of the College of Nursing

The requirements for certifying program completion to a board of nursing are:

1. Conferred BSN degree
2. Successful completion of college exit exam

Application Deadlines

Deadlines for application to the freshman year are the same as those listed for University of Cincinnati semester admission, Dec. 1.

The sophomore application is available at nursing.uc.edu from Feb. 1 to Feb. 28. Submission of the application for consideration for the sophomore year is due no later than Feb. 28.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The baccalaureate program at the University of Cincinnati College of Nursing is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington DC 20036, 202-887-6791.

For additional information about the nursing major at the University of Cincinnati, contact the Assistant Dean of Student Affairs in the College of Nursing, 513-558-3600 or nursing1@uc.edu.

RN to Bachelor of Science in Nursing

Online

Duration: 1.5 Years Total Credits: 121 Award: BSN

Overview

The University of Cincinnati was the first institution to offer the Bachelor of Science in Nursing in 1916 in recognition of the need to prepare RNs with additional education and experience that enhances their ability to provide quality and safe patient care.

More than a century later, we continue to empower RNs who endeavor to become the best health care providers they can be. Our RN to BSN online program offers quality education with the flexibility and support working professionals need to complete their BSN.

Why Choose UC's RN to BSN Online Program?

- Only 9 nursing courses (27 credit hours)
- 8 courses offered 2 times a semester for 7-weeks. Capstone course offered 1 time a semester for 14 weeks.
- Easy credit transfer from previous regionally accredited programs and transfer credits do not expire
- Dedicated support from program faculty and advisors
- Option to minor in public health

Success

Flexible Course Schedule and Support

Students can choose to complete the RN to BSN online program full time or part time. Full time students can complete the required nine nursing courses in nine months (two semesters). Part time students can complete the program in either 12 months (three semesters) by taking three courses a semester or 15 months (five semesters) by taking two courses a semester.

For more details, view RN to BSN Online Completion Options.

All courses in UC's RN to BSN online program last seven weeks (except for the 14-week capstone). The seven-week pace allows you to move through courses more quickly. And each course is offered six times a year, which means, if you need to drop a course, you can pick it back up again in several weeks and continue your BSN without much delay.

In addition, UC's RN to BSN online program faculty understand life happens. They offer support throughout your courses to ensure you get the help you need and stay on track in the program.

Career

Completing your BSN opens doors to more employment and career advancement opportunities, increased autonomy, and the option to pursue a graduate degree.

Curriculum

UC's RN to BSN online program curriculum includes nine nursing courses (27 credit hours) that enhance RN's skills to effectively address the needs of diverse populations, collaborate in an interprofessional team, implement evidence-based practice interventions to improve patient safety and care quality, and demonstrate leadership through health policy and patient advocacy. The curriculum also fully prepares RNs to continue their nursing education, if desired, in a Master of Science in Nursing, Doctor of Nursing Practice or PhD program.

RN to BSN online program courses:

- Health Issues of Vulnerable and Marginalized Populations
- Informatics for Professional Nurses
- Transition to Baccalaureate Education in Nursing
- Scientific Basis for Evidence-based Practice
- Nurse as Professional Leader and Manager
- Gerontological Nursing Practice
- Capstone Experiences
- Learning with Technology
- Focus on Community

UC's RN to BSN online program also offers the option to minor in Public Health Nursing. Students take one additional required course and two elective courses (9 credit hours) that focus on emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S health care system and monitoring diseases in the community.

For full RN to BSN online program course descriptions, visit RN to BSN Online Courses.

RN to BSN Online Program Faculty

Our RN to BSN online program faculty members are prepared at the master's or doctoral level and bring with them diverse professional experiences and interests — from working with and researching vulnerable and historically marginalized populations to long-term care, home health and school-based nursing.

In addition, RN to BSN Online Program Director Becky Lee is a graduate of the program, as are several other faculty members. Each understands the challenges faced by our students as they balance schoolwork and their personal and professional lives to meet their goal of earning a BSN.

To learn more about our faculty members and why they enjoy teaching students in UC's RN to BSN online program, visit RN to BSN Online Program Faculty.

Major Map Versions:
Online RN/BSN Curriculum - Effective Summer 2025

Admission Requirements

To be considered for admission to UC's RN to BSN online program, you must submit the following materials:

- An online application through the University of Cincinnati
- Official transcripts of previous college coursework with a recommended minimum cumulative GPA of 2.5. (This is a recommend minimum, only. Applicants with a cumulative GPA lower than 2.5 are still considered for admission.)
- Documented completion of an associate degree or diploma in nursing for RN licensure
- Please note: Individuals can be admitted into UC's RN to BSN online program before completing the NCLEX. However, documentation of an active, unrestricted RN license is reqruired to enroll in NBSN4081: Focus on Community and NBSN4068: Capstone Experience.

State regulations prevent UC College of Nursing from accepting applications from RNs in the following states:

- Louisiana
- Massachusetts
- Oregon
- Rhode Island
- Tennessee
- Washington

For full RN to BSN online program application details and instructions, visit RN to BSN Online Admissions.

Transferring To UC

UC College of Nursing accepts previously completed coursework from regionally accredited institutions. To look up how courses from other institutions transfer to UC, visit the Transfer Equivalency Database.

UC's RN to BSN online program does not require RNs to have completed certain courses before they are admitted and begin the program; however, RNs who have not completed one or more of the general education courses as part of their associate degree must complete the course(s) as part of the RN to BSN online program.

- For a list of required general education courses, visit RN to BSN Online Program Courses.

Many of the general education courses are offered online at UC. In addition, UC College of Nursing maintains partnerships (articulation agreements) with regional and online institutions to provide a clear pathway for RNs to transition into our RN to BSN online program.

- For a list of partner schools and equivalent general education courses, visit RN to BSN Online Articulation Agreements.

Accelerated Path MSN

Duration: **1.5 Years** Total Credits: **60 - 64** Award: **MSN**

Overview

The Accelerated Direct-Entry Master of Science in Nursing program allows individuals with a bachelor's degree in a field other than nursing to earn a master's in only five semesters and become a licensed registered nurse and leader at the bedside.

Nurses are positioned to play an important role in solving some of today's most complex health care issues. Our Accelerated Direct-Entry MSN prepares you not only to provide safe, quality patient care, but also to drive improvements to care through collaboration, evidence-based practice methods and effectiveness measures. This program also allows you to continue your education and become a nurse practitioner.

Career

Graduates of the Accelerated Direct-Entry MSN program are eligible to take the NCLEX to become a licensed registered nurse.

Curriculum

The Accelerated Direct-Entry MSN program requires 64 credit hours in five semesters.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Direct Entry Accelerated MSN (Effective Spring 2023)

UC Advantages And Special Opportunities

As a student, you will benefit from our rich, 130-plus-year tradition of educating nurse leaders, along with:

- Opportunities for interdisciplinary collaboration within the region's only Academic Health Center
- A variety of clinical experiences at sites within close proximity (many within walking distance), including a level I trauma center, high-risk obstetric unit and one of the nation's top pediatric hospitals
- Simulated patient care experiences that prepare students to function independently
- Technology-enhanced classroom learning
- Small class sizes
- Built-in NCLEX nurse licensure exam preparation

Admission Requirements

To qualify for admission, applicants must have a bachelor's degree (in a field other than nursing), conferred from a regionally accredited institution, and a minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the bachelor's degree earned.

Adult-Gero Acute Care Nurse Practitioner

Duration: **2 Years** Total Credits: **45 - 50** Award: **MSN**

Overview

UC's Adult-Gerontology Acute Care Nurse Practitioner program prepares registered nurses to provide advanced care for adolescents, older adults, and the elderly with acute, short-term illnesses; exacerbated chronic illnesses, or terminal diseases.

Our Adult-Gero Acute Care program features flexible, mostly online coursework and on-campus labs — held once a week for three semesters if attending full-time — that provide essential skills training not replicable in an online format. This ensures our students obtain expert proficiency in the field to achieve the best possible outcomes for patients.

Career

Graduates of this specialty meet educational requirements to take exams for national certification. Adult-Gero Acute Care NPs provide services ranging from disease prevention to critical care to stabilize a patient's condition, prevent complications, restore health, or offer palliative care. They also coordinate comprehensive care in and across health care settings to ensure patients' needs are met during care transitions. Many Adult-Gero Acute Care NPs work in hospitals, ambulatory care facilities, or short-term stay settings.

Curriculum

The Adult-Gero Acute Care NP program combines mostly online coursework and in-person skills training, which requires students to come to campus once a week for two semesters, starting in the first semester of the program.

Adult-Gero Primary Care Nurse Practitioner

Online

Duration: 2 Years Total Credits: 39 - 44 Award: MSN

Overview

UC's Adult-Gerontology Primary Care Nurse Practitioner online program prepares students to care for patients 13 and older from wellness to illness. The curriculum prepares students to provide preventative, new onset, and chronic care. There is emphasis on education, diagnosis, treatment, and evaluation as well as health promotion, disease prevention, and chronic disease management of the adolescent, adult, and aged adult.

Career

Adult-Gero Primary Care NPs work in a variety of community-based primary care settings, including clinics focused on a specialty — such as cardiology, dermatology, endocrinology, etc.— hospital outpatient clinics, private practices, and long-term care facilities.

Family Nurse Practitioner

Online

Duration: 2 Years Total Credits: 46 - 51 Award: MSN

Overview

UC's Family Nurse Practitioner MSN online program prepares nurses to diagnose and manage common and chronic medical conditions across the lifespan, from infancy to the elderly. Our program offers students affordable, quality education in a flexible format with faculty and staff support from the time you apply through graduation.

Career

Graduates of this specialty meet educational requirements to take exams for national certification. Family Nurse Practitioners (FNPs) provide a wide range of primary care services across the lifespan, from performing physical exams and educating patients on disease prevention to ordering and interpreting diagnostic testing, prescribing medications, and treating acute and chronic illnesses, conditions, and injuries.

FNPs work in a variety of health care settings, including community health centers, private practices, schools, and health care facilities. For more information, visit our Career Outlook page.

Curriculum

Courses are fully online.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Family Nurse Practitioner: Online (Effective 2021 Spring)

UC Advantages And Special Opportunities

Affordable Quality Education

- Federal financial aid available
- FNP certification exam pass rates are consistently above 95%
- Faculty are practicing nurses and up to date clinically

Flexibility

- 100% online program, no site visits required
- Option to transfer credits
- Courses offered in spring, summer, and fall semesters
- Asynchronous coursework

Support from Application to Graduation

- Enrollment advisor support during the application/enrollment process
- Student and faculty advisor support throughout the program
- Clinical planning support team and resources
- Network of nearly 20,000 alumni

Admission Requirements

Applicants must have a Bachelor of Science in Nursing from an accredited nursing school and at least one year of work experience as a registered nurse. For more details, visit our Admission Requirements page.

Nurse Midwifery

Online

Duration: 2 Years Total Credits: 52 - 57 Award: MSN

Overview

UC's Nurse Midwifery MSN online program prepares students to be primary care providers for women with specialty knowledge in sexual and reproductive health. Nurse midwives also care for women in labor, provide sexual and reproductive health to people of all genders, and can provide well newborn care in the first month of life.

Career

Graduates will be eligible to sit for the American Midwifery Certification Board (AMCB) to become certified nurse midwives.

Career Information >>

Curriculum

Courses are taught by professors who are practicing in the field or are accomplished researchers. The degree requires 57 total credit hours and a minimum of 784 hours of precepted clinical experiences, along with two site visits to the University of Cincinnati campus.

Nursing Education

Online

Duration: 2 Years Total Credits: 30 Award: MSN

Overview

The Master of Science of Nursing in Nursing Education online program prepares students to become clinical educators and nursing faculty members. Graduates of this program are ready to design nursing curriculum, use evaluation strategies effectively, evaluate program outcomes, incorporate new technology into teaching, and design and implement online simulations.

Career

Graduates of this specialty meet educational requirements to take the National League for Nursing (NLN) examination for certification as a Nurse Educator (CNE). Nurse educators provide education and training for nurses at all levels in both academic and clinical settings. Nurse educators are experts in evidence-based practices and remain up-to-date on the latest ideas and developments in nursing practice.

Systems Leadership

Online

Duration: 2 Years Total Credits: 36 - 40 Award: MSN

Overview

Health care is more complex than ever, and that complexity requires nurse leaders to have a solid, evidenced-based practice and decision-making framework to lead the design, implementation and evaluation of health care services offered to individuals, populations, and/or communities.

Unlike non-clinical-based graduate administration programs, our Systems Leadership MSN online program prepares graduates to leverage evidence-based practice and decision-making to:

- Apply theories and analytics models in nursing administration and organizational management to nursing administration practice
- Implement the best available evidence into practice for improved outcomes in health care, leadership and management practice
- Use evidence to plan, manage and evaluate health care programs for individuals and populations in a variety of settings
- Use change theories to manage complex issues in health care and leadership
- Lead and support those providing care in health care settings

This flexible program is taught online asynchronously, which means you don't need to be present for classes at specific times.

Career

Graduates of this specialty meet educational requirements to take exams for national certification by the American Nurses Credentialing Center or American Organization of Nurse Leaders as a Nurse Executive (NE-BC), Nurse Executive, Advanced (NEA-BC) or Certified Nurse Manager and Leader (CNML), or in Executive Nursing Practice Essentials (CENPE).

Systems leaders often work in hospital or health care systems and in community settings and take on a wide breadth of responsibility related to clinical care delivery, quality improvement, legal and regulatory compliance, financial and human resource management, health policy advocacy and more.

Women's Health

Online

Duration: 2 Years Total Credits: 44 - 49 Award: MSN

Overview

The UC Women's Health MSN online program prepares you to become a primary care provider for individuals from puberty through the lifespan. It equips you with the skills to promote wellness, provide prenatal care, and manage gynecological concerns throughout their lives.

Our program is:

- 100% online
- Taught by faculty certified in Women's Health (WH) or Nurse-Midwifery (NM) with numerous years of clinical practice
- Flexible with three start dates per year

Career

Women's Health Nurse Practitioners provide comprehensive care for gynecological conditions and prenatal care, as well as preventive and primary healthcare services. They play a vital role in patient care and recovery and can be found practicing in both outpatient and inpatient settings. Visit our Careers page to learn more.

Acute Care Pediatric Nurse Practitioner

Online

Duration: 3 Years Award: DNP

Overview

UC's Pediatric Acute Care Nurse Practitioner program prepares nurses to manage infants, children, adolescents, and young adults with complex acute, critical and life-threatening illnesses across a continuum of health care settings.

Our program is ranked No. 3 on the list of Best Online Pediatric NP DNP Programs by NursePractitionerOnline.com.

Career

Graduates of UC's Pediatric Acute Care NP DNP online program meet educational requirements to take the exam for national certification by the Pediatric Nursing Certification Board. Certified Acute Care Pediatric Nurse Practitioners (CPNP-ACs) provide care across the continuum for children with complex acute, critical and chronic illness in order to stabilize a patient's condition, prevent complications and restore maximum health or provide palliative care. These advanced-practice nurses work in a variety of settings, including hospitals, intensive care units, sub-specialty clinics and emergency departments.

Curriculum

DNP coursework prepares students at the highest level of nursing practice to improve patient outcomes and translate research into practice. For more details, visit our Course Descriptions page.

Adult Geriatric Acute Care Nurse Practitioner

Duration: **3 Years** Award: **DNP**

Overview

UC's Adult-Gerontology Acute Care Nurse Practitioner DNP program prepares students at the highest level of nursing practice to provide advanced care for adolescents, older adults, and the frail elderly with acute, short-term illness, exacerbated chronic illness, or terminal disease.

UC's Adult-Gero Acute Care NP program offers:

- Courses taught by faculty who currently practice in the field
- In-person, hands-on training that thoroughly prepares students for clinical experiences and real-world practice
- Flexible scheduling with a minimum time to completion of three years and a maximum of five years

Note: Students must reside in Ohio, Kentucky, or Indiana while in the program.

Career

Graduates of this specialty meet educational requirements to take exams for national certification. Certified Adult-Gero Acute Care NPs provide services ranging from disease prevention to critical care to stabilize a patient's condition, prevent complications, restore health, or offer palliative care. Adult-Gero Acute Care NPs also coordinate comprehensive care in and across health care settings to ensure patients' needs are met during care transitions. Many Adult-Gero Acute Care NPs work in hospitals, ambulatory care facilities or short-term stay settings.

Curriculum

DNP coursework prepares students at the highest level of nursing practice to improve patient outcomes and translate research into practice. For more details, view DNP Program Course Descriptions.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Adult-Gero Acute Care DNP (Effective Fall 2024) Rev. 1

UC Advantages And Special Opportunities

To fully prepare students for clinical experiences and real-world practice, UC's Adult-Gero Acute Care NP DNP students come to campus **once a week for three semesters** of the program for the advanced health assessment course and hands-on training sessions to learn, practice and receive immediate feedback on critical skills, including:

- Suturing
- Airway management
- Line and chest tube placements
- Lumbar punctures
- Trauma assessment
- Needle and surgical cricothyrotomy
- Pericardiocentesis
- Interosseous access

Students also spend time in nearby UC Medical Center's cadaver lab.

Admission Requirements

Applicants to the Adult-Gero Acute Care NP DNP program must have at least one year of work experience in the acute care setting as a registered nurse. **Students must reside in Ohio, Kentucky, or Indiana while in the program.**

For more details, visit DNP Program Admissions.

Adult-Gero Primary Care Nurse Practitioner

Online

Duration: 3 Years Award: DNP

Overview

UC's Adult-Gerontology Primary Care Nurse Practitioner DNP online program prepares students at the highest level of nursing practice to care for patients 13 and older from wellness to illness, which includes preventative, chronic and acute care with an emphasis on education, diagnosis, treatment and evaluation.

Students learn from doctorally prepared DNP faculty the advanced skills needed to perform physical exams, order and interpret diagnostic tests, prescribe medications and more, all while considering environmental, occupational, social and economic factors that impact patient outcomes.

DNP coursework adds instruction in evidence-based practice, quality improvement, policy advocacy, informatics and systems leadership. Students in the Adult-Gero Primary Care Nurse Practitioner online program complete a final DNP project that demonstrates mastery of the concepts and impacts health care outcomes at a systems or population level.

For more details, view our list of Frequently Asked Questions.

Career

Graduates of UC's Adult-Gero Primary Care Nurse Practitioner online program meet educational requirements to take exams for national certification. The American Nurses Credentialing Center (ANCC) awards the AGPCNP-BC credential, and the American Association of Nurse Practitioners (AANP) awards the A-GNP credential. Adult-Gero Primary Care NPs who work in specialty clinics sometimes pursue additional certifications in their sub-specialty focus area.

Certified Adult-Gero Primary Care NPs work in a variety of community-based primary care settings, including clinics focused on a specialty — such as cardiology, dermatology or endocrinology — hospital outpatient clinics, private practices and long-term care facilities.

Curriculum

DNP core coursework prepares students at the highest level of nursing practice to improve patient outcomes and translate research into practice. For more details, visit the DNP Course Descriptions page.

Admission Requirements

UC's Adult-Gero Primary Care NP online program is offered as a Bachelor of Science in Nursing to Doctor of Nursing Practice (BSN to DNP). Individuals must have a BSN from an accredited nursing school with a recommended overall GPA of at least 3.25 and a science GPA of at least 3.0; a statistics course with at least a C grade; a registered nurse (RN) license; and at least one year of independent work experience as an RN. The GRE is not required for admission.

Applicants must complete an application through NursingCAS (not UC College of Nursing). The application requires a resume; state verification of a current, active, unrestricted RN license; a personal statement; official transcripts; a list of courses taken at all higher education institutions attended; contact information for at least three references; a UC Graduate School application (completed after the NursingCAS application); and an interview.

For more details, visit the DNP Admissions page.

Application Deadlines

UC accepts applications for the Adult-Gero Primary Care Nurse Practitioner online program starting in August of each year for a start term the following August. Applications are typically accepted through the following March or April and decisions are sent to applicants on a rolling basis. Individuals who apply by the priority deadline have the best chance of acceptance.

For full details and deadline dates, visit the DNP Admissions page.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
For accreditation information specific to the College of Nursing, visit our Accreditation page.

Adult-Gero Primary Care Nurse Practitioner : Online

DNP

Adult-Gero Primary Care DNP (Effective Fall 2024) Rev. 1

Duration: 3 Years
★Post Baccalaureate Minimum Credits: 75 - 76 Credits
★Post Master's Minimum Credits: 75 - 76 Credits

Semester 1

Course	Title/Desc	Credit
NDNP9001	Informatics for DNP Practice (B- min)	2
NURS8004	Biostatistics for Evidence-based Practice (B- min)	2 - 3
NDNP9005	DNP Scholarly Writing (B- min)	2

Semester 2

Course	Title/Desc	Credit
NDNP9015	Quality Improvement and Patient Safety (B- min)	3
NURS8022	Advanced Physiology and Pathophysiology (B- min)	3 - 4
NDNP8004	Developing the DNP Scholar (B- min)	3

Semester 3

Course	Title/Desc	Credit
NURS8002	Theoretical Basis for Clinical Reasoning (B- min)	2 - 3
ANCH8001	Principles of Population Health (B- min)	3

Semester 4

Course	Title/Desc	Credit
NURS8020C	Advanced Health Assessment (B- min)	3
NDNP9006	Essentials of Research Methods for Evidence Based Practice (B- min)	4
NURS9009	Health Care Policy for the Doctoral Prepared Nurse (B- min)	3

Semester 5

Course	Title/Desc	Credit
NDNP9030	Planning, Management, and Evaluation of Programs and Projects (B- min)	4
NURS8024	Pharmacology for Advanced Practice Nurses (B- min)	3
NURS8026	Differential Diagnosis for the APN (B- min)	3

Semester 6

Course	Title/Desc	Credit
ANNP8040	Adult Gerontology Primary Care Nurse Practitioner: Practicum I	2
ANNP8050	Adult Gerontology Primary Care Nurse Practitioner: Seminar I (B- min)	1
ANNP8030	Clinical Management of Adult Health Problems for the Advance Practice Nurse I (B- min)	3

Semester 7

Course	Title/Desc	Credit
NDNP9025	DNP Practicum: Strategy Development (B- min)	3
ANNP8042	Adult Gerontology Primary Care Nurse Practitioner: Practicum II	3
ANNP8052	Adult Gerontology Primary Care Nurse Practitioner: Seminar II (B- min)	1
ANNP8032	Clinical Management of Adult Health Problems for the Advance Practice Nurse II (B- min)	3

Semester 8

Course	Title/Desc	Credit
ANNP8044	Adult Gerontology Primary Care Nurse Practitioner: Practicum III	4
NDNP9035	DNP Practicum: Implementation (B- min)	3
ANNP8054	Adult Gerontology Primary Care Nurse Practitioner: Seminar/Capstone III (B- min)	2

Semester 9

Course	Title/Desc	Credit
NDNP9038	DNP Practicum: Analysis and Dissemination Planning (B- min)	3
NDNP9040	DNP Leadership Seminar: Synthesis of the Leadership Role (B- min)	2
Free Electives	Students will complete 3 credit hours of elective coursework from the list below.	3

Elective Courses (Please note: NDNP9042 requires permission from your chair to take)

Course	Title/Desc	Credit
ANCH8015	Social Determinants of Health (B- min)	3
ANCH8016	Population Density (B- min)	3

Course	Title/Desc	Credit
HI7072	Leveraging Analytics and Business Intelligence Tools for Healthcare (B- min)	3
NURS7002	Health Issues of Vulnerable & Marginalized Populations (B- min)	3
NURS8075	Global Health (B- min)	3
NDNP9042	DNP Manuscript Writing Seminar	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Family Nurse Practitioner

Online

Duration: 3 Years Award: DNP

Overview

The Doctor of Nursing Practice in Family Nurse Practitioner program prepares students at the highest level of nursing practice to diagnose and manage common and chronic medical conditions in patients of all ages, including infants, children, adolescents, adults, and seniors.

Career

Graduates of this specialty meet educational requirements to take exams for national certification. Family Nurse Practitioners (FNPs) provide a wide range of primary care services, from performing physical exams and educating patients on disease prevention to ordering and interpreting diagnostic testing, prescribing medications and treating acute and chronic illnesses, conditions and injuries. FNPs work in a variety of health care settings, including community health centers, private practices, schools and health care facilities.

Curriculum

Doctor of Nursing Practice (DNP) coursework prepares students at the highest level of nursing practice to improve patient outcomes and translate research into practice. For more details, visit our Course Descriptions page.

Nurse Anesthesia

Duration: **3 Years** Award: **DNP**

Overview

Certified Registered Nurse Anesthetists provide anesthetics for surgical, obstetrical, and trauma care for operations and procedures that range from transplant surgery to child birth. CRNAs practice with a high degree of autonomy and responsibility, and these advance-practice nurses are compensated accordingly.

Established in 1945, UC's Nurse Anesthesia program is the fourth oldest in the United States and is ranked No. 7 in the nation by U.S. News & World Report. Students receive support from 15 dedicated didactic and simulation faculty and more than 80 clinical faculty. In addition, the program offers a variety of experiences at clinical sites with most located within 45 miles of the university (many within walking distance), including a level I trauma center, high-risk obstetric unit, one of the nation's top pediatric hospitals, and multiple outpatient surgery centers and community hospitals.

Our Nurse Anesthesia program faculty present at the state, national, and international level and lead by example, serving on state and national boards, committees, and taskforces. Faculty foster a supportive, team-oriented environment and strongly encourage our students to lead by serving on AANA national and state committees, attending state and national meetings, and giving podium and poster presentations.

Our program offers much more than a degree; it broadens your skillset and perspective.

Career

UC's Nurse Anesthesia program prepares graduates to sit for the licensure exam to become Certified Registered Nurse Anesthetists (CRNAs). Our graduates have a 100% licensure exam pass rate and 100% job placement rate after graduation.

Curriculum

The Nurse Anesthesia BSN to DNP program requires 36 months (nine semesters) of full-time study. Clinical time and responsibilities begin in the third semester and gradually increase throughout the program.

Required curriculum and clinical experiences for degree pathways other than BSN to DNP vary based on students' previous program of study. See Special Programs section below for more details.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Curriculum Guide Versions:
Nurse Anesthesia Doctor of Nursing Practice (Effective Spring 2024 Admits) Revision 2

UC Advantages And Special Opportunities

Join the program with an esteemed history, proven to produce Certified Registered Nurse Anesthetists with excellent clinical and leadership skills.

- Learn from Nurse Anesthesia program faculty who are leaders in the field and active national speakers
- Benefit from a variety of clinical experiences at numerous clinical sites, all located within 45 miles of the university (many within walking distance). Experiences include a Level I trauma center, a high-risk obstetric unit, one of the nation's top pediatric hospitals, multiple outpatient surgery centers, and several community hospitals.
- Broaden your skill set and perspective by learning how to lead through interdisciplinary partnerships as part of your learning process
- Glean all the benefits of UC and its Academic Health Center, including full access to the library system, fitness center, affordable student health care insurance, student support, and student life resources
- Leverage the opportunity of meeting top recruiters in the country at our annual onsite CRNA Job Fair
- Join a distinguished alumni network.
- Our graduates have a 100 percent licensure exam pass rate and a 100 percent job placement rate after graduation.
- The cost of living in Cincinnati is among the lowest in the country
- UC's program offers affordable tuition with opportunities for scholarships and federal grant funding

Special Programs

Nurse Anesthesia Program Pathways

UC's Nurse Anesthesia program is designed for nurses with a BSN.

The college accepts transfer credit from other accredited nursing programs. Students apply for advanced-standing credit after confirmation into the DNP in Nurse Anesthesia program and transfer credit approval is subject to the program specialty director or coordinator.

- For a list of courses that qualify for transfer credit, email nursingbearcats@uc.edu or a College of Nursing admissions counselor.

Nurses with an MSN in Nurse Anesthesia can earn a DNP through UC's Post-MSN DNP online program, which does not require additional anesthesia practicum hours.

Admission Requirements

- Current, unrestricted RN license and one year of full-time critical care experience in either an adult or pediatric intensive care unit
- Current American Association of Critical-Care Nurses CCRN Certification
- Current American Heart Association ACLS Provider Certification
- Bachelor of Science in Nursing from an ACEN or CCNE-accredited institution
  - Minimum science GPA of 3.3
  - Minimum overall GPA of 3.4

Application Deadlines

For application deadlines, visit the Nurse Anesthesia DNP Admissions page.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
Our Doctor of Nursing Practice in Nurse Anesthesia is fully accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA). For accreditation information specific to the College of Nursing, visit our Accreditation page.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Nursing Practice

Online

Duration: **5 Years** Award: **DNP**

Overview

UC's Post-Master's Doctor of Nursing Practice (DNP) online program is meant for nurses with a Master of Science in Nursing (MSN) who want to continue their education and become leaders in the increasingly complex health care field.

Career

The DNP is considered the terminal nursing practice degree and offers an alternative to research-focused PhD. DNP-prepared nurses are equipped to implement into practice settings the science developed by nurse researchers.

Curriculum

Students can complete the Post-Master's DNP online program full time in four semesters or part time in six semesters. For a list of core DNP courses and descriptions, visit the DNP Course Descriptions page.

Occupational Health Nursing

Online

Duration: 3 Years Award: DNP

Overview

UC's Occupational Health Nursing DNP online program prepares nurses to plan, implement, and track health and safety programs and services for employees, worker populations, and associations.

Career

Occupational health nurses work closely with employers to maximize worker health, safety and productivity in corporate, industrial, governmental, or academic settings. These nurses work in a variety of roles from clinicians to educators, case managers, corporate directors, and consultants.

Curriculum

UC's Occupational Health DNP online program includes online coursework and practicum experiences. Full- and part-time options are available and course scheduling is flexible.

Occupational health-specific courses include:

- Principles of Public Health Negotiation and Mediation
- Environmental Public Health
- Occupational Health, Hygiene and Safety Workshop
- Occupational and Environmental Diseases and Injuries
- Leveraging Analytics and Business Intelligence Tools for Healthcare
- Quality Improvement and Patient Safety
- Interprofessional Field Experiences in Occupational Safety and Health
- Informatics for DNP Practice
- Total Worker Health

The program includes two practicums designed to immerse students in public health roles where they can apply the skills and knowledge developed in the program.

- *Practicum I* focuses on population health care service delivery. Students work with an organization to critically appraise its funding, structure and history, and assist with a project related to evaluation, assessment, funding, and/or care delivery.

- *Practicum II* focuses on integrating theory and evidence-based leadership models to implement and evaluate effective interventions for populations. Students address an identified population-focused clinical problem by partnering with an organization to develop and implement interventions.

Psychiatric-Mental Health Nurse Practitioner

Online

Duration: 3 Years Award: DNP

Overview

UC's Psychiatric-Mental Health Nurse Practitioner DNP online program prepares nurses to provide effective care for patients with complex psychiatric and physical health needs.

Program highlights include:

- 100% online with asynchronous coursework
- Faculty who are practicing nurses in the field
- Frequent curriculum review and updates to meet changing market demands
- Academic and clinical planning support throughout the program
- A network of more than 20,000 UC College of Nursing alumni

Career

Graduates of UC's Psychiatric-Mental Health Nurse Practitioner DNP online program are prepared to sit for the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Board (AANPCB) Psychiatric-Mental Health Nurse Practitioner (PMHNP) certification exams.

Psychiatric-Mental Health Nurse Practitioners work in a variety of settings, including acute care environments, outpatient clinics, schools, prisons, health homes and behavioral health homes, long-term care facilities, and private practice offices. These advanced practice nurses complete assessments and provide treatment, including therapy and medication management.

Curriculum

Psychiatric-Mental Health Nurse Practitioner students are required to attend a mandatory, two-day Psychiatric-Mental Health Nurse Practitioner intensive typically completed during the semester they are enrolled in ANPS8003 and ANPS8005. Psychiatric-Mental Health Nurse Practitioner intensives are virtual and typically scheduled the Wednesday and Thursday of the sixth week of the semester. Students will receive more details in an email.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Psychiatric Mental Health NP-DNP (Effective Fall 2024)

Admission Requirements

Applicants to UC's Psychiatric-Mental Health Nurse Practitioner DNP online program must have a minimum of one year of RN experience with excellent assessment skills at the generalist level before undertaking advanced practice. For those who do not meet this requirement, the part-time option is offered to allow nurses to continue working to gain experience.

For full admissions criteria, visit the Admission Requirements page.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Public Health Nursing

Online

Duration: 3 Years Award: DNP

Overview

UC's Public Health Nursing DNP online program prepares nurses to respond to public health emergencies and lead efforts to advance public health initiatives at local, state, tribal, federal, and global levels.

Career

Public health nurses are more needed than ever in the U.S. with the increasing frequency of natural and environmental disasters and public health emergencies, aging population, and increasingly apparent disparities in health care. The COVID-19 pandemic exacerbated gaps in the fractured U.S. healthcare system, requiring more healthcare providers who can provide team-based, person-centered care; infection control; and other skills.

Graduates of UC's Public Health Nursing DNP online program are ready to assume leadership roles in public health systems, government agencies, and non-governmental organizations. These nurses implement evidence-based practice, quality improvement, and systems leadership in public health.

Curriculum

UC's Public Health Nursing DNP online program includes coursework and three practicum experiences. Full- and part-time options are available and course scheduling is flexible. Full-time students can complete the program in eight semesters.

Public health-specific courses include:

- Principles of Public Health Negotiation and Mediation
- Environmental Public Health
- Global Health
- Principles of Public Health Ethics, Equity, and Advocacy
- Leveraging Analytics and Business Intelligence Tools for Healthcare
- Quality Improvement and Patient Safety
- Epidemiological Methods in Healthcare
- Informatics for DNP Practice

Practicums are designed to immerse students in public health roles where they can apply the skills and knowledge developed in the program.

- *Practicum I* focuses on population health care service delivery. Students work with an organization to critically appraise its funding, structure, and history and assist with a project related to evaluation, assessment, funding, and/or care delivery.

- *Practicum II* focuses on integrating theory and evidence-based leadership models to implement and evaluate effective interventions for populations. Students address an identified population-focused clinical problem by partnering with an organization to develop and implement interventions.

- *Practicum III* centers on the evaluation of the effectiveness of public health interventions/programs. Students incorporate previous coursework to complete a culminating project focused on the evaluation of a new or pre-existing intervention or program.

Systems Leadership

Online

Duration: 3 Years Award: DNP

Overview

UC's Systems Leadership DNP online program prepares nurses to lead and transform practice using evidence and effective collaboration in a variety of roles across complex health care systems. The DNP elevates nurses to a similar education level as the peers with whom they work — physicians, pharmacists, physical therapists, and other healthcare practicioners.

UC's Systems Leadership DNP online program equips nurses with the tools needed to strategically understand health care from different scopes and lenses, creating a broad knowledge base that propels growth within organizations. Our graduates are prepared to:

- Use analytical methods to critically appraise existing evidence to ensure the implementation and evaluation of evidence in practice and decision-making
- Design, implement, and evaluate outcomes of practice, practice patterns, and systems of care within a practice setting, health care organization, system, or community
- Guide the development of a well-prepared clinical and leadership workforce
- Lead the development and implementation of institutional, local, state, federal, and/or international health policy
- Utilize interprofessional collaboration to achieve organizational or system goals

Career

Graduates of UC's Systems Leadership DNP online program meet educational requirements to take exams for national certification. These nurses often work in hospital or health care systems or in community settings and take on a wide breadth of responsibility related to clinical care delivery, quality improvement, legal and regulatory compliance, financial and human resource management, health policy advocacy, and more.

Nursing Research

Duration: **5 Years** Award: **PHD**

Overview

The PhD in Nursing program prepares students to master and advance the science and practice of the nursing profession. Students become experts in the breadth of the nursing discipline and the depth of a particular research focus area.

Career

Nurses with a PhD work in a variety of roles, including as health administrators, educators and clinical researchers. They assume leadership roles in both academic and clinical settings where they tackle complex health care questions.

Curriculum

The PhD curriculum provides the foundation for a nursing research career. For a list of courses and descriptions, visit Courses. Additionally, PhD students partner with faculty mentors in their research interest area to develop a research program that contributes to the creation of nursing knowledge. For a list of faculty researchers and their interest areas, visit Faculty Researchers.

Adult-Gero Acute Care Nurse Practitioner

Duration: **1.5 Years** Total Credits: **8 - 18** Award: **Graduate Certificate**

Overview

The Adult-Gerontology Acute Care Post-Master's Certificate program prepares nurses to treat patients 13 and older with acute, critical and/or chronic episodes of illness, injury, or trauma in a wide range of settings, including hospitals and ambulatory care facilities and short-term stay settings in the home, office and clinic.

Career

Graduates of the AGACNP Certificate program meet criteria to take certification exams for AGACNP. The market for these advanced practice nurses continues to expand because of the aging population, changes that limit the hours of medical residents and the need for specialty care providers. Often, students are hired in an area in which they completed practicum experience.

Aspiring nurse practitioners who want to work in non-acute-care settings should instead explore the Adult-Gerontology Primary Care specialty.

Curriculum

The plan of study for the AGACNP program is determined when nurses are accepted and matriculate into the program. Plans are based on previous master's coursework.

For courses that could be required, view the master's in adult-gerontology acute care curriculum.

The program has face-to-face (on campus) requirements beginning in the first semester and includes some online course flexibility throughout program, depending on students' individualized plan of study.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
AGAC Post Master's Certificate Program

Admission Requirements

Students must have a current, unrestricted RN license; a Master of Science in Nursing degree from ACEN or CCNE accredited institution (with a minimum cumulative GPA of 3.0); and completed an undergraduate statistics course (with a minimum grade of C).

Individuals must reside in Ohio, Kentucky or Indiana while in this program.

International Student Requirements

Individuals seeking admission to this program should contact the College of Nursing Office of Student Recruitment to discuss licensing and Visa requirements for admission. Call 513-558-8400, or email nursingbearcats@uc.edu.

Application Deadlines

This program admits students for fall and spring semester start.

Adult-Gero Primary Care Nurse Practitioner

Duration: **2 Years** Total Credits: **12 - 18** Award: **Graduate Certificate**

Overview

The Adult-Gero Primary Care Nurse Practitioner program will prepare you to transition to the advanced practice nursing (APN) role in primary care for patients 13 years old through the lifespan. Curriculum will provide preparation for patient education, diagnosis, treatment, and evaluation as well as health promotion, disease prevention, and chronic disease management of the adolescent, adult, and aged adult. Graduates of this program meet criteria for taking certification exams as Adult-Gero Primary Care Nurse Practitioners and have achieved an outstanding pass rate.

A certified NP may work for a physician group, seeing the patient in the office and following up in the hospital, or with a specialty group like cardiology, orthopedics, or general practice. Graduates are employed in private practice, clinics, long-term care, home care, and various occupational health settings as well as physician practice groups. Our graduates have achieved an outstanding pass rate on certification examinations, allowing them to earn an APN job.

Family Nurse Practitioner

Online

Duration: 1.5 Years Total Credits: 12 - 18 Award: Graduate Certificate

Overview

Family, in its broadest definition, influences nearly every aspect of a person's health. As a family nurse practitioner, you treat the family as the unit of care, rather than isolated individuals. Graduates of the FNP program care for patients of all ages, working in a wide-array of primary population-based care offices to outpatient clinic settings. Family nurse practitioners provide care to individuals who are well, or who have common health problems. Responsibilities include monitoring chronic diseases, ordering and interpreting diagnostic studies, prescribing medications and other treatments, providing health maintenance care, promoting positive health behaviors and collaborating with physicians and other interprofessional health care team members.

Career

Graduates of this specialty meet educational requirements to take exams for national certification. Family Nurse Practitioners (FNPs) provide a wide range of primary care services across the lifespan, from performing physical exams and educating patients on disease prevention to ordering and interpreting diagnostic testing, prescribing medications and treating acute and chronic illnesses, conditions and injuries.

FNPs work in a variety of health care settings, including community health centers, private practices, schools and health care facilities. For more information, visit our Career Outlook page.

Psychiatric-Mental Health Nurse Practitioner

Online

Duration: 1.5 Years Total Credits: 15 - 19 Award: Graduate Certificate

Overview

UC's Psychiatric-Mental Health Nurse Practitioner Post-Master's Certificate online program prepares nurses to provide effective care for patients with complex psychiatric and physical health needs.

Program highlights include:

- 100% online with asynchronous coursework
- Faculty who are practicing nurses in the field
- Frequent curriculum review and updates to meet changing market demands
- Academic and clinical planning support throughout the program
- A network of more than 20,000 UC College of Nursing alumni
- Graduates of UC's Psychiatric-Mental Health Nurse Practitioner Post-Master's Certificate online program are prepared to sit for the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Board (AANPCB) Psychiatric-Mental Health Nurse Practitioner (PMHNP) certification exams.
- Psychiatric-Mental Health Nurse Practitioners work in a variety of settings, including acute care environments, outpatient clinics, schools, prisons, health homes and behavioral health homes, long-term care facilities, and private practice offices. These advanced practice nurses complete assessments and provide treatment, including therapy and medication management.

Students in the Psychiatric-Mental Health Nurse Practitioner Post-Master's Certificate online program are not eligible for federal financial aid.

Career

Graduates of UC's Psychiatric-Mental Health Nurse Practitioner Post-Master's Certificate online program are prepared to sit for the American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners Certification Board (AANPCB) Psychiatric-Mental Health Nurse Practitioner (PMHNP) certification exams.

Psychiatric-Mental Health Nurse Practitioners work in a variety of settings, including acute care environments, outpatient clinics, schools, prisons, health homes and behavioral health homes, long-term care facilities, and private practice offices. These advanced practice nurses complete assessments and provide treatment, including therapy and medication management.

Curriculum

Psychiatric-Mental Health Nurse Practitioner students are required to attend a mandatory, two-day Psychiatric-Mental Health Nurse Practitioner intensive during their first semester. Psychiatric-Mental Health Nurse Practitioner intensives are virtual and typically scheduled the Wednesday and Thursday of the sixth week of the semester. Students will receive more details in an email prior to the start of the semester.

Public Health Nursing

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Public Health Nursing Post-Baccalaureate Certificate program prepares professionals to apply knowledge, skills and abilities to respond to public health emergencies using evidence from research to design, implement and evaluate population-based interventions and to lead efforts to advance public health initiatives at the local, state, tribal, federal and global level.

Career

The need for public health leaders is expected to grow significantly in the coming decade due to the increasing frequency of natural and environmental disasters and public health emergencies, climate change, an aging population and growing concerns about health disparities and social justice issues. COVID-19 has revealed deep gaps within an already fragmented U.S. health care system, heightening the need for team-based care, infection control and person-centered care.

Curriculum

The Public Health Nursing certificate program includes four fully online courses:

- Principles of Population Health
- Social Determinants of Health
- Leveraging Analytics and Business Intelligence Tools for Health Care
- Population Density

Professional Studies

Online

Duration: 4 Years Total Credits: 120 Award: BA

Overview

The Bachelor of Arts in Professional Studies (BAPS) with the University of Cincinnati Online is a fully online program where students can apply their existing work experience toward a degree. This program emphasizes a breadth of study to teach students applicable skills that will prepare them for professional advancement in a competitive job market. This program is ideal for adult learners with existing work experience as well as high school graduates interested in broad fields of study.

Career

The Bachelor's in Professional Studies is unique in its ability to flex to meet the needs of the market and the individual student. There are several fields that this program's curriculum covers that can be easily applied to the workforce.

Competency Areas:

- Self-Management and Human Relations
- Fostering Diversity, Equality, and Inclusion
- Complex Problem-Solving and Decision Making in Groups
- Data Literacy in Professional Contexts
- Effective Professional Communication

These competencies cover a breadth of potential career paths, all of which are expected to grow over the next 10 years. Since this program covers such a wide array of courses, this degree is widely applicable to various professional paths.

Popular Career Paths:

- Client Support & Sales
- Account Management
- Human Resource Specialists
- Project Management
- Reporter
- Market Research
- Event Planning

In a 2021 report, the Bureau of Labor Statistics (BLS) stated that workers with at least a bachelor's degree earned close to $500 more every week compared to those with a high school diploma. Furthermore, the Association of Public & Land-Grant Universities (APLU) found that typical bachelor's degree holders earn roughly 84% more than those with just a high school diploma, amounting to more than a million dollars more earned in their lifetime. An online Bachelor of Arts in Professional Studies through UC Online is a highly applicable certificate to advance professionally and earn more as your career evolves.

BA

B.A. in Professional Studies

Duration: 4 Years

★Minimum Credits: 120 Credits

About the Program

Program Requirements

Course	Title/Desc	Credit
	All students must complete 120 hours of coursework, including: 27 hours of core coursework,18 hours of co-op, 27 hours of specialty electives, 27 hours of general education, and 21 hours of free electives. Students will work with an advisor regarding the use of prior credit to satisfy these requirements and to create an individualized academic plan.	0
	All students must work with an advisor to determine appropriate co-op sequences and specialty electives.	0

Core Coursework

First Year Experience

PD2180 must be taken in the FIRST semester of the program.

Course	Title/Desc	Credit
PD2180	Professional Development Foundations (C- min)	6

Capstone

PD5001 must be taken in the FINAL semester of the program.

Course	Title/Desc	Credit
PD5001	Capstone Seminar in Professional Studies (C- min)	3

Additional required core coursework

Course	Title/Desc	Credit
AIS4075	Diversity in Professional Settings	3
COMM2081	Business Communication	3
PD2190	Applied Technology in the Workplace	3
PD3030	Fundamental Data Skills for the Future Workplace (C- min)	3
PD3070	Conflict Resolution and the Human Factor (C- min)	3
PD4050	Group Decision-Making and Problem-Solving (C- min)	3

Co-op

Students must complete 18 hours of co-op. Many students will receive advanced standing credit, through an embedded prior learning assessment process within the Foundations course. The number of co-op courses needed will vary by student depending on if they received advanced standing for work experience.

Co-op Sequence

Students must complete 18 hours of co-op. Many students will receive advanced standing credit, through an embedded prior learning assessment process within the Foundations course. The number of co-op courses needed will vary by student depending on if they received advanced standing for work experience.

Course	Title/Desc	Credit

Fire Administration

Online

Duration: 1.5 Years Total Credits: 15 Award: Certificate

Overview

The development of a Fire Administration Certificate is driven by the growing need for specialized leadership skills in the fire service industry. As the complexity of emergency response, fire prevention and management increases, there is a significant demand for professionals who possess advanced knowledge in these areas. The interdisciplinary approach of the certificate fosters a holistic understanding of public safety and emergency management, as fire administration often involves collaboration with other agencies, such as law enforcement, medical services, and local government. This certificate is designed to equip students with the knowledge and leadership skills to address these challenges, preparing them for careers in leadership roles within the fire industry.

The integration of management and leadership training, covering topics such as organizational behavior, human resources, finance, and public administration, equips students with the skills necessary to manage fire departments and other emergency services organizations effectively.

Career

With the newly developed Fire Administration Certificate, graduates will receive a specialized curriculum that aligns with the fire industry, allowing them to acquire the necessary skills to be more competitive for a leadership role in the fire industry. The U.S. Bureau of Labor Statistics estimates that employment of first-line supervisors of firefighters will grow about 4 percent through 2032, about as fast as the average for all occupations.

Curriculum

Innovation and Design Thinking

Duration: **1.5 Years** Total Credits: **13** Award: **Certificate**

Overview

The certificate of transdisciplinary innovation and design thinking offers students a formal pathway to learn about and apply design thinking and innovation mindsets, tools, and applications across multiple disciplines and industries. This cross-college certificate brings together multiple courses and experiential learning opportunities within the innovation space, and offers students flexibile pathways for choosing courses and experiences focused on different types and applications of innovation and design thinking.

This certificate includes coursework and experiences in these focus areas:

- Exposure to various definitions of innovation, types of innovation, and their applications
- Cultivating and promoting adaptable, resilient mindsets that enable creative problem solving
- Developing confidence in tackling complex challenges with high degrees of ambiguity
- Introducing a variety of problem-solving frameworks and tools that can be applied to diverse challenges
- Learning to work in cross-disciplinary innovation environments and teams
- Understanding and applying non-linear and iterative approaches to problem solving
- Casting vision and inspiring others to pursue innovation through speculative designs, scenarios, and approaches

Career

Rather than focusing on a specific discipline or subject-matter area, transdisciplinary innovation and design thinking frameworks skills can be leveraged and applied across a variety of fields, topics, and industries, making them applicable to a wide variety of career paths. Innovation and design thinking skills are directly applicable in careers where understanding systems and developing new solutions are core, such as consulting, strategy, insight development, and design research.

Innovation Experience Credits (IEC's)

Students will earn Innovation Experience Credits (IEC's) through successful completion of pre-approved, project-based cross-disciplinary innovation experiences with external collaborators or sponsors. A minimum of 3 IEC's must be earned to fulfill certificate requirements.

Examples of Approved Experiences

Course	Title/Desc	Credit
	.5 IEC *Participate in a 1-week CID sponsored Innovation Spring, *Participate in UC Startup Weekend, *Participate in Sustainable Invention Immersion Week	0
	1 IEC *Participate in a multi-week CID Innovation Challenge, *Complete a multi-week Venture Lab training series or pre-accelerator program	0
	2 IEC *Prepare for and compete in a team-based innovation competition external to UC (such as BioDesign Challenge, MIT Crowdsolve, etc.), *Complete a semester-long research assistant experience in a multi-disciplinary lab (such as DF labs)	0
	3 IEC *Complete an innovation-focused pre-approved UHP experience (such as UIF or 1819 ecosystem advancement project) and all associated reflection requirements.	0

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

International Co-op

Duration: **4 Years** Total Credits: **14 - 16** Award: **Certificate**

Overview

The International Co-op Program (ICP) combines rigorous culture and language preparation with a paid co-op experience abroad. **ICP students take a required set of ICP courses then complete an eight month international co-op in the spring and summer prior to senior year.** Students are awarded an ICP certificate for completion of this program. Applications submitted by the semester App Deadline will be processed within the first month of the following semester. It is recommended that students apply as soon as possible to ensure that they can fit in all required ICP coursework prior to departure. Students may apply up through the summer of their sophomore year.

Students who complete the University of Cincinnati's International Co-op Program:

- Gain second language and cultural competency through immersive international work- and classroom-based experiences.
- Work in a professional environment outside the U.S., with the responsibilities of a co-op student.
- Gain a competitive edge for full-time employment with global organizations with potential for promotions and international assignments.
- Develop cross-cutting skills that enhance professional performance in both domestic and international settings.

As a student in the International Co-op Program, you will:

- Take a course that introduces concepts related to living and working in a new culture (PD2010).
- Complete 8-10 credit hours of language coursework. Students consistently say that being able to speak the local language is one of the most valuable elements of the program.
- Live and work abroad for up to eight months in a role comparable to a student co-op assignment in the U.S.
- Take course designed to support students through navigating re-entry, reverse culture shock, and the reflection process of their experience abroad (PD3005)

Career

Students who complete the International Co-op Certificate gain cultural competency through this immersive international work- and classroom-based experiences.

Careers for students who complete this certificate are enriched by their gained cultural experience. Through the acquisition of intercultural competence, students gain behavioral skills that lead to effective and appropriate communication with people of other cultures, This leads to career paths with globally positioned companies.

Minoring

International Co-op Program certificate is offered in the following:

Service Learning & Civic Engagement

Duration: **2 Years** Total Credits: **15** Award: **Certificate**

Overview

In our increasingly diverse and global economy, organizations are looking to hire employees with cultural competencies - people who are prepared to make a positive contribution to the community.

Service Learning (SL) is a specially designed learning experience in which students combine reflection with structured participation in community-based projects to achieve specified learning outcomes as part of an academic course and/or program requirement.

Career

There are four types of Service Learning: Direct Service Learning, Indirect Service Learning, Research-Based Service Learning, and Advocacy Service Learning. Students who pursue a certificate in Service Learning are those interested in sectors of the workforce that revolve around public policy, strengthening communities, developing critical skills that can be used in advocacy work, and those who want to work in reducing stereotypes and facilitating cultural and racial understanding.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Exploratory

Duration: 1 Year Total Credits: 16 - 31

Overview

The UC Blue Ash College Exploratory Studies program is designed for students not yet ready to commit to a major and who need time to explore the opportunities available to them. Truly undecided students should take the opportunity to explore their strengths, academic interests, and talents before committing to a major. Exploratory students at UCBA have a specially assigned Exploratory advisor to assist with decision-making and course selection while exploring degree options or working toward getting into a desired major.

Success

Students will be successful if they take advantage of the following resources and programs offered at UCBA:

- Professional Exploratory Advising: Advisors can give you information about all of UCBA's majors as well as providing personal assessment and evaluation.
- Student Success Seminar (MLTI1021 at UCBA): This course helps students choose a major and provides an introduction to college life.
- First Year Experience (FYE) Program: Exploratory Students are able to participate in a range of UCBA FYE programming and events.

Career

The one-year Exploratory Studies program at UCBA provides a foundation of General Education courses, which will help you develop in critical thinking, effective communication, social responsibility and knowledge integration. Employers value these competencies, and they fulfill part of the UC General Education requirements, which all students must complete.

The one-year Exploratory Studies program at UCBA does not lead to a degree. The program offers opportunities to explore possible careers and majors, and, after one year in the program, students are required to select a degree program. After exploring their options, students may select one of many associate degree programs offered at UCBA, both the applied/career programs that lead to immediate employment or one of many Associate of Arts or Associate of Science degrees that allow for smooth transition into baccalaureate programs at UC. Students may also choose to apply to a selective program at another UC College after a semester or a year.

Please note that students interested in the following programs, should **not** select Exploratory Studies. The college offers other one-year programs that are better suited to these career choices:

- Students interested in pursuing the associate's degree in nursing, dental hygiene, or radiologic technology should apply to the **Pre-Health Professions** one-year program to prepare for selective admissions into these degree programs.
- Students interested in applying to the baccalaureate program in Special Education or Secondary Language Arts should select the UCBA one-year program: Pre-Special Education or Pre-Secondary Language Arts.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Exploratory Studies

Special Programs

UCBA offers several other unique programs that can also help students make informed academic decisions:

- The First Year Experience Program: An innovative, year-long, freshman program that helps students successfully transition from high school to the university setting through FYE courses, events, and programming.
- College Success Skills: A course that focuses on vital skills acquisition, effective use of technology and campus resources.
- Career Development Center: Learn more about various career opportunities associated with each of UCBA's majors.

Admission Requirements

Open to all students with a high school diploma or GED.

Accreditation

Pre-Engineering

Duration: **2 Years** Total Credits: **12 - 24**

Overview

Engineering is the design, construction and operation of structures, machines and systems using established scientific principles. Engineers put scientific knowledge to practical use, serving a critical role in today's increasingly complex world.

The Pre-Engineering program provides the appropriately prepared student with the first year toward completion of a bachelor's degree in engineering.* Students transitioning to the College of Engineering and Applied Science (CEAS) at the University of Cincinnati will have four to five more years of study. Engineering programs in CEAS require five years of study; it may take longer depending on your pathway and preparation.

Please note students may need to take additional courses depending on their Math and English placement test score which may require completion of the required Pre-Engineering curriculum to extend beyond two semesters. Students working to meet the required math level for this advising track should enroll at UC Blue Ash College in the Exploratory Studies program.

**The student will need to meet regularly with an advisor to ensure the General Education requirements align with the chosen engineering discipline. Additional courses may include ENED1020, ENED1090, ENED1091, PD1011 and Intro to Discipline course (major specific) at UC's College of Engineering and Applied Science.*

Success

You should be creative, inquisitive, analytical and detail oriented with excellent math skills. You should be able to work as part of a team and to communicate well, both orally and in writing. Communication abilities are also important because you will often interact with specialists in a wide range of fields outside engineering.

Career

Engineering is a very broad category. Engineers are employed worldwide in virtually every industry. Your career choices depend entirely upon which discipline you pursue to complete your bachelor's degree.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

For advising contact information, current and admitted students can locate advisor contact information for information technology via the UCBA advising website.

UC Advantages And Special Opportunities

Conveniently located in Blue Ash as a regional campus of the University of Cincinnati - UC Blue Ash (UCBA) - is located on 135 wooded acres and serves residents of Hamilton, Butler, Warren and Clermont counties, as well as other surrounding communities. UCBA also works closely with the Blue Ash area workforce to assist with their training needs.

The UCBA campus is friendly, informal, and prides itself on being accessible to students of all ages with various career aspirations. It also prides itself on offering smaller classes and closer ties with faculty and other students. UCBA welcomes transfer students, students who want to complete career programs, and students of any age who wish to take a course for personal enrichment or to improve their own skills.

There is ample parking as well as a shuttle to and from Clifton.

Special Programs

The UC Blue Ash academic labs are one of our best student resources. They are free and open to any UCBA student. If you are returning to college after a long absence or feel under-prepared for the challenges of college, the academic labs may provide just what you need.

These labs include the math lab, language lab, writing lab and study skill and reading center.

Visit the labs online.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

To transfer to UC Blue Ash, you must be in good academic standing at the college or university you last attended. We accept transfer applications all year long.

If you have not taken college-level English or mathematics, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Blue Ash by completing the application for change in college and program form available from UC admission offices. You are strongly urged to see your advisor before transferring into a different major to minimize any impact or your degree progress.

International Student Requirements

A TOEFL score of 187 (computer test) or 515 (paper exam) is required if your formal education is from a country where English is not a primary language or if your documents do not clearly indicate your proficiency in English. You must alsom meet admission deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please contact Enrollment Services for details.

Note you will be charged nonresident tuition.

Note that UCBA is a non-residential campus (no dorms or other housing is available). It is possible to live in a dorm on the UC Clifton campus as bus transportation is availble to and from the Clifton and UCBA campuses.

International students wishing to apply to UCBA can find information at http://admissions.uc.edu/international.html

Graduation Requirements

This is an advising track to prepare for application to an engineering program and is not a degree or certificate granting program.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash Admissions page for specific application deadlines for each term. http://www.ucblueash.edu/admissions/steps/apply-now.html

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Health Professions

Duration: 1 Year Total Credits: 46

Overview

This is a one-year, non-degree program for students who are interested in applying to the following programs: Dental Hygiene, Medical Assisting (Certificate), Nursing, and Radiologic Technology. Students in the Pre-Health Professions program may take no more than 30 semester hours as they prepare to meet selective admission criteria for their desired program. Once they have reached this limit, they must apply to the above programs, change to a degree-granting program, or become non-matriculated students. Students within the Pre-Health Professions program must maintain a minimum cumulative grade point average (GPA) of 2.5. If a student's GPA falls below the 2.5 minimum, then they will be required to meet with a professional advisor and complete a college workshop regarding their selected major. If the student's GPA remains below the 2.5 minimum for two semesters then the student will be required to change his or her major.

The Dental Hygiene, Medical Assisting, Nursing and Radiologic Technology programs use a selective admission process so Pre-Health Professions students must apply to one of these programs online during the deadlines specified by the program. Only students who meet selective program admission criteria will be permitted to apply. See your academic advisor for details.

Success

Students in this non-degree program will work best with a variety of learning styles and if they like to work with people.

Career

Completion of the Pre-Health Professions non-degree program does not qualify students for any licensure or certification for employment. This program is for students who are interested in applying to the following programs: Dental Hygiene, Medical Assisting (Certificate), Nursing, and Radiologic Technology.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Pharmacy

Duration: **2 Years** Total Credits: **73**

Overview

Pharmacists play a critical role in modern health care, dispensing drugs prescribed by physicians and other health practitioners and providing information to patients about medications. They advise physicians and other health practitioners on the selection, dosages, interactions and side effects of medications. Pharmacists also monitor the health and progress of patients in response to drug therapy to ensure the safe and effective use of medication.

Pre-Pharmacy is a two-year pre-professional track that consists of courses in biology, chemistry, physics and mathematics that are required for application to a four-year doctor of pharmacy degree program. This pre-pharmacy non-degree program is specifically designed for students planning to apply to the PharmD program at the UC James L. Winkle College of Pharmacy. Additional coursework may be required for students planning to apply to PharmD programs at other institutions.

Pre-pharmacy students attending the UC Blue Ash campus are encouraged to work with their major advisor and the Pre-Professional Advising Center to be sure you are the most prepared applicant.

Success

Colleges of pharmacy base their admission strongly on demonstrated ability in the laboratory sciences. A student's overall academic record, score on the Pharmacy College Admission Test (PCAT), pharmacy-related experience and extra-curricular activities are all considered.

PharmD admissions information is available at the College of Pharmacy website.

Career

You must complete your doctorate (PharmD) to become a pharmacist. The profession of pharmacy offers excellent opportunities to those interested in science.

Registered pharmacists find careers in the areas of community/retail pharmacy, hospital pharmacy, wholesaling of drug products, pharmaceutical manufacturing, scientific research, government work and teaching. Community pharmacy affords pharmacists an opportunity to become owners of their own businesses. Positions are also available in drug product wholesaling, which has become an important part of the industry's distribution method.

The manufacturing of drug products is one of the largest industries in the US, requiring astute attention, accuracy and scientific skill. Every manufactured drug product must be carefully compounded, tested and analyzed before it is offered to the public. Manufacturers also employ pharmacists as medical service representatives who provide drug, clinical and other information to health professions.

Read more about career outlook in pharmacy from the US Bureau of Labor Statistics.

Pre-Pharmacy Non-Degree Program

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at ucbaadvising@uc.edu or call 513-558-9442 to schedule an appointment.

UC Advantages And Special Opportunities

A solid science foundation to build upon is important to achieving success in pharmacy. Students at UC Blue Ash College enjoy small classes and well-qualified faculty as well as the many benefits afforded through study at a university ranked among the nation's top 25 public research institutions.

UC's Blue Ash campus is conveniently located not far from major interstates. Easy to find. Plenty of parking. State-school tuition.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English, mathematics, or science courses. All placement tests are given free of charge.

Transferring To UC

For students outside UC wishing to transfer in, information can be found here.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

International Student Requirements

International students wishing to apply to UCBA can find information here.

Graduation Requirements

To qualify for a degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least an overall 2.0 cumulative grade point average.

You must complete an application for degree, usually the term before you expect to graduate. You should see your advisor for specific information well in advance of your final term.

Application Deadlines

UC Blue Ash College operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Historical Perspectives (HP)- 6 credit hours required

At least 3 credit hours must be in the HIST discipline. One of the two HP courses must also carry a Society, Culture, & Ethics (SCE) BoK designation.

Social Science (SS)- 6 credit hours required

At least one of these courses must be in an A&S discipline. One of these two SS courses must also carry a Society, Culture, & Ethics (SCE) BoK designation.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Secondary Education

Language Arts

Duration: 2 Years

Overview

The secondary education program prepares candidates to teach English/Language Arts to adolescents and young adults in grades 7 to 12. This one-year, non-degree, transition program allows students to start their education at UCBA before transitioning to the College of Education, Criminal Justice, and Human Services to finish their Bachelor's degrees. The Bachelor of Science degree blends course work, field experience, and internships to develop teachers who can meet the challenges and changing needs of schools and communities.

Success

Candidates who succeed as teachers of adolescents and young adults:

- know how individuals learn and develop;
- can articulate the central concepts, tools of inquiry, and the structures of their discipline;
- effectively collaborate with others;
- demonstrate leadership;
- address issues of diversity with equity;
- use technology to support their practice;
- use assessment to inform their efforts;
- demonstrate pedagogical knowledge;
- are responsible, caring, fair, and honest; and
- are committed to social justice.

Career

Graduates of the Secondary Education Integrated Language Arts Program who obtain licensure assume teaching positions in English/Language Arts. These graduates usually elect to teach in Ohio, but graduates teach across the nation. Other graduates can be other types of instructors and tutors.

Advanced degrees are generally required for director, principal, superintendent, librarian, and guidance counselor positions.

Pre-Secondary Ed Language Arts: One Year Transition

Advising

Current and admitted students can locate advisor contact information for Pre-Secondary Education via the UCBA advising website: http://www.ucblueash.edu/academics/advising/advisor-list.html.

UC Advantages And Special Opportunities

The University of Cincinnati's Blue Ash College is conveniently located in suburban Blue Ash and is accessible from I-75, I-71, I-275, and the Ronald Reagan Highway. We are relatively small, and our faculty-to-student ratio is low. You will find small class sizes and personal interaction with your instructors create the ideal learning environment. Parking is convenient, and our tuition is one of the lowest of the UC colleges.

We also maintain close ties with area schools. In fact, Blue Ash College is the only college campus to hose an elementary school on campus! Ties to our local community are also strengthened by the experiential learning component we recently added to all education courses. You will provide valued assistance in area schools, as you connect learned academic theory to real-world experiences.

Special Programs

In the education programs available at Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in UC's Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering this program should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entring a degree program must also take the college's placement tests prior to registering for classes.

The Blue Ash College admissions office provides an application for admission and all the information you'll need to enroll in the college. Please go to http://www.ucblueash.edu/admissions/steps.html for more information on applying.

This program is an open admissions program, but in order to proceed to the Bachelor's degree from the UC College of Education, Criminal Justice, and Human Services, the student must meet the following criteria and apply to the cohort in the second year. Talk to an advisor about the timing and requirements for applying to cohort. Note that admission to a cohort is not guaranteed; when the number of applicants exceeds the number of available openings, the better qualified candidates will be admitted.

To graduate from the UC College of Education, Criminal Justice, and Human Services, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.8 university GPA and a 2.8 GPA in content area (3.0 GPA is preferred).
- Be in good academic standing (that is, not on academic or disciplinary probation or suspension).
- Meet the college's residency requirement of 30 semester credit hours.
- File formal application for the degree by the posted deadline.

Transferring To UC

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

More information on applying as a transfer student can be found at http://www.ucblueash.edu/admissions/steps.html.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Application Deadlines

The college's rolling admissions policy allows you to start any semester: fall, spring, or summer. However, financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Special Education

Duration: **2 Years** Total Credits: **30**

Overview

The focus of the Special Education Program is to produce graduates who enhance and better the lives of individuals with disabilities. This is focused on educating teachers to use evidence-based practices and meet licensure requirements for K-12 intervention specialists.

Success

Candidates who succeed in special education demonstrate:

- a history of academic success;
- the ability to collaborate with others;
- leadership characteristics;
- responsible, caring, fair, honest, and ethical behavior;
- a history of good critical thinking and problem solving;
- enthusiasm for working with children and adults with disabilities; and
- a commitment to the betterment of individuals with disabilities.

Career

In general, graduates of the Special Education Program work as intervention specialists (teachers) in various K-12 education settings, including schools, hospitals, vocational training facilities and other institutions providing educational services for individuals with disabilities. Some graduates of the Special EducationPprogram work as advocates and/or case managers for social agencies.

Chemistry

Duration: 2 Years Total Credits: 62 Award: AA

Overview

The AA chemistry program is a two-year associate of arts degree designed for students who wish to apply to UC's pharmacy program or transfer into scientifically oriented baccalaureate programs that are appropriate for medical, dental and veterinary school.

The program is designed so that students may earn an associate of arts degree and transfer into the third year of the BS chemistry program at UC's College of Arts and Sciences (A&S).

The AA in chemistry at UC Blue Ash College (UCBA) most closely matches the UC pre-pharmacy curriculum and the additional required courses can be added to complete the pharmacy entry requirements. Admission to the UC College of Pharmacy is competitive and entry requirements can be found at here.

Success

The AA in chemistry is well suited for students with a background and interest in science. The program provides for extensive laboratory work; therefore, the enjoyment of hands-on laboratory work is important. Chemistry majors also learn to observe critically and record what happens in the laboratory; they analyze data and apply chemical knowledge learned in the classroom to draw conclusions about their observations.

Students planning to apply to pharmacy, medical, dental or veterinary school will find this program ideal preparation.

Career

Graduates with a bachelor's degree in this major are employed as:

- Chemists in the manufacturing industry and state, local or federal governments, including production, quality control and research
- Chemistry teachers
- Industrial research and development scientists
- Forensic scientists
- Physicians and health care professionals
- Pharmacists - AA CHEM as a pathway

AA Chemistry

Advising

Current and admitted students can locate advisor contact information for chemistry via the UCBA advising website.

UC Advantages And Special Opportunities

A solid foundation to build upon is important to achieving success in chemistry. Students at UC Blue Ash College enjoy small classes and well-qualified faculty as well as the many benefits afforded through study at a university ranked among the nation's top 25 public research institutions.

UC's Blue Ash campus is conveniently located not far from major interstates. Easy to find. Plenty of parking. State-school tuition.

Admission Requirements

This program is open to all students with a diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet math and science prerequisites before taking certain courses.

All students entering UCBA, except those with previous college-level math and English, must take the college's placements tests prior to registering for classes.

More detailed information can be found at the college's admissions web site.

Transferring To UC

For students outside UC wishing to transfer in, information can be found here.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

International Student Requirements

International students wishing to apply to UCBA can find information here.

Graduation Requirements

To qualify for an AA degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least an overall 2.0 cumulative grade point average. Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

You must complete an application for degree, usually the term before you expect to graduate. You should see your advisor for specific information well in advance of your final term.

Application Deadlines

UC Blue Ash College operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Communication

Public Relations

Duration: 2 Years Total Credits: 60 Award: AA

Overview

The Public Relations track of UCBA's Communication program offers opportunities for team-based projects, internships, and active learning experiences. Students are trained to think critically, create strategic audience-centered messages, and develop their oral and written communication skills. Students learn about issues of voice, identity, public participation, and advocacy/leadership across communication domains including interpersonal, organizational, political, rhetorical, environmental, health, and mediated communication. This program equips students with the foundational skills and knowledge to move on to and successfully complete a 4-year degree in Public Relations or Communication.

Success

Successful Public Relations students are aware of their communication environment and adapt their communication to create strategic audience-centered messages. Public Relations students will hone their oral and written communication skills and apply them across a variety of communication domains including interpersonal, organizational, political, rhetorical, environmental, health and mediated communication. Public Relations is a good major for students who are interested in working with people and groups in a variety of capacities, e.g., writing press releases, planning events, acting as a spokesperson, designing media campaign, creating graphics.

Career

This program track is designed for students who plan to transition to a bachelor's degree in Public Relations. Graduates with a BA in Public Relations are prepared for careers in community relations, corporate communication, employee/member relations, government relations, integrated marketing communication, strategic communication, and other PR-allied fields.

Curriculum

Advising

For advising contact information, please visit the UCBA academic advising page.

UC Advantages And Special Opportunities

Obtaining the associate degree in communication from UC Blue Ash College allows a student to meet the general education requirements and some of the Public Relations and Communication requirements for the Public Relations bachelor's degree offered by UC's College of Arts and Sciences in a friendly, teaching-oriented atmosphere with small class sizes and individual attention.

Admission Requirements

Open Admissions: The program is open to all students with a high school diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to graduate and to advance to upper levels of study. High school students who are considering UC Blue Ash College should take either the SAT or ACT test for guidance and counseling.

Transferring To UC

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Students admitted to the college must show proof of high school graduation or successful completion of the General Education Development (GED) exam. Submission of standardized test scores (ACT or SAT) is recommended but not required. Transfer students must also supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies.

Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program
- Submit the completed form to the college which offers the program into which you want to transition.

To transition to the bachelors degree in communication through the UC College of Arts and Sciences (A&S), students must meet the guidelines established by A&S, which can be found on the A&S Transfer and Transition page, or by contacting the A&S Department of Communication.

International Student Requirements

International students wishing to apply to UCBA can find information on the International Admissions page.

Graduation Requirements

In addition to fulfilling program course requirements, including general education, students must have at least an overall 2.0 cumulative grade point average and meet the residency requirement of 20 semester hours completed at UC.

Students must complete an application for degree, usually the term before they expect to graduate. Students should see their advisor for specific information well in advance of their final term.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash admissions page for specific application deadlines for each term.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Communication

Duration: 2 Years Total Credits: 60 Award: AA

Overview

Communication focuses on discourse among people and within organizations and social institutions. Communication faculty members share a distinctive focus on contemporary social problems. The communication program at University of Cincinnati Blue Ash College (UCBA) covers issues of voice, identity, public participation and advocacy/leadership across communication domains including interpersonal, organizational, political, rhetorical, environmental, health, and mediated communication.

Success

Communication majors have strong critical-thinking and writing abilities, and they are concerned with understanding society and improving social institutions and the well-being of individuals. Communication is a good major for students who are interested in working with people and groups in a variety of fields, e.g., business, social work and law.

Career

This program is designed for students who plan to transition to a bachelor's degree in communication. Graduates with a BA in communication are prepared for many different career options. In our modern world, success in business and industry requires a sophisticated understanding of communication processes. Positions in human resource management, as well as in marketing and public relations, require strong communication skills. Communication students are well prepared for advanced study in such areas as law and business. Graduates find jobs as admissions counselors, communication educators, sales representatives, journalists, marketing managers, human resource specialists, event planners, advertising executives, and electronic media on-air talent.

Communication

Public Relations

Duration: 2 Years Total Credits: 60 Award: AA

Overview

The Public Relations track of UCBA's Communication program offers opportunities for team-based projects, internships, and active learning experiences. Students are trained to think critically, create strategic audience-centered messages, and develop their oral and written communication skills. Students learn about issues of voice, identity, public participation, and advocacy/leadership across communication domains including interpersonal, organizational, political, rhetorical, environmental, health, and mediated communication. This program equips students with the foundational skills and knowledge to move on to and successfully complete a 4-year degree in Public Relations or Communication.

Success

Successful Public Relations students are aware of their communication environment and adapt their communication to create strategic audience-centered messages. Public Relations students will hone their oral and written communication skills and apply them across a variety of communication domains including interpersonal, organizational, political, rhetorical, environmental, health and mediated communication. Public Relations is a good major for students who are interested in working with people and groups in a variety of capacities, e.g., writing press releases, planning events, acting as a spokesperson, designing media campaign, creating graphics.

Career

This program track is designed for students who plan to transition to a bachelor's degree in Public Relations. Graduates with a BA in Public Relations are prepared for careers in community relations, corporate communication, employee/member relations, government relations, integrated marketing communication, strategic communication, and other PR-allied fields.

English

Duration: 2 Years Total Credits: 60 Award: AA

Overview

What is the University of Cincinnati Blue Ash College English Associate of Arts Degree?

The Associate of Arts degree in English provides students with a solid foundation in literary studies and creative writing as part of a comprehensive general education. This program also provides students with a seamless transition from UCBA to the UC Uptown Campus' Department of English and Comparative Literature where students can work toward a bachelor's degree or minor in English. Literary studies and creative writing allow students to envision the lives and experiences of others in order to gain perspectives beyond their own. Through this imaginative process, literature and creative writing help students to comprehend human complexity, to empathize with others, and to develop creative solutions to problems. Literature, like any art, is part of the human conversation that seeks to address the challenges we face.

Success

Students in the UCBA English Associate of Arts Degree Program are curious, versatile, and approach challenges using multiple perspectives. They like to read, write, think, create, and problem-solve, invaluable skills that can be applied to many academic disciplines and careers.

Career

Most careers in liberal arts disciplines require four-year degrees. Once students complete the degree in English, they will find that a wide range of employers value the skills they have developed—the ability to analyze, solve problems, write, and think creatively. This fact provides students with many career paths, including work in communications, public relations, marketing, journalism, politics, government and nonprofits, education, human resources, publications editing and writing, business and account management, social media management, sales, and advertising.

Majoring

The UCBA Associate of Arts degree in English program fulfills all UC general education requirements. In addition, the program fulfills most first and second-year program requirements for students who want to transition to tracks in Creative Writing and/or Literary and Cultural Studies in the Department of English and Comparative Literature at the College of Arts and Sciences. Thus, a student who successfully completes this two-year program meets General Education requirements in humanities and literature, quantitative reasoning, natural science, foreign language, social science, historical perspectives, and others.

Advising

Students can make an advising appointment by calling 513-558-9442 or emailing ucbaadvising@uc.edu. The Advising Center is located in Room 155 Muntz Hall.

UC Advantages And Special Opportunities

Well-qualified literature and creative writing faculty work with UCBA students in small classes on a regional campus that is part of a university ranked nationally among the top 25 research institutions. Successful completion of this program will prepare students to transition to the Department of English and Comparative Literature on UC's Uptown Campus or to transfer to other institutions to complete the four-year degree. The Department of English and Communication at UCBA offers a variety of opportunities for English students, including publication of the *Blue Ash Review* literary magazine and participation in National Poetry Month events, writing contests, and student and faculty readings. UCBA offers lower tuition than UC Uptown, making it an excellent value for students working toward an associate of arts degree. UCBA also offers free parking and a free shuttle featuring round-trip transportation to the UC Uptown Campus.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

History

Duration: 2 Years Total Credits: 60 Award: AA

Overview

The AA Degree in History is designed to allow seamless transition into the History BA at the College of Arts and Sciences (A&S) at the main campus but can be used as the building block for other majors as well.

Success

History majors must possess the ability to learn how to analyze primary sources and historical facts, to participate in informed discussion of conflicting historical perspectives and to appreciate the breadth of human experience over space and time. In addition, history students must be committed to developing skills in critical thinking, research methods and the integration of that knowledge in writing and oral communication.

Career

There are many career options open for Historians, including museums, historical preservation, archives, editing and publishing, positions in federal, state, and local historical agencies, and, of course, public school teaching. Further, the skills of the historian – research, writing, critical thinking – are transferable to many occupations and professions.

Famous History majors: Franklin D. Roosevelt, Dwight Eisenhower, Conan O'Brien, Katherine Hepburn, Samuel J. Palmisano (CEO of IBM), Ben Silverman (CEO of NBC), Wolf Blitzer, author Seymour Hersh, and Supreme Court Justices Anthony Kennedy, Elena Kagan, and Antonin Scalia. And, of course, UC basketball Coach Mick Cronin.

Students can make an advising appointment by calling 513-558-9442 or emailing ucbaadvising@uc.edu. The Advising Center is located in Room 155 Muntz Hall.

UC Advantages And Special Opportunities

The History program provides an excellent general education foundation for students who wish to pursue a baccalaureate degree at the College of Arts & Sciences (A&S). Students at UC Blue Ash College enjoy small classes and well-qualified faculty, as well as the many benefits afforded through study at a university ranked among the nation's top 25 public research institutions. The regional campus is conveniently located and has lower fees for tuition, technology, student life, and parking.

Admission Requirements

The program is open to all students with a high school diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to graduate and to advance to upper levels of study.

Transferring To UC

Transferring to UC Blue Ash College

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Transfer students must supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program into which you want to transition.

Students must complete the residency requirement at UCBA to qualify for graduation from a UCBA program.

International Student Requirements

International students wishing to apply to UCBA can find information here.

Graduation Requirements

- Complete all program requirements.
- Earn at least 60 semester credit hours (for an associate degree) This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least these minimum number of credit hours.
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the UCBA residency requirement.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Students can find more information here.

Please consult the UC Blue Ash Admissions page for specific application deadlines for each term.

Liberal Arts

Duration: 2 Years Total Credits: 60 Award: AA

Overview

The Associate of Arts degree in Liberal Arts provides students with the first two years of the broad educational foundation needed for entry into many fields. The program is designed so that students planning to transfer from Blue Ash College to the College of Arts and Sciences (A&S) at the University of Cincinnati can complete a typical bachelor's degree with an additional two years of full-time study.

Success

Successful Liberal Arts students are interested in exploring a wide range of disciplines.

Career

Many students choose to complete a bachelor's degree. Among the areas of concentration offered at the College of Arts and Sciences for which transfer with a Liberal Arts degree is appropriate are Afro-American Studies, Anthropology, Asian Studies, Classical Civilization, Communication, Economics, English, French, Geography, German/German Studies, History, Interdisciplinary Studies, Judaic Studies, Latin American studies, Mathematical Sciences, Personnel and Industrial Relations, Philosophy, Physical Geography, Political Science, Psychology, Sociology and Spanish.

Students may enter the workforce directly with an AA in Liberal Arts. Their degree signifies that they have developed the critical-thinking skills necessary for success in business.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another must fill out the online Application for Change in College and Program.

Students must complete the residency requirement at UCBA to qualify for graduation from a UCBA program.

International Student Requirements

International students wishing to apply to UCBA can find information on the International Students Admissions page.

Graduation Requirements

- Complete all program requirements
- Earn at least 60 semester credit hours (for an associate degree) This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least these minimum number of credit hours.
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the UCBA residency requirement.
- Submit an application for graduation to the registrar's office by their posted deadline.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash Admissions page for specific application deadlines for each term.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Business Administration

Duration: 2 Years Total Credits: 60 Award: AA

Overview

Pre-business administration is an associate degree program that provides the basic curriculum needed for the first two years of a bachelor's degree in business. The program is transfer-oriented and is ideal for the student who is considering an upper-level business management career, but who wishes to pursue the first two years within a small campus atmosphere. The program is designed so students can earn an associate of arts degree and transition to the Carl H. Lindner College of Business (LCoB) at the University of Cincinnati. Graduates of this program may also transfer to other baccalaureate programs in business.

The various baccalaureate degree programs offered at the University of Cincinnati Lindner College of Business include accounting, business analytics, economics, finance, entrepreneurship, real estate, marketing, international business, operations management, and information systems. Students should consult the LCoB website for details about the major to which they intend to transition.

UC Blue Ash College advisors assist students in selecting majors and planning courses of study and in following transfer procedures to other colleges.

Success

Business majors need people skills, the ability to communicate well, both verbally and in writing, and a strong quantitative background.

Career

Students who choose business administration as a career field will be qualified for entry-level management positions in business firms, government, and nonprofit organizations. Generally, these positions will be in accounting, finance, marketing, production, purchasing, and human resources.

Minoring

Minors do not apply to associate degree programs. If you are enrolled in a transitional associate degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year baccalaureate. Generally, you will select your minor when you transfer to your four-year institution.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Pre-Business Administration

Advising

Current and admitted students can locate advisor contact information via the UCBA advising website:
http://www.ucblueash.edu/academics/advising/advisor-list.html

UC Advantages And Special Opportunities

The pre-business administration program at UC Blue Ash College is designed to facilitate transfer to a baccalaureate program. Students at UC Blue Ash College enjoy small classes and well-qualified faculty, as well as the many benefits afforded through study at a university ranked among the nation's top 25 public research institutions. The regional campus is conveniently located and has lower fees for tuition, technology, student life, and parking.

Special Programs

The business program allows for maximum flexibility, with courses offered days and evenings. Tutoring in study skills, writing, math, and science is available at no additional cost for students needing extra help.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Depending on your academic background, you may need to take the college's placement test prior to registering for classes. Additional information is available on the college's Placement Testing Requirements web site: http://www.ucblueash.edu/admissions/placement/requirements.html

Additional information about admission to UCBA is available on the college's admissions web site: http://www.ucblueash.edu/admissions/index.html

Transferring To UC

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Transfer students must supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program form (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

Students wishing to transition to the UC Carl H. Lindner College of Business must meet or exceed each of the requirements stated below. Please note that the collegiate grade point average for transfers from other colleges and universities may be calculated utilizing all course work attempted at each college and university attended.

1. Cumulative collegiate Grade Point Average (GPA) of 2.5 or higher on a 4.0 scale over all course work attempted.
2. Must demonstrate appropriate progress toward completion of the required mathematics courses. Students enrolled in a bachelor of business administration degree must complete **Math 1044** (Applied Calculus I) **and Math 1045** (Applied Calculus II) (a 6-hour math sequence) or its equivalent, **OR Math 1061** (Calculus I - 4 hours) **and Math 1062** (Calculus II - 4 hours) or the equivalent from another institution.
3. Must be in good standing in current college or university. Conditional offers of admission will be made using transcripts with courses in progress. A final transcript is required before the student is allowed to enroll.

International Student Requirements

International students wishing to apply to UCBA can find information at http://www.ucblueash.edu/admissions/information/international.html.

Graduation Requirements

To qualify for a degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least a 2.0 cumulative grade point average. It is your responsibility to take the courses necessary for graduation and to meet the UC residency requirements.

You must complete an Online Degree Application, usually the semester before you expect to graduate. You should see your advisor for specific information well in advance of your final semester.

Application Deadlines

UC Blue Ash College operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall. Application deadlines for each term are available on the UCBA Admissions web site: http://www.ucblueash.edu/admissions/steps.html

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Criminal Justice

Duration: 2 Years Total Credits: 61 - 62 Award: AA

Overview

Criminal justice is an area of public service that employs those in law enforcement, the courts, and corrections at all levels of government, and in both juvenile and adult venues. It is a professional field, interdisciplinary in nature, stressing the major components of the criminal justice system in America.

Success

Students who succeed in the Pre-Criminal Justice program are people who enjoy functioning as part of a team in a system charged with keeping the public safe and maintaining societal order, assisting in the administration of justice, and treating offenders. They are people who demonstrate the willingness to work well with the general public, exhibit excellent communication skills, and work well under various levels of supervision.

Career

Students studying criminal justice usually enter careers in policing, courts, corrections, criminal justice planning and administration, crime prevention, research and other related fields.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Criminal Justice

Advising

Current and admitted students can locate advisor contact information for Pre-Criminal Justice via the UCBA advising website.

UC Advantages And Special Opportunities

Obtaining the Associate of Arts degree in Pre-Criminal Justice from UC Blue Ash College allows a student to study the subject in a friendly, teaching-oriented atmosphere with small class sizes and individual attention. In addition, students interested in attaining a Bachelor's degree in Criminal Justice can complete some of their course work at the Blue Ash campus.

Admission Requirements

This program is open to all students with a high school diploma or GED (minimum composite score of 45) and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study, including meeting the UC Blue Ash College's residency requirements and graduating with a cumulative GPA of 2.0.

High school students who are considering the program should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement tests prior to registering for classes.

You can learn more about applying for admission to UC Blue Ash College and enrollment here.

Transferring To UC

Students transferring to UC Blue Ash College follow similar procedures as those who are enrolling through open admissions. Please go to admissions for more information on applying to UC Blue Ash College.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at UC Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students seeking to graduate with the Associate's Degree in Pre-Criminal Justice from UC Blue Ash College must meet college residency requirements (i.e. earning > 50 percent of credit hours from Blue Ash College) and achieve a cumulative GPA of 2.0.

Application Deadlines

The college's rolling admissions policy allows you to start any semester: fall, spring or summer. However, you are advised to apply for admission at least two weeks prior to the start of any given semester.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Health Promotion and Education

Duration: 2 Years Award: AA

Overview

The Health Promotion and Education (Pre) program is an associate degree program designed for students who, after obtaining the associate degree, plan to transition to the baccalaureate program in health promotion and education in UC's College of Education, Criminal Justice, and Human Services (CECH).

According to the National Commission for Health Education Credentialing, Inc. (NCHEC), Health Education Specialist are "professionals who design, conduct and evaluate activities that help improve the health of all people."

The Health Promotion and Education program at the University of Cincinnati is designed to prepare graduates for a variety of health promotion and education job opportunities. Health Education Specialists work to improve the health of individuals or communities, depending on their work setting and job responsibilities. For example, Health Education Specialists working in health departments often are concerned with the health of the community they serve and may develop programs to impact people living in the community. Health Education Specialists working in business/industry may be working one-on-one with individuals to help them modify and improve their diet, increase their physical activity, reduce their stress levels, stop smoking, etc.

The eight basic responsibilities of the Health Education Specialist include:

- Assessing individual and community needs for health education
- Planning health education strategies, interventions and programs
- Implementing health education strategies, interventions and programs
- Conducting evaluation and research related to health education
- Advocating for health and health education
- Communicating for health and health education
- Leadership and Management
- Ethics and Professionalism

Success

Health Education Specialists must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Furthermore, those majoring in health promotion and education are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for Health Education Specialists, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Both the behavioral and biological sciences form the foundation for health promotion and education. Course work is required in such areas as psychology, sociology, human growth and development, human anatomy and physiology, statistics and speech/communications. Basic business classes in marketing, economics and accounting are also required.

Career

Depending on preparation and interest, graduates of the baccalaureate program in health promotion and education may find employment in community health agencies, departments of public health, business and industry, health care settings, sports medicine centers or schools. Health Education Specialists may be involved in areas such as stress management, weight control, physical fitness, improved nutrition, smoking cessation, environmental health, family life and more.

A variety of professional organizations represent Health Education Specialists, depending on interest area and employment site. Some organizations are:

- Association for the Advancement of Health Education
- Society for Public Health Education
- American Public Health Association
- Association for Worksite Health Promotion
- American School Health Association

Curriculum

Advising

Current and admitted students can locate advisor contact information for Health Promotion and Education (Pre) program via the UCBA Advising website.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Transferring To UC

Transferring to UC Blue Ash College from another institution:

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Students admitted to the college must show proof of high school graduation or successful completion of the General Education Development (GED) exam. Submission of standardized test scores (ACT or SAT) is recommended but not required. Transfer students must also supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

Fill out an Application for Change in College and Program.

Submit the completed form to the college which offers the program into which you want to transition.

Transitioning from UC Blue Ash College to the UC baccalaureate program in Health Promotion and Education: UC Blue Ash College students must apply to the College of Education, Criminal Justice, and Human Services and also to the Health Promotion and Education program within the college. A 2.25 grade point average is required for admission into the program, and a 2.50 grade point average is required to graduate from the program in the CECH.

International Student Requirements

International students wishing to apply to UCBA can find information at UC Admissions - International Students.

Graduation Requirements

To graduate from the UC Blue Ash College Health Promotion and Education (Pre) associate degree program, students must complete all required coursework and have a minimum grade point average of 2.0.

Within CECH, a 2.50 grade point average is required to graduate from the bachelor's degree program.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash Admissions page for specific application deadlines for each term.

Students should check with the College of Education, Criminal Justice, and Human Services for application deadlines to the bachelor's program.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Organizational Leadership

Duration: 2 Years Total Credits: 62 - 66 Award: AA

Overview

Pre-organizational leadership is an associate degree program that provides the basic curriculum needed for the first two years of a bachelor's degree in organizational leadership. The program is transfer-oriented and is ideal for the student who wishes to pursue the first two years within a small campus atmosphere. The program provides students with skills and knowledge to perform as effective leaders within organizations and society, combining a liberal arts education and selective business subjects.

Organizational leadership students interested in pursuing a career in human resources (HR) are encouraged to take the HR track beginning in junior year.

UC Blue Ash College (UCBA) faculty advisers assist students in planning courses of study and in following transfer procedures to other colleges.

Success

Successful students in organizational leadership need critical thinking skills, people skills, and the ability to communicate well, both verbally and in writing.

Career

Like students who graduate with other liberal arts majors, graduates with a BA in organizational leadership are prepared for further academic or professional study and for many different career options in the nonprofit and for-profit sectors. Organizational leadership students have pursued careers in business management, communications, nonprofit organizations, Peace Corps and government. Organizational leadership students also go on to law school, master's in business administration (MBA) programs, and graduate programs in communication, psychology, and other liberal arts disciplines.

Minoring

Minors do not apply to associate degree programs. If you are enrolled in a transitional associate degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year baccalaureate. Generally, you will select your minor when you transfer to your four-year institution.

Advising

For advising contact information or instructions for students already in this program, please check the college's advising webpage.

Advising Center phone: 513-745-5753

UC Advantages And Special Opportunities

Associate degree programs at UC Blue Ash College (UCBA) are designed to facilitate transfer to a baccalaureate program, while allowing the student to begin a college program with smaller class sizes and individual attention from well-qualified faculty. UCBA is conveniently located and has lower fees for tuition, technology, student life and parking.

Special Programs

The program allows for maximum flexibility, with courses offered days and evenings. Tutoring labs in study skills, writing, and math are available at no additional cost for students needing extra help.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

All students entering UC Blue Ash College, except those who have taken college level math and English, must take the college's placement test prior to registering for classes.

Additional information is available on the college's admissions website.

Transferring To UC

Transferring to UC Blue Ash College (UCBA)

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons. Application of transfer credit to the student's program is at the discretion of the appropriate program director or department chairperson.

Changing Majors Within UC

Students changing majors FROM other programs or colleges within UC will be considered based on the same criteria as outside transfers.

Students planning to transfer TO other UC colleges (or other institutions) must meet the grade point criteria established by those colleges.

International Student Requirements

International students wishing to apply to UCBA can find information at the University's International Students Admissions webpage.

Graduation Requirements

To qualify for a degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least a 2.0 cumulative grade point average. It is your responsibility to take the courses necessary for graduation and to meet the UC residency requirements.

You must complete an application for degree, usually the semester before you expect to graduate. You should see your advisor for specific information well in advance of your final semester.

Application Deadlines

You may enroll in UC Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering UCBA should take the ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement test prior to registering for classes. This test is given on the UCBA campus.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Social Work

Duration: 2 Years Total Credits: 61 Award: AA

Overview

Social workers are community troubleshooters. Through counseling, referral services or policy-making and advocacy, they help individuals, families and groups cope with problems. Those in the area of planning and policy help people understand how social systems operate and prepare ways of bringing about needed change in institutions such as health services, housing or education. Those in the area of counseling provide a variety of therapies in a wide range of settings.

Success

People who are successful in this career field possess people-oriented skills that allow them to help individuals in crisis situations. Other successful attributes of these individuals should be a willingness to help people, good organizational skills and good assessment and intervention skills. Students also need to become proficient writers, as case work involves detail-oriented reports.

Career

Settings in which social workers are employed vary widely. In the public sector, they are employed primarily in departments of human resources, social services, mental health, health, housing, education and corrections. Those in the private sector work for nonprofit agencies, community and religious organizations, hospitals, nursing homes and other human service agencies. Some are also employed in business and industry, where they may counsel employees. A master of social work (MSW) degree is becoming more desirable and is generally required for positions in the mental health field, as well as for supervisory, administrative or research positions. According to the US Bureau of Labor Statistics (2023), the median salary for social workers is $58,380.

Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. To transition to the BSW program at the College of Allied Health, students must earn a 2.75 GPA or higher to be considered for admission.

All students entering Blue Ash Campus, except those who have taken college-level math and English, must take the college's placement test prior to registering for classes.

Transferring To UC

Transferring to UC Blue Ash College

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons. Application of transfer credit to the student's program is at the discretion of the appropriate program director or department chairperson.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

To qualify for the associate's degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least a 2.0 cumulative grade point average. It is your responsibility to take the courses necessary for graduation. After freshman requirements have been completed, no more than nine sophomore credits should be taken in another college. Those credits and courses must have the approval of the academic adviser before they are taken. A student who changes programs or extends work beyond a two-year period must meet the published requirements of the program in the year of expected graduation. Transfer students must take at least one-half of the required course work in a selected program at Blue Ash Campus to qualify for graduation.

You must complete an application for degree, usually the semester before you expect to graduate. You should see your advisor for specific information well in advance of your final semester.

Application Deadlines

Students may enter the program during any semester. Several classes are sequential, however, and are offered only one semester per academic year. Entering during winter or summer semester may extend the length of the program.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Sport Administration

Duration: 2 Years Total Credits: 62 Award: AA

Overview

Pre-sport administration is an associate degree program that provides the basic curriculum needed for the first two years of a bachelor's degree in sport administration. The program is transfer-oriented and is ideal for the student who wishes to pursue the first two years within a small campus atmosphere. The program is designed so students can earn an associate of arts degree and transfer to the College of Education, Criminal Justice and Human Services at the University of Cincinnati main campus.

The sport administration curriculum focus is on the business side of the sport industry and was developed to meet the standards of the Sport Management Program Review Council. The sport administration program provides graduates with a strong technical foundation and the business skills necessary to successfully enter the field of sport management.

UC Blue Ash College (UCBA) faculty advisors assist students in selecting majors and planning courses of study and with following transfer procedures to other colleges.

Success

Successful sport administration graduates must have technical business skills as well as conceptual skills. Additionally, a successful sport manager must have a high level of interpersonal skills to build and maintain positive relations with an array of constituents. Sport administrators also require excellent oral and written communication skills and the ability to lead and motivate others.

Sport management success depends upon critical thinking and creative problem solving with an emphasis on teamwork.

Career

There are approximately five million people working in sport-related occupations. Students who complete the associate degree and the baccalaureate degree in sport administration are prepared for a variety of administrative positions in professional sports, college athletics and high school athletic administration, as well as positions in sports associations. Career opportunities for sport administration graduates exist in the management of sport venues and events, the management of health and fitness and recreation facilities, and positions with sporting goods firms.

Minoring

Minors do not apply to associate degree programs. If you are enrolled in a transitional associate degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year baccalaureate. Generally, you will select your minor when you transfer to your four-year institution.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Pre-Sport Administration

Advising

Current and admitted students can locate advisor contact information via the UCBA advising website.

UC Advantages And Special Opportunities

The pre-sport administration major at UC Blue Ash College (UCBA) is designed to facilitate transfer to a baccalaureate program while allowing the student to begin a college program with smaller class sizes and individual attention from well-qualified faculty. The regional campus is conveniently located and has lower fees for tuition, technology, student life and parking.

Special Programs

The program allows for maximum flexibility, with courses offered days and evenings. Tutoring labs in study skills, writing, and math are available at no additional cost for students needing extra help.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Depending on your academic background, you may need to take the college's placement test prior to registering for classes. Additional information is available on the college's Placement Testing Requirements website.

Additional information about admission to UCBA is available on the college's admissions website.

Transferring To UC

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Transfer students must supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program form (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

International Student Requirements

International students wishing to apply to UCBA can find information at http://www.ucblueash.edu/admissions/information/international.html.

Graduation Requirements

To qualify for a degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least a 2.0 cumulative grade point average. It is your responsibility to take the courses necessary for graduation and to meet the UC residency requirements.

You must complete an Online Degree Application, usually the semester before you expect to graduate. You should see your advisor for specific information well in advance of your final semester.

Application Deadlines

UC Blue Ash College operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall. Application deadlines for each term are available on the UCBA admissions website.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Psychology

Duration: 2 Years Total Credits: 60 - 64 Award: AA

Overview

Psychology is the study of behavior and mental processes. Psychologists engage in a variety of careers, including those that involve counseling, research, teaching, data analysis, and business (e.g. human resources, marketing, etc.).

Success

Psychology requires students to develop a wide variety of skills. Taking courses oriented towards social, abnormal, and personality psychology allows students to develop skills geared towards helping people and managing interpersonal work and life situations. Taking classes that focus more on psychobiology and sensation and perception allows students to develop strong critical thinking skills important in engaging in research. Because psychology is a scientific field, with findings based on research, all students must master statistics and understand the research designs of studies in the field.

Ultimately, a degree in psychology prepares students to be critical thinkers and proficient writers. Businesses seeking college graduates without discipline specifications are well served by psychology majors who can examine behavior, apply concepts and theories, use the scientific method, understand statistics and write well.

Career

Students in this transfer program may continue their studies to obtain a bachelor's degree. These graduates look forward to such career options as career counselor, community support worker, family services worker, human relations director, marketing representative, laboratory assistant, etc. The median salary for graduates with a bachelor's in psycholgy is $45,000, according to the April 2016 report from the National Associateion of Colleges and Employers. To obtain licensing certification for private practice or to work as a psychologist (i.e. certified counselor) in education, business, clinics, etc., one must at minimum have a master's degree in psychology.

Advising

For advising contact information, please check the college's advising web page.

Advising Center phone: (513) 745-5357

UC Advantages And Special Opportunities

Obtaining the associate psychology degree from UC Blue Ash College allows a student to meet the general education requirements for the bachelor's degree offered by UC's College of Arts and Sciences (A&S) in a friendly, teaching-oriented atmosphere with small class sizes and individual attention. In addition, several of the sophomore-level courses for the bachelor's degree may be offered on the Blue Ash campus and can be taken while completing the associate degree.

Admission Requirements

The program is open to all students with a high school diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to graduate and to advance to upper levels of study. High school students who are considering UC Blue Ash College should take either the SAT or ACT test for guidance and counseling.

Transferring To UC

Transferring to UC Blue Ash College

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Transfer students must supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program.
- Submit the completed form to the college which offers the program into which you want to transition.
- Students changing majors FROM other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

International students wishing to apply to UCBA can find information here.

Graduation Requirements

- Complete all program requirements
- Earn at least 60 semester credit hours (for an associate degree) *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least these minimum number of credit hours.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the UCBA residency requirement.
- Submit an application for graduation to the registrar's office by their posted deadline.

Students should see their advisor for specific information well in advance of their final term.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash Admissions page for specific application deadlines for each term.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Applied Graphic Communication

Duration: 2 Years Total Credits: 62 Award: AAB

Overview

Applied Graphic Communication concerns the process of creating visual materials that effectively convey information using text and/or images. This discipline encompasses many creative and technical fields involved in all phases of design, production, finishing and distribution of two- or three-dimensional artwork, products or electronic transmissions. The Applied Graphic Communication major is for students seeking foundational skills appropriate for further study in the design field or for employment in areas of design support.

Graphic communication is a professional field encompassing a broad range of design formats for both print and web-based media. Included among these are advertisements, newsletters, brochures, magazines, technical literature, identity and branding systems, package design, Web pages and multimedia. Students in the Applied Graphic Communication programs participate in small classes with considerable personal attention and direction from faculty. Art and design classes are taught in well-equipped studio facilities and labs using industry-standard computers and software.

The Applied Graphic Communication program may be completed full time in either two or three years. Students should meet with an academic advisor regularly to ensure that they take courses in the correct sequence and that they meet prerequisites.

Success

Students who succeed in the field of graphic communication are creative thinkers who possess kinetic and visual learning styles. They are detail-oriented and have strong motor skills. People who work in this field must demonstrate excellent time- and project-management skills and possess strong listening and communication skills.

Career

Students who complete the Applied Graphic Communication program will be qualified for entry-level design and creative support positions. Generally, these positions include: assembly and presentation of comprehensives, electronic file formatting and preparation, electronic pre-press, image manipulation and management, scripting and programming for web design, and computer template design.

Graduates of this major pursue careers in a variety of professional settings. These include graphic and interactive design studios, digital production and printing companies, advertising and marketing agencies, or other areas of media, communications, and public relations.

With further education students may seek positions requiring a higher level of skills.

Minoring

Applied Graphic Communication is not offered as a minor.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Applied Graphic Communication

Advising

Current and admitted students can locate advisor contact information for Applied Graphic Communication via the UCBA advising website.

UC Advantages And Special Opportunities

Graduates of this major have strong foundational skills appropriate for further study in the design field or for employment in areas of design support. They may seek employment in a variety of professional settings requiring design support including advertising agencies, printing companies, in-house art departments, or other areas of communications and public relations. Art and Visual Communication Department faculty are committed to transforming students' expectations into reality through rigorous course standards. The program's accreditation by the National Association of Schools of Art and Design (NASAD) assures the high standard of education provided to students.

Enrolling at UCBA allows the student to begin a college program with smaller class sizes and individual attention from well-qualified faculty. The regional campus is conveniently located and has lower fees for tuition, technology, student life and parking.

Computer Requirements: All undergraduate students entering the Applied Graphic Communication program are required to purchase a personal laptop computer with specific requirements for hardware and software. You can review the current requirements here. Please note that these requirements may be slightly altered as equipment evolves. The requirements listed on the website will always be the most recent and accurate. Therefore, students new to UCBA are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase. Many university programs have additional technology requirements for students in the later years of study.

Special Programs

Internships and field experience will be available with this major for students who meet department qualifications. Interns acquire professional experience while earning college credit and attending classes.

The Art and Visual Communication Department sponsors a student chapter of AIGA, the professional association for design in America. Student members gain access to AIGA resources and activities created to enhance their education and help in their eventual transition to the workplace as professional designers.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study. To proceed to the second year of the program, students must participate in a mid-program portfolio review at the end of their first year. Please refer to course syllabi for specific requirements.

For additional information on admission requirements please refer to the Art & Visual Communication Admission Requirements website.

Transferring To UC

Transferring to UC Blue Ash

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons. Application of transfer credit to the student's program is at the discretion of the appropriate program director or department chairperson.

Changing Majors Within UC

Transfer requirements among different colleges and programs at the university will vary. It is essential for students who plan to transfer to other colleges or programs to confirm transfer requirements with an academic advisor from the department to which they seek admission prior to applying for transfer.

For priority consideration, complete transfer applications should be received by March 1 for the following fall term.

International Student Requirements

Students who did not graduate from a high school in the United States must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at UCBA. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

To qualify for a degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least a 2.0 cumulative university grade point average. It is your responsibility to take the courses necessary for graduation. After freshman requirements have been completed for UCBA, no more than nine sophomore credits should be taken in another college. Those credits and courses must have the approval of the academic adviser before they are taken. A student who changes programs or extends work beyond a two-year period must meet the published requirements of the program in the year of expected graduation. Transfer students must take at least one-half of the required course work in a selected program at UCBA to qualify for graduation.

Note that the minimum passing grade for most courses in the Applied Graphic Communication program is a C-. To qualify for graduation, students must achieve at least a C- in each CMDS studio course, including the Capstone and Portfolio Review course (CMDS 2050). Please refer to course syllabi for specific requirements and maintain contact with faculty and program advisors to stay on track.

Students must complete an application for degree, usually the term before expected graduation. You should see your advisor for specific information well in advance of your final semester.

Application Deadlines

You may enroll in UCBA if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring or summer. Many courses are sequential, however, and are offered only one term per academic year. Entering during spring or summer semester may extend the length of the program.

High school students who are considering UCBA should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement test prior to registering for classes. This test is given on the UCBA campus.

Students seeking to transfer to other colleges and programs at UC or another regionally accredited university or college should submit a complete application for admission by the priority deadline of March 1 for the following academic year.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Applied Graphic Communication program is accredited by the National Association of Schools of Art and Design (NASAD).

Business Management Technology

Duration: 2 Years Total Credits: 60 Award: AAB

Overview

Business technology is a program providing a broad foundational study of knowledge required for entry-level positions in business management. It includes a general education core and an introduction to the functional areas of business: management, marketing, accounting, and finance.

Graduates of this program receive an associate of applied business degree. Career programs are designed for students who plan an associate degree only or want to continue at the UC Blue Ash campus for a technical baccalaureate (BTAS program). Some courses will NOT transfer to UC Uptown campus programs.

Success

Business majors need people skills, the ability to communicate well (both verbally and in writing), and a strong quantitative background.

Career

The general business technology program prepares students for entry-level opportunities in business and industry.

Students who complete the degree qualify for entry-level positions in commerce, industry, public practice and government. Job opportunities are numerous in a wide spectrum of organizations, and will depend in some part on previous education and work experience.

Majoring

Business majors may complete the associate degree requirements in two to three years attending full-time, depending on math and English placement. Part-time students may complete the program at their own pace, attending days and/or evenings. The program includes core courses in business and general education, which prepare the student to think critically and be a lifelong learner.

Graduation Requirements

To qualify for a degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least a 2.0 cumulative grade point average. It is your responsibility to take the courses necessary for graduation and to meet the UC residency requirements.

You must complete an Online Degree Application, usually the semester before you expect to graduate. You should see your advisor for specific information well in advance of your final semester.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Information Technology

Duration: **2 Years** Total Credits: **62** Award: **AAB**

Overview

Information Technology (IT) is the discipline of using technology, specifically computational devices to manipulate and organize information. IT professionals provide a variety of job functions that range from installing application software and managing hardware and software to designing complex network and database configurations. CNN Money magazine states that IT is the number one "hot job" through 2018 with growth potential of 30 percent.

Advising

Current and admitted students can locate advisor contact information for information technology via the UCBA advising website.

UC Advantages And Special Opportunities

Conveniently located in Blue Ash as a regional campus of the University of Cincinnati - UC Blue Ash (UCBA) - is located on 135 wooded acres and serves residents of Hamilton, Butler, Warren and Clermont counties, as well as other surrounding communities. UCBA also works closely with the Blue Ash area workforce to assist with their training needs.

The UCBA campus is friendly, informal, and prides itself on being accessible to students of all ages with various career aspirations. It also prides itself on offering smaller classes and closer ties with faculty and other students. UCBA welcomes transfer students, students who want to complete career programs, and students of any age who wish to take a course for personal enrichment or to improve their own skills.

There is ample free parking as well as a shuttle to and from Clifton.

Special Programs

The UC Blue Ash academic labs are one of our best student resources. They are free and open to any student. If you are returning to college after a long absence or feel under-prepared for the challenges of college, the academic labs may provide just what you need.

These labs include the math lab, language lab, writing lab and study skill and reading center.

Visit the labs online.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first year student, you will need to take the placement test. This test does not affect your admission; however, the results are essential for your proper placement into classes. You must complete the placement test befor you may register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

To transfer to UC Blue Ash, you must be in good academic standing at the college or university you last attended. We accept transfer applications all year long.

If you have not taken college-level English or mathematics, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Blue Ash by completing the application for change in college and program form available from UC admission offices. You are strongly urged to see your advisor before transferring into a different major to minimize any impact or your degree progress.

International Student Requirements

A TOEFL score of 187 (computer test) or 515 (paper exam) is required if your formal education is from a country where English is not a primary language or if your documents do not clearly indicate your proficiency in English. You must alsom meet admission deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please contact Enrollment Services for details.

Note you will be charged nonresident tuition.

Note that UCBA is a non-residential campus (no dorms or other housing is available). It is possible to live in a dorm on the UC Clifton campus as bus transportation is availble to and from the Clifton and UCBA campuses.

Graduation Requirements

You must complete an application for a degree and receive a pre-certification from your academic advisor the semester before you expect to graduate. You should see your advisor or Enrollment Services for specific information well in advance of your final semester.

Application Deadlines

UC Blue Ash is an open admission campus. We accept applications all year long and you may start any semester (although not all required classes are offered every semester). Financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Applied Media Communications

Animation

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

Beginning with their first semester, students in Applied Media Communications – Animation Track are immersed in an active learning environment. Hands-on courses in animation, audio, media design, motion and 3D graphics, and video engage students in industry-standard software and equipment to make professional-level work in the discipline. Courses in aesthetics, media history, and professional practice teach students how to apply their technical skills to visual communication problem-solving, preparing them for successful careers in our ever-changing media environment.

In addition to the core curriculum, which is delivered through small-sized classes, students take advanced courses to deepen expertise in one of these fields or to extend their knowledge into other disciplines and new technologies.

Our aim is to provide creative individuals with opportunities to learn, hone, and evolve the technical processes of digital media production. Our graduates can transition directly into the Games & Animation BFA program jointly offered by UC A&S and DAAP or can enter a highly competitive job market having already gained practical production experience through the completion of individual and group studio projects; campus media productions; professional internships; graduation capstones; and work for real-world clients.

All students entering the following Media Communications & Technology programs: Associate of Applied Science Degree in Applied Media Communication; Associate of Applied Science Degree in Applied Media Communication – Animation Track; Professional Certificate in Applied Media Communication; and Media Criticism and Journalism One-Year Certificate are required to obtain the current recommended laptop computer with designated software applications and digital single lens reflex camera (DSLR) to complete course assignments.

- Laptop Requirement
- DSLR Camera Requirements

Success

Our most successful are intrigued by technology. They have a DIY attitude, enjoy experimenting with gear and software, and are effective problem-solvers. They are comfortable working in teams to develop projects and tell stories. Our outstanding students combine creativity and visual design, while using organizational and planning skills to meet deadlines.

Career

Career Oriented Program

While the Applied Media Communications – Animation Track is designed to transition into the UC Uptown campus Games & Animation BFA program, graduates with the AAS degree can pursue careers in a variety of professional fields. These include advertising, audio recording, media design, and television and video production. Job titles include:

- 3D modeling, texturing, and lighting
- Animator
- Audio engineer
- Digital archivist
- Motion graphic producer
- Television, film, and video producer
- Video effects artist
- Videographer, producer, and editor

Minoring

The Associate of Applied Science degree program in Applied Media Communications – Animation Track, as a two-year career-oriented program, does not include an option for a minor.

Students who have completed the AAS degree program may, however, also pursue one of the certificate programs available in our department for focused training in a specific technical skill and an enhanced set of professional credentials.

Our certificate programs may be used as minors for baccalaureate degrees in other disciplines at the University of Cincinnati. These certificates as minors include: Interactive Web Multimedia and Media Criticism & Journalism. Each certificate/minor requires 27-30 credit hours. Students should seek the approval of the academic advisor in their major before enrolling in a minor program. See Media

Communications & Technology One-Year Certificate programs for curriculum outlines for these minors.

Applied Media Communications - Animation Track

Advising

Students can locate advisor contact information for Applied Media Communications – Animation Track via the UCBA advising website.

UC Advantages And Special Opportunities

UCBA Advantages

UCBA tuition is considerably lower than tuition for colleges on the UC Uptown campus, making education more affordable. Small class sizes at UCBA provide a more effective teaching and learning environment, with additional opportunities for experience gained outside of class through faculty-supervised projects.

Labs and Studios

Media Communications & Technology maintains three studio/lab spaces available for student use to complete project assignments. The studio/lab facilities are scheduled for open labs and can be reserved for individual student use. The schedule varies by term and the open hours are posted outside the labs, as well as on the department website. While equipment available in the labs varies per term and courses taught, permanent resources include: an animation workstation, audio recording booth, editing booths, green screen, lighting equipment, seamless photographic backgrounds, and a studio control room.

Circulating Equipment

A wide range of specialized media production equipment is available specifically for use by program students. These resources include: professional audio equipment, such as field recorders, microphones, microphone supports, and headphones; DSLR still/video cameras and accessories; video cameras; tripods and dollies; specialized camera supports, such as Steadicam and sliders; lighting kits and reflectors; and many other items.

UCTV

Media Communications & Technology also operates UCTV providing online streaming and on-demand video services that may be accessed via UCTVonline. UCTV programming is also available via cable access channels throughout Cincinnati and Northern Kentucky. We have a full television studio and control room where our shows are produced.

Baccalaureate Transition Agreements

This program was designed in cooperation with our colleagues at the University of Cincinnati's college of Arts & Sciences and college of Design, Architecture, Art & Planning to serve as a transition program into the Games & Animation BFA program at (UC DAAP).

Special Programs

One-Year Certificate Programs

Students who have completed the AAS degree program may also pursue one of the One-Year Certificate programs available in our department for focused training in a specific technical skill and an enhanced set of professional credentials. These include Interactive Web Multimedia and Media Criticism and Journalism. Each certificate/minor requires 27-30 credit hours.

Our One-Year Certificate programs may be used as minors for baccalaureate degrees in other disciplines at the University of Cincinnati.

Performance Package Certificate Programs

Media Communications & Technology offers a number of Performance Package Certificate programs to help students upgrade skills and knowledge to become more marketable professionals and more valuable employees. Each Performance Package Certificate consists of three courses that build production or critical skills in a particular discipline.

Performance Packages are available in:

- Animation Production – 2D
- Audio Production
- Digital Media Design
- Film Studies
- Media History
- Media Journalism
- Photo Production
- Video Production
- Web & Interactive Production

Students can typically complete one of these Performance Packages in a single year. Applied Media Communications program students can complete one or more of the Performance Package programs as they complete the required courses for the Associate of Applied Science degree, Professional Certificate, or One-Year Certificate program.

For more information contact:
Roo Hedrick, Program Coordinator, phone: 513-558-8300, roo.hedrick@uc.edu

Admission Requirements

Open Admission

This is an open-admission program, but in order to remain in the program, students are required to meet proficiency standards in the areas of academic performance, portfolio development, and related expectations outlined in the Department Program Requirements.

Transferring To UC

Transferring to UC Blue Ash College

A student wishing to transfer to UC Blue Ash College from another accredited college or university should be guided by the following statement of policy:

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons.

Only grades of C or better are accepted. Special exceptions may be granted at the discretion of Enrollment Services in consultation with program directors or department chairpersons.

There is a 10-year expiration limit for acceptance of transfer credits. Exceptions can be made by Enrollment Services in consultation with the appropriate program directors or department chairpersons.

For all situations not covered by the above, the decision will be referred to the department involved when appropriate.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

Graduation Requirements

Minimum GPA

Students must earn a 2.0 grade point average in order to be eligible for graduation from the program.

Application Deadlines

The Associate of Applied Science degree and the Professional Certificate in Applied Media Communications – Animation Track are designed to be completed in two years, provided students are full-time and do not need prep courses in English and Math. The One-Year Certificate programs are designed to be completed in one year, provided students are full-time and do not need prep courses in English. To successfully complete these academic programs in two years (AAS and Professional Certificate) or one year (Animation, Interactive Web Multimedia, and Media Criticism & Journalism), students must begin in the fall semester. Beginning in any other term than Fall semester may require additional semesters to complete the program and may also affect financial aid.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

As of 2024, Applied Media Communications is also accredited by the National Association of Schools of Art and Design (NASAD).

Applied Media Communications

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

Media-Minded? Start Here!

The Applied Media Communications program is where creativity meets career prep. You'll build real-world skills in video, design, photography, web, audio, and animation, all starting in your very first semester. Whether you're planning to work right after graduation or transfer to finish a bachelor's degree, this two-year AAS degree helps you find your voice, build your portfolio, and launch your future. And with UC Blue Ash's lower tuition and small class sizes, it's one of the smartest ways to start a media career.

The Applied Media Communications (AMEC) program blends creativity, technology, and career readiness, starting in your very first semester. You'll take hands-on courses in video production, graphic design, photography, web design, audio, motion graphics, and animation, all taught in small classes by faculty with real-world experience.

You'll learn by doing, using professional cameras, software, studios, and over 500 pieces of production gear available through our circulation office. Along the way, you'll build communication and problem-solving skills through collaborative projects, critiques, and portfolio development.

Whether you're looking to launch a career in media or plan to transfer into a bachelor's degree at UC's Uptown campus, the Applied Media program helps you find your voice, sharpen your skills, and graduate with a professional portfolio. Students can follow the standard degree path to explore a broad range of media skills—including video, design, photography, web, audio, and motion graphics—or choose to specialize early with our new Animation Track.

With UC Blue Ash's affordability, supportive advising, and creative campus vibe, it's one of the smartest ways to start your media journey.

Success

Small Classes. Big Projects. Real Results.

Our students don't just study media, they create it! From the first week of class, you'll be working with professional tools and getting feedback from instructors who know the industry. You'll leave with a portfolio of work, a final capstone project, and the creative confidence to take the next step—whether that's a job, a freelance gig, or continue for a bachelor's degree on UC's Uptown Campus.

What sets our students up for success:

- Instructors who are also media professionals
- A supportive community of creators who collaborate, critique, and grow together
- Access to professional gear and studio space so you can practice when inspiration hits
- Optional internship opportunities for real-world experience

This isn't a giant lecture hall program. This is creative work, done right, with attention, intention, and support.

Career

Launchpad to the Creative World.

Graduates from Applied Media Communications go on to become editors, web designers, filmmakers, photographers, content creators, audio producers, and motion graphics artists. Some jump straight into the workforce. Others build on their associate degree by transferring to UC's Uptown Campus to complete a bachelor's in Media Production, Digital Media, or related fields. Our program gives you the technical skills and creative confidence to go in many directions because the media industry is always changing, and you will be ready for it.

Majoring

Explore, Specialize, and Build Real Media Skills.

As an Applied Media Communications major, you'll start strong with foundation courses in design, video, photography, and audio, then build on those skills with motion graphics, web design, and electives that match your interests. You'll also complete a capstone project in your final semester that ties it all together and showcases your personal creative voice.

Highlights include:

- Hands-on work in every course. Not just lectures.
- Elective tracks to explore areas like animation, writing, or advanced production skills.
- A professional-grade final project you can show employers or transfer schools.
- Skills in professional design software, camera equipment, editing tools, and visual storytelling.

Whether you're a generalist or specialist, Applied Media Communications gives you the tools to grow and the space to figure out where you want to go next.

Minoring

This program does not currently offer a formal minor. However, students in other majors are welcome to take Applied Media courses with advisor approval, and we welcome creative students looking to broaden their skills. Additional certificate programs are also available.

Curriculum

Create Every Semester. Graduate with a Portfolio.

In Applied Media Communications, every semester gives you hands-on production experience. You'll start with design, photography, and video, then build your skills in motion graphics, web, audio, and capstone planning. Alongside that, you'll take general education courses that sharpen your writing, public speaking, and problem-solving—skills every media professional needs.

Your creative core includes:

- Media Design Foundations I & II – Learn layout, typography, branding, and visual communication
- Photography I and Video Production I – Master the basics of shooting, lighting, and editing
- Audio Production I – Explore sound design, voiceover, and audio mixing
- Motion Graphics and Web Design I – Create animated visuals and responsive websites
- Preproduction Planning – Plan your capstone and learn how to pitch your ideas
- Degree Project Studio – Produce a polished final project that showcases your creative voice

You'll graduate with a UC degree and a portfolio that proves you can create, collaborate, and communicate in today's media world.

Full course list and degree map.

Major Map Versions:
Applied Media Communications (AAS) Curriculum

Advising

In Applied Media Communications, your academic advisor isn't just checking boxes. They're helping you design your future. Our advising team includes faculty who work in media and understand your goals. You'll get one-on-one help planning your classes, choosing your focus area, and deciding whether to jump into the workforce or transfer to a four-year degree.

UC Advantages And Special Opportunities

UC Education. Blue Ash Location.

At UC Blue Ash, you'll get all the power of a University of Cincinnati education—with the access, affordability, and community feel of a small campus. AMEC students learn in professional studios, work with industry-standard software, and have access to over 500+ pieces of production gear through our equipment checkout office. You'll get hands-on from day one—no waiting, no waiting list, no giant lecture halls.

And because you're part of the UC system, you'll still have full access to:

- UC's library, tech, and academic support services
- Opportunities to transfer to Uptown for a bachelor's degree
- Faculty and staff who know your name and want to see you succeed

Why students choose UCBA:

- Tuition nearly 40% lower than Uptown
- Smaller class sizes for more personal attention
- Suburban location = easier parking and less daily stress
- Creative labs, gear checkout, and broadcast facilities like UCTV
- Strong support for first-gen and underrepresented students

Special Programs

Specialize in What Moves You.

The Applied Media degree gives you broad exposure to media production: video, design, audio, photography, web, and motion graphics. Along the way, you'll choose electives that let you go deeper in the areas you enjoy most.

For students who already know they want to specialize, we now offer an Animation Track, a focused path within the AAS degree that builds skills in animation, motion graphics, and visual storytelling. This track was designed to align with transfer into the Animation program at UC's College of Design, Architecture, Art, and Planning (DAAP). Note: That transfer option is currently paused and under review, with plans to resume once DAAP completes internal transitions.

We're also in the process of redesigning our certificate options to better reflect the creative job market. These new choices will give students more ways to sharpen their skills and build competitive portfolios.

Admission Requirements

Every Creator Has a Starting Point. This is yours.

UC Blue Ash has an open admission policy, which means if you've earned a high school diploma or GED, you're eligible to apply. No portfolio or creative experience required.

Once you're admitted to UC Blue Ash, you can declare Applied Media Communications as your major and start building real media skills. Whether you're new to creative work or already making content on your own, we'll meet you where you are and help you grow into the media maker you want to be.

Transferring To UC

An Associate Degree That Opens Doors.

Applied Media Communications is a career-focused AAS degree, but it's also a smart starting point for students who want to continue at UC's Uptown Campus. With support from your advisor and the right planning, AMEC grads can transfer into:

- Media Production (BFA) at the College-Conservatory of Music (CCM)
- Digital Media (BA) at the College of Arts & Sciences
- Animation (BS) at the College of Design, Architecture, Art, and Planning (DAAP). Note: The DAAP transfer option is currently paused and under review, with plans to resume once DAAP completes internal transitions.

And it works the other way, too, because UC Blue Ash is open admission, it's easy to transfer into our program from other UC majors or colleges. We welcome students with all backgrounds, experience levels, and educational goals.

Changing Majors Within UC

Already a Bearcat? We Make It Easy to Switch.

If you're a current UC student, you can change your major to Applied Media Communications without reapplying. We welcome students from any major, whether you're looking for a fresh start or ready to finally follow your creative interests.

Most media production courses begin in the fall, so starting then makes it easier to stay on track. But you can begin your Applied Media journey in any semester with the help of your academic advisor.

International Student Requirements

All courses are taught in English and require in-person attendance. International students must meet UC Blue Ash admission and English proficiency standards. Support services are available through UC International and our advising staff.

Graduation Requirements

What You Need to Graduate

To earn the Associate of Applied Science (AAS) in Applied Media Communications, students must:

- Complete a minimum of 60 credit hours, including both media production and general education courses
- Maintain a 2.0 cumulative GPA
- Earn a C– or higher in all courses required for graduation

In addition to hands-on media classes, students complete UC's general education requirements such as writing, communication, and social science to build the well-rounded skills needed for success in creative fields.

Application Deadlines

Apply Early to Start Strong

We offer open admission, meaning students with a high school diploma or GED are eligible to apply—no test scores or essays required.

Applications are accepted on a rolling basis, but applying early gives you the best access to orientation dates, advising appointments, and technology setup for media courses.

To apply:

- Complete the UC Blue Ash online application
- Select Applied Media Communications as your intended major
- Submit your high school transcript or GED
- Pay the application fee (or request a fee waiver)

For current deadlines, check https://ucblueash.edu/admissions/steps/apply-now.html

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Nationally Accredited. Creatively Respected.

The Applied Media Communications AAS degree is accredited by the National Association of Schools of Art and Design (NASAD) the national accrediting agency for art, design, and media programs. NASAD accreditation means our curriculum, faculty, and facilities meet rigorous national standards for academic and creative quality. It's a mark of excellence that supports both career entry and transfer into four-year creative programs.

Applied Media is also accredited by the Higher Learning Commission (HLC), which accredits all University of Cincinnati programs and ensures overall academic quality and institutional integrity.

These accreditations reflect our commitment to preparing students for real success in the creative industries.

Applied Media Communications

Animation

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

Beginning with their first semester, students in Applied Media Communications – Animation Track are immersed in an active learning environment. Hands-on courses in animation, audio, media design, motion and 3D graphics, and video engage students in industry-standard software and equipment to make professional-level work in the discipline. Courses in aesthetics, media history, and professional practice teach students how to apply their technical skills to visual communication problem-solving, preparing them for successful careers in our ever-changing media environment.

In addition to the core curriculum, which is delivered through small-sized classes, students take advanced courses to deepen expertise in one of these fields or to extend their knowledge into other disciplines and new technologies.

Our aim is to provide creative individuals with opportunities to learn, hone, and evolve the technical processes of digital media production. Our graduates can transition directly into the Games & Animation BFA program jointly offered by UC A&S and DAAP or can enter a highly competitive job market having already gained practical production experience through the completion of individual and group studio projects; campus media productions; professional internships; graduation capstones; and work for real-world clients.

All students entering the following Media Communications & Technology programs: Associate of Applied Science Degree in Applied Media Communication; Associate of Applied Science Degree in Applied Media Communication – Animation Track; Professional Certificate in Applied Media Communication; and Media Criticism and Journalism One-Year Certificate are required to obtain the current recommended laptop computer with designated software applications and digital single lens reflex camera (DSLR) to complete course assignments.

- Laptop Requirement
- DSLR Camera Requirements

Success

Our most successful are intrigued by technology. They have a DIY attitude, enjoy experimenting with gear and software, and are effective problem-solvers. They are comfortable working in teams to develop projects and tell stories. Our outstanding students combine creativity and visual design, while using organizational and planning skills to meet deadlines.

Career

Career Oriented Program

While the Applied Media Communications – Animation Track is designed to transition into the UC Uptown campus Games & Animation BFA program, graduates with the AAS degree can pursue careers in a variety of professional fields. These include advertising, audio recording, media design, and television and video production. Job titles include:

- 3D modeling, texturing, and lighting
- Animator
- Audio engineer
- Digital archivist
- Motion graphic producer
- Television, film, and video producer
- Video effects artist
- Videographer, producer, and editor

Minoring

The Associate of Applied Science degree program in Applied Media Communications – Animation Track, as a two-year career-oriented program, does not include an option for a minor.

Students who have completed the AAS degree program may, however, also pursue one of the certificate programs available in our department for focused training in a specific technical skill and an enhanced set of professional credentials.

Our certificate programs may be used as minors for baccalaureate degrees in other disciplines at the University of Cincinnati. These certificates as minors include: Interactive Web Multimedia and Media Criticism & Journalism. Each certificate/minor requires 27-30 credit hours. Students should seek the approval of the academic advisor in their major before enrolling in a minor program. See Media

Communications & Technology One-Year Certificate programs for curriculum outlines for these minors.

Advising

Students can locate advisor contact information for Applied Media Communications – Animation Track via the UCBA advising website.

UC Advantages And Special Opportunities

UCBA Advantages

UCBA tuition is considerably lower than tuition for colleges on the UC Uptown campus, making education more affordable. Small class sizes at UCBA provide a more effective teaching and learning environment, with additional opportunities for experience gained outside of class through faculty-supervised projects.

Labs and Studios

Media Communications & Technology maintains three studio/lab spaces available for student use to complete project assignments. The studio/lab facilities are scheduled for open labs and can be reserved for individual student use. The schedule varies by term and the open hours are posted outside the labs, as well as on the department website. While equipment available in the labs varies per term and courses taught, permanent resources include: an animation workstation, audio recording booth, editing booths, green screen, lighting equipment, seamless photographic backgrounds, and a studio control room.

Circulating Equipment

A wide range of specialized media production equipment is available specifically for use by program students. These resources include: professional audio equipment, such as field recorders, microphones, microphone supports, and headphones; DSLR still/video cameras and accessories; video cameras; tripods and dollies; specialized camera supports, such as Steadicam and sliders; lighting kits and reflectors; and many other items.

UCTV

Media Communications & Technology also operates UCTV providing online streaming and on-demand video services that may be accessed via UCTVonline. UCTV programming is also available via cable access channels throughout Cincinnati and Northern Kentucky. We have a full television studio and control room where our shows are produced.

Baccalaureate Transition Agreements

This program was designed in cooperation with our colleagues at the University of Cincinnati's college of Arts & Sciences and college of Design, Architecture, Art & Planning to serve as a transition program into the Games & Animation BFA program at (UC DAAP).

Special Programs

One-Year Certificate Programs

Students who have completed the AAS degree program may also pursue one of the One-Year Certificate programs available in our department for focused training in a specific technical skill and an enhanced set of professional credentials. These include Interactive Web Multimedia and Media Criticism and Journalism. Each certificate/minor requires 27-30 credit hours.

Our One-Year Certificate programs may be used as minors for baccalaureate degrees in other disciplines at the University of Cincinnati.

Performance Package Certificate Programs

Media Communications & Technology offers a number of Performance Package Certificate programs to help students upgrade skills and knowledge to become more marketable professionals and more valuable employees. Each Performance Package Certificate consists of three courses that build production or critical skills in a particular discipline.

Performance Packages are available in:

- Animation Production – 2D
- Audio Production
- Digital Media Design
- Film Studies
- Media History
- Media Journalism
- Photo Production
- Video Production
- Web & Interactive Production

Students can typically complete one of these Performance Packages in a single year. Applied Media Communications program students can complete one or more of the Performance Package programs as they complete the required courses for the Associate of Applied Science degree, Professional Certificate, or One-Year Certificate program.

For more information contact:
Roo Hedrick, Program Coordinator, phone: 513-558-8300, roo.hedrick@uc.edu

Admission Requirements

Open Admission

This is an open-admission program, but in order to remain in the program, students are required to meet proficiency standards in the areas of academic performance, portfolio development, and related expectations outlined in the Department Program Requirements.

Transferring To UC

Transferring to UC Blue Ash College

A student wishing to transfer to UC Blue Ash College from another accredited college or university should be guided by the following statement of policy:

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons.

Only grades of C or better are accepted. Special exceptions may be granted at the discretion of Enrollment Services in consultation with program directors or department chairpersons.

There is a 10-year expiration limit for acceptance of transfer credits. Exceptions can be made by Enrollment Services in consultation with the appropriate program directors or department chairpersons.

For all situations not covered by the above, the decision will be referred to the department involved when appropriate.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

Graduation Requirements

Minimum GPA

Students must earn a 2.0 grade point average in order to be eligible for graduation from the program.

Application Deadlines

The Associate of Applied Science degree and the Professional Certificate in Applied Media Communications – Animation Track are designed to be completed in two years, provided students are full-time and do not need prep courses in English and Math. The One-Year Certificate programs are designed to be completed in one year, provided students are full-time and do not need prep courses in English. To successfully complete these academic programs in two years (AAS and Professional Certificate) or one year (Animation, Interactive Web Multimedia, and Media Criticism & Journalism), students must begin in the fall semester. Beginning in any other term than Fall semester may require additional semesters to complete the program and may also affect financial aid.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

As of 2024, Applied Media Communications is also accredited by the National Association of Schools of Art and Design (NASAD).

Artificial Intelligence

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

The Artificial Intelligence (AI) AAS degree is awarded for successful completion of a planned program of study designed to respond to the need for specialized skills in workforce AI. Based on guidelines from Intel, students will be introduced to major topics in AI including machine learning, computer vision, and natural language processing. A required capstone project will serve as a culminating academic and intellectual experience for students.

Success

Students will be successful in this program when they are self-driven, able to meet deadlines, enjoy working with technology, and can communicate well.

Career

Whether you're looking to advance in your current organization or seeking new opportunities elsewhere, this is a degree designed to help you take the next step in your professional development.

Major Map Versions:
Artificial Intelligence

Advising

For more information on the AI AAS degree program please contact the academic advisor.

UC Advantages And Special Opportunities

When you participate in the AAS program at UC Blue Ash College, you will work with faculty who are experts in their discipline. Class sizes allow for optimal faculty to student and student to student interaction, allowing students to gain knowledge from multiple viewpoints.

Conveniently located in Blue Ash as a regional campus of the University of Cincinnati - UC Blue Ash (UCBA) - is located on 135 wooded acres and serves residents of Hamilton, Butler, Warren and Clermont counties, as well as other surrounding communities. UCBA also works closely with the Blue Ash area workforce to assist with their training needs.

The UCBA campus is friendly, informal, and prides itself on being accessible to students of all ages with various career aspirations. It also prides itself on offering smaller classes and closer ties with faculty and other students. UCBA welcomes transfer students, students who want to complete career programs, and students of any age who wish to take a course for personal enrichment or to improve their own skills.

Special Programs

The UC Blue Ash academic labs are one of our best student resources. They are free and open to any student. If you are returning to college after a long absence or feel under-prepared for the challenges of college, the academic labs may provide just what you need.

These labs include the math lab, language lab, writing lab and study skill and reading center. Visit the labs online.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first year student, you will need to take the placement test. This test does not affect your admission; however, the results are essential for your proper placement into classes. You must complete the placement test befor you may register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

Students must submit all transcripts (high school, career center, college, or other institution) to the University of Cincinnati as part of the admission process. Information regarding transcript submission may be found on the Admissions webpage.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Blue Ash by completing the application for change in college and program form available from UC admission offices. You are strongly urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

A TOEFL score of 187 (computer test) or 515 (paper exam) is required if your formal education is from a country where English is not a primary language or if your documents do not clearly indicate your proficiency in English. You must also meet admission deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please contact Enrollment Services for details.

Note you will be charged nonresident tuition.

Note that UCBA is a non-residential campus (no dorms or other housing is available). It is possible to live in a dorm on the UC Clifton campus as bus transportation is available to and from the Clifton and UCBA campuses.

Graduation Requirements

Students must complete all university and college requirements for graduation, and maintain a cumulative GPA of no less than 2.0.

You must complete an application for a degree and receive a pre-certification from your academic advisor the semester before you expect to graduate. You should see your advisor or Enrollment Services for specific information well in advance of your final semester.

Application Deadlines

For information regarding application deadlines, please visit the Admissions website.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Dental Hygiene Technology

Duration: 2 Years Total Credits: 73 Award: AAS

Overview

Dental hygiene is a Commission on Dental Accreditation (CODA) accredited associate of applied science degree program that is designed to prepare students to work as an integral part of a dental team. As licensed professionals, dental hygienists provide a variety of educational and health care services to the public, including

- cleaning and polishing teeth;
- applying preventive agents such as fluorides and sealants;
- exposing and processing radiographs;
- educating patients in the prevention of oral diseases;
- instructing patients in home care procedures;
- removing hard and soft deposits from teeth;
- providing nutritional counseling;
- administering nitrous oxide sedation and local anesthesia; and
- performing other preventive patient services.

Students have direct patient contact in the University of Cincinnati Blue Ash College (UCBA) Dental Hygiene Clinic. The UCBA Dental Hygiene Clinic is open to the public and provides dental hygiene services, charging a nominal fee to cover equipment and supplies. Learn more about the UCBA Dental Hygiene Clinic.

The UCBA Dental Hygiene Program is structured in accordance with accreditation requirements stipulated by the CODA of the American Dental Association. Upon successful completion of the two academic years, graduates are eligible to take national, regional, state and local anesthesia written and clinical licensure examinations.

Graduates can be employed in general/family, pediatrics, or periodontal practices, hospitals, public health clinics, research institutions, public schools, business and industry, or the armed forces.

According to the Bureau of Labor Statistics, dental hygiene is projected to grow 11 percent from 2020 to 2030, faster than the average for all occupations. Ongoing research linking oral health to general health will continue to spur demand for preventative dental services, which are often provided by the dental hygienist.

Individuals considering a career in dental hygiene should have a strong commitment to working with people in healthy or unhealthy conditions. A dedication to delivering competent and compassionate health care and the ability to communicate effectively are crucial to a successful and rewarding career in this profession.

When applying to the Dental Hygiene Program as well as for state licensure, the candidate will be required to complete a criminal background check and indicate whether or not he or she has ever been convicted of a felony or other crimes. The State Dental Board will also require candidates to indicate whether or not they have a history of mental illness or substance abuse. Positive responses may disqualify him or her as a candidate for licensure.

Information Sessions:

It is highly recommended that candidates attend an information session within the year of application. Please be on time and register online prior to the event. Click here for a list of dates as well as links to register.

Success

Students who succeed in the dental hygiene program have a strong science background. They are effective time managers, adept at setting priorities, possess effective organizational skills and demonstrate a willingness to work hard, think critically and communicate in a professional manner. Oral and written communication skills are essential.

Specific physical requirements are necessary to perform dental hygiene functions. A dental hygienist must have use of both hands, dexterity in the fingers and tactile sensitivity to manipulate dental instruments, materials, dental handpieces, and operate dental equipment. The use of feet is necessary to manipulate the rheostat for handpieces and other adjunct dental equipment. The student must be able to work from a dental operator's stool in order to perform dental hygiene procedures. The ability to sit and stand for durations of time is also necessary.

Other specific requirements include:

- color discrimination (differentiation of various shades of color and gradations from black to white);
- manual dexterity/motor coordination (discern changes in surface textures by manipulating dental instruments, control exertion of hand/finger pressure);
- eye-hand coordination (transfer of visual input into motor output);
- physical communications (perceive sound through telephone, hear commands through operator's face mask, hear oral communication from patients, discern blood pressure sounds);
- visual acuity (identify the working ends of various dental instruments and implements at a 2 foot distance);
- form/spatial ability (view in 3 dimensional relationships, distinguish subtle changes from one form or shape to another, discriminate intricate measurements);
- language development (communicate clearly so that patient understands his/her dental/oral condition).

Career

A variety of employment opportunities exist for dental hygienists: treating patients in private offices; educating future dental hygiene professionals; administrating and planning in health departments; providing patient care in institutional settings, such as long-term care facilities; and providing oral hygiene instruction and care in public school systems. Some of these career options will require a higher degree.

Curriculum

These tools assist students to identify course requirements and individual progress toward completion of academic programs.

It is important to utilize these resources with personalized guidance from a UC academic advisor regularly to ensure timely graduation.

This curriculum information is intended as a general information guide for students considering enrollment in this program. These online tools are designed to assist, but are not a substitute for planning with an academic or faculty advisor.

Confirmed UC Students can check degree requirements online. If the candidate is considering transferring to this major from another school, use UC Credit Evaluation to see how credits earned will transfer to UC.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Dental Hygiene Curriculum Guide

Advising

Students interested in starting the Dental Hygiene Program should contact their Pre-Health Professions advisor. Students are assigned to advisors according to the first letter of his/her last name and here is a link to the Pre-Health Professions Advisors. Please note the Dental Hygiene advisor is only for current students in the program, so if you have questions prior to acceptance you will need to contact your Pre-Health Professions advisor.

UC Advantages And Special Opportunities

The Dental Hygiene Program at UCBA was established in 1967 and is the only accredited program in Hamilton County. An advantage of UC Blue Ash College is the opportunity to complete this career-oriented program in a small college environment. Most classes are small to moderate in size. The Dental Hygiene Program has a low student-faculty ratio, giving students many opportunities for personal contact with their professors. Clinical experiences occur on campus in our state of the art facility, consisting of computer technology, digital radiology and intraoral cameras. Faculty are well qualified and nationally recognized.

UCBA has a comprehensive study skills center where students can obtain help with reading comprehension, vocabulary, and critical thinking. Other related topics include organization, time management, note taking, reading textbooks, improving memory and test taking can be addressed. All services are free of charge to UCBA students.

The University is committed to providing students with disabilities equal access to all university programs and facilities. Students may be eligible for classroom note takers, adapted testing, audio books, enlarged print, sign language interpreters, and other services as needed.

Special Programs

The thirty-four chair clinic is an on campus facility for students to gain clinical competence in providing dental hygiene care. It is open to the public during the academic year. Students complete their clinical experience onsite providing a variety of preventive services such as comprehensive health history assessment, blood pressure screening, oral cancer screening, oral hygiene instruction with

home care products, digital and traditional radiographs, tooth desensitization, fluoride treatment, scaling and root planing, cleaning and polishing teeth and nutritional counseling. Students also receive a variety of learning experiences within the community, in which they are expected to provide their own transportation.

The UC Smiles program brings area children to the UC Blue Ash campus and provides them with the resources they need to attain good oral health - while encouraging them that a college education is attainable for everyone.

The Community Dental Day is held annually. The goal of this event is to provide access to free dental care for adults who do not have dental insurance or who have never been to a dentist.

Admission Requirements

Use this Dental Hygiene Admission Criteria link to review the minimum criteria and additional requirements that must be met in order to be considered for program admission to the next cohort for the Dental Hygiene Program. English proficiency and international student information is also provided at this link.

Transferring To UC

General education courses that are evaluated for transfer credit must be assessed as part of the College admissions process to UCBA.

Evaluations for dental hygiene course transfer credit will only be reviewed for students accepted into the Dental Hygiene Program. In order for a course to be considered for advanced standing, a syllabus from the granting institution must be presented to the Course Instructor at least 7 weeks prior to the start of the course. If the syllabus is determined to cover the UCBA dental hygiene course, you may be asked to complete specific assignments, exams and/or additional requirements to receive credit for the course. These assignments, exams and/or additional requirements must be completed 4 weeks prior to the start of that course. In addition, you may be required to attend specific lectures or labs in order to obtain necessary information.

Advanced standing will not be granted for Techniques courses (DHYG1051C or DHYG1052C) or Clinical Practicum courses (DHYG2021C or DHYG2022C). Requests for advnaced standing in other DHYG courses will be considered by the course instructor.

Graduation Requirements

To qualify for the Associate of Applied Science in Dental Hygiene technology degree, students must fulfill the requirements of the program with a C- or better and must have at least a 2.0 cumulative grade point average. Students must demonstrate competency in a variety of clinical patient care experiences as well as tasks and procedures performed by a practicing dental hygienist to include local anesthesia and nitrous oxide sedation. Additional requirements include community service, informative posters, off campus experiential rotations and professional organization activities.

It is the student's responsibility to take the courses necessary for graduation.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Dental Hygiene program at UCBA is accredited by the American Dental Association Commission on Dental Accreditation. The Commission is a specialized accrediting body recognized by the United States Department of Education.

Mailing Address:
American Dental Association
Commission on Dental Accreditation
211 East Chicago Avenue
Suite 1900
Chicago, Illinois 60611

Third party comments can be submitted to the American Dental Association's Commission on Dental Accreditation and must pertain only to the standards relative to the particular program being reviewed or policies and procedures used in the accreditation process. Comments will be screened by Commission staff for relevancy. For comments not relevant to these issues, the individual will be notified that the comment is not related to accreditation and, where appropriate, referred to the appropriate agency. For those individuals interested in submitting comments, requests can be made to the commission office for receiving standards and/or the Commission's Evaluation Policies and Procedures. (EEP)

Early Care and Education

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

The Associate of Science in Early Care and Education Degree program prepares students to work with infants, toddlers, preschoolers and their families in early care and education settings. During the first five years of life, the brain is undergoing rapid development, children are forming attachments, and foundational skills in all developmental domains are developed. Students will develop the knowledge and skills to work effectively with young children and their families during this critical period. Students will complete the necessary requirements to transfer into the online bachelor's degree program at UC's College of Education, Criminal Justice and Human Services (CECH).

Success

Students who become successful child care teachers must have the ability to communicate, inspire trust and confidence, and motivate children, as well as understand their physical, educational, and emotional needs. You must be able to recognize and respond to individual and cultural differences in children. Flexibility and adaptability are important. You should also be organized, dependable, patient, and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents, and members of the community. You must enjoy play. Respect for children and patience are crucial characteristics.

Career

With a Bachelor's degree and proper licensing, your employment opportunities include the following:

- preschool teacher
- child-care center director
- Head Start teacher
- Head Start family advocate
- developmental interventionist
- child life specialist
- child care director

With an Associate's degree and proper licensing, your employment opportunities include the following:

- child care assistant
- assistant teacher

Additional career options are listed on the Career Development Center's website.

Additional career options are listed on the Center for Exploratory Studies website.

Advising

Current and admitted students can locate advisor contact information for Early Care and Education via the UCBA advising website.

UC Advantages And Special Opportunities

This degree is the gateway to both the Early Childhood Education: Birth to Age 5 Bachelor's degree at UC.

Successful completion of this program will prepare you to apply to the UC College of Education, Criminal Justice, and Human Services for your remaining years, or at other four-year colleges or universities. Your program advisor will guide your course work to maximize your transition opportunities.

A solid foundation to build upon is important to achieving success in these fields. UC's Blue Ash College has small classes and well-qualified, dedicated faculty that will help you get a good start on your education and provide a firm basis for future learning.

The University of Cincinnati's Blue Ash College is conveniently located in suburban Blue Ash and is accessible from I-75, I-71, I-275 and the Ronald Reagan (Cross-County) Highway.

Special Programs

In the education programs available at Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in UC's Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering this program should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement tests prior to registering for classes.

The Blue Ash College admissions office provides an application for admission and all the information you'll need to enroll in the college.

Upon completion at UC Blue Ash College, your advisor can assist you in completing the transition steps to continue your education towards the Bachelor's degree in Early Childhood Education: Birth to Age 5 at CECH.

Since these programs change in response to updates from the Ohio Department of Higher Education and CECH, please see your your program advisor each term.

Transferring To UC

Students transferring to UC Blue Ash College follow similar procedures as those who are enrolling through open admissions. Please contact our admissions office for all the information you'll need to enroll in the college.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at UC's Blue Ash College. Students must earn a "C" or better in courses for the program. Students will complete at least 60 credit hours as listed in their specific program.

Application Deadlines

The University of Cincinnati's Blue Ash College is an open admission campus. We accept applications all year long and you may start any semester. Financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Health Care Support Technician

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

Health care support technicians are health professionals certified or licensed in multiple practice skills and are qualified to perform tasks specific to their certification or licensure. This program prepares students with the knowledge and skills necessary to meet the health and wellness needs of the population. Graduates may be employed as a Phlebotomist, EKG Technician, General or Limited X-ray Machine Operator, State Tested Nurse Aide, Central Service Technician, Patient Care Technician, Medication Aide, Electronic Health Records Specialist, or Health Unit Coordinator, in accordance with their certification or licensure.

Success

Healthcare Support Technician professionals must be good communicators and like working with people. One must uphold strict ethical principles when entering a health career.

Career

This program would provide students with the opportunity for stackable credentials to allow them to enter the health care workforce in a variety of settings. Graduates may be employed in hospitals, clinics, physician's offices, health departments, long term care facilities, and home health care agencies.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Health Care Support Technician

Advising

Current and admitted students can locate advisor contact information for the Healthcare Support Technician program via the UCBA Advising website.

Admission Requirements

Programmatic admission requirements for this program include a minimum high school GPA of 2.5 or minimum college GPA of 2.0 with a minimum of 12 credit hours; English guided self placement into ENGL1001 (English Composition), or an ACT English minimum score of 18, or an SAT writing minimum score of 430; math placement test (320), ACT Math sub-score, or SAT Math sub-score resulting in placement into STAT1031 (Introduction to Statistics) or completion of MATH0029 (Math Literacy).

Upon meeting the requirements of the Health Care Support Technician program, students must meet requirements in accordance with the policies of the program and the clinical sites to participate in some technical electives and the Clinical Practicum(s). These may include documentation of specific and current immunizations and vaccinations, American Heart Association Healthcare Provider CPR certification, and health insurance.

Transferring To UC

Transferring to UC Blue Ash College from another institution:

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Students admitted to the college must show proof of high school graduation or successful completion of the General Education Development (GED) exam. Submission of standardized test scores (ACT or SAT) is recommended but not required. Transfer students must also supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

Fill out an Application for Change in College and Program.

Submit the completed form to the college which offers the program into which you want to transition.

International Student Requirements

International students wishing to apply to UCBA can find information at UC Admissions - International Students.

Graduation Requirements

To graduate from the UC Blue Ash College Healthcare Support Technician associate degree program, students must complete all required coursework, successfully complete all Technical Electives with a grade of "C" or better, and have a minimum grade point average of 2.0.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash College Admissions page for specific application deadlines for each term.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Nursing Technology

Duration: 2 Years Total Credits: 64 Award: AAS

Overview

The nursing program is an academic unit in the University of Cincinnati, Blue Ash College. The program contributes to meeting the health care needs of the community, the mission of the college and university, the requirements of accrediting bodies and the service expectations of the Ohio Department of Higher Education by providing quality education culminating in an Associate of Applied Science Degree.

Nursing, as defined by this program, is the art and science of human caring. It is designed to prepare graduates to care for people across the life span. Nurses provide culturally competent, safe and effective care in a variety of clinical settings.

RN Technology Track

The two-year curriculum combines nursing courses with general education courses in the humanities and sciences. In addition to classroom instruction, students engage in clinical activity in hospitals, long-term care facilities, community agencies, home care settings, or the college laboratories.

Our program has provisional approval by the Ohio Board of Nursing (OBN) and is accredited by the Accreditation Commission for Education in Nursing (ACEN). Graduates are eligible to take the National Council Licensure Examination (NCLEX) for registered nurses. Licensure requirements by state can be found on the National Council of State Boards of Nursing (NCBSN) website. This site will provide information on states/jurisdictions where the institution's curriculum meets state educational requirements for professional licensure or certification.

Graduates of the UCBA nursing program matriculate easily into the RN-BSN online program offered by the UC College of Nursing.

The nursing program is admitting students through a selective admission process.

Success

Students who succeed in the nursing program have a strong science and math background. They are effective time managers, adept at setting priorities, possess effective organizational skills and demonstrate a willingness to work hard, think critically, communicate in a professional manner, and have a passion for caring for the art and science of Nursing.

Career

Registered nurses are health professionals who perform a wide variety of functions in various health care settings. Nurses gather information in a systematic manner in order to determine the health-related needs of patients. Once the nurse is aware of the adult's or child's health needs, there are many ways to intervene in the healing process and to maximize the potential for good health. Some of the ways nurses intervene include: assisting in the rehabilitation process, teaching procedures and health practices, administering medication, assisting persons who are in pain, comforting the dying, and supporting the families of those who are ill.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Nursing (RN) Associate Degree

UC Advantages And Special Opportunities

The UCBA nursing program was established in 1967. Since the graduation of the first class in 1969, the program has been approved by the Ohio Board of Nursing (OBN) and accredited by the Accreditation Commission for Education in Nursing (ACEN).

An advantage of UC Blue Ash College is the opportunity to complete this career-oriented program in a small college environment. Most classes are small to moderate in size. The nursing department has a low student-faculty ratio, which gives students many opportunities for personal contact with their professors. Clinical experiences occur in a variety of acute care and community settings. Faculty are well qualified. Many have advanced certificates in specialty areas of practice.

Graduates of the nursing program may transition to the RN-BSN online program at the University Of Cincinnati College of Nursing.

Admission Requirements

Admission to the College

For information on admission to the college, please visit the UC Blue Ash Admissions website.

Transferring To UC

In order to be fully evaluated for transfer credits to the nursing program, credits must be assessed as part of the college admission process and nursing course syllabi reviewed by the chairperson.

International Student Requirements

English Proficiency Requirement – Students who have not graduated from a U.S. or English speaking high school must complete the TOEFL examination or other exam with the designated score, as listed below. With the following exceptions:

a. Student has taken a full year of High School in the United States and earned a passing grade in one year of Standard English (not ESL)

b. Student has earned a passing score on the O-Level English Exam

c. Student has passed the first year of IB English (SL or HL) with a score of 5 or higher

d. Student has attended a full year of school in a country in which has been deemed as English proficient

High Intermediate Ranges on Examination(s) (for students that do not meet a Four Bulleted Exceptions)

2. Production sub-score: 112

Production= “the test taker’s ability to write and speak”

1. Conversation sub-score: 88

Conversation= “the test takers ability to listen and speak”

Graduation Requirements

To qualify for the Associate of Applied Science in RN technology degree, students must fulfill the requirements of the program. In addition, the student must meet any university requirements for graduation and be in academic good standing. More information on the University Undergraduate Academic Standing Policy can be found on the Office of the Registrar's website. It is the student's responsibility to take the courses necessary for graduation.

Application Deadlines

Selective Admission to the Program

The UCBA nursing program admits students through a selective admission process. Students who meet the minimum requirements are encouraged to apply to the nursing program. Electronic applications for selective admission to the nursing program will be accepted annually. Please see the UC Blue Ash Selective Program Admissions website for more information.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The UCBA nursing program is accredited by the Accreditation Commission for Education in Nursing, 3390 Peachtree Road NE, Suite 1400, Atlanta GA 30326, (404) 975-5000.

The UCBA nursing program is provisionally approved by the Ohio Board of Nursing, 8995 East Main Street, Reynoldsburg, OH 43068, (614) 466-3947.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Radiologic Technology

Duration: 2 Years Award: AAS

Overview

Enrollment in the program is limited and a selective process is utilized for admission to the program.

Radiologic technologists (radiographers) are health professionals qualified to perform radiographic examinations ordered by licensed practitioners such as physicians, chiropractors, etc. Radiographers are responsible for the creation of medical x-ray images, the operation of radiologic equipment and the care of patients. The radiographer is ultimately responsible for providing optimal images with the lowest radiation exposure to the patient.

Success

Students who are interested in human anatomy and have a strong background in science and math and the ability to communicate and work well with others will be the most successful in this program. Students entering the radiologic technology profession must have the following abilities in order to successfully complete the program.

Physical Abilities

1. Lift and assist patients using proper body mechanics.
2. Capable of using hands and arms to handle, install, position and move patients and devices.
3. Safely maneuver all radiographic and fluoroscopic equipment as necessary for each exam.
4. Push and maneuver patients in wheelchairs and on stretchers.
5. Respond quickly and professionally to patients in emergency situations.
6. Communicate clearly with patients and other health care professionals in oral and written forms, including the use of medical terminology.
7. Move and align the patient and equipment utilizing lights, lasers and signals to properly position for radiographs.
8. Stand for an extended time period and walk for long distances.
9. Pass background checks and drug screening.

Sensory Abilities

1. Visual ability to see details at a close range (such as small print labels) and to make observations and assessments necessary in patient care. Be able to use diagnostic equipment, such as automatic injectors and cardiovascular monitors.
2. Visualize and identify signs of impending danger/injury.
3. Auditory ability sufficient to monitor and assess health needs. Hear soft sounds, alarms, and warning sounds or cries for help.
4. Tactile ability sufficient for physical assessment and to perform patient care. Perform palpation during radiologic procedures. Administer oral, rectal, and intravenous contrast media.

Mental Abilities

1. Amenable to learning the safe handling, restraining and working with patients in various physiologic conditions whereby one may encounter blood, vomit, feces, urine, or other bodily fluids. Patients may be sick, injured, infectious, cognitively/intellectually impaired, or aggressive.
2. Willingness to assist with or perform a wide variety of routine medical, surgical and diagnostic procedures common to the healthcare setting.
3. Capacities to read, hear, understand and quickly execute complex verbal and written instructions given in English.
4. Possess emotional stability when performing duties in emergency, life-and-death situations, or other stressful environments.
5. During emergencies, be able to respond promptly and appropriately.

Students will be given reasonable assistance/accommodation in overcoming difficulties with these standards. However, there is no guarantee that all potential students will be able to successfully complete the program if unable to perform these actions. Students concerned about the requirements should contact the program director.

Career

Technologists perform exams in outpatient settings and many areas of the hospital, including the emergency department, surgery, patient rooms, and intensive-care units. There is potential for advancement in areas such as computed tomography (CT), mammography, cardiac/vascular interventional radiography, and magnetic resonance imaging (MRI). The full time salary for new graduates is approximately $54,000 per year, though salaries vary by geographic area and type of position. Support is provided to

assist graduates in their employment search.

Eligibility for the Certification Examination and Licensure

Graduates of this program are eligible to take the American Registry of Radiologic Technologists' (ARRT) certification examination. Applicants for the ARRT may not be eligible for certification if they failed to comply with State/Federal laws (with the exception of speeding and parking violations) or violated academic honor codes. These must be investigated by the ARRT in order to determine eligibility. Licensure is also required in most states to practice as a radiographer.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Advising

Current and admitted students can locate advisor contact information for pre-health professions and radiologic technology via the UCBA advising website.

UC Advantages And Special Opportunities

This program includes the courses required in the first two years of the baccalaureate program in radiation science technology. This allows for a seamless transition from an associate degree to a baccalaureate degree.

The use of multiple clinical sites allows students to work with many types of radiographic equipment and to participate in a wide variety of radiologic procedures. This program affiliates with the radiology departments of Bethesda Arrow Springs Medical Center, Bethesda Butler Hospital, Bethesda North Hospital, Cincinnati Children's Hospital Medical Center, The Christ Hospital, The Christ Hospital (Red Bank) Imaging Center, The Christ Hospital Medical Center-Liberty Township, University of Cincinnati Medical Center, the VA Medical Center, and West Chester Hospital.

Admission Requirements

Students who wish to pursue radiologic technology should apply through UC admissions to be admitted to the UC Blue Ash College in the Pre-Health Professions program or be an existing UC student.

Applications for selective admission to radiologic technology will open and close in accordance with the dates provided on the Radiologic Technology Selective Admissions webpage. Students are accepted into the program each spring to begin fall semester.

See this link for details related to selective admissions including criteria and deadlines.

Additional Clinical Acceptance Requirements and Information:

Upon acceptance to the radiologic technology program, students must meet a number of requirements in accordance with the policies of the program and the clinical sites in order to participate in the clinical experience. These include documentation of specific and current immunizations and vaccinations, American Heart Association Healthcare Provider CPR certification, and health insurance prior to the start of their clinical experience. In addition students will be required to purchase appropriate uniforms, supplies, and educational materials and arrange for personal transportation to and from clinical sites.

Students will be required to undergo drug testing and background checks at the students' expense. Not meeting program and clinical education setting requirements may be grounds for dismissal from the program. Accepted students who do not comply with State/Federal laws (with the exception of speeding and parking violations) or who violate academic honor codes must be investigated by the ARRT in order to determine eligibility. An Ethics Review Pre-Application must be submitted to the ARRT prior to the start of fall semester to determine program continuance.

Students accepted to the program may voluntarily notify the program director regarding pregnancy so that additional radiation protection measures can be taken. Students may also voluntarily undeclare their pregnancy. Radiation protection policies and program extension policies that affect pregnant students are available from the program director upon request.

Transferring To UC

Transfer credits must be fully evaluated for applicability to the radiologic technology program as part of the college admissions process. If you are transferring from another radiologic technology program you must be accepted via the selective admissions process before advanced standing toward the radiologic technology courses will be considered.

International Student Requirements

It is highly recommended that international students contact the UC International Office prior to applying for this program.

Students who have not graduated from a U.S. or English speaking high school must complete the English Proficiency Requirements with the designated score, as listed below. With the following exceptions:

1. Student has taken a full year of High School in the United States and earned a passing grade in one year of Standard English (not ESL).
2. Student has earned a passing score on the O-Level English Exam.
3. Student has passed the first year of IB English (SL or HL) with a score of 5 or higher.
4. Student has attended a full year of school in a country in which has been deemed as English proficient.

1. Grades of "C" or better in all radiologic technology, anatomy & physiology, and medical terminology courses
2. All clinical and didactic courses must be taken concurrently as listed
3. Adherence to program policies and procedures
4. Completion of all university and college requirements for graduation
5. Cumulative GPA of no less than 2.8

Application Deadlines

For application deadlines, visit the admissions website.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The radiologic technology program is accredited through the Joint Review Committee on Education in Radiologic Technology (JRCERT) and approved by the Ohio Department of Health. JRCERT accreditation assures quality and requires a detailed peer-review process for ongoing improvement and assessment of the program. Accreditation Standards and program effectiveness data published by the JRCERT are available at www.jrcert.org or via mail@jrcert.org. The address and telephone number for the JRCERT are Joint Review Committee on Education in Radiologic Technology, 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-2901; (313) 704-5300.

Veterinary Technology

Duration: 2 Years Total Credits: 66 Award: AAS

Overview

Veterinary technology is the science and art of providing health care to animals and professional support to veterinarians. The veterinary technician must be knowledgeable in the care and handling of animals, their normal and abnormal life processes, and their medical and psychological needs. Therefore, they must be skilled in nursing procedures, anesthesiology, radiography, clinical laboratory techniques, surgical preparation and assisting, anatomy and physiology, phlebotomy and husbandry.

Veterinary technicians assist veterinarians in every facet of the profession, which includes private practice, institutional and industrial research, the military, humane associations, zoos, government and teaching.

Veterinary technicians help strengthen the human-animal bond by safeguarding and lengthening the lives of millions of pets worldwide. Their dedication to the health and welfare of animals is vital to the function of both veterinary care facilities and other public and private organizations across the world. They contribute to society by assuring safe and wholesome products are sold in the markets. They are also found in laboratories that create new drugs, devices and medical procedures that contribute to the quality of life of both man and animals.

Success

Veterinary technicians are graduates of programs accredited by the American Veterinary Medical Association. A national board exam and criminal background check must also be successfully passed in order to become registered in the state of Ohio. All state requirements for veterinary technicians can be found at American Association of Veterinary State Boards.

The Ohio Veterinary Medical Licensing Board may refuse to issue a registration to, or revoke the registration of, a graduate technician due to a number of reasons:

1. Found to be physically or psychologically addicted to alcohol or illegal controlled substance;
2. Conviction of, or having plead "Guilty" to, any felony or crime involving illegal or prescription drugs;
3. Making available a dangerous drug to any person other than for the specific treatment of an animal patient.

People who have an affinity for science and medicine, can communicate well with medical professionals and the general public and, of course, can handle animals will excel in this field. There are many physical, sensory and mental requirements needed to succeed also. Being able to lift heavy animals, visualize small blood vessels, hear faint heart murmurs, feel internal abnormalities, sense animal temperament and remain calm and directed during medical crises are several examples of the attributes needed in the veterinary technology profession.

Performance standards are necessary in a competent veterinary health technician. These standards are necessary to protect the technician, other members of the health care team and their animal patients. These standards are outlined here:

Physical Requirements

- Ability to tolerate walking and standing for sustained periods of time
- Capable of lifting and/or carrying up to 50 lbs. from the floor to waist level
- Capable of using hands and arms to handle, install, position and move materials
- Capable of handling, positioning and restraining live animals

Sensory Abilities

- Visual ability to see details at a close range (such as small blood vessels,) and to make observations and assessments necessary in animal care. Be able to use diagnostic equipment, i.e. microscope, thermometer, refractometer, etc.
- Auditory ability sufficient to monitor and assess health needs. Hear soft sounds, monitor alarms, emergency and cries for help. Hear warning sounds from animals and humans of impending danger/injury.
- Tactile ability sufficient for physical assessment and to perform nursing duties. Perform palpation during physical exams. Administer oral, intramuscular, subcutaneous and intravenous medication. Insert and remove tubes and perform wound care management. Collect organic samples from live animals.

Mental Abilities

- Amenable to learning the safe handling, restraining and working with any species of domestic or exotic animals without fear. These animals may be sick, injured, fractious or aggressive.
- Willingness to assist with or perform a wide variety of routine medical, surgical and diagnostic procedures common to the veterinary setting; including humane euthanasia.
- Capacities to read, hear, understand and quickly execute complex verbal and written instructions given in English.
- Possess emotional stability when performing duties in live animal life-and-death situations or other stressful situations.
- During emergencies, be able to respond promptly and appropriately.

Career

A veterinary technician can be employed in large-animal, small-animal, equine, exotic, emergency, surgery and other specialty types of private practices. They may also work in industrial (product-making) and medical research institutions. "Vet techs" are also employed in zoos, humane associations, the military, food industries and teaching institutions. There are also opportunities for continuing education and specialty in the field of veterinary technology. At this time there are nine recognized board certifications that experienced veterinary technicians may acquire, which include emergency and critical-care medicine, dentistry, anesthesia, internal medicine, behavior, zoo medicine, equine, surgical and clinical practice. A complete list of vet tech specialties can be found at The National Association of Veterinary Technicians in America. There are also several baccalaureate degree programs which graduate veterinary technologists in the field of veterinary medicine.

Majoring

Veterinary technology at UC's Blue Ash College is offered through the Veterinary Technology Department. Our mission is to provide a supportive academic and professional environment, enabling each student to become a competent and caring veterinary technician. The program is accredited with the AVMA. Upon completion of the required courses, an associate in applied science degree in veterinary technology is awarded.

The program is divided into a freshman year (consisting of general education courses without animal contact) and a sophomore year (composed of both lecture and "hands-on" courses). The freshman courses are prerequisites for the sophomore year and include English composition, humanities, behavioral or social sciences and biology. Also required are microbiology, chemistry, effective speaking, medical terminology and an introductory FYE course. These courses may be taken full- or part-time, during the day or evening.

The sophomore curriculum consists of animal husbandry and diseases, hematology, anatomy and physiology, anesthesia, surgery and dentistry, imaging, nursing technicques, parasitology, urinalysis and clinical chemistry and clinical experience obtained outside the university. A preceptorship is required during the last semester of the sophomore year prior to graduation.

The sophomore year is offered by selective admittance to two cohorts of students. The selective admission application will be available online in early spring each year. The traditional full-time option is offered to 32 freshman students who have met all prerequisite requirements. These full-time students complete the sophmore year requirements over three semesters by attending classes full-time during the day.

Students who choose the full-time option need to be aware of the academic requirements of the program. The classes generally meet Monday through Friday 9-4 pm, with additional out of class study time often exceeding 30-40 hours per week, depending on the student. Full-time students are encouraged to limit outside activities such a part-time jobs and other responsibilities to encourage time to focus on academics.

The part-time option admits a cohort of 16 students into the program who have met all prerequisite requirements. These students will be able to complete the sophomore year requirements over seven semesters, part-time and in the evening, using online and hybrid class delivery formats. Students often choose the part-time option of the program to balance job, family and personal responsibilities. Students who need to work full-time or near full-time, who have significant family responsibilities or who prefer a slower academic pace (fewer classes per semester) do well in the part-time program. Lectures are all online to increase flexibility and in-person laboratory classes are held an average of two evenings per week, depending on the semester.During the last semester of course work, students are required to participate in a full-time, 12 week clinical preceptorship experience required for graduation.

Veterinary Technology: Full-Time (AAS) Curriculum

Veterinary Technology: Part-Time (AAS) Curriculum

Advising

Current and admitted students can locate advisor contact information for veterinary technology via the advising website.

UC Advantages And Special Opportunities

Tuition at UC Blue Ash is below the average state university tuition. Our curriculum includes information and hands-on experience covering all of the animal species required by the AVMA accrediting committee. Our graduates are well-qualified to pass the Veterinary Technician National Exam (VTNE), and our graduates consistently score above the state and national averages.

Our program is designed to minimize the dropout rate in the sophomore year by preparing the freshman student for the intensive curriculum of the clinical year.

Our present facilities at UC Blue Ash were completed in October 2005 and are state-of-the-art. The building is utilized solely by the VT students and animals, which fosters a sense of ownership and commitment.

Collectively, the VT faculty and staff have nearly 150 years of education and veterinary experience within a wide spectrum of facilities and species, ranging from laboratory animals to farm animals. Our only mission is directed to the education of veterinary technician students. The low student-to-faculty/staff ratio allows special attention to be given to each student.

Job placement is 100 percent each year. Currently, a new graduate can expect to earn a salary between $37,000 - $45,000 per year. Experienced registered veterinary technicians can earn $45,000 - $60,000 per year.

Special Programs

The faculty and staff of the VT program are the leaders and members of local, state and national veterinary associations. With this in mind, we encourage and assist our students in becoming involved with multiple organizations while still in school. We place students into outside facility practicums and preceptorships during the fall and spring semesters. Our faculty, staff and students go on field trips over the entire scholastic year to humane centers, spay-neuter clinics and farms in order to experience and contribute to real-life situations.

The students are members of a student chapter of the National Association of Veterinary Technicians in America, through which they coordinate multiple fundraising events for animal-related charities each year. They also volunteer their time and talents to local veterinary associations and humane societies, in events helping the service dogs of the blind, animals of the indigent and dogs used in law enforcement. All of these events contribute to societal needs and strengthen the human-animal bond.

Through these efforts, students are offered scholarship money from various private and professional organizations.

Admission Requirements

Students may enroll in UC Blue Ash College if they graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). Students entering as first time freshmen must attend a new student orientation where they will also receive academic advising. All other students should contact their advisor directly upon confirming acceptance to the college and completion of placement tests.

New applicants can apply to the college and be admitted to the Pending Veterinary Technology Program (PVETN), non-degree program. New applicants may take the freshman courses in preparation for selective admission process.

Step 1. Apply online for admission to the college and list Pending Veterinary Technology for your major.

Step 2. Transcripts/test scores should be sent to the UC main campus for processing. Request high school transcripts/GED and all college transcripts (if applicable) to be sent to UC Office of Admissions. If a student is applying directly from high school, ACT or SAT scores should also be sent to UC Office of Admissions. If a student is not applying directly from high school, the SAT or ACT is not needed.

Transcripts should be sent to:
University of Cincinnati, Office of Admissions
PO Box 210091, Cincinnati OH 45221-0091

Step 3. Take the Math Placement Test (MPT).

Step 4. Take the college English Placement Test (EPT).

Step 5. Meet with your Pending Vet Tech Advisor to determine what courses must be taken to meet the program's prerequisites. It is imperative that the students work with a PVETN Advisor when completing prerequisites courses. Current and admitted students can locate advisor contact information for veterinary technology via the advising website.

Minimum Qualifications to Apply for Selective Admission

1. All required freshman year courses must be completed.
2. A GPA of 2.75 or better must be maintained for all courses, with a minimum of C in science courses. This requirement is also enforced for any credit transferred into the VT program from another college. If a student has non-vet tech required course work that is contributing to a GPA lower than a 2.75, the student is encouraged to contact the vet tech advisor to discuss their individual situation. It may be possible to apply for a waiver to limit the effect of previous, non-required course work on the student's overall GPA.
3. Twenty (20) hours of veterinary-related experience, under the direction of a veterinarian or registered veterinary technician, must be completed. This requirement is to allow the potential student to obtain real-world experience regarding the veterinary profession, which may help solidify their decision to enter the profession. A veterinary experience document must be signed by the student's supervisor and returned with the students' electronic applicaiton to the clinical year of the program.

Transferring To UC

College credits obtained from accredited colleges and universities outside the UC system will be transferred into the University of Cincinnati. To achieve this process, a formal application must be completed by the student, and a transfer credit evaluation will be produced by the college. Using this information, the student is encouraged to meet with the vet tech program academic advisor to inquire about their status in the program and to confirm which freshman-year requirements must be completed before entrance into the sophomore year of the program. All entrance requirements listed above, including the minimum grading criteria, must be met. If a student has non-vet tech required course work that is contributing to a GPA lower than a 2.75, the student is encouraged to contact the vet tech advisor to discuss their individual situation. It may be possible to apply for a waiver to limit the effect of previous, non-required course work on the student's overall GPA.

Changing Majors Within UC

Students with previous UC college credits may transfer into the vet tech program after the completion of a Change of Major form, which can be filled out at any of the One Stop Student Service Centers within the university. Students ae also ancouraged to inform the vet tech program academic advisor of their desire to transfer and determine which freshman-year requirements must be met before admission to the sophomore year of the program. All entrance requirements listed above, including the minimum grading criteria, must be met. If a student has non-vet tech required course work that is contributing to a GPA lower than a 2.75, the student is encouraged to contact the vet tech advisor to discuss their individual situation. It may be possible to apply for a waiver to limit the effect of previous, non-required course work on the student's overall GPA.

Application Deadlines

Students may begin completion of the freshman-year requirements at any time within the academic year.

Veterinary Technology Selective Admission Criteria

Please see the Selective Admission area on the UC Blue Ash website for specific information and dates related to each year's selective admission window.

Additional selective admission criteria in addition to minimum requirements are:

- **Reflective Essay** – see selective admision page for specific information about reflective essay.

The Selection Process: The program admissions committee will review the academic records, reflective essay and experience documentation for all students who meet the minimum selective admission criteria and complete the application process. Using a rubric, the highest rankings will be given to students who are most successful in the following areas:

Academic Criteria:

- Grades in college level math and English classes
- Grades in science courses (Biology, Chemistry and Microbiology)
- Completion of and grade in Vet Tech FYE, Medical Terminology and Effective Public Speaking courses
- Cumulative GPA

Additional rubric points will be given for:

- Attending a UCBA Vet Tech Information Session
- Amount and quality of volunteer and/or paid veterinary experience hours
- Essay (quality of content and context)

Note: Applying to the Veterinary Technology Program does not guarantee admission. A student may only apply to the Veterinary Technology Program two times.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

As of June 21, 2025, the UC Blue Ash College veterinary technology program has been placed on probationary accreditation with the American Veterinary Medical Association. Probationary status was implemented due to noncompliance with Standard 4: Physical Facilities and Equipment. Graduates of a program on probationary accreditation are graduates of an accredited program. Written reports and site visits, which take place every six years by the accrediting committee, are part of the process. The VT program is also in compliance with the rules, regulations and policies of the USDA, NIH, University of Cincinnati IACUC and the University of Cincinnati Laboratory Animal Medical Services.

Biological Sciences

Duration: 2 Years Total Credits: 60 - 61 Award: AS

Overview

Biology is the study of the cellular, organismal, and ecological characteristics of life. It is a research and application-driven professional science. Biologists examine the structure and function of all forms of life including viruses (virology), bacteria (bacteriology), fungi (mycology), plants (botany) and animals (zoology). Biologists also examine the interrelatedness of organisms in ecological populations, communities, and ecosystems. A solid foundation in chemistry, math, statistics, and technical writing are fundamental for all biologists.

Success

Students who are successful in biology enjoy discovery of the processes of the natural world through observation and experimentation. They have well-developed critical thinking and problem-solving skills and are equally adept at learning through independent reading, hands-on activity, and visual observation. Because biology is a vast pursuit, a wide variety of personality types can enjoy success. While many biologists work alone or in small groups, most regularly interact within the larger scientific community. As such, successful biology students are both independent and sociable.

Career

Baccalaureate degree graduates in biology can expect to be prepared for entry-level and technician positions in a wide variety of careers. Opportunities are somewhat limited, however, due to strong competition for job vacancies. Graduate-level education and experience are necessary for most professional and research-based careers. Students completing a degree in biology may pursue careers in botany, molecular biology, veterinary medicine, pharmacology, physiology, microbiology, environmental remediation, toxicology, wildlife biology, human medicine, or agriculture.

Minoring

UC Blue Ash College does not offer a minor in biology. Students who wish to minor in biology may do so once they transfer to an accredited four-year college.

Major Map Versions:
Biology

Advising

Current and admitted students can locate advisor contact information for biology via the UCBA advising website: http://www.ucblueash.edu/academics/advising/advisor-list.html.

Admission Requirements

The program is open to all students with a high school diploma or GED and the desire to succeed in college. Students are required to meet individual course prerequisites as described below. Students who do not meet course prerequisites may be required to successfully complete preliminary courses before admittance to scheduled program course work.

High school biology with a grade of C or better.
High school chemistry with a grade of C or better.
High school algebra II & II, plane geometry and advanced mathematics, with grades of C or better.
Placement at the level of ENGL 1001 on the UC English placement test.

Transferring To UC

Transfer into the biology program is open to all students who meet program requirements. Interested students must submit transcripts from all previous institutions for evaluation and credit assignment.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Chemistry-ACS

Duration: 2 Years Total Credits: 64 Award: AS

Overview

Chemistry is the study of all matter found in living structures, geological formations and human-created products. Chemists explore the molecular structure of matter in order to develop theories about how such structures work and apply these theories to the development of products that range from pharmaceuticals to heat shields.

The AS chemistry program is designed so that students may earn an associate degree in science and transfer into the third year of the bachelor of science (BS) program at the University of Cincinnati College of Arts and Sciences (A&S), provided all other admission requirements of that college are met.

The AS chemistry is a rigorous program of study intended for students seeking careers as professional chemists, often with an advanced degree in chemistry.

Success

The AS in chemistry program is well suited for students with a strong background and interest in science. Since the calculus and physics requirements for the AS program are more extensive than for the AA, the AS is most appropriate for students with strengths in both science and mathematics. The program provides for extensive laboratory work; therefore, the enjoyment of hands-on laboratory work is important. Chemistry majors in this program also learn to observe critically and record what happens in the laboratory; they analyze data and apply chemical knowledge learned in the classroom to draw conclusions about their observations.

Career

Graduates with a bachelor's degree in this major are employed as:

- Chemists in the manufacturing industry and state, local or federal governments
- Chemistry teachers
- Industrial research and development scientists
- Forensic scientists
- Physicians and health care professionals

Many of the students who complete the BS in chemistry program go on to graduate schools, primarily into doctoral programs. Others go to professional schools, including medicine, pharmacy and dentistry.

Curriculum

Chemistry - ACS

Advising

For advising, contact information or instructions, please check the college's advising web page.

UC Advantages And Special Opportunities

A solid foundation to build upon is important to achieving success in chemistry. Students at UC Blue Ash College (UCBA) enjoy small classes and well-qualified faculty as well as the many benefits afforded through study at a university ranked among the nation's top 25 public research institutions.

UC's Blue Ash campus is conveniently located not far from major interstates. Easy to find. Plenty of parking. State-school tuition.

Admission Requirements

This program is open to all students with a diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet math and science prerequisites before taking certain courses.

All students entering UCBA, except those with previous college-level math and English, must take the college's placements tests prior to registering for classes.

More detailed information can be found at the college's admissions web site.

Transferring To UC

For students outside UC wishing to transfer in, information can be found here.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

International Student Requirements

International students who wish to apply to UCBA can find information here.

Graduation Requirements

To qualify for an AS degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least an overall 2.0 cumulative grade point average. Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

You must complete an application for graduation, usually the term before you expect to graduate. In addition, you should see your advisor for specific information well in advance of your final term.

Application Deadlines

UC Blue Ash operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Environmental Studies

Duration: 2 Years Total Credits: 56 - 60 Award: AS

Overview

During an era when the world is facing a wide range of environmental problems that are in the news virtually every day, Environmental Studies has become a particularly timely and important program.

Our Environmental Studies program provides an opportunity for the systematic investigation of the natural world and the interaction of humans with their own environment. Environmental issues and conflicts of this century are highly complex and transcend traditional academic disciplines. The goal of the environmental studies program at UC is to provide the interdisciplinary training and conceptual framework required to analyze and respond to the complex and dynamic environmental problems of the modern world.

Career

Baccalaureate degree graduates in environmental studies can expect to be prepared for entry-level and technician positions in a wide variety of careers, including ecologists, zoologists, hazardous waste managers or even park rangers. In addition, environmental studies graduates are well prepared for admissions into graduate-level education necessary for most professional and research-based careers.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Environmental Studies

Admission Requirements

The program is open to all students with a high school diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to graduate and to advance to upper levels of study.

Transferring To UC

The Environmental Studies major at UC Blue Ash College provides the first two years of an anticipated baccalaureate program following transfer to an accredited college or university. While most students elect to continue their education with the UC College of Arts and Sciences, the program is designed to articulate with other universities as well. Students completing the program of study in environmental studies are eligible for an associate of science degree. Learn more about transition-oriented programs.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Exercise Science

Duration: 2 Years Total Credits: 60 Award: AS

Overview

The Exercise Science program is an associate of science degree will prepare students for a variety of careers in health and fitness. After obtaining their Associate's degree, students can choose to transition to the baccalaureate program in exercise science at UC's College of Education, Criminal Justice and Human Services (CECH).

The Exercise Science program at the University of Cincinnati is designed to prepare graduates for a variety of careers in exercise science, physiology, and fitness programming - just to name a few! Graduates of this program will be prepared to advance in some of the following career options such as:

- Exercise Physiologist
- Employee Wellness Manager
- Fitness Manager or Director
- Health Coach
- Health Educator
- Personal Trainer & Group Fitness Instructor
- Strength & Conditioning Coach

Success

Exercise science professionals must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Furthermore, those majoring in exercise science are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Both the behavioral and biological sciences form the foundation for this degree. Course work is required in such areas as psychology, sociology, human growth and development, human anatomy and physiology, statistics and speech/communications.

Career

The Exercise Science program prepares students with the knowledge and skills necessary to meet the health and wellness needs of the population. Pursuing a degree in exercise science allows students to focus on health, fitness and clinical careers in exercise science and kinesiology. Students have opportunities to provide individuals and communities with the knowledge, tools, and motivation to engage in healthier lifestyles.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Exercise Science

Advising

Current and admitted students can locate advisor contact information for Exercise Science program via the UCBA Advising website.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Transferring To UC

Transferring to UC Blue Ash College from another institution:

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Students admitted to the college must show proof of high school graduation or successful completion of the General Education Development (GED) exam. Submission of standardized test scores (ACT or SAT) is recommended but not required. Transfer students must also

supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

Fill out an Application for Change in College and Program. You are advised to speak to your advisor prior to requesting a change in major.

Submit the completed form to the college which offers the program into which you want to transition.

Transitioning from UC Blue Ash College to the UC baccalaureate program in Exercise Science: UC Blue Ash College students must apply to the College of Education, Criminal Justice, and Human Services and also to the Exercise Science program within the college. A 2.25 grade point average is required for admission into the program, and a 2.50 grade point average is required to graduate from the program in the CECH.

International Student Requirements

International students wishing to apply to UCBA can find information at UC Admissions - International Students.

Graduation Requirements

To graduate from the UC Blue Ash College Health Promotion and Education (Pre) associate degree program, students must complete all required coursework and have a minimum grade point average of 2.0.

Within CECH, a 2.00 grade point average is required to graduate from the bachelor's degree program.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash Admissions page for specific application deadlines for each term.

Students should check with the College of Education, Criminal Justice, and Human Services for application deadlines to the bachelor's program.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Advanced Medical Imaging Technology

Duration: 2 Years Total Credits: 61 Award: AS

Overview

The pre-advanced medical imaging technology associate degree program at Blue Ash College is designed to prepare students for application to the bachelor's degree program in advanced medical imaging technology (AMIT), which is offered by University of Cincinnati's College of Allied Health Sciences.

Currently, the health care industry is undergoing major changes in an effort to control costs and increase efficiencies without compromising professional patient care. In the past, this care was delivered through the utilization of health care specialists. Today, many employers are now seeking to deliver these services by utilizing the talents of multi-skilled health care professionals.

After completing the pre-advanced medical imaging technology degree, students will be prepared to apply for the bachelor's degree program which includes clinical internships in two imaging modalities: nuclear medicine technology and magnetic resonance imaging.

Success

Students must have an aptitude for math and science. Successful health care professionals must want to help others, be able to work as part of a team, possess good verbal and nonverbal communication skills, and have a professional demeanor.

Career

Advanced medical imaging technology bachelor's degree graduates are in demand by various medical imaging laboratories in hospitals, medical centers, outpatient clinics and research facilities. Advancement in this field may involve promotion to supervisory and administrative positions, equipment and pharmaceutical sales, product support or teaching.

Curriculum

Major Map Versions:
Pre-Advanced Medical Imaging Technology

Advising

Current and admitted students can locate advisor contact information for pre-AMIT via the advising website.

UC Advantages And Special Opportunities

This program is articulated with the bachelor's degree program in advanced medical imaging technology through the College of Allied Health Sciences (CAHS).

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Prerequisites:

- High school chemistry and biology with a grade of "C" or better
- Placement into English Composition I and College Algebra I on the UC Blue Ash College placement test
- Students lacking these required prerequisites may take equivalent courses at UC Blue Ash College

Changing Majors Within UC

A minimum GPA of 3.0 is required for any student wishing to transfer to the UC College of Allied Health Sciences. However, students must also undergo a selective and competitive admission process in order to be admitted into the junior portion of the BS program in advanced medical imaging technology. This process involves consideration of academic qualifications, experience and an interview. While a minimum overall GPA of 3.0 is recommended, it does not guarantee admission into the program. Grades of 'B' or better are required in the biology, chemistry, anatomy & physiology and physics courses.

Students who complete the radiologic technology program at UC Blue Ash College are also eligible to apply for transfer to the advanced medical imaging technology program upon completion of additional course work.

Graduation Requirements

To graduate from the UC Blue Ash College PAMIT associate degree program, students must complete all required coursework and have a minimum grade point average of 2.0.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Communication Sciences and Disorders

Duration: **2 Years** Total Credits: **63 - 73** Award: **AS**

Overview

This associate of science degree program at UC Blue Ash College is designed to prepare students for application to the bachelor's degree program in communication sciences and disorders (PCSD) offered by the University of Cincinnati's College of Allied Health Sciences (CAHS).

The first two years of the communication sciences and disorders program can be completed at UC Blue Ash College. The final two years must be completed at the UC's Clifton Campus or a combination of Blue Ash and Clifton Campuses.

Students majoring in communication sciences and disorders prepare for professions to help people who have difficulty speaking and hearing due to a variety of causes. The study of communication disorders involves understanding the normal development of speech, language and hearing, as well as learning how to diagnose and treat communication disorders in adults and children.

Success

Successful health care professionals must want to help others, be able work as part of a team, possess good verbal and nonverbal communication skills, and have a professional demeanor.

Career

A bachelor of science in communication sciences and disorders is a pre-professional degree that prepares students for graduate work in either audiology or speech/language pathology and a variety of other graduate experiences in social service, special education and health care. A master's degree is necessary for licensing and certification as a speech/language pathologist, and a doctoral degree is required for an audiologist. Graduates find careers in hospitals, speech and hearing clinics, schools, educational programs for children with disabilities, the armed services, private practice and government health agencies.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Pre-Communication Sciences & Disorders

Advising

For more information on this program students may contact Julie Gill, the academic advisor, at julia.gill@uc.edu or 513.936.7162.

UC Advantages And Special Opportunities

Graduates of the UC Blue Ash College's Pre-Communication Sciences and Disorders program may transition to the bachelor's degree program in communication and sciences disorders through the College of Allied Health Sciences (CAHS).

Admission Requirements

This program is open to all UC Blue Ash College students. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Prerequisites:

- High school biology with a grade of "C" or better
- Placement into English Composition I and College Algebra I on the Blue Ash College placement test
- Students lacking these required prerequisites may take equivalent courses at Blue Ash College

Transferring To UC

Graduates of the UC Blue Ash College PCSD program may apply for admission to the CSD program within the College of Allied Health Sciences. Students must have earned a minimum of a 3.0 cumulative grand point average (GPA) in addition to a minimum GPA of 3.0 in all math and science courses in order to apply to the CSD program.

Changing Majors Within UC

Students can transfer directly into the communication sciences and disorders program if they have a minimum GPA of 3.0 or above. Students in the College of Allied Health Sciences and CSD program must maintain a minimum GPA of 3.0 to be considered in good academic standing. It is advisable that students in the program maintain a minimum GPA of 3.4 to remain competitive for a graduate program in either speech/language pathology or audiology upon completion of their four-year degree.

The bachelor's degree program in communication sciences and disorders offers opportunity for dual admission to the undergraduate and graduate programs. Dual admission in the College of Allied Health Sciences allows high school seniors with outstanding academic performance to apply for and be accepted to both undergraduate and graduate school. This opportunity assures students admission into a top-quality graduate program while allowing students to experience college as a whole. Inquire at the college office about specific admission requirements to be considered for the dual admission program.

Graduation Requirements

To graduate from the UC Blue Ash College PCSD associate degree program, students must complete all required coursework and have a minimum grade point average of 2.0.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Early Childhood Education

Duration: 2 Years Total Credits: 60 Award: AS

Overview

Early childhood education involves learning and supports for children from birth through age 8 and includes a range of pre-kindergarten through third grade settings. Preschool, kindergarten and primary-school teachers introduce children to foundational knowledge and skills in mathematics, language, science and social studies. They play a vital role in their students' development. What children learn and experience during their early years will shape their views of themselves and the world, and can affect their later success or failure in school, work and their personal lives.

A Bachelor's degree in education is the minimum educational requirement for teaching in public school settings. This program provides you with the first two years toward completion of your Bachelor's degree.

Professional Organization: The National Association for the Education of Young Children (NAEYC)

Success

Students who become successful teachers must have the ability to communicate, inspire trust and confidence, and motivate children, as well as understand their educational and emotional needs. You must be able to recognize and respond to individual and cultural differences in students. Flexibility and adaptability are important. You should also be organized, dependable, patient and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and members of the community. You must enjoy play. Respect for children and patience are crucial characteristics.

Career

With a Bachelor's degree and proper licensing, your employment opportunities include the following:

- preschool teacher
- kindergarten teacher
- primary grade-school teacher
- child-care center director
- Head Start teacher
- Head Start family advocate
- developmental interventionist
- child life specialist

Additional career options are listed on the Career Development Center's website.

Additional career options are listed on the Center for Exploratory Studies website.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Pre-Early Childhood Education

Advising

Current and admitted students can locate advisor contact information for Pre-Early Childhood Education via the UCBA advising website.

UC Advantages And Special Opportunities

This degree is the gateway to both the Early Childhood Profession and Special Education Bachelor's degrees at UC.

Successful completion of this program will prepare you to apply for selective admission to the UC College of Education, Criminal Justice, and Human Services for your remaining years, or at other four-year colleges or universities. Your program advisor will guide your course work to maximize your transition opportunities.

A solid foundation to build upon is important to achieving success in these fields. UC's Blue Ash College has small classes and well-qualified, dedicated faculty that will help you get a good start on your education and provide a firm basis for future learning.

The University of Cincinnati's Blue Ash College is conveniently located in suburban Blue Ash and is accessible from I-75, I-71, I-275 and the Ronald Reagan (Cross-County) Highway.

Special Programs

In the education programs available at Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in UC's Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering this program should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement tests prior to registering for classes.

The Blue Ash College admissions office provides an application for admission and all the information you'll need to enroll in the college.

Admission to Professional Cohort

- All students who plan to apply to professional cohort must attend a mandatory information session offered by UC's College of Education, Criminal Justice, and Human Services. Typically an e-mail may also be sent to the student's Bearcat online account. Not attending a session will prevent cohort admittance.
- Students must apply for admission to the professional cohort after they have completed approximately 30 semester hours with a minimum 3.0 GPA. Students must also have taken the SAT or ACT with a qualifying score (see CECH admissions requirements), or have taken the Praxis I with passing scores. The application process is offered only once per year. Professional cohort begins only in the fall semester. Students should view professional cohort admittance requirements early in their education career so that all prerequisites and exclusionary factors are clear.
- Admission to a cohort is not guaranteed. When the number of applicants exceeds the number of available openings, the better qualified candidates will be admitted.

Since these programs change in response to updates from the Ohio Department of Higher Education and CECH, please see your your program advisor each term.

Transferring To UC

Students transferring to UC Blue Ash College follow similar procedures as those who are enrolling through open admissions. Please contact our admissions office for all the information you'll need to enroll in the college.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at UC's Blue Ash College. Students must earn a "C" or better in courses for the program. Students will complete at least 60 credit hours as listed in their specific program.

Application Deadlines

The University of Cincinnati's Blue Ash College is an open admission campus. We accept applications all year long and you may start any semester. Financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Elementary Education

Duration: 2 Years Total Credits: 60 Award: AS

Overview

Early childhood education involves learning and supports for children from birth through age 8 and includes a range of pre-kindergarten through third grade settings. Preschool, kindergarten and primary-school teachers introduce children to foundational knowledge and skills in mathematics, language, science and social studies. They play a vital role in their students' development. What children learn and experience during their early years will shape their views of themselves and the world, and can affect their later success or failure in school, work and their personal lives.

A Bachelor's degree in education is the minimum educational requirement for teaching in public school settings. This program provides you with the first two years toward completion of your Bachelor's degree.

Professional Organization: The National Association for the Education of Young Children (NAEYC)

Success

Students who become successful teachers must have the ability to communicate, inspire trust and confidence, and motivate children, as well as understand their educational and emotional needs. You must be able to recognize and respond to individual and cultural differences in students. Flexibility and adaptability are important. You should also be organized, dependable, patient and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and members of the community. You must enjoy play. Respect for children and patience are crucial characteristics.

Career

With a Bachelor's degree and proper licensing, your employment opportunities include the following:

- preschool teacher
- kindergarten teacher
- primary grade-school teacher
- child-care center director
- Head Start teacher
- Head Start family advocate
- developmental interventionist
- child life specialist

Additional career options are listed on the Career Development Center's website.

Additional career options are listed on the Center for Exploratory Studies website.

Pre-Elementary Education

Advising

Current and admitted students can locate advisor contact information for Pre-Early Childhood Education via the UCBA advising website.

UC Advantages And Special Opportunities

This degree is the gateway to both the Early Childhood Profession and Special Education Bachelor's degrees at UC.

Successful completion of this program will prepare you to apply for selective admission to the UC College of Education, Criminal Justice, and Human Services for your remaining years, or at other four-year colleges or universities. Your program advisor will guide your course work to maximize your transition opportunities.

A solid foundation to build upon is important to achieving success in these fields. UC's Blue Ash College has small classes and well-qualified, dedicated faculty that will help you get a good start on your education and provide a firm basis for future learning.

The University of Cincinnati's Blue Ash College is conveniently located in suburban Blue Ash and is accessible from I-75, I-71, I-275 and the Ronald Reagan (Cross-County) Highway.

Special Programs

In the education programs available at Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in UC's Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering this program should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement tests prior to registering for classes.

The Blue Ash College admissions office provides an application for admission and all the information you'll need to enroll in the college.

Admission to Professional Cohort

- All students who plan to apply to professional cohort must attend a mandatory information session offered by UC's College of Education, Criminal Justice, and Human Services. Typically an e-mail may also be sent to the student's Bearcat online account. Not attending a session will prevent cohort admittance.
- Students must apply for admission to the professional cohort after they have completed approximately 30 semester hours with a minimum 3.0 GPA. Students must also have taken the SAT or ACT with a qualifying score (see CECH admissions requirements), or have taken the Praxis I with passing scores. The application process is offered only once per year. Professional cohort begins only in the fall semester. Students should view professional cohort admittance requirements early in their education career so that all prerequisites and exclusionary factors are clear.
- Admission to a cohort is not guaranteed. When the number of applicants exceeds the number of available openings, the better qualified candidates will be admitted.

Since these programs change in response to updates from the Ohio Department of Higher Education and CECH, please see your your program advisor each term.

Transferring To UC

Students transferring to UC Blue Ash College follow similar procedures as those who are enrolling through open admissions. Please contact our admissions office for all the information you'll need to enroll in the college.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at UC's Blue Ash College. Students must earn a "C" or better in courses for the program. Students will complete at least 60 credit hours as listed in their specific program.

Pre-Health Sciences

Duration: 2 Years Total Credits: 65 Award: AS

Overview

This program prepares students for application to the health sciences baccalaureate degree program in the College of Allied Health Sciences (CAHS). The curriculum consists of freshman and sophomore level courses for appliction to CAHS.

Success

Students selecting this major should be within the top 10 percent of their high school class academically with a strong background in math (algebra, trigonometry, calculus) and science (biology, chemistry, physics). Students should possess strong time management and interpersonal skills and enjoy physical work.

Career

Completion of the Health Sciences (Pre) program does not qualify students for any licensure or certification for employment. This program allows students to apply to the health sciences program in the CAHS on West Campus.

Students who do not matriculate to the CAHS program pursue other career paths.

Pre-Medical Laboratory Science

Duration: 2 Years Total Credits: 62 Award: AS

Overview

The AS Pre-Medical Laboratory Science program represents the first two years of the bachelor of science degree offered by UC's College of Allied Health Sciences. Medical laboratory scientists with a bachelor of science degree and professional certification are allied health professionals who participate in patient care by performing laboratory procedures that assist in the prevention, diagnosis and treatment of diseases. The analysis performed by medical laboratory scientists may be in the areas of chemistry, microbiology, hematology, immunology, toxicology, and blood banking. Laboratory scientists perform manual and automated procedures and utilize laboratory information computer systems to analyze and transmit patient data. Medical laboratory scientists are also responsible for the quality control and quality assurance procedures in the laboratory. The education of a medical laboratory scientist combines a curriculum common to most undergraduate majors in the medical field with a clinical program designed to produce individuals who possess a high level of technical proficiency.

Success

Students who succeed in this field have a love and aptitude for science and strong analytical abilities.

Career

BS medical laboratory scientists obtain employment in a variety of settings. These settings include hospital laboratories, independent laboratories, clinics and physicians' offices, research and development laboratories, public/government health agencies, forensics laboratories, and pharmaceutical companies. Program graduates are generally able to choose from several entry-level technologist positions. Advanced certification is available in each laboratory area for those who choose to pursue a higher level of training. Graduate training in one of the laboratory disciplines will allow individuals to advance to supervisory positions and intermediate level research positions. Regardless of the setting, medical laboratory scientists consistently work in a challenging, fast paced, and collegial environment. Additionally, graduates of the program are well qualified for entry into professional and graduate programs such as medicine and physician’s assistant.

Major Map Versions:
Pre-Medical Laboratory Science

Advising

Current and admitted students can locate advisor contact information for pre-medical laboratory science via the UCBA advising website.

UC Advantages And Special Opportunities

A solid foundation to build upon is important to achieving success in medical laboratory science. Students at UC Blue Ash College enjoy small classes and well-qualified faculty as well as the many benefits afforded through study at a university ranked among the nation's top 25 public research institutions.

UC’s Blue Ash campus is conveniently located not far from major interstates. It is easy to find, offers plenty of parking and state-school tuition.

Admission Requirements

This program is open to all students with a diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet math and science prerequisites before taking certain courses.

All students entering UCBA, except those with previous college-level math and English, must take the college’s placements tests prior to registering for classes.

More detailed information can be found at the college’s admissions website.

Transferring To UC

For students outside UC wishing to transfer in:

Information can be found here.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

International Student Requirements

International students wishing to apply to UCBA can find information here.

Graduation Requirements

To qualify for an associate of science degree, you must fulfill the requirements of the program from which you expect to graduate and must have at least an overall 2.0 cumulative grade point average. Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

You must complete an application for graduation, usually in the term before you expect to graduate. You should see your advisor for specific information well in advance of your final term.

Application Deadlines

UC Blue Ash College operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Middle Childhood Education

Language Arts/Mathematics

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Education is the profession of teaching. Teachers act as coaches, using interactive discussions and “hands-on” approaches to help students learn and apply concepts in subjects such as science, mathematics, or English. They provide the tools and the environment for their students to learn abstract concepts, solve problems, and develop critical thought processes.

Middle childhood educators can teach grades four through nine.

Middle childhood teachers help students delve more deeply into subjects introduced in elementary school and expose them to more information about the world. Middle childhood teachers in Ohio usually specialize in two of four concentrations: science, math, language arts, and social studies.

They also play a vital role in the development of their students. Middle childhood teachers often become role models for pre-adolescents and young adolescents. What children learn and experience during these years can shape their views of themselves and the world, and might affect their later success or failure in school, work, and their personal lives.

Our Middle Childhood Education program is dedicated to improving the educational experiences of children in grades four through nine, with a special commitment to urban education.

A Bachelor’s degree in education is the minimum educational requirement for entering the teaching profession. This program provides you with the first two years toward completion of your Bachelor’s degree, which allows you to apply for selective admissions to complete that degree at the UC College of Education, Criminal Justice, and Human Services.

Success

Students who become successful teachers must have the ability to communicate, inspire trust and confidence, and motivate students, as well as understand their educational and emotional needs. You must be able to recognize and respond to individual and cultural differences in students. Flexibility and adaptability are important. You should also be organized, dependable, patient, and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents, and members of the community. You should also respect and enjoy working with children and young adolescents.

Career

With your Bachelor’s degree and proper licensing, your employment opportunities include becoming a teacher, instructor or tutor. You may teach in public or private schools. Opportunities depend, in part, on your areas of concentration. (You will pick two from the following areas: language arts, mathematics, science, and social studies.)

Advanced degrees are generally required for director, principal, superintendent, librarian and guidance counselor positions.

Pre-Middle Childhood Education - Language Arts/Mathematics

Advising

Current and admitted students can locate advisor contact information for Pre-Middle Childhood Education via the UCBA advising website.

UC Advantages And Special Opportunities

The University of Cincinnati's Blue Ash College is conveniently located in suburban Blue Ash and is accessible from I-75, I-71, I-275 and the Ronald Reagan Highway. We are relatively small and our faculty-to-student ratio is low. You will find small class sizes and personal interaction with your instructors create the ideal learning environment. Parking is convenient and our tuition is one of the lowest of the UC colleges.

We also maintain close ties with area schools. In fact, Blue Ash College is the only college campus to host an elementary school on campus! Ties to our local community are also strengthened by the experiential learning component we recently added to all education courses. You will provide valued assistance in area schools, as you connect learned academic theory to real-world experiences.

Special Programs

In the education programs available at Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in UC's Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering this program should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement tests prior to registering for classes.

The Blue Ash College admissions office provides an application for admission and all the information you'll need to enroll in the college. Please go to admissions for more information on applying.

Admission to Professional Cohort

- All students who plan to apply to professional cohort must attend a mandatory information session offered by UC's College of Education, Criminal Justice, and Human Services. Typically an e-mail may be sent to the student's Bearcat online account. Not attending a session will prevent cohort admittance.
- Students must apply for admission to the professional cohort after they have completed approximately 30 semester hours with typically a minimum 3.0 GPA. Students must also have taken the SAT or ACT with a qualifying score (see CECH admissions requirements), or have taken the Praxis I with passing scores. The application process is offered only once per year. Professional cohort begins only in the fall semester. Students should view professional cohort admittance requirements early in their education career so that all prerequisites and exclusionary factors are clear.
- Admission to a cohort is not guaranteed. When the number of applicants exceeds the number of available openings, the better qualified candidates will be admitted.

Transferring To UC

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

More information on applying as a transfer student can be found at admissions.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at Blue Ash College. Students must earn a "C" or better in courses within the program. Students will complete at least 60 credit hours or as listed in their specific program.

Application Deadlines

The college's rolling admissions policy allows you to start any semester: fall, spring or summer. However, financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Middle Childhood Education

Mathematics/Natural Sciences

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Education is the profession of teaching. Teachers act as coaches, using interactive discussions and “hands-on” approaches to help students learn and apply concepts in subjects such as science, mathematics, or English. They provide the tools and the environment for their students to learn abstract concepts, solve problems and develop critical thought processes.

Middle childhood educators can teach grades four through nine.

Middle childhood teachers help students delve more deeply into subjects introduced in elementary school and expose them to more information about the world. Middle childhood teachers in Ohio usually specialize in two of four concentrations: science, math, language arts, and social studies.

They also play a vital role in the development of their students. Middle childhood teachers often become role models for pre-adolescents and young adolescents. What children learn and experience during these years can shape their views of themselves and the world, and may affect their later success or failure in school, work, and their personal lives.

Our Middle Childhood Education program is dedicated to improving the educational experiences of children in grades four through nine, with a special commitment to urban education.

A Bachelor’s degree in education is the minimum educational requirement for entering the teaching profession. This program provides you with the first two years toward completion of your Bachelor’s degree, which allows you to apply for selective admissions to complete that degree at the UC College of Education, Criminal Justice, and Human Services.

Success

Students who become successful teachers must have the ability to communicate, inspire trust and confidence, and motivate students, as well as understand their educational and emotional needs. You must be able to recognize and respond to individual and cultural differences in students. Flexibility and adaptability are important. You should also be organized, dependable, patient, and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents, and members of the community. You should also respect and enjoy working with children and young adolescents.

Career

With your Bachelor’s degree and proper licensing, your employment opportunities include becoming a teacher, instructor, or tutor. You may teach in public or private schools. Opportunities depend, in part, on your areas of concentration. (You will pick two from the following: language arts, mathematics, science, and social studies.)

Advanced degrees are generally required for director, principal, superintendent, librarian, and guidance counselor positions.

Advising

Current and admitted students can locate advisor contact information for Pre-Middle Childhood Education via the UCBA advising website.

UC Advantages And Special Opportunities

The Universtiy of Cincinnati's Blue Ash College is conveniently located in suburban Blue Ash and is accessible from I-75, I-71, I-275 and the Ronald Reagan Highway. We are relatively small, and our faculty to student ratio is low. You will find small class size and personal interaction with your instructors create the ideal learning environment. Parking is convenient, and our tuition is one of the lowest of the UC colleges.

We also maintain close ties with area schools. In fact, UC's Blue Ash College is the only college campus to host an elementary school on campus! Ties to our local community are also strengthened by the experiential learning component we recently added to all education courses. You will provide valued assistance in area schools, as you connect learned academic theory to real-world

experiences.

Special Programs

In the education programs available at Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering Blue Ash College should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement test prior to registering for classes. Please go to admissions for more information on applying.

Admission to Professional Cohort

- All students who plan to apply to professional cohort must attend a mandatory information session offered by UC's College of Education, Criminal Justice, and Human Services. Typically an e-mail may be sent to the student's Bearcat online account. Not attending a session will prevent cohort admittance.
- Students must apply for admission to the professional cohort after they have completed approximately 30 semester hours with typically a minimum 3.0 GPA. Students must also have taken the SAT or ACT with a qualifying score (see CECH admissions requirements), or have taken the Praxis I with passing scores. The application process is offered only once per year. Professional cohort begins only in the fall semester. Students should view professional cohort admittance requirements early in their education career so that all prerequisites and exclusionary factors are clear.
- Admission to a cohort is not guaranteed. When the number of applicants exceeds the number of available openings, the better qualified candidates will be admitted.

Transferring To UC

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

More information on applying as a transfer student can be found at admissions.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at Blue Ash College. Students must earn a "C" or better in courses within the program. Students will complete at least 60 credit hours or as listed in their specific program.

Application Deadlines

The college's rolling admissions policy allows you to start any semester: fall, spring, or summer. However, financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Mortuary Science

Duration: 2 Years Total Credits: 61 Award: AS

Overview

The UC Blue Ash College pre-mortuary science program is an associate of arts degree designed for students who want to transfer to the Cincinnati College of Mortuary Science (CCMS). There, students will complete a bachelor of mortuary science degree. All courses from UCBA will transfer to CCMS.

Mortuary science seeks to enroll persons who believe in the dignity of funeral services, who are committed to competent, professional service, and who desire more than minimal technical training. Aside from embalming and other preparatory services, graduates also need experience in arrangements counseling, merchandising and funeral directing.

An education in mortuary science is rigorous. Students are required to have two years of general education -- including liberal arts, business and behavioral science -- before studying mortuary science. Upon graduation from a four-year program, students must take state and national board examinations.

Success

Successful graduates must have people-oriented skills and professional manners during times of high stress, possess good listening, verbal and nonverbal communication skills, have a professional demeanor, and have an understanding of different cultures. They must have good business skills.

Career

Employment opportunities for graduates of the Cincinnati College of Mortuary Science (CCMS) program exist mainly in funeral homes, but also in hospitals, public health organizations and related industries. Graduates of the CCMS program are equipped not only with classroom experience, but with laboratory work/study and practicum experience as well.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Pre-Mortuary Science (AS) Curriculum

Advising

Current and admitted students can locate advisor contact information for pre-mortuary science via the UCBA advising website. Students should also contact the enrollment manager at Cincinnati College of Mortuary Sciences at 513-761-2020.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to CCMS for the upper levels of study.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Neuroscience

Duration: **2 Years** Total Credits: **63 - 65** Award: **AS**

Overview

Understanding the intricate relationships between neural mechanisms and behavior is an important and fruitful area of contemporary scientific research. Such research allows scientists to learn more about the progression of Alzheimer's disease, the neural basis of addition, and appropriate biochemical treatments for anxiety, just to name a few. Those who graduate with a degree in neuroscience find careers in clinical research, pharmaceutical sales, medicine, and other biopsychological-based positions.

Success

Neuroscience requires students to develop a wide variety of skills. Taking classes that focus more on psychobiology and sensation and perception allows students to develop strong critical thinking skills important in engaging in research. Because neuroscience is a scientific field, with findings based on research, all students must master statistics and understand the research designs of studies in the field. Many of the courses required for the program are also required of students interested in medical school, and thus position students nicely for applying to medical school.

Ultimately, a degree in neuroscience prepares students to be critical thinkers and proficient writers, as well as sophisticated researchers.

Career

Students in this program are expected to transition to the bachelor's degree program in Neuroscience before entering the workplace in this area. Once they graduate, students can expect to find employment in the following positions: Laboratory Technician, Medical Scientist, Biological Technician, Researcher / Research Associate, Laboratory Technologist, Laboratory Manager, Clinical Research Coordinator / Manager, Biologist, and Microbiologist. Students who complete the bachelor's degree will also be able to apply to graduate school or medical school. According to PayScale, the average salary of someone working in the field of neuroscience with a bachelor's degree is $65,877 (February, 2021).

Advising

For advising contact information, please check the college's advising webpage, or call 513-745-5357.

UC Advantages And Special Opportunities

The Associates of Science (AS) Degree program in Neuroscience provides students with the first two years of general education requirements within the discipline so they can easily and efficiently transfer into the bachelor's degree program in Neuroscience at UC's College of Arts and Sciences (A&S).

Admission Requirements

The program is open to all students with a high school diploma from an accredited high school or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to graduate and to advance to upper levels of study. High school students who are considering UC Blue Ash College should take either the SAT or ACT test for guidance and counseling.

Transferring To UC

Transferring to UC Blue Ash College

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Transfer students must supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program.
- Submit the completed form to the college which offers the program into which you want to transition.
- Students changing majors FROM other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

International students wishing to apply to UCBA can find information here.

Graduation Requirements

- Complete all program requirements
- Earn at least 60 semester credit hours (for an associate degree) *This can include transfer credit, AP credit and free electives, but does not include preparatory coursework. Students who have met all other degree requirements must continue earning credit until the total number of their earned hours comes to at least these minimum number of credit hours.*
- Attain a 2.0 grade point average for all courses taken at the University of Cincinnati.
- Be in good academic standing, that is, not on either academic probation or disciplinary probation or suspension.
- Complete the UC residency requirement.
- Submit an application for graduation to the registrar's office by their posted deadline.

Students should see their advisor for specific information well in advance of their final term.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash Admissions page for specific application deadlines for each term.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Nutrition and Dietetics

Duration: 2 Years Total Credits: 63 Award: AS

Overview

This Associate of Science degree program at UC Blue Ash College is designed to prepare students for application to the Bachelor of Science degree program in Nutrition and Dietetics offered by the University of Cincinnati's College of Allied Health Sciences (CAHS).

Additionally, this UC Blue Ash program prepares students for application to the innovative bachelor's plus master's accelerated program to become a Registered Dietitian Nutritionist (RDN) offered by the University of Cincinnati's College of Allied Health Sciences (CAHS).

The first two years of the Pre-Nutrition and Dietetics program can be completed at UC Blue Ash College. The final two to three years must be completed at the UC Uptown Campus.

Students who fulfill the requirements to become a Registered Dietitian Nutritionist (RDN) can then take the national RDN credentialing examination. In many states, RDNs will need a license or certification to practice. In the state of Ohio, with the RDN credential, a background check and payment of a fee is the requirement for a practitioner to receive his or her license to practice.

Success

Successful dietetics and nutrition professionals must want to help others, be able work as part of a team, possess strong interpersonal, verbal, nonverbal and written communication skills, excellent math comprehension and critical thinking skills, have a professional demeanor, and commitment to life long learning.

Career

The RDN credential enables an individual to perform nutrition risk assessments and prescribe medical nutrition therapy to treat or prevent diseases such as diabetes, cardiovascular disease, gastrointestinal disease, renal disease, and so forth. Dietitians also work with healthy clients who have specialized dietary needs such as athletes, vegetarians, pregnant women, children who are picky eaters, etc.

RDNs work in a variety of settings including hospitals, long-term care facilities, schools, supermarkets, with athletes, private practice settings, eating disorder centers, in academia, research, health departments, business corporations, health clubs, and many other areas.

Beginning in 2024 to practice as a RDN, you must complete the program courses, obtain a master's degree, complete 1200 hours of a supervised practice internship, and pass the Commission on Dietetic Registration credentialing exam for RDNs.

Alternatively, students who complete the bachelor of science degree may choose to pursue a career as a Nutrition and Dietetics Technician, Registered (NDTR). NDTRs must complete the Bachelor of Science in Nutrition & Dietetics and then can take the Commission on Dietetic Registration credentialing exam for NDTRs. This credential enables a NDTR to work in partnership with the RDN to screen, evaluate and educate patients on topics related to nutrition primarily in healthcare settings.

Pre-Nutrition and Dietetics (AS)

Advising

For more information on this program, contact Scott Tremain at 513-558-6850 or scott.tremain@uc.edu.

UC Advantages And Special Opportunities

Graduates of the UC Blue Ash Pre-Nutrition and Dietetics program may transition to the bachelor's degree program in Nutrition and Dietetics through the College of Allied Health Sciences (CAHS).

A solid science foundation to build upon is important to achieving success in the dietetics and nutrition fields. Students at UC Blue Ash College enjoy small classes and well-qualified faculty as well as the many benefits afforded through study at a university ranked among the nation's top 25 public research institutions.

UC's Blue Ash campus is conveniently located not far from major interstates. Easy to find. Plenty of parking. State-school tuition.

Admission Requirements

This program is open to all UC Blue Ash College students. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Prerequisites:

- High school chemistry and biology with grades of "C" or better
- Placement into English Composition I and College Algebra I on the UC Blue Ash College placement test
- Students lacking these required prerequisites may take equivalent courses at UC Blue Ash College

Transferring To UC

For students outside UC wishing to transfer in, information can be found here.

Graduates of the UC Blue Ash College Pre-Nutrition and Dietetics program may apply for admission to the Dietetics and Nutrition program within the College of Allied Health Sciences (CAHS). Students must have earned a minimum of a 3.0 cumulative GPA in addition to a minimum GPA of 3.0 in all math and science courses in order to apply to the program. Students must have earned a C- or higher in all college level science courses.

Changing Majors Within UC

Students can transfer directly into the Nutrition and Dietetics program if they have a minimum GPA of 3.0 or above. Students in the College of Allied Health Sciences (CAHS) must maintain a minimum GPA of 3.0 to be considered in good academic standing.

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

Students must take at least one half of the required course work in a selected program at UCBA to qualify for graduation.

International Student Requirements

International students wishing to apply to UCBA can find information here.

Graduation Requirements

To graduate from the UC Blue Ash College Pre-Nutrition and Dietetics degree program, students must complete all required coursework and have a minimum grade point average of 2.0.

You must complete an application for degree, usually the term before you expect to graduate. You should see your advisor for specific information well in advance of your final term.

Application Deadlines

UC Blue Ash College operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Secondary Education

Chemistry

Duration: 2 Years Total Credits: 60 Award: AS

Overview

Education is the profession of teaching. Teachers act as coaches, using interactive discussions and “hands-on” approaches to help students learn and apply concepts in subjects such as science, mathematics or English. They provide the tools and the environment for their students to learn abstract concepts, solve problems and develop critical thought processes.

Secondary education is teaching that concentrates on grades seven through twelve.

Secondary school teachers help students delve even more deeply into subjects introduced in elementary and middle school, and continue exposing them to more information about the world. Secondary school teachers specialize in a specific subject, such as English, Spanish, mathematics, history or biology.

Teachers also play a vital role in the development of their students. They often become role models for adolescents. What students learn and experience during these years can change their views of themselves and the world, and may affect their later success or failure in college, work, and their personal lives.

A Bachelor’s degree in education is the minimum educational requirement for entering the teaching profession. This program provides you with the first two years toward completion of your Bachelor’s degree, which allows you to apply for selective admissions to complete that degree at the UC College of Education, Criminal Justice, and Human Services.

Success

Students who become successful teachers must have the ability to communicate, inspire trust and confidence, and motivate students, as well as understand their educational and emotional needs. You must be able to recognize and respond to individual and cultural differences in students. Flexibility and adaptability are important. You should also be organized, dependable, patient, and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents, and members of the community. You should also respect and enjoy working with adolescents.

Career

With your Bachelor’s degree and proper licensing, your employment opportunities include becoming a teacher, instructor, or tutor. You may teach in public or private schools.

Advanced degrees are generally required for roles as a director, principal, superintendent, librarian, and guidance counselor.

Additional career options are listed on the Career Development Center's website.

Pre-Secondary Education- Chemistry

Advising

Current and admitted students can locate advisor contact information for Pre-Secondary Education via the UCBA advising website.

UC Advantages And Special Opportunities

The University of Cincinnati's Blue Ash College and is accessible from I-75, I-71, I-275 and the Ronald Reagan Highway. We are relatively small, and our faculty to student ratio is low. You will find small class size and personal interaction with your instructors create the ideal learning environment. Parking is convenient, and our tuition is one of the lowest of the UC colleges.

We also maintain close ties with area schools. In fact, Blue Ash College is the only college campus to host an elementary school on campus! Ties to our local community are also strengthened by the experiential learning component we recently added to all education courses. You will provide valued assistance in area schools, as you connect learned academic theory to real-world experiences.

Special Programs

In the education programs available at Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any semester: fall, spring, or summer.

High school students who are considering Blue Ash College should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement test prior to registering for classes.

The Blue Ash College admissions office provides an application for admission and all the information you'll need to enroll in the college. Please go to admissions for more information on applying.

Admission to Professional Cohort

- All students who plan to apply to professional cohort must attend a mandatory information session offered by UC's College of Education, Criminal Justice, and Human Services. Typically an e-mail may be sent to the student's Bearcat online account. Not attending a session will prevent cohort admittance.
- Students must apply for admission to the professional cohort after they have completed approximately 30 semester hours with typically a minimum 3.0 GPA. Students must also have taken the SAT or ACT with a qualifying score (see CECH admissions requirements), or have taken the Praxis I with passing scores. The application process is offered only once per year. Professional cohort begins only in the fall semester. Students should view professional cohort admittance requirements early in their education career so that all prerequisites and exclusionary factors are clear.
- Admission to a cohort is not guaranteed. When the number of applicants exceeds the number of available openings, the better qualified candidates will be admitted.

Transferring To UC

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

More information on applying as a transfer student can be found at admissions.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at Blue Ash College. Students must earn a "C" or better in courses within the program. Students will complete at least 60 credit hours or as listed in their specific program.

Application Deadlines

The college's rolling admissions policy allows you to start any semester: fall, spring, or summer. However, financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at Blue Ash College. Students must earn a "C" or better in courses within the program. Students will complete at least 60 credit hours or as listed in their specific program.

Application Deadlines

The college's rolling admissions policy allows you to start any semester: fall, spring, or summer. However, financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Secondary Education

Mathematics

Duration: 2 Years Total Credits: 60 Award: AS

Overview

Education is the profession of teaching. Teachers act as coaches, using interactive discussions and “hands-on” approaches to help students learn and apply concepts in subjects such as science, mathematics or English. They provide the tools and the environment for their students to learn abstract concepts, solve problems and develop critical thought processes.

Secondary education is teaching that concentrates on grades seven through twelve.

Secondary school teachers help students delve even more deeply into subjects introduced in elementary and middle school, and continue exposing them to more information about the world. Secondary school teachers specialize in a specific subject, such as English, Spanish, mathematics, history or biology.

Teachers also play a vital role in the development of their students. They often become role models for adolescents. What students learn and experience during these years can change their views of themselves and the world, and may affect their later success or failure in college, work and their personal lives.

A bachelor’s degree in education is the minimum educational requirement for entering the teaching profession. This program provides you with the first two years toward completion of your bachelor’s degree.

Success

You must have the ability to communicate, inspire trust and confidence, and motivate students, as well as understand your educational and emotional needs. You must be able to recognize and respond to individual and cultural differences in students. Flexibility and adaptability are important. You should also be organized, dependable, patient and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and members of the community. You should also respect and enjoy working with adolescents.

Career

With your bachelor’s degree and proper licensing, your employment opportunities include becoming a teacher, instructor and tutor. You may teach in public or private schools.

Advanced degrees are generally required for roles as a director, principal, superintendent, librarian and guidance counselor.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Advising

Current and admitted students can locate advisor contact information via the UCBA advising website.

UC Advantages And Special Opportunities

The University of Cincinnati's Blue Ash College is conveniently located in suburban Blue Ash and is accessible from I-75, I-71, I-275 and the Ronald Reagan Highway. We are relatively small and our faculty to student ratio is low. You will find small class size and personal interaction with your instructors create the ideal learning environment. Parking is convenient and our tuition is one of the lowest of the UC colleges.

We also maintain close ties with area schools. In fact, UC Blue Ash College is the only college campus to host an elementary school on campus! Ties to our local community are also strengthened by the experiential learning component we recently added to all education courses. You will provide valued assistance in area schools, as you connect learned academic theory to real-world experiences.

Special Programs

In the education programs available at UC Blue Ash College, students have the opportunity to observe in the schools at an early point in their academic career. Early exposure can be an advantage in determining the age group that a student desires to teach before progressing through a majority of a chosen program.

Admission Requirements

You may enroll in UC Blue Ash College if you graduated from an accredited high school or preparatory school, or have a GED certificate (minimum composite score of 45). The college's rolling admissions policy allows you to start any quarter: fall, winter, spring or summer.

High school students who are considering UC Blue Ash College should take either the SAT or ACT college entrance examination for use in guidance and counseling. All students entering a degree program must also take the college's placement test prior to registering for classes. This test is given on the UC Blue Ash College campus.

The admissions office provides an application for admission and all the information you'll need to enroll in the college. In addition to the college admission requirements, applicants to this program must also take the UC Blue Ash College placement test.

Admission to Professional Cohort

- All students who plan to apply to professional cohort must attend a mandatory information session offered by UC's College of Education, Criminal Justice, and Human Services. Notification of times will be posted on the adviser's door. Typically an e-mail may also be sent to the student's Bearcat online account. Not attending a session will prevent cohort admittance.

- Students must apply for admission to the professional cohort after they have completed approximately 30 semester hours with a minimum 2.8 GPA. Students must also have taken the SAT or ACT with a qualifying score (see CECH admissions requirements), or have taken the Praxis I with passing scores. The application process is offered only once per year. Professional cohort begins only in the fall semester. Students should view professional cohort admittance requirements early in their education career so that all prerequisites and exclusionary factors are clear.

- Admission to a cohort is not guaranteed. When the number of applicants exceeds the number of available openings, the better qualified candidates will be admitted.

Since these programs change in response to updates from the Ohio Board of Regents and CECH, please see your your program adviser each term for current information.

Transferring To UC

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons. Application of transfer credit to the student's program is at the discretion of the appropriate program director or department chairperson.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

Students must have completed at least 50 percent of their program requirements at Blue Ash College. Students must earn a "C" or better in courses within their major. Students will complete at least 60 credit hours or as listed in their specific program.

Application Deadlines

The college's rolling admissions policy allows you to start any semester: fall, winter or summer. However, financial aid takes six to eight weeks to process. We recommend that you apply at least 10 weeks prior to your desired attendance

Pre-Speech Language Hearing Sciences

Duration: 2 Years Total Credits: 60 Award: AS

Overview

This Associate of Science degree program at UC Blue Ash College is designed to prepare students for application to the Bachelor of Science degree program in Speech Language and Hearing Sciences (SLHS) offered by the University of Cincinnati's College of Allied Health Sciences (CAHS).

The first two years of the Pre-Speech Language and Hearing Sciences program can be completed at UC Blue Ash College. The final two years must be completed at the UC Uptown Campus or a combination of Blue Ash and Uptown Campuses.

Students majoring in Pre-Speech Language and Hearing Sciences prepare for professions to help people who have difficulty speaking and hearing due to a variety of causes. The study of communication disorders involves understanding the normal development of speech, language and hearing, as well as learning how to diagnose and treat communication disorders in adults and children.

Success

Successful health care professionals must want to help others, be able work as part of a team, possess good verbal and nonverbal communication skills, and have a professional demeanor.

Career

A Bachelor of Science degree in Speech Language and Hearing Sciences (SLHS) is a pre-professional degree that prepares students for graduate work in either audiology or speech/language pathology and a variety of other graduate experiences in social service, special education, and health care. A master's degree is necessary for licensing and certification as a speech/language pathologist, and a doctoral degree is required for an audiologist. Graduates find careers in hospitals, speech and hearing clinics, schools, educational programs for children with disabilities, the armed services, private practice, and government health agencies.

Curriculum

Major Map Versions:
Pre-Speech Language Hearing Sciences

Advising

For more information on this program, contact UC Blue Ash Pre-Health academic advisors at 513-745-5753 or advising@ucblueash.edu.

UC Advantages And Special Opportunities

Graduates of the UC Blue Ash Pre-Speech Language and Hearing Sciences program may transition to the bachelor's degree program in Speech Language and Hearing Sciences (SLHS) through the College of Allied Health Sciences (CAHS).

Admission Requirements

This program is open to all UC Blue Ash College students. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Prerequisites:

- High school biology with a grade of "C" or better
- Placement into English Composition I and College Algebra I on the UC Blue Ash College placement test
- Students lacking these required prerequisites may take equivalent courses at UC Blue Ash College

Transferring To UC

Graduates of the UC Blue Ash College Pre-Speech Language and Hearing Sciences program may apply for admission to the Speech Language and Hearing Sciences (SLHS) program within the College of Allied Health Sciences (CAHS). Students must have earned a minimum of a 3.0 cumulative GPA in addition to a minimum GPA of 3.0 in all math and science courses in order to apply to the SLHS program.

Changing Majors Within UC

Students can transfer directly into the Speech Language and Hearing Sciences (SLHS) program if they have a minimum GPA of 3.0 or above. Students in the College of Allied Health Sciences (CAHS) and SLHS program must maintain a minimum GPA of 3.0 to be considered in good academic standing. It is advisable that students in the program maintain a minimum GPA of 3.4 to remain competitive for a graduate program in either speech/language pathology or audiology upon completion of their four-year degree.

The bachelor's degree program in Speech Language and Hearing Sciences offers opportunity for dual admission to the undergraduate and graduate programs. Dual admission in the College of Allied Health Sciences allows high school seniors with outstanding academic performance to apply for and be accepted to both undergraduate and graduate school. This opportunity assures students admission into a top-quality graduate program while allowing students to experience college as a whole. Interested students should inquire at the college office about specific admission requirements to be considered for the dual admission program.

Graduation Requirements

To graduate from the UC Blue Ash College Pre-Speech Language and Hearing Sciences degree program, students must complete all required coursework and have a minimum grade point average of 2.0.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Public Health

Duration: 2 Years Total Credits: 63 Award: AS

Overview

The Public Health program is an associate of science degree will prepare students for a variety of careers in public and community health and wellness. After obtaining their Associate's degree, students can choose to transition to the baccalaureate program in Public Health at UC's College of Medicine (COM).

The Public Health program at the University of Cincinnati is designed to increase students' awareness of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system, and the monitoring of diseases in the community.

Public health professionals work to improve the health of individuals or communities, depending on their work setting and job responsibilities.

Success

Public health professionals must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Furthermore, those majoring in public health are usually committed to their own health and are excited about helping others improve theirs. Creativity is also a plus for public health professionals, as it often takes creative strategies to motivate and help individuals or communities to change health behaviors.

Both the behavioral and biological sciences form the foundation for public health. Course work is required in such areas as psychology, sociology, human growth and development, mental health issues, statistics, medical ethics and speech/communications.

Career

The career and curriculum expectations for this program will prepare students for careers in public health. This program will focus on awareness of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. healthcare system, and the monitoring of diseases in the community. Graduates of this program will be prepared to advance in some of the following career options such as:

- Epidemiologist
- Health Care Administrator
- Health Education Specialist
- Health Services Administrator
- Prevention Specialist
- Public Health Practitioner
- Research Coordinator

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Public Health

Advising

Current and admitted students can locate advisor contact information for the Public Health program via the UCBA Advising website.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Transferring To UC

Transferring to UC Blue Ash College from another institution:

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Students admitted to the college must show proof of high school graduation or successful completion of the General Education Development (GED) exam. Submission of standardized test scores (ACT or SAT) is recommended but not required. Transfer students must also

supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

Fill out an Application for Change in College and Program.

Submit the completed form to the college which offers the program into which you want to transition.

Transitioning from UC Blue Ash College to the UC baccalaureate program in Public Health: UC Blue Ash College students must apply to the College of Medicine and also to the Public Health program within the college. A 2.25 grade point average is required for admission into the program, and a 2.50 grade point average is required to graduate from the program in the CoM.

International Student Requirements

International students wishing to apply to UCBA can find information at UC Admissions - International Students.

Graduation Requirements

To graduate from the UC Blue Ash College Public Health associate degree program, students must complete all required coursework and have a minimum grade point average of 2.0.

Within CoM, a 2.50 grade point average is required to graduate from the bachelor's degree program.

Application Deadlines

UC Blue Ash College admits students each term, so students can begin fall, spring, and summer semesters. Please consult the UC Blue Ash Admissions page for specific application deadlines for each term.

Students should check with the College of Medicine (CoM) for application deadlines to the bachelor's program.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Public Health

Online

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Public health is the science of preventing disease, prolonging life, and promoting the health of people and communities through organized efforts to educate, develop policy, conduct scientific research and regulate health systems. The Public Health Associates degree offers a versatile education that examines emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system, and the monitoring of diseases in the community. This online associates degree program was designed to seamlessly transition to the University of Cincinnati Interdisciplinary Bachelors of Public Health degree.

Success

Public Health students must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Furthermore, those majoring in public health are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for public health workers, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Career

Careers in public health can range from improving access to healthcare, controlling infectious disease, reducing environmental hazards, designing healthier cities, to working towards decreasing substance abuse. Professionals in public health work in a variety of settings such as:

- Healthcare organizations
- Health insurance companies
- Retail organizations
- Educational institutions
- Government roles within the health department or in disaster readiness

Advising

Academic advising is an essential part of your educational experience. An institutional representative will provide insight or direction about an academic, social or personal matter. The nature of this direction might be to inform, suggest, counsel, discipline, coach, mentor, or even teach a college student how to navigate university systems to be successful.

We are committed to providing advice and assistance throughout your academic journey. As a result, you will be assigned a Program Advisor as well as a Program Retention Specialist. These individuals will work with you to create an academic plan based on your own personal and educational goals.

UC Advantages And Special Opportunities

UC students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC students through Learning Commons include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus Monday-Friday from 9-2 or virtually Monday-Thursday 9-8 and Friday 9-4.

Admission Requirements

Admission into the University of Cincinnati's online Associate of Science in Public Health is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level English or mathematics, you will need to take a placement test.

Changing Majors Within UC

Other UC students may transfer into this fully online program by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Graduation Requirements

In order to graduate from this program, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information,visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Business Technology

Duration: **2 Years** Total Credits: **30** Award: **ATS**

Overview

Associate of Technical Study degrees are awarded for successful completion of a planned program of study designed to respond to the need for specialized technical education. The One-Year Option allows graduates of Ohio Technical Centers (OTC) who complete a 600 or greater hour program and obtain an industry-recognized credential(s) to earn a block of technical credit toward an Associate of Technical Study (Type B). The goal of this Ohio Department of Higher Education (ODHE) initiative is to create a statewide agreement for awarding technical credit in addition to current statewide agreements such as Career-Technical Assurance Guides (CTAGs). Eligible students will be awarded 20-30 semester credit hours of block credit for the approved OTC program toward the relevant 60 semester hour ATS degree.

BENEFITS OF THE PROGRAM

- Complete your associate degree with 30-40 credits
- Flexible class options
- Advance your career and earnings potential
- Complete the ATS and be eligible for admission to the Bachelor's of Technical & Applied Studies in Applied Administration

Success

Business majors need people skills, the ability to communicate well (both verbally and in writing), and a strong quantitative background.

Career

Whether you're looking to advance in your current organization or seeking new opportunities elsewhere, this is a degree designed to help you take the next step in your professional development.

For more information on the Business Technology ATS degree program please contact the academic advisor at http://www.ucblueash.edu/academics/advising/advisor-list.html.

UC Advantages And Special Opportunities

When you participate in the ATS program at UC Blue Ash College, you will work with faculty who are experts in their discipline. Class sizes allow for optimal faculty to student and student to student interaction, allowing students to gain knowledge from multiple viewpoints.

Conveniently located in Blue Ash as a regional campus of the University of Cincinnati - UC Blue Ash (UCBA) - is located on 135 wooded acres and serves residents of Hamilton, Butler, Warren and Clermont counties, as well as other surrounding communities. UCBA also works closely with the Blue Ash area workforce to assist with their training needs.

The UCBA campus is friendly, informal, and prides itself on being accessible to students of all ages with various career aspirations. It also prides itself on offering smaller classes and closer ties with faculty and other students. UCBA welcomes transfer students, students who want to complete career programs, and students of any age who wish to take a course for personal enrichment or to improve their own skills.

Special Programs

The UC Blue Ash academic labs are one of our best student resources. They are free and open to any student. If you are returning to college after a long absence or feel under-prepared for the challenges of college, the academic labs may provide just what you need.

These labs include the math lab, language lab, writing lab and study skill and reading center.

Visit the labs online at http://www.ucblueash.edu/labs/

Admission Requirements

- Completed a 600+ clock hour program in business at an Ohio Technical Center
- Hold an industry-recognized credential(s) approved by the Ohio Department of Higher Education.
- Meet the credentialing pathway requirements as determined by the applicable credit affirmation team. The list of currently approved pathways and credentialing requirements can be found on the Ohio Department of Higher Education's One-Year Option webpage.

Transferring To UC

Students must submit all transcripts (high school, career center, college, or other institution) to the University of Cincinnati as part of the admission process. Information regarding transcript submission may be found at http://www.ucblueash.edu/admissions/steps/apply-now/transcripts.html.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Graduation Requirements

Students must complete all university and college requirements for graduation, and maintain a cumulative GPA of no less than 2.0. You must complete an application for a degree and receive a pre-certification from your academic advisor the semester before you expect to graduate. You should see your advisor or Enrollment Services for specific information well in advance of your final semester.

Application Deadlines

For information regarding application deadlines, please visit the Admissions website at http://www.ucblueash.edu/admissions.html.

Health and Allied Health Technology

Duration: 2 Years Total Credits: 60 Award: ATS

Overview

Associate of Technical Study degrees are awarded for successful completion of a planned program of study designed to respond to the need for specialized technical education. The Health and Allied Health Technology ATS degree is designed for those who have completed education, training, and certification in:

- Emergency Medical Technology
- Exercise Science
- Massage Therapy
- Medical Assisting
- Medical Sonography
- Optometric Technology
- Practical Nursing
- Radiological
- Surgical Technology
- Patient Care Technology

Students will receive 20-30 college credit for courses completed or training received at other institutions of higher education, career centers, or other educational enterprises judged by UC Blue Ash to be of college level and for which UC awards degree credit. The awarding of college credit is dependent upon the number of completed clock hours of outside education or training.

Success

Students will be successful in this program when they are self-driven, easily meet deadlines, enjoy working with technology and people, and communicate well.

Career

In this program you will gain perspective on the bigger picture of health care with a focus on ethics, diversity, social responsibility, interpersonal connections, and writing. Whether you're looking to advance in your current organization or seeking new opportunities elsewhere, this is a degree designed to help you take the next step in your professional development.

Radiologic Imaging Technology

Duration: 4 Years Total Credits: 120 Award: BRIT

Overview

Radiologic Technologists are educationally prepared and clinically competent in the handling and use of radiation imaging equipment to assist with the diagnosis and treatment of diseases and illnesses. The program emphasizes leadership skills within professional practice such as management or educational opportunities, or clinical specializations in Computed Tomography or Cardiac Interventional Radiography.

Radiologic Imaging Technology student education includes an integrated plan of classroom, laboratory, and clinical education. In addition to regular classroom coursework, students spend an average of 40-hours per week in the laboratory, classroom and clinical settings.

Success

Students who are interested in human anatomy and have a strong background in science and math, the ability to communicate and work well with others, and think critically will be the most successful in this program. Students entering the radiologic imaging technology profession must have the following abilities in order to successfully complete the program.

Physical Abilities

1. Lift and assist patients using proper body mechanics.

2. Use hands and arms to handle and position devices and move patients.

3. Safely maneuver all radiographic and fluoroscopic equipment as necessary for each exam.

4. Push and maneuver patients in wheelchairs and on stretchers.

5. Respond quickly and professionally to patients in emergency situations.

6. Communicate clearly with patients and other health care professionals in oral and written forms, including the use of medical terminology.

7. Move and align the patient and equipment utilizing lights, lasers and signals to properly position for radiographs.

8. Stand for extended periods of time and walk for long distances.

Sensory Abilities

1. Visualize details at a close range (such as small print labels) and make observations and assessments necessary for patient care.

2. Operate diagnostic equipment, such as automatic injectors and cardiovascular monitors.

3. Visualize and identify signs of impending danger/injury.

4. Hear soft sounds, alarms, and warning signs or cries for help so as to monitor and assess patient health needs.

5. Tactile ability sufficient for physical assessment and to perform patient care. Perform palpation during radiologic procedures. Administer oral, rectal, and intravenous contrast media.

Mental Abilities

1. Amenable to learning the safe handling, restraining and working with patients in various physiologic conditions whereby one may encounter blood, vomit, feces, urine, or other bodily fluids. Patients may be sick, injured, infectious, cognitively/emotionally/psychologically/physically impaired or aggressive.

2. A willingness to assist with or perform a wide variety of routine medical, surgical and diagnostic procedures common to the healthcare setting.

3. Capacities to read, hear, understand and quickly execute complex verbal and written instructions given in English.

4. Possess emotional stability when performing duties in emergency, life-and-death situations, or other stressful environments.

5. Ability to respond promptly and appropriately in emergency situations.

Students will be given reasonable assistance/accommodation in overcoming difficulties with these standards. However, there is no guarantee that all potential students will be able to successfully complete the program if unable to perform these actions. Students concerned about the requirements should contact the Program Director.

Career

Radiologic Technologists possess the knowledge, communication skills, and critical thinking skills to properly operate complex medical equipment and deliver quality patient care. Radiologic Technologists work daily with other members of the health care team as well as patients and family members. They explain procedures to patients, position patients for exams, ensure proper equipment function, acquire medical images using appropriate technical factors, evaluate image quality, and assist physicians during radiologic imaging procedures.

Curriculum

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Radiologic Imaging Technology (BRIT)

Advising

Current and admitted students can locate advisor contact information for pre-health professions and radiologic technology via the UCBA advising website.

UC Advantages And Special Opportunities

The use of multiple clinical sites allows students to work with various types of equipment and participate in a wide variety of radiologic procedures. This program affiliates with the radiology departments of Bethesda Arrow Springs Medical Center, Bethesda Butler Hospital, Bethesda North Hospital, Cincinnati Children's Hospital Medical Center, The Christ Hospital, The Christ Hospital (Red Bank) Imaging Center, The Christ Hospital Medical Center-Liberty Township, Mercy West Hospital, University of Cincinnati Medical Center, UC Health Drake Center, The VA Medical Center, and West Chester Hospital.

Admission Requirements

Students who wish to pursue Radiologic Imaging Technology should apply through UC admissions to be admitted to the UC Blue Ash College in the Pre-health Professions-Interest in RIT program or be an existing UC student. See the UC Blue Ash Selective Admissions webpage for program-specific criteria.

Transferring To UC

Transfer credits must be fully evaluated for applicability to the radiologic imaging technology program as part of the college admissions process.

International Student Requirements

It is highly recommended that international students contact UC International Services prior to applying for this program.

Graduation Requirements

The following requirements must be met:

1. Grades of "C" or better in all radiologic imaging technology program courses
2. All clinical and didactic courses must be taken concurrently as listed
3. Adherence to program policies and procedures
4. Completion of all university and college requirements for graduation
5. Cumulative GPA of no less than 2.8

Application Deadlines

For application deadlines, visit the admissions website.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The University of Cincinnati is accredited by the Higher Learning Commission.

The Radiologic Imaging Technology program is approved by the Ohio Department of Health.

The Radiologic Imaging Technology Program at the University of Cincinnati Blue Ash College is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT). JRCERT accreditation assures quality and requires a detailed peer-review process for ongoing improvement and assessment of the program. Accreditation Standards and program effectiveness data published by the JRCERT are available at www.jrcert.org or via mail@jrcert.org. The address and telephone number for the JRCERT are Joint Review Committee on Education in Radiologic Technology, 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182; (312) 704-5300.

Applied Administration

Online

Duration: 4 Years Total Credits: 120 Award: BTAS

Overview

The Bachelor of Applied Administration program is geared for students who already hold an associate's degree or have 60 semester hours from a regionally accredited institution and seek a pathway to obtain a bachelor's degree.

This degree is ideal for students and working adults who want to move into supervisory or administrative positions. The program is suitable for people who have work experience or who have recently earned an associate degree. It gives graduating students an edge in their current positions and helps them achieve a supervisory role within their company or industry.

Applied administration coursework allows students to—

- fulfill UC's general education requirements
- acquire the breadth and depth of a baccalaureate degree
- qualify for career advancement

This program is offered through a collaboration between UC Clermont College and UC Blue Ash College.

Success

The successful candidate and graduate will be analytical, detail-oriented, flexible, decisive, and have good communication skills. Good relationship skills and the ability to work well as part of a team are also important skills for success.

With the Bachelor of Applied Administration program, you will:

- Earn your bachelor's degree from the University of Cincinnati, a globally recognized leader in higher education.
- Learn more about communication, collaboration and strategic planning skills that will help you advance your career and reach your goals.
- Enroll as a junior and enjoy our online class model that combines a flexible schedule with personal attention.
- Take advantage of low tuition rates that help you save money, while preparing you to earn more in your professional career.

Career

The Bachelor of Applied Administration program helps one advance into supervisory positions, and will assist the student in understanding how organization work and succeed in today's world.

You may pursue many different jobs and careers or use your degree to advance into supervisory positions. Some of your opportunities for employment include the following fields of work:

- Medical technology
- Computer science
- Web development
- Automotive services
- Construction
- Paralegal services
- Office and business management
- Social services
- Business Analyst
- Project Supervision
- Training Specialist
- Sales Representative
- Healthcare Administration
- Program Director
- Financial Administrator
- Systems Analyst

Advising

Academic advising is an essential part of your educational experience. An institutional representative will provide insight or direction about an academic, social or personal matter. The nature of this direction might be to inform, suggest, counsel, discipline, coach, mentor, or even teach a college student how to navigate university systems to be successful.

We are committed to providing advice and assistance throughout your academic journey. As a result, you will be assigned a Program Advisor as well as a Program Retention Specialist. These individuals will work with you to create an academic plan based on your own personal and educational goals.

Admission Requirements

Admission to the Bachelor of Applied Administration program is open to all students who hold an associate degree or have 60 semester hours from a regionally accredited institution. The curriculum allows students to complete any general education requirements not completed previously.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Applied Administration : Online

BTAS

2025-2026 Applied Administration: Online

Duration: 4 Years
★Minimum Credits: 120 Credits

In order to complete program requirements, students will be expected to complete First Semester courses, then in the next 3 semesters follow the semester plan that aligns with their begin term and continues with the academic calendar. Students are required to complete 60 credit hours of degree applicable credit in order to obtain this degree.

First Semester
These courses will be offered every semester.

Course	Title/Desc	Credit
AIS3001	Mid-Collegiate Experience/Bridging Module	3
AIS3010	Team Building	3
AIS3036	Financial Information for Managers	3
AIS4075	Diversity in Professional Settings	3

Spring Semesters (These courses are offered one time per year in this designated semester)

Course	Title/Desc	Credit
AIS3070	Applied Professional Writing	3
AIS3090	Applied Data Analytics	3
	AIS3035 Media Assets and the Law OR General Education course as required by program.	3
	AIS4001 Tech Promises and Perils OR General Education course as required by program.	3

Summer Semesters (These courses are offered one time per year in this designated semester)

Course	Title/Desc	Credit
AIS4032	Interpersonal Connections in the Workplace	3
AIS4045	Applied Employee Supervision	3
AIS4052	Applied Media Methods	3
	AIS4085 Global Challenges for the 21st Century OR General Education course as required by program.	3

Fall Semesters (These courses are offered one time per year in this designated semester)

Course	Title/Desc	Credit
AIS3026C	Applied Technology for Personal and Professional Productivity	3
AIS3050	Law and Ethics in Professional Settings	3
AIS4018	Public Images of Organizations	3
	AIS4070 Public and Non-Profit Administration OR General Education course as required by program.	3

Final Semester
These courses will be offered every semester beginning Fall 2021

Course	Title/Desc	Credit
AIS3075	Applied Human Resource Practices	3
AIS4012	Trends in Communication Technology	3
AIS4099	Senior Capstone	3
	AIS4063 Persuasive Applications OR General Education course as required by program.	3

Applied Administration Advising Notice:
Students will select 15 credit hours of AIS Electives AFTER verifying all General Education components are satisfied. General education requirements consist of English Composition, Quantitative Reasoning, Breadth of Knowledge Requirements (BoK). As determined by your Academic Advisor, required GEN ED courses can replace up to 15 hours of AIS Electives. Seek an Academic Advisors assistance to avoid confusion.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Animation

Duration: 1 Year Total Credits: 33 Award: Certificate

Overview

The One-Year Certificate program in Animation provides comprehensive training at the basic level for computer animation techniques including traditional principles of animation and motion graphics for film and video applications. The certificate program may be pursued as a stand-alone One-Year Certificate program, or may be undertaken as a minor in conjunction with a baccalaureate degree with prior approval. This certificate may be combined with the Associate of Applied Science or Professional Certificate in Applied Media Communications for an enhanced set of professional credentials upon completion of the program. Students interested in this option must consult with academic and financial aid advisors to determine a plan for dual completion.

The program includes an overview of the history of animation, survey of the technical fundamentals of animation, and a wide range of other production techniques for animation, such as character animation. Both 2-D and 3-D animation using digital hardware and software are examined in detail for both video and the Web. The use of animated motion for film and video titles, special effects, and other graphics application are also explored, along with the basic methodologies for producing such works. All program students have the opportunity to design and manage a significant animation project as they develop an animation portfolio.

Upon completion of this program the student will receive a certificate from the University of Cincinnati documenting the accomplishment. This credential is not the same as, and should not be confused with, the associate degree offered by our department.

Success

Students who succeed in the animation program are creative thinkers who have an interest in production and digital technologies. They approach assignments and productions in a creative manner to satisfy an instructor's or client's vision. They apply their creative energy and academic knowledge to develop solutions. They are team players who are willing to work hard and are able meet deadlines.

Career

Graduates of this major pursue careers in a variety of professional settings. These include advertising, audio recording, graphic design and media, photography, print and publishing, television and video production, and web development. Job titles include:

- Animator
- Game artist
- Game developer
- Media designer
- Motion graphic artist
- Storyboard developer
- 3-D animator
- 3-D modeler
- 3-D texture artist

Minoring

This one-year certificate program may be used as a minor at UC, provided it is approved by the academic advisor for the degree program in which the student is matriculated. Courses in the animation program are only offered once each year. Therefore, prerequisite courses for two course sequences are only available in the fall semester.

nicole.trimble@uc.edu, 513-558-9475, Muntz 253K

UC Advantages And Special Opportunities

Students enrolled in Applied Media Communications courses enjoy small classes and interaction with faculty and professional staff. In some classes students will work on actual projects for clients in the community. We offer recommendation on our website for computer hardware and software resources required to complete student production activities within the curriculum.

Labs and other facilities

There is student access to computer resources at the University of Cincinnati Blue Ash College (UCBA), including the computer concourse (M112) with Macintosh and Windows computers. There are open lab hours for students that are posted on the UCBA Technology Resources website. The UCBA Library (M113) has a limited number of Mac and PC laptops that may be borrowed and used on campus. Check with the library for details of the loans.

Media Communications & Technology maintains three studio/lab/production studio spaces available for student use to complete academic assignments. The studio/lab facilities are scheduled for both open lab and through individual reservations for student use. The schedule varies by term and the open hours are posted outside the labs and on the department website. The equipment available in the labs also varies per term and courses taught.

A wide range of specialized media production equipment is available specifically for program students. These resources include: professional audio recorders; microphones and headphones; digital audio workstations; DSLR still/video cameras and accessories; video cameras; tripods and dollies; lighting kits; and many other items.

UCTV

Media Communications & Technology also operates UCTV providing online steaming and on demand video services. UCTV is available on campus cable system and our programming is available via cable access channels throughout Cincinnati and Northern Kentucky. We have a full television studio and control room where our shows are produced.

Special Programs

Performance Package Certificate Programs

Media Communications & Technology offers a number of performance package certificate programs to help students upgrade skills and knowledge to become more marketable professionals and more valuable employees. Each performance package certificate consists of three courses that build production or critical skills in a particular discipline. Students can typically complete one of these Performance Packages in a single year. Applied Media Communications program students can complete one or more of the Performance Package programs as they complete the required courses for the associate of applied science degree, professional certificate, or one-year certificate program.

Students successfully completing all of the courses in a performance package, earning a grade of C or better in each course, receive a certificate of achievement. Students will receive the certificate upon approval of the application form, and may complete any number of the certificate packages.

For more information contact:
Roo Hedrick, Program Coordinator & Production Manager, roo.hedrick@uc.edu, phone: 513-558-8300.

Admission Requirements

Open Admission

This program is open to all students with the desire to succeed in college, a high school diploma or GED, and SAT or ACT test scores. Although admission is open, students accepted into the program must meet the academic standards found in the Department Program Requirements in order to advance to upper levels of study. These Program Requirements are available on the department website.

Transferring To UC

Transferring to UC Blue Ash College

A student wishing to transfer to UC Blue Ash College from another accredited college or university should be guided by the following statement of policy:

1. Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed

after the student's file is complete.
2. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons.
3. Only grades of C or better are accepted. Special exceptions may be granted at the discretion of Enrollment Services in consultation with program directors or department chairpersons.
4. There is a 10-year expiration limit for acceptance of transfer credits. Exceptions can be made by Enrollment Services in consultation with the appropriate program directors or department chairpersons.
5. For all situations not covered by the above, the decision will be referred to the department involved when appropriate.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at UC Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

A grade of C- or better must be earned in all Applied Media Communications courses that serve as prerequisite requirements, or as capstone experiences, to be eligible to graduate from the program.

Application Deadlines

The Associate of Applied Science degree and the Professional Certificate in Applied Media Communications are designed to be completed in two years, provided students are full-time and do not need prep courses in English and Math. The One-Year Certificate programs are designed to be completed in one year, provided students are full-time and do not need prep courses in English. To successfully complete these academic programs in two years (AAS and Professional Certificate) or one year (Animation, Interactive Web Multimedia, and Media Criticism & Journalism), students must begin in the fall semester. Beginning in any other term than Fall semester may require additional semesters to complete the program and may also affect financial aid.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Computed Tomography

Online

Duration: **0.5 Year** Award: **Certificate**

Overview

The online Computed Tomography (CT) Certificate program is designed to prepare graduates for eligibility to apply for the post-primary certification examination in CT offered by the American Registry of Radiologic Technologists. 100% of the didactic portion of the program is offered online.

Students are only admitted to the program in fall semester so please apply by the July 1 deadline! The curriculum is designed to be completed in two semesters (one year) but students may spread it over two years if they choose.

Students may also apply all CT course credits toward the Bachelor's Degree program in Radiation Science Technology which is also 100% online. For more information on this degree please visit the program webpage.

Success

In order for students to be successful in this program they must have the personal skill set to meet deadlines, communicate effectively, and perform basic computer functions. This program requires independent learning with the faculty member as a facilitator of learning. Students must also obtain their own clinical site and clinical preceptor.

Career

This program is designed to enhance the career for the radiologic technologist, radiation therapist, or nuclear medicine technologist.

Majoring

Students can earn a certificate of completion for the CT courses or complete the courses as part of the bachelor's degree program in Radiation Science Technology. See the academic advisor for details.

Curriculum

The five CT courses (14 credit hours) have been created with the ARRT CT certification exam Content Specifications in mind in an effort to prepare graduates for this exam.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Advising

Students should contact Professor Julie Gill at julia.gill@uc.edu for an advising appointment or to ask questions about the CT Certificate program or the Radiation Science Technology Bachelor's degree program. Both of these programs are online.

UC Advantages And Special Opportunities

You can earn a degree from the University of Cincinnati and never have to come to campus!

Admission Requirements

To be admitted to the CT certificate program, applicants must demonstrate certification as a radiographer, radiation therapist, or nuclear medicine technologist with the American Registry of Radiologic Technologists. Nuclear medicine technologists may also be certified by the Nuclear Medicine Technologist Certification Board. Applicants must also provide certified transcripts documenting the completion of an associate of applied science (AAS) degree with a minimum final grade point average of 2.5.

Transferring To UC

Please visit the UC Blue Ash Admissions webpage for more information on applying as a transfer student.

Graduation Requirements

In order to graduate, students must successfully complete all CT courses with a grade of C or better and a minimum UC grade point average (GPA) of 2.5.

Application Deadlines

The application deadline for fall semester is July 1st. The CT certificate program only admits students to begin in fall semester. Students may begin the Bachelor of Radiation Science Technology online program any semester.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Expanded Functions Dental Auxiliary

Duration: **1 Year** Total Credits: **10** Award: **Certificate**

Overview

The Expanded Function Dental Auxiliary (EFDA) Certificate Program is made up of online and face-to-face instruction with hands-on pre-clinical laboratory sessions and off-site practicum experiences. Students will use typodonts/patient simulation for learning instrumentation and proper manipulation of dental materials for restorations.

Students will develop self-evaluation skills, an understanding of the Ohio State Dental Board Rules and Laws as they pertain to an EFDA, as well as professionalism and ethics in dentistry. At the completion of the program, students will be eligible to sit for the EFDA board examination to become a fully registered EFDA in the state of Ohio.

Success

This program is designed for dental professionals that have experience in dentistry. Students will be successful in this program when they are self-driven, take the initiative to seek out help when needed, communicate effectively, openly accept constructive feedback, apply critical thinking, problem solving skills and demonstrate a desire to learn.

Career

In Ohio, an EFDA is a dental auxiliary who is allowed by the Ohio State Dental Board to preform advanced remediable intro-oral and extra-oral tasks and/or procedures involved in the art or placement of preventative or restorative materials limited to the following: application of pit and fissure sealants; amalgam restorative materials: and non-metallic restorative materials, including direct-bonded restorative materials under the direct supervision of a licensed dentist. This program will provide quality hands-on and didactic instruction in restorative dentistry as it pertains to EFDAs in Ohio, and will prepare graduates for the state certification examination.

Please see the EFDA Program website for eligibility requirements which includes previous dental experience. Due to individual state requirements, there is no national data available specific to EFDAs, however here is information regarding some relevant career paths in dentistry.

Curriculum

Classes for this certificate meet either online or weekly on Fridays during each semester. EFDA Clinical Practicum Schedules will be determined between the Practicum site and the student.

Current Student Degree Audit | Transfer Student Course Equivalencies | Search UC Schedule of Classes

Major Map Versions:
Expanded Functions Dental Auxiliary

Advising

For academic advising, contact the EFDA Program Director, Heather Ferris, at ferrishr@ucmail.uc.edu

UC Advantages And Special Opportunities

The Community Dental Day is a special one-day event that occurs annually with free exams and dental services. The goal of this event is to provide one free dental care service for adults who do not have access, or cannot afford dental care. Students in this program will have the opportunity to participate in Community Dental Day.

Admission Requirements

Due to high demand, program difficulty and other specialized needs, the EFDA program uses a selective program admission process. Applicants need to apply to the University of Cincinnati as a Pre-Health Professions student prior to starting the Selective Admissions application. The **Selective Admissions** application for this program will open the first business day in March and close the last business day in April. *Please note: all application requirements must be uploaded by this date in order to be considered for the program, no exceptions.*

EFDA Selective Admissions Minimum Criteria:

Please see the EFDA program's selective admissions criteria on the EFDA website

---

Important Admissions Information:

- First apply and confirm as a Pre-Health Professions student to the University of Cincinnati in order to be considered for the EFDA Selective Admission Process.

Eligible Candidates:

Please see EFDA program candidate eligibility on the EFDA website

**Please note: For international student requirements, contact the Enrollment Services Office*

Other specific applicant requirements include:

- Color discrimination (differentiation of various shades of color and gradations from black to white);
- Manual dexterity/motor coordination (discern changes in surface textures by manipulating dental instruments, control exertion of hand/finger pressure);
- Eye-hand coordination (transfer of visual input into motor output);
- Physical communications (perceive sound through telephone, hear commands through operator's face mask, hear oral communication from patients);
- Visual acuity (identify the working ends of various dental instruments and implements at a 2 foot distance);
- Form/spatial ability (view in 3 dimensional relationships, distinguish subtle changes from one form or shape to another, discriminate intricate measurements);
- Language development (communicate clearly so that patient understands his/her dental/oral condition).

International Student Requirements

It is highly recommended that international students contact the UC International Office prior to applying for this program.

Students who have not graduated from a U.S. or English speaking high school must complete the English Proficiency Requirements with the designated score, as listed below. With the following exceptions:

1. Student has taken a full year of High School in the United States and earned a passing grade in one year of Standard English (not ESL).
2. Student has earned a passing score on the O-Level English Exam.
3. Student has passed the first year of IB English (SL or HL) with a score of 5 or higher.
4. Student has attended a full year of school in a country in which has been deemed as English proficient.

High Intermediate Ranges on Examination(s) - for students that do not meet one of the Four Bulleted Exceptions above.

TOEFL

- Overall: 72
- Speaking sub-score: 20
- Listening sub-score: 17

IELTS

- Overall: 6.0
- Speaking sub-score: 6.5
- Listening sub-score: 5.5

PTE

- Overall: 50 (concords to 72 on the TOEFL)
- CEFR level B2 (easiest)=51-58
- CEFR level B2=59-75

Cambridge Assessment

- English 175
- IELTS 6.0 = 169-175

- IELTS 6.5 = 176-184
- CEFR level: B2 =160-179

Duolingo English Test (DET)

- Overall: 95
- Production sub-score: 112
- Conversation sub-score: 88

Graduation Requirements

In order to graduate students must complete all program courses with a final grade of C or above. Graduation does not guarantee registration as an EFDA with the Ohio State Dental Board. The University of Cincinnati requires a minimum cumulative GPA of a 2.0 to graduate.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Interactive Web Multimedia

Duration: 1 Year Total Credits: 33 Award: Certificate

Overview

This One-Year Certificate program focuses on creating interactive multimedia applications and environments for contemporary methods of on-line distribution. The certificate program may be pursued as a stand-alone One-Year Certificate program, or may be undertaken as a minor in conjunction with a baccalaureate degree with prior approval. This certificate may be combined with the Associate of Applied Science or Professional Certificate in Applied Media Communications for an enhanced set of professional credentials upon completion of the program. Students interested in this option must consult with academic and financial aid advisors to determine a plan for dual completion.

The program provides a strong technical foundation in multimedia design principles, interactive flowcharting, storyboarding, narrative structure development, digital imaging, motion graphics, and editing of digital video and audio. There is an emphasis on the aesthetic and functional uses of interactivity, linear and nonlinear storytelling, and technical control over software and development processes. All program students have the opportunity to design and manage a significant interactive web project as they develop a portfolio.

Upon completion of this program the student will receive a certificate from the University of Cincinnati documenting the accomplishment. This credential is not the same as, and should not be confused with, the associate degree offered by our department.

Success

Students who succeed in the interactive web multimedia program are creative thinkers who have an interest in production and digital technologies. They approach assignments and productions in a creative manner to satisfy an instructor's or client's vision. They apply their creative energy and academic knowledge to develop solutions. They are team players who are willing to work hard and are able to meet deadlines.

Career

Graduates of this major pursue careers in a variety of professional settings. These include advertising, audio recording, graphic design and media, photography, print and publishing, television and video production, and web development. Job titles include:

- Game developer
- Game artist
- Interactive designer
- Media producer
- Motion graphic artist
- Multimedia developer
- Web designer
- Web developer

Minoring

This One-Year Certificate program may be used as a minor at UC, provided it is approved by the academic advisor for the degree program in which the student is matriculated. Courses in the interactive web multimedia program are only offered once each year. Therefore, prerequisite courses for two course sequences are only available in the fall semester.

UC Advantages And Special Opportunities

Students enrolled in Applied Media Communications courses enjoy small classes and interaction with faculty and professional staff. In some classes students will work on actual projects for clients in the community. We offer recommendation on our website for computer hardware and software resources required to complete student production activities within the curriculum.

Labs and other facilities

There is student access to computer resources at the University of Cincinnati Blue Ash College (UCBA), including the computer concourse (M112) with Macintosh and Windows computers. There are open lab hours for students that are posted on the UCBA Technology Resources website. The UCBA Library (M113) has a limited number of Mac and PC laptops that may be borrowed and used on campus. Check with the library for details of the loans.

Media Communications & Technology maintains three studio/lab/production studio spaces available for student use to complete academic assignments. The studio/lab facilities are scheduled for both open lab and through individual reservations for student use. The schedule varies by term and the open hours are posted outside the labs and on the department website. The equipment available in the labs also varies per term and courses taught.

A wide range of specialized media production equipment is available specifically for program students. These resources include: professional audio recorders; microphones and headphones; digital audio workstations; DSLR still/video cameras and accessories; video cameras; tripods and dollies; lighting kits; and many other items.

UCTV

Media Communications & Technology also operates UCTV providing online steaming and on demand video services. UCTV is available on campus cable system and our programming is available via cable access channels throughout Cincinnati and Northern Kentucky. We have a full television studio and control room where our shows are produced.

Special Programs

Performance Package Certificate Programs

Media Communications & Technology offers a number of performance package certificate programs to help students upgrade skills and knowledge to become more marketable professionals and more valuable employees. Each performance package certificate consists of three courses that build production or critical skills in a particular discipline. Students can typically complete one of these Performance Packages in a single year. Applied Media Communications program students can complete one or more of the Performance Package programs as they complete the required courses for the associate of applied science degree, professional certificate, or one-year certificate program.

Students successfully completing all of the courses in a performance package, earning a grade of C or better in each course, receive a certificate of achievement. Students will receive the certificate upon approval of the application form, and may complete any number of the certificate packages.

For more information contact:
Roo Hedrick, Program Coordinator & Production Manager, phone: 513-558-8300, roo.hedrick@uc.edu.

Admission Requirements

Open Admission

This program is open to all students with the desire to succeed in college, a high school diploma or GED, and SAT or ACT test scores. Although admission is open, students accepted into the program must meet the academic standards found in the Department Program Requirements in order to advance to upper levels of study. These Program Requirements are available on the department website.

Transferring To UC

Transferring to UC Blue Ash College

A student wishing to transfer to UC Blue Ash College from another accredited college or university should be guided by the following statement of policy:

1. Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.
2. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons.
3. Only grades of C or better are accepted. Special exceptions may be granted at the discretion of Enrollment Services in consultation with program directors or department chairpersons.

4. There is a 10-year expiration limit for acceptance of transfer credits. Exceptions can be made by Enrollment Services in consultation with the appropriate program directors or department chairpersons.
5. For all situations not covered by the above, the decision will be referred to the department involved when appropriate.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at UC Blue Ash College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

A grade of C- or better must be earned in all Applied Media Communicationa courses that serve as prerequisite requirements, or as capstone experiences, to be eligible to graduate from the program.

Application Deadlines

The Associate of Applied Science degree and the Professional Certificate in Applied Media Communications are designed to be completed in two years, provided students are full-time and do not need prep courses in English and Math. The One-Year Certificate programs are designed to be completed in one year, provided students are full-time and do not need prep courses in English. To successfully complete these academic programs in two years (AAS and Professional Certificate) or one year (Animation, Interactive Web Multimedia, and Media Criticism & Journalism), students must begin in the fall semester. Beginning in any other term than Fall semester may require additional semesters to complete the program and may also affect financial aid.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Mammography

Online

Duration: 1 Year Award: Certificate

Overview

The online Mammography Certificate program is designed to prepare graduates for eligibility to apply for the post-primary certification examination in mammography offered by the American Registry of Radiologic Technologists. It is also designed to meet or exceed requirements set forth in the Mammography Quality Standards Act (MQSA) for minimum didactic and clinical standards for mammographers. 100% of the didactic portion of the program is online.

Students are only admitted to the program in fall semester so please apply by the July 1 deadline! The curriculum is designed to be completed in two semesters (one year) but students may spread it over two years if they choose.

Students may also apply all mammography course credits toward the Bachelor's Degree program in Radiation Science Technology which is also 100% online. For more information on this degree please visit the program webpage.

Success

In order for students to be successful in this program they must have the personal skill set to meet deadlines, communicate effectively, and perform basic computer functions. This program requires independent learning with the faculty member as a facilitator of learning. Students must also obtain their own clinical site and clinical preceptor.

Career

This program is designed to prepare the radiologic technologist for a career as a mammographer.

Majoring

Students can earn a certificate of completion for the mammography courses or complete the courses as part of the bachelor's degree program in Radiation Science Technology. See the academic advisor for details.

Curriculum

The four mammography courses (7 credit hours) have been created with the ARRT mammography certification exam Content Specifications in mind in an effort to prepare graduates for this exam.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Advising

Students should contact Professor Julie Gill at julia.gill@uc.edu for an advising appointment or to ask questions about the Mammography Certificate program or the Radiation Science Technology Bachelor's degree program. Both of these programs are online.

UC Advantages And Special Opportunities

You can earn a degree from the University of Cincinnati and never have to come to campus!

Admission Requirements

To be admitted to the Mammography certificate program, applicants must demonstrate certification as a radiographer with the American Registry of Radiologic Technologists. Applicants must also provide certified transcripts documenting the completion of an associate of applied science (AAS) degree with a minimum final grade point average of 2.5.

Transferring To UC

Please visit the UC Blue Ash Admissions webpage for more information on applying as a transfer student.

Graduation Requirements

In order to graduate, students must successfully complete all mammography courses with a grade of C or better and a minimum UC grade point average (GPA) of 2.5.

Application Deadlines

The application deadline for fall semester is July 1st. The Mammography program only admits students to begin in fall semester.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Media Criticism and Journalism

Duration: **1 Year** Total Credits: **33** Award: **Certificate**

Overview

This One-Year Certificate program provides practical study in media research, criticism, and professional writing on media-related topics. Subject areas emphasized include media history and criticism, journalistic reporting and writing, photojournalism, film and television studies, and scriptwriting. The writing skills gained through completion of this program will also enhance the abilities of any transfer major, particularly those interested in art, design, communications, education, or broadcasting. All program students have the opportunity to develop a substantial and varied writing portfolio. The Media Criticism and Journalism certificate is offered on-line.

The certificate program may be pursued as a stand-alone One-Year Certificate program, or may be undertaken as a minor in conjunction with a baccalaureate degree with prior approval. This certificate may be combined with the Associate of Applied Science or Professional Certificate in Applied Media Communications for an enhanced set of professional credentials upon completion of the program. Students interested in this option must consult with academic and financial aid advisors to determine a plan for dual completion.

Upon completion of this program the student will receive a certificate from the University of Cincinnati documenting the accomplishment. This credential is not the same as, and should not be confused with, the associate degree offered by our department.

Success

Students who succeed in the media criticism and journalism program are creative thinkers who have an interest in reporting, storytelling, and writing. They approach assignments in a creative manner to satisfy an instructor's or editor's vision. They apply their creative energy, academic knowledge of media, and writing skills to develop the written word for a number of different applications or audiences. They are willing to work hard and are able to meet deadlines.

Career

Graduates of this major pursue careers in a variety of professional settings. These include advertising, audio recording, graphic design and media, photography, print and publishing, television and video production, and web development. Job titles include:

- Copy writer
- Film or media critic
- Image researcher
- Journalist
- Media reviewer
- Media researcher
- Photojournalist
- Photographer
- Scriptwriter

Minoring

This one-year certificate program may be used as a minor at UC, provided it is approved by the academic advisor for the degree program in which the student is matriculated. Courses in the media criticism and journalism program are only offered once each year. Therefore, prerequisite courses for two course sequences are only available in the fall semester. This minor is offered online.

Advising

Nicole Trimble, Academic Advisor

nicole.trimble@uc.edu, 513-558-9475, Muntz 253K

UC Advantages And Special Opportunities

Students enrolled in Aqpplied Media Communications courses enjoy small classes and interaction with faculty and professional staff. In some classes students will work on actual projects for clients in the community. We offer recommendations on our website for computer hardware and software resources required to complete student production activities within the curriculum.

Labs and other facilities

There is student access to computer resources at the University of Cincinnati Blue Ash College (UCBA), including the computer concourse (M112) with Macintosh and Windows computers. There are open lab hours for students that are posted on the UCBA Technology Resources website. The UCBA Library (M113) has a limited number of Mac and PC laptops that may be borrowed and used on campus. Check with the library for details of the loans.

Media Communications & Technology maintains three studio/lab/production studio spaces available for student use to complete academic assignments. The studio/lab facilities are scheduled for both open lab and through individual reservations for student use. The schedule varies by term and the open hours are posted outside the labs and on the department website. The equipment available in the labs also varies per term and courses taught.

A wide range of specialized media production equipment is available specifically for program students. These resources include: professional audio recorders; microphones and headphones; digital audio workstations; DSLR still/video cameras and accessories; video cameras; tripods and dollies; lighting kits; and many other items.

UCTV

Media Communications & Technology also operates UCTV providing online steaming and on demand video services. Medical Assisting

Duration: 0.5 Year Total Credits: 27 - 28 Award: Certificate

Overview

The Medical Assisting Technical Certificate program is unique to the University of Cincinnati. In just two semesters, the Medical Assisting Technical Certificate program allows the student an opportunity to complete a technical certificate program while earning college credit in a profession that is in high demand.

Completing the Medical Assisting Technical Certificate Program through the University of Cincinnati provides the graduate a quality education that is affordable and versatile.

The Medical Assisting Technical Certificate program is designed to prepare medical assistants who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession.

Students are prepared for a career as a health professional in a physician's office, clinic, or urgent care (ambulatory) setting. To meet the program objectives, the curriculum provides a rigorous foundation in clinical, patient care, and office administration courses. Clinical and patient care courses include introduction to anatomy and physiology, medical terminology, clinical techniques, laboratory procedures, and physician assisting procedures for various types of ambulatory medical settings. Administrative courses include study in medical office procedures, computers, and oral and written communication.

Successful certificate program graduates are eligible and recommended to take a highly regarded, nationally recognized credentialing exam CMA (AAMA). The CMA (AAMA) is the gold standard of the profession.

The faculty have many years of experience in the medical field and in the educational process. The program curriculum is up to date on the educational needs of the medical assistant and reflects current industry standards.

Success

The Medical Assisting Technical Certificate program curriculum stresses professionalism, dependability, flexibility, medical ethics, communication, and human relations skills.

Successful students will be those who communicate effectively, openly accept critical feedback, apply critical thinking and problem-solving skills and demonstrate a genuine concern for patients.

Upon completion of the Medical Assisting Technical Certificate program, the student will have completed the following program outcomes:

- Demonstrate clinical and administrative (psychomotor, cognitive, and affective) proficiency as outlined in the current Medical Assisting Education Review Board (MAERB) Standards and Guidelines provided by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) and the MAERB.
- Communicate appropriately and in a professional manner with patients, providers, staff, and other members of the healthcare team and community.
- Protect the health of the patient and coworkers by carefully following Standard Precaution Guidelines and OSHA mandates and adhere to HIPAA Regulations.
- Participate in patient care within their medical assistant scope of training.
- Successfully meet the eligibility criteria to apply for the national certification process through the American Association of Medical Assistants (AAMA).

Career

Graduates will have completed 160 hours of hands-on clinical practice in a medical setting under the direct supervision of a physician and are qualified to assist physicians in a private office, clinic or other health care facility. Medical assistants are trained in both administrative and clinical functions to provide invaluable skills to the physician's office.

According to the U.S. Bureau of Labor Statistics, "employment of medical assistants is projected to grow 23 percent from 2018 to 2028, much faster than the average of 5% for all occupations."

"The growth of the aging baby-boom population will continue to increase demand for preventive medical services, which are often provided by physicians. As a result, physicians will hire more assistants to perform routine administrative and clinical duties, allowing the physicians to see more patients."

Medical Assisting Certificate (effective fall 2025)

Advising

For academic advising, students in the Medical Assisting Technical Certificate program should contact the Program Director, Tera Archbold at archbota@ucmail.uc.edu.

Special Programs

Students of the Medical Assisting Tehcnical Certificate program at UC Blue Ash College are encouraged to be active in the American Association of Medical Assistants, the Ohio State Society of Medical Assistants and the two local chapters: the Ohio Regional Chapter and the Southwest Ohio Chapter. Students who have participated in these organizations have held state and local offices and taken an active part in the promotion of their profession by attending the annual state conference. Learn more about the advantages of the American Association of Medical Assistants and the profession at their website.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the following requirements.

- Confirmed admission to the University of Cincinnati
- Place into STAT1031 (or completion of MATH0029 with minimum grade of C)
- Place into ENGL1001 (or completion of ENGL0099 with minimum grade of C)

Students interested in the Medical Assisting Technical Certificate program should meet with their advisor to determine eligibility.

Students who are requesting accommodations are encouraged to register with Accessibility Resources to determine appropriate accommodations. You may contact the UC Blue Ash College Accessibility Resources office by calling 513-558-9414; Fax 513-792-8624, or by emailing ucbadso@ucmail.uc.edu

Graduation Requirements

Students must have a minimum cumulative GPA of 2.50 in order to graduate. Students must also complete all program courses with a final grade of C or above, fulfill the 160-hour practicum experience, and pass 100% of the Psychomotor and Affective Educational Competencies for Medical Assistants as required for CAAHEP Accredited Medical Assisting Programs based on the Medical Assisting Education Review Board (MAERB) current standards.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The University of Cincinnati Blue Ash Medical Assisting Technical Certificate program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Medical Assisting Education Review Board (MAERB).

Central Service Technician

Duration: 1 Year Total Credits: 3 Award: MC

Overview

This 3-credit hour course micro-credential meets the requirements for students to be eligible to take the Healthcare Sterile Processing Association (HSPA, formerly International Association Healthcare Central Sterile Material Management (IAHCSMM)) central service technician certification exam. This is appropriate for those who are seeking employment in areas such as ambulatory surgical centers or inpatient hospital settings.

The HSPA defines the role of a CST as: Preparing surgical instruments and devices. That means cleaning, inspecting, testing, sterilizing, storing and delivering devices needed for surgery in a healthcare facility.

Success

Students will be required to pass Central Service Technician course and be in the process of completing 400 clinical hours.

Career

The Healthcare Sterile Processing Association (HSPA) offers testing for those who have met eligibility requirements. A student who completes the micro-credential course requirements and passes the HSPA certification exam will be immediately eligible for employment. It also allows for a pathway to an associate degree in the Healthcare Support Technician program, which then further allows students to be eligible for a bachelor's degree in the BTAS - Healthcare Leadership program. Direct course credit will be applied to the HCST program.

Students for responsible for paying the examination fee.

UC Advantages And Special Opportunities

Accessibility Resources

UC Blue Ash College is committed to providing all students equal access to learning opportunities. Accessibility Resources is the official campus office that works with students who have impairments which may influence their performance in this course (learning, ADD, psychological, visual, hearing, physical, cognitive, medical condition, etc.). If you have a documented disability requiring reasonable accommodations, please contact the Office of Accessibility Resources. Muntz Hall, room 112L, Telephone: (513) 792-8625, and/or schedule an appointment via email: ucbadso@ucmail.uc.edu.

Counseling Services

UC Blue Ash College Counseling Services provides high quality integrated health, counseling, and wellness services. Counseling services are free of charge to students matriculated as UC Blue Ash College students. UC Blue Ash Counseling Services addresses a variety of student needs such as: anxiety, depression, self-esteem, family conflict, loss and grief issues, adjusting to life's challenges, relationship problems, eating disorders, physical abuse, emotional abuse, and domestic violence. An initial meeting with a counselor can be arranged by calling (513) 745-5670 or stopping by Room 140 Muntz Hall during business hours, Monday-Friday 8:00 am – 5:00 pm to schedule an appointment. If after hours or for an immediate emergency, please call CAPS (Counseling and Psychological Services - Clifton campus) using the 24 Hour Phone Consultation Line at 513-556-0648. Clifton students may call UHS at 513-556-2564 or CAPS at 513-556-0648. For urgent physician consultation after-hours students may call 513-584-7777.

Admission Requirements

A valid CPR-Provider card is required. Students will be able to register for one or more micro-credentials without academic pre-requisite. It is recommended, but not required, that the students take an Anatomy & Physiology and a Medical Terminology course.

Please note micro-credentials are not eligible for any form of financal aid assistance.

Application Deadlines

Students must achieve a grade of C or better in HCST1011C to graduate from the micro-credential.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

EKG (Electrocardiogram) Technician

Duration: 1 Year Total Credits: 3 Award: MC

Overview

This 3-credit hour Basic EKG micro-credential meets the requirements for students to be eligible to take the National Healthcareer Association (NHA) electrocardiogram (EKG) certification exam to become a Certified EKG Technician (CET). This will be appropriate for those seeking employment in areas such as cardiac monitoring or performing EKG's.

The NHA defines a CET's roles as:

- Set up and administer EKGs (electrocardiograms) and stress tests
- Prepare patients for Holter or ambulatory monitoring
- Edit and deliver final test results to physicians for analysis
- Schedule appointments
- Transcribe physicians' interpretations

Success

Successful students will be able to pass the micro-credential course of ALH1007C with a grade of C or better, and pass the NHA CET (Certified Electrocardiogram Technician) exam. Details on eligibility for taking the exam and passing the exam can be found on the NHA website.

Career

This micro-credential will prepare studens to take the National Healthcare Association (NHA) Certified Electrocardiogram Technician (CET) exam. This micro-credential will serve undergraduates as well as career ladder employees witin various health organizations in Greater Cincinnati.

A student who completes the micro-credential course requirements and passes the NHA certification exam will be immediately eligible for employment.

Patient Care Technician

Duration: 1 Year Total Credits: 2 Award: MC

Overview

This 2-credit hour course micro-credential meets the requirements for students to be eligible to take the National Healthcareer Association (NHA) Certified Patient Care Technician/Assistant (CPCT/A) exam. This will be appropriate for those who are seeking employment in areas such as hospital or long-term care facilities. It also allows for a pathway for an associate degree in the Healthcare Support Technician program, which then further allows students to be eligible for a bachelor's degree in the BTAS - Healthcare Leadership program.

The NHA defines the role of a CPCT as:

- Provide basic patient care — bathing, feeding, catheter care, etc.
- Acquire, distribute and administer patient care supplies
- Perform safety checks and ensure cleanliness in patient rooms
- Accommodate any additional patient needs
- Obtain EKG readings and monitor vital signs
- Perform phlebotomy procedures
- Provide emotional support to patients and families, particularly coping with grief and death

Success

Students will be required to pass the five domains of a combination of didactic and laboratory.. They will be asked to self-report the NHA Patient Care Technician/Assistant exam outcomes.

Successful students will be able to pass the micro-credential course HCST2001C of with a grade of C or better, and pass the NHA's CPCT/A exam.

Career

The National Health Career Association (NHA) offers testing and certification for those who have met eligibility requirements.

A student who completes the micro-credential course requirements and passes the NHA certification exam will be immediately eligible for employment.

Accountancy

Duration: **1 Year** Total Credits: **36** Award: **Certificate**

Overview

UC Blue Ash College (UCBA) offers professional certificates for students who have already earned a bachelor's degree and who wish to acquire additional skills and knowledge. Professional certificate programs generally consist of the technical portion of the college's two-year, career-oriented programs.

The professional certificate program in accountancy is designed to provide students with a general knowledge of accounting.

Success

Accounting majors need people skills, the ability to communicate well -- both verbally and in writing -- and a strong quantitative background.

Career

Accountancy students can go on to positions in business, industry, public practice, and government. Job opportunities are numerous, because accountants are needed in such a wide spectrum of organizations. Examples of the job opportunities available to you include: internal auditor, general accountant, cost accountant, government accountant, nonprofit organization accountant, and inventory control supervisor. Many students use this program as a bridge to an MS in accounting program, or as part of a plan to meet the qualifications to sit for the CPA examination. Information about qualifying for the CPA examination is available at http://acc.ohio.gov/.

Minoring

This program is the equivalent of a minor in accounting for those who have previously completed a baccalaureate degree.

Curriculum

Major Map Versions:
Accounting

Advising

Current and admitted students can locate advisor contact information via the UCBA advising website:
http://www.ucblueash.edu/academics/advising/advisor-list.html

UC Advantages And Special Opportunities

The accountancy program at UC Blue Ash College (UCBA) is designed for students who wish to explore a new career field at a campus with smaller class sizes and individual attention from well-qualified faculty. The regional campus is conveniently located and has lower fees for tuition, technology, student life, and parking.

Special Programs

The program allows for maximum flexibility, with courses offered days and evenings. Tutoring labs in study skills, writing, and math are available at no additional cost for students needing extra help.

Admission Requirements

This program is open to students who have already completed a Baccalaureate degree (any major). Additional information about admission to UCBA is available on the college's admissions web site: http://www.ucblueash.edu/admissions/index.html

Transferring To UC

UC Blue Ash College has an open admission policy (although some programs within the college are selective admissions.) Transfer students must supply official transcripts from each previously attended institution. Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Credits transferred from another institution may not fulfill specific requirements for the degree. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Changing Majors Within UC

For current UC students who wish to transfer from one UC program to another:

- Fill out an Application for Change in College and Program form (sometimes referred to as the "On-Campus Transfer Form"). This form may also be obtained from your current college office.
- Submit the completed form to the college which offers the program that you want to transition into.

Once you have submitted the form, the faculty and staff of your desired major will evaluate your academic record and communicate with you about the transition process.

International Student Requirements

International students wishing to apply to UCBA can find information at http://www.ucblueash.edu/admissions/information/international.html.

Graduation Requirements

To qualify for a degree or certificate, you must fulfill the requirements of the program from which you expect to graduate and must have at least a 2.0 cumulative grade point average. It is your responsibility to take the courses necessary for graduation and to meet the UC residency requirements.

You must complete an Online Degree Application, usually the semester before you expect to graduate. You should see your advisor for specific information well in advance of your final semester.

Application Deadlines

UC Blue Ash College operates on a rolling admissions policy. This means you can begin taking courses at the start of any term, not just fall. Application deadlines for each term are available on the UCBA Admissions web site:
http://www.ucblueash.edu/admissions/steps.html

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Applied Media Communications

Duration: **1.5 Years** Total Credits: **36** Award: **Certificate**

Overview

Beginning with their first semester, students in Applied Media Communications are immersed in an active learning environment. Hands-on courses in audio, interactive and media design, photography, video, and web development engage students in industry-standard software and equipment to make professional-level work in each discipline. Courses in aesthetics, media history, and professional practice teach students how to apply their technical skills to visual problem-solving, preparing them for successful careers in our ever-changing media environment.

In addition to the core curriculum, which is delivered through small-sized classes, students take advanced courses to deepen expertise in one of these fields or to extend their knowledge into other disciplines and new technologies.

Our aim is to provide creative individuals with opportunities to learn, hone, and evolve the technical processes of digital media production. Our graduates enter a highly-competitive job market having already gained practical production experience through the completion of individual and group studio projects; campus media productions; professional internships; graduation capstones; and work for real-world clients.

All students entering the following Media Communications and Technology programs – Associate of Applied Science Degree in Applied Media Communication, Professional Certificate in Applied Media Communication and Media Criticism and Journalism One-Year Certificate

- Laptop Requirement
- DSLR Camera Requirements

Where It Will Take You

Our most successful students are intrigued by technology, have a DIY attitude, enjoy experimenting with gear and software, and are effective problem-solvers. They are comfortable working in teams to develop projects and tell stories. Our outstanding students combine creativity and visual design, while using organizational and planning skills to meet deadlines.

Success

Advising

Students can locate advisor contact information for Applied Media Communications via the UCBA advising website.

UC Advantages And Special Opportunities

Students enrolled in Applied Media Communications courses enjoy small classes and interaction with faculty and professional staff. In some classes students will work on actual projects for clients in the community. We offer recommendations on our website for computer hardware and software resources required to complete student production activities within the curriculum. UCBA tuition is considerably lower than tuition for colleges on the UC Uptown campus, making education more affordable.

Special Programs

Lab and Studio Facilities

Media Communications & Technology maintains three studio/lab spaces available for student use to complete project assignments. The studio/lab facilities are scheduled for open labs and can be reserved for individual student use. The schedule varies by term and the open hours are posted outside the labs, as well as on the department website (hyperlink). While equipment available in the labs varies per term and courses taught, permanent resources include: an animation workstation, audio recording booth, editing booths, green screens, lighting equipment, seamless photographic backgrounds, and a studio control room.

Circulating Equipment

A wide range of specialized media production equipment is available specifically for use by program students. These resources include: professional audio equipment, such as field recorders, microphones, microphone supports, and headphones; DSLR still/video cameras and accessories; video cameras; tripods and dollies; specialized camera supports, such as Steadicam and sliders; lighting kits and reflectors; and many other items.

UCTV

Media Communications & Technology also operates UCTV providing online streaming and on-demand video services. UCTV programming is available via cable access channels throughout Cincinnati and Northern Kentucky. We have a full television studio and control room where our shows are produced.

Baccalaureate Transition Agreements

Even though we are a career-oriented technical program, rather than a transfer program, many of our graduates choose to continue their education in one of the following baccalaureate programs with whom we have negotiated agreements. These include:

- BFA in Electronic Media (UC College-Conservatory of Music)
- BFA in Fine Arts (UC College of Design, Architecture, Art, and Planning)
- BA in Film and Media Studies (UC College of Arts and Sciences)
- BTAS in Applied Administration (UC Blue Ash College)
- BIS in Digital Media Collaboration (UC College of Arts and Sciences)

Other Special Programs

One-Year Certificate Programs

Students who have completed the AAS degree program may also pursue one of the One-Year Certificate programs available in our department for focused training in a specific technical skill and an enhanced set of professional credentials. These include: Animation, Interactive Web Multimedia, and Media Criticism and Journalism (hyperlinks to each). Each certificate/minor requires 27-30 credit hours.

Our One-Year Certificate programs may be used as minors for baccalaureate degrees in other disciplines at the University of Cincinnati.

Performance Package Certificate Programs.

Media Communications & Technology offers a number of Performance Package Certificate programs to help students upgrade skills and knowledge to become more marketable professionals and more valuable employees. Each Performance Package Certificate consists of three courses that build production or critical skills in a particular discipline.

Performance Packages are available in:

- Animation Design
- Audio Production
- Electronic Design
- Film Studies
- Interactive Design
- Media History
- Media Journalism
- Photo Production
- Video Production
- Web Production

Students can typically complete one of these Performance Packages in a single year. Applied Media Communications' program students can complete one or more of the Performance Package programs as they complete the required courses for the Associate of Applied Science degree, Professional Certificate, or One-Year Certificate program.

For more information contact:
Roo Hedrick, Program Coordinator & Production Manager, phone: 513-558-8300, roo.hedrick@uc.edu.

Admission Requirements

Open Admission

This program is designed for students with a baccalaureate degree and contains only the courses in the Applied Media Communications major with the assumption that students with a bachelor's degree have already completed the required general educations and/or breath of knowledge coursework.

Graduation Requirements

Students must earn a 2.0 grade point average in order to be eligible for graduation from the program. A grade of C- or better must be earned in all Applied Media Communications courses that serve as prerequisite requirements, or as capstone experiences, to be eligible to graduate from the program.

Application Deadlines

The Associate of Applied Science degree and the Professional Certificate in Applied Media Communications are designed to be completed in two years, provided students are full-time and do not need prep courses in English and Math. The One-Year Certificate programs are designed to be completed in one year, provided students are full-time and do not need prep courses in English. To successfully complete these academic programs in two years (AAS and Professional Certificate) or one year (Animation, Interactive Web Multimedia, and Media Criticism & Journalism), students must begin in the fall semester. Beginning in any other term than Fall semester may require additional semesters to complete the program and may also affect financial aid.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Deaf Studies

Duration: **2 Years** Total Credits: **24** Award: **Certificate**

Overview

The deaf studies professional certificate program at UC Blue Ash College (UCBA) is designed to provide an understanding of deaf culture and American Sign Language to students who have previously completed a baccalaureate degree. The structure of this certificate program allows the student to acquire basic American Sign Language skills and focus on the heritage and culture of the deaf community in Cincinnati and across the nation.

Success

American Sign Language courses are all offered as day and as evening classes. The four content courses are offered as hybrid courses with most work done online and limited weekend meetings or as evening/weekend courses. If a student has no previous American Sign Language training, the certificate will take two years of part-time study, taking two courses per semester.

The successful student is self-motivated, outgoing, and has an interest in understanding and working with the deaf community, its heritage, and resources. Students must also be interested in developing their ability to communicate with others using American Sign language and learning the linguistics of the language, and must have strong English written communication skills .

Career

This professional certificate program is open to all students with a baccalaureate degree and an interest in American Sign Language and deaf studies. The certificate can provide additional training needed for a current career or prepare students for a variety of new careers, and may allow students to enter an interpreting program with knowledge of deaf culture and American Sign Language. Students will build American Sign Language skills, obtain knowledge about the heritage and culture of the deaf community, expand their ability to work in fields such as education, rehabilitation, social work, law, nursing and other health professions, and psychology, as well as meet the needs of deaf individuals in schools, the workplace and the community. Students will have sufficient American Sign Language proficiency upon completion of this certificate to enter an interpreting program to be able to work as an interpreter.

Minoring

This program is the equivalent of a minor in deaf studies for those who have previously completed any baccalaureate degree.

Curriculum

Year 1: Fall Semester	**Year 1: Spring Semester**
Beginning American Sign Language I ASL 1001, 3 cr.	Beginning American Sign Language II ASL 1002, 3 cr.
Orientation to Deafness ASL 1003, 3 cr.	Psychosocial Aspects of Deafness ASL 1004, 3 cr.
Year 1 Fall semester credits: 6	**Year 1 Spring semester credits: 6**
Year 2: Fall Semester	**Year 2: Spring Semester**
Intermediate American Sign Language I 2001, 3 cr.	Intermediate American Sign Language II 2002, 3 cr.
History of Deaf Heritage ASL 2003, 3 cr.	Legal Issues of Deafness ASL 2004, 3 cr.
Year 2 Fall semester credits: 6	**Year 2 Spring semester credits: 6**
	Total Credits: 24

UC Advantages And Special Opportunities

The deaf studies certificate can be earned entirely through online/hybrid and evening courses.

UC Blue Ash is a regional campus of the University of Cincinnati that is conveniently located. UCBA offers low fees for tuition, technology, student life and parking.

Special Programs

Small classes and personal attention make UC Blue Ash College an excellent choice for furthering your education.

UCBA is conveniently located in suburban Blue Ash and offers a variety of day, evening and weekend classes, as well as distance learning and hybrid courses.

Admission Requirements

This professional certificate is for students who have completed a baccalaureate degree in any major. All students interested in the deaf studies certificate must submit an application to the program advisor (see above).

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons. Application of transfer credit to the student's program is at the discretion of the appropriate program director or department chairperson.

At least one-half of the required course work in this certificate program must be taken at UCBA to qualify for graduation.

Transferring To UC

As part of the application to the certificate program, students need to submit a copy of their transcript indicating completion of a baccalaureate degree in any major. Contact the program advisor for other required application materials.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons. Application of transfer credit to the student's program is at the discretion of the appropriate program director or department chairperson.

Transfer students must take at least one-half of the required course work in this certificate program at UCBA to qualify for graduation.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers. Transfer students must take at least one-half of the required course work in a selected program at UCBA to qualify for graduation.

International Student Requirements

There are no additional requirements for international students.

Graduation Requirements

Students need to earn no lower than a C in all required courses, and have a final grade point average at UCBA of at least 2.5.

In order to graduate, you must complete an application for degree or certificate, usually the semester before you expect to complete the program. You should see your advisor for specific information well in advance of your final term.

Application Deadlines

There are no application deadlines. Students may apply to this program during any semester.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Exploratory

Duration: **2 Years** Total Credits: **30**

Overview

The Exploratory Studies (EXPL) program is designed for students who come to college not yet prepared to declare a specific major. Faculty teaching in the program help new students to adjust to the first year of college life and to begin the academic planning process. The program introduces this process by exploring students' interests and researching possible majors and careers. EXPL uses an interactive curriculum to engage students in the process of discovering their academic strengths and interests and match those to an appropriate major. Trained advisors offer curricular planning, major selection and general assistance to ensure that students are successful.

Success

Students should be flexible, willing to try new things, and value learning for its own sake. They should also enjoy introspection and self-discovery.

Career

This is not a degree granting program. Career possibilities are different for each individual and will depend on degree choice.

For some fields of work, such as nursing or engineering, a specific major is essential. However, for many people, the most important factor is simply the education they attain while completing a degree. Employers value the critical thinking, effective communication, social responsibility and problem-solving skills that students will learn from earning their degrees.

UC Clermont College offers many quality degree programs with a broad range of majors that students can transition into — to follow the career path they choose.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications that allow students to begin any semester, provided their transcripts arrive in time to be evaluated before the start of the semester they wish to attend.

Students who have not taken college-level math or English will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program. Students are urged to see an advisor before transferring into a different major to minimize any impact on their degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

BoK: NS	Natural Sciences Elective	3
BoK: QR	Quantitative Reasoning (Mathematics or Statistics) Elective	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Engineering

Duration: **1 Year** Total Credits: **12 - 24**

Overview

Engineering is the design, construction and operation of structures, machines and systems using established scientific principles. Engineers put scientific knowledge to practical use, serving a critical role in today's increasingly complex world.

Pre-Engineering is a non-degree program that provides the appropriately prepared student with the pre-requisite courses needed for application to a bachelor's degree in engineering.* You will need four to five more years of study to earn your bachelor's degree, depending on the engineering discipline you select and the courses completed prior to enrolling at CEAS. Most engineering degrees require five years of study.

**Courses may include ENED1100, ENED 1120, PD1070 and Intro to Discipline course (major specific) at UC's College of Engineering and Applied Science.*

Success

You should be creative, inquisitive, analytical and detail oriented with excellent math skills. You should be able to work as part of a team and to communicate well, both orally and in writing. Communication abilities are also important because you will often interact with specialists in a wide range of fields outside engineering.

Career

Engineering is a very broad category. Engineers are employed worldwide in virtually every industry. Your career choices depend entirely upon which discipline you pursue to complete your bachelor's degree.

Pre-Engineering

2025-2026 Pre-Engineering (AX)

Duration: 1 Year

★Minimum Credits: 12 - 24 Credits

Fall Semester Year 1

Students may need to take additional courses depending on their Math and English Placement Test scores requiring completion of the Pre-Engineering curriculum to extend beyond two semesters. Students working to meet the required Math level for this advising track will need to meet with Academic Advisor to determine time to completion of Pre-Engineering for application to UC's College of Engineering and Applied Science (CEAS).

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENGL1001	English Composition	3
MATH1061	Calculus I (C- min)	4
	General Education (BoK) requirement OR course from Engineering list: See Academic Advisor regarding which general education (BoK) or Engineering course (from list provided) is appropriate given the specific engineering program of interest.	3

Spring Semester Year 1

Students should plan to meet with an Academic Advisor prior to registration to ensure appropriate academic planning.

Course	Title/Desc	Credit
MATH1062	Calculus II	4
	General Education (BoK) requirement OR course from Engineering list: See Academic Advisor regarding which general education (BoK) or Engineering course (from list provided) is appropriate given the specific engineering program of interest.	3
	General Education (BoK) Requirement: See Academic Advisor regarding which general education (BoK) is appropriate given the specific engineering program of interest.	3
	Science Requirement: Science requirement will vary by engineering discipline of interest. Student will select one sequence with the guidance of an Academic Advisor. Options include: PHYS2001 College Physics (calculus-based) and PHYS2001L College Physics Lab I (calculus-based) or CHEM1041 General Chemistry II and CHEM 1041L General Chemistry Laboratory II.	5

Engineering Courses - Students should meet with an Academic Advisor to determine which courses are most appropriate for the particular engineering discipline.

To best prepare for transition to a degree program at UC's College of Engineering and Applied Science (CEAS), students should consider the following courses as prerequisite completion allows. Certain courses are only available on the Clifton/Uptown Campus.

Course	Title/Desc	Credit
ENED1100	Foundations of Engineering Design Thinking I (C- min)	3
ENED1120	Foundations of Engineering Design Thinking II	3
PD1070	Exploring Professional Paths	3
PHYS2002	College Physics II (Calculus-based)	4
PHYS2002L	College Physics Lab II (Calculus-based)	1
	First-Year Major Introduction course - pending availability	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Nursing

Duration: 1 Year Total Credits: 32

Overview

Registered nurses (RNs) are on the front lines of patient-centered health care. RNs perform basic duties that include treating patients, educating patients and the public about various medical conditions, and providing advice and emotional support to patients' family members. RNs record patient medical histories and symptoms, help perform diagnostic tests, operate medical machinery, administer treatment and medications, and help with patient follow-up and rehabilitation.

RNs teach patients and their families how to manage their illness or injury, including post-treatment home care needs, diet and exercise programs, and self-administration of medication and physical therapy. RNs also run general health screening or immunization clinics, blood drives, and public seminars on various conditions.

RNs can specialize in one or more patient-care specialties. The most common specialties can be divided into roughly four categories:

- by work setting or type of treatment
- by disease, ailment or condition
- by organ or body system type
- by population

RNs may combine specialties from more than one area — for example, pediatric oncology and cardiac emergency — depending on their personal interest and their employer's needs.

This transfer-oriented program provides you with the first year of study needed to become a registered nurse with a bachelor's degree in nursing.

Success

You should be caring, sympathetic, responsible and detail oriented. You must be able to direct or supervise others, correctly assess patients' conditions and determine when consultation is required. You need emotional stability to cope with human suffering, emergencies and other stresses. A high tolerance for blood, other bodily fluids and odors is also essential.

The pre-nursing program is rigorous and requires students to study and prepare outside of the classroom. Though some students do work, many find it difficult to be successful in this program while working many hours. You are expected to spend a minimum of two-three hours of outside study per week for each credit hour of college coursework you take. (That means if you are taking a full-time course load of 15 credit hours, you should expect to spend another 30-45 hours of time on your own studying and doing homework.)

Career

Employment opportunities for nursing graduates include the following:

- nurse
- shift supervisor
- floor director
- training director
- nurse practitioner
- school nurse
- nursing home director

You must pass a licensing exam before you may enter the practice of nursing. If you acquire your bachelor's degree (BSN) as well as your RN, you will have more choice in career opportunities and future promotions.

You should note that when you apply for the state licensing exam, you will be required to indicate whether or not you have been convicted of a felony or other crime. If you have, it will very likely disqualify you from licensure.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

You should plan to start pre-nursing in the fall because the required basic series of foundation coursework starts in the fall and continues sequentially through the spring.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Nursing

2025-2026 Pre-Nursing (AX)

Duration: 1 Year
★Minimum Credits: 32 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I (C min)	4
CHEM1020	Introduction to Chemistry and Biochemistry (C min)	3
CHEM1020L	Introduction to Chemistry and Biochemistry Laboratory (C min)	1
ENGL1001	English Composition (C min)	3
PSYC1001	Introduction to Psychology (C min)	3
NURS1101	Success in College and Nursing (C min)	2

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL2002C	Anatomy and Physiology II (C min)	4
BIOL2031C	Microbiology for Health Professionals (C min)	3
NBSN1101	Introduction to Professional Nursing (C min)	3
SOC1001	Introduction to Sociology (C min)	3
BoK: FA,HP,HU	General Education Elective: Complete a Fine Arts, Historical Perspectives, or Humanities & Literature course (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Pharmacy

Duration: **3 Years** Total Credits: **72**

Overview

Pharmacists play a critical role in modern health care, dispensing drugs prescribed by physicians and other health practitioners and providing information to patients about medications. They advise physicians and other health practitioners on the selection, dosages, interactions and side effects of medications. Pharmacists also monitor the health and progress of patients in response to drug therapy to ensure the safe and effective use of medication.

Pre-Pharmacy is a pre-professional track that consists of courses in biology, chemistry, physics and mathematics that are required for application to a four-year doctor of pharmacy degree program. This pre-pharmacy non-degree program is specifically designed for students planning to apply to the PharmD program at the UC James L. Winkle College of Pharmacy. Additional coursework may be required for students planning to apply to PharmD programs at other institutions.

Pre-pharmacy students attending the UC Clermont campus are encouraged to work with their major advisor and the Pre-Professional Advising Center to be sure you are the most prepared applicant.

Success

Colleges of pharmacy base their admission strongly on demonstrated ability in the laboratory sciences. A student's overall academic record, score on the Pharmacy College Admission Test (PCAT), pharmacy-related experience and extra-curricular activities are all considered.

PharmD admissions information is available at the College of Pharmacy website.

Career

You must complete your doctorate (PharmD) to become a pharmacist. The profession of pharmacy offers excellent opportunities to those interested in science.

Registered pharmacists find careers in the areas of community/retail pharmacy, hospital pharmacy, wholesaling of drug products, pharmaceutical manufacturing, scientific research, government work and teaching. Community pharmacy affords pharmacists an opportunity to become owners of their own businesses. Positions are also available in drug product wholesaling, which has become an important part of the industry's distribution method.

The manufacturing of drug products is one of the largest industries in the US, requiring astute attention, accuracy and scientific skill. Every manufactured drug product must be carefully compounded, tested and analyzed before it is offered to the public. Manufacturers also employ pharmacists as medical service representatives who provide drug, clinical and other information to health professions.

Read more about career outlook in pharmacy from the US Bureau of Labor Statistics.

Communication

Duration: 2 Years Total Credits: 60 Award: AA

Overview

Communication focuses on discourse among people and within organizations and social institutions. Communication faculty members share a distinctive focus on contemporary social problems. The Communication program at University of Cincinnati Clermont covers issues of voice, identity, public participation and advocacy/leadership across communication domains including interpersonal, organizational, political, rhetorical, environmental, health, and mediated communication. The associate degree program is designed to provide students with crucial skills for the workplace or help them seamlessly transition into UC's online Bachelor of Communication program.

Career

This program is designed for students who plan to transition to a bachelor's degree in communication or pursue immediate employment. In our modern world, success in business and industry requires a sophisticated understanding of communication processes. Positions in human resource management, as well as in marketing and public relations, require strong communication skills. Communication students are well prepared for advanced study in such areas as law and business. Graduates find jobs as admissions counselors, communication educators, sales representatives, journalists, marketing managers, human resource specialists, event planners, advertising executives, and electronic media on-air talent.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.

- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Communication

AA

2025-2026 Communication (AA)

Duration: 2 Years
★Minimum Credits: 60 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
COMM1010	Introduction to Communication Studies	3
COMM1071	Introduction to Effective Speaking	3
ENGL1001	English Composition	3
MATH STAT BoK: QR	Quantitative Reasoning Elective: Complete a mathematics or statistics course designated as Quantitative Reasoning (QR).	3
	Foreign Language Requirement: Complete a sequence of a Foreign Language. Options include a 10-hour sequence (two 5-credit hour courses) or a 12-credit hour sequence (four 3-credit hour courses) or a combination of 3 and 5 credit hour courses in the same language. See an Academic Advisor for assistance as not all discipline courses will satisfy this requirement.	5

Spring Semester Year 1

Course	Title/Desc	Credit
COMM1076	Introduction to Interpersonal Communication	3
HIST BoK: HP	Historical Perspectives Elective: HIST discipline	3
MATH STAT BoK: QR	Quantitative Reasoning Elective: Complete a mathematics or statistics course designated as Quantitative Reasoning (QR).	3
BoK: SS	Social Sciences Elective	3
	Foreign Language Requirement: Complete a sequence of a Foreign Language. Options include a 10-hour sequence (two 5-credit hour courses) or a 12-credit hour sequence (four 3-credit hour courses) or a combination of 3 and 5 credit hour courses in the same language. See an Academic Advisor for assistance as not all discipline courses will satisfy this requirement.	5

Fall Semester Year 2

Course	Title/Desc	Credit
COMM	Communication Elective: Complete a course from the Communication Electives listed below.	3
BoK: FA,HU	Fine Arts or Humanities/Literature Elective: This elective must not be from the COMM discipline.	3
BoK: HP	Historical Perspectives Elective	3
BoK: NS	Natural Sciences Elective: Complete a course designated as Natural Sciences (NS) from an A&S discipline. See an Academic Advisor for assistance.	3
	Free Electives: Student will select 2 hours of free elective coursework if they completed the 10-hour Foreign Language sequence requirement. If the Foreign Language requirement was satisfied with a 12-hour sequence, this Free Elective requirement is not necessary.	2

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
COMM	Communication Elective: Complete a course from the Communication Electives listed below.	3
	Free Elective Students may choose any college-level course	3
BoK: NS	Natural Sciences Elective	3

Communication Electives

Course	Title/Desc	Credit

Course	Title/Desc	Credit
COMM2002	Advanced Public Speaking	3
COMM2012	Persuasion and Civic Engagement	3
COMM2021	Communication in Problem-Solving Groups	3
COMM2025	Introduction to Media Literacy	3
COMM2026	Introduction to Mass Communication	3
COMM2042	Introduction to Public Relations	3
COMM2081	Business Communication	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Digital Media

Duration: 2 Years Total Credits: 61 Award: AA

Overview

For students interested in communications professions — such as advertising, journalism and public relations — the path to success now starts closer to home than ever. UC Clermont College's two-year Digital Media program prepares graduates for jobs in the field and is designed to help students transition seamlessly into the communications bachelor's degree program in UC's College of Arts and Sciences to complete their studies.

Besides offering a more accessible and affordable option to a UC communications degree, digital media Professor Andy Curran, who worked in radio and TV for 25 years, emphasizes the unique academic approach of the UC Clermont program. Courses will provide students with the media production skills they'll need to succeed in the communications field, covering the basics of video, audio, photography, animation, illustration and web application skills, as well as a range of other communication disciplines.

"With these tools available to everyone now, communications professionals — whether you're a journalist for a TV station or work in corporate public relations — need to understand how to produce quality video, audio and photos," Curran says. "It's all part of being able to effectively tell a story. And employers expect graduates to have these skills from their first day on the job."

Graduates of the digital media communications program will have the option to transition directly into the communication program at UC's College of Arts and Sciences without losing any credit hours.

Success

You should have basic computer skills, a creative personality and the willingness to work with others to create digital media projects.

Career

The digital media program offers students a pathway to pursue a wide range of careers in the communications field, including media production, journalism, advertising, public relations, corporate communications and many others.

Majoring

The Associate of Arts in Digital Media is a unique program at the University of Cincinnati. The program provides students with a balance of digital media production, communication theory and general education that will enable you to transition to the communication program at UC's College of Arts and Sciences as a junior. All credits earned will be applied toward your Bachelor of Arts in Communication. The College of Arts and Sciences also offers a Master of Arts in Communication, which you can complete after you earn your bachelor's degree.

You should be able to complete the Associate of Arts in Digital Media in two years, attending full-time fall and spring semesters.

You will increase employment prospects if you also acquire Adobe Certified Associate certification. This program prepares you to take the Adobe Certified Associate (ACA) exams. ACA certification is a globally recognized premier standard for demonstrating digital media software skills. UC Clermont is an authorized ACA testing center.

Upon completion of the digital media communications program, students will:

- Be able to identify and implement best practices in the production and implementation of each type of media used in the program's core courses.
- Be media literate by demonstrating knowledge of the media industry's history, business models and social responsibilities.
- Be proficient in all current digital media software applications and able to demonstrate skills in each application.
- Know how to produce digital media projects for a variety of purposes, including, but not limited to: business operations, marketing functions, human resources functions, information dissemination and entertainment.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the

semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

English

Duration: **2 Years** Total Credits: **61** Award: **AA**

Overview

An associate degree in English builds a foundation for advanced studies in a range of academic disciplines. You will be a part of a literary learning community of dedicated scholars with an unabashed love of literature. We will help you discover and develop your true potential for creative expression.

We offer a strong core of literature courses and options to choose from. Whatever your path, you will become a more empowered reader and writer who is prepared to make a contribution to your field of knowledge, profession and community.

Success

Students of English pride themselves on being able to think, read and write critically. They engage in the careful study of novels, poems, theoretical works, multimedia documents and other texts. They also become adept at synthesizing knowledge from diverse fields (politics, history, sociology, economics, media studies). While their aspirations vary, students majoring in English will become more nimble thinkers, gaining a sophisticated understanding of the many uses and nuances of language.

Career

While an interest in English can lead to careers in journalism, publishing, technical writing and secondary school teaching, the reading, writing and critical thinking skills that an English student acquires are also valued in business and industry. English also is an excellent base for professional studies in law, education and the social sciences.

Study tours of other countries, for which you can receive course credit, are offered to let you experience cultures you previously only read about in a traditional classroom. Recent tours include spring break trips to Sri Lanka and Mexico. English majors are also welcome to participate in tours sponsored by the Uptown campus English department. These have included:

- Chaucer Study Tour
- Gothic Paris Study Tour
- Venice Study Tour
- Victorian to Virtual Study Tour

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

History

Duration: 2 Years Total Credits: 61 Award: AA

Overview

The study of history is the story of human origins — and therefore, an exploration of who we are. Studying history at UC Clermont provides students an entry point into the wider world of the humanities and social sciences disciplines, while the associate degree offers the educational foundation needed for pursuing a baccalaureate degree as it helps students develop critical, analytical and creative thinking skills.

Success

Students who are curious, comfortable with complex questions, and enjoy writing, reading and discussing are well suited to the history major.

Career

A history major is not limited to one specific vocation. Its aim is to teach students to think critically, analytically and creatively. It educates students in clear, coherent communication skills, both oral and written. It broadens understanding and enhances ethical decision-making. It also prepares students to learn vocational or technical skills easily and quickly. It is the foundation on which executive careers are built.

The study of history is quite useful for pursuing a career in law, medicine, marketing, advertising, insurance, editing and publishing, journalism, sales, teaching or any of the increasingly complex technological industries that demand well-educated professionals.

The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and students may start any semester, provided their transcripts arrive in time to be evaluated before the start of the semester they wish to attend.

Those who have not taken college level mathematics or English will need to take the placement test. (Unless they have English AP credit.)

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program. We urge students to see their advisor before transferring into a different major to minimize any impact on their degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Individual Studies

Duration: 2 Years Total Credits: 60 Award: AA

Overview

The Individual Studies (INDS) program is an adaptable degree perfect for students who need flexibility in their coursework. The program provides opportunities for students to combine classes taken in a previous program with classes from other fields of study. Curious minds and highly motivated students can focus in disciplines they are the most passionate about when a traditional degree does not meet that need. Individual Studies is an intentional choice and provides intellectual engagement that is meaningful and challenging by integrating multiple disciplines. Individual Studies is an opportunity to complete a degree that fits your future.

To apply to the Associate of Individual Studies, you must complete an application and, once accepted your will meet with an academic advisor to create a statement outlining your educational goals and an appropriately detailed outline of the courses you propose to study. This statement will be reviewed by an advisor in consultation with faculty in the INDS area. When approved, you will continue to work with an advisor to register for courses and ensure you stay on track to complete your program.

Success

The Individual Studies is a personalized, interdisciplinary program designed for flexibility so you can develop your own path of study, Students work with an advisor to explore courses that create a pathway to graduation with the potential to pursue a four-year degree. This flexibility allows you to transfer to another college in Ohio or elsewhere. Once enrolled in the Individual Studies program, students have the ability to earn their degree face-to-face or 100 percent online, depending on your selection of courses. Through INDS, you can be assured a solid base in the humanities, social sciences, natural sciences and fine arts. You will explore many of your academic interests and begin to think about how you want to integrate them into your future goals. For the freedom to develop your own degree program, choose the Associate of Individual Studies.

Career

Graduates with an Individual Studies degree gain the ability to work in a wide variety of fields or are often eligible for promotions and advancements in a current position. Career fields could include production manager, business administrator, entrepreneur, office manager, teacher's aide, childcare specialist and many more.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

BoK: SS	Social Sciences	3
BoK: FA,HP,HU,NS,SS	3 courses from any of the following areas: Fine Arts, Historical Perspectives, Humanities, Natural Sciences, Social Sciences	9

Individual Studies Curriculum

The Individual Studies curriculum offers a student with multiple interests a pathway to develop their own plan of study by integrating a set of core classes with courses in multiple disciplinary areas. This allows the student to explore diverse subjects but share a strong interdisciplinary theme. By emphasizing the importance of studying complex issues from multiple perspectives, these courses equip students with skills in critical thinking, problem solving, and objective analysis. This individualized studies aspect of the curriculum is designed by students in close consultation with faculty, academic advising and career services and draws from courses across the college.

Liberal Arts

Duration: 2 Years Total Credits: 61 Award: AA

Overview

UC Clermont's associate degree in liberal arts provides students with the broad educational foundation needed for pursuing a baccalaureate degree in a variety of disciplines. The liberal arts are the foundation of many professional educations and executive careers because they help develop critical, analytical and creative thinking skills.

Success

Liberal arts is a very broad field of study that can accommodate people of widely varied aptitudes and interests. It may be especially suited for students who have many interests and high curiosity about the world around them.

Career

A liberal arts major is not limited to one specific vocation. Its aim is to teach students to think critically, analytically and creatively. It educates students in clear, coherent communication skills, both oral and written. It broadens understanding and enhances ethical decision-making. It also prepares students to learn vocational or technical skills easily and quickly. It is the foundation on which executive careers are built.

A liberal arts background is quite useful for pursuing a career in law, medicine, marketing, advertising, insurance, editing and publishing, journalism, sales, teaching or any of the increasingly complex technological industries that demand well-educated professionals.

Minoring

Students who are enrolled in a two-year transitional degree program will spend most of their classroom time acquiring the foundational courses for a four-year baccalaureate. Generally, they will select a minor when they transfer to a four-year institution.

Students may also chose to add the writing certificate to their associate degree program.

Pre-Business Administration

Duration: 2 Years Total Credits: 61 Award: AA

Overview

Today's dynamic business world call for well-rounded, flexible leaders. Business administration is the study of general business principles and practices. It covers accounting, finance, marketing, operations management and information systems. More than specific academic subjects, it also teaches leadership, strategy, economics, tax issues, quality assurance, risk awareness, workforce dynamics, entrepreneurship and ethics as applied to local, national, international and global business concerns.

This program provides you with the first two years toward completion of a bachelor's degree in business.

Success

You should be analytical, detail-oriented, flexible, decisive and have good communication skills.

Career

The jobs open to you will depend on the major you select for your bachelor's degree.

If you become an accounting major, for example, you may pursue a career as certified public accountant, Internal Revenue Service agent, tax consultant or financial executive.

If your choice is management, consider the many professional careers in personnel administration or any managerial or staff position that deals with "people problems" in organizations.

If you major in marketing, you can become a marketing researcher and analyst, sales director or manager, product manager, advertising director or retail merchandising specialist.

Organizations offering you a professional career as a finance major include commercial banks, insurance companies, securities dealers and brokers, and the financial departments of industrial and public utility corporations.

Minoring

You cannot minor in pre-business administration.

If you are enrolled in a two-year transitional degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year bachelor's degree. Generally, you will select your minor when you transfer to your four-year institution.

Curriculum

Select 34AA-PBAK only if you will be transferring to Northen Kentucky University to complete your degree. Their program has slightly different course requirements from those required at UC.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Pre-Business Administration

AA

2025-2026 Pre-Business Administration: UC Transition Program (AA)

Duration: 2 Years

★Minimum Credits: 60 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
ECON1001	Introduction to Microeconomics	3
ENGL1001	English Composition	3
MATH1044	Applied Calculus I	3
MGMT1050	Introduction to Business	3
MGMT1080	Problem Solving Tools	3

Spring Semester Year 1

Course	Title/Desc	Credit
COMM2081	Business Communication	3
ECON1002	Introduction to Macroeconomics	3
IS2080C	Digital Technologies for Business	3
MATH1045	Applied Calculus II	3
MKTG2080	Introduction to Marketing	3

Fall Semester Year 2

Pre-Business Administration Elective
As this program is designed as an Associate's degree to transition directly to UC's Lindner College of Business, the student has several options. The student may select to enroll in a Foreign Language course, Historical Perspectives elective, Fine Arts elective, or Humanities/Literature elective. Each are required for the Bachelor's degree, but Clermont Faculty want the student to select when the required course should be taken (at the associate or bachelor degree level). A minimum of three college credits are required.

Course	Title/Desc	Credit
ACCT2081	Financial Accounting	3
BANA2081	Business Analytics I	3
BLAW2080	Legal Environment of Business	3
BoK: NS	Natural Sciences Elective	3

Spring Semester Year 2

Pre-Business Adminstration Elective
As this program is designed as an Associate's degree to transition directly to UC's Lindner College of Business, the student has several options. The student may select to enroll in a Foreign Language course, Historical Perspectives elective, Fine Arts elective, Social Sciences elective, or Humanities/Literature elective. Each are required for the Bachelor's degree, but Clermont Faculty want the student to select when the required courses should be taken (at the associate or bachelor degree level). A minimum of three college credits are required.

Course	Title/Desc	Credit
ACCT2082	Managerial Accounting	3
BANA2082	Business Analytics II	3
ENGL2089	Intermediate Composition	3
BoK: NS	Natural Sciences Elective	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Elementary Education

Duration: 2 Years Total Credits: 62 Award: AA

Overview

The UC Clermont Pre-Elementary program is designed for those interested in becoming a teacher of children in kindergarten through 5th grade. As an aspiring early childhood teacher, this program will help you understand the complex human and social factors involved in educating young children, as well as practices that support diversity and build a foundation for lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Bachelor Degree:

- teacher
- tutor
- instructional coordinator
- curriculum designer

Associate Degree:

- teacher assistant
- child care worker

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, reliable transportation and the ability to visit schools during regular business hours are necessary. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Secondary Education

Language Arts

Duration: 2 Years Total Credits: 61 Award: AA

Overview

Secondary educators teach students in grades 7-12. They guide students to delve deeply into a particular academic content area while supporting social and civic engagement. Secondary Education majors specialize in a specific content area such as chemistry, biology, English/language arts, or social studies. As an aspiring secondary teacher, this program will help you understand the complex human and social factors involved in educating students and practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Pre-Sport Administration

Pre-Sport Admin-Transfer

Duration: 2 Years Total Credits: 63 Award: AA

Overview

This Pre-Sport Administration program is designed as a NKU-transfer pathway.

Ready for a fast-paced, exciting career in athletics? The associate degree program in Pre-Sport Administration provides students with the first two years of study toward their bachelor's degree in sport administration. Sport administration focuses on the business side of the sport industry.

Sport is an approximately $500-billion industry. Given the economic magnitude and pervasive nature of sport in society, the need has never been greater for educated/trained sport managers. However, competition is fierce for entry-level positions. Those with the best education have the best opportunity to obtain a position and be successful.

UC Clermont's program was developed to meet the standards of the Sport Management Program Review Council. It provides graduates with a strong technical foundation and the sport business skills necessary to successfully enter the field of sport management. Sport administration students will have an opportunity to earn a career-oriented degree with employment opportunities in a growing industry.

Success

The most important factor to success is a love of sports. You also will need critical thinking and creative problem-solving skills. It is essential that you have a high level of interpersonal skills for building and maintaining positive relationships with a diverse array of constituents. You also need excellent communication skills and the ability to lead and motivate others as well as the ability to see the "big picture."

Career

There are approximately 5 million people working in sport-related occupations. Graduates are prepared for a variety of positions in professional sports, college athletics and high school athletic administration. Career opportunities exist within sport associations, sporting events and the management of sport venues. Other opportunities include the field of health and fitness, recreation and within the sporting goods industry.

Pre-Sport Administration

Duration: 2 Years Total Credits: 63 Award: AA

Overview

The associate degree program in pre-sport administration provides students with the first two years of study toward their bachelor's degree in sport administration offered by the University of Cincinnati's College of Education, Criminal Justice, and Human Services (CECH).

The Sport Administration program has a curriculum that focuses on the business side of the sport industry. The Sport Administration program provides graduates with a strong technical foundation, sport business skills necessary and the academic preparation to successfully transition to CECH. Students in our Sport Administration degree program will have an opportunity to earn a career-oriented degree with employment opportunities in a growing industry.

Success

The most important factor to success is a love of sports. You will need critical thinking and creative problem solving skills. It is essential that you have a high level of interpersonal skills for building and maintaining positive relationships with a diverse array of constituents. You also need excellent communication skills and the ability to lead and motivate others as well as the ability to see the "big picture."

Sport is an approximately $500 billion industry. Given the economic magnitude and pervasive nature of sport in society, the need has never been greater for educated/trained sport managers. However, competition is fierce for entry-level positions. Those with the best education have the best opportunity to obtain a position and be successful.

Career

There are approximately five million people working in sport-related occupations. Graduates are prepared for a variety of positions in professional sports, college athletics, and high school athletic administration. Career opportunities exist within sport associations, sporting events, and the management of sport venues. Other opportunities include the field of health and fitness, recreation, and within the sporting goods industry.

Curriculum

You should check with your academic advisor every semester before you register for classes. Two years is really a short time to squeeze in all of your degree requirements. We cannot offer every course every semester. If you miss taking a prerequisite for a required course, or don't take a particular course the only semester it is offered during the year, you can jeopardize your ability to complete your degree on time.

Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Psychology

Duration: 2 Years Total Credits: 63 Award: AA

Overview

Psychology is most often defined as “the scientific study of behavior and mental processes.” Our faculty possess a broad spectrum of knowledge and education and are pleased to offer in-depth courses in many of the sub-disciplines in psychology, such as:

Clinical/Counseling Psychology - studies and helps people with serious mental distress and/or helps people with typical problems in relationships or work

Cognitive Psychology - the study of how we learn, think and remember

Psychobiology - the study of the biological foundations of behavior

Developmental Psychology - how we change emotionally, socially and cognitively as we age throughout the lifespan

Personality - the study of individual differences in patterns of thinking, feeling and behaving as well as human motivation

Social Psychology - the study of an individual’s behavior, feelings and cognitive processes in a social setting

Industrial/Organizational Psychology - the study of organizations and the people who work in them

Success

If you are interested in direct client care, skills in sensitivity, compassion, good communication and the ability to lead and inspire others are essential. Research requires the ability to do detailed work both independently and as part of a team. These success factors are available as part of the education offered by the UC Clermont College psychology faculty.

Career

Upon completing your bachelor’s degree in psychology, you may look forward to employment as a community support worker, case worker, human resources personnel, marketing representative, research assistant or many other possibilities.

If you wish to obtain licensing certification for private practice or work in education, business or clinics, you will need at least a master’s degree. A doctoral degree is required to be a licensed psychologist.

Additional career options are listed on the Center for Exploratory Studies website.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services

available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Social Work

Duration: 2 Years Total Credits: 62 Award: AA

Overview

Social work is a profession for those with a strong desire to help improve people's lives. Social workers help people function at their best in their environment, by teaching them life skills or linking them to appropriate resources. They may help people who face a life-threatening disease or serious chronic illness or disability. They often provide social services in health-related settings that are governed by managed care organizations. Social workers also work with people in crisis, assisting families in serious domestic conflicts, sometimes involving child or spousal abuse. Other clients may be trying to cope with unemployment, inadequate housing or substance abuse.

Most social workers specialize their degree. Although some conduct research involved in planning or policy development, most prefer an area of practice in which they interact directly with people.

This program provides you with the first two years toward completion of a bachelor's degree in social work.

Success

You should be emotionally mature, objective and sensitive to people and their problems. You must be able to handle responsibility, work independently and maintain good working relationships with clients and coworkers.

Career

With an associate degree in social work, you can enter the job market as a paraprofessional in service organizations. With a bachelor's or master's degree, you can advance to professional status and additional responsibilities. Many directorship opportunities require a doctorate degree.

Accounting Technology

Online

Duration: 2 Years Total Credits: 61 Award: AAB

Overview

Accounting professionals are in high demand. Nearly all public, private and nonprofit organizations need accounting support, and there are accounting career opportunities across all industries and sectors. An accountant is a person who keeps or inspects financial records. They're numbers people who excel at organization and detail-oriented work.

The Accounting Technology program is a fully online two-year associate degree program that prepares students for a career as a paraprofessional in the field of accounting. The program emphasizes financial accounting, computerized accounting information systems, managerial accounting, payroll accounting, generally accepted accounting principles, preparation of financial statements, preparation of individual income taxes and nonprofit accounting.

Success

You should have an aptitude for mathematics and be able to analyze, compare, and interpret facts and figures quickly. Since accountants deal with money, you must also possess a high degree of integrity. And because you are constantly interacting with management and clients, accountants should be effective communicators.You should be able to communicate clearly both verbally and in writing. You must be good at working with people as well as with business systems and computers. You must be able to sit for extended periods while reviewing detailed data.

Recognizing that digital literacy is essential to be successful in this online program, UC Clermont recommends that incoming students own a computer or laptop that meets the minimum system requirements for software used in the curriculum. This requirement will help ensure that all students have access to the college's digital resources at home or on campus. Recommendations are listed here.

Career

You can look forward to employment as an accounting paraprofessional. Other opportunities include the following:

- bookkeeper
- accounts receivable/payable clerk or manager
- billing/purchasing clerk or manager
- credit/collection clerk, analyst or manager
- inventory clerk or manager
- payroll clerk or manager
- tax preparer
- general accounting clerk

If you wish to become a professional accountant, CPA, audit or or enter a similar career, you should instead pursue pre-business administration and transition to a bachelor's degree program majoring in accounting.

Minoring

Minors do not apply to associate degree studies.

If you are enrolled in a career-oriented technical degree program, you will spend most of your classroom time learning specific job-related skills. However, you may pursue accounting as a second major. Expect the acquisition of a second major to prolong your degree completion.

If your major is in a significantly different field of study, you may choose instead to add one of the accounting certificates as part of your associate degree program.

For specific details on accounting as a second major or adding a certificate, please contact Admissions at (513) 732-5319.

If you are enrolled in a two-year transitional degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year baccalaureate. Generally you will select your minor when you transfer to your four-year institution. Accounting technology course work does not normally fulfill the requirements of a bachelor's degree program.

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Business Applications Technology

Online

Duration: 2 Years Total Credits: 60 Award: AAB

Overview

The Business Applications Technology program is a 100-percent online asynchronous program. The curriculum will provide you with skills that will increase your productivity and earning potential and are in high demand in the workplace, including Microsoft Office application proficiency, communication, critical thinking, analysis, and problem-solving.

Business applications technology is the study of how contemporary businesses use technology to manage data and information to achieve their goals in day-to-day operations based on current standards. Although specific job descriptions of business applications technology professionals vary considerably, they share many common duties. Business applications technology professionals perform tasks such as organizing and maintaining files, managing and analyzing data, producing reports, documentation, promotional/marketing materials, and presentations.

Success

You should be well organized, have excellent communication skills, and be able to coordinate several activities at once.

Recognizing that digital literacy is essential to be successful in this online program, UC Clermont recommends that incoming students own a computer or laptop that meets the minimum system requirements for software used in the curriculum. This requirement will help ensure that all students have access to the college's digital resources at home or on campus. Recommendations are listed here.

Career

You may pursue many different careers. Some of your employment opportunities include the following:

- Office Manager/Coordinator/Specialist
- Customer Service Coordinator/Specialist/Virtual Assistant
- Digital & Social Media Support Specialist
- Digital Content Coordinator/Specialist
- Executive Administration Assistant
- Technology Coordinator/Specialist
- Information Coordinator/Specialist

Minoring

Minors do not apply to associate degree studies.

If you are enrolled in a career-oriented technical degree program, you will spend most of your classroom time learning specific job-related skills. However, you may pursue business information technology as a second major. Expect the acquisition of a second major to prolong your degree completion.

If your major is in a significantly different field of study, you may chose instead to add the software productivity or medical biller/coder certificate as part of your associate degree program.

For specific details on Business Applications Technology as a second major or adding a certificate, please contact Admissions at 513-558-8316.

If you are enrolled in a two-year transitional degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year baccalaureate. Generally, you will select your minor when you transfer to your four-year institution.

Business Management Technology

Online

Duration: 2 Years Total Credits: 61 Award: AAB

Overview

The Business Management Technology program is a 100-percent online program. Business management technology is a broad foundational study of the specific skills required in small business, office and entry-level department management: supervision, human resource management, team-building, organizational relations, leadership, entrepreneurship and small business management.

Success

To succeed in business management technology, you must have good communication skills. You must be able to establish effective working relationships with many different people ranging from managers, supervisors and professionals to hourly employees. You should also be analytical, detail oriented, flexible and decisive. You should be comfortable coordinating several activities at once and be able to cope with deadlines. Problem solving should be a strength.

Career

Some opportunities for employment include the following:

- department/shift manager
- office manager
- project coordinator
- small business manager
- entrepreneur/franchisee
- entry-level human resource associate for small businesss

Financial Management Technology

Online

Duration: 2 Years Total Credits: 60 Award: AAB

Overview

Financial Management Technology is a 100-percent online program. The fast-paced finance world moves industries, lives and economies forward. The Financial Management Technology program at UC Clermont is an associate of applied business degree designed to help students develop understanding of financial markets in the contemporary economy, the operation of financial institutions and the financial management of business operations using technology as a catalyst for decision making. Students transition into the Bachelor's in Applied and Technical Studies (BTAS) program after completing this degree.

Success

A career in financial management requires analytical skills, a quantitative orientation, an ability for problem solving, computer literacy and an international awareness. To succeed in this program, you must possess excellent critical thinking skills, problem solving and the ability to analyze information.

Career

A major in financial management technology will prepare you for a career in corporate financial management, financial planning and services, banking and insurance. Some of the opportunities for employment include: financial analyst, credit analyst, financial advisor, credit manager, financial consultant, stock broker and treasury analyst. Some positions listed may require additional education or training.

Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Healthcare Management Technology

Online

Duration: 2 Years Total Credits: 60 Award: AAB

Overview

Healthcare Management is a 100-percent online program. The Healthcare Management Technology (HCMT) associate degree provides students with a broad foundational study of the specific skills required in physician office and department management, including marketing, economics, accounting, human resources, business law and statistics. In addition, students will prepare to take the Certified Physician Practice Manager (CPPM) national credentialing exam by studying healthcare finance, healthcare quality, statistics and research, introduction to physician practice management, healthcare compliance, health information ethics and healthcare applications. This credential is a logical next step for those with experience in healthcare who are ready to advance their careers in physician practice management. Current practice managers will also benefit from this certification with increased knowledge and validation of their knowledge and experience in this skilled profession.

Students are able to complete this program in two years, attending full time fall and spring semesters. This program is career specific.

For specifics regarding the CPPM certification, visit Advancing the Business of Healthcare - CPPM Certification.

Success

You should possess good oral and written communications skills. Healthcare managers often serve as liaisons between patients, healthcare facilities, insurance companies and other healthcare providers. They must be proficient with computers, medical terminology, human resource management, healthcare laws and regulations, healthcare technology, marketing and business relationships, HIPAA and data security, and healthcare quality.

Career

Graduates of this associate degree may pursue manager positions in small, mid-size and large physician practices as well as hospital-owned physician practices, ambulatory care centers, surgical centers and hospital departments. Current physician practice managers may benefit from this associate degree with increased knowledge and validation of their knowledge and education along with completion of an associate degree. The next step in a student's education after earning this associate degree is completion of a bachelor's degree.

The following information is provided per U.S. Department of Education regulations:
The Department of Labor's Standard Occupational Classification (SOC) codes for this associate degree program are found at O*NET OnLine.

Majoring

This associate degree prepares you to be a healthcare manager with both expansive and detailed responsibilities involving management of staff in a healthcare provider setting such as a physician office, clinic or hospital department. The healthcare manager is often responsible for the revenue cycle of the office/department, health information, human resources and office technology.

Healthcare managers have a good understanding of:

- Health care regulations and processes
- Fraud, abuse and corporate compliance
- Quality in health care
- Medical office accounting, physician reimbursement and revenue cycle management
- Human resource management
- Marketing and business relationships
- HIPAA and data security
- Health IT, EHRs and office technology

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the

semester.

Information Technology

Online

Duration: 2 Years Total Credits: 63 Award: AAB

Overview

Information Technology is a 100-percent online program. Technological innovations continue to change the world at a breakneck pace. Skilled workers are essential to the digital economy of today — and the future. The Information Technology program at UC Clermont prepares students to learn the basic elements of problem solving and critical reasoning via programming logic and object-oriented programming techniques, structured programming techniques and web scripting abilities using current, industry-standard programming and scripting languages. Students will also learn the basics of database design and administration, and the fundamentals of networking and systems administration. Students who complete the program will earn an Associate of Applied Business degree, with an option to transfer to the five-year (co-op required) IT program in UC's School of Information Technology.

Success

To succeed in IT, you must think logically and pay close attention to detail. The job calls for patience, persistence and the ability to work on exacting analytical work, especially under pressure. Ingenuity and creativity are particularly important. The ability to work with abstract concepts and to do technical analysis is especially important. Because you are expected to work in teams and interact directly with computer users, you must be able to communicate well with non-technical personnel.

Career

You may pursue many different careers. Some of your opportunities for employment include the following:

- programmer
- I/S operator/analyst
- operating systems specialist
- software designer
- software applications specialist
- software/application support
- database software technician
- webmaster

Law and Paralegal Studies

Online

Duration: 2 Years Total Credits: 60 Award: AAB

Overview

Law and Paralegal Studies is a 100-percent online program. The effective practice of law requires a team of conscientous, competent professionals. A critical member of that team is the paralegal, who plays a vital role in the legal system by completing essential legal tasks that ensure the delivery of quality legal services to the client. A paralegal's primary role is to provide support to attorneys. Paralegals may work specifically with one lawyer or a group of attorneys. The work that paralegals do varies based on the size and practice area of the firm at which they are employed, but commonly includes meeting with clients, interviewing witnesses, collecting evidence, researching case law and legal precedents, drafting documents, pleadings, and correspondence with clients and the court.

The paralegal field is growing and offers opportunities in many different areas of concentration. A paralegal can work in a variety of legal fields, finding success with corporate firms, private firms or in the public arena. Much like attorneys, paralegals can choose a certain type of law, which can determine the type of work they will do on a regular basis. A litigation paralegal, for example, may prepare clients for trial, interview witnesses, research legal precedents pertinent to a case, and must have a wide knowledge of the court rules and evidentiary issues. A paralegal degree does offers opportunities outside the legal field, including in real estate, hospitals, nonprofits and health care systems.

Success

Excellent communication skills, a willingness to learn computer software applications and attention to detail are important attributes to succeed as a paralegal. You should have good people skills, be an independent worker and have a high degree of personal integrity.

Career

The paralegal profession has been a growth occupation for the past 25 years.

"Employment of paralegals and legal assistants is projected to grow 15 percent from 2016 to 2026, much faster than the average for all occupations. Formally trained paralegals with strong computer and database management skills should have the best job prospects."
— U.S. Bureau of Labor Statistics

Paralegals may not provide legal services directly to the public, except as permitted by law.

The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

If you have taken paralegal courses at other institutions, you may petition the program director to transfer those credits to our program. Credits must be from a regionally accredited, ABA or an institutional member of AAfPE to be considered.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The paralegal program is approved by the American Bar Association (ABA).

Marketing Management Technology

Online

Duration: 2 Years Total Credits: 61 Award: AAB

Overview

Marketing Management Technology is a 100-percent online program. "The customer is always right" — an old adage that rings truer than ever in today's increasingly competitive, often digital marketplace. Marketing Management Technology at UC Clermont is a broad foundational study of the skills required in retail and sales management, customer relations, product promotion and entry-level marketing. Topics include marketing, retail management, team-building, consumer behavior, promotion and small business marketing.

Success

To be successful in marketing management technology, you should be creative, highly motivated, customer-oriented, flexible and decisive. The ability to communicate persuasively, both orally and in writing, with managers, staff and the public is vital. Must be able to effectively interact with internal supervisors and hourly employees as well as external vendors and clients.

Career

You may pursue many different careers. Some of your opportunities for employment include the following:

- sales representative
- customer service representative
- marketing canvasser
- entry-level retail manager
- promotions coordinator

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Writing Center (AWC) – The AWC can help with any writing assignment for any course and at any stage of the writing process. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions in more than 200 undergraduate courses including subjects such as math, science, languages, business and writing. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Pre-College Math Tutoring – Pre-College Math Tutoring Services helps students succeed in Mathematical Literacy (MATH 0029), Fundamentals of Algebra (MATH 0030), Introductory Algebra (MATH 0031) and Intermediate Algebra (MATH 0034). Group study sessions, individual tutoring or email tutoring are available. Information is provided in the course syllabus to help guide students to the study group sessions for that course. Math Learning Resources by math topic that include short instructional videos and worksheets are available on the UC Clermont Learning Commons website.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont professional tutor on Mondays, Wednesdays and Fridays from 10 a.m.-12 p.m. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Supply Chain Management Technology

Online

Duration: 2 Years Total Credits: 60 Award: AAB

Overview

Supply Chain Management Technology (SCMT) is a diverse and growing professional business field. Supply chains are made up of all the companies that participate in the design, assembly, and delivery of a particular product.

- Vendors supply raw materials.
- Producers convert those raw materials into products.
- Warehouses store that product until it's needed.
- Distribution centers pick up and deliver that product.
- Retailers, online and in-store, bring that product to consumers.

Supply chains are the reason that the producer can provide customers what they want, when and where they want it, at the price they need.

In the context of today's global economy, there is an ever-increasing demand for greater innovation, increasing efficiency, and cost reduction, all in an effort to generate recurring value for the firm and its customers .

This degree program is designed to provide a fundamental introduction to the field of supply chain management in conjunction with basic business management technology success skills and a well-rounded general college education.

Success

Supply Chain Management Technology (SCMT) is a diverse business field with a wide variety of opportunities for success. SCMT shares a number of core success skills with other similar business disciplines including a strong sense of personal motivation and effective self-management, time management, the ability to work well with others in team settings or group projects, effective communication skills, critical thinking and problem solving skills, mathematical proficiency, a strong sense of personal integrity, and an understanding of how personal responsibility influences professional success in the global economy of the 21st century. Effective demonstration of these skills is required in both face-to-face environments and increasingly in online work environments as well.

Recognizing that digital literacy is essential to be successful in this online program, UC Clermont recommends that incoming students own a computer or laptop that meets the minimum system requirements for software used in the curriculum. This requirement will help ensure that all students have access to the college's digital resources at home or on campus. Recommendations are listed here.

Career

Graduates from this degree program are prepared for entry as a supervisor or manager into a number of career fields including:

- Logistics and Transportation
- Traffic/Transportation Management
- Warehouse/Distribution
- Production & Inventory Control
- Purchasing, Procurement, and Sourcing
- SCMT Cost Management
- Supplier Management
- Transportation, Storage, and Distribution Management
- Third-Party Logistics (3PL) Sales & Marketing

Typical day-to-day work activities include directing/coordinating production, purchasing, warehousing, distribution, or financial forecasting services or activities to limit costs and improve accuracy, service, or safety. Examining existing procedures or opportunities for streamlining activities to meet product distribution needs. Directing the movement, storage, or processing of inventory. Managing personnel and supply chain systems and directing daily operations.

Majoring

To obtain an Associate of Applied Business (AAB) degree in Supply Chain Management Technology (SCMT) at UC Clermont College students are required to earn as total of 60 credit hours as follows:

- General Education & Basic/Related Courses (30 semester hours)
- Technical Core Courses (30 semester hours)

Aviation Technology

Duration: 2 Years Total Credits: 61 Award: AAS

Overview

Aviation Technology combines pilot training with the on-the-ground skills you need for a career as a professional pilot. In addition to flying passenger aircraft for major and commuter airlines, pilots also crew cargo jets, corporate aircraft, and serve the military and law enforcement. Others fly emergency medical services, perform aerial surveying and photography, and conduct sightseeing flights. Some pilots participate in firefighting, rescue searches, and other public service flying, while others become flight instructors.

Being a pilot requires strict attention to safety, management of crew resources, knowledge of weather and navigation, and intimate knowledge of the aircraft and the mechanics of flight. Aviation Technology ensures you learn these skills along with earning your pilot certifications. You must also be able to make quick decisions and accurate judgments under pressure. You must be able to maintain a high level of alertness while working irregular work schedules and spending time away from home. You must be physically fit, have excellent eyesight, and be able to pass the required FAA physicals.

Professional pilot training in the UC Clermont College Aviation Technology program is provided by Sporty's Academy, Inc. Sporty's Academy is the educational division of the highly acclaimed Sporty's Pilot Shop — the world's largest provider of aviation educational resources and pilot supplies. Sporty's Academy is a Federal Aviation Administration (FAA) approved pilot school, holder of FAA Air Agency Certificate #XSTS103K, headquartered at the Clermont County Airport in Batavia, Ohio, less than a mile from the UC Clermont campus.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati's State Authorization webpage.

Career

Watch our YouTube video to learn more about careers and training in aviation.

You can look forward to employment as a pilot in many specialized areas. Opportunities include the following:

- airline pilot
- corporate pilot
- charter pilot
- military
- law enforcement
- aviation management
- flight instructor
- airport manager
- airline dispatcher

Curriculum

The Aviation Technology program at UC Clermont College requires students to enroll in five consecutive semesters, including the summer term, to ensure a continuous and structured learning experience. This accelerated schedule allows students to efficiently complete their coursework, maintain proficiency in aviation training, and stay on track to meet certification and career readiness goals in a timely manner.

Advising

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Craig Beesten (craig.beesten@uc.edu) serves as the Academic Advisor to the program, while Dawn Hundley (dawn.hundley@uc.edu) serves as the Student Success representative. You may contact either of these individuals should you have questions about the program or admission standards.

UC Advantages And Special Opportunities

The UC Clermont campus is on 91 wooded acres located in Batavia, Ohio, in the heart of Clermont County. Our faculty-to-student ratio is low. You will find small class sizes and personal interaction with your instructors create the ideal learning environment. Parking is convenient and at no additional charge. Plus, our tuition is the lowest of the UC colleges.

As an aviation student, you will be part of a group of dedicated students who receive individualized attention on the ground and in the air. You will receive specialized flight instruction using an advanced simulator with a visual display and learn from the highly rated aviation staff at Sporty's Academy, the acclaimed education affiliate of Sporty's Pilot Shop, the world's largest provider of aviation educational material.

Your actual flight time will be logged in a fleet of modern, well-maintained aircraft, including the Cessna 172 Skyhawk, Cessna 182 Skylane, and several advanced flight simulation devices. (Additional flight fees apply.)

Other benefits include the opportunity to participate in one of several professional internship programs with locally based airlines. Selected graduates can work as flight instructors at Sporty's Academy, logging flight time while continuing their education.

For more information on pilot licensing, regulations, and medical examinations, visit the Federal Aviation Administration webpage.

For information regarding tuition and fees associated with this program, please see Aviation Financial Considerations.

Schedule appointments up to 7 days in advance for one-hour, 90-minute, or two-hour sessions. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days before the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do every week to stay on track with their coursework throughout the semester, which helps students stay motivated, leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to succeed in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week, starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

Selective Admission Standards for the Aviation Technology Associate Degree Program at the University of Cincinnati, Clermont College

The Aviation Technology Associate Degree Program at UC Clermont College is a selective admission program that admits students only for the Fall Semester. **The application deadline for Fall Semester admission is December 1st.** Applicants must meet specific criteria to be considered for admission. These include:

1. **Minimum Cumulative GPA**: Applicants must have a minimum cumulative GPA of 2.5 or higher.
2. **FAA Medical Exam**: A valid FAA Medical Exam certificate is required as part of the application to demonstrate fitness for aviation-related activities.
3. **Aviation Financial Acknowledgement Form**: Submission of the Aviation Financial Acknowledgement form is necessary to confirm understanding of the financial requirements associated with the program.

While meeting the minimum selective admission criteria is necessary, it does not guarantee admission into the program. Due to capacity restrictions and Federal Aviation Administration (FAA) regulations, not all qualified applicants may be offered admission. Admission decisions will be made based on a combination of factors, including the availability of space in the program.

We encourage prospective students to carefully review the admission requirements and prepare all necessary documentation to ensure a complete application.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Aviation Financial Considerations

The Aviation Technology program at the University of Cincinnati Clermont College is subject to additional fees related to the operation of aircraft and individualized instruction. Below is an outline of expected costs, but in this technical training environment, costs can vary.

Medical Certificate (Approx. Cost = $120)

Students enrolling in the Aviation Technology program must obtain a Federal Aviation Administration (FAA) Medical Certificate (First Class recommended, Third Class minimum) before beginning flight training. Medical certification can be obtained from any FAA-designated Aviation Medical Examiner (AME).

More information regarding the medical exams can be found at https://sportysacademy.com/medical-exams/.

Examination Fees (Approx. Cost = $2,925)

Three FAA written examinations are required for the certificates and ratings you will receive while enrolled in the program. Written examinations may be taken on the aviation campus for $175 each. There are also three practical examinations (flight tests) administered by an FAA Designated Examiner at an approximate cost of $800 each.

Special Equipment and Texts (Approx. Cost = $1,000)

Flight training requires some specialized equipment. The pilot supplies needed (headset, flight computer, fuel tester, charts, etc.) will be primarily one-time purchases at an approximate cost of $800. The average cost of aviation textbooks and materials is $100 per semester. We recommend that you do not buy your aviation textbooks/equipment until after the first day of class. The instructor will discuss important information regarding the selection of texts/equipment.

Flight Fees (Cost = $8,757 per designated course)
Aviation flight fees include the cost of aircraft operation and associated flight and ground instruction for five semesters of aviation coursework. The flight fees are associated with your Pilot Flight sequence of courses (AVTN 2021, 2022, 3021, 3022, 3023). This fee will appear on your invoice from the University when registering for one of these courses and must be paid before beginning each semester. Fees are based on the minimum required flight training. An aviation fuel surcharge may be assessed on a semester basis depending on market conditions.

Students are responsible for the costs associated with additional flight training. A minimum account balance of $500 is required at all times. Excess funds are refundable upon completion of the program.

At the successful completion of training, you will receive a Commercial Pilot Certificate with Airplane Single-Engine Land and Instrument Ratings.

Aircraft Insurance (Approx. Cost = $600 annually)
When using program aircraft, students are covered with aircraft liability insurance for third-party bodily injury and property damage claims. The aircraft insurance does not cover renters or students in the event of damage to the aircraft they are flying. In other words, renters, including solo student pilots, are responsible for aircraft damage.

All aircraft renters are required to carry their own renters' aircraft physical damage (hull) insurance. A minimum of $60,000 in hull coverage is recommended, which can be obtained for approximately $600 annually. Please visit https://sportysacademy.com/insurance/ for more information.

Financial Aid

Federal financial aid in the form of grants and loans may be available to students. You must complete the FAFSA to determine eligibility. Due to federally set limits, however, additional funding will be needed to cover the costs of the Aviation program. This could include college savings, parent PLUS loans for students under 24, and alternative student loans. Payment plans are available each semester as well. Scholarships from UC or outside sources can also be used to cover these costs. If you have questions regarding funding, please contact Dawn Hundley, Director of Student Success, at Dawn.Hundley@uc.edu.

Questions

For additional questions, contact the Aviation Technology program coordinator, Jayme Frederick, at jfrederick@sportys.com.

Transferring To UC

December 1st is the application deadline for the Aviation Technology degree program. To apply, visit the Admissions webpage. Transfer students may apply to the Aviation Technology program for fall semesters only. The same admission requirements apply to transfer applicants. Please review the requirements under the Admission Requirements heading.

Changing Majors Within UC

December 1st is the application deadline for the Aviation Technology degree program. To apply, visit the Change of Major webpage. Transition students may apply to the Aviation Technology program for fall semesters only. The same admission requirements apply to transition applicants. Please review the requirements under the Admission Requirements heading.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines, provide the required documentation, and meet visa requirements. Submission of documentation regarding sufficient funds will also be required before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

The same selective admission requirements apply to international applicants.

Graduation Requirements

To graduate from UC Clermont, a student must:

- Complete all required coursework and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File a formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

December 1st is the application deadline for the Aviation Technology degree program. To apply, visit the Admissions webpage.

Please note that admission to the Aviation program is only available for the fall term.

FAA regulations mandate that flight training programs adhere to specific guidelines regarding the scheduling and duration of flight training sessions. These regulations require a structured and consistent training schedule to ensure the safety and competency of student pilots. Admitting students only during the fall term allows us to align our program schedule effectively with these regulations, thereby enhancing the quality and safety of flight training.

Be sure to allow enough time to complete your FAA medical examination.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
Pilot training in the UC Clermont College Aviation Technology Program is provided by Sporty's Academy, Inc. Sporty's Academy is a Federal Aviation Administration (FAA) approved pilot school, holder of FAA Air Agency Certificate #XSTS103K, headquartered at the Clermont County Airport in Batavia, Ohio.

Cancer Registry Management

Online

Duration: 2 Years Total Credits: 61 Award: AAS

Overview

Cancer registrars are data information specialists who record and capture a complete history, diagnosis, treatment, and health status for every cancer patient in the US. This data provides essential information to researchers, healthcare providers, and public health officials to better monitor and advance cancer treatments, conduct research, and improve cancer prevention and screening programs.

The Cancer Registry Management associate degree program prepares you to work as a data management expert who reports cancer statistics for various healthcare agencies. Credentialed Cancer Registrars support cancer program development, ensure compliance with reporting standards, and serve as a resource for cancer information.

Program Highlights

- National Cancer Registrars Association (NCRA) Accredited
- The University of Cincinnati is one of the few institutions offering this program online.
- Professional internships are available at numerous practice facilities throughout the U.S. (in addition to our state-of-the-art, web-based simulations).

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

Employment of Cancer Registry Managers is projected to grow 11 percent through 2028, much faster than the average for the average. The demand for health services is expected to increase as the population ages. An aging population will need more medical tests, treatments, and procedures. The National Cancer Registrar Association (NCRA) Workforce Study estimated that there were approximately 7,280 registrars in the workforce at that time, with continued growth over the next 15 years. It also noted that additional registrars would be needed to replace those who retire from the field.

To succeed as a cancer registrar, you should be well organized, have excellent communication skills, and be detail-oriented. In addition, you will need a strong background in medical terminology, anatomy, and physiology, and be proficient with technology and data analysis.

Career

Major Map Versions:
2025-2026 Cancer Registry Management

Most cancer registrars work in hospitals. Other work settings include central or state cancer registries, accrediting organizations, government agencies, software vendors, pharmaceutical companies, insurance agencies, and staffing firms. Some cancer registrars are self-employed and/or work from home.

The Bureau of Labor Statistics found that employers require Cancer Registry Technicians to be certified. Prerequisites to sit for the Oncology Data Specialist-Certified (ODS-C) exam have become more rigorous and students who achieve this certificate will be prepared to sit for the exam.

The following information is provided to you per U.S. Department of Education regulations:
The Department of Labor's Standard Occupational Classification (SOC) code for this occupation is 43-3021. See the informational profile for this occupation at O*Net Online.

Regulations published in the Federal Register on October 29, 2010, require institutions to report specific information about students enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). View this program's most recent disclosure information including program costs, median loan debt at program completion, normal time to completion, normal time to completion rates, and job placement rate (if reported) here.

Advising

Academic advising is an essential part of your educational experience.

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science, and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test-taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages, and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute, or two-hour sessions. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days before the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do every week to stay on track with their coursework throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to succeed in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring to a different major to minimize any impact on your degree progress and to verify that you have met all prerequisites.

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Criminal Justice Technology

Corrections

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

Corrections is one of the components of the criminal justice system. It involves the confinement and rehabilitation of those convicted of offenses against the law, including those suspected of a crime and awaiting trial. Usually it is divided into two systems, adult and juvenile, depending on the age of the offender and sometimes the seriousness of the offense. Corrections encompasses halfway houses, probation programs, prisons, jails and parole programs.

Correctional professionals frequently work in a high-stress environment while performing services vital to the criminal justice system.

Success

Good judgment and the ability to think and act quickly are indispensable. You must have high ethical standards. You also must be able to pass drug testing and background checks. Emotional stability and the ability to work well under pressure are essential.

If you work as a correctional officer, you must be in good physical condition, since most employment requires meeting formal standards of physical fitness, eyesight and hearing. You must be able to work long hours standing or walking, sometimes outdoors, in unpleasant weather or surroundings.

Career

If you specialize in corrections, you may pursue several different careers. Some of your opportunities for employment include the following:

- correctional officer
- detention officer
- parole officer
- probation officer

Students who continue their education and earn a bachelor's or graduate degree generally enjoy a broader choice of career opportunities. These more advanced degrees in criminal justice tend to benefit law enforcement officers in terms of promotions and duty assignments. Most federal agencies (such as the FBI) require both a baccalaureate degree and a number of years of experience or more advanced academic preparation.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first year student, you will need to take the placement test. This test does not affect your admission; however, the results are essential for your proper placement in classes. You must complete the placement test before you may register for English or mathematics courses. All placement tests are given free of charge.

While there are no special admissions requirements for the corrections program, you should be aware that most employment in the field will require fingerprinting and a background check. Felony conviction, domestic violence conviction or multiple DUI convictions will very likely prevent your employment in corrections.

Transferring To UC

You must be in good academic standing at the college or university you last attended. We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

While there are no special admissions requirements for the corrections program, you should be aware that most employment in the field will require fingerprinting and a background check. Felony conviction, domestic violence conviction or multiple DUI convictions will very likely prevent your employment in corrections.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program form available from most UC admissions offices (including ours, (513) 732-5319. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

While there are no special admissions requirements for the corrections program, you should be aware that most employment in the field will require fingerprinting and a background check. Felony conviction, domestic violence conviction or multiple DUI convictions will very likely prevent your employment in corrections.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Criminal Justice Technology

Law Enforcement

Duration: 2 Years Total Credits: 60 Award: AAS

Overview

Law enforcement is a component of the criminal justice system. Its primary functions are the prevention of crime, investigation of criminal acts, and the apprehension and detention of those suspected of offenses. While law enforcement officers are concerned with enforcing criminal law, a greater part of their responsibility is the maintenance of order, responding to calls for service and the prevention and deterrence of crime. Most law enforcement is provided by uniformed officers.

Law enforcement can be dangerous and stressful, but highly rewarding for those called to serve.

Success

Honesty, sound judgment, integrity and a sense of responsibility are especially important for those working with the law. Other important characteristics for law enforcers are cultural sensitivity and the ability to think and act quickly. You should also possess excellent communication skills. You need emotional stability and the ability to cope with high levels of stress for prolonged periods. You must also be able to pass drug tests and background checks. You must be physically fit and possess a high degree of courage, self-sacrifice and loyalty.

Career

If you specialize in law enforcement, you may pursue many different career paths. Some of the opportunities for employment include:

- police officer
- detective
- parole officer
- bailiff
- corrections officer
- deputy
- sheriff
- highway patrol officer
- federal air marshal
- border patrol agent
- FBI agent
- university police officer
- transit police officer
- fish and game warden
- DEA agent
- secret service agent

If you continue your education and earn a bachelor's (or graduate) degree, you will generally enjoy a broader choice of career opportunities. These more advanced degrees in criminal justice tend to benefit you in terms of promotions and duty assignments. Most federal agencies and many state agencies require a baccalaureate degree, and many agencies (such as the FBI) also require a number of years of experience or more advanced academic preparation (such as a degree in law).

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

(Additional requirements exist for students entering the police academy.)

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Additional police academy admission requirements include the following:

- Medical exam
- Notarized statement of understanding
- Two letters of reference
- Valid driver's license and proof of insurance
- Fingerprint card
- Personal interview

To learn more about our OPOTA certified police academy, visit our Police Academy website.

You should also take into account that many municipal police departments and sheriff's departments require officers to be at least 21 years old when hired. Therefore, we *strong*ly recommend that you turn 21 by the time you graduate from the academy, before you take your OPOTA certification exam.

If you have been convicted of a felony or domestic violence or have two or more DUI convictions, you cannot be admitted to the police academy.

Transferring To UC

Health Information Systems

Online

Duration: 2 Years Total Credits: 63 Award: AAS

Overview

Health Information Systems is a 100-percent online program. Health information systems organize and enable management of health information by ensuring its quality, accuracy, accessibility and security. Health information technicians must communicate regularly with physicians and other healthcare professionals to clarify health information. The use of electronic health records (EHR) will broaden and continue to change the responsibilities of health information technicians.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

You should possess good oral and written communications skills. Health information professionals often serve as liaisons between healthcare facilities, insurance companies and other healthcare providers. They must be proficient with computers, medical terminology, coding, quantitative analysis, quality management and technology.

Career

Health information technicians can work in acute care hospitals, physician's offices and clinics, long-term care facilities, home health agencies and managed care organizations. Representative job titles include clinical coder, coding manager, clinical data collections and reporting specialist or reimbursement specialist.

The most recent Bureau of Labor Statistics indicates that employment for medical records and health information technicians is expected to grow much faster than average. Employment is projected to increase 20 percent or more per year. In addition, the Region 5 Job Outlook for 2012 for Southwest Ohio Economic Development specifically predicts a 26.4 percent increase in job openings.

Advising

You should check with your academic advisor every semester before you register for classes. Although we cannot offer every course every semester, you will find that most required courses are available each semester.

This course requires a practicum so that students may gain real-life experience. Practicums for students residing outside the Greater Cincinnati area will have practicums arranged in their geographic location.

As an online program, technology is required to successfully complete program requirements. Please review the recommendations for adequate technology.

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

See detailed admission requirements for this program.

Transferring To UC

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

The Health Information Systems Technology Associate Degree at the University of Cincinnati Clermont College is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

Graduates of this program will be able to sit for the RHIT Exam and other certifications.

At this time, students are eligible for AHIMA's e-sign up for student membership using the EPC # 820. Students may also contact an AHIMA Customer Service Representative at (312) 233-1100 with any questions.

Manufacturing Engineering Technology

Duration: **2 Years** Total Credits: **62** Award: **AAS**

Overview

Discover Your Path to a Thriving Career in Manufacturing Engineering Technology at UC Clermont College!

Are you ready to embark on a rewarding career in the dynamic field of manufacturing engineering technology? Look no further than UC Clermont College's Manufacturing Engineering Technology associate degree program!

About the Program: Our Manufacturing Engineering Technology program is designed to provide students with the knowledge, skills, and hands-on experience needed to excel in today's advanced manufacturing industry. Through a combination of classroom instruction, laboratory exercises, and real-world projects, students gain a comprehensive understanding of manufacturing processes, materials, quality control, and automation technologies.

Why Choose UC Clermont's Manufacturing Engineering Technology program?

- Industry-Relevant Curriculum: Our program curriculum is developed in collaboration with industry partners to ensure that students graduate with the skills and knowledge needed to succeed in the workforce.
- Experienced Faculty: Learn from dedicated faculty members who are experts in the field of manufacturing engineering and are committed to student success.
- Hands-On Learning: Gain practical experience through hands-on laboratory exercises and real-world projects that simulate the challenges and opportunities of the manufacturing industry.
- Career Opportunities: Graduates of our Manufacturing Engineering Technology program are prepared for a wide range of career opportunities in industries such as automotive, aerospace, automation, and more.

Program Highlights:

- Courses cover a range of topics, including computer-aided design (CAD), computer aided manufacturing (CAM), manufacturing processes, industrial robotics, lean manufacturing, and more.
- State-of-the-art laboratories equipped with the latest technology and equipment used in the manufacturing industry.
- Internship opportunities with local manufacturing companies to gain valuable hands-on experience and network with industry professionals.
- Small class sizes and personalized attention from faculty and staff to support student success.

Join Us Today! Take the first step towards a successful career in manufacturing engineering technology by enrolling in the associate degree program at UC Clermont College. Whether you're a recent high school graduate, a working professional looking to advance your career, or someone seeking a new path in the manufacturing industry, we welcome you to join our vibrant learning community.

Success

To succeed in the field, you need attention to detail, good communication skills, and should be a well-organized, logical thinker. You should also be curious about how things work and how they are made.

Career

Job outlook is good as manufacturers seek to reduce cost and increase productivity. This is also a time when many "baby-boomers" are retiring. Opportunities will vary widely depending upon the specific industry and emerging technologies, and may also depend on geographic location. However, *skilled* workers are in high demand.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to

create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Physical Therapist Assistant

Duration: **2 Years** Total Credits: **64** Award: **AAS**

Overview

Why study Physical Therapist Assisting?

The UC Clermont Physical Therapist Assistant Program graduates students with an Associate Degree of Applied Science while also preparing each student for licensure and practice within the field of physical therapy as an entry-level physical therapist assistant.

Physical therapist assistants (PTAs) are educated and licensed clinicians who provide care under the direction and supervision of a licensed physical therapist. Physical therapist assistants implement components of individualized patient care, obtain data related to the treatment provided, and collaborate with the physical therapist to modify care as necessary. As a team, physical therapists and physical therapist assistants work to help people improve movement function.

The program's well-rounded curriculum is designed to prepare graduates who will be effective physical therapy clinicians in a wide variety of clinical settings. The program incorporates traditional coursework and clinical education experiences. Courses may involve lectures, active lab demonstrations, course-related field trips, and observations at off-campus sites.

Graduates of the program consistently exceed national averages on board exam pass rates.

To work as a physical therapist assistant in the United States, you must graduate from a Commission on Accreditation in Physical Therapy Education-accredited physical therapist assistant education program and pass a state-administered national exam to obtain licensure or certification required in most states.

Details of the program, including information sessions, are posted on the Physical Therapist Assistant Program Information Page.

State Authorization

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

The Physical Therapist Assistant Program prepares graduates for a career as a physical therapist assistant. Currently, in Ohio, PTA is the #2 top job in Ohio for people with associate degrees

Physical Therapist Assistants are educated and licensed clinicians who provide care under the direction and supervision of a licensed physical therapist. Physical therapist assistants implement components of individualized patient care, obtain data related to the treatment provided, and collaborate with the physical therapist to modify care as necessary. As a team, physical therapists and physical therapist assistants work to help people improve movement function.

Once you graduate from a PTA program, pass the board exam, and meet any state laws and exams that are required, you are eligible to work as a licensed Physical Therapist Assistant.

Graduates of our program find careers working with patients across the lifespan in a variety of locations including:

- Outpatient clinics
- Hospitals
- Private physical therapy offices
- Home health care
- Skilled Nursing Facilities

Physical therapist assistants provide care to people of all ages who have functional problems, including but not limited to:

- Cardiovascular & Pulmonary Conditions (heart attack, cystic fibrosis, bypass surgery)
- Integumentary Conditions (wounds, burns)
- Neurological Conditions (cerebral palsy, multiple sclerosis, spinal cord injury, stroke)
- Orthopedic Conditions (sprains, fractures, sports injuries, amputations, back and neck pain).

- The Surgeon General recently urged physicians to battle against opioid addiction. Physical therapy is recommended as a first-line approach to managing pain.

Physical therapist assistants have the opportunity to increase their knowledge and skills through APTA's PTA Advanced Proficiency Pathways program. Content areas are acute care, cardiovascular/pulmonary, geriatrics, neurology, oncology, orthopedics, pediatrics, and wound management.

Admission Requirements

Application Process for the UC Clermont Physical Therapist Assistant (PTA) Program

At UC Clermont, admission to the college is open-access; however, the Physical Therapist Assistant Program follows a selective admission process and requires a separate application.

Application Steps:

1. **College Admission:** All prospective students must first be admitted to UC Clermont by completing the general college application.
2. **Program Admission:** To apply for the Physical Therapist Assistant Program, students must submit a separate application during the fall semester while completing the required pre-requisite courses.
3. **Selective Admission:** The program accepts a limited number of students (23) annually into the second year (technical year) of the program, starting in the summer semester. Admission is based on pre-determined criteria.

Information Sessions: We encourage all interested students to attend one of our bi-monthly information sessions to learn more about the PTA profession and the admission process. You may sign up for an information session on our PTA Program Information Page.

Application Access: The online application for the second year/technical year can be accessed through the Selective Program Admission website.

Further Assistance: For detailed information about the PTA program and guidance through the application process, please visit our PTA program page on Admission Criteria or consult with an Allied Health Academic Advisor.

Transferring To UC

While UC Clermont accepts transfer applications all year long, admission to the technical year of the program is through a selective admission process and requires a separate application that is open every November-December.

Please contact Carolyn Shisler, Program Director, to determine if your previous college coursework will apply toward the prerequisites required for this degree. Generally, previous college coursework will apply as long as the previous coursework was taken at an institution accredited by the Higher Learning Commission and the science coursework has been taken within the past 6 years.

The program offers special informational sessions often to assist students in their transition. These are announced college wide and are available on the PTA Program Information Website.

Please be aware admission to the PTA cohort happens ONLY once per year.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing an application for change in college and program. The college recommends you see your advisor before transferring into a different major to minimize any impact on your degree progress.

Admission to the second-year technical core is a selective admission process and requires a separate application during November-December of your first year.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required coursework and program requirements. These include demonstration/compliance of PTA program essential functions, the Professional Behaviors of the 21st Century, APTA Core Values, and Standards of Ethical Conduct for Physical Therapist Assistants.
- Obtain at least a 2.0 university grade point average.
- Be in good academic and professional standing.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Traditional, non-transfer students should plan to start their Physical Therapist Assistant coursework in the Fall semester, because the basic series of foundation courses required for this program starts in the fall and continues sequentially through the spring. Those courses are required for review of your application into the technical core year.

You must also apply separately for admission into the second, technical year of the program during the fall semester. Deadlines are posted on the PTA Program Website and the PTA Applications Community in Teams.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Physical Therapist Assistant Program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). The program was first accredited through the University of Cincinnati College of Allied Health in 1987. Transfer of sponsorship to Clermont College was approved in November 2009, maintaining its full accreditation status. The Commission on Accreditation in Physical Therapy Education has re-accredited this program until December 31, 2026.

Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703-706-3245; email: accreditation@apta.org

To confirm the current CAPTE accreditation status for the program, please visit CAPTE Accreditation Verification Page

The program curriculum meets the state educational requirements for licensure or certification in all states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands secondary to its accreditation by the Commission on Accreditation in Physical Therapy Education based upon the following: Accreditation of a physical therapist or physical therapists assistant program by CAPTE satisfies state educational requirements in all states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. Thus students graduating from CAPTE Accredited physical therapist and physical therapist assistant education programs are eligible to take the National Physical Therapy Examination and apply for licensure in all states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. For more information regarding state qualifications and licensure requirements, please refer to the Federation of State Boards of Physical Therapy.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Respiratory Care

Duration: **2 Years** Total Credits: **65** Award: **AAS**

Overview

Respiratory Care encompasses the evaluation, treatment, and care of patients with breathing or cardiopulmonary disorders. Practicing under the direction of a physician, respiratory therapists must be proficient in all areas of respiratory care, such as bedside pulmonary care, life-support systems management, diagnostic testing, pulmonary rehabilitation, and long-term care. Respiratory therapists evaluate and treat all types of patients, from premature infants whose lungs are not fully developed to elderly people whose lungs are diseased.

Program graduates earn an Associate of Applied Science degree and are eligible to take the National Board for Respiratory Care exam required to earn the Registered Respiratory Therapist (RRT) credential. Additionally, students may apply for a student license to practice respiratory care in the state of Ohio after successful completion of the first year in the program. Upon completion of the associate's degree program, students have the option of continuing their education in the University of Cincinnati's online Bachelor of Science in Respiratory Therapy (BSRT) degree if desired.

For more information on certification and registry, visit the National Board for Respiratory Care website.

Details of the program, inlcuding information sessions, are posted on the Respiratory Care Important Information page.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

There are essential functions required of all students enrolled in the Respiratory Care Program. Respiratory therapists are responsible for the care of patients, some critically ill. RTs often use highly technical life support equipment and often make decisions that can affect patient outcomes and safety. Therefore, to be successful in the Respiratory Care Program, all students must be able to perform, or learn to perform, the essential functions listed below. Students who are not capable of performing, or do not demonstrate that they are effectively performing these essential functions in the classroom, lab, or clinical setting will not be permitted to continue in the Respiratory Care Program.

Career

Respiratory care is an excellent, constantly growing and changing field. The U.S. Department of Labor reports that respiratory care is one of the fastest-growing careers in the healthcare field, expected to grow 14 percent through 2031, with a median salary of $61,830.

The graduating class of 2020 saw 100 percent of students find a job within six months of graduation. Their employers rated them as satisfactory in all areas of review. One hundred percent of this class passed the Therapist Multiple Choice Board Exam.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

Application to the UC Clermont Respiratory Care program is a two-level process. UC Clermont is an open-access college, and all students are admitted after completing the application. However, admission into the Respiratory Care Program is selective and requires a separate application, which should be submitted between January 1 and February 15 of every year. The program admits up to 25 students each fall semester. Admission is selective and based upon pre-determined criteria. Please see your allied health academic advisor for complete information regarding this process.

The online application can be accessed on UCBA's Undergraduate Admissions page, and a PDF summary of the admissions process is shared on the Respiratory Care Important Information page.

Admission into UC Clermont

After the college receives your application, transcripts, and placement test scores, we will review your file. The college will notify you of your admission status and assign you an advisor. You must meet with your allied health advisor **before** registering for classes. Please call 513-558-8317 or email clermont.advising@uc.edu to schedule your appointment.

The University of Cincinnati reaffirms its policy that discrimination based on race, color, religion, national origin, ancestry, disability, medical condition, genetic information, marital status, sex, age, sexual orientation, veteran status, or gender identity and expression shall not be practiced in any of its activities. **University Rule 3361: 10-13-01**

Application to the UC Clermont Respiratory Care Program

All students admitted to Clermont College who are interested in Respiratory Care will first be admitted to the college as a Pre-Respiratory care major. Students will remain in the Pre-Respiratory Care program while they take necessary pre-requisite courses required to become eligible for admission to the Respiratory Care Program, and/or while they await the application window.

All applicants to the program must have:

- a high school diploma or GED
- completed high school or college-level biology with a grade of **C** or better (Applicants without this background may take college-level science courses at UC Clermont before applying to the technical core. See an Academic Advisor for appropriate college-level courses.)
- an overall GPA of 2.75 or higher
- test into college-level reading, writing, and algebra or statistics (as determined by the placement test)

Once admitted into the Respiratory Care Program, you will be required to submit the following documentation before you begin the program:

- Physical examination
- TB test
- Proof of current immunizations
- Background check
- American Heart Association (AHA) Basic Life Support (BLS) for the Healthcare Provider

The respiratory class sequence starts each fall semester and continues for five semesters including one summer term. The respiratory care courses are offered during days, Monday through Friday. (Many non-respiratory care classes are offered in the evenings or online.)

Please Be Aware

If you have been convicted of a felony or misdemeanor, especially if it involves abuse of alcohol or controlled substances, you may be disqualified from licensure. If this applies to you, please discuss your personal situation with the respiratory care state licensure board that governs the state in which you will work. Ohio, Kentucky, and Indiana all require background checks as part of their standard licensing application process (For Ohio, please contact the State Medical Board of Ohio in Columbus, Ohio, (614) 466-3934).

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

You must also meet all first-year admission requirements.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline

Application Deadlines

For specific deadline information, visit the Admissions webpage.

You should plan to start respiratory care in the fall semester, because the basic series of foundation courses required for this program starts in the fall and continues sequentially through the spring.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The UC Clermont Respiratory Program, CoARC #200260, an Associate Degree program, is located on the UC Clermont campus and is accredited by the Commission on Accreditation for Respiratory Care (www.coarc.com).

Program Outcomes

Programmatic outcomes data reported on the CoARC website include:

- 3-year time period being reported
- RRT credentialing success
- achievement of the high cut score on the TMC Exam
- retention
- job placement
- overall graduate and employer satisfaction
- total number of program enrollees
- total number of program graduates
- maximum annual enrollment

Respiratory Care

AAS

2025-2026 Respiratory Care (AAS)

Duration: 2 Years
★Minimum Credits: 65 Credits

Fall Semester Year 1

Prerequisites to the Respiratory Care Program

Course	Title/Desc	Credit
	Respiratory Care Prerequisites: Completed high school or college biology within the last 6 years with a C or better; 2.75 overall GPA for at least 12 credit hours earned from the most recent qualifying institution; and eligible to take MATH1021 and ENGL1001 (C min)	0 - 6

Course	Title/Desc	Credit
ALH1005	Health Care Edge (C min)	1
BIOL2001C	Anatomy and Physiology I (C min)	4
ENGL1001	English Composition (C min)	3
RT1001C	Introduction to Respiratory Care (C min)	4
RT1072C	Cardiopulmonary Anatomy and Physiology (C min)	4

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL2002C	Anatomy and Physiology II (C min)	4
BIOL2031C	Microbiology for Health Professionals (C min)	3
RT1002C	Respiratory Care Treatment Modalities (C min)	4
RT1012C	Respiratory Clinical Practice I (C min)	1
RT1073C	Cardiopulmonary Disease (C min)	4

Summer Semester Year 1

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition (C min)	3
RT1003C	Introduction to Mechanical Ventilation (C min)	4
RT1013C	Respiratory Clinical Practice II (C min)	2
BoK: FA,HP,HU	General Education: Complete one 3-credit hour course in Fine Arts, Historical Perspectives, or Humanities & Literature (C min)	3

Fall Semester Year 2

Course	Title/Desc	Credit
ALH2071	Pathophysiology for Health Professions (C min)	3
RT2001C	Advanced Critical Respiratory Care (C min)	3
RT2002C	Specialties in Respiratory Care (C min)	2
RT2011C	Respiratory Clinical Practice III (C min)	2

MATH/STAT Requirement
Choose one

Course	Title/Desc	Credit
MATH1021	College Algebra (C min)	3
STAT1034	Elementary Statistics I (C min)	3

Spring Semester Year 2

Course	Title/Desc	Credit
RT2003C	Respiratory Care Seminar (C min)	2
RT2004C	Respiratory Care Capstone (C min)	1
RT2012C	Respiratory Clinical Practice IV (C min)	2
BoK: SS	Social Science Elective: Complete one 3-credit hour Social Sciences course (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Surgical Technology

Duration: 2 Years Total Credits: 63 Award: AAS

Overview

As critical members of life-saving teams, surgical technologists are part of the sterile team in surgical operations under the supervision of a surgeon. Also called scrubs or operating-room technicians, surgical technologists work alongside surgeons, first assistants, anesthesiologists, and circulating nurses in the operating room.

Before an operation, before scrubbing for surgery, a surgical technologist might help the team assemble and adjust non-sterile equipment, ensuring it works properly. Surgical technologists help prepare the operating room by scrubbing, gowning, and gloving to set up a sterile back table with surgical instruments, equipment, supplies, drapes, and solutions. Once a patient is positioned and prepped, the surgical technologist will help the surgeon and surgical assistant don sterile gowns and gloves and then apply sterile surgical drapes to the patient.

During surgery, surgical technologists pass instruments and other sterile supplies to surgeons and surgical assistants. They may hold retractors and cut sutures. They are responsible for the counting of sponges, needles, supplies, and instruments. Surgical technologists help apply dressings at the end of a procedure and care for specimens prior to taking them for laboratory analysis.

After an operation, surgical technologists may help transfer patients to the recovery room, or intensive care unit, as well as clean and restock the operating room. Some other might work in the sterile processing department decontaminating instruments and equipment or re-assembling instrument sets and operating sterilizers.

The operating room is a fast-paced environment. Individuals well suited for this program enjoy challenges, multi-tasking, and even a degree of stress in the work environment.

Visit the UC Clermont Surgical Technology website.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

Surgical technologists should have an excellent sense of responsibility, work quickly with attention to detail, deal well with emergencies and be able to prioritize tasks. They also need good manual dexterity and a high tolerance for blood, other bodily fluids and odors. Technologists tolerate standing for long hours without food, drink or bathroom breaks. They also must be conscientious, orderly and emotionally stable to handle the demands of the operating-room environment. Technologists must be willing to study throughout their careers in order to keep up with medical advances.

Career

Employment opportunities include the following:

- certified surgical technologist
- sterile processing manager
- surgical technology instructor
- sterile processing instructor

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Additional admissions requirements to be completed after admission to the program include the following:

- Physical exam
- Immunizations
- Proof of health insurance
- Background check
- Drug screening

You must also have successfully taken high school biology and chemistry within six years with a C or better. If not, you must take Biology for Health Professionals and Technical Programs I (BIOL1051C), and Introduction to Chemistry and Biochemistry (CHEM1020C) lecture and lab and have an overall GPA of 2.75 before joining the list to start the Surgical Technology program.

Due to the popularity of the program and a limit on the number of clinical sites available to the program, there is a possibility there will be a waiting list. The pre-Surgical Technology Advisor will have information about the list and, if applicable, a potential wait time.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the corresponding placement test.

You must also meet all the admissions requirements of a beginning student.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

You must also meet all the admissions requirements of a beginning student.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements
- Obtain at least a 2.0 university grade point average
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension
- Meet the college's residency requirement of 20 semester credit hours
- File formal application for the degree by the posted semester of graduation deadline

---

Prior to graduation, you must apply for the certification exam through the National Board of Surgical Technology and Surgical Assisting (NBSTSA) to become a Certified Surgical Technologist (CST). This exam will be administered prior to graduation on the Clermont campus.

For more information on certification, visit the National Board of Surgical Technology and Surgical Assisting webpage.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
Our surgical technology program is fully accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Biological Sciences

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Biology is the study of living organisms and their relationship to their environment. Study can be on the molecular level, the function level, the organism level or the environment level. Areas of study are as wide and varied as life itself. While much of the work of biology is done in research laboratories, some of it is also done in the field — collecting specimens, observing natural behaviors or completing population studies.

Many who study biological sciences do so as preparation for a career in medicine or the allied health professions.

Success

Students who are successful in biology enjoy discovery of the processes of the natural world through observation and experimentation. They have well-developed critical thinking and problem-solving skills and are equally adept at learning through independent reading, hands-on activity, and visual observation. Because biology is a diverse pursuit, a wide variety of personality types can enjoy success. While many biologists work alone or in small groups, most regularly interact within the larger scientific community. As such, successful biology students are both independent and sociable.

Career

A bachelor's degree is the minimum educational requirement for many entry-level jobs in biology. Although your career opportunities are somewhat limited without an advanced degree, you can start your career in testing and inspecting, quality control or as a biological research technician. You may, like many biological sciences graduates, enter medical, dental, veterinary or allied health professional schools.

While a master's degree is sufficient for some jobs in applied research, you will need your PhD for college teaching, independent research and for advancement to administrative research and management positions.

Minoring

You cannot minor in the AS Biological Sciences program.

If you are enrolled in a two-year transitional degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year baccalaureate degree. Generally, you will select a minor when you transfer to your four-year institution.

Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

You must be in good academic standing at the college or university you last attended. We accept transfer applications all year long and you can start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Biological Sciences

AS

2025-2026 Biological Sciences (AS)

Duration: 2 Years
★Minimum Credits: 61 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL1081	Biology I: Molecules, Cells, and the Foundation of Life	3
BIOL1081L	Biology I Laboratory	1
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENGL1001	English Composition	3
INTR1020	Introduction to Science Professions	1
STAT1034	Elementary Statistics I	3

Spring Semester Year 1

Course	Title/Desc	Credit
BIOL1082	Biology II: Evolution, Physiology, and Ecology	3
BIOL1082L	Biology II Laboratory	1
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
MATH1044	Applied Calculus I	3
BoK: SS	Social Science Elective	3

Fall Semester Year 2

Course	Title/Desc	Credit
BIOL2083	Genetics	3
HIST BoK: HP	History Elective Select one course with the HIST subject code that meets the Historical Perspectives (HP) Breadth of Knowledge (BoK) requirement.	3

Spring Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition	3
BoK: HU	Humanities Elective Select one course that meets the Humanities & Literature (HU) Breadth of Knowledge (Bok) requirement.	3

Chemistry Directed Elective with Lab

Student will select to begin the Biochemistry with lab sequence or the Organic Chemistry with lab sequence. CHEM 2040/2040L is recommended for students who plan to apply to professional school (Medical, Dental, Veterinary, Graduate schools). This decision should be made in collaboration with an academic advisor.

Course	Title/Desc	Credit
CHEM2030	Survey of Biochemistry I	4
CHEM2030L	Survey of Biochemistry Laboratory I	1
CHEM2040	Organic Chemistry I	4
CHEM2040L	Organic Chemistry Laboratory I	1

Faculty Directed Elective

Student may select BIOL2084C Ecology and Evolution or a Social Science Elective. Please see an Academic Advisor prior to registration due to the unique nature of this Faculty Directed Elective and future Faculty Directed Elective.

Course	Title/Desc	Credit
BIOL2084C	Ecology and Evolution	4
BoK: SS	Social Sciences Elective	3

Chemistry Directed Elective with Lab

Student will select to begin the Biochemistry with lab sequence or the Organic Chemistry with lab sequence. CHEM 2041/2041L is recommended for students who plan to apply to professional school (Medical, Dental, Veterinary, Graduate schools). This decision should be made in collaboration with an academic advisor.

Course	Title/Desc	Credit
CHEM2031	Survey of Biochemistry II	4
CHEM2031L	Survey of Biochemistry Laboratory II	1
CHEM2041	Organic Chemistry II	4
CHEM2041L	Organic ChemistryLaboratory II	1

Faculty Directed Elective

Choose from BIOL2085C Cell Biology OR Social Science Elective. Please note if a Social Science Elective was chosen to satisfy the Fall Semester Biology Faculty Directed Elective, then BIOL2085C Cell Biology must be selected. Seek recommendation from an Academic Advisor prior to registration.

Course	Title/Desc	Credit
BIOL2085C	Cell Biology	4
BoK: SS	Social Sciences Elective	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Chemistry

Duration: 2 Years Total Credits: 62 - 66 Award: AS

Overview

Chemistry is the study of material on the molecular level: how molecules are structured, how they react with each other and under what conditions, how can they be modified and how each modification affects physical properties. There is nothing that chemistry does not affect — from food to medicine, from pollution control to paint formulation, from permanent-press clothes to kitchen countertops. Most of the work of chemistry is done in research, applications or quality-control laboratories.

Many who study chemistry do so as preparation for a career in medicine or pharmacology.

UC Clermont's Chemistry associate degree (AS) program is designed so that students may earn an associate degree in science and transfer into the third year of the bachelor of science (BS) program at the University of Cincinnati's College of Arts and Sciences (A&S), provided all other admission requirements of that college are met.

The AS chemistry program is a rigorous program of study intended for students seeking careers as professional chemists, often with an advanced degree in chemistry.

Success

The AS in chemistry program is well suited for students with a strong background and interest in science. Since the calculus and physics requirements for the AS program are more extensive than for the AA, the AS is most appropriate for students with strengths in both science and mathematics. The program provides for extensive laboratory work; therefore, the enjoyment of hands-on laboratory work is important. Chemistry majors in this program also learn to observe critically and record what happens in the laboratory; they analyze data and apply chemical knowledge learned in the classroom to draw conclusions about their observations.

Career

Graduates with a bachelor's degree in this major are employed as:

- chemists in the manufacturing industry and state, local or federal governments
- chemistry teachers
- industrial research and development scientists
- forensic scientists
- physicians and health care professionals

Many of the students who complete the BS in chemistry program go on to graduate schools, primarily into doctoral programs. Others go to professional schools, including medicine, pharmacy and dentistry.

Minoring

You cannot minor in the AS Chemistry program.

If you are enrolled in a two-year transitional degree program, you will spend most of your classroom time acquiring the foundational courses for your four-year baccalaureate. Generally, you will select a minor when you transfer to your four-year institution.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Early Childhood Education

Duration: **2 Years** Award: **AS**

Overview

The UC Clermont Early Childhood Education program is designed for those interested in teaching children in a variety of pre-kindergarten through 5th grade settings, including preschools, Head Start programs, child-care centers, public and private schools. As an aspiring early childhood educator, this program will help you understand the complex human and social factors involved in educating young children, as well as practices that support diversity and build a foundation for lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to UC Clifton to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Bachelor Degree:

- teacher
- tutor
- instructional coordinator
- curriculum designer

Associate Degree:

- teacher assistant
- child care worker

Environmental Studies

Duration: 2 Years Total Credits: 60 Award: AS

Overview

Environmental studies provides an opportunity for the systematic investigation of the natural world and the interaction of humans with their own environment. Modern environmental issues are highly complex and transcend traditional academic disciplines. The real-world solutions to these conflicts require not only expertise from the natural and social sciences — biology, economics, engineering and political sciences — but also an interdisciplinary perspective. This calls for professionals who take a systems approach that addresses the complex interrelationships within and among components of natural, built and social environments. The associate degree in Environmental Studies provides students with the interdisciplinary training and conceptual framework required to analyze and respond to the world's dynamic environmental problems.

Success

The keys to success in environmental studies are both a curiosity about, and a passion for, the natural world. The complex nature of environmental issues and solutions also requires creativity in problem-solving, flexibility, imagination and a talent for both written and oral communication.

You should have good math and problem-solving skills, enjoy science and be detail oriented. You should also enjoy hands-on work. Depending on your specialty, professionals should enjoy working outdoors, often under challenging conditions (field work) or working with animals.

Career

A bachelor's degree is the minimum educational requirement for many beginning jobs in environmental studies, and UC Clermont's associate degree program is designed to transition to the bachelor's degree offered by UC's College of Arts and Sciences (A&S).

Students may choose to pursue professional careers or to continue their studies in either graduate (MAs or PhDs in fields such as biology, ecology or environmental science/studies) or professional schools (e.g., law school, education or medicine). Career opportunities include positions in federal, state and local agencies, corporations, non-profit organizations, consulting firms and academic institutions.

The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Environmental Studies

AS

2025-2026 Environmental Studies

Duration: 2 Years
★Minimum Credits: 60 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
CHEM1040	General Chemistry I	4
CHEM1040L	General Chemistry Laboratory I	1
ENGL1001	English Composition	3
EVST1011	Introduction to Environmental Studies I	3
INTR1020	Introduction to Science Professions	1

Spring Semester Year 1

Course	Title/Desc	Credit
CHEM1041	General Chemistry II	4
CHEM1041L	General Chemistry Laboratory II	1
EVST1012	Introduction to Environmental Studies 2	3
BoK: SS	Social Sciences	3

Quantitative Reasoning Sequence Options
Students are required to complete one of the following course sequences.

Course	Title/Desc	Credit
	Sequence Option 1- MATH1044 and MATH1045	6
	Sequence Option 2-MATH1061 and MATH1062	8
	Sequence Option 3-STAT1031 or STAT1034 and MATH1044	6
	Sequence Option 4-STAT1031 or STAT1034 and MATH1061	7

Quantitative Reasoning Sequenced course
Students will select the next available course in the Quantitative Reasoning Sequence previously selected.

Course	Title/Desc	Credit
MATH1045	Applied Calculus II	3
MATH1062	Calculus II	4
MATH1061	Calculus I	4
MATH1044	Applied Calculus I	3

Fall Semester Year 2

Course	Title/Desc	Credit
EVST2084C	Ecology and Evolution	4
PHIL2026	Philosophy and the Environment	3
BoK: HP	Historical Perspectives	3
	Faculty Directed Elective Students transitioning to the Bachelor's degree in Environmental Studies offered by UC's College of Arts will select a course that will satisfy the requirement towards a MINOR. Please seek guidance from an Academic Advisor to satisfy this requirement. The official MINOR will not have to be declared until after admission to the BS program.	3
	Free Elective Students interested in transitioning to the Bachelor's degree in Environmental Studies offered by UC's College of Arts should consider completing a Foreign Language sequence.	3

Spring Semester Year 2

Course	Title/Desc	Credit
GEOL2000C	Geology of Energy Resources	3
ENGL2089	Intermediate Composition	3
BoK: FA,HU	Fine Arts or Humanities	3
	Faculty Directed Elective Students transitioning to the Bachelor's degree in Environmental Studies offered by UC's College of Arts will select a course that will satisfy the requirement towards a MINOR. Please seek guidance from an Academic Advisor to satisfy this requirement. The official MINOR will not have to be declared until after admission to the BS program.	3
	Free Elective Students interested in transitioning to the Bachelor's degree in Environmental Studies offered by UC's College of Arts should consider completing a Foreign Language sequence.	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Neuroscience

Duration: 2 Years Total Credits: 60 Award: AS

Overview

Why study Neuroscience?

Embark on a journey through the fascinating world of brain and behavior with the Neuroscience program at UC Clermont College. This program lays the foundational knowledge necessary for students interested in exploring the complexities of the nervous system and its influence on human function. The Associates of Science (AS) Degree program in Neuroscience provides students with the first two years of general education requirements within the discipline so they can easily and efficiently transfer into the BS degree program in Neuroscience at UC's College of Arts and Sciences (A&S).

Students in this transfer program may continue their studies to obtain a BS degree. Those who graduate with a degree in neuroscience may also find careers in clinical research, pharmaceutical sales, medicine, and other biopsychological-based positions, including the following positions:

- Laboratory Technician
- Medical Scientist
- Biological Technician
- Researcher / Research Associate
- Laboratory Technologist
- Laboratory Manager
- Clinical Research Coordinator / Manager
- Biologist
- Microbiologist

Career

Graduates of the Neuroscience program are well-prepared to continue their studies and eventually pursue careers in various fields such as:

- Clinical Psychology: Work in mental health settings to assess, diagnose, and treat mental, emotional, and behavioral disorders.
- Neurological Research: Contribute to groundbreaking lab studies that explore the brain's functions and its role in health and disease.
- Neuromarketing: Apply neuroscience principles to marketing and consumer behavior, helping companies understand consumer decisions.
- Healthcare: Prepare for positions that support neurologists and psychiatrists in medical settings, enhancing patient care and therapy outcomes.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Pre-Elementary Education

Duration: 2 Years Total Credits: 63 Award: AS

Overview

The UC Clermont Pre-Elementary Education program is designed for those interested in teaching children in various pre-kindergarten through 5th-grade settings, including preschools, Head Start programs, child-care centers, and public and private schools. As an aspiring early childhood educator, this program will help you understand the complex human and social factors involved in educating young children, as well as practices that support diversity and build a foundation for lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to UC Clifton to complete their preparation and earn a bachelor's degree.

NOTE: Education majors must volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

A career in elementary education involves working with young children, typically ranging from kindergarten to fifth grade, and focusing on their academic, social, and emotional development. Elementary school teachers play a crucial role in shaping the educational foundation of children and helping them build essential skills.

Here are a few key careers in elementary education:

1. Elementary School Teacher: As an elementary school teacher, you'll be responsible for planning and delivering lessons across various subjects, including math, science, language arts, social studies, and more. You'll create a positive learning environment, manage classroom behavior, assess student progress, and provide individualized instruction to meet diverse needs. You'll work closely with students, parents, and other educators to foster a supportive and engaging learning experience.

2. Special Education Teacher: Special education teachers work with students who have unique learning needs or disabilities. They provide individualized instruction and support to help students overcome challenges and reach their full potential. Special education teachers collaborate with other educators, therapists, and parents to develop personalized education plans, adapt curriculum materials, and create inclusive classrooms. UC Clermont does have a Pre-Special Education program would prepare you in this area should you be interested.

3. Reading Specialist: Reading specialists focus on developing strong literacy skills in elementary school students. They assess students' reading abilities, provide targeted instruction, and offer intervention strategies for struggling readers. Reading specialists also collaborate with teachers to integrate effective reading strategies into the classroom curriculum and support professional development in literacy instruction.

4. School Counselor: Elementary school counselors provide guidance and support to students regarding academic, personal, and social matters. They help students develop positive relationships, navigate challenges, and explore their interests and goals. School counselors may also facilitate group counseling sessions, conduct assessments, and collaborate with teachers and parents to ensure students' well-being and success.

5. Curriculum Specialist: Curriculum specialists work with schools or districts to develop, implement, and evaluate educational programs and instructional materials. They analyze curriculum standards, design engaging lessons, and provide professional development to teachers. Curriculum specialists may also assess student achievement, recommend educational resources, and stay updated on current trends and research in elementary education.

6. School Administrator: School administrators, such as principals or assistant principals, oversee the overall operation of an elementary school. They provide leadership, manage staff, ensure a safe and productive learning environment, and collaborate with teachers, parents, and the community. Administrators handle budgeting, curriculum planning, staff evaluation, and decision-making to support the school's mission and promote student success.

These are just a few examples of careers in elementary education. Each role requires a passion for working with children, strong communication and organizational skills, and a commitment to fostering a positive learning environment as well as the appropriate degree and licensure. Please speak with an Admission representative to identify the most appropriate program for you. Many educators find these careers rewarding as they make a lasting impact on the lives of young learners.

Pre-Elementary Education

AS

2025-2026 Pre-Elementary Education: UC Transition Program (AS)

Duration: 2 Years
★Minimum Credits: 63 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
CI1001	Educational Technology (C min)	3
EDST1001	Historical Foundations in Education (C min)	3
ENGL1001	English Composition (C min)	3
GEOL1003	Physical Geology (C min)	3
GEOL1003L	Physical Geology Laboratory (C min)	1
PRFS1100	First Year Experience UC Clermont College	1
STAT1034	Elementary Statistics I (C min)	3

Spring Semester Year 1

Course	Title/Desc	Credit
ECE1001	Foundations in Early Childhood Education (C min)	3
EDST1002	Educational Psychology (C min)	3
PHYS	Physics Elective Students may select a Physics course. (C min)	3
SPED1001	Individuals with Exceptionalities (C min)	3

History Elective
Student must select a course listed below to satisfy degree requirements.

Course	Title/Desc	Credit
HIST1001	United States History I (C min)	3
HIST1002	United States History II (C min)	3
POL1010	Introduction to American Politics (C min)	3

Fall Semester Year 2

Course	Title/Desc	Credit
BIOL1021	How Life Works: Introductory Biology I (C min)	3
BIOL1021L	Introductory Biology I Lab (C min)	1
ECE2000	Introductory Child Development (C min)	3
ECE2025	Families, Communities, and Schools (C min)	3
ENGL2089	Intermediate Composition (C min)	3
HIST2022	Native American History (C min)	3

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) during the fall semester (2nd year) for Elementary Education majors and begins Spring Semester Year 2. Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. There are approximately 75 seats available for each application round. Admission is competitive. Minimum requirements for consideration are: 1. Official documentation of passing scores on Aleks/Math Placement Test (MPT) or waiver for scores of 22-ACT or 1080-SAT scores (math/verbal combined score) 2. Minimum GPA: Pre-Elementary Education : 3.0 cumulative GPA **Please note that cumulative GPA includes all transfer work** 3. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 4. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here:https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose to their advisor. Please note: All students are encouraged to apply if not meeting minimum requirements. Students will work with a CECH Academic Advisor for a holistic review and to discuss all options available to them for admission to the CECH Professional Cohort.

Spring Semester Year 2

Professional CECH Cohort curriculum

Students admitted to the College of Education, Criminal Justice, and Human Services (CECH) will select these courses to complete the Associate's degree.

Course	Title/Desc	Credit
ELEM3006	Early Childhood Learning Lab (C min)	3
ELEM3010	Foundations of Math and Science (C min)	3
ELEM3012	P-5 Licensure: Preschool Practicum (C min)	3
ELEM3018	Foundations of Literacy for Elementary Educators (C min)	3
LSLS2005	Phonological Awareness and Phonics (C min)	3

Alternate Curriculum

Students not admitted to the Professional Cohort offered by the College of Education, Criminal Justice, and Human Services (CECH) will select these courses to complete the Associate's degree. Students should meet with their academic advisor.

Course	Title/Desc	Credit
CI3003	Teaching and Learning in Diverse Classrooms (C min)	3
COMM1071	Introduction to Effective Speaking (C min)	3

Course	Title/Desc	Credit
EDST2099	Critical Pedagogy in Education (C min)	3
GEOG	Geography Elective Student will select any course in the Geography (GEOG) discipline. (C min)	3
PSYC1001	Introduction to Psychology (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Health Sciences

Pre-Athletic Training

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Clermont College offers a Pre-Health Science program that provides students with the appropriate course work to transition to the Pre-Athletic Training track within the College of Allied Health Sciences at University of Cincinnati. Continuation into that program specifically prepares students for entry into graduate level Athletic Training programs, which also can also be completed at the Clifton campus. The program also provides you with alternative options at the bachelor's level students a variety of fitness related certifications and careers.

The associates degree program provides students with a comprehensive background in the basic sciences which is then combined with applied studies in exercise physiology, biomechanics, kinesiology, sports and wellness during the bachelors program.

Career

The most common career goal for students in the Pre-Health Sciences Athletic Training track is becoming an athletic trainer.

According to the Bureau of Labor Statistics, the job outlook for athletic trainer is expected to grow 23% by 2030 (much faster than the national average) and the current median pay is 49,860 per year.

Athletic trainers generally work in:

- Educational settings: Universities and Colleges, High Schools, Private Offices and Clinics
- Hospitals
- Fitness Centers
- Physicians' Cffices
- Professional Sports Teams and More

If you decide not to pursue an athletic training degree, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

- Graduate Education Opportunities
- Master of Athletic Training Programs
- Occupational Therapy Programs
- Orthotics and Prosthetics Programs (CO or CP)
- Public Health Programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics Programs (MS or PhD)
- Professional Certification Opportunities
- American College of Sports Medicine (ACSM)
- Nutrition Programs and More

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Writing Center (AWC) – The AWC can help with any writing assignment for any course and at any stage of the writing process. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions in more than 200 undergraduate courses including subjects such as math, science, languages, business and writing. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Pre-College Math Tutoring – Pre-College Math Tutoring Services helps students succeed in Mathematical Literacy (MATH 0029), Fundamentals of Algebra (MATH 0030), Introductory Algebra (MATH 0031) and Intermediate Algebra (MATH 0034). Group study sessions, individual tutoring or email tutoring are available. Information is provided in the course syllabus to help guide students to the study group sessions for that course. Math Learning Resources by math topic that include short instructional videos and worksheets are available on the UC Clermont Learning Commons website.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont professional tutor on Mondays, Wednesdays and Fridays from 10 a.m.-12 p.m. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Health Sciences

Pre-Medicine/Physician Assistant

Duration: **2 Years** Total Credits: **61** Award: **AS**

Overview

Clermont College offers a Pre-Health Science program that provides students with the appropriate course work to transition to either the Pre-Medicine or Pre-Physician Assistant Training track within the College of Allied Health Sciences at University of Cincinnati Clifton campus. The Health Sciences Pre-Physician Assistant is one of very few that gives you focused preparation for physician assistant school, while continuation into the Pre-Medicine program specifically prepares students for entry into graduate level medicine, pharmacy, chiropractic, podiatry, dental, and optometry programs.

The associates degree program provides students with a comprehensive background in the basic sciences which is then combined with combined with applied studies in exercise physiology, biomechanics and kinesiology, biochemistry, cell biology and microbiology puts you in an excellent position to be a competitive candidate.

Career

Medical school is the most common career goal for students in the Pre-Health Sciences – Medicine track.

According to the Bureau of Labor Statistics, the job outlook for physicians and surgeons is expected to grow 3% by 2030 and the current median pay is $208,000 per year.

Students in the Pre-Physician Assistant track generally seek a career as a physician assistant.

According to the Bureau of Labor Statistics, the job outlook for physician assistants is expected to grow 31% by 2028 (much faster than the national average) and the current median pay is $115,390 per year.

Physicians, Surgeons and Physician Assistants work with people across the lifespans and generally work in:

- Physicians' Offices
- Hospitals
- Academics
- Government

If you decide not to pursue a medical degree or one for the physician assistant, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

- Graduate Education Opportunities
- Medical School (MD)
- Osteopathic Medical School (DO)
- Physician Assistant School (PA-C)
- Chiropractic School (DC)
- Optometry School (OD)
- Pharmacy School
- Dental School (DDS or DMD)
- Doctor of Physical Therapy Programs
- Athletic Training Programs

Pre-Health Sciences

Pre-Occupational Therapy

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Clermont College offers a Pre-Health Sciences track in Occupational Therapy. This track provides students with an Associates Degree program that is specifically designed for students to transition to the Health Sciences Pre-Occupational therapy major within the College of Allied Health Sciences at the UC Clifton campus. Occupational therapists, also known as OTs, evaluate and treat patients of all ages with injuries, illnesses or disabilities using meaningful activities (occupations). Occupational therapists typically use self-care, work, play, and leisure occupations to help clients adapt to individual life circumstances to gain, sustain and maintain health.

This associates degree program provides students with a comprehensive foundational training in the natural and behavioral sciences, combined with education in applied human studies, such as exercise physiology, biomechanics, kinesiology, nutrition and health and wellness puts graduates in a position to be successful students in the bachelors program.

Career

The most common career path for students in the Pre-Health Sciences – Occupational Therapy track are primarily planning for entry into a graduate level master's or doctoral occupational therapy degree program.

Occupational therapists, also known as OTs, evaluate and treat patients of all ages with injuries, illnesses or disabilities using meaningful activities (occupations). Occupational therapists typically use self-care, work, play, and leisure occupations to help clients adapt to individual life circumstances to gain, sustain and maintain health.

According to the Bureau of Labor Statistics, the job outlook for occupational therapists is expected to grow 17% by 2030 (much faster than the national average) and the current median pay is $86,280.

Occupational therapists typically work in:

- Hospitals
- Schools
- Clinics
- Nursing Facilities
- Home Health Services

Employment opportunities at the bachelor's level are also available in fitness or health-related occupations. Graduates have also enrolled in graduate programs in public health, health promotion, or community health education, and more.

Overview

Clermont College offers a Pre-Health Sciences track in Physical Therapy. This track provides students with an Associates Degree program that is specifically designed for students to transition to the Health Sciences Pre-Physical Therapy major within the College of Allied Health Sciences at the UC Clifton campus.

This associates degree program provides students with a comprehensive background in the basic sciences which is then combined with applied studies in exercise physiology, biomechanics, kinesiology, sports and wellness puts most graduates in a position to be competitive graduate school candidates.

Career

The most common career path for students in the Pre-Health Sciences – Physical Therapy track is becoming a physical therapist.

According to the Bureau of Labor Statistics, the job outlook for physical therapist is expected to grow 21% by 2030 (much faster than the national average) and the current median pay is $91,010 per year.

Physical therapists work with people across the lifespans and generally work in:

- Private Offices and Clinics
- Hospitals
- Home Care
- Nursing and Rehabilitation Facilities
- Military and More

If you decide not to pursue a physical therapy degree, you will be prepared for a variety of other graduate programs, certifications and employment opportunities.

Graduate Education Opportunities

- Athletic Training Programs
- Occupational Therapy Programs
- Orthotics and Prosthetics Programs (CO or CP)
- Public Health Programs (MA, MS, or PhD)
- Exercise Physiology or Biomechanics Programs (MS or PhD)
- Nutrition Programs and More

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success

programming. Free services available to UC Clermont students include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Writing Center (AWC) – The AWC can help with any writing assignment for any course and at any stage of the writing process. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions in more than 200 undergraduate courses including subjects such as math, science, languages, business and writing. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Pre-College Math Tutoring – Pre-College Math Tutoring Services helps students succeed in Mathematical Literacy (MATH 0029), Fundamentals of Algebra (MATH 0030), Introductory Algebra (MATH 0031) and Intermediate Algebra (MATH 0034). Group study sessions, individual tutoring or email tutoring are available. Information is provided in the course syllabus to help guide students to the study group sessions for that course. Math Learning Resources by math topic that include short instructional videos and worksheets are available on the UC Clermont Learning Commons website.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont professional tutor on Mondays, Wednesdays and Fridays from 10 a.m.-12 p.m. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Medical Laboratory Science

Duration: 2 Years Total Credits: 62 Award: AS

Overview

The Pre-Medical Laboratory Science Associate's degree program represents the first two years of the bachelor of science degree offered by UC's College of Allied Health Sciences.

Medical laboratory scientists with a bachelor of science degree and professional certification are allied health professionals who participate in patient care by performing laboratory procedures that assist in the prevention, diagnosis and treatment of diseases. The analysis performed by medical laboratory scientists may be in the areas of chemistry, microbiology, hematology, immunology, toxicology, and blood banking.

Laboratory scientists perform manual and automated procedures and utilize laboratory information computer systems to analyze and transmit patient data. Medical laboratory scientists are also responsible for the quality control and quality assurance procedures in the laboratory.

The education of a medical laboratory scientist combines a curriculum common to most undergraduate majors in the medical field with a clinical program designed to produce individuals who possess a high level of technical proficiency.

Success

Students who succeed in this field have a love and aptitude for science and strong analytical abilities.

Career

Bachelor's of Science Medical Laboratory Scientists obtain employment in a variety of settings. These settings include:

- Hospital Laboratories
- Independent Laboratories
- Clinics and Physicians' Offices
- Research and Development Laboratories
- Public/Government Health Agencies
- Forensics Laboratories
- Pharmaceutical Companies

Program graduates are generally able to choose from several entry-level technologist positions. Advanced certification is available in each laboratory area for those who choose to pursue a higher level of training. Graduate training in one of the laboratory disciplines will allow individuals to advance to supervisory positions and intermediate level research positions. Regardless of the setting, medical laboratory scientists consistently work in a challenging, fast paced, and collaborative environment. Additionally, graduates of the program are well qualified for entry into professional and graduate programs such as medicine and physician’s assistant.

Pre-Middle Childhood Education

Lang Arts & Math

Duration: 2 Years Total Credits: 65 Award: AS

Overview

Middle childhood educators teach students in grades 4-9 in Ohio. They guide students to delve deeply into academic content while supporting social and civic engagement. Pre-Middle Childhood Education majors must specialize in two content areas selected from: English language arts, mathematics, science, or social studies. As an aspiring middle school teacher, this program will help you understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to the UC Clifton campus to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

Clermont College accepts transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Middle Childhood Education: 2.8 cumulative GPA and 2.6 in each licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application.

Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Middle Childhood Education

Lang Arts & Math

Duration: 2 Years Total Credits: 65 Award: AS

Overview

Middle childhood educators teach students in grades 5-9 in Kentucky. They guide students to delve deeply into academic content while supporting social and civic engagement. Pre-Middle Childhood Education majors must specialize in two content areas selected from: English language arts, mathematics, science, or social studies. As an aspiring middle school teacher, this program will help you understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

Clermont College accepts transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Middle Childhood Education: 2.8 cumulative GPA and 2.6 in each licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here:

https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Middle Childhood Education

Lang Arts & Natural Sciences

Duration: 2 Years Total Credits: 65 Award: AS

Overview

Middle childhood educators teach students in grades grades 5-9 in Kentucky. They guide students to delve deeply into academic content while supporting social and civic engagement. Pre-Middle Childhood Education majors must specialize in two content areas selected from: English language arts, mathematics, science, or social studies. As an aspiring middle school teacher, this program will help you understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Bachelor Degree:

- teacher
- tutor
- instructional coordinator
- curriculum designer

Associate Degree:

- teacher assistant
- child care worker

As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

Clermont College accepts transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Middle Childhood Education: 2.8 cumulative GPA and 2.6 in each licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

Pre-Middle Childhood Education

Lang Arts & Social Studies

Duration: 2 Years Total Credits: 65 Award: AS

Overview

Middle childhood educators teach students in grades 5-9 in Kentucky. They guide students to delve deeply into academic content while supporting social and civic engagement. Pre-Middle Childhood Education majors must specialize in two content areas selected from: English language arts, mathematics, science, or social studies. As an aspiring middle school teacher, this program will help you understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Pre-Middle Childhood Education

Math & Natural Sciences

Duration: 2 Years Total Credits: 65 Award: AS

Overview

Middle childhood educators teach students in grades 5-9 in Kentucky. They guide students to delve deeply into academic content while supporting social and civic engagement. Pre-Middle Childhood Education majors must specialize in two content areas selected from: English language arts, mathematics, science, or social studies. As an aspiring middle school teacher, this program will help you understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Bachelor Degree:

- teacher
- tutor
- instructional coordinator
- curriculum designer

Associate Degree:

- teacher assistant
- child care worker

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

Clermont College accepts transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Middle Childhood Education: 2.8 cumulative GPA and 2.6 in each licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

Clermont College accepts transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Pre-Middle Childhood Education

Social Studies & Math

Duration: 2 Years Total Credits: 65 Award: AS

Overview

Middle childhood educators teach students in grades 5-9 in Kentucky. They guide students to delve deeply into academic content while supporting social and civic engagement. Pre-Middle Childhood Education majors must specialize in two content areas selected from: English language arts, mathematics, science, or social studies. As an aspiring middle school teacher, this program will help you understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

Clermont College accepts transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Middle Childhood Education: 2.8 cumulative GPA and 2.6 in each licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

Course	Title/Desc	Credit

While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

Clermont College accepts transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Pre-Middle Childhood Education

Social Studies & Natural Sciences

Duration: 2 Years Total Credits: 65 Award: AS

Overview

Middle childhood educators teach students in grades 5-9 in Kentucky. They guide students to delve deeply into academic content while supporting social and civic engagement. Pre-Middle Childhood Education majors must specialize in two content areas selected from: English language arts, mathematics, science, or social studies. As an aspiring middle school teacher, this program will help you understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to Northern Kentucky University to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Middle Childhood Education: 2.8 cumulative GPA and 2.6 in each licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

African American History (select one)

Course	Title/Desc	Credit
HIST2060	African History I: Human Origin, African Civilizations and the Rise of the Trans-Atlantic Slave (C min)	3
HIST2061	African History II: The Rise of Globalization and Africa, 1860 to Present (C min)	3

★ This is the typical minimum number of credit hours students must complete.

Pre-Mortuary Science

Duration: **2 Years** Total Credits: **61** Award: **AS**

Overview

The UC Clermont College Pre-Mortuary Science program is an associate of science degree designed for students who want to transfer to the Cincinnati College of Mortuary Science. There, students will complete a bachelor of mortuary science degree. All courses from UC Clermont will transfer to CCMS.

Mortuary science seeks to enroll persons who believe in the dignity of funeral services, who are committed to competent, professional service, and who desire more than minimal technical training. Aside from embalming and other preparatory services, graduates also need experience in arrangements counseling, merchandising and funeral directing.

An education in mortuary science is rigorous. Students are required to have two years of general education — including liberal arts, business and behavioral science — before studying mortuary science. Upon graduation from a four-year program, students must take state and national board examinations.

Success

Successful graduates must have people skills and professional manners during times of high stress, possess good listening, verbal and nonverbal communication skills, a professional demeanor and an understanding of different cultures. They should also have good business skills.

Career

Employment opportunities for graduates of the Cincinnati College of Mortuary Science program exist mainly in funeral homes, but also in hospitals, public health organizations and related industries. Graduates of the CCMS program are equipped not only with classroom experience, but with laboratory work/study and practicum experience as well.

Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. Current UC students are welcome to contact UC Clermont College Admissions office at (513) 732-5319 with questions about the change in college application process. Students are urged to see their advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Secondary Education

Chemistry

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Secondary educators teach students in grades 7-12. They guide students to delve deeply into a particular academic content area while supporting social and civic engagement. Secondary Education majors specialize in a specific content area such as chemistry, biology, English language arts, or social studies. As an aspiring secondary teacher, this program will help you understand the complex human and social factors involved in educating students and practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to UC Clifton to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, reliable transportation and the ability to visit schools during regular business hours are necessary. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Bachelor Degree:

- teacher
- tutor
- instructional coordinator
- curriculum designer

Associate Degree:

- teacher assistant
- child care worker

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Secondary Education 2.8 cumulative GPA and 2.8 in the licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to UC Clifton to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, reliable transportation and the ability to visit schools during regular business hours are necessary. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Secondary Education 2.8 cumulative GPA and 2.8 in the licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Secondary Education

Math

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Secondary educators teach students in grades 7-12. They guide students to delve deeply into a particular academic content area while supporting social and civic engagement. Secondary Education majors specialize in a specific content area such as chemistry, biology, English language arts, or social studies. As an aspiring secondary teacher, this program will help you to understand the complex human and social factors involved in educating students, as well as practices that support diversity and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to UC Clifton to complete their preparation and earn a bachelor's degree.

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. HIST2XXX+	History Elective Choose one 2000+ level course (C min)	3

Professional Cohort Information

Application for admission to the professional cohort will be submitted to the School of Education in the College of Education, Criminal Justice, and Human Services (CECH) early spring semester (2nd year). Details regarding the application/submission process can be obtained from a CECH academic advisor. The CECH Professional Cohort is a group of students enrolled in education courses leading to licensure in their respective programs. The maximum number of seats available in each cohort varies each year. Admission is competitive. Minimum requirements for consideration are: 1. Minimum GPA: Secondary Education 2.8 cumulative GPA and 2.8 in the licensure content area. **Please note that cumulative GPA includes all transfer work** 2. Satisfactory academic course completion toward the degree (completion of prerequisite courses). 3. Students must have current BCI/FBI background check reports on file through the CECH Office of Field Experiences in order to have a complete application. Students can submit their reports here: https://cech.uc.edu/schools/education/oep/field/background-check.html. Students who have been cited or arrested for any legal offense greater than a minor traffic violation must disclose this to their advisor.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pre-Special Education

Language Arts & Math

Duration: 2 Years Total Credits: 63 Award: AS

Overview

The Pre-Special education program prepares you to work with students in grades K-12. Special educators collaborate to make curriculum accessible and build inclusive settings. As an aspiring special education teacher, this program will help you to understand the complex human and social factors involved in educating children with diverse characteristics, as well as practices that support inclusion and lifelong learning. A bachelor's degree in education is the minimum requirement to become a teacher. As an associate degree program, UC Clermont offers freshman and sophomore coursework with the expectation that students will transfer to UC Clifton to complete their preparation and earn a bachelor's degree.

University of Cincinnati options:
Pre-Special Education: Language Arts/Math
Pre-Special Education: Language Arts/Natural Science

NOTE: Education majors are required to volunteer in local schools, typically between 10-20 hours per semester, in conjunction with their coursework. Though this time commitment is not significant, it is necessary to have reliable transportation and the ability to visit schools during regular business hours. An annual background check is also required (approximately $60).

Success

You must have a strong ability to communicate, inspire trust and confidence, and motivate students, as well as understand their academic, social, and emotional needs. You must recognize and be responsive to individual and cultural differences. Openness, reliance on tools of inquiry and flexibility are important. You should also be organized, dependable and creative. You must be able to work cooperatively and communicate effectively with other teachers, support staff, parents and community members.

Career

Bachelor Degree:

- teacher
- tutor
- special education services coordinator
- disability services provider
- case management
- disability advocacy

Associate Degree:

- teacher assistant
- child care worker

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

**Students who will transfer to Northern Kentucky University to complete their bachelor's degrees in special education have different course requirements. Please see your advisor for details if you decide to attend NKU.*

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

In order to progress into a bachelor level education program, students must meet admission requirements of the transfer/transition institution's program. This includes a minimum GPA, background check and possible content exam.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Pre-Speech Language Hearing Sciences

Duration: **2 Years** Total Credits: **60 - 61** Award: **AS**

Overview

The ability to communicate effectively is a key element of our shared humanity. Students majoring in communication sciences and disorders prepare for professions that help people who have difficulty speaking and hearing. The study of communication disorders involves understanding the normal development of speech, language and hearing, as well as learning how to diagnose and treat communication disorders in adults and children.

This Associate of Science degree program at UC Clermont College is designed to prepare students for application to the bachelor's degree program in Speech Language Hearing Sciences offered by the University of Cincinnati's College of Allied Health Sciences (CAHS).

The first two years of the Speech Language Hearing Sciences program can be completed at UC Clermont College. The final two years must be completed at the UC's Uptown Campus or a combination of Clermont and Uptown Campuses.

Success

Successful health care professionals must want to help others, be able work as part of a team, possess good verbal and nonverbal communication skills, and have a professional demeanor.

Career

A bachelor of science in Speech Language Hearing Sciences is a pre-professional degree that prepares students for graduate work in either audiology or speech/language pathology and a variety of other graduate experiences in social service, special education and health care.

A master's degree is necessary for licensing and certification as a speech/language pathologist, and a doctoral degree is required for an audiologist. Graduates find careers in hospitals, speech and hearing clinics, schools, educational programs for children with disabilities, the armed services, private practice and government health agencies.

Pre-Speech Language Hearing Sciences

AS

2025-2026 Pre-Speech Language Hearing Sciences (AS)

Duration: 2 Years

★Minimum Credits: 60 - 61 Credits

Fall Semester Year 1

Course	Title/Desc	Credit
BIOL1021	How Life Works: Introductory Biology I (C- min)	3
ENGL1001	English Composition (C- min)	3
PSYC1001	Introduction to Psychology (C- min)	3
BoK: HU	Humanities & Literature Elective (C- min)	3
	Foreign Language: Student is required to complete a full sequence of a Foreign Language. Options include a 10 hour sequence (two 5-credit hour courses such as Spanish, German, French, Latin) or a 12 credit hour sequence (four 3-credit hour courses such as American Sign Language). (C- min)	3 - 5

Spring Semester Year 1

Course	Title/Desc	Credit
ALH1005	Health Care Edge (C- min)	1
BIOL1022	Introductory Biology II: Life on Earth, Organism to Ecosystem (C- min)	3
MATH1021	College Algebra (C- min)	3
SOC1001	Introduction to Sociology (C- min)	3
BoK: TI	Technology & Innovation Elective (C- min)	3
	Foreign Language: Student is required to complete a full sequence of a Foreign Language. Options include a 10 hour sequence (two 5-credit hour courses such as Spanish, German, French, Latin) or a 12 credit hour sequence (four 3-credit hour courses such as American Sign Language). (C- min)	3 - 5

Emphasis Area

Emphasis Area: Research/Science

Must choose a total of six (6) credit hours in the same emphasis area to fulfill the requirement.

Course	Title/Desc	Credit
BIOL2001C	Anatomy and Physiology I (C- min)	4
BIOL2002C	Anatomy and Physiology II (C- min)	4
PSYC2001C	Research Methods and Statistics in Psychology I (C- min)	4
PSYC2030	Sensation and Perception (C- min)	3

Emphasis Area: Allied Health

Course	Title/Desc	Credit
HLSC2012	Medical Terminology (C- min)	2
HPE1001	Personal Health (C- min)	3
HPE1002	Introduction to Public/Community Health (C- min)	3
HPE1004	Introduction to Epidemiology (C- min)	3
HPE1006	Consumer Health (C- min)	3

Fall Semester Year 2

Course	Title/Desc	Credit
ENGL2089	Intermediate Composition (C- min)	3
EVST1011	Introduction to Environmental Studies I (C- min)	3
	Emphasis Area Course: Complete an Emphasis Area course to complete this requirement. Please meet with your Academic Advisor for assistance in selecting an Emphasis Area. (C- min)	3
BoK: HP	Historical Perspectives (C- min)	3
	Foreign Language (if needed): Third course in a 12-credit foreign language sequence	0 - 3

Spring Semester Year 2

Course	Title/Desc	Credit
EVST1012	Introduction to Environmental Studies 2 (C- min)	3
SPED1001	Individuals with Exceptionalities (C- min)	3
STAT1031	Introduction to Statistics (C- min)	3
	Emphasis Area Course: Complete an Emphasis Area course to complete this requirement. Please meet with your Academic Advisor for assistance in selecting an Emphasis Area. (C- min)	3

Emphasis Area

Emphasis Area: Deaf Studies

Must choose a total of six (6) credit hours in the same emphasis area to fulfill the requirement.

Course	Title/Desc	Credit
ASL1001	Beginning American Sign Language I (C- min)	3
ASL1002	Beginning American Sign Language II (C- min)	3

Emphasis Area: Education

Must choose a total of six (6) credit hours in the same emphasis area to fulfill the requirement.

Course	Title/Desc	Credit
ASL1001	Beginning American Sign Language I (C- min)	3
ASL1002	Beginning American Sign Language II (C- min)	3
ECE1001	Foundations in Early Childhood Education (C- min)	3
EDST1001	Historical Foundations in Education (C- min)	3

Course	Title/Desc	Credit

Course	Title/Desc	Credit
	Foreign Language (if needed) or Free Elective: Fourth course in a 12-credit foreign language sequence. If student completed a 10-credit foreign language sequence, 1 credit of free elective is required.	1 - 3

Course	Title/Desc	Credit
EDST1002	Educational Psychology (C- min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Public Health

Duration: **2 Years** Total Credits: **61** Award: **AS**

Overview

Public Health is the science of preventing disease, prolonging life, and promoting the health of people and communities through organized efforts to educate, develop policy, conduct scientific research and regulate health systems. The Public Health Associates degree offers a versatile education that examines emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system, and the monitoring of diseases in the community. The Associates degree program was designed to seamlessly transition to the University of Cincinnati Interdisciplinary Bachelors of Public Health degree.

A degree major in public health provides students an understanding of the principles of public health as well as emerging issues in public health that affect our global society. This program of study integrates key aspects of preventing disease, prolonging life, and promoting health through people, organizations, and community. There are many facets of public health – from improving access to healthcare, controlling infectious diseases, reducing environmental hazards to working toward decreasing substance abuse. Students can select from a pool of public health elective courses, with the assistance of an academic advisor, to create a personalized learning plan.

Success

Public Health students must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Further more, those majoring in public health are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for public health workers, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors

Career

Many people with an associate degree in public health start out working as assistants and either work their way up or achieve another degree. Some potential career paths for this degree program include:

- Community Health Worker
- Patient Services Coordinator
- Health Coach
- Healthcare Recruiter
- Medical Coder
- Medical Transcriptionist

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Public Health

Online

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Public health is the science of preventing disease, prolonging life, and promoting the health of people and communities through organized efforts to educate, develop policy, conduct scientific research and regulate health systems. The Public Health Associates degree offers a versatile education that examines emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system, and the monitoring of diseases in the community. This online associates degree program was designed to seamlessly transition to the University of Cincinnati Interdisciplinary Bachelors of Public Health degree.

Success

Public Health students must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Furthermore, those majoring in public health are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for public health workers, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Career

Careers in public health can range from improving access to healthcare, controlling infectious disease, reducing environmental hazards, designing healthier cities, to working towards decreasing substance abuse. Professionals in public health work in a variety of settings such as:

- Healthcare organizations
- Health insurance companies
- Retail organizations
- Educational institutions
- Government roles within the health department or in disaster readiness

Advising

Academic advising is an essential part of your educational experience. An institutional representative will provide insight or direction about an academic, social or personal matter. The nature of this direction might be to inform, suggest, counsel, discipline, coach, mentor, or even teach a college student how to navigate university systems to be successful.

We are committed to providing advice and assistance throughout your academic journey. As a result, you will be assigned a Program Advisor as well as a Program Retention Specialist. These individuals will work with you to create an academic plan based on your own personal and educational goals.

UC Advantages And Special Opportunities

UC students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC students through Learning Commons include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus Monday-Friday from 9-2 or virtually Monday-Thursday 9-8 and Friday 9-4.

Admission Requirements

Admission into the University of Cincinnati's online Associate of Science in Public Health is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level English or mathematics, you will need to take a placement test.

Changing Majors Within UC

Other UC students may transfer into this fully online program by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Graduation Requirements

In order to graduate from this program, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.

Building and Industrial Technology

Duration: **2 Years** Total Credits: **60** Award: **ATS**

Overview

The One-Year Option allows graduates of Ohio Technical Centers (OTC) who complete a 600 or greater hour program and obtain an industry-recognized credential(s) to earn a block of technical credit toward an Associate of Technical Study (Type B). The goal of this Ohio Department of Higher Education (ODHE) initiative is to create a statewide agreement for awarding technical credit in addition to current statewide agreements such as Career-Technical Assurance Guides (CTAGs). Eligible students will be awarded 20-30 semester credit hours of block credit for the approved OTC program toward the relevant 60 semester hour ATS degree.

Benefits of the Program

- Complete your associate degree with 30-40 credits
- Flexible class options (daytime, evening, online)
- Advance your career and earnings potential
- Complete the ATS and be eligible for admission to the Bachelor's of Technical & Applied Studies in Applied Administration

Career

This general degree is a good fit for those with a professional certification or credential in job positions where the employer is neutral as to the degree earned.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

- Completed a 600+ clock hour program in business at an Ohio Technical Center
- Hold an industry-recognized credential(s) approved by the Ohio Department of Higher Education. Approved OTC programs: Business Administration Technology (all), Medical Office Specialist
- Meet the credentialing pathway requirements as determined by the applicable credit affirmation team. The list of currently approved pathways and credentialing requirements can be found on the Ohio Department of Higher Education's One-Year Option webpage.

Transferring To UC

You must be in good academic standing at the college or university you last attended. We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program form available from most UC admissions offices (including ours, 513-732-5319). You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Emergency Medical Services

Duration: **2 Years** Total Credits: **30** Award: **ATS**

Overview

This Technical Associates Degree is a degree completion program available only for students that have an EMT-B or have already earned their Paramedic Certificate, either National or State of Ohio. The EMT-B/paramedic license earns students 30-hours of technical block credit that are applied to this degree. To complete this Technical Associates degree students complete an additional 30 hours of General Education courses.

Career

You may pursue many different career paths. Some of your opportunities for employment within the Emergency Medical Services network include the following:

- supervisor
- trainer
- operations manager
- administrative director
- executive director
- dispatch manager

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group

study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

You must be at least 18 years old, have a current driver's license, and have a high school diploma or GED or equivalent. This Technical Associates Degree is a degree completion program available only for students that have an EMT-B or have already earned their Paramedic Certificate, either National or State of Ohio. Felony conviction, multiple DUI convictions, or being on parole will disallow your licensure and prevent your admission to this program.

Transferring To UC

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Health and Allied Health Technology

Patient Care

Duration: 2 Years Total Credits: 60 Award: ATS

Overview

The One-Year Option allows graduates of Ohio Technical Centers (OTC) who complete a 600 or greater hour program and obtain an industry-recognized credential(s) to earn a block of technical credit toward an Associate of Technical Study (Type B). The goal of this Ohio Department of Higher Education (ODHE) initiative is to create a statewide agreement for awarding technical credit in addition to current statewide agreements such as Career-Technical Assurance Guides (CTAGs). Eligible students will be awarded 20-30 semester credit hours of block credit for the approved OTC program toward the relevant 60 semester hour ATS degree.

Benefits of the Program

- Complete your associate degree with 30-40 credits
- Flexible class options (daytime, evening, online)
- Advance your career and earnings potential
- Complete the ATS and be eligible for admission to the Bachelor's of Technical & Applied Studies in Applied Administration

Career

This general degree is a good fit for those with a professional certification or credential in job positions where the employer is neutral as to the degree earned.

Curriculum

Students who have completed admission requirements for a 900 hour OTC program, may select the Health and Allied Health curriculum.

Students who have completed admission requirements for a 600-899 hour OTC program, must select the Health and Allied Health - Patient Care curriculum.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program form available from most UC admissions offices (including ours, 513-732-5319). You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Health and Allied Health Technology

Patient Care

Duration: 2 Years Total Credits: 60 Award: ATS

Overview

The One-Year Option allows graduates of Ohio Technical Centers (OTC) who complete a 600 or greater hour program and obtain an industry-recognized credential(s) to earn a block of technical credit toward an Associate of Technical Study (Type B). The goal of this Ohio Department of Higher Education (ODHE) initiative is to create a statewide agreement for awarding technical credit in addition to current statewide agreements such as Career-Technical Assurance Guides (CTAGs). Eligible students will be awarded 20-30 semester credit hours of block credit for the approved OTC program toward the relevant 60 semester hour ATS degree.

Benefits of the Program

- Complete your associate degree with 30-40 credits
- Flexible class options (daytime, evening, online)
- Advance your career and earnings potential
- Complete the ATS and be eligible for admission to the Bachelor's of Technical & Applied Studies in Applied Administration

Career

This general degree is a good fit for those with a professional certification or credential in job positions where the employer is neutral as to the degree earned.

Curriculum

Students who have completed admission requirements for a 900 hour OTC program, may select the Health and Allied Health curriculum.

Students who have completed admission requirements for a 600-899 hour OTC program, must select the Health and Allied Health - Patient Care curriculum.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Writing Center (AWC) – The AWC can help with any writing assignment for any course and at any stage of the writing process. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions in more than 200 undergraduate courses including subjects such as math, science, languages, business and writing. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Pre-College Math Tutoring – Pre-College Math Tutoring Services helps students succeed in Mathematical Literacy (MATH 0029), Fundamentals of Algebra (MATH 0030), Introductory Algebra (MATH 0031) and Intermediate Algebra (MATH 0034). Group study sessions, individual tutoring or email tutoring are available. Information is provided in the course syllabus to help guide students to the study group sessions for that course. Math Learning Resources by math topic that include short instructional videos and worksheets are available on the UC Clermont Learning Commons website.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont professional tutor on Mondays, Wednesdays and Fridays from 10 a.m.-12 p.m. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Admission Requirements

- Completed a 600+ clock hour program in business at an Ohio Technical Center
- Hold an industry-recognized credential(s) approved by the Ohio Department of Higher Education. Approved OTC programs: Dental Assisting/Assistant, EMT – Paramedic, Exercise Science, Massage Therapy, Medical Assisting, Medical Sonographer, Optometric, Patient Care Technician, Practical Nursing, Radiological Technologist
- Meet the credentialing pathway requirements as determined by the applicable credit affirmation team. The list of currently approved pathways and credentialing requirements can be found on the Ohio Department of Higher Education's One-Year Option webpage.

Transferring To UC

You must be in good academic standing at the college or university you last attended. We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program form available from most UC admissions offices (including ours, 513-732-5319). You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Services Technology

Education

Duration: 2 Years Total Credits: 60 Award: ATS

Overview

The One-Year Option allows graduates of Ohio Technical Centers (OTC) who complete a 600 or greater hour program and obtain an industry-recognized credential(s) to earn a block of technical credit toward an Associate of Technical Study (Type B). The goal of this Ohio Department of Higher Education (ODHE) initiative is to create a statewide agreement for awarding technical credit in addition to current statewide agreements such as Career-Technical Assurance Guides (CTAGs). Eligible students will be awarded 20-30 semester credit hours of block credit for the approved OTC program toward the relevant 60 semester hour ATS degree.

Benefits of the Program

- Complete your associate degree with 30-40 credits
- Flexible class options (daytime, evening, online)
- Advance your career and earnings potential
- Complete the ATS and be eligible for admission to the Bachelor's of Technical & Applied Studies in Applied Administration

Career

This general degree is a good fit for those with a professional certification or credential in job positions where the employer is neutral as to the degree earned.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

- Completed a 600+ clock hour program in business at an Ohio Technical Center
- Hold an industry-recognized credential(s) approved by the Ohio Department of Higher Education. Approved OTC programs: Barbering, Cosmetology, Culinary Arts, Early Childhood Education
- Meet the credentialing pathway requirements as determined by the applicable credit affirmation team. The list of currently approved pathways and credentialing requirements can be found on the Ohio Department of Higher Education's One-Year Option webpage.

Transferring To UC

You must be in good academic standing at the college or university you last attended. We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program form available from most UC admissions offices (including ours, 513-732-5319). You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements
- Obtain at least a 2.0 university grade point average
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension
- Meet the college's residency requirement of 20 semester credit hours
- File formal application for the degree by the posted semester of graduation deadline

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

- Completed a 600+ clock hour program in business at an Ohio Technical Center
- Hold an industry-recognized credential(s) approved by the Ohio Department of Higher Education. Approved OTC programs: Barbering, Cosmetology, Culinary Arts, Early Childhood Education
- Meet the credentialing pathway requirements as determined by the applicable credit affirmation team. The list of currently approved pathways and credentialing requirements can be found on the Ohio Department of Higher Education's One-Year Option webpage.

Transferring To UC

You must be in good academic standing at the college or university you last attended. We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program form available from most UC admissions offices (including ours, 513-732-5319). You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements
- Obtain at least a 2.0 university grade point average
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension
- Meet the college's residency requirement of 20 semester credit hours
- File formal application for the degree by the posted semester of graduation deadline

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Health Information Management

Online

Duration: 4 Years Total Credits: 120 Award: BHIM

Overview

The online Bachelor's in Health Information Management is ideal for working professionals and RHITs® who want to take the next step in their career and earn their RHIA® credential. The American Health Information Management Association (AHIMA®) defines Health Information Management as *"the practice of gathering, analyzing and securing all forms of important medical information to help provide quality patient care."* Our advanced curriculum and professional practicum provide students with a well-rounded, relevant education with valuable real-world experience.

AHIMA® is highly respected in the healthcare industry and known for its rigorous training. AHIMA credential holders are viewed as leading experts in the field of health information and are highly sought after in today's job market. Earning your Bachelor's in HIM and the RHIA credential will vastly improve your earning potential, employment opportunities and job mobility.

Special Opportunity

The Health Information Management (HIM) + Master of Health Informatics (MHI) Accelerated Pathway at UC Clermont College offers a unique opportunity for eligible students currently enrolled in the Health Information Management bachelor's degree program to fast-track their education and career. With a minimum GPA of 3.0, students can simultaneously work towards completing their bachelor's degree while fulfilling coursework required for a master's degree in Health Informatics. This streamlined approach not only saves time but also positions graduates for advanced roles in the rapidly growing health informatics field. For more information on this transformative pathway, students are encouraged to reach out to their academic advisor or check out this website.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Careers in health information management are growing rapidly. This unprecedented growth can largely be attributed to the aging population and the steady increase in demand for medical and healthcare services. In addition, demand is expected to rise even further as the industry continues to transition to electronic records management and shifts to a more data-centric approach. The Bureau of Labor Statistics projects more than 22% growth in this job market by 2022.

There is a growing need for RHIA-certified employees in the healthcare industry, from hospitals and long-term care facilities to private physician practices. RHIA-certified professionals are also employed in a variety of non-patient settings including government agencies, insurance companies, pharmaceutical developers and software firms.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review session, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

1. Students must have one of the following:
    1. An Associate's degree from a CAHIIM accredited program, OR

2. An Associate's degree from a Regionally or Nationally accredited institution

2. Students admitted from a non-CAHIIM accredited program will be required to take Body of Knowledge courses **prior to any Health Information Management** courses which include:
   - ALH 1015
   - BIOL 1015
   - HCMT 1001
   - HCMT 2000
   - HCMT 2015
   - STAT 1031

Transferring To UC

Transfer Articulation Agreements and Pathways

UC has developed clear pathways (articulation agreements) between select associate degrees at partner institutions and compatible bachelor's degrees at UC. Each pathway includes a Transfer Degree Map that offers a semester-by-semester course comparison to assist with your transfer planning.

Articulation Agreements are formal agreements (or some would call a partnership) between two or more Colleges and Universities documenting the transfer policies for a specific academic program or degree in general.

Below is a list of colleges and universities that UC Online has partnered with, to increase the ease for students looking to transfer into the BS Health Information Management program:

- Alfred State College (SUNY)
- Central Oregon Community College
- Chippewa Valley Technical College
- Cincinnati State Technical and Community College
- Columbus State Community College
- Eastern Iowa Community College
- Neosho County Community College
- Northern Virginia Community College
- Owens Community College
- Pierpont Community and Technical College
- Santa Barbara City College
- Sinclair Community College
- St. Charles Community College
- Terra State Community College
- Waukesha County Technical College

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

Health Informatics

Online

Duration: 4 Years Total Credits: 120 Award: BS

Overview

The Bachelor of Science in Health Informatics program is an interdisciplinary degree that integrates healthcare, information science, and technology to prepare students for careers in the rapidly evolving field of health informatics. Students will develop the skills to design, implement, evaluate, and maintain health information systems that enhance patient care, improve organizational efficiency, and support better decision-making.

The curriculum covers the history, goals, and challenges of health informatics while emphasizing key concepts in information science, ethical and legal principles, and the application of social and behavioral models. Students will also gain expertise in analyzing, interpreting, and visualizing healthcare data to drive improvements and make informed decisions. With a focus on leadership development, graduates will be equipped to implement innovative solutions and advance healthcare technology in diverse settings.

Success

Success in the Bachelor of Science in Health Informatics program requires an interest in technology and data, along with strong communication, organizational, and critical thinking skills. You should also have a passion for interpreting and analyzing data to derive meaningful insights.

Career

Health informatics offers a rapidly growing career field driven by healthcare's increasing reliance on technology and data to improve patient care and operational efficiency. Career opportunities are diverse, including roles in data analytics, EHR implementation, technology, project management, and leadership. With the industry's shift toward data-driven healthcare delivery, demand for health informaticists is projected to grow by over 16% through 2033, according to the Bureau of Labor Statistics—much faster than the average for all occupations. Graduates can pursue careers in a variety of settings, including healthcare organizations, businesses, government agencies, and technology companies.

Majoring

Majoring in health informatics allows you to combine healthcare, technology, and data to improve healthcare delivery and drive meaningful change. This field offers opportunities to contribute to digital application development, data analytics, and work in a variety of dynamic settings.

Admission Requirements

Transferring To UC

Changing Majors Within UC

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

Applied Administration

Online

Duration: 4 Years Total Credits: 120 Award: BTAS

Overview

The Bachelor of Applied Administration program is geared for students who already hold an associate's degree or have 60 semester hours from a regionally accredited institution and seek a pathway to obtain a bachelor's degree.

This degree is ideal for students and working adults who want to move into supervisory or administrative positions. The program is suitable for people who have work experience or who have recently earned an associate degree. It gives graduating students an edge in their current positions and helps them achieve a supervisory role within their company or industry.

Applied administration coursework allows students to—

- fulfill UC's general education requirements
- acquire the breadth and depth of a baccalaureate degree
- qualify for career advancement

This program is offered through a collaboration between UC Clermont College and UC Blue Ash College.

Success

The successful candidate and graduate will be analytical, detail-oriented, flexible, decisive, and have good communication skills. Good relationship skills and the ability to work well as part of a team are also important skills for success.

With the Bachelor of Applied Administration program, you will:

- Earn your bachelor's degree from the University of Cincinnati, a globally recognized leader in higher education.
- Learn more about communication, collaboration and strategic planning skills that will help you advance your career and reach your goals.
- Enroll as a junior and enjoy our online class model that combines a flexible schedule with personal attention.
- Take advantage of low tuition rates that help you save money, while preparing you to earn more in your professional career.

Career

The Bachelor of Applied Administration program helps one advance into supervisory positions, and will assist the student in understanding how organization work and succeed in today's world.

You may pursue many different jobs and careers or use your degree to advance into supervisory positions. Some of your opportunities for employment include the following fields of work:

- Medical technology
- Computer science
- Web development
- Automotive services
- Construction
- Paralegal services
- Office and business management
- Social services
- Business Analyst
- Project Supervision
- Training Specialist
- Sales Representative
- Healthcare Administration
- Program Director
- Financial Administrator
- Systems Analyst

2025-2026 Applied Administration: Online

Advising

Academic advising is an essential part of your educational experience. An institutional representative will provide insight or direction about an academic, social or personal matter. The nature of this direction might be to inform, suggest, counsel, discipline, coach, mentor, or even teach a college student how to navigate university systems to be successful.

We are committed to providing advice and assistance throughout your academic journey. As a result, you will be assigned a Program Advisor as well as a Program Retention Specialist. These individuals will work with you to create an academic plan based on your own personal and educational goals.

Admission Requirements

Admission to the Bachelor of Applied Administration program is open to all students who hold an associate degree or have 60 semester hours from a regionally accredited institution. The curriculum allows students to complete any general education requirements not completed previously.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Applied Administration : Online

BTAS

2025-2026 Applied Administration: Online

Duration: 4 Years
★Minimum Credits: 120 Credits

In order to complete program requirements, students will be expected to complete First Semester courses, then in the next 3 semesters follow the semester plan that aligns with their begin term and continues with the academic calendar. Students are required to complete 60 credit hours of degree applicable credit in order to obtain this degree.

First Semester
These courses will be offered every semester.

Course	Title/Desc	Credit
AIS3001	Mid-Collegiate Experience/Bridging Module	3
AIS3010	Team Building	3
AIS3036	Financial Information for Managers	3
AIS4075	Diversity in Professional Settings	3

Spring Semesters (These courses are offered one time per year in this designated semester)

Course	Title/Desc	Credit
AIS3070	Applied Professional Writing	3
AIS3090	Applied Data Analytics	3
	AIS3035 Media Assets and the Law OR General Education course as required by program.	3
	AIS4001 Tech Promises and Perils OR General Education course as required by program.	3

Summer Semesters (These courses are offered one time per year in this designated semester)

Course	Title/Desc	Credit
AIS4032	Interpersonal Connections in the Workplace	3
AIS4045	Applied Employee Supervision	3
AIS4052	Applied Media Methods	3
	AIS4085 Global Challenges for the 21st Century OR General Education course as required by program.	3

Fall Semesters (These courses are offered one time per year in this designated semester)

Course	Title/Desc	Credit
AIS3026C	Applied Technology for Personal and Professional Productivity	3
AIS3050	Law and Ethics in Professional Settings	3
AIS4018	Public Images of Organizations	3
	AIS4070 Public and Non-Profit Administration OR General Education course as required by program.	3

Final Semester
These courses will be offered every semester beginning Fall 2021

Course	Title/Desc	Credit
AIS3075	Applied Human Resource Practices	3
AIS4012	Trends in Communication Technology	3
AIS4099	Senior Capstone	3
	AIS4063 Persuasive Applications OR General Education course as required by program.	3

Applied Administration Advising Notice:
Students will select 15 credit hours of AIS Electives AFTER verifying all General Education components are satisfied. General education requirements consist of English Composition, Quantitative Reasoning, Breadth of Knowledge Requirements (BoK). As determined by your Academic Advisor, required GEN ED courses can replace up to 15 hours of AIS Electives. Seek an Academic Advisors assistance to avoid confusion.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Accounting Technology

Duration: **1 Year** Total Credits: **12** Award: **Certificate**

Overview

Accounting professionals are in high demand. Nearly all public, private, and nonprofit organizations need accounting support, and there are accounting career opportunities across all industries and sectors. An accountant is a person who keeps or inspects financial records. They are numbers people who excel at organization and detail-oriented work.

The Accounting Technology certificate is a program that quickly prepares students for an entry-level position as a paraprofessional in the field of accounting. The curriculum includes four courses that can be completed in as little as two semesters. The program emphasizes financial accounting, computerized accounting information systems, generally accepted accounting principles, preparation of financial statements, managerial accounting, and preparation of individual income taxes.

Success

You should have an aptitude for mathematics and be able to analyze, compare, and interpret facts and figures quickly. Since accountants deal with money, you must also possess a high degree of integrity. And because you are constantly interacting with management and clients, accountants should be effective communicators.You should be able to communicate clearly both verbally and in writing. You must be good at working with people as well as with business systems and computers. You must be able to sit for extended periods while reviewing detailed data.

Career

You can look forward to employment as an accounting paraprofessional. Other opportunities include the following:

- bookkeeper
- accounts receivable/payable clerk or manager
- billing/purchasing clerk or manager
- credit/collection clerk, analyst or manager
- inventory clerk or manager
- payroll clerk or manager
- tax preparer
- general accounting clerk

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review session, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Interested students should meet with a UC Clermont College Advising staff member for appropriate advising. Please note: In order to obtain this certificate, 50 percent or more of the required coursework must be taken from UC Clermont College.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

Appalachian and Rural Studies

Online

Duration: 1 Year Total Credits: 18 Award: Certificate

Overview

The Appalachian and Rural Studies (ARS) certificate offers students with interest in rural life a pathway of study in multi-disciplinary areas. Through course work, collaborative research, and experiential learning, students will explore diverse aspects of rural life and culture including education, art, health, and sustainability through a strong interdisciplinary theme. By emphasizing the importance of integrating knowledge from multiple perspectives, these courses equip students with skills that translate academic learning into vocations and regional service through careers in Education, Government, Social Work, Health Care, and Public Safety.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Application Software Support Specialist

Online

Duration: 1 Year Total Credits: 18 Award: Certificate

Overview

The Application Software Support Specialist Certificate program at the University of Cincinnati Online helps students learn job-ready skills in the computer support workforce. Earn the credentials and skills required to become a key team player within a business needing advanced skills in computer support, spreadsheets, web development, data analysis, and Internet marketing. The Certificate can be completed in two semesters and also affords students a seamless pathway into an Associate Degree in Information Technology or Business Applications Technology. This certificate can also be an additional qualification that Associate degree students in Business or Paralegal can acquire.

Program Highlights

- 100% online: no campus visits are required.
- Part-time and full-time scheduling: have the flexibility to balance work and family obligations while completing your degree.
- Associate Degree Transfer Program: graduates can transition into UC's (100% online) Associate of Applied Information Technology program or Associate of Applied Business Applications Technology and continue their education.
- Three Start Dates per Year: with courses offered year-round, students are offered the convenience of beginning their certificate in Fall, Spring, or Summer.
- Start-to-Graduation Support: Every student enrolled online is assigned a dedicated Academic Advisor and also a Student Success Coordinator providing one-on-one support. They are your on-campus partners who can help you manage your time and ensure you're meeting degree requirements to get you to graduation.

Success

What Skills Are Needed?

Positions within the information technology field blend both technical skills and 'soft skills' (such as effective communication, analytical thinking, problem-solving, team building, and listening). Students entering this field should enjoy working with computer hardware and software.

This certificate offers students the opportunity to grow their skills and transfer their newly acquired knowledge into many different business settings. Just a few that have a need for Computer Support Specialists include information technology, finance, marketing, and accounting.

Career

You can look forward to employment as a Computer Support Specialist. Computer Support Specialists (CSS) play a key role within a business by helping to maintain the computer networks, troubleshooting software application issues, providing technical help to computer users, and utilizing Excel to explain and visualize organizational data According to the *U.S. Bureau of Labor Statistics*, "the employment of Computer Support Specialists is projected to grow nine (9) percent from 2020 to 2030.

Cancer Registry Management

Online

Duration: 1 Year Total Credits: 30 Award: Certificate

Overview

Cancer registrars are data information specialists who record and capture a complete history, diagnosis, treatment, and health status for every cancer patient in the US. This data provides essential information to researchers, healthcare providers, and public health officials to better monitor and advance cancer treatments, conduct research, and improve cancer prevention and screening programs.

The Cancer Registry Management certificate program is a one year online certificate that prepares you to work as a data management expert who reports cancer statistics for various healthcare agencies. Credentialed Cancer Registrars provide support for cancer program development, ensure compliance of reporting standards and serve as a resource for cancer information.

Program Highlights

- National Cancer Registrars Association (NCRA) Accredited
- The University of Cincinnati is one of very few institutions offering this program online.
- Professional internships are available at numerous practice facilities throughout the U.S. (in addition to our state-of-the-art, web-based simulations).

Learn more about Cancer Registry Management.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

Employment of Cancer Registry Managers is projected to grow 22 percent from 2012 to 2022, much faster than the average for all occupations. The demand for health services is expected to increase as the population ages. An aging population will need more medical tests, treatments, and procedures. The June 2006 National Cancer Registrar Association (NCRA) Workforce Study estimated that there were 7,280 registrars in the workforce at that time, with a projected need to add 800 more over the next 15 years. It also noted that additional registrars would be needed to replace those who retire from the field.

To succeed as a cancer registrar, you should be well organized, have excellent communication skills and be detail oriented. In addition, you will need a strong background in medical terminology, anatomy and physiology, and be proficient with technology and data analysis.

Career

Most cancer registrars work in hospitals. Other work settings include central or state cancer registries, accrediting organizations, government agencies, software vendors, pharmaceutical companies, insurance agencies, and staffing firms. Some cancer registrars are self-employed and/or work from home.

Regulations published in the Federal Register on October 29, 2010, require institutions to report specific information about students enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). View this program's most recent disclosure information including program costs, median loan debt at program completion, normal time to completion, normal time to completion rates and job placement rate (if reported).

Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the

semester.

Our online courses are taught by faculty that have received extensive online training. UC Clermont College is a Quality Matters Institution Member. Colleges and universities can use QM Standards and tools to develop, evaluate and improve the quality of online course design, create a culture of quality and achieve course certification.

Admission Requirements

This program is open to all students with an associate degree or higher. Enrollment in this certificate is also available with simultaneous enrollment in an associate's degree such as the Health Information Systems. The certificate cannot be awarded until the associate's degree has been completed. Interested students should meet with a UC Online advisor for details.

Prerequisite courses include Medical Terminology, Anatomy & Physiology, Human Disease, Pharmacology and Computers in Healthcare. Students without prerequisite credit can still enroll in the Cancer Registry Certificate program and take these prerequisite courses first.

Please note: In order to obtain this certificate, 50 percent or more of the required coursework must be taken from UC Clermont College.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

Learn more and apply at UC Online.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

This certificate is accredited through the National Cancer Registrars Association.

Cancer Registry Management : Online

Certificate

2025-2026 Cancer Registry Management Certificate

Duration: 1 Year

★Minimum Credits: 30 Credits

Cancer Registry Management Prerequisites

Prerequisite courses are required in order to progress through this program. Students without prerequisite credit can still enroll in the Cancer Registry Certificate program and take these prerequisite courses first.

Course	Title/Desc	Credit
ALH1015	Human Disease (C min)	2
BIOL1015	Introduction to Anatomy and Physiology (C min)	3
HCMT1001	Medical Terminology for the Health Professions (C min)	3
HCMT2000	Foundations of Pharmacology (C min)	2
HCMT2015C	Healthcare Applications (C min)	3

Required Courses

The following lists the course requirements to complete this program. While this lists courses in a recommended order, please speak with an Academic Advisor to develop an individualized academic plan that meets your enrollment needs and goals.

Course	Title/Desc	Credit
HCMT2060	Cancer Registry Structure and Management (C- min)	3
HCMT2061	Cancer Registry Operations (C- min)	3
HCMT2062	Cancer Registry Disease Coding and Staging (C- min)	3
HCMT2063	Oncology and Coding (C- min)	3
HCMT2064	Abstracting Methods I (C- min)	3
HCMT2065	Follow-up, Data Quality, and Utilization (C- min)	3
HCMT2066	Cancer Registry Data Analysis and Quality Assurance (C- min)	3
HCMT2067	Cancer Registry Practicum I	3
HCMT2068	Cancer Registry Practicum II	3
HCMT2069	Abstracting Methods II	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Computer Aided Design

Duration: **1 Year** Total Credits: **12** Award: **Certificate**

Overview

Computer aided design (CAD) is the technology used to prepare technical drawings and plans for manufacturing products such as toys, toasters, industrial machinery and aerospace components. CAD drawings provide visual guidelines, show technical details of products, specify dimensions and tolerances, and identify materials and manufacturing processes used to produce such products. CAD systems create and store drawings electronically that can then be viewed, printed, or programmed directly into automated manufacturing systems. People who produce technical drawings with CAD require the knowledge of engineering drawings in addition to computer and CAD skills.

The UC Clermont CAD certificate program is designed to provide students with prerequisite knowledge required for entering a career that utilizes Computer Aided Design. Topics covered in this certificate program include drafting principles, 3D modeling, assemblies, geometric dimensioning and tolerancing (GD&T), as well as prototyping and 3D printing.

Success

Mechanical ability and visual aptitude are important for anyone in CAD. You should be capable of performing detailed work accurately in a timely manner. Good interpersonal skills are also important because you will work closely with engineers, surveyors, architects, and other professionals. Artistic ability is helpful in some specialized fields, as is knowledge of manufacturing and construction methods.

Career

The UC Clermont CAD program is designed to open doors for you to a drafting career in general manufacturing, architecture, electronics and computers, as well as in more technical areas such as aerospace engineering and machine tool design.

The following information is provided per U.S. Department of Education regulations: The Department of Labor's standard occupational classification (SOC) code for this occupation is 17-3013. The informational profile for this occupation is online at O*NET OnLine.

For more information regarding completion time, costs, graduation rates, median loan debt and other details, please visit the UC Clermont Academics webpage and select "Gainful Employment Disclosure Form" under "General Academic Information."

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review session, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Computer Aided Manufacturing

Duration: **1 Year** Total Credits: **12** Award: **Certificate**

Overview

Computer Aided Manufacturing (CAM) is the technology used to prepare programs to be executed on Computer Numerical Control (CNC) equipment. CNC machines are the industrial equipment used to produce components used in manufacturing. CAM is the bridge between CAD (Computer Aided Design) and CNC machines. CAM operators import 3D models, establish machining parameters, generate tool-paths, and produce final CNC programs used to machine components in industrial settings. CAM operators are highly sought after within the manufacturing industry.

The UC Clermont CAM certificate program is designed to provide students with prerequisite knowledge required for entering a career in Computer Aided Manufacturing, CNC programming, and machining. Topics covered in this certificate program include machining, 3D modeling, G&M code language, CNC milling, CNC turning, machine setup, as well as tooling and material considerations. Students will utilize CAM software and full size CNC industrial equipment to gain this knowledge.

If you would like information on becoming an American Design & Drafting Association certified drafter, visit the website here.

Career

Employment Opportunities

Introductory level positions including:

- Machinist
- CAM operator
- MasterCAM operator
- Machine operator
- Mill operator

Information Technology

Online

Duration: 1 Year Total Credits: 24 Award: Certificate

Overview

The Information Technology certificate prepares students to learn the fundamentals of object-oriented programming using an industry-standard programming language as well as the fundamentals of database design and systems administration. Students will have the option to choose an IT elective from a range of IT areas such as web design and development, database administration and networking to further their technical skills.

Success

To succeed in IT, you must think logically and pay close attention to detail. The job calls for patience, persistence and the ability to work on exacting analytical work, especially under pressure. Ingenuity and creativity are particularly important. The ability to work with abstract concepts and to do technical analysis is especially important. Because you are expected to work in teams and interact directly with computer users, you must be able to communicate well with non-technical personnel.

Career

With an information technology certificate, you may pursue the following employment opportunities:

- programmer
- operating systems specialist
- software applications specialist
- software/application support
- database software technician
- webmaster

The following information is provided to you per U.S. Department of Education regulations:
The Department of Labor's Standard Occupational Classification (SOC) code for this occupation is 15-1021. The informational profile for this occupation is at O*NET OnLine.

Regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). View this program's most recent disclosure information including program costs, median loan debt at program completion, normal time to completion and normal time to completion rates, and job placement rate (if reported).

Insurance & Finance Management

Online

Duration: 1 Year Total Credits: 24 Award: Certificate

Overview

Unlock Your Financial Future with UC Clermont's 24 Credit Hour Certificate in Insurance and Finance Management

Are you ready to take your career in finance and insurance to the next level? UC Clermont College offers a comprehensive **24-credit-hour Certificate in Insurance and Finance Management** that will empower you with the knowledge and skills needed to excel in the dynamic world of finance, insurance, and risk assessment. Whether you seek to advance your career or lay the foundation for further education, this certificate program is your key to success.

Program Highlights:

- **Specialized Knowledge:** Gain in-depth insights into insurance operations, risk assessment, liability, commercial finance, and personal finance. Our program equips you with practical, real-world skills that are highly valued by employers in the financial industry.
- **Flexible Schedule:** Designed with working professionals in mind, this certificate program offers flexible scheduling options to accommodate your busy life. Take courses online, allowing you to balance work, family, and education.
- **Pathway to an Associate's Degree:** This certificate program also serves as an excellent stepping stone for those who wish to pursue an Associate's Degree in Financial Management Technology, also offered by UC Clermont College. This means that your educational journey can continue seamlessly to higher levels of expertise and qualifications.

Why Choose UC Clermont College?

- **Expert Faculty:** Learn from experienced professionals and dedicated faculty members committed to your success. Our instructors bring their industry expertise into the classroom, ensuring that you receive the most relevant and up-to-date education.
- **Affordable Education:** UC Clermont College is committed to providing high-quality education at an affordable cost. Explore financial aid and scholarship opportunities to support your academic journey.

Success

Recognizing that digital literacy is essential to be successful in this online program, UC Clermont recommends that incoming students own a computer or laptop that meets the minimum system requirements for software used in the curriculum. This requirement will help ensure that all students have access to the college's digital resources at home or on campus. Recommendations are listed here.

Career

Graduates of this program find rewarding careers in insurance agencies, financial planning, risk management, and other areas of the financial services sector. The demand for skilled professionals in these fields is steadily increasing.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the placement test.

Changing Majors Within UC

Other UC students may transfer into UC Clermont College by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Law and Paralegal Studies

Online

Duration: 1 Year Total Credits: 84 Award: Certificate

Overview

This certificate in Law and Paralegal Studies is for people who have already earned an associate degree but may wish to change careers or continue in their studies.

The effective practice of law requires a team of conscientious, competent professionals. A critical member of that team is the paralegal, who plays a vital role in the legal system by completing essential legal tasks that ensure the delivery of quality legal services to the client. A paralegal's primary role is to provide support to attorneys. Paralegals may work specifically with one lawyer or a group of attorneys. The work that paralegals do varies based on the size and practice area of the firm at which they are employed, but commonly includes meeting with clients, interviewing witnesses, collecting evidence, researching case law and legal precedents, drafting documents, pleadings, and correspondence with clients and the court.

The paralegal field is growing and offers opportunities in many different areas of concentration. A paralegal can work in a variety of legal fields, finding success with corporate firms, private firms or in the public arena. Much like attorneys, paralegals can choose a certain type of law, which can determine the type of work they will do on a regular basis. A litigation paralegal, for example, may prepare clients for trial, interview witnesses, research legal precedents pertinent to a case, and must have a wide knowledge of the court rules and evidentiary issues. A paralegal degree does offers opportunities outside the legal field, including in real estate, hospitals, nonprofits and health care systems.

Success

Excellent communication skills, a willingness to learn computer software applications and attention to detail are important attributes to succeed as a paralegal. You should have good people skills, be an independent worker and have a high degree of personal integrity.

Career

The paralegal profession has been a growth occupation for the past 25 years.

"Employment of paralegals and legal assistants is projected to grow 12 percent from 2020 to 2030, much faster than the average for all occupations. Formally trained paralegals with strong computer and database management skills should have the best job prospects."
— U.S. Bureau of Labor Statistics

A paralegal has many options for employment. This is a growing career, and a challenging one. If this sounds like the career for you, call today to meet with one of our advisors!

Paralegals may not provide legal services directly to the public, except as permitted by law.

The following information is provided to you per U.S. Department of Education regulations:
The Department of Labor's Standard Occupational Classification (SOC) code for this occupation is 23-2011. The informational profile for this occupation is at O*NET OnLine.

Regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). View this program's most recent disclosure information including program costs, median loan debt at program completion, normal time to completion and normal time to completion rates, and job placement rate (if reported).

Admission Requirements

You must have an associate degree and a 2.5 Grade Point Average (2.5) for acceptance into this certificate.

If you have taken paralegal courses at other institutions, you may petition the program director to transfer those credits to our program. Credits must be from a regionally accredited, ABA or an institutional member of AAfPE to be considered.

Interested students should meet with a UC Clermont College Advising staff member for appropriate advising. Please note: In order to obtain this certificate, 50 percent or more of the required coursework must be taken from UC Clermont.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level mathematics or English, you will need to take the appropriate assessments prior to enrolling.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average. Please note if you enroll in a transfer or transition program, a higher grade point average will be required to successfully transfer or transition to the baccalaureate program.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

Medical Coder

Online

Duration: 1 Year Total Credits: 30 Award: Certificate

Overview

The Medical Coder program prepares students to become professional healthcare coders. They work in hospitals, clinics, doctors' offices, nursing homes, pharmacies, insurance companies, etc., preparing and coding bills and reimbursements for medical care. Using the latest technology and industry-established codes, professional coders indicate what treatments were received, what the diagnosis was, and the level of care that was given. Medical coding professionals are in very high demand due to increasing regulations in the healthcare industry, in addition to the rapidly aging population.

Learn more about our 100-percent online Medical Coding Certificate.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

To succeed in medical coding, you should be well organized, have excellent communication skills, and be detail-oriented. You should also be comfortable sitting at a desk for long periods.

Recognizing that digital literacy is essential to be successful in this online program, UC Clermont recommends that incoming students own a computer or laptop that meets the minimum system requirements for the software used in the curriculum. This requirement will help ensure that all students have access to the college's digital resources at home or on campus.

Career

If you successfully complete the medical coding certificate, you may pursue a variety of opportunities in hospitals, physician offices, nursing care facilities, outpatient clinics, home health services, insurance companies and public health departments. If you also become certified by the American Health Information Management Association, you will have the best employment options.

The following information is provided to you per U.S. Department of Education regulations:
The Department of Labor's Standard Occupational Classification (SOC) code for this occupation is 43-3021. The informational profile for this occupation is at O*NET OnLine.

Narrative Medicine

Duration: **1 Year** Total Credits: **18** Award: **Certificate**

Overview

Do you believe in the power of empathy in healing and transforming lives? Are you curious about the role of the arts in medical education? Do you honor stories and recognize their role in understanding individual experiences, relationships, and identities? If yes, then look no further, and explore our exciting new certificate in Narrative Medicine.

Narrative Medicine is an intellectually rigorous, interdisciplinary field that offers a method to humanize healthcare. By integrating skills from literature, fine arts, and, the humanities, Narrative Medicine seeks to foster empathy, strengthen communication skills, and enhance the understanding between patients and healthcare providers. It involves reciprocal telling/listening, reflection, close reading, and free writing. This certificate includes an emphasis on understanding rural healthcare disparities with a special focus on Appalachia.

Why Choose UC Clermont's Narrative Medicine Program?

- Comprehensive Curriculum: Our certificate program offers a comprehensive curriculum designed to equip students with the knowledge, skills, and competencies needed to apply narrative approaches in healthcare settings.
- Expert Faculty: Learn from experienced faculty members who are passionate about teaching and mentorship.
- Flexible Learning Options: Whether you're a full-time student or a working professional, our program offers flexible scheduling options to accommodate your busy lifestyle.
- Networking Opportunities: Connect with fellow students, faculty, and healthcare professionals through networking events, conferences, and collaborative projects.

Who Can Benefit from this Program? The Certificate in Narrative Medicine is ideal for current and future healthcare professionals, including physicians, nurses, social workers, therapists, and medical students, as well as individuals interested in exploring the role of narratives in healthcare and wellness.

Career

Completing UC Clermont's Narrative Medicine certificate program opens up a world of exciting career opportunities in various healthcare and wellness settings. Here are just a few career paths you can pursue with our certificate:

1. Healthcare Educator: Share your knowledge and expertise in Narrative Medicine by becoming an educator, teaching healthcare professionals, students, and community members about the importance of storytelling in healthcare.

2. Medical Writer or Editor: Put your writing skills to use as a medical writer or editor, crafting narratives, patient education materials, research papers, and other medical literature.

3. Patient Advocate: Advocate for patients' voices to be heard in the healthcare system, helping individuals navigate their healthcare journeys and ensuring their stories are respected and valued.

4. Healthcare Administrator: Apply your understanding of Narrative Medicine principles to improve patient experiences, communication practices, and organizational culture within healthcare institutions.

5. Wellness Coach or Counselor: Guide individuals on their wellness journeys by incorporating narrative techniques into coaching sessions, therapy sessions, and wellness programs.

6. Researcher: Conduct research on the impact of storytelling on health outcomes, patient-provider relationships, and healthcare communication, contributing to the growing body of knowledge in the field of Narrative Medicine.

2025-2026 Narrative Medicine Certificate

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review session, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the

semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Learn more about becoming an international student at UC Clermont.

Graduation Requirements

To graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information, visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

PHIL2029	Medical Ethics	3
PSYC2008	Introduction to Art Therapy	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Ohio Peace Officer Training

Duration: **1 Year** Total Credits: **24** Award: **Certificate**

Overview

Law enforcement is a component of the criminal justice system. The primary goals are the prevention of crime, investigation of criminal acts, and the apprehension and detention of those suspected of offenses. While law enforcement officers are concerned with enforcing criminal law, a greater part of their responsibility is the maintenance of order, responding to calls for service and the prevention and deterrence of crime. Most law enforcement is provided by uniformed officers. Law enforcement can be dangerous and stressful, but highly rewarding for those called to serve.

The Ohio Peace Office Training certificate program will provide you with the complete Ohio Peace Officer basic officer training required by the State of Ohio for new Ohio law enforcement officers. Taught by state-certified commanders and instructors, the basic academy adheres to the required content, instructional and training standards necessary for individuals to become certified peace officers in the State of Ohio. The curriculum is intensive and participants must devote significant time and effort to complete the program. The program includes academic, physical fitness, firearms, defensive driving andother policing skills.

At the conclusion of the training, students are required to take a 200-question written final exam administered by the Attorney General's Office to receive a certificate of completion. Graduates of this program typically seek employment as police officers, sheriff's deputies, park rangers or other positions in Ohio which require a law enforcement commission. The academy is offered in both the Fall and Spring semesters.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

Honesty, sound judgment, integrity and a sense of responsibility are especially important for those working with the law. Other important characteristics for law enforcers are cultural sensitivity and the ability to think and act quickly. You should also possess excellent communication skills. You need emotional stability and the ability to cope with high levels of stress for prolonged periods. You must also be able to pass drug tests and background checks. You must be physically fit and possess a high degree of courage, self-sacrifice and loyalty.

Career

There are openings in local and state law enforcement agencies as well as private investigation and personal protection agencies. Some of your opportunities for employment include the following:

- Police and Sheriff's Patrol Officer
- Probation Officers and Corretional Treatment Specialists
- Correctional Officers and Jailers
- Security Guards
- Loss Prevention Managers

Upon completion of the program, graduates may transition seamlessly to our associate and bachelor's degree programs. An associate or bachelor's degree will generally provide graduates with a broader choice of career opportunities. These more advanced degrees in criminal justice tend to benefit you in terms of promotions and duty assignments. Most federal and many state agencies require a baccalaureate degree, and some agencies, such as the FBI, also require a number of years of experience or more advanced academic preparation (such as a graduate degree in law).

Admission Requirements

UC Clermont is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, to be accepted into the Ohio Peace Officer Training Certificate, students must be at least 19 1/2 years of age (see recommendation below) and meet the following requirements:

- Medical exam
- Notarized statement of understanding
- Two letters of reference
- Valid driver's license and proof of insurance
- Fingerprint card
- Personal interview

You should also take into account that many municipal police departments and sheriff's departments require officers to be at least 21 years old when hired. Therefore, we strongly recommend that you turn 21 by the time you graduate from the academy, before you take your OPOTA certification exam.

If you have been convicted of a felony or domestic violence or have two or more DUI convictions, you cannot be admitted to the Ohio Peace Officer's Training Certificate program.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement.
- File formal application for the degree by the posted semester of graduation deadline.

Physician Practice Management

Online

Duration: 1 Year Total Credits: 24 Award: Certificate

Overview

This certificate helps prepare students to sit for the Certified Physician Practice Manager (CPPM®) credential. This credential is a logical next step for those with experience in healthcare and other areas who are ready to advance their careers in physician practice management. Current practice managers will also benefit from this certification with increased knowledge and validation of their knowledge and experience in this skilled profession.

Success

A physician practice manager has both expansive and detailed responsibilities involving management of the revenue cycle, health information, human resources and office technology.

CPPMs have a good understanding of:

- Health care regulations and processes
- Fraud, abuse and corporate compliance
- Quality in health care
- Medical office accounting, physician reimbursement and revenue cycle management
- Human resource management
- Marketing and business relationships
- HIPAA and data security
- Health IT, EHRs and office technology

Career

Graduates of this certificate may pursue manager positions in small, mid-size and large physician practices as well as hospital-owned physician practices, ambulatory care centers, surgical centers and more. Current physician practice managers may benefit from this certificate with increased knowledge and validation of their knowledge and education.

The following information is provided to you per U.S. Department of Education regulations:
The Department of Labor's Standard Occupational Classification (SOC) codes for this certificate program are found at O*NET OnLine.

Regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). View this program's most recent disclosure information including program costs, median loan debt at program completion, normal time to completion and normal time to completion rates, and job placement rate (if reported).

For specifics regarding the CPPM certification, visit the AAPC certification webpage.

MGMT2072	Fundamentals of Human Resources	3
MKTG2080	Introduction to Marketing	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Revenue Cycle Management

Online

Duration: 1 Year Total Credits: 16 Award: Certificate

Overview

The Revenue Cycle Certificate program is a fully online certificate program. Students will receive knowledge in functional areas including: registration (front desk), billing, credit and collections, and revenue cycle management. The revenue cycle can also apply to other areas such as dentistry or behavioral health.

Why choose a Revenue Cycle Certificate?

The healthcare industry is one of the fastest growing industries in the world. Demand in this industry is expected to rise due to increased regulation, the shift to more data-centric systems and the impact of a rapidly aging population on the health care system.

This certificate program is perfect for the following professionals:

- Those looking to make a career change to the healthcare industry—this certificate program is a great step.
- Medical coding and billing professionals with a Medical Coding and Billing Certificate who want to take their career to the next level.
- Healthcare management and heath information system professionals who would like to increase their knowledge of the revenue cycle and expand their career opportunities.

Revenue Cycle Program Highlights:

- **Exam prep:** our curriculum prepares students for the Certified Revenue Cycle Specialist® (CRCS) exam and Certified Revenue Cycle Professional® (CRCP) exam.
- **Technical Certification Reimbursement Program:** UC offers continued encouragement and support to our graduates through our Professional Technical Certification Reimbursement Program. The Program awards eligible students full or partial reimbursement for various technical certification exam fees (including CRCS®, CRCP®, CPC®, CTR® and more). Contact your Enrollment Services Advisor for more information including qualifying criteria.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Career

Revenue Cycle professionals monitor patient registration, complete billing procedures, follow credit and collection protocols, and manage revenue cycles.

What can I do after I earn my Revenue Cycle Certificate?

Revenue Cycle graduates are eligible for our online (HIS) Associate Degree Transfer Program. You can transfer your Revenue Cycle credits into our online Associate Degree in Health Information Systems Program and you'll be more than halfway done.

If you want to continue advancing your education (and career) after earning an associate degree, you can transition into our online Bachelor's in Health Information Management. All of these programs are designed for working professionals and offer flexible schedules and financial aid packages.

HIS graduates are eligible to sit for the Registered Health Information Technician (RHIT) credential and HIM graduates can sit for the Registered Health Information Administrator (RHIA) credential. Both of these credentials are well-respected and highly sought after in the healthcare industry.

Employment Opportunities for Graduates

Employment for medical records and health information technicians is growing rapidly. Graduates can work in many different healthcare settings.

- Physician practices
- Nursing homes
- Home health agencies

- Mental health facilities
- Public health agencies
- Hospitals
- Pharmaceutical companies
- Law and insurance firms
- Health product vendors

Advising

Academic advising is an essential part of your educational experience. An institutional representative will provide insight or direction about an academic, social or personal matter. The nature of this direction might be to inform, suggest, counsel, discipline, coach, mentor, or even teach a college student how to navigate university systems to be successful.

We are committed to providing advice and assistance throughout your academic journey. As a result, you will be assigned an Academic Advisor. This individual will work with you to create an academic plan based on your own personal and educational goals.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review session, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students

RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Our online courses are taught by faculty that have received extensive online training. UC Clermont College is a Quality Matters Institution Member. Colleges and universities can use QM Standards and tools to develop, evaluate and improve the quality of online course design, create a culture of quality and achieve course certification.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed. Although admission is open, students accepted into the program must continue to meet the academic standards established in order to advance to upper levels of study.

Please note: In order to obtain this certificate, 50 percent or more of the required coursework must be taken from UC Clermont College.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- File formal application for the degree by the posted semester of graduation deadline.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Robotics & Automation

Duration: **1 Year** Total Credits: **12** Award: **Certificate**

Overview

Robotics and Automation is the use of electrical circuits, industrial controls, fluid power,and robots to execute manufacturing processes. Advanced manufacturing companies use robotics and automation to increase speed, efficiency, quality and flexibility in manufacturing.

The UC Clermont Robotics and Automation certificate program is designed to provide students with prerequisite knowledge required for entering a career in which robotics and automation are utilized in manufacturing settings. Topics covered in this certificate program include hydraulics and pneumatics, basic electrical theory, industrial circuits, programmable logic controllers (PLC), sensing technology, industrial robots, and collaborative robots. Students who complete the Robotics and Automation certificate will have the ability to obtain a number of industry recognized credentials during the program. The Robotics and Automation certificate also transfers directly to UC Clermont's Manufacturing Engineering Technology Associate degree program.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, group review sessions, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Academic Writing Center (AWC) – The Academic Writing Center (AWC) offers tutoring for all stages of the writing process, from brainstorming to incorporating research. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Group Review Sessions (GRS) – Group Review Sessions (GRS) are small study groups, led by a peer leader, that meet to review content that is covered in course-supported lectures each week. Find the list of supported courses on the Learning Commons website.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions. You can view the up-to-date study table schedule on the Learning Commons website.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions and help you master content in more than 200 undergraduate courses, including subjects such as math, science, languages and business. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont tutor. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Admission Requirements

This program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will complete an English assessment and a mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These assessments do not affect your admission; however, the results are essential for your proper placement in classes. You must complete these assessments before you register for English or mathematics courses.

As a transfer or transition student, an Academic Advisor will determine if any English or mathematics assessment is necessary due to previous standardized tests (ACT/SAT) or coursework.

Changing Majors Within UC

Other UC students may transfer into Clermont College by completing the application for change in college and program. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress.

Graduation Requirements

In order to graduate from UC Clermont, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information,visit the Admissions webpage.

Software Productivity II

Online

Duration: 1 Year Total Credits: 24 Award: Certificate

Overview

Software productivity is the effective use of software to accomplish common business activities. Software skills include word processing, spreadsheet, database, presentation, project management, accounting and digital media.

Graduates will be qualified to work for many types of businesses in a variety of positions. The software productivity certificate is a flexible 100 percent online program, allowing students to earn the certificate from anywhere. It is the perfect fit for students who are not able to attend classes on campus, including people who are employed but are seeking a promotion or career change.

Success

To succeed in a software productivity career, you should be well organized, be proficient in the use of business productivity software and be able to able to coordinate several activities at once.

Career

With a software productivity certificate, you may pursue many different careers. Some of your opportunities for employment include the following:

- Information Coordinator/Specialist
- Technology Coordinator/Specialist
- Digital Projects Coordinator/Specialist
- Customer Service Coordinator/Specialist
- Office Manager/Coordinator/Specialist
- Digital & Social Media Support Specialist

You will find the most employment choices if you also acquire MOS (Microsoft) certification.

The software productivity certificate gives you the technical software proficiency that will enhance your employment opportunities. We use a student-centered learning approach to education. You will use cutting-edge technology to complete hands-on projects that will improve your problem solving and critical thinking skills.

The following information is provided to you per U.S. Department of Education regulations:

The Department of Labor's Standard Occupational Classification (SOC) codes for this certificate program are found here.

Regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). View this program's most recent disclosure information including program costs, median loan debt at program completion, normal time to completion and normal time to completion rates, and job placement rate (if reported).

Writing

Duration: **1 Year** Total Credits: **12** Award: **Certificate**

Overview

Writing is a skill that is valuable in almost every career and walk of life. The ability to write clearly and concisely and communicate effectively with people can set you above your peers and open countless doors of opportunity.

Success

A successful writer is able to express ideas clearly and logically and should love to write. Creativity, curiosity, a broad range of knowledge, self-motivation and perseverance also are valuable. You must demonstrate good judgment and a strong sense of ethics. You also need tact and the ability to guide and encourage others in their work. For some jobs, the ability to concentrate amid confusion and to work under pressure are essential.

Career

A certificate in writing adds to your credentials for any career. The ability to write well opens many doors of employment and promotion opportunities.

Computer Support Specialist

Duration: **1 Year** Total Credits: **9** Award: **MC**

Overview

Are you ready to accelerate your career in the ever-evolving world of technology? Are you passionate about helping others solve their computer-related challenges? Look no further! We are thrilled to announce our latest offering – the groundbreaking Micro-Credential in Computer Support Specialist, designed to equip you with the essential skills and knowledge needed to become a sought-after expert in the field.

Why Choose Our Micro-Credential?

1. Industry-Driven Curriculum: Our micro-credential is carefully crafted in collaboration with top industry professionals, ensuring that you gain hands-on experience with the latest tools and technologies used in the field. You'll dive deep into troubleshooting techniques, network diagnostics, software installations, and more!
2. Time-Efficient: We understand that time is of the essence. Our micro-credential program is optimized to fit into your busy schedule, allowing you to master the skills you need in a fraction of the time compared to traditional degree programs.
3. Practical Learning: Theory alone won't cut it in the real world. Our micro-credential emphasizes practical learning through real-world scenarios, simulated environments, and interactive labs. You'll be ready to hit the ground running from day one!
4. Credibility and Recognition: Upon successful completion, you'll receive a recognized and respected micro-credential that showcases your expertise to employers and clients. Stand out from the crowd with this valuable addition to your resume!
5. Enhanced Job Prospects: The demand for computer support specialists is on the rise, with companies across all industries seeking skilled professionals to maintain their systems and provide exceptional customer support. Our micro-credential equips you with the in-demand skills that employers crave!
6. Upward Mobility: Already in the tech industry but seeking growth opportunities? Our micro-credential can be a stepping stone to higher-level roles in IT support, network administration, or even cybersecurity. Take charge of your career trajectory!
7. Supportive Community: Join a vibrant community of like-minded learners, passionate instructors, and alumni who share their experiences and insights. Networking opportunities and ongoing support await you!

Course Highlights

- Fundamentals of Computer Systems: Get a solid foundation in hardware, software, and operating systems.
- Network Essentials: Dive into the world of networks, understanding protocols, troubleshooting connectivity issues, and more.
- Customer Service Excellence: Learn the art of effective communication and customer-centric problem-solving.
- Security Essentials: Discover best practices to safeguard systems and data from potential threats.
- Cloud Computing: Embrace the future with an introduction to cloud-based technologies.

Enroll Today and Shape Your Future!

Don't miss this chance to unlock new opportunities and propel your career to new heights. Our Micro-Credential in Computer Support Specialist is designed to transform your passion for technology into a rewarding and fulfilling profession.

Secure your spot today, and let us be your partner in success! Join us in shaping the future of technology support.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Writing Center (AWC) – The AWC can help with any writing assignment for any course and at any stage of the writing process. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions in more than 200 undergraduate courses including subjects such as math, science, languages, business and writing. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Pre-College Math Tutoring – Pre-College Math Tutoring Services helps students succeed in Mathematical Literacy (MATH 0029), Fundamentals of Algebra (MATH 0030), Introductory Algebra (MATH 0031) and Intermediate Algebra (MATH 0034). Group study sessions, individual tutoring or email tutoring are available. Information is provided in the course syllabus to help guide students to the study group sessions for that course. Math Learning Resources by math topic that include short instructional videos and worksheets are available on the UC Clermont Learning Commons website.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont professional tutor on Mondays, Wednesdays and Fridays from 10 a.m.-12 p.m. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Admission Requirements

To designate that you are interested in pursuing this Micro-Credential, please complete this form.

Please note: Micro-Credentials are not eligible for financial aid assistance.

Graduation Requirements

In order to complete this Micro-Credential, a student must:

- Complete the required coursework successfully and obtain a "C" grade or higher in all courses.
- Meet the college's residency requirement for micro-credentials (all micro-credential courses must be taken at UC Clermont College).
- File formal graduation application by the posted semester of graduation deadline. There is no graduation application fee for micro-credentials.

Application Deadlines

The designation of a Micro-Credential must be completed by the first day of the term in which the student intends to enroll.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Computer Support Specialist

MC

2025-2026 Computer Support Specialist (MC)

Duration: 1 Year

★Minimum Credits: 9 Credits

Course	Title/Desc	Credit
IT1050	Fundamentals of Information Technology (C min)	3
IT1080C	Computer Networking (C min)	3
IT1081C	System Administration (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Electronic Health Records Specialist

Online

Duration: 1 Year Total Credits: 6 Award: MC

Overview

The **Electronic Health Records Specialist** Micro-Credential will prepare students for the Certified Electronic Health Records Specialist (CEHRS) credential.

Through the completion of two courses — HCMT 1005C: Intro to Health Information, and HCMT 2015: Healthcare Applications — students will be eligible to sit for the CEHRS credential and earn credits that will ladder to the Associate of Applied Science in Health Information Systems degree program offered by the University of Cincinnati Clermont College.

Electronic health records are portable records of a patient's healthcare experience. This responsibility helps doctors see and treat patients more efficiently and may help reduce errors in medical procedures and their documentation. Electronic health records specialists focus on the electronic documentation of the patient's care and condition.

Common job activities may include:

- Auditing patient records for compliance
- Abstracting clinical information for reports
- Performing basic coding to submit reimbursement claims
- Processing Release of Information (ROI) requests for medical records
- Reviewing patient demographic and insurance information
- Discussing patient information with physicians and insurance professionals

Success

The outcome of successful completion of the Micro-Credential would be sitting for the CEHRS exam and passing it to enable entry-level employment as an Electronic Health Records Specialist. Ideally, students who complete the Micro-Credential will decide to continue their education in the fully online AAS in Health Information Systems degree program offered at UC Clermont College.

Career

This Micro-Credential provides preparation for an industry-recognized credential. In order to sit for the Certified Electronic Health Records Specialist (CEHRS) examination, candidates must hold a high school diploma or GED and have completed a training program at an accredited or state-recognized institution or provider. This micro-credential can serve current AAS in HIS students at UC Clermont or new students who want to enter the health information career field by completing short-term training that leads to an industry-recognized credential.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Writing Center (AWC) – The AWC can help with any writing assignment for any course and at any stage of the writing process. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions in more than 200 undergraduate courses including subjects such as math, science, languages, business and writing. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Pre-College Math Tutoring – Pre-College Math Tutoring Services helps students succeed in Mathematical Literacy (MATH 0029), Fundamentals of Algebra (MATH 0030), Introductory Algebra (MATH 0031) and Intermediate Algebra (MATH 0034). Group study sessions, individual tutoring or email tutoring are available. Information is provided in the course syllabus to help guide students to the study group sessions for that course. Math Learning Resources by math topic that include short instructional videos and worksheets are available on the UC Clermont Learning Commons website.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont professional tutor on Mondays, Wednesdays and Fridays from 10 a.m.-12 p.m. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Admission Requirements

To designate that you are interested in pursuing the Electronic Health Records Specialist Micro-Credential, please complete the UC Clermont Micro-Credential Form.

Please note: Micro-Credentials are not eligible for any form of financial aid assistance.

Graduation Requirements

In order to complete this Micro-Credential, a student must:

- Complete HCMT 1005C Introduction to Health Information and HCMT 2015 Healthcare Applications
- Obtain at least a C or better in both courses

- Meet the college's residency requirement for micro-credentials (all Micro-Credential courses must be taken at UC Clermont College
- File formal graduation application by the posted semester of graduation deadline. There is no graduation application fee for micro-credentials.

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Presentation Applications Specialist

Online

Duration: 1 Year Total Credits: 3 Award: MC

Overview

Are you ready to enhance your employability by improving your communication skills, and professionalism, and increasing efficiency? The Presentations Applications Specialist Micro-Credential offered by UC Clermont College is designed to empower you with the skills needed to create compelling, interactive, and visually appealing presentations, essential for effective communication in today's dynamic professional environment.

Key Skills You Will Gain

- **Design Principles**: Learn how to apply design principles to create clean, professional, and impactful slides.
- **Interactive Elements**: Incorporate interactive elements to make your presentations more engaging and memorable.
- **Visual Storytelling**: Master the art of visual storytelling to convey your message effectively and persuasively.
- **Advanced PowerPoint Features**: Gain expertise in using advanced PowerPoint features, including animations, transitions, and multimedia integration.

Why Choose the Presentations Applications Specialist Micro-Credential?

- Career Advancement
  - The Presentations Applications Specialist micro-credential validates skills that make you a more attractive candidate to potential employers and equips you with the tools to excel in your current role and advance your career.
  - Whether you're in business, education, healthcare, or technology, the ability to present information clearly and engagingly is highly valued.
  - Employers seek professionals who can communicate ideas effectively. With this micro-credential, you will stand out as a candidate with specialized skills in crafting presentations that captivate and inform.
  - Enhance your ability to confidently and professionally lead meetings, workshops, and training sessions.
- **Microsoft Office Specialist Certification Preparation**: This micro-credential prepares you for the Microsoft Office Specialist: PowerPoint Associate (Microsoft 365 Apps) certification, a globally recognized qualification that validates your proficiency.
- **Flexible Learning Options**: The micro-credential course is asynchronous (self-paced). You can complete coursework at your own pace within established deadlines, balancing your education with work, family, and other commitments.
- **Cost Effective:** You save time and money on transportation since you do not need to travel to campus.
- **24/7 Access**: With Internet access, you can access your course materials anytime and anywhere. It is ideal for those who travel frequently or live in remote areas.

Programming Primer: Fundamentals and Foundations

Duration: 1 Year Total Credits: 6 Award: MC

Overview

Are you ready to take the first step toward a rewarding career in programming? Look no further! Our cutting-edge Micro-Credential in Programming Primer: Fundamentals and Foundations is designed to equip you with the essential skills and knowledge needed to kickstart your journey in the world of coding.

Key Highlights of the Micro-Credential

- Comprehensive Curriculum: Master the building blocks of programming with a well-structured and easy-to-follow curriculum. From basic concepts to hands-on exercises, we cover it all!
- Practical Hands-on Projects: Apply your learning immediately to real-world projects and gain invaluable experience in solving programming challenges.
- Expert Instructors: Learn from faculty who are passionate about teaching and have a wealth of experience in the programming domain.
- Flexibility and Convenience: Study at your own pace with our flexible online learning platform. Whether you're a busy professional or a student, our program fits your schedule.
- Recognized Certification: Upon successful completion, you'll earn a prestigious Micro-Credential that demonstrates your proficiency in programming fundamentals.
- Career Boost: Stand out in the job market with this specialized skill set. Employers are always on the lookout for individuals who have a solid foundation in programming.
- Pathway to Advancement: Use this Micro-Credential as a stepping stone to more advanced programming courses or degrees. The sky's the limit!

Who Should Enroll?

This Micro-Credential is perfect for:

- Beginners with little to no programming experience
- Individuals exploring a career in software development
- Professionals seeking to add programming skills to their toolkits
- Students looking to complement their studies with practical programming expertise

Enroll Now and Unlock Your Coding Potential!

Take control of your future and embrace the opportunities that programming offers. Enroll now in our Programming Primer: Fundamentals and Foundations Micro-Credential and embark on an exciting journey to become a proficient programmer.

Don't miss out on this fantastic opportunity to level up your career. Join us now and let's code your success together!

Career

This Micro-Credential provides entry-level computer programming skills and could serve existing students in the IT major, existing students in another major who want to add computer programming skills to their toolkit, working adults who want to gain computer programming skills, or unemployed/underemployed adults who want to gain computer programming skills to move into the IT career field.

Spreadsheet Applications Specialist

Duration: **0.5 Year** Total Credits: **3** Award: **MC**

Overview

The Spreadsheet Applications Specialist Micro-Credential is designed to enhance your skills in spreadsheet applications, providing valuable knowledge applicable in various professional settings.

Key Highlights:

1. **Focused Learning:** The program is centered around the course "Spreadsheet Applications (BAT2020C)," ensuring in-depth knowledge and practical skills in spreadsheet usage.
2. **University Affiliation:** Earn your credential from the esteemed University of Cincinnati Clermont College, recognized for its commitment to academic excellence.
3. **Industry-Relevant Curriculum:** The curriculum is carefully crafted to align with industry standards, making you proficient in spreadsheet applications commonly used in professional environments.
4. **Flexible Learning:** The Micro-Credential allows for flexibility, enabling learners to balance their education with other commitments.

Course Overview - Spreadsheet Applications (BAT2020C):

- Gain proficiency in popular spreadsheet software.
- Learn advanced features and functions for efficient data management.
- Practical applications for business, finance, and data analysis.

Why Choose This Micro-Credential?

- Enhance your resume with a specialized skill set.
- Boost your professional capabilities in data management.
- Stand out in the competitive job market with a recognized credential.

Embark on a learning journey that can shape your career. Enroll in the Spreadsheet Applications Specialist Micro-Credential at the University of Cincinnati Clermont College today!

Career

This Micro-Credential provides entry-level spreadsheet application skills and could serve existing students in many academic programs including business, education, and information technology areas. This is an excellent option for those who want to add spreadsheet application skills to their toolkit, working adults who want to gain additional skills, or unemployed/underemployed adults who want to gain skills to increase their professional knowledge.

Spreadsheet Applications Specialist Micro-Credential Curriculum

Students will complete the following course to satisfy the requirements of this Micro-Credential.

Course	Title/Desc	Credit
BAT2020C	Spreadsheet Applications (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Word Processing Applications Specialist

Online

Duration: 0.5 Year Total Credits: 3 Award: MC

Overview

Are you ready to increase your employability by improving your productivity and the quality of your work? The Word Processing Applications Specialist Micro-Credential offered by UC Clermont College is designed to equip you with the expertise needed to create professional documents and business reports with advanced formatting features, important for success in all industries.

Key Skills You Will Gain

- **Advanced Document Formatting:** Master advanced formatting features to create professional documents.
- **Efficient Use of Styles and Templates:** Learn to use styles and templates to maintain consistency and save time on repetitive formatting tasks.
- **Document Automation:** Gain expertise in document automation techniques, such as mail merge and macros, to enhance productivity.
- **Professional Report Creation:** Develop the ability to create comprehensive business reports that effectively communicate data and insights.

Why Choose the Word Processing Applications Specialist Micro-Credential?

- Career Advancement
  - The Word Processing Applications Specialist micro-credential validates skills that make you a more attractive candidate to potential employers and equips you with the tools to excel in your current role and advance your career.
  - Whether you're in business, education, healthcare, or technology, the ability to create professional documents that effectively communicate complex information is highly valued.
  - Employers seek professionals who can communicate ideas effectively. With this micro-credential, you will stand out as a candidate with specialized skills in preparing detailed reports, drafting official correspondence, or managing documentation.
  - Enhance your ability to streamline document creation processes, ensuring efficiency and accuracy in your work.
- **Microsoft Office Specialist Certification Preparation:** This micro-credential prepares you for the Microsoft Office Specialist: Word Associate (Microsoft 365 Apps) certification, a globally recognized qualification that validates your proficiency.
- **Flexible Learning Options:** The micro-credential course is asynchronous (self-paced). You can complete coursework at your own pace within established deadlines, balancing your education with work, family, and other commitments.
- **Cost Effective:** You save time and money on transportation since you do not need to travel to campus.
- **24/7 Access:** With Internet access, you can access your course materials anytime and anywhere. It is ideal for those who travel frequently or live in remote areas.

Who Should Enroll?

- **Professionals Seeking Career Growth:** If you want to advance in your current field or switch to a new career path, this micro-credential will give you a competitive edge.
- **Administrative Personnel:** If you have an administrative role in the workplace, you will benefit from enhanced document creation skills, leading to improved efficiency and productivity.
- **Current Students and Graduates:** Enhance your resume and improve your job prospects by adding a valuable micro-credential to your resume that demonstrates your proficiency in word processing applications.

Join Us at UC Clermont College

Take the next step in your professional journey with the Word Processing Applications Specialist Micro-Credential at UC Clermont College. Develop the skills that employers are looking for and become an expert in creating professional documents and business reports.

Advising

Academic advising is an essential part of your educational experience.

We are committed to providing advice and assistance throughout your academic journey. You and your advisor work together to create an academic plan based on your goals.

Questions? Email us at clermont.advising@uc.edu or call 513-558-8317 to schedule an appointment.

UC Advantages And Special Opportunities

UC Clermont students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC Clermont students include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus or virtually. Visit the Learning Commons webpage for more information or schedule an appointment online.

Academic Writing Center (AWC) – The AWC can help with any writing assignment for any course and at any stage of the writing process. The AWC is not course-specific and can help with discipline-specific documents, as well as non-course-based writing. Schedule a one-on-one appointment with a trained writing tutor or submit a paper online for feedback within 48 hours.

Math & Science Support Center (MASS) – The MASS Center offers virtual study tables for many undergraduate mathematics and science courses. Study tables provide a collaborative learning space so that students can learn from their peers who have excelled (the table leader) as well as their fellow class members attending the study table. No appointment is necessary for these scheduled group study sessions.

Peer Tutoring – Peer tutoring sessions are one-on-one with a subject-specific tutor to answer questions in more than 200 undergraduate courses including subjects such as math, science, languages, business and writing. Schedule appointments up to 7 days in advance for one-hour, 90-minute or two-hour session. If you notice your desired course is not offered, please let us know.

Academic Coaching – Academic coaches help students get organized and learn to be efficient and effective with their study time during one-on-one sessions. Academic Coaches work with students on new strategies or exercises to try before the next meeting and later meetings allow tailoring new approaches to develop the best study and test taking habits for unique goals and strengths. Schedule one-hour sessions as often as once per week.

Success Skills Workshops – Success Skills Workshops are free one-hour sessions that focus on skills students need to be successful in college (study skills, note-taking, motivation, etc.). While there is no shortcut to success, the goal of the workshops is to empower students to identify and apply academic habits and soft skills through a deeper understanding and purpose of them. When students RSVP for a workshop, they will be able to register for the upcoming workshops one at a time and up to nine days prior to the workshop date.

Pre-College Math Tutoring – Pre-College Math Tutoring Services helps students succeed in Mathematical Literacy (MATH 0029), Fundamentals of Algebra (MATH 0030), Introductory Algebra (MATH 0031) and Intermediate Algebra (MATH 0034). Group study sessions, individual tutoring or email tutoring are available. Information is provided in the course syllabus to help guide students to the study group sessions for that course. Math Learning Resources by math topic that include short instructional videos and worksheets are available on the UC Clermont Learning Commons website.

Preparatory Composition – Students enrolled in UC Clermont Preparatory English (ENGL0099) courses have dedicated support from professional tutors. Information about these services and how to connect with the tutor is included in the course syllabus.

Math for Science Students Workshop – Designed for students enrolled in entry-level biology and chemistry courses, these workshops cover foundational math concepts that students need to success in their science courses. The synchronous online workshops are led by a UC Clermont professional tutor on Mondays, Wednesdays and Fridays from 10 a.m.-12 p.m. The workshop repeats each week starting the week before classes begin and continuing through week 3 of the semester.

Math Placement Test Workshop – Offered to prospective and current UC students who want to brush up on their math skills before taking the Math Placement Test. The free synchronous online workshop is led by a UC Clermont professional tutor. The three-week workshop series is offered monthly except in January. It is recommended that students sign up for all three weeks to get the maximum benefit from these workshops.

Canvas Navigator Workshop – Designed to help students who are new to college and need help navigating their coursework online. The workshop shows students how to access their course materials, publisher homework, quizzes, textbooks, academic services like tutoring, and more. Students who attend this workshop can expect to gain clarity on what they need to do on a weekly basis to stay on

track with their course work throughout the semester, which helps students stay motivated leading to greater confidence and success in their courses.

Writing in the Workplace

Duration: 1 Year Total Credits: 9 Award: MC

Overview

Unlock Your Professional Potential with the Power of Words!

In today's fast-paced and dynamic business landscape, effective communication is paramount. Whether you're drafting reports, crafting compelling emails, or creating persuasive presentations, the ability to convey your ideas clearly, concisely, and convincingly can make all the difference. That's why we're thrilled to introduce our latest offering – the Micro-Credential in Writing in the Workplace.

Why Choose Our Micro-Credential?

Enhance Your Communication Skills: Our program is designed to sharpen your writing skills specifically for professional contexts. Say goodbye to vague messages and hello to crisp, impactful communication that captures attention.

Tailored to Real-World Needs: Our curriculum is meticulously crafted to address the challenges professionals face daily. Learn how to articulate ideas effectively, structure information logically, and adapt your tone for different audiences and platforms.

Boost Your Career: Stand out in your organization with exceptional writing expertise. Whether you're seeking a promotion, aiming to lead projects, or simply wanting to excel in your current role, this micro-credential equips you with a competitive edge.

Flexible Learning: We understand the demands of a busy work schedule. Our micro-credential is delivered through bite-sized modules, allowing you to learn at your own pace, whenever and wherever you choose.

Expert Instruction: Benefit from the guidance of experienced writing professionals who have honed their craft in various industries. Gain insights, receive personalized feedback, and engage in interactive discussions to maximize learning.

Earn Your Micro-Credential: Upon successful completion of the program, you'll receive a prestigious micro-credential that can be showcased on your resume, LinkedIn profile, or portfolio, validating your expertise in workplace writing.

What You'll Learn:

- Crafting Clear and Concise Business Documents
- Writing Persuasive Proposals and Reports
- Mastering Professional Email Etiquette
- Developing Compelling Marketing Copy
- Effective Communication for Virtual Teams
- Adapting Your Writing Style for Different Audiences

Join Our Community of Writers:

Enroll in our Micro-Credential in Writing for the Workplace today and embark on becoming a confident and influential workplace writer. Connect with fellow professionals, exchange ideas, and elevate your written communication skills to new heights!

Don't miss this opportunity to invest in your career growth. Enroll now and unlock the doors to success through the art of impactful writing. Your words can shape your future – make them count with our Micro-Credential in Writing for the Workplace!

Your journey to becoming a workplace writing expert begins here!

Career

This Micro-Credential along with other academic credentials and experiences can lead to careers in:

- Public relations specialist
- Content researcher and writer
- Content marketing specialist
- Social media coordinator
- Freelance writer/Blogger
- Director of communications
- Digital Media Specialist

- Grants Specialist

Communication

Online

Duration: 2 Years Total Credits: 60 Award: AA

Overview

Communication focuses on discourse among people and within organizations and social institutions. Communication faculty members share a distinctive focus on contemporary social problems. The fully online Communication program at University of Cincinnati covers issues of voice, identity, public participation and advocacy/leadership across communication domains including interpersonal, organizational, political, rhetorical, environmental, health, and mediated communication. The online associate degree program is designed to provide students with crucial skills for the workplace or help them seamlessly transition into UC's online Bachelor of Communication program.

Success

Communication majors have strong critical-thinking and writing abilities, and they are concerned with understanding society and improving social institutions and the well-being of individuals. Students with the ability to empathize with their audience will be better able to tailor and adapt their messages to achieve their goals. Furthermore, Communication majors need to be able to comfortably speak to individuals and groups. Communication is a good major for students who are interested in working with people and groups in a variety of fields, e.g., business, social work and law.

Career

This program is designed for students who need to develop crucial skills for the workplace or who want to transition to a bachelor's degree in Communication. Graduates with an A.A. in Communication develop many different career skills. Communication majors are professionally desirable because they have excellent critical thinking, oral communication and problem-solving skills, and writing abilities. They are concerned with understanding society, social institutions, and the wellbeing of individuals. In our modern world, success in business and industry requires a sophisticated understanding of communication processes. Communication students are well prepared for advanced study in such areas as law and business. While some career fields may require additional education, graduates find jobs as admissions counselors, communication educators, sales representatives, journalists, marketing or human resource specialists, event planners, advertising executives, and electronic media on-air talent, public relations specialists.

Advising

We are committed to providing advice and assistance throughout your academic journey. For this reason, you will be assigned a student success coordinator and academic advisor to help you create an academic plan based on your own personal and educational goals. Academic advising is an essential part of your educational experience. Your advisor will provide insight and direction about academic, social, or personal matters that affect your educational experience. Additionally, advisors inform, suggest, counsel, discipline, coach, mentor, and even teach college students how to navigate university systems to be successful.

UC Advantages And Special Opportunities

The courses in our program are skills and knowledge based and inherently contain a variety of functions, including performance training, simulations, and experiential learning. We teach writing, speaking, collaboration, and critical thinking—the top skills that employers seek and that set our program apart from many others. Our small class sizes increase interactions with instructors and promote student success. Communication majors also have access to academic support through free professional and peer tutoring (both online and in-person) through The Writing and Study Skills Center, The William R. Dean Math Lab, the Science Learning Lab, the Foreign Language Lab, and UC's Learning Commons.

Admission Requirements

Open Admissions: The program is open to all students who have a desire to succeed in college and who have high school diploma from an accredited high school or GED. Although admission is open, students accepted into the program must meet the academic standards of the program to graduate and to advance to upper levels of study. As a first-year student, you will need to complete English and mathematics placement unless you have the minimum ACT/SAT score required for exemption. Placement is free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start the online Communication program in any semester, provided your transcripts arrive in time to be evaluated before the start of your first semester.

If you have not taken college-level English or mathematics, you will need to complete the placement process.

Transfer students must also supply official transcripts from each previously attended institution of higher education. Credits are accepted from any institution currently accredited by one the six regional accrediting agencies. An official evaluation of transfer credit from other institutions will be processed after the student's file is complete. Credits transferred from another institution may not fulfill specific requirements for the degree.

Changing Majors Within UC

Current UC students may transfer into this fully online program by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all prerequisites.

International Student Requirements

In order to be admitted to University of Cincinnati, you must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Graduation Requirements

In order to graduate from this program, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted deadline of graduation semester.

Application Deadlines

For specific deadline information visit the Admissions webpage.

Pre-Business Administration

Online

Duration: 2 Years Total Credits: 60 Award: AA

Overview

Developing a foundation is critical to success in business. A business's ability to thrive is based on every person having the understanding to perform their tasks efficiently. By receiving a degree in pre-business administration, you can begin to take ownership of your professional career and help your future organization achieve its goals.

If you decide to get a degree in pre-business administration, you will be gaining a baseline understanding of the important skills that are essential to success in a professional setting. These skills will be able to transfer and elevate you when entering into your Bachelor's level program. You will have a strong foundation that will help you pick up on more complex concepts as you advance through your academic career.

What is a Pre-Business Administration degree?

Pre-Business Administration is an online associate degree program that focuses on the basic curriculum needed for the first two years of a bachelor's degree in business. The program is transfer-oriented and is ideal for the student who is considering a bachelor's degree, but who wishes to pursue the first two years in an online environment. This program is designed so students can earn their Associate of the Arts degree and transition seamlessly into the Carl H. Lindner College of Business (LCoB) at the University of Cincinnati or transfer to another Bachelor of Business Administration program.

Career

Career Outlook

Pre-Business Administration is an online associate degree program that focuses on the basic curriculum needed for the first two years of a bachelor's degree in business. The program is transition-oriented and is ideal for the student who intends to pursue a bachelor's degree. The program is designed so students can earn an Associate of Arts degree and transition to the Carl H. Lindner College of Business (LCoB) at the University of Cincinnati or transfer to other Bachelor of Business Administration programs.

What can I do with an Associate degree in Pre-Business Administration?

Students who choose the Pre-Business Administration Associate Program as a career field will be qualified for entry-level positions in business firms, government, and nonprofit organizations. Generally, these positions will be in accounting, finance, marketing, production, purchasing, and human resources. Potential job opportunities could include, but are not limited to: Relationship Banker, Customer Service Associate, Sales Support Specialist, Store Manager, Sales Consultant, Sales Supervisor.

Advising

We are committed to providing advice and assistance throughout your academic journey. For this reason, you will be assigned a student success coordinator and academic advisor to help you create an academic plan based on your own personal and educational goals. Academic advising is an essential part of your educational experience. Your advisor will provide insight and direction about academic, social, or personal matters that affect your educational experience. Additionally, advisors inform, suggest, counsel, discipline, coach, mentor, and even teach college students how to navigate university systems to be successful.

Admission Requirements

Admission into the University of Cincinnati's online Pre-Business Administration Associate degree program is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

Prerequisites

Freshmen:

You are currently a high school senior or have a high school diploma, GED or home-school equivalent.

Transfer:

Transferability is based on school accreditation, course/content comparability (including evaluation of practical assignments), year taken, and final grade.

Submit all official transcripts for every school attended. Learn more about requesting your transcripts.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Application

Fill out the online application. Applications are accepted continuously throughout the year.

Transcripts

Transcripts can be sent through online systems such as Parchment or eScrip-Safe to the University of Cincinnati Undergraduate Office of Admissions. This is the preferred method. These transcripts must be official copies of the student's record. Submit official transcripts or GED scores to:

University of Cincinnati Office of Admissions
P.O. Box 210091
Cincinnati, OH 45221-0091
Electronic submissions can be sent to admissions@uc.edu.

Submit all official transcripts for every school attended. Learn more about requesting your transcripts.

For questions regarding admissions, please email onlineenrollment@uc.edu

Transferring To UC

We accept transfer applications all year long, and you may start the online Communication program in any semester, provided your transcripts arrive in time to be evaluated before the start of your first semester.

If you have not taken college-level English or mathematics, you will need to complete the placement process.

Transfer students must also supply official transcripts from each previously attended institution of higher education. Credits are accepted from any institution currently accredited by one the six regional accrediting agencies. An official evaluation of transfer credit from other institutions will be processed after the student's file is complete. Credits transferred from another institution may not fulfill specific requirements for the degree.

Changing Majors Within UC

Current UC students may transfer into this fully online program by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all prerequisites.

International Student Requirements

In order to be admitted to University of Cincinnati, you must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Graduation Requirements

In order to graduate from this program, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted deadline of graduation semester.

Public Health

Online

Duration: 2 Years Total Credits: 61 Award: AS

Overview

Public health is the science of preventing disease, prolonging life, and promoting the health of people and communities through organized efforts to educate, develop policy, conduct scientific research and regulate health systems. The Public Health Associates degree offers a versatile education that examines emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system, and the monitoring of diseases in the community. This online associates degree program was designed to seamlessly transition to the University of Cincinnati Interdisciplinary Bachelors of Public Health degree.

Success

Public Health students must be good communicators and like working with people. They need to be able to comfortably speak to individuals and groups and must have excellent writing skills. Furthermore, those majoring in public health are usually committed to their own health and are excited about helping others improve theirs. Creativity is a real plus for public health workers, as it often takes creative thinking to motivate and help individuals or communities to change health behaviors.

Career

Careers in public health can range from improving access to healthcare, controlling infectious disease, reducing environmental hazards, designing healthier cities, to working towards decreasing substance abuse. Professionals in public health work in a variety of settings such as:

- Healthcare organizations
- Health insurance companies
- Retail organizations
- Educational institutions
- Government roles within the health department or in disaster readiness

Advising

Academic advising is an essential part of your educational experience. An institutional representative will provide insight or direction about an academic, social or personal matter. The nature of this direction might be to inform, suggest, counsel, discipline, coach, mentor, or even teach a college student how to navigate university systems to be successful.

We are committed to providing advice and assistance throughout your academic journey. As a result, you will be assigned a Program Advisor as well as a Program Retention Specialist. These individuals will work with you to create an academic plan based on your own personal and educational goals.

UC Advantages And Special Opportunities

UC students have access to free tutoring and academic support services through a collaboration with UC's Learning Commons. The Learning Commons provides centralized academic support for all University of Cincinnati students by bringing together faculty, best-practices in teaching and learning, and hundreds of outstanding peer educators to create flexible academic success programming. Free services available to UC students through Learning Commons include academic coaching, success skills workshops, and tutoring in writing, math, science and more. Services are available on-campus Monday-Friday from 9-2 or virtually Monday-Thursday 9-8 and Friday 9-4.

Admission Requirements

Admission into the University of Cincinnati's online Associate of Science in Public Health is open to all students with a high school diploma or GED and the desire to succeed in college. Although admission is open, students accepted into the program must meet the academic standards of the program to advance to upper levels of study.

As a first-year student, you will need to take an English and mathematics placement test if you have not obtained the minimum ACT/SAT score required for exemption. These tests do not affect your admission; however, the results are essential for your proper placement in classes. You must complete placement tests before you register for English or mathematics courses. All placement tests are given free of charge.

Transferring To UC

We accept transfer applications all year long, and you may start any semester, provided your transcripts arrive in time to be evaluated before the start of the semester you wish to attend.

If you have not taken college-level English or mathematics, you will need to take a placement test.

Changing Majors Within UC

Other UC students may transfer into this fully online program by completing the application for change in college and program form. You are urged to see your advisor before transferring into a different major to minimize any impact on your degree progress and to verify that you have met all pre-requisites.

International Student Requirements

You must demonstrate English proficiency. You must also meet admissions deadlines and visa requirements, and provide documentation of sufficient funds before we can complete your admission. Please call the International Admissions Office (513) 556-2069 for details or email with questions.

Graduation Requirements

In order to graduate from this program, a student must:

- Complete all required course work and program requirements.
- Obtain at least a 2.0 university grade point average.
- Be in good academic standing; that is, not on academic or disciplinary probation or suspension.
- Meet the college's residency requirement of 20 semester credit hours.
- File formal application for the degree by the posted semester of graduation deadline.

Application Deadlines

For specific deadline information,visit the Admissions webpage.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Applied Administration

Healthcare Leadership

Duration: 4 Years Total Credits: 120 Award: BTAS

Overview

The Bachelor of Applied Administration program in Healthcare Leadership is designed to advance healthcare professionals within their chosen area of professional practice. This program is geared for students who already hold an associates degree and a current professional healthcare certification who seek a pathway to obtain a bachelor's degree without any loss of credits from their associate degree. Emphasis is given to leadership preparation of multiple constituencies.

Students enter this online program with an associate degree in an allied health or health-related program from a regionally accredited post-secondary higher education institution or a programmatically accredited program AND certification/licensure in their area of practice. Students complete 60 hours of credit at The University of Cincinnati and earn a Baccalaureate degree. Courses offered on a course carousel so students may begin any semester. Full-time (5 semesters) and part-time options.

Success

The successful candidate and graduate will be analytical, detail-oriented, flexible, decisive, and have good communication skills. Good relationship skills and the ability to work well as part of a team are also important skills for success.

With the Bachelor of Applied Administration program, you will:

- Earn your bachelor's degree from the University of Cincinnati, a globally recognized leader in higher education.
- Learn more about communication, collaboration and strategic planning skills that will help you advance your career and reach your goals.
- Enroll as a junior and enjoy our online class model that combines a flexible schedule with personal attention.
- Take advantage of low tuition rates that help you save money, while preparing you to earn more in your professional career.

Career

The Bachelor of Applied Administration in Healthcare Leadership program helps one advance into supervisory, managerial, administration, and other healthcare leadership positions. This degree will assist the student in understanding how healthcare organizations work and succeed in today's world.

University of Cincinnati Genereal Education Requirements

University of Cincinnati General Education Requirements

We have designed a purposeful, sequenced, and on-going approach to achieving the student learning outcomes of the General Education Program. Each major can determine specific ways in which its students meet components of GenEd. All baccalaureate programs fulfill the following requirements.

Course	Title/Desc	Credit
ENGL1001	English Composition	3
ENGL2089	Intermediate Composition	3
	Quantitative Reasoning (QR) (3 credit hours) The appropriate level of analytical and/or mathematical literacy determined by each academic unit/program. The required QR course(s) should align with the math pathway which is appropriate for the student's major.	3
BoK: SCE,TI	Contemporary Topics UC's GenEd Core is designed to direct students to courses and experiences that prepare graduates to contribute and thrive in a global, and technological society. Each student should select a Technology & Innovation course as well as a Society, Culture, and Ethics course.	6

Course	Title/Desc	Credit
	Distribution Areas UC's GenEd program assures exposure to the traditional disciplines that are the hallmark of a liberally educated person. Students should choose 4 courses from a minimum of 3 distribution areas. (12 credit hours) Fine Arts (FA) Historical Perspectives (HP) Humanities and Literature (HU) Natural Sciences (NS) Social Sciences (SS)	12

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Applied Administration

Online

Duration: 4 Years Total Credits: 120 Award: BTAS

Overview

The Bachelor of Applied Administration program is geared for students who already hold an associate's degree or have 60 semester hours from a regionally accredited institution and seek a pathway to obtain a bachelor's degree.

This degree is ideal for students and working adults who want to move into supervisory or administrative positions. The program is suitable for people who have work experience or who have recently earned an associate degree. It gives graduating students an edge in their current positions and helps them achieve a supervisory role within their company or industry.

Applied administration coursework allows students to—

- fulfill UC's general education requirements
- acquire the breadth and depth of a baccalaureate degree
- qualify for career advancement

This program is offered through a collaboration between UC Clermont College and UC Blue Ash College.

Success

The successful candidate and graduate will be analytical, detail-oriented, flexible, decisive, and have good communication skills. Good relationship skills and the ability to work well as part of a team are also important skills for success.

With the Bachelor of Applied Administration program, you will:

- Earn your bachelor's degree from the University of Cincinnati, a globally recognized leader in higher education.
- Learn more about communication, collaboration and strategic planning skills that will help you advance your career and reach your goals.
- Enroll as a junior and enjoy our online class model that combines a flexible schedule with personal attention.
- Take advantage of low tuition rates that help you save money, while preparing you to earn more in your professional career.

Career

The Bachelor of Applied Administration program helps one advance into supervisory positions, and will assist the student in understanding how organization work and succeed in today's world.

You may pursue many different jobs and careers or use your degree to advance into supervisory positions. Some of your opportunities for employment include the following fields of work:

- Medical technology
- Computer science
- Web development
- Automotive services
- Construction
- Paralegal services
- Office and business management
- Social services
- Business Analyst
- Project Supervision
- Training Specialist
- Sales Representative
- Healthcare Administration
- Program Director
- Financial Administrator
- Systems Analyst

	AIS4063 Persuasive Applications OR General Education course as required by program.	3

Applied Administration Advising Notice:
Students will select 15 credit hours of AIS Electives AFTER verifying all General Education components are satisfied. General education requirements consist of English Composition, Quantitative Reasoning, Breadth of Knowledge Requirements (BoK). As determined by your Academic Advisor, required GEN ED courses can replace up to 15 hours of AIS Electives. Seek an Academic Advisors assistance to avoid confusion.

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Hospitality Management

Online

Duration: 1 Year Total Credits: 21 Award: Certificate

Overview

The one-year Hospitality Management Certificate Program is tailored to equip students with essential skills and knowledge, preparing them for roles in the hospitality industry. This streamlined program is designed to deliver a targeted curriculum, encompassing seven courses that delve into crucial elements of hospitality management and impart essential knowledge to deepen understanding of the sector. Crafted for completion within a single year, this program is ideally suited for students planning to enter the hospitality industry upon completion or those intending to further their education with an Associate of Applied Business in Hospitality Management.

The program prepares students to pursue additional multiple certifications by reputable institutions such as the American Hotel & Lodging Educational Institute (AHLEI) to gain accreditations such as START - Certified Guestroom Attendant and/or Certified Front Desk Representative. Students may take an examination to gain ServSafe certification from the National Restaurant Association, thereby expanding their professional capabilities and opportunities in hospitality management.

Success

Students enrolled in the Hospitality Management Certificate Program demonstrate proficient communication skills, exhibit innovative problem-solving capabilities, and possess the agility required to adapt to the dynamic hospitality industry. They tackle assignments with creativity and a commitment to uphold high standards, effectively applying their academic knowledge to formulate practical solutions. Upon completion, graduates are suitably prepared to seek employment opportunities within various sectors of the hospitality industry, such as hotels, restaurants, resorts, event venues, and cruise lines.

Career

Students who complete this program will be able to find careers in travel and tourism, as well as other sectors in the hospitality industry.

Minoring

This one-year certificate program may be used as a minor at UC, provided it is approved by the academic advisor for the degree program in which the student is matriculated.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Major Map Versions:
Hospitality Management Certificate

Advising

UC Blue Ash College and UC Clermont College will assign advisors.

UC Advantages And Special Opportunities

Students enrolled in Hospitality Management courses enjoy small classes and interaction with faculty and professional staff.

Admission Requirements

This program is open to all students with the desire to succeed in college, a high school diploma or GED, and SAT or ACT test scores. Although admission is open, students accepted into the program must meet the academic standards found in the Department Program Requirements in order to advance to upper levels of study. These Program Requirements are available on the department website.

Transferring To UC

A student wishing to transfer to UC Blue Ash College and UC Clermont College from another accredited college or university should be guided by the following statement of policy:

Transfer applications are individually reviewed, and acceptance is based on receipt of application materials, as well as official transcripts from all colleges/universities attended. An official evaluation of transfer credit from other colleges will be processed after the student's file is complete.

Credits are accepted from any institution currently accredited by any of the six regional accrediting agencies. Enrollment Services shall have discretionary authority to accept credits from other institutions in consultation with program directors or department chairpersons.

Only grades of C or better are accepted. Special exceptions may be granted at the discretion of Enrollment Services in consultation with program directors or department chairpersons.

There is a 10-year expiration limit for acceptance of transfer credits. Exceptions can be made by Enrollment Services in consultation with the appropriate program directors or department chairpersons.

For all situations not covered by the above, the decision will be referred to the department involved when appropriate.

Changing Majors Within UC

Students changing majors from other programs or colleges within UC will be considered based on the same criteria as outside transfers.

International Student Requirements

Students who did not graduate from a high school in the United States of America must take an ability-to-benefit test and achieve the minimum specified score to be eligible for admission to a degree or certificate program at UC Blue Ash College and UC Clermont College. The scores will be used for placement in English courses and general advising for all courses.

Graduation Requirements

A grade of C- or better must be earned in all Hospitality Management courses.

Application Deadlines

The One-Year Certificate programs are designed to be completed in one year, provided students are full-time and do not need prep courses in English.

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

MS in Cosmetic Science

Online

Duration: 2 Years Total Credits: 30 Award: MSCOS

Overview

The graduate program in the James L. Winkle College of Pharmacy at the University of Cincinnati aims to train students who will become the future leaders in Cosmetic Science. We offer both a Graduate Certificate (GC) and our nationally-acclaimed Master of Science (MS) in Cosmetic Science online to part-time and full-time students. We also offer the conventional thesis-based MS and PhD degrees in Pharmaceutical Science with emphasis in Cosmetic Science.

Success

- Course offerings are designed to provide students with the know-how to develop cosmetic and personal care products that delight the consumers and improve their quality of life.
- These include the physiology and pharmacology of pertinent therapeutic or benefit systems of the skin and hair, as well as those associated with approved OTC drug categories.
- Course offerings also cover the underlying physical, biophysical, colloidal and interfacial chemistry and formulation science of skin and hair cosmetic products, and OTC drug products.
- Experimental design and statistical evaluation, product evaluation techniques (in vitro and clinical) including stability evaluations, cosmetic microbiology, consumer research, US FDA cosmetic and drug regulations, and product development approaches are additional topics addressed in course offerings, among many others.
- A concentrated one-week hands-on laboratory formulation session at University of Cincinnati is also an option.

Career

As a career focus, the student will be trained to understand:

- The know-how to apply physiology/biology of relevant skin, hair, and/or OTC drug targeted organ systems as these relate to achieve or evaluate the desired outcome of the use of cosmetic and personal care products.
- The ability to formulate cosmetic and personal care product types (emulsions, suspensions, gels, solutions, aerosols, etc.) to meet desired product attributes using an understanding of the physical and chemical basis of these formulations.
- The ability to identify and evaluate potential new actives and benefit delivery approaches from the relevant literature that could provide improved product performance.
- The know-how to develop new product formulation approaches from evaluation of existing products and the relevant literature, and from designed experimentation to create products with improved benefits and consumer experience.
- The ability to develop comprehensive product development programs to meet new product criteria and timing.
- An understanding of methods to evaluate new and existing products for consumer acceptance, performance, and stability.
- Familiarity with relevant governmental regulations (primarily US) which will help confirm product compliance.
- The ability to prepare written assessments/proposals and orally present and defend them.
- Develop project management skills that will enhance leadership opportunities.

Curriculum

Curriculum Guide Versions:
Master of Science- Cosmetic Science

UC Advantages And Special Opportunities

Started in 1973, our Master of Science in Cosmetic Science is now globally recognized as one of the oldest graduate programs in the country. Our innovative programs help prepare students today to gain knowledge of cosmetic science that help them develop as industry leaders for tomorrow.

Admission Requirements

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from an accredited college or university or an equivalent non-U.S. degree
- A grade-point average (GPA) of at least 3.00 or non-U.S. equivalent
- At least one semester of undergraduate course work in organic chemistry and calculus, or related fields; or the equivalent as determined by the graduate program
- Resume/CV

- Two letters of recommendation are required, three are preferred. (Applicants are encouraged to seek letters from individuals who can comment on research experience). Letters of recommendation from family, friends, current students, politicians, or clergy are not accepted.
- If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. IELTS score of 7 or higher is preferred or a Duolingo score of 110 or higher is also acceptable.
- Completed online application

Transferring To UC

Students who are accepted into the MS progam are eligible to apply for advanced standing.

International Student Requirements

International students are eligible to apply.

The Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is not English. The minimum score required for admission is 90 (internet-based test). If you have a bachelor degree or higher from a United States university, this requirement will be waived. IELTS score of 7 or higher is preferred or a Duolingo score of 110 or higher is also acceptable.

Graduation Requirements

To fulfill graduation requirements the student must complete a minimum of 30 graduate hours while in the program, with a GPA of 3.0 or greater. A capstone project is required as a final project to demonstrate program proficiency.

Application Deadlines

Fall Semester - August 1
Spring Semester - December 1
Summer Semester - April 1

PCEU8190	Cosmetic Science Capstone III (C min)	2

Elective Courses

Students must choose 11 hours from the following courses:

Course	Title/Desc	Credit
PCEU8005	Safety Assessment of Cosmetic & Topical OTC Drug Products- Pre Clin & Clinical (C min)	2
PCEU8015	Pharmacology-Basics and Cosmetic & Personal Care Product Applications (C min)	2
PCEU8016	Consumer Understanding for Formulators-Overview and Practice (C min)	2
PCEU8017	Introduction to Cosmetic Regulations (C min)	2
PCEU8023	Fragrance Science (C min)	2
PCEU8040	Color Cosmetics (C min)	2
PCEU8045	Color Cosmetics II (C min)	2
PCEU8060	Clinical and Instrumental Testing of Skin (C min)	2
PCEU8070	Molecular Biology of Skin (C min)	2
PCEU8080	Cosmetic Microbiology (C min)	2
PCEU8089	OTC Drug Product and Dietary Supplement Product Development (C min)	3
PCEU8120	Advanced Skincare Science (C min)	3
PCEU8130	Advanced Hair Care Science (C min)	3
PCEU8140	Manufacturing Hygiene: Facilities, Utilities, and Plant Engineering (C min)	2
PCEU8150	Manufacturing Hygiene: Microbiology, Product/Package Design, & Quality Assurance (C min)	2

Additional Courses

On-Ground Cosmetic Science Program Laboratory Courses:

Course	Title/Desc	Credit
PCEU8021L	Cosmetic Science Laboratory (C min)	2
PCEU8046L	Introduction to Cosmetic Color Science Lab (C min)	2

Didactic Online Drug Development Program Courses- (only if special interest in these topics):

Course	Title/Desc	Credit
PHDD8010	Global Regulatory and Development Strategies of Drugs and Medical Devices (C min)	3
PHDD8080	Pharmaceutical Economics and Management (C min)	3

Online Multi-Program Didactic Course (Credit Hours not applied to those needed for MS):

Course	Title/Desc	Credit
PCEU7040	Scientific Communication in Pharmacy (C min)	3

BS-MS Course Opportunities (Hybrid onsite/online):

Course	Title/Desc	Credit
PCEU6001	Survey of Cosmetic Science (C min)	1
PCEU8026L	Introduction to Surface, Colloid and Membrane Science Lab (C min)	1

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

MS in Pharmacy Leadership

Online

Duration: 2 Years Total Credits: 30 Award: MSPL

Overview

Combining leadership and professional development content in a series of health care business and management courses, the Pharmacy Leadership Graduate program customizes the learning and growth experience. Pharmacist professionals and student pharmacists will be prepared for career advancement in numerous healthcare roles. The program has a uniquely combined curriculum with courses provided by the Winkle College of Pharmacy, Lindner College of Business MBA Program, and College of Allied Health Sciences Masters in Health Administration (MHA) and Masters in Health Informatics (MHI) Programs.

Benefits of Online Learning

Designed for the working pharmacist or student pharmacist, our programs are offered completely online, providing flexibility and convenience, without interference in current employment or personal schedules.

- All courses are conveniently offered completely online – no classrooms or visits to University of Cincinnati are necessary!
- The curriculum is delivered via asynchronous online learning technology that allows coursework to be completed at the times that best fit your work and personal life schedules. Lectures are video-recorded and activities are posted for your review on your own schedule.
- Students can access course information at their convenience, 24 hours a day, and are also provided with opportunities for engaging in online discussions with professors and classmates.

Skills and Knowledge Gained

Students strengthen their leadership skills through courses with active learning experiences in the following areas and more:

- Communicating as a leader
- Developing entrepreneurial and innovative thinking
- Influencing and motivating others – Leading with Passion
- Finding your leadership style
- Conflict management
- Building and leading teams
- Collaboration
- Mentorship
- Strategic planning and defining measures of success
- Effective implementation
- Cultural competencies

Expected Outcomes

- Advance your leadership and management skills while building your knowledge of the issues facing our health care system and changes in business operations
- You will be prepared for personal career growth in our changing health care system

Preparing Pharmacists

- Apply valuable leadership and management skills and competencies to personally advance in their workplace
- Engage as leaders in pharmacy's professional organizations to drive continued advancement of our profession and pharmacists' roles in health care delivery

Scholarship Opportunities

The Taylor-Frank Fund was endowed to provide scholarships designated for graduate student support. The Marianne F. Ivey Fund was endowed to provide scholarships designated for graduate student support in the Pharmacy Leadership Program. Together, these funds provide annual scholarships awarded to students pursuing the Graduate Certificate or Master's Degree in Pharmacy Leadership.

Scholarship Amount and Deadlines

Scholarship amounts will cover tuition of one course in the program for the Fall semester. Once the course is completed, the student can continue with the remaining 4 courses for a Graduate Certificate or the remaining 9 courses for the Masters in Pharmacy Leadership degree. In some cases, smaller award amounts may be offered for partial course tuition.

Scholarship Application Deadlines

- August 1 for Fall semester awards

- December 1 for Spring semester awards
- April 1 for Summer semester awards

Evaluation Criteria for the Award

Currently enrolled students and those who have been accepted for admission in the Pharmacy Leadership graduate program are eligible to submit a scholarship application.

All applications will be considered, with preferences for high academic performance, practice and professional engagement, demonstrated financial need, and diversity. Preference will be given to those who belong to an underrepresented minority group.

Additional information will be accessed from the applicant's application dossier as needed.

Apply for Scholarships

To learn more and apply for scholarships, please visit https://pharmacy.uc.edu/plscholarships.

Career

Graduates are prepared to become supervisors, managers, and directors in numerous healthcare settings including:

- independent and chain community pharmacies,
- health-system inpatient, outpatient, long-term care, and clinical pharmacies,
- clinical coordinator roles,
- managed care, industry and more.

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Pharmacy Leadership MS

Admission Requirements

- Applicants must meet one of the following criteria:
  - Proof of BS degree in pharmacy or Doctor of Pharmacy degree from an accredited institution, or
  - Proof of a BS degree from an accredited institution AND current enrollment in a Doctor of Pharmacy program AND proof of completion of required Foundational Knowledge coursework
- Minimum 3.0 GPA recommended
- International students only: Minimum TOEFL score of >90 (or equivalent IELTS score)

Application Requirements

- Letters of Recommendation
- Resume/CV
- Statement of Purpose
- Application Fee

Transferring To UC

ASHP Foundation Pharmacy Leadership Academy Graduates

Graduates of the ASHP Foundation Pharmacy Leadership Academy® are eligible to receive 6 semester credit hours toward the completion of the Master of Science in Pharmacy Leadership. This credit can apply for two separate 3 credit hour courses in the program – reducing the required coursework from 10 courses to only 8 courses, with program completion in just 4 semesters.

International Student Requirements

International Students are eligible to apply after taking the Test of English as a Foreign Language (TOEFL) which is required of all applicants whose native language is not English. With an earned undergraduate or graduate degree from a U.S. college/university, this requirement will be waived. The minimum TOEFL score for admission is 90 on the internet-based test (IBT).

The IELTS can be taken in place of TOEFL. The minimum required IELTS score is 6.5.

Foreign applicants whose transcripts are not easily read may be asked to submit a full evaluation of transcripts by a U.S. agency.

Graduation Requirements

Required Capstone Project

In addition to the 27 hours of didactic coursework, students are required to complete a 3 credit hour capstone course with an applied project reflecting application and integration of their knowledge and skills in pharmacy leadership and management. Projects must be pre-approved by the Course Coordinator. The student will have project oversight and advising from a three-member capstone committee. This capstone prepares the student for independent application of leadership and management skills to address a problem or question significant to pharmacy practice advancement. Students are required to present their capstone project work and results to the committee at the culmination of the program.

Application Deadlines

- Fall Semester - August 15
- Spring Semester - December 15
- Summer Semester - April 15

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

MS in Pharmacy Leadership : Online

MSPL

Pharmacy Leadership MS

Duration: 2 Years

★Minimum Credits: 30 Credits

Required Courses

Each course is completed in a compressed schedule of 7.5 weeks. Students take one 7.5 week course at a time, completing two courses each semester as they proceed through the program.

Course	Title/Desc	Credit
HCA7002	Health Systems Management 2: Principles of Leadership (C min)	3
PHLD8010	Leading Quality Management in Pharmacy (C min)	3
PHLD8020	Human Resources Management in Pharmacy (C min)	3
PHLD8030	Communication for Pharmacy Leaders (C min)	3
PHLD8040	Medication Use System Management (C min)	3
PHLD8050	The Healthcare MarketPlace- Pharmacy Economics (C min)	3
PHLD8070	Accounting and Financial Decision-Making for Pharmacy Leaders (C min)	3

Required Capstone Coursework (full term courses)- students are expected to include the PHLD 8061 Capstone 1 course in their 3rd semester in the plan of study.

Course	Title/Desc	Credit
PHLD8061	Pharmacy Leadership Capstone I (C min)	1
PHLD8062	Pharmacy Leadership Capstone II (C min)	1
PHLD8063	Pharmacy Leadership Capstone III (C min)	1

Elective Courses

Elective courses offered from the College of Allied Health (Health Administration & Health Informatics) and from the Lindner College of Business

Choose two electives from the following course options.

Course	Title/Desc	Credit
HCA7001	Health Systems Management 1: Organization & Delivery (C min)	3
HCA7031	Health Policy 1: Health Policy & Regulation (C min)	3
HCA7032	Health Policy 2: Legal & Ethical Issues (C min)	3
HCA7033	Global Health Systems (C min)	3
HCA7041	Health Quality 1: Evidence-Based Decision Making for Managers (C min)	3
HI7010	Health Informatics, Information Systems and Technology (C min)	3
HI7072	Leveraging Analytics and Business Intelligence Tools for Healthcare (C min)	3
ECON7021	Health Care Marketplace 1: Health Economics (C min)	3
MGMT7022	Health Care Marketplace 2: Strategic Success (C min)	3
OM7042	Health Quality 2: Total Quality Management (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

MS in Pharmaceutical Sciences

Healthcare Operational Excellence

Duration: 2 Years Total Credits: 30 Award: MSPS

Overview

Healthcare Operational Excellence focuses on improving quality and efficiency within healthcare settings. The program, rooted in the Pharmacy 5.0 framework, is harmoniously aligned with the principles of Industry 4.0/5.0. It will harness a variety of advanced technologies and concepts, including Lean Six Sigma (LSS), machine learning, deep learning, artificial intelligence (AI), and big data analysis, among others, to enhance operational performance to improve quality, efficiency, effectiveness, and system resilience for patient care,leading to an enhanced patient-centered. As the culmination of this comprehensive program, students will have the opportunity to complete a thesis or capstone project that combines curricular outcomes from the entire program.

Career

The UC MS in Healthcare Operational Excellence will prepare students for careers in pharmaceutical and medical devices industry market access and research, health insurance companies, healthcare administration, pharmacy benefit managers, contract research organizations, healthcare operations and logistics, and academia. The Bureau of Labor Statistics projects medical and health services manager roles, including process improvement management, to grow 28% from 2021 to 2031.

Career opportunities for the MS in Healthcare Operational Excellence include:

Medical & health service managerial roles

Medical affairs in public and private health systems

Pharmaceutical or medical device industries

Health insurance companies

Government, and academia

Research Project Manager

Quality improvement coordinator/managers, consultant

Operation improvement coordinator/managers, consultant

Quality improvement consortiums.

Curriculum

For the Master of Science in Healthcare Operational Excellence online, the curriculum includes a total of 30 required semester credit hours to satisfy degree requirements. The curriculum is customizable, and students can choose their courses. Students will first enroll in the foundational courses for this program. After that the students will take the available core courses and electives for that semester to satisfy the 30 credit requirement.

Healthcare Operational Excellence MS Program

Admission Requirements

A U.S. bachelor's degree from a regionally accredited college or university, or an equivalent degree

Biology, chemistry, or science-related degrees, health science degrees, economics, and business degrees (Sales and Marketing) Marketing is a type of business degree.

Some experience in clinical research or healthcare.

A minimum 3.0 cumulative GPA.

For international students, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English test of at least 110 is accepted.

Transcripts must be submitted for evaluation to an agency recognized by the National Association of Credential Evaluating Services.

International Student Requirements

International students are eligible to apply.

The Test of English as a Foreign Language (TOEFL), IELTS or Duolingo test is required of all applicants whose native language is other than English. The minimum score required for admission of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English Test of at least 110 is accepted. If you have a bachelor degree or higher from a United States university, this requirement will be waived.

Graduation Requirements

In order to successfully graduate, the student must meet the following requirements:

The student must earn satisfactory grades for all courses required.

The student must complete the 30 hours required for the degree.

The student must satisfactorily complete the required capstone project

The student must satisfactorily complete all applicable college and program requirements specific to the student's program of study.

The student must maintain active student status; meaning the student must register for at least one graduate credit in their program in an academic year, after having met minimum degree course/candidacy requirements.

All grades of NG, I, UP, SP must be satisfactorily resolved to ensure on time graduation.

MS in Pharmaceutical Sciences

Health Outcomes and Pharmacoeconomics

Duration: 3 Years Total Credits: 30 Award: MSPS

Overview

The Master of Science in Health Outcomes and Pharmacoeconomics program at the University of Cincinnati Online prepares students for careers in health care research, medical & health service managerial roles, medical affairs, and market access in public and private health systems, the pharmaceutical or medical device industries, health insurance companies, government, and academia. Health outcomes research generates evidence to improve patient care delivery, as well as decision-making in regard to policy discussions for health care reimbursements and priorities.

Students will take courses covering topics including biostatistics, pharmacoepidemiology, Comparative effectiveness research, cost-effectiveness analysis, and decision analytical modeling. Students will also complete a non-thesis capstone project that ties together curricular outcomes from the entire program.

Career

UC Online's MS in Health Outcomes & Pharmacoeconomics will prepare students for careers in pharmaceutical and medical devices industry market access and research, health insurance companies, health care administration, pharmacy benefit managers, contract research organizations, and academia. *The Bureau of Labor Statistics* projects medical and health services manager roles to grow 28% from 2021 to 2031.

Career opportunities in health outcomes include the following:

- Research Project Manager
- Clinical Research Coordinator
- Research Consultant
- Research and Development Manager
- Pharmacoeconomist
- Health Outcomes Research Analyst
- Data Science Researcher
- Field Data Collection Coordinator
- Medical Device Researcher
- Health Plan Manager
- Market Access Manager
- Manager, Health Economics and Outcomes Research
- Managed Care Scientific Liaison

Curriculum

For the Master of Science in Health Outcomes & Pharmacoeconomics online, the curriculum includes a total of 30 required semester credit hours to satisfy degree requirements. The curriculum is customizable and students can choose their courses. Students will first take the foundation courses for this program. After that students will take a the available core courses and electives for that semester to satisfy the 30 credit requirement.

MS in Pharmaceutical Sciences

Drug Development

Duration: 3 Years Total Credits: 30 Award: MSPS

Overview

The Masters in Pharmaceutical Sciences with emphasis on Pharmaceutics/Drug Development (MSDD) is a two-year, online degree. Tailored to meet the aspirations of working professionals, the program can be completed on a part-time basis with coursework offered as an online learning basis.

A collaboration between academia, industry and government, the MSDD provides cross-disciplinary training in the scientific and regulatory and business aspects of drug development. Graduates are uniquely prepared to participate in the multidisciplinary process to translate a therapeutic concept from lab bench to bedside.

Career

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Master in Drug Development

Admission Requirements

Students who have earned at least an undergraduate degree in chemistry, biology, engineering, or related disciplines from an accredited institution are eligible to apply for admission. A foundation study in Pharmacology is required, but applicants without this foundation may be admitted with the encouragement to complete the UC offered courses, such as the graduate certificate, prior to full engagement within the Drug Development program.

>>Apply to the MS Program

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from a regionally accredited college or university, or an equivalent degree from outside of the U.S.
- A grade-point average (GPA) of at least 3.00 or equivalent
- If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Supplemental Application Documents

Consideration for admission requires completion of a UC Graduate Admissions Application and electronic submission the following documents:

- CV or Resume
- Statement of Purpose: Why do you plan to pursue a research-intensive MS degree in Pharmaceutical Sciences at the University of Cincinnati? What is your desired research focus area within the broad field of Pharmaceutical Sciences?

Transcript information

All university transcripts (undergraduate and graduate if applicable; unofficial transcript is sufficient for initial review process).

Letters of Recommendation

Three letters of recommendation (applicants are encouraged to seek letters from individuals who can comment on research experience).

International Student Requirements

If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Graduation Requirements

- Completion of Plan of Study
- Successful passing of Capstone
- Cumulative grade point average of all didactic courses ≥3.0
- Min of 30 credit hrs from track-based curriculum outline
- No failing "F" grade in any of the degree-associated graduate course

MS in Pharmaceutical Sciences

Pharmacogenomics and Personalized Healthcare

Duration: 3 Years Total Credits: 30 Award: MSPS

Overview

The Online Master of Science (M.S. in Pharmacogenomics and Personalized Healthcare) program at the University of Cincinnati offers a unique opportunity for students to gain in-depth knowledge about Pharmacogenomics and understand the effects of genomics, environment, patient-specific factors on drug response, allowing for individualized therapy and optimal clinical outcomes. Additionally, the program provides knowledge of state-of-art omics research, innovative Precision Medicine approaches, and implementation of Genomic Medicine

Our two-year program is built around developing skills in these areas through real-world application of course content, industry/medical partnerships, and research-based best practices. This Master's program is only available online.

Career

The Online Master of Science (M.S. in Pharmacogenomics and Personalized Healthcare) program at the University of Cincinnati is designed for students seeking to advance their career, or education in the field of pharmacogenomics, medicine, and/or pharmaceuticals. At the pinnacle of these industry segments exist career opportunities as scientific curators, lab technologists/directors, research technologists, and genetic testing positions.

Curriculum

Our online Master of Science in Pharmacogenomics and Personalized Healthcare program is designed to cultivate competent pharmacogenomic professionals. Our Master's curriculum emphasizes the practical application of knowledge as it relates to pharmacogenomic research, curation, and real-world outcomes.

The curriculum for the master's degree was designed with potential career opportunities in mind. Therefore, many classes may relate to several aspects of science as pharmacogenomics encompasses all research.

The pharmacogenomics program is 30 credit hours long, and has a required 21 credit hours of pharmacogenomic courses along with 9 credit hours of electives. With these electives the student can select a track to follow or take several classes from different disciplines.

The tracks the student can participate in are as follows:

- Drug Development*
- Pharmacy Leadership*
- Advanced Pharmacogenomics

(*) = Can obtain a certificate with 15 credit hours of classes. This would put the student at 36 credit hours, which is one extra semester (6 credit hours) in addition to the Master's in Pharmacogenomics program.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Master in Pharmacogenomics and Personalized Healthcare

Admission Requirements

Prerequisites:

- Bachelor's degree from an accredited institution in a science field (ex. Biology, Chemisty, Physics, etc)
- At least one semester of undergraduate course work in organic chemistry and calculus, or related fields; or the equivalent as determined by the graduate program
- A minimum 3.0 cumulative GPA
- For international students, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English Test of at least 110 is accepted.

International Student Requirements

International students are eligible to apply but please note that this is an online program and not eligible for F-1 Visa status.

The Test of English as a Foreign Language (TOEFL), IELTS or Duolingo test is required of all applicants whose native language is other than English. The minimum score required for admission of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English Test of at least 110 is accepted. If you have a bachelor degree or higher from a United States university, this requirement will be waived.

Graduation Requirements

Before the program can certify that a student can graduate, the student must meet the following requirements:

- The student must earn satisfactory grades for all courses required.
- The student must complete the 30 hours required for the degree.
- The student must satisfactorily complete the required capstone project
- The student must satisfactorily complete all applicable college and program requirements specific to the student's program of study.
- The student must maintain active student status; meaning the student must register for at least one graduate credit in their program in an academic year, after having met minimum degree course/candidacy requirements.
- All grades of NG, I, UP, SP must be satisfactorily resolved to ensure on time graduation.

MS in Pharmaceutical Sciences : Pharmacogenomics/Healthcare

MSPS

Master in Pharmacogenomics and Personalized Healthcare

Duration: 3 Years

★Minimum Credits: 30 Credits

Pharmacogenomics Required Courses

Must take all courses for graduation, and select a track, or an additional 9 credit hours for graduation. PHDD8001 must be taken twice for 1-credit hour each. Students in the Drug Development or Pharmacy Leadership Track may substitute 1 course (1 hour) of PHDD8001 for PHGX9090 (Careers in Pharmacogenomics).

Required Courses

Course	Title/Desc	Credit
PSCI7103	Metabolism, Molecular Biology and Pharmacogenomics (C min)	3
PCEU7050	Ethics in Scientific Research- Pharmacy (C min)	1
PHGX8080	Human Genetics (C min)	2
PHID8015	Pharmaceutical Biotechnology (C min)	3
PCEU7010	Biostatistics & Research Methods (C min)	3
PHTH9140	Clinical Application of Pharmacogenetics (C min)	1
PHDD8091	Drug Development Project I (C min)	2
PHDD8092	Drug Development Project II (C min)	2
PHDD8001	Seminar in Drug Development (C min)	1 - 2
PHGX8090	Advanced Pharmacogenomics (C min)	2

Drug Development/Curation Track

Must take all three required drug development classes if choosing this track. If student chooses Drug Development certificate track they will will need additional two courses adding 6 additional credit hours to graduation requirements.

Required Drug Development

Course	Title/Desc	Credit
PHDD8030	Pre-Clinical/Non-Clinical Studies for IND Approval (C min)	3
PHDD8050	Phase I/II Clinical Trials Research and Design (C min)	3
PHDD8070	Phase III/IV Clinical Trials and Research (C min)	3

Pharmacy Leadership Track

Must take HCA7002, and then 2 additional electives if choosing this track. If student chooses Pharmacy Leadership certificate track they will will need additional two courses adding 6 additional credit hours to graduation requirements.

Required Pharm Leadership

Course	Title/Desc	Credit
HCA7002	Health Systems Management 2: Principles of Leadership (C min)	3

Elective Pharm Leadership (Need 2 electives- 6 credit hours)

Course	Title/Desc	Credit
PHLD8010	Leading Quality Management in Pharmacy (C min)	3
PHLD8020	Human Resources Management in Pharmacy (C min)	3
PHLD8030	Communication for Pharmacy Leaders (C min)	3
PHLD8040	Medication Use System Management (C min)	3
PHLD8050	The Healthcare MarketPlace- Pharmacy Economics (C min)	3
PHLD8070	Accounting and Financial Decision-Making for Pharmacy Leaders (C min)	3

Advanced Pharmacogenomics Track

Must take all electives to complete this track

Course	Title/Desc	Credit
PHGX9000	Cancer Genomics (C min)	3
PHGX9010	Nutrition and Exercise Genomics (C min)	3
PHGX9020	Implementation Science (C min)	2
PHGX9090	Career's in Pharmacogenomics (C min)	1

No Track

Must take 9 hours of electives from any Graduate-level course in Drug Development, Pharmacy Leadership or Advanced Pharmacogenomics.

Course	Title/Desc	Credit
PHDD6XXX+ PHGX6XXX+ PHLD6XXX+	Any PHDD, PHGX, or PHLD 6000-level or higher. (C min)	9

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

MS in Pharmaceutical Sciences

Duration: 3 Years Total Credits: 30 Award: MSPS

Overview

Discover our MS degree in Pharmaceutical Sciences, where we strive to provide an exceptional education that equips future pharmacists with the skills needed to excel in organized healthcare settings. Our dedicated faculty members are committed to creating an unparalleled learning experience and offering close mentorship and guidance to students. With flexible scheduling options available, including online and in-person formats, you can tailor your learning experience to fit your needs and preferences.

Furthermore, our program goes beyond the classroom by offering extensive networking opportunities. Collaborations with leading pharmaceutical companies and a vast alumni network provide invaluable connections that can lead to exciting research opportunities and promising career placements.

Join our program and unlock a world of possibilities in the pharmaceutical industry.

Program Options

Students can earn this degree by choosing one of the three program tracks below.

Biomembrane Sciences Track

The goal of the Biomembrane Sciences track is to cultivate scientists proficient in understanding the molecular and cellular mechanisms behind biological membranes, their role in disease etiology and treatment, and their barrier properties.

Students in this track explore diverse research projects, including drug delivery strategies, safety and efficacy evaluation of cosmetics, mathematical models for membrane transport, innovative drug formulations, nanocarrier design, as well as skin and hair development.

Experimental Therapeutics Track

The Experimental Therapeutics track aims to train scientists with diverse expertise in preclinical and clinical pharmaceutical sciences, enabling them to successfully translate innovative therapeutic concepts into clinical practice.

Students in this track delve into research projects encompassing various areas such as cancer biomarkers, neuropharmacology of drugs of abuse like MDMA, stroke and epilepsy, neurotoxicity, cancer pharmacokinetics, and drug metabolism.

Health Outcomes Track

The Health Outcomes track aims to train interdisciplinary scholars in pharmaceutical sciences, economics, business, and quantitative analysis. By conducting research in this emerging field, students develop expertise that can improve patient health. With the pharmaceutical industry's growing demand for scientists skilled in social and administrative aspects of pharmaceutical sciences, this track offers exciting opportunities.

Students in the Health Outcomes track explore diverse research projects, ranging from drug safety and pharmacovigilance to pharmacy facility design, operation, and pharmacoeconomics.

Career

Our program opens doors to a wide range of exciting career opportunities in the pharmaceutical industry, clinical research organizations, academia, and government sectors. Upon graduation, you may find yourself in roles such as a scientist, clinical pharmacologist, clinical trial manager, post-doctoral fellow, or regulatory affairs manager.

Furthermore, there are additional career paths available, including positions as a medical science liaison, pharmaceutical consultant, medical writer, or chemist, providing you with diverse avenues to pursue your passions and contribute to the advancement of the field.

UC Advantages And Special Opportunities

Scholarship Opportunities

To explore available scholarship opportunities, please visit our Financial Aid & Scholarships page.

Admission Requirements

Applicants with an undergraduate degree in chemistry, biology, engineering, or related fields from an accredited institution are eligible to apply for our full-time, research-intensive MS program in Pharmaceutical Sciences. Similarly, those with a completed professional degree like PharmD, MD, or DVM also meet eligibility requirements. Admission to our competitive program, which offers supervised, full-time research training, is based on a selective process.

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from a regionally accredited college or university, or an equivalent degree from outside of the U.S.
- A grade-point average (GPA) of at least 3.00 or non-U.S. equivalent
- International Applicants: qualifying English language proficiency score

Supplemental Application Documents

To be considered for admission, please complete the UC Graduate Admissions Application and submit the following documents electronically within the application:

- Curriculum Vitae (CV) or Resume
- Statement of Purpose: Explain your motivation for pursuing a research-intensive MS degree in Pharmaceutical Sciences at the University of Cincinnati. Include your desired research focus area within the broad field of Pharmaceutical Sciences.
- Submit all university transcripts (unofficial transcripts are sufficient for initial review)
- Three letters of recommendation are required for applications, and we strongly recommend that applicants seek letters from individuals who can provide insights into their research experience. Please note that letters of recommendation from family members, friends, current students, politicians, or clergy will not be accepted.

Graduation Requirements

The graduation requirements for this program include:

- Completion of Plan of Study
- Successful passing of MS Thesis
- Compliance with degree-required seminar and journal club credit hours per semester
- Cumulative grade point average of all didactic courses ≥3.0
- Min of 30 credit hrs from track-based curriculum outline
- No failing “F” grade in any of the degree-associated graduate courses
- Successful upload of chair-signed MS Thesis through the Graduate College EDT portal by the specified deadline (for research-intensive students only)

Application Deadlines

All application documents must be electronically submitted through the online application. When completing the online application, please select the desired degree path carefully, as document switches between different tracks are not permitted. Applications are reviewed with the following timeline:

- Fall semester applications are reviewed by the Admissions Committee in May, with submissions accepted until August 1st

- Spring semester applications are reviewed by the Admissions Committee in October, with submissions accepted until December 1st
- Typically, the Fall semester provides more opportunities for incoming applicants

For further inquiries, contact pharmsci@uc.edu.

MS in Pharmaceutical Sciences

MSPS

Health Outcomes Curriculum Map (students enrolled Fall 2020 & after)

Duration: 3 Years

★Minimum Credits: 30 Credits

Required Courses

Students must complete all of the following:

Course	Title/Desc	Credit
GNTD7003	Ethics in Research (C min)	1
PADM7020	Pharmaceutical Economics and Policy (C min)	2
PADM7030	Pharmacoepidemiology and Drug Safety (C min)	2
PADM7040	Evaluation of Pharmacy Administration Research (C min)	2
PHID8010	Introduction to Pharmaceutical Research (C min)	1

Business / Economics

Students are required to complete 2 credit hours (min) of the following:

Course	Title/Desc	Credit
ECON7021	Health Care Marketplace 1: Health Economics (C min)	3
ECON8020	Microeconomic Theory (C min)	4
MGMT7012	Strategic Management (C min)	2
MGMT7014	Leadership and Organizations (C min)	2
MKTG7011	Marketing for Managers (C min)	2

Statistics

Students are required to complete 3 credit hours (min) of the following:

Course	Title/Desc	Credit
BE7022	Introduction to Biostatistics (C min)	3
BE7023	Advanced Biostatistics (C min)	3
BE7061	Biostatistics in Research (C min)	3
BE7062	Applied Longitudinal Data Analysis (C min)	2
BE7088	Regression Analysis (C min)	3
EDST7000	Introduction to Research Methodology (C min)	3
EDST7010	Statistical Data Analysis I (C min)	3

Required Courses

Journal Club / Seminar

Students are required to complete 2 credit hours (min) each:

Course	Title/Desc	Credit
PADM7004	Pharmaceutical Sciences Journal Club (C min)	1
PADM7005	Seminar in Pharmaceutical Sciences (C min)	1

Research

Students are required to complete 10 credit hrs (min) of research

Course	Title/Desc	Credit
PHID8001	MS Thesis Research (C min)	1 - 12

Elective Courses

Students must take 3 credit hours (min) of the following:

Course	Title/Desc	Credit
BE7025	Comparative Effectiveness and Patient-Centered Outcomes Research (C min)	2
BE7068C	Decision and Cost-Effectiveness Analysis (C min)	3
BE9061C	Meta-Analysis (C min)	3
EDST8081	Mixed Methods Research I (C min)	3
EDST8082	Mixed Methods Research II (C min)	3
HPE7040	Social and Behavioral Foundations of Public Health (C min)	3
MECH6078	Introduction to Industrial Artificial Intelligence (C min)	3
PADM7010	Medication Use System Analyses and Improvement (C min)	2
PCEU7010	Biostatistics & Research Methods (C min)	3
PHCS9002	Pharmacy Management (C min)	3
PHDD8010	Global Regulatory and Development Strategies of Drugs and Medical Devices (C min)	3
PHDD8030	Pre-Clinical/Non-Clinical Studies for IND Approval (C min)	3
PHDD8050	Phase I/II Clinical Trials Research and Design (C min)	3
PHDD8070	Phase III/IV Clinical Trials and Research (C min)	3
PHDD8080	Pharmaceutical Economics and Management (C min)	3
PHID7001	Research in Pharmaceutical Sciences (C min)	1 - 12
PHID7010	Principles of Pharmaceutical Sciences (C min)	3
PHID8020	SCIENTIFIC WRITING IN PHARMACEUTICAL SCIENCES (C min)	1

Course	Title/Desc	Credit
EDST7011	Statistical Data Analysis II (C min)	3
EDST8041	Multivariate Data Analysis (C min)	3
EDST8051	Qualitative Research Methods I (C min)	3
EDST8052	Qualitative Research Methods II (C min)	3
EDST8086	Experimental and Quasi-Experimental Research (C min)	3

Course	Title/Desc	Credit
PHRX9003	Evidence-Based Pharmacotherapy II (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

MS in Pharmaceutical Sciences

Drug Development

Duration: 3 Years Total Credits: 30 Award: MSPS

Overview

The Masters in Pharmaceutical Sciences with emphasis on Pharmaceutics/Drug Development (MSDD) is a two-year, online degree. Tailored to meet the aspirations of working professionals, the program can be completed on a part-time basis with coursework offered as an online learning basis.

A collaboration between academia, industry and government, the MSDD provides cross-disciplinary training in the scientific and regulatory and business aspects of drug development. Graduates are uniquely prepared to participate in the multidisciplinary process to translate a therapeutic concept from lab bench to bedside.

Career

Curriculum

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Master in Drug Development

Admission Requirements

Students who have earned at least an undergraduate degree in chemistry, biology, engineering, or related disciplines from an accredited institution are eligible to apply for admission. A foundation study in Pharmacology is required, but applicants without this foundation may be admitted with the encouragement to complete the UC offered courses, such as the graduate certificate, prior to full engagement within the Drug Development program.

>>Apply to the MS Program

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from a regionally accredited college or university, or an equivalent degree from outside of the U.S.
- A grade-point average (GPA) of at least 3.00 or equivalent
- If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Supplemental Application Documents

Consideration for admission requires completion of a UC Graduate Admissions Application and electronic submission the following documents:

- CV or Resume
- Statement of Purpose: Why do you plan to pursue a research-intensive MS degree in Pharmaceutical Sciences at the University of Cincinnati? What is your desired research focus area within the broad field of Pharmaceutical Sciences?

Transcript information

All university transcripts (undergraduate and graduate if applicable; unofficial transcript is sufficient for initial review process).

Letters of Recommendation

Three letters of recommendation (applicants are encouraged to seek letters from individuals who can comment on research experience).

International Student Requirements

If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Graduation Requirements

- Completion of Plan of Study
- Successful passing of Capstone
- Cumulative grade point average of all didactic courses ≥3.0
- Min of 30 credit hrs from track-based curriculum outline
- No failing "F" grade in any of the degree-associated graduate course

MS in Pharmaceutical Sciences

Health Outcomes and Pharmacoeconomics

Duration: 3 Years Total Credits: 30 Award: MSPS

Overview

The Master of Science in Health Outcomes and Pharmacoeconomics program at the University of Cincinnati Online prepares students for careers in health care research, medical & health service managerial roles, medical affairs, and market access in public and private health systems, the pharmaceutical or medical device industries, health insurance companies, government, and academia. Health outcomes research generates evidence to improve patient care delivery, as well as decision-making in regard to policy discussions for health care reimbursements and priorities.

Students will take courses covering topics including biostatistics, pharmacoepidemiology, Comparative effectiveness research, cost-effectiveness analysis, and decision analytical modeling. Students will also complete a non-thesis capstone project that ties together curricular outcomes from the entire program.

Career

UC Online's MS in Health Outcomes & Pharmacoeconomics will prepare students for careers in pharmaceutical and medical devices industry market access and research, health insurance companies, health care administration, pharmacy benefit managers, contract research organizations, and academia. *The Bureau of Labor Statistics* projects medical and health services manager roles to grow 28% from 2021 to 2031.

Career opportunities in health outcomes include the following:

- Research Project Manager
- Clinical Research Coordinator
- Research Consultant
- Research and Development Manager
- Pharmacoeconomist
- Health Outcomes Research Analyst
- Data Science Researcher
- Field Data Collection Coordinator
- Medical Device Researcher
- Health Plan Manager
- Market Access Manager
- Manager, Health Economics and Outcomes Research
- Managed Care Scientific Liaison

Curriculum

For the Master of Science in Health Outcomes & Pharmacoeconomics online, the curriculum includes a total of 30 required semester credit hours to satisfy degree requirements. The curriculum is customizable and students can choose their courses. Students will first take the foundation courses for this program. After that students will take a the available core courses and electives for that semester to satisfy the 30 credit requirement.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Health Outcomes and Pharmacoeconomics (HOPE)- MS Program

Admission Requirements

- A U.S. bachelors degree from a regionally accredited college or university, or an equivalent degree
  - Biology, chemistry, or science-related degrees, health science degrees, economics, and business degrees
- Some experience in clinical research or health care
- A minimum 3.0 cumulative GPA
- For international students, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English test of at least 110 is accepted
  - Transcripts must be submitted for evaluation to an agency recognized by the National Association of Credential Evaluating Services

International Student Requirements

International students are eligible to apply.

The Test of English as a Foreign Language (TOEFL), IELTS or Duolingo test is required of all applicants whose native language is other than English. The minimum score required for admission of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English Test of at least 110 is accepted. If you have a bachelor degree or higher from a United States university, this requirement will be waived.

Graduation Requirements

Before the program can certify that a student can graduate, the student must meet the following requirements:

- The student must earn satisfactory grades for all courses required.
- The student must complete the 30 hours required for the degree.
- The student must satisfactorily complete the required capstone project
- The student must satisfactorily complete all applicable college and program requirements specific to the student's program of study.
- The student must maintain active student status; meaning the student must register for at least one graduate credit in their program in an academic year, after having met minimum degree course/candidacy requirements.
- All grades of NG, I, UP, SP must be satisfactorily resolved to ensure on time graduation.

Application Deadlines

PADM7050	Pharmacoeconomics & Decision Analytical Modeling (C min)	3
PADM7060	Use of Real-World Data in Health Outcomes Research (C min)	3

Required- Capstone Courses
Capstone courses are taken sequentially at the end of the program.

Course	Title/Desc	Credit
PADM7070	Health Outcomes Capstone I (C min)	2
PADM7080	Health Outcomes Capstone II (C min)	3

Elective Courses

Elective courses taken to meet the 30-credit hour minimum requirement.

Course	Title/Desc	Credit
BANA7015	Advanced Health Care Data Analytics, Business Intelligence, and Reporting (C min)	3
BE7076	Introduction to Epidemiology (C min)	3
HCA7001	Health Systems Management 1: Organization & Delivery (C min)	3
HI7010	Health Informatics, Information Systems and Technology (C min)	3
HCA7031	Health Policy 1: Health Policy & Regulation (C min)	3
HCA7041	Health Quality 1: Evidence-Based Decision Making for Managers (C min)	3
HI7001	The Healthcare and Public Health Landscape (C min)	3
HI7030	Health Information Legislation, Privacy and Security (C min)	3
HI7072	Leveraging Analytics and Business Intelligence Tools for Healthcare (C min)	3
PCEU7010	Biostatistics & Research Methods (C min)	3
PHLD8050	The Healthcare MarketPlace-Pharmacy Economics (C min)	3
PHDD8050	Phase I/II Clinical Trials Research and Design (C min)	3

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

MS in Pharmaceutical Sciences

Healthcare Operational Excellence

Duration: 2 Years Total Credits: 30 Award: MSPS

Overview

Healthcare Operational Excellence focuses on improving quality and efficiency within healthcare settings. The program, rooted in the Pharmacy 5.0 framework, is harmoniously aligned with the principles of Industry 4.0/5.0. It will harness a variety of advanced technologies and concepts, including Lean Six Sigma (LSS), machine learning, deep learning, artificial intelligence (AI), and big data analysis, among others, to enhance operational performance to improve quality, efficiency, effectiveness, and system resilience for patient care,leading to an enhanced patient-centered. As the culmination of this comprehensive program, students will have the opportunity to complete a thesis or capstone project that combines curricular outcomes from the entire program.

Career

The UC MS in Healthcare Operational Excellence will prepare students for careers in pharmaceutical and medical devices industry market access and research, health insurance companies, healthcare administration, pharmacy benefit managers, contract research organizations, healthcare operations and logistics, and academia. The Bureau of Labor Statistics projects medical and health services manager roles, including process improvement management, to grow 28% from 2021 to 2031.

Career opportunities for the MS in Healthcare Operational Excellence include:

Medical & health service managerial roles

Medical affairs in public and private health systems

Pharmaceutical or medical device industries

Health insurance companies

Government, and academia

Research Project Manager

Quality improvement coordinator/managers, consultant

Operation improvement coordinator/managers, consultant

Quality improvement consortiums.

Curriculum

For the Master of Science in Healthcare Operational Excellence online, the curriculum includes a total of 30 required semester credit hours to satisfy degree requirements. The curriculum is customizable, and students can choose their courses. Students will first enroll in the foundational courses for this program. After that the students will take the available core courses and electives for that semester to satisfy the 30 credit requirement.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Healthcare Operational Excellence MS Program

Admission Requirements

A U.S. bachelor's degree from a regionally accredited college or university, or an equivalent degree

Biology, chemistry, or science-related degrees, health science degrees, economics, and business degrees (Sales and Marketing) Marketing is a type of business degree.

Some experience in clinical research or healthcare.

A minimum 3.0 cumulative GPA.

For international students, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English test of at least 110 is accepted.

Transcripts must be submitted for evaluation to an agency recognized by the National Association of Credential Evaluating Services.

International Student Requirements

International students are eligible to apply.

The Test of English as a Foreign Language (TOEFL), IELTS or Duolingo test is required of all applicants whose native language is other than English. The minimum score required for admission of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English Test of at least 110 is accepted. If you have a bachelor degree or higher from a United States university, this requirement will be waived.

Graduation Requirements

In order to successfully graduate, the student must meet the following requirements:

The student must earn satisfactory grades for all courses required.

The student must complete the 30 hours required for the degree.

The student must satisfactorily complete the required capstone project

The student must satisfactorily complete all applicable college and program requirements specific to the student's program of study.

The student must maintain active student status; meaning the student must register for at least one graduate credit in their program in an academic year, after having met minimum degree course/candidacy requirements.

All grades of NG, I, UP, SP must be satisfactorily resolved to ensure on time graduation.

Application Deadlines

Spring semester: December 15

Summer semester: April 30

Fall semester: August 15

MSPS

Healthcare Operational Excellence MS Program

Duration: 2 Years
★Minimum Credits: 30 Credits

Required Courses

Core Courses
Students must complete all of the following:

Course	Title/Desc	Credit
PADM7010	Medication Use System Analyses and Improvement (C min)	2
PCEU7010	Biostatistics & Research Methods (C min)	3
PADM7050	Pharmacoeconomics & Decision Analytical Modeling (C min)	3
PCEU7050	Ethics in Scientific Research- Pharmacy (C min)	1
PHID	Healthcare Operational Excellence Capstone (C min)	3

Lean Six Sigma Courses

Students must complete the listed courses for 9 credit hours

Course	Title/Desc	Credit
PHID	Lean Six Sigma I Introduction to Lean Six Sigma (C min)	3
PHID	Lean Six Sigma II Management in Healthcare (C min)	3
PHID	Lean Six Sigma III Standard Work and Sustainability (C min)	3

Elective Courses

Students must complete at least 9 credit hours to meet the 30-credit hour requirement

Course	Title/Desc	Credit
CS6101	Introduction to Applied Artificial Intelligence and Machine Learning Tools (C min)	3
MECH6078	Introduction to Industrial Artificial Intelligence (C min)	3
PHLD8010	Leading Quality Management in Pharmacy (C min)	3
PHLD8040	Medication Use System Management (C min)	3
PHLD8070	Accounting and Financial Decision-Making for Pharmacy Leaders (C min)	3
PHLD8050	The Healthcare MarketPlace- Pharmacy Economics (C min)	3

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

MS in Pharmaceutical Sciences

Pharmacogenomics and Personalized Healthcare

Duration: 3 Years Total Credits: 30 Award: MSPS

Overview

The Online Master of Science (M.S. in Pharmacogenomics and Personalized Healthcare) program at the University of Cincinnati offers a unique opportunity for students to gain in-depth knowledge about Pharmacogenomics and understand the effects of genomics, environment, patient-specific factors on drug response, allowing for individualized therapy and optimal clinical outcomes. Additionally, the program provides knowledge of state-of-art omics research, innovative Precision Medicine approaches, and implementation of Genomic Medicine

Our two-year program is built around developing skills in these areas through real-world application of course content, industry/medical partnerships, and research-based best practices. This Master's program is only available online.

Career

The Online Master of Science (M.S. in Pharmacogenomics and Personalized Healthcare) program at the University of Cincinnati is designed for students seeking to advance their career, or education in the field of pharmacogenomics, medicine, and/or pharmaceuticals. At the pinnacle of these industry segments exist career opportunities as scientific curators, lab technologists/directors, research technologists, and genetic testing positions.

Curriculum

Our online Master of Science in Pharmacogenomics and Personalized Healthcare program is designed to cultivate competent pharmacogenomic professionals. Our Master's curriculum emphasizes the practical application of knowledge as it relates to pharmacogenomic research, curation, and real-world outcomes.

The curriculum for the master's degree was designed with potential career opportunities in mind. Therefore, many classes may relate to several aspects of science as pharmacogenomics encompasses all research.

The pharmacogenomics program is 30 credit hours long, and has a required 21 credit hours of pharmacogenomic courses along with 9 credit hours of electives. With these electives the student can select a track to follow or take several classes from different disciplines.

The tracks the student can participate in are as follows:

- Drug Development*
- Pharmacy Leadership*
- Advanced Pharmacogenomics

(*) = Can obtain a certificate with 15 credit hours of classes. This would put the student at 36 credit hours, which is one extra semester (6 credit hours) in addition to the Master's in Pharmacogenomics program.

Current Student Degree Audit Transfer Student Course Equivalencies Search UC Schedule of Classes

Curriculum Guide Versions:
Master in Pharmacogenomics and Personalized Healthcare

Admission Requirements

Prerequisites:

- Bachelor's degree from an accredited institution in a science field (ex. Biology, Chemisty, Physics, etc)
- At least one semester of undergraduate course work in organic chemistry and calculus, or related fields; or the equivalent as determined by the graduate program
- A minimum 3.0 cumulative GPA
- For international students, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English Test of at least 110 is accepted.

International Student Requirements

International students are eligible to apply but please note that this is an online program and not eligible for F-1 Visa status.

The Test of English as a Foreign Language (TOEFL), IELTS or Duolingo test is required of all applicants whose native language is other than English. The minimum score required for admission of at least 90 (internet-based) or 235 (computer-based), IELTS- minimum score of 6.5 overall band, or a Duolingo English Test of at least 110 is accepted. If you have a bachelor degree or higher from a United States university, this requirement will be waived.

Graduation Requirements

Before the program can certify that a student can graduate, the student must meet the following requirements:

- The student must earn satisfactory grades for all courses required.
- The student must complete the 30 hours required for the degree.
- The student must satisfactorily complete the required capstone project
- The student must satisfactorily complete all applicable college and program requirements specific to the student's program of study.
- The student must maintain active student status; meaning the student must register for at least one graduate credit in their program in an academic year, after having met minimum degree course/candidacy requirements.
- All grades of NG, I, UP, SP must be satisfactorily resolved to ensure on time graduation.

MS in Pharmaceutical Sciences : Pharmacogenomics/Healthcare

MSPS

Master in Pharmacogenomics and Personalized Healthcare

Duration: 3 Years

★Minimum Credits: 30 Credits

Pharmacogenomics Required Courses

Must take all courses for graduation, and select a track, or an additional 9 credit hours for graduation. PHDD8001 must be taken twice for 1-credit hour each. Students in the Drug Development or Pharmacy Leadership Track may substitute 1 course (1 hour) of PHDD8001 for PHGX9090 (Careers in Pharmacogenomics).

Required Courses

Course	Title/Desc	Credit
PSCI7103	Metabolism, Molecular Biology and Pharmacogenomics (C min)	3
PCEU7050	Ethics in Scientific Research- Pharmacy (C min)	1
PHGX8080	Human Genetics (C min)	2
PHID8015	Pharmaceutical Biotechnology (C min)	3
PCEU7010	Biostatistics & Research Methods (C min)	3
PHTH9140	Clinical Application of Pharmacogenetics (C min)	1
PHDD8091	Drug Development Project I (C min)	2
PHDD8092	Drug Development Project II (C min)	2
PHDD8001	Seminar in Drug Development (C min)	1 - 2
PHGX8090	Advanced Pharmacogenomics (C min)	2

Drug Development/Curation Track

Must take all three required drug development classes if choosing this track. If student chooses Drug Development certificate track they will will need additional two courses adding 6 additional credit hours to graduation requirements.

Required Drug Development

Course	Title/Desc	Credit
PHDD8030	Pre-Clinical/Non-Clinical Studies for IND Approval (C min)	3
PHDD8050	Phase I/II Clinical Trials Research and Design (C min)	3
PHDD8070	Phase III/IV Clinical Trials and Research (C min)	3

Pharmacy Leadership Track

Must take HCA7002, and then 2 additional electives if choosing this track. If student chooses Pharmacy Leadership certificate track they will will need additional two courses adding 6 additional credit hours to graduation requirements.

Required Pharm Leadership

Course	Title/Desc	Credit
HCA7002	Health Systems Management 2: Principles of Leadership (C min)	3

Elective Pharm Leadership (Need 2 electives- 6 credit hours)

Course	Title/Desc	Credit
PHLD8010	Leading Quality Management in Pharmacy (C min)	3
PHLD8020	Human Resources Management in Pharmacy (C min)	3
PHLD8030	Communication for Pharmacy Leaders (C min)	3
PHLD8040	Medication Use System Management (C min)	3
PHLD8050	The Healthcare MarketPlace- Pharmacy Economics (C min)	3
PHLD8070	Accounting and Financial Decision-Making for Pharmacy Leaders (C min)	3

Advanced Pharmacogenomics Track

Must take all electives to complete this track

Course	Title/Desc	Credit
PHGX9000	Cancer Genomics (C min)	3
PHGX9010	Nutrition and Exercise Genomics (C min)	3
PHGX9020	Implementation Science (C min)	2
PHGX9090	Career's in Pharmacogenomics (C min)	1

No Track

Must take 9 hours of electives from any Graduate-level course in Drug Development, Pharmacy Leadership or Advanced Pharmacogenomics.

Course	Title/Desc	Credit
PHDD6XXX+ PHGX6XXX+ PHLD6XXX+	Any PHDD, PHGX, or PHLD 6000-level or higher. (C min)	9

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pharmacy

Duration: **4 Years** Award: **PHARMD**

Overview

Elevate your pharmacy education with our nationally acclaimed Doctor of Pharmacy (PharmD) program at the esteemed James L. Winkle College of Pharmacy. Immerse yourself in a comprehensive curriculum combining rigorous didactic coursework with immersive experiential learning. Benefit from our program's distinct advantages, including intimate class sizes, invaluable peer mentoring, seamless access to direct patient care, immersive experiential learning throughout all four years, and a diverse range of rotation sites conveniently located within the vibrant Greater Cincinnati region.

Our student pharmacists benefit from unparalleled access to world-class faculty members who are at the forefront of scientific discovery and clinical advancements, contributing to the development of future treatments and the management of complex diseases.

Choose our program and experience firsthand our vibrant community that prepares you for success and empowers you to make significant impact in enhancing the well-being and lives of others.

Federal regulations require the University of Cincinnati to publicly disclose whether completion of certain programs that lead or may lead to professional licensure or certification would meet a given state's educational requirements for a specific professional license or certification required for employment in an occupation (regardless of whether the program is on-ground, online, or hybrid). To learn whether a University program meets a given state's educational requirements, please visit the University of Cincinnati State Authorization webpage.

Success

For more information on:

- PharmD Quality Indicators
- Performance on Pharmacy Licensure Exam (NAPLEX)
- Professional Graduation Rates and Time to Completion

Please visit the college's Office of Professional Education & Assessment page.

Career

A career in pharmacy presents exceptional prospects for individuals passionate about science and healthcare. With its diverse and fulfilling nature, pharmacy offers opportunities for patient care, scientific research, and innovative breakthroughs. Graduates of the program can embark on rewarding paths in community pharmacy, hospital pharmacy, managed care, pharmaceutical companies, government agencies, academia, and other sectors. Pharmacists assume pivotal leadership positions across the entire healthcare system.

To explore further career opportunities in pharmacy, we recommend visiting the following resources:

- American Association of Colleges of Pharmacy (AACP)
- American Pharmacists Association (APhA)
- American Society of Health-Systems Pharmacists (ASHP)

Curriculum

PharmD Curriculum Map

UC Advantages And Special Opportunities

University of Cincinnati PharmD students benefit from immersive experience-based learning at 200+ pharmacy practice sites in the Greater Cincinnati area, including various pharmacies, hospitals, and corporations. Being part of UC's Academic Health Center allows students to train alongside medical, nursing, and allied health students. Notably, Cincinnati students consistently achieve top-tier scores on licensing examinations, such as NAPLEX and MJPE, leading to successful careers as licensed pharmacists.

Special Programs

Connections to Pharmacy: Early Assurance Program

The University of Cincinnati offers an Early Assurance Program (EAP) for high school students who have an interest in pursuing a career in pharmacy. By participating in this program, students can secure a guaranteed interview for the UC James L. Winkle College of Pharmacy Doctor of Pharmacy (PharmD) program, provided they meet and maintain all the criteria outlined by the EAP throughout their undergraduate studies. To take advantage of this opportunity, students can enroll in the University of Cincinnati College of Arts & Sciences.

Benefits of the EAP program includes the assurance of admission into the PharmD program if all program requirements are satisfied. It is important to note that EAP students must fulfill all program requirements and complete the necessary courses to gain admission into the PharmD program. On the other hand, non-EAP students are required to maintain specific GPA requirements and undergo a competitive admissions process. Another advantage of the EAP program is the possibility of graduating sooner.

Please visit the EAP program page for more information.

Admission Requirements

Our admissions review process takes a holistic approach, considering various factors to assess candidates' qualifications. Achieving a minimum academic profile is an important requirement for consideration, although there are additional criteria we evaluate. These criteria encompass various aspects and include, but are not limited to, the following:

- Evaluating applicants based on their strong academic background
- Demonstrated leadership and involvement in community, student, and professional affairs, compelling essays and personal statements, and a comprehensive understanding of the pharmacy profession.
- A preferred minimum GPA of 3.0.
- Submit all college transcripts directly to PharmCAS. For detailed information on transcript submission, please visit the Official Transcript Submission Policy for Enrollment page.
- Three letters of recommendation are required for applications, and we strongly recommend that applicants seek letters from individuals who can provide insights into their research experience. Please note that letters of recommendation from family members, friends, current students, politicians, or clergy will not be accepted.
- International Applicants: qualifying English language proficiency score.
- It is strongly encouraged for students to work in a pharmacy setting or engage in pharmacy shadowing experiences before applying. This will allow students to explore the field of pharmacy to provide a knowledge base of the profession. Previous pharmacy work experience is not a requirement.

All application documents must be electronically submitted through the online portal by the application deadline. Please note, once the college receives your application, you will receive an email notification regarding your application status at UC. To conveniently track the progress of your PharmCAS application, all you need to do is log into your account.

Pre-Pharmacy Courses

Pre-Pharmacy courses can be taken at the University of Cincinnati or another accredited institution. It is recommended to complete the curriculum at a 4-year college or university. All courses must be finished prior to enrolling in the Pharmacy program.

Taking Pre-Pharmacy courses at UC provides students with a plethora of unique advantages. As a UC student, you'll benefit from having a knowledgeable Pre-Pharmacy advisor who will guide you through the College's requirements and ensure you take the necessary courses. This personalized support will help you feel more connected with the College, alongside engaging with various student organizations and events. Moreover, meeting specific criteria, such as maintaining a cumulative college GPA of 3.5 or above (as calculated by PharmCAS), and earning a "C" or better in core required courses, guarantees you an interview. If admitted to the PharmD program, your transition to pharmacy school will be seamless as you're already familiar with UC.

For students completing Pre-Pharmacy elsewhere, contact the James L. Winkle College of Pharmacy for guidance, while those in Ohio or Kentucky can use the u.select website to determine equivalent courses.

International Student Requirements

Pre-Pharmacy Courses From a Foreign Institution

Students who have completed equivalent pre-pharmacy courses at a non-US institution should have foreign transcripts evaluated by World Education Services (WES). Students are advised to e-mail (pharmacy@uc.edu), mail, or fax (513-558-4372) a copy of the WES evaluation to the College to determine if the foreign coursework is acceptable, or if additional courses must be completed.

Pre-Pharmacy Requirements

All students must complete the required pre-pharmacy requirements regardless of a previous degree. Whether you've earned the degree from a US or foreign institution, you must complete the required pre-pharmacy courses to qualify for admission consideration.

TOEFL

To be licensed as an intern and pharmacist in the state of Ohio, the minimum TOEFL scores are as follows:

- Writing: twenty-four (24);
- Speaking: twenty-six (26);
- Listening: twenty-one (21); and
- Reading: twenty-two (22)

This adds up to a minimum total score of ninety-three (93).

Application Deadlines

Regular Application Deadline: **March 1st.**

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.
The Pharmacy program is accredited by the Accreditation Council of Pharmacy Education.

Pharmaceutical Sciences

Duration: **5 Years** Award: **PHD**

Overview

Unleash your potential in the dynamic field of pharmaceutical sciences through our PhD program. Designed to inspire and challenge, our comprehensive curriculum combines cutting-edge coursework with advanced research, allowing you to delve into captivating areas such as pioneering drug development, unraveling the intricate impact of medications on the body, exploring breakthrough drug delivery techniques, and maximizing the therapeutic potential of medications for optimal patient outcomes. With flexible scheduling options available, including online and in-person formats, you can tailor your learning experience to fit your needs and preferences.

Become part of our program and unleash your potential to make groundbreaking contributions that will shape the future of pharmaceutical sciences.

Choose Your Specialization

Because the scope of pharmaceutical sciences is so broad, our graduate program has a number of specialty disciplines:

Biomembrane Sciences Track

In the Biomembrane Sciences track, students delve into captivating research projects encompassing drug delivery strategies, cosmetic product safety assessment, mathematical modeling of membrane transport, innovative drug formulations, nanocarrier design, and advancements in skin and hair development.

Experimental Therapeutics Track

Discover a world of possibilities in our Experimental Therapeutics track, where we bridge the gap between innovative therapeutic entities and real-world applications. Explore captivating research opportunities in areas ranging from cancer biomarkers to neuropharmacology, stroke, epilepsy, and more.

Health Outcomes Track

The Health Outcomes track aims to train interdisciplinary scholars in pharmaceutical sciences, economics, business, and quantitative analysis. By conducting research in this emerging field, students develop expertise that can improve patient health. This track offers exciting opportunities to contribute to the pharmaceutical industry's growing demand for scientists skilled in social and administrative aspects of pharmaceutical sciences. Students in the Health Outcomes track explore diverse research projects, ranging from drug safety and pharmacovigilance to pharmacy facility design, operation, and pharmacoeconomics.

Career

Our program opens doors to a wide range of exciting career opportunities in the pharmaceutical industry, clinical research organizations, academia, and government sectors. Upon graduation, you may find yourself in roles such as a scientist, clinical pharmacologist, clinical trial manager, post-doctoral fellow, or regulatory affairs manager.

Furthermore, there are additional career paths available, including positions as a medical science liaison, pharmaceutical consultant, medical writer, or chemist, providing you with diverse avenues to pursue your passions and contribute to the advancement of the field.

Curriculum Guide Versions:
Pharmaceutical Sciences- Biomembrane Sciences Track
Pharmaceutical Sciences- Health Outcomes Track
Pharmaceutical Sciences- Experimental Therapeutics Track

Admission Requirements

Applicants with an undergraduate degree in chemistry, biology, engineering, or related fields from a regionally accredited institution are eligible to apply for our full-time, research-intensive PhD program in Pharmaceutical Sciences. Similarly, those with a completed professional degree like PharmD, MD, or DVM also meet eligibility requirements. Interested applicants can directly apply without prior completion of an MS degree. Admission to our competitive program, which offers supervised, full-time research training, is based on a selective process.

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from a regionally accredited college or university, or an equivalent degree from outside of the U.S.
- A grade-point average (GPA) of at least 3.00 or non-U.S. equivalent
- If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. IELTS score of 7 or higher is preferred or a Duolingo score of 110 or higher is also acceptable. International Applicants: qualifying English language proficency score

Application Documents

To be considered for admission, please complete the UC Graduate Admissions Application and submit the following documents electronically within the application:

- Curriculum Vitae (CV) or Resume
- Statement of Purpose: Explain your motivation for pursuing a research-intensive PhD degree in Pharmaceutical Sciences at University of Cincinnati. Include your desired research focus area within the broad field of Pharmaceutical Sciences.
- Submit all university transcripts (unofficial transcripts are sufficient for initial review)
- Three letters of recommendation are required, and we strongly recommend that applicants seek letters from individuals who can provide insights into their research experience. Please note that letters of recommendation from family members, friends, current students, politicians, or clergy will not be accepted.

Graduation Requirements

The graduation requirements for this program include:

- Completion of Plan of Study
- Successful passing of the PhD qualifier and research proposal
- Verification of at least one (1) first-author manuscript related to PhD dissertation research that is accepted for publication in a peer-reviewed scientific journal
- Compliance with degree-required seminar and journal club credit hours per semester
- Cumulative grade point average of all didactic courses ≥3.0
- Min of 90 credit hrs from track-based curriculum outline
- No failing “F” grade in any of the degree-associated graduate courses
- Successful upload of a chair-signed dissertation through the Graduate College ETD portal by the specified deadline

Application Deadlines

All application documents must be electronically submitted through the online application. When completing the online application, please select the desired degree path carefully, as document switches between different tracks are not permitted. Applications are reviewed with the following timeline:

- Fall semester applications are reviewed by the Admissions Committee in May, with the submissions deadline of August 1st
- Spring semester applications are reviewed by the Admissions Committee in October, with the submissions deadline of December 1st
- Typically, the Fall semester provides more opportunities for incoming applicants

Pharmaceutical Sciences

PHD

Pharmaceutical Sciences- Biomembrane Sciences Track

Duration: 5 Years
★Post Baccalaureate Minimum Credits: 90 Credits
★Post Master's Minimum Credits: 60 Credits

Required Courses

Core Courses
Students must complete all of the following:

Course	Title/Desc	Credit
PCEU7050	Ethics in Scientific Research- Pharmacy (C min)	1
PHID7015	Principles of Pharmaceutical Sciences (C min)	2
PHID8010	Introduction to Pharmaceutical Research (C min)	1
PHID8020	SCIENTIFIC WRITING IN PHARMACEUTICAL SCIENCES (C min)	1

Statistics
Students must choose one of the following:

Course	Title/Desc	Credit
PCEU7010	Biostatistics & Research Methods (C min)	3
PHDD8060	Statistical Principles in Clinical Research (C min)	3

Pharmaceutics
Students must choose one of the following:

Course	Title/Desc	Credit
PCEU7020	Advanced Pharmaceutics I (C min)	3
PCEU7030	Advanced Pharmaceutics II (C min)	4
PHID8015	Pharmaceutical Biotechnology (C min)	3

Required Courses

Journal Club/ Seminar
Students are required to complete 4 credit hours (min) each:

Course	Title/Desc	Credit
PCEU7004	Pharmaceutical Sciences Journal Club (C min)	1
PHID7005	Seminar in Pharmaceutical Sciences (C min)	1

Research
Students are required to complete 12 credit hrs (min) of research

Course	Title/Desc	Credit
PHID7001	Research in Pharmaceutical Sciences (C min)	1 - 12

Dissertation Research
Students are required to complete 30 credit hrs (min) of dissertation research

Course	Title/Desc	Credit
PHID9001	PhD Dissertation Research (C min)	1 - 15

Elective Courses

Students must take 29 credit hours (min) of the following:

Course	Title/Desc	Credit
PCEU8005	Safety Assessment of Cosmetic & Topical OTC Drug Products- Pre Clin & Clinical (C min)	2
PCEU8010	Skin Care Science (C min)	3
PCEU8015	Pharmacology-Basics and Cosmetic & Personal Care Product Applications (C min)	2
PCEU8016	Consumer Understanding for Formulators-Overview and Practice (C min)	2
PCEU8017	Introduction to Cosmetic Regulations (C min)	2
PCEU8021L	Cosmetic Science Laboratory (C min)	2
PCEU8023	Fragrance Science (C min)	2
PCEU8024	Introduction to Surface, Colloid and Membrane Science (C min)	2
PCEU8025	Advanced Surface, Colloid, and Formulation Science (C min)	2
PCEU8026L	Introduction to Surface, Colloid and Membrane Science Lab (C min)	1
PCEU8030	Hair Care Science (C min)	2
PCEU8040	Color Cosmetics (C min)	2
PCEU8051	Skin, Hair, and Oral Products (C min)	3
PCEU8060	Clinical and Instrumental Testing of Skin (C min)	2
PCEU8070	Molecular Biology of Skin (C min)	2
PCEU8080	Cosmetic Microbiology (C min)	2
PCEU8089	OTC Drug Product and Dietary Supplement Product Development (C min)	3

Course	Title/Desc	Credit
PHDD8010	Global Regulatory and Development Strategies of Drugs and Medical Devices (C min)	3
PHDD8020	Discovery of Drugs and Therapeutic Biologicals (C min)	3
PHDD8030	Pre-Clinical/Non-Clinical Studies for IND Approval (C min)	3
PHDD8040	Development and Manufacturing of Drug Products and Medical Devices (C min)	3
PHDD8050	Phase I/II Clinical Trials Research and Design (C min)	3
PHDD8070	Phase III/IV Clinical Trials and Research (C min)	3
PHDD8080	Pharmaceutical Economics and Management (C min)	3
PHID7001	Research in Pharmaceutical Sciences (C min)	1 - 12
GNTD7001	Principles of Molecular and Cellular Biology (C min)	1 - 4
GNTD7002	Biochemistry and Cellular Metabolism (C min)	3
GNTD8001C	Introduction to Functional Genomics (C min)	3
BE7022	Introduction to Biostatistics (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pharmaceutical Sciences

PHD

Pharmaceutical Sciences- Health Outcomes Track

Duration: 5 Years
Post Baccalaureate Minimum Credits: 90 Credits
Post Master's Minimum Credits: 60 Credits

Required Courses

Core Courses
Students must complete all of the following:

Course	Title/Desc	Credit
PCEU7050	Ethics in Scientific Research- Pharmacy (C min)	1
PADM7020	Pharmaceutical Economics and Policy (C min)	2
PADM7030	Pharmacoepidemiology and Drug Safety (C min)	2
PADM7040	Evaluation of Pharmacy Administration Research (C min)	2
PADM7050	Pharmacoeconomics & Decision Analytical Modeling (C min)	3
PADM7060	Use of Real-World Data in Health Outcomes Research (C min)	3
PHID8010	Introduction to Pharmaceutical Research (C min)	1
PHID8020	SCIENTIFIC WRITING IN PHARMACEUTICAL SCIENCES (C min)	1

Statistics
Students are required to complete 5 credit hours (min) of the following:

Course	Title/Desc	Credit
BE7022	Introduction to Biostatistics (C min)	3
BE7023	Advanced Biostatistics (C min)	3
BE7024	Computational Statistics (C min)	3
BE7061	Biostatistics in Research (C min)	3
BE7062	Applied Longitudinal Data Analysis (C min)	2
BE7076	Introduction to Epidemiology (C min)	2
BE7088	Regression Analysis (C min)	3
EDST7000	Introduction to Research Methodology (C min)	3
EDST7010	Statistical Data Analysis I (C min)	3
EDST7011	Statistical Data Analysis II (C min)	3

Required Courses

Journal Club / Seminar
Students are required to complete 4 credit hours (min) each:

Course	Title/Desc	Credit
PADM7004	Pharmaceutical Sciences Journal Club (C min)	1
PADM7005	Seminar in Pharmaceutical Sciences (C min)	1

Research
Students are required to complete 12 credit hrs (min) of research

Course	Title/Desc	Credit
PHID7001	Research in Pharmaceutical Sciences (C min)	1 - 12

Dissertation Research
Students are required to complete 30 credit hrs (min) of dissertation research

Course	Title/Desc	Credit
PHID9001	PhD Dissertation Research (C min)	1 - 15

Elective Courses

Students are required to complete 20 credit hours (min) from the following:

Course	Title/Desc	Credit
ECON7021	Health Care Marketplace 1: Health Economics (C min)	3
ECON8020	Microeconomic Theory (C min)	4
ECON8055	Health Economics (C min)	2
MGMT7012	Strategic Management (C min)	2
MGMT7014	Leadership and Organizations (C min)	2
MKTG7011	Marketing for Managers (C min)	2
MKTG7015	Buyer Behavior (C min)	2
BE7025	Comparative Effectiveness and Patient-Centered Outcomes Research (C min)	2
BE7068C	Decision and Cost-Effectiveness Analysis (C min)	3
BE9061C	Meta-Analysis (C min)	3
EDST8081	Mixed Methods Research I (C min)	3
EDST8082	Mixed Methods Research II (C min)	3
HI7071	Introduction to Healthcare Data Science (C min)	2 - 3
HPE7040	Social and Behavioral Foundations of Public Health (C min)	3
MECH6078	Introduction to Industrial Artificial Intelligence (C min)	3
PADM7010	Medication Use System Analyses and Improvement (C min)	2
PCEU7010	Biostatistics & Research Methods (C min)	3
PHCS9002	Pharmacy Management (C min)	3
PHDD8010	Global Regulatory and Development Strategies of Drugs and Medical Devices (C min)	3
PHDD8030	Pre-Clinical/Non-Clinical Studies for IND Approval (C min)	3

Course	Title/Desc	Credit
EDST8041	Multivariate Data Analysis (C min)	3
EDST8051	Qualitative Research Methods I (C min)	3
EDST8052	Qualitative Research Methods II (C min)	3
EDST8086	Experimental and Quasi-Experimental Research (C min)	3

Course	Title/Desc	Credit

The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Caring for the Underserved

Duration: **2 Years** Total Credits: **11 - 15** Award: **Graduate Certificate**

Overview

Embark on a transformative journey with the Caring for the Underserved Certificate program, a unique offering from the University of Cincinnati College of Nursing and Winkle College of Pharmacy.

This immersive program focuses on essential coursework and clinical training, nurturing your ability to become a compassionate advocate for vulnerable and marginalized populations, and is accredited by the Higher Learning Commission. Benefit from our dynamic and interactive approach, which combines innovative, practice-based training with insights from industry experts and community partners.

Collaborate with like-minded peers and receive mentorship from our dedicated and collaborative faculty. Together, let's provide unparalleled care that meets the diverse needs of patients, making a difference not only in Ohio, but also beyond.

Success

In this program, students engage in a minimum of 11 credit hours of online elective courses and experiential learning. They also direct their projects and professional development assignments towards serving underserved populations, an essential component of their master's or doctorate degree.

Our coursework delves into the impact of environmental and societal factors on the health of underserved populations, fostering collaboration among healthcare professionals to develop effective care strategies. Through this, students contribute new knowledge to enhance care plans and delivery, making a tangible difference in patient outcomes.

To learn more about this program's training and curriculum, view the Curriculum tab below.

Admission Requirements

To be considered for admission, please complete the University of Cincinnati Graduate Application and submit the following documents within the application:

- Submit a current resume or curriculum vitae (CV)
- Provide a letter of intent expressing your motivation for joining the certificate program
- Write a one-to-two-page paper responding to the following prompts:
  - How will the skills obtained in this certificate program enhance your professional career?
  - What specific skills do you hope to acquire by completing the certificate program?
  - Share an adversity you have overcome in your past.
- Obtain a letter of recommendation from an individual who can speak to your character and desire to assist those in need, such as a manager, volunteer coordinator, or spiritual leader.
- Participate in a personal interview

Clinical Trials Design & Research: New Drug & Device Development

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The Graduate Certificate program in Clinical Trials Design and Research: New Drug and Device Development, offers those individuals already working in the industry with an opportunity to acquire advanced training in clinical research activity as conducted and required by the US Food and Drug Administration (US FDA) and by other regulatory agencies. The Certificate program in Clinical Trials aims to program a global view of the contemporary scientific, regulatory, economic and operational issues pertaining to all phases of clinical trials-starting from early clinical pharmacology to market launch and beyond.

Career

As such the graduates of the program will be well suited to serve any of the following organizations:

- Companies developing pharmaceutical/ biopharmaceutical and devices.
- Contract research organizations that participate in conducting clinical trials.
- Contract Laboratories involved in bioanalytical and pathology labs.
- Contract manufacturing facilities such as those involved in pharmaceutical product manufacturing as well as specialized packaging for example the special needs for double-blind trials.
- Academic Health Centers and Research Institutions and community-based research groups.
- Regulatory agencies including institutional review Boards and companies involved in conducting site visits, audits, and compliance investigations.

Curriculum Guide Versions:
Clinical Trials and Research (Hybrid) Graduate Certificate

Advising

The Academic Director coordinates the efforts of participating advisors who will assist the student in the academic advising. Program advisors are available via electronic communications as well as telephone.

Admission Requirements

Students who have earned at least an undergraduate degree in chemistry, biology, engineering, or related disciplines from an accredited institution are eligible to apply for admission to the certificate program. Similarly, applicants with a completed professional degree such as a PharmD, MD, or DVM meet eligibility requirements.

>>Apply to the Clinical Trials and Research Certificate Program

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from a regionally accredited college or university, or an equivalent degree from outside of the U.S.
- A grade-point average (GPA) of at least 3.00 or non-U.S. equivalent
- If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Supplemental Application Documents

Consideration for admission requires completion of the UC Graduate Admissions Application and electronic submission the following documents:

- CV or Resume
- Statement of Purpose: Why do you plan to pursue a research-intensive PhD degree in Pharmaceutical Sciences at University of Cincinnati? What is your desired research focus area within the broad field of Pharmaceutical Sciences?

Transcript Information

All university transcripts with evidence of high academic achievement (undergraduate and graduate if applicable; unofficial transcripts are sufficient for initial review process).

Letters of Recommendation

Three letters of recommendation (applicants are encouraged to seek letters from individuals who can comment on research experience). Letters of recommendation from family, friends, current students, politicians, or clergy are not accepted.

Transferring To UC

Students that meet the admission criteria are eligible to transfer into the program. Transfer credits are evaluated for course equivalency on a case-by case basis upon review of transcript.

International Student Requirements

If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Graduation Requirements

Student must complete (4) courses and 12 credit hours in order to graduate with a certificate in Clinical Trials and Research.

Application Deadlines

Spring semester: December 1

Summer semester: April 30

Fall semester: August 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Cosmetic Science

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The University of Cincinnati offers an Online Cosmetic Science Certificate Program that strives to meet the needs of individuals currently working in the cosmetic and personal care industry and students in related fields who would like to gain employment in this area. This certificate provides unique training opportunities for students interested in cosmetic science provided by our internationally recognized faculty.

The Cosmetic Science Certificate Program is designed to (1) advance the science of skin care, cosmetic formulation, and hair care; (2) promote the development of high ethical standards in clinical and instrumental testing of skin care products; (3) improve the professional practices and status of the cosmetic science professionals; and (4) encourage and support education and research in cosmetic and related sciences. This certificate program is delivered in an online format that enables learners to advance their education without disrupting their current personal or professional roles. The online learning format allows learners to access program content on their own time and at their own pace allowing for a more flexible approach to teaching and learning.

Success

Over the past several years the college has evaluated the cosmetic science market and has dertermined that the certificate program provides a resource for mid-level industy professionals in the field of cosmetic science to advance their education. The certificate allows professionals, who may not otherwise be able to attend traditional educational programming, an opportunity to transcript evidence of advanced training.

Career

Careers are available in the areas of:

- Skin Care Formulation
- Cosmetic Technology
- Hair Care Scientist
- Clinical Testing and Instrumentation
- Fragrance Formulation and Testing

Curriculum

Students may take classes without formal acceptance into the certificate program; however, it is recommended that not more than six credits be taken prior to matriculation into the program.

This certificate will ultimately require completing 12 graduate credits and can serve as an entry point to the Online Master's Degree in Cosmetic Science. The 12 semester credit hours earned in the Cosmetic Science Certificate Program can be applied to the 30 graduate credits required for the MS degree.

Sufficient courses are offered each semester so that the program may be completed in approximately one year from matriculation if a student takes 2 classes per semester.

Curriculum Guide Versions:
Cosmetic Science- Graduate Certificate Online

Advising

This online program is designed to meet the needs of students with baccalaureate undergraduate degrees in the sciences who are currently employed in the cosmetic, personal care and chemical industry and wish to advance their careers, or those who are interested in pursuing careers in this field.

- All courses are offered asynchronously over the internet to accommodate the work and travel schedules of those who wish to take courses without distraction from their current employment.
- Each student collaborates with the academic advisor to develop a Plan of Study as a framework that outlines their courses for completion.
- Asynchronous learning with discussion forums and state-of-the-art learning management system allows convenience for effective learning.

UC Advantages And Special Opportunities

UC offers a certificate program to be delivered in a distance learnng online format that ultilizes best practices. UC currently is the only institution to offer this online learning opportuntity in Cosmetic Science.

Admission Requirements

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from a regionally accredited college or university or an equivalent degree from foreign country.
- A grade-point average (GPA) of at least 3.00 or foreign equivalent.
- At least one semester of undergraduate course work in organic chemistry and calculus, or related fields; or the equivalent as determined by the graduate program
- Resume/CV
- If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required.

Transcript Information

All college transcripts with evidence of high academic achievement (undergraduate and graduate if applicable; unofficial transcript is sufficient for initial review process).

Unofficial transcripts are sufficient to make offers of admission. However, all official and final transcripts must be received by the Graduate School by 30 days before the start of class enrollment to secure admission offer.

Official transcripts may be submitted with your application and sent to:

University of Cincinnati
Graduate School
110 Van Wormer Circle
Pox Office Box 00627
Cincinnati, Oho 45221-037

Letters of Recommendation

Two letters of recommendation, three preferred (applicants are encouraged to seek letters from individuals who can comment on research experience). Letters of recommendation from family, friends, current students, politicians, or clergy are not accepted.

More Information

If credentials are less than required for admission, an applicant may seek provisional admission status, which is granted at the discretion of the Program Director.

Prospective students are strongly encouraged to contact the Dr. Ananth (ananthky@ucmail.uc.edu) prior to applying to discuss admission requirements and program options.

Complete online application through the University of Cincinnati Graduate School.

Transferring To UC

Students who are accepted into the certificate program are eligible to apply for advanced standing to have their transfer credits evaluated for acceptance.

International Student Requirements

International students are eligible to apply

The Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is other than English. The minimum score required for admission is 90 (internet-based test). If you have a bachelor degree or higher from a United States university, this requirement will be waived.

Foreign applicants whose transcripts are not easily read may be asked to submit a full evaluation of transcripts by a U.S. agency is an option.

Graduation Requirements

To fulfill graduation requirements the student must complete a minimum of 12 graduate hours while in the program, with a GPA of 3.0 or greater.

Application Deadlines

Fall Semester - August 1
Spring Semester - December 1
Summer Semester - April 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Cosmetic Science : Online

Graduate Certificate

Cosmetic Science- Graduate Certificate Online

Duration: 1 Year

★Minimum Credits: 12 Credits

Required Courses

The following courses are required for the Graduate Certificate.
Please note that PCEU 8110 and PCEU 8024 serve as pre-requisites for many elective courses.

Course	Title/Desc	Credit
PCEU8110	Introduction to Skincare and Haircare Science (C min)	2
PCEU8024	Introduction to Surface, Colloid and Membrane Science (C min)	2

Elective Courses

Students should select eight (8) credit hours of electives from the following list.

Course	Title/Desc	Credit
PCEU7005	Pharmaceutical Sciences Journal Club (C min)	1
PCEU7010	Biostatistics & Research Methods (C min)	3
PCEU7050	Ethics in Scientific Research-Pharmacy (C min)	1
PCEU8005	Safety Assessment of Cosmetic & Topical OTC Drug Products- Pre Clin & Clinical (C min)	2
PCEU8015	Pharmacology-Basics and Cosmetic & Personal Care Product Applications (C min)	2
PCEU8016	Consumer Understanding for Formulators-Overview and Practice (C min)	2
PCEU8017	Introduction to Cosmetic Regulations (C min)	2
PCEU8023	Fragrance Science (C min)	2
PCEU8025	Advanced Surface, Colloid, and Formulation Science (C min)	2
PCEU8051	Skin, Hair, and Oral Products (C min)	3
PCEU8040	Color Cosmetics (C min)	2
PCEU8045	Color Cosmetics II (C min)	2
PCEU8060	Clinical and Instrumental Testing of Skin (C min)	2
PCEU8070	Molecular Biology of Skin (C min)	2
PCEU8080	Cosmetic Microbiology (C min)	2
PCEU8089	OTC Drug Product and Dietary Supplement Product Development (C min)	3
PCEU8120	Advanced Skincare Science (C min)	3
PCEU8130	Advanced Hair Care Science (C min)	3
PCEU8140	Manufacturing Hygiene: Facilities, Utilities, and Plant Engineering (C min)	2
PCEU8150	Manufacturing Hygiene: Microbiology, Product/Package Design, & Quality Assurance (C min)	2
PHDD8010	Global Regulatory and Development Strategies of Drugs and Medical Devices (C min)	3
PHDD8080	Pharmaceutical Economics and Management (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Global Regulatory Affairs in Drug Development

Online

Duration: 1 Year Total Credits: 12 Award: Graduate Certificate

Overview

The development of new drugs, including biological therapeutic agents and devices is a multifaceted, complex and expensive process. It is estimated that the development of a new drug after initial stages of discovery, can take up to 15 years and cost up to $2 billion dollars. The Pharmaceutical industry in under unpresented pressure to reduce the time to market and to reduce the cost of research and development.

The Global Regulatory Affairs in Drug Development certificate program is designed to provide biomedical students and professionals an opportunity to learn about the global regulatory framework within which all scientific activities and business strategies are pursued.

Career

The graduates of this certificate program are likely to find suitable jobs in the following:

- Companies developing pharmaceutical/biopharmaceutical and devices.
- Contract research organizations that participate in pre-clinical (ADMET) and clinical trials.
- Contract laboratories involved in pre-clinical formulations and development of drug delivery systems.
- Companies involved in bioanalytical and testing of drug products.
- Contract manufacturing facilities such as those involved in pharmaceutical product manufacturing as well as specialized packaging for example the special needs for double trials.
- Academic Health Centers and Research Institutions and community-based research groups.

Depending on the student's academic and professional background, the acquired knowledge and skills will equip student to start or advance their career:

- Those with BS degree may find an entry level position such in the above-indicate companies, either as research assistants and/or quality assurance/regulatory guides. Those with relatively advanced degrees (MBAs) will have opportunities to serve as Project Managers.
- Those with specific scientific skills (Pharm D, MS, Ph.D., Post-Docs) may serve as scientific leads or project leaders depending on their areas of expertise and experience. Specialized opportunities - in the current economic climate our recent experience suggests that some of the basic scientists working in the academic settings (primarily as post-docs) seek such opportunities to transition to an industry career, where they may be involved as:
    - Therapeutic experts
    - Medical writers
    - Medical Liaison
- Serve as consultants specializing in the development and testing of generics, biogenerics, sustained release formulations and fixed dose combinations.

Global Regulatory Affairs in Drug Development Hybrid Graduate Certificate

Advising

The Certificate program faculty and program advisors will communicate all course descriptions and requirements to the students about the Global Regulatoray Affairs in Drug Development Certificate program.

UC Advantages And Special Opportunities

UC James L. Winkle College of Pharmacy faculty have a strong track record of research and mentoring in drug development research (molecular pharmacology, biomarkers, pharmacokinetics, drug safety (including mechanistic bases for drug-drug interactions/adverse drug reactions), and formulation of novel drugs.

Admission Requirements

Students who have earned at least an undergraduate degree in chemistry, biology, engineering, or related disciplines from an accredited institution are eligible to apply for admission to the certificate program. Similarly, applicants with a completed professional degree such as a PharmD, MD, or DVM meet eligibility requirements.

>>Apply to the Global Regulatory Affairs in Drug Development Certificate Program

Programmatic minimum admission criteria include:

- A U.S. bachelors degree from a regionally accredited college or university, or an equivalent degree from a non-U.S. university
- A grade-point average (GPA) of at least 3.00 or equivalent
- If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Transferring To UC

Students are eligible to transfer to the program from other colleges or universities. Transfer credits will based on course equivalency and are viewed on a case-by-case basis after reviewing the approved transcript.

International Student Requirements

If English is not your native language, a Test of English as a Foreign Language (TOEFL) of at least 90 (internet-based) or 235 (computer-based) is required. Alternatively, an IELTS- minimum score of 6.5 overall band, or Duolingo English test of at least 110 is accepted.

Graduation Requirements

Students must complete (4) courses and 12 credit hours in order to graduate with a certificate in Global Regulatory Affairs in Drug Development.

Application Deadlines

Spring semester: December 1

Summer semester: April 30

Fall semester: August 1

Accreditation

The University of Cincinnati and all regional campuses are accredited by the Higher Learning Commission.

Global Regulatory Affairs in Drug Development : Online

Graduate Certificate

Global Regulatory Affairs in Drug Development Hybrid Graduate Certificate

Duration: 1 Year

★Minimum Credits: 12 Credits

Year 1

First Semester

Course	Title/Desc	Credit
PHDD8010	Global Regulatory and Development Strategies of Drugs and Medical Devices (C min)	3
PHDD8020	Discovery of Drugs and Therapeutic Biologicals (C min)	3

Year 1

Second Semester

Course	Title/Desc	Credit
PHDD8030	Pre-Clinical/Non-Clinical Studies for IND Approval (C min)	3
PHDD8040	Development and Manufacturing of Drug Products and Medical Devices (C min)	3

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Hygienic Manufacturing of Cosmetic Products

Online

Duration: 1 Year Total Credits: 13 Award: Graduate Certificate

Overview

The Hygienic Manufacturing of Cosmetic Products Certificate courses cover interdisciplinary topics relevant to cosmetic product science and hygienic manufacturing. Specifically, courses included in the program will cover basic formulation science, introductory skin and hair science, microbiology, product preservation, plant engineering and hygiene, product packaging, and quality assurance.

Career

Careers are available in the areas of:

- Plant hygienist
- Plant microbiologist
- Engineering microbiologist

Curriculum

Students may take classes without formal acceptance into the certificate program; however, it is recommended that not more than six credits be taken prior to matriculation into the program.

This certificate will ultimately require completing 13 graduate credits and can serve as an entry point to the Online Master's Degree in Cosmetic Science. The 13 semester credit hours earned in the Hygienic Manufacturing of Cosmetic Products Certificate Program can be applied to the 30 graduate credits required for the MS degree.

Sufficient courses are offered each semester so that the program may be completed in approximately one year from matriculation if a student takes 2 classes per semester.

Advising

This online program is designed to meet the needs of students with baccalaureate undergraduate degrees in the sciences who are currently employed in the cosmetic, personal care companies, engineers and formulators who wish to advance their careers, or those who are interested in pursuing careers in this field.

- All courses are offered asynchronously over the internet to accommodate the work and travel schedules of those who wish to take courses without distraction from their current employment.
- Each student collaborates with the academic advisor to develop a Plan of Study as a framework that outlines their courses for completion.
- Asynchronous learning with discussion forums and state-of-the-art learning management system allows convenience for effective learning.

UC Advantages And Special Opportunities

UC offers the certificate program to be delivered in a distance learning online format that ultilizes best practices. Asynchronous learning, with discussion forums and state-of-the-art learning management system allows convenience for effective learning.

Admission Requirements

- A BS degree in a field of science such as chemical engineering, chemistry, biology, or industrial engineering.
- Applicants should have taken courses in organic chemistry and basic calculus.
- International students may require a language proficiency test such as TOEFL, IELTS, or Duolingo.

Transferring To UC

Students who are accepted into the certificate program are eligible to apply for advanced standing to have their transfer credits evaluated for acceptance.

International Student Requirements

International students are eligible to apply.

An IELTS score of 7 or higher is preferred, or a Duolingo score of 110 or higher is acceptable. There may be specific situations where the English proficiency may be waived: English Proficiency Requirements for International Applicants | University of Cincinnati (uc.edu)

In some cases, foreign applicants may be asked to submit an evaluation of transcripts. More information can be found here: Official Transcript Submission Policy for Enrollment | University of Cincinnati (uc.edu)

Graduation Requirements

The Graduate Certificate program in hygienic manufacturing of cosmetic products requires completion of thirteen (13) semester credit hours of study. All are required courses for this program. Additionally, students must complete the coursework with a GPA of 3.0 or higher.

Application Deadlines

Fall Semester - August 1
Spring Semester - December 1
Summer Semester - April 1

Hygienic Manufacturing of Cosmetic Products : Online

Graduate Certificate

Hygienic Manufacturing of Cosmetic Products Graduate Certificate

Duration: 1 Year

★Minimum Credits: 13 Credits

Required Courses

The following courses are required for the Graduate Certificate

Course	Title/Desc	Credit
PCEU8080	Cosmetic Microbiology (C min)	2
PCEU8024	Introduction to Surface, Colloid and Membrane Science (C min)	2
PCEU8110	Introduction to Skincare and Haircare Science (C min)	2
PCEU8051	Skin, Hair, and Oral Products (C min)	3
PCEU8150	Manufacturing Hygiene: Microbiology, Product/Package Design, & Quality Assurance (C min)	2
PCEU8140	Manufacturing Hygiene: Facilities, Utilities, and Plant Engineering (C min)	2

★ This is the typical minimum number of credit hours students must complete.
The minimum number of credit hours can vary based on previously earned credits, and/or the level of placement into required coursework.

Pharmacy Leadership

Online

Duration: 2 Years Total Credits: 15 Award: Graduate Certificate

Overview

Combining leadership and professional development content in a series of health care business and management courses, the Pharmacy Leadership Graduate program customizes the learning and growth experience. Pharmacist professionals and student pharmacists will be prepared for career advancement in numerous healthcare roles. The program has a uniquely combined curriculum with courses provided by the Winkle College of Pharmacy, Lindner College of Business MBA Program, and College of Allied Health Sciences Masters in Health Administration (MHA) and Masters in Health Informatics (MHI) Programs.

Benefits of Online Learning

Designed for the working pharmacist or student pharmacist, our programs are offered completely online, providing flexibility and convenience, without interference in current employment or personal schedules.

- All courses are conveniently offered completely online – no classrooms or visits to University of Cincinnati are necessary!
- The curriculum is delivered via asynchronous online learning technology that allows coursework to be completed at the times that best fit your work and personal life schedules. Lectures are video-recorded and activities are posted for your review on your own schedule.
- Students can access course information at their convenience, 24 hours a day, and are also provided with opportunities for engaging in online discussions with professors and classmates.

Skills and Knowledge Gained

Students strengthen their leadership skills through courses with active learning experiences in the following areas and more:

- Communicating as a leader
- Developing entrepreneurial and innovative thinking
- Influencing and motivating others – Leading with Passion
- Finding your leadership style
- Conflict management
- Building and leading teams
- Collaboration
- Mentorship
- Strategic planning and defining measures of success
- Effective implementation
- Cultural competencies

Expected Outcomes

- Advance your leadership and management skills while building your knowledge of the issues facing our health care system and changes in business operations
- You will be prepared for personal career growth in our changing health care system

Preparing Pharmacists

- Apply valuable leadership and management skills and competencies to personally advance in their workplace
- Engage as leaders in pharmacy's professional organizations to drive continued advancement of our profession and pharmacists' roles in health care delivery

Career

Students gain skills to become supervisors, managers, and directors in numerous healthcare settings including:

- independent and chain community pharmacies,
- health-system inpatient, outpatient, long-term care, and clinical pharmacies,
- clinical coordinator roles,
- managed care, industry and more.

Curriculum

The Certificate program has a uniquely combined curriculum with courses provided by:

- James L. Winkle College of Pharmacy

- Lindner College of Business - Master's in Business Administration
- College of Allied Health Sciences - Master's in Health Administration
- College of Allied Health Sciences - Master's in Health Informatics

Curriculum Guide Versions:
Pharmacy Leadership GC

Admission Requirements

- Applicants must meet one of the following criteria
  - Proof of BS degree in pharmacy or Doctor of Pharmacy degree from an accredited institution, or
  - Proof of a BS degree from an accredited institution AND current enrollment in a Doctor of Pharmacy program AND proof of completion of required Foundational Knowledge coursework
- Minimum 3.0 GPA recommended
- International students only: minimum TOEFL score of >90 (if required)

Application Requirements

- Letters of Recommendation
- Resume/CV
- Statement of Purpose
- Application Fee

International Student Requirements

International Students are eligible to apply after taking the Test of English as a Foreign Language (TOEFL) which is required of all applicants whose native language is not English. With an earned undergraduate or graduate degree from a U.S. college/university, this requirement will be waived. The minimum TOEFL score for admission is 90 on the internet-based test (IBT).
The IELTS can be taken in place of TOEFL. The minimum required IELTS score is 6.5.

Foreign applicants whose transcripts are not easily read may be asked to submit a full evaluation of transcripts by a U.S. agency.

Application Deadlines

- Fall Semester - August 15
- Spring Semester - December 15
- Summer Semester - April 15
